On account of the ignorance about the basis of the appearance of sentience and its connection with the effects (of the same), the inner self, which is inside (a body) as its appearance, though beyond (all that), is seen by the Śruti as 'It is meditating, as it were'.¹ [416]

¹This meaning is in keeping with the word *dhyāyatīva*.

प्रत्यङ्मोहैकमात्रोत्थं ध्यानलेलायनादिकम् ।
तन्मिथ्याप्रतिपत्त्यर्थमिवेति व्यपदिश्यते ॥४१७॥

By (the use of the word) *iva* is mentioned the meditation, the performing of activities etc. as born of only delusion about the inner self, so that the unreality of it becomes known. [417]

This brings out the significance of *iva*, to be followed by an illustration in the next verse.

अभ्रयानं यथाज्ञानाच्छशभृत्यध्यवस्यति ।
क्रियाकारकवद्बुद्धिं तथा तत्साक्षिणीक्षते ॥४१८॥

As (a person) attributes the movement of clouds to the moon through his ignorance,¹ so also, does (a transmigratory being) see in the witness (viz. the inner self, the existence of) the intellect which is possessed of the various instruments of activity. [418]

¹SP rightly points to the Samdhi of *yathā* and *ajñānāt*.

धर्मधर्म्यभिसंबन्धान्यथा मोहैकसंश्रयात् ।
अस्पृशन्नपि नीलं खमिति संभावयेत्तथा ॥४१९॥
आत्मप्रत्ययगम्येऽर्थे निष्क्रियेऽकारकेऽफले ।
क्रियाकारकवद्वस्तु संभावयति तज्जडः ॥४२०॥

As (a person) would think of the connections between properties and things which are possessed of them, through (his) dependence on delusion alone, (as for example in) 'The sky is blue,' even if he is not touching it, so also [419] does a dull person (*jada*) see (i.e. think of) a thing, related to activity and its instrument even if the thing is to be understood (merely) by the experience of the inner self which is without any activity, not an instrument (of it) and does not (yield) any result. [420]

Here is presented one more illustration for averting the notion that the moon also has her own movement.

तस्मात्संभावनामात्रः संसारः प्रत्यगात्मनि ।

उक्तेऽर्थे संशयश्चेत्स्यात्प्रत्यग्दृष्ट्या समीक्ष्यताम् ॥४२१॥

Therefore, transmigration in relation to the inner self is merely an imaginary (thought) (and) in case there is a doubt about the thing stated, let that be seen with the help of experience.¹

[421]

¹*pratyakdr̥ṣṭi* is equated by SP with *vidvadanubhava* 'experience of the knowers'.

आत्ममात्रावसायित्वान्नानात्मार्थस्पृगीक्ष्यते ।

आत्मधीरात्मसंबन्धो नातोऽनात्मन ईक्ष्यते ॥४२२॥

The awareness of the inner self is not related to (lit. does not touch) a non-Ātman object, since it is finally ending in mere inner self; therefore, the connection of the inner self with any non-Ātman is not experienced (lit. noticed). [422]

Read NKL (ms. p.601) introductory: *vidvadanubhavo 'py ātmani sukhy aham iti saṁsāraṁ gocarayed atrāha—ātmamātreṭi*.

In verses 423-435 Sureśvara takes the support of the explanation

presented by *Bhartrprapañca* of the sentence *sa samānaḥ* *san* and it is to be in conformity with the earlier BUB.

In verses 423-427 Sureśvara states that exposition given by *Bhartrprapañca* as acceptable.

ससमानोक्तिसंबन्धमन्यथान्ये प्रकर्तते ।
 धीमनश्चक्षुरादीनि भिन्नरूपाणि सर्वथा ॥४२३॥
 नानाज्योतीषि सिद्धानि संहतानि मिथस्तथा ।
 विलक्षणानामपि सतां सामान्यं संहतात्मनाम् ॥४२४॥

(But) others posit the connection of the statement *sa samānaḥ* ... (with other statement) in yet another way: the intellect, *manas*, eyes and others are wholly different in nature [423] and have been established as (related to) different lights as mutually connected together; therefore, there is a common nature of them, even though they are of different natures.¹

[424]

¹SP explains thus: *ekādaśendriyāṇy ādityādiḥjyotiranugrhitāni vilakṣaṇāni prasiddhāni tathāpi mithaḥsamhatyakārīṇiṣṭhānīty arthaḥ*. NKL (ms. p.601) adds: *saṃbhūyakāritve ko hetur iti ced ekadehasthitatvena sādrśyam ity āha*.

सालक्षण्येऽपि च सति बुद्धेरेव विलक्षणः ।
 भोक्तृत्वं नाम धर्मः स्याच्चक्षुषो दर्शनं यथा ॥४२५॥

Even though there is (thus) commonness of nature among them, there is yet the property viz. being the enjoyer which distinctly belongs to the intellect alone, as (one's capacity for) seeing belongs to the eye¹ (alone). [425]

SP on the purport of this verse: *uktaṃ hi— sālakṣaṇye 'pi saty eva buddher eva dharmo vilakṣaṇo 'sya bhoktrtvam iti*.

¹The single eye refers to two eyes of any/every individual—the suppressed notion in the simile is: yet every seer has a different experience of the object seen.

बुद्ध्यादिव्यतिरेकोऽयं नैवं सत्युपपद्यते ।
प्रतीच उपपन्नस्तु स समान इतीर्यते ॥४२६॥

This being so, the distinction among the intellect etc. does not appear reasonable; but that is reasonable in the case of the inner self and, therefore, it is said *sa samānah* ... [426]

This is the meaning of BUB: *tatra katham vyatiriktatopapadyate iti phaloktiḥ*.

समानः सन्नुभौ लोकौ स्वप्नबुद्धान्तसंज्ञितौ ।
जन्मेदं च परं चैव संसरत्येष न स्वतः ॥४२७॥

Being the same this one self moves unto both the worlds which are said to be that of dreaming and that of waking. So also, this birth and yet another; but (this one) does not transmigrate on its own. [427]

Verses 428-430 present the logical justification of Bhartṛprapañca's view.

बुद्ध्यादिव्यतिरिक्तोऽयं न चेदात्मा भवेत्तदा ।
भूतमात्राविशेषत्वादुभयोरपि लोकयोः ॥४२८॥
उभयत्रापि युगपद्भोगः स्यान्न तु दृश्यते ।
तद्भावभावतस्तस्मादन्यज्ज्योतिरितीक्ष्यताम् ॥४२९॥

If the Ātman were not distinct from the intellect etc., then because of its non-distinction from whatever are beings it would have had in both of the worlds, [428]

(yes) at both the places, a simultaneous enjoyment (of various experiences in life); but this is not so known (lit. seen). Thus, since (the experience of) enjoyment would result from experience of that, viz. the inner self, therefore, let it be accepted that the light (of the inner self) is other (than the intellect etc.) [429]

SP on *buddhyādivyatikṛta* is: *uktaṃ ca— sa eṣa yadi vyatikṛto na syād ubhayor api lokayor bhūtasamudāyāviśeṣād ubhayatrāpi bhoga utpadyeta, na tu bhavatīti*. Also, on *tadbhāva* ..., *vyatikṛtātmajyotiḥ bhāve bhogasya bhāvād anyathā cābhāvād vyatikṛtatvam ātmajyotir ity arthaḥ*. Also note its remark that *vyatikṛta* is stated as an alternative for *samāna*.

पर्यायेण समानः सल्लोकौ यस्माद्ब्रजत्ययम् ।

आत्मा बुद्ध्यादितस्तस्माद्व्यतिरिक्तोऽवसीयताम् ॥४३०॥

Since being common, this (inner self) alternatively moves to two worlds, therefore, let it be concluded that it is distinct from the intellect etc. [430]

Verses 431-434 state that the enjoyment in a body are not for deities in the body.

देवताभोगशङ्का च विद्यते नेह का चन ।

उत्क्रान्तिस्वप्नकालेषु ताः प्रयान्ति यथागतम् ॥४३१॥

Further, there is not any kind of possibility (or, suspicion) that there is enjoyment (by the intellect etc. through) the deities, (for,) those depart as they had come, at the times of moving out of the body and of the duration of dream state. [431]

Read NKL (ms. p.602) explains thus: *devatānām bhoktrtve svapnabhogye na syāt tadadhyātmāparicchedaṃ tyaktvādhi-daivikātmanā sthiter ity arthaḥ*.

ईश्वराणां न च न्याय्यो भोगः प्रत्यवरस्तथा ।

देवताभ्योऽन्यदेवातो ज्योतिरात्मेति गम्यताम् ॥४३२॥

And, in the case of the lords a suitable and/or lower enjoyment is not reasonable; therefore, let it be understood that the light,

viz. the inner self, is altogether different from deities. [432]

विभुत्वाद्देवतानां च भोगः स्यादैककालिकः ।
न चासावस्ति तेनान्यदात्मज्योतिः प्रतीयताम् ॥४३३॥

Also, because of the all-pervading nature of the deities, the enjoyment of them would be simultaneous, but that is not so; therefore, let it be understood that the light, viz. the inner self, is altogether (a) different (light). [433]

स्वार्थचिन्मात्रभोक्तुश्च प्रात्यक्ष्यात्तद्विरोधिनः ।
न भोक्तृत्वं विना मानादाशङ्का निष्प्रमाणिका ॥४३४॥

Since there is direct perceptibility (in the case) of only sentience, (which is existing) for its own purpose, there cannot be the character of an enjoyer (in the case) of that which is opposed to it (viz. sentience). (Consequently) any notion (*āśaṅkā*), which is without any means of knowing (it), would be devoid of authority. [434]

Verses 436-443 discuss the illustration of a boat as given by Bhartṛprapañca for explaining the meaning of the sentence dhyāyati

अभिव्यञ्जकधर्मा वा परिस्पन्दात्मकास्तथा ।
नात्मनोऽस्य स्वतः सन्ति तत्साक्षित्वात्तु ते मृषा ॥४३५॥

Also (*vā*), the properties that are revealers and are of the nature of movement are not there in the inner self, by its own nature; and (*tu*) they are false, because of their having that¹ as the witness. [435]

¹That is, the inner self.

Verses 436-443 discuss the illustration of a boat as given by Bhartṛprapañca.

बद्धिस्थश्चलतीवात्मा ध्यायतीव च कल्प्यते ।

नौगतस्य यथा वृक्षास्तद्वत्संसारविभ्रमः ॥४३६॥

It is imagined that the inner self which is abiding in¹ the intellect,² seems to move, as it were and seems to meditate; this is as to a man, who is going in a boat, that the trees appear (to be moving). Similar to this is the transmigratory existence as an erroneous notion (in respect of the inner self).

[436]

This means: reflected in.

This is the same as *hr̥d*.

तटस्थनरवन्नावो नौस्थो नैवेक्षते गतिम् ।

नौगत्येकप्रयुक्ततत्त्वान्नाव्येकाग्रेक्षणोऽपि सन् ॥४३७॥

A man seated in a boat does not notice (i.e. become aware of) the speed of the boat, just as a man standing on the bank (of the river) sees it; being one who has fixed his eyes on the boat on account of his being affected (*prayukta*) by the movement of the boat.¹

[437]

A man in a boat feels that it is he who is moving, thus has superimposed the movement of the boat on himself and, therefore, though he looks attentively around himself, he does not make out that it is the boat that is moving and not himself.

यथैवं धिषणैकत्वे ध्यानलेलायने धियः ।

साक्षी स्वात्मातिरेकेण न पश्येन्नौस्थवत्पृथक् ॥४३८॥

Since this happens while there is activity of the intellect and when a person has entertained the oneness (of the inner self) with the intellect, the witness (viz. the inner self) does not see outside itself in the way of the man going in a boat not seeing (things) outside himself.

[438]

तटस्थनरवद्यस्माद्व्यानकम्पादिधर्मिकाम् ।
धियं साक्षीक्षते तस्मात्प्रत्यग्ध्यानादिवर्जितः ॥४३९॥

Since the witness sees the intellect having the properties of meditation and activity (lit. trembling) etc. (connected with it) like a man on the bank (of a river), therefore, the inner self is without any (performance of) meditation etc. [439]

नौप्रयुक्तातिरेकेण न नौस्थस्य गतिस्थिती ।
यतोऽतस्ते न जानाति नावो नौस्थस्तटस्थवत् ॥४४०॥

Since the states of movement and steadiness (in the case) of a man going in a boat are not beside those (that are) caused by (the movement and steadiness of) the boat, therefore, he does not know them as belonging to the boat as a man on the bank (of the river) knows. [440]

नौसतत्त्वापरिज्ञानाद्विपरीतप्रकल्पना ।
नौः स्थिता तीरजा वृक्षा द्रुतं यान्तीति निश्चितिः ॥४४१॥

The decision is this: This is an instance of wrong notion (which results) from the non-knowing of the nature of the boat; this notion is (like this): the boat is steady and the trees which are really on the bank (of the river) move quickly. [441]

This has reference to verse 436.

चैतन्याभासपर्यन्तं साक्षिणः परमात्मनः ।
बुद्ध्याद्यव्यतिरेके हि न स्याद्विवृत्तिसाक्षिता ॥४४२॥

The highest Ātman cannot have the nature of being the witness of modification of the intellect till when there is the appearance of sentience in (external things) up to the intellect. In the absence of any distinction (of the Ātman) from the intellect etc., there is no possible being the witness of the modification(s)

of the intellect.

[442]

निःशेषधीविकाराणां यस्मात्साक्षित्वमात्मनः ।

वैलक्षण्यमतः सिद्धं विकारिभ्योऽस्य साक्षिणः ॥४४३॥

Since the Ātman has the nature of being the witness of all the modifications of the intellect, therefore is established complete distinction of this witness from what undergoes modification.

[443]

In verse 444 is a repetition of the imaginary nature of transmigration in the case of the Ātman.

साक्षितत्वापरिज्ञानात्तद्विरुद्धार्थकल्पनम् ।

साक्षिसाक्ष्यादिमिथ्याधीस्तत्त्वज्ञानान्निवर्तते ॥४४४॥

It is on account of not knowing well the true nature of the witness that there arise the notions about external objects which are in nature opposed to it and this false knowledge of the witness and the witnessed etc.¹ recedes (or ceases to be there) on knowing the truth about it, i.e. sentience.

[444]

¹This refers to such discrete objects as the enjoyer and the objects of enjoyment.

Verses 445-448 explain the sentence sa hi svapnobhūtvā

कृतः पुनरिदं ज्ञानं धीसमानाश्रयत्वतः ।

लोकसंचरणाद्यस्य तत्साक्षित्वान्न तु स्वतः ॥४४५॥

‘How again does this knowledge result if (sentience) has the same support as (that of) the intellect?’¹ It is because of its being the witness which appears to be resulting from its movement etc. in the worlds,² but not on account of its own nature?

[445]

The doubt is expressed and answered on the basis of the sentence *sa hi* ... in BU.

¹This is also *hr̥d* in the body of an individual.

²This refers to meditation, seeing, worshipping and speaking, singing and so on.

स हीतिहेतुनिर्देश उक्तसिद्धयर्थमिष्यते ।

स आत्मा यः स्वयंज्योतिरनुमानेन दर्शितः ॥४४६॥

The statement of the reason in the words *sa hi* is intended (lit. desired) for proving what is stated earlier, viz. the inner self, which is self-luminous (and) what was established (lit. shown) by inference. [446]

प्रत्यङ्ङविद्यया यां यामवस्थामभिमन्यते ।

तत्तन्नामाप्युपादत्ते स्वप्नो भूत्वेत्यतो वचः ॥४४७॥

The inner self assumes each one of the names and the states whichever it has an awareness of,¹ therefore, there is a statement *svapnobhūtvā* 'having become *svapna*'.² [447]

This explains the meaning of *svapna* in no customary way and the derivation of the word in the sense proposed.

¹Alternative translation is: of which it comes to have the feeling of 'this is mine,' (ego).

²*svapna* is used as the name for the inner self.

बुद्धिजागरणे यद्वज्जागर्मीत्यभिमन्यते ।

बुद्धिस्वापेऽपि तत्साक्ष्यात्स्वप्नो भूत्वेति मोहधीः ॥४४८॥

As the inner self comes to have the awareness, 'I am awake,' when there is the waking state of the intellect, therefore, because of its being the witness of that (viz. the intellect) even in the sleeping state, it comes to have the deluding knowledge (or awareness) 'Having become the dream' [448]

This explains the meaning of *svapna* in the light of an illustration.

verses 449-455 explain *lokam imam*

इमं लोकमिदं जन्म स्वप्नो भूत्वातिवर्तते ।
स्वाप्नान्भोगांस्ततो भुङ्क्ते जाग्रद्वावनयाञ्जितः ॥४४९॥

(The inner self) on becoming *svapna*, goes beyond this world (and) this (worldly) life, then it enjoys the objects of enjoyment which belong to the dream state, having been (already) tainted by the impressions of the waking state. [449]

धर्मादिकारणोद्धूतवासनाराशिसाक्षिता ।
आत्मनोऽकारकस्यैव भोग इत्यभिधीयते ॥४५०॥

Being the witness of the entire mass of the impressions which has arisen from causes such as merit etc. is called enjoyment by the inner self, it is not at all an agent [450]

This explains why the inner self, though it is an enjoyer, is described as the pure inner self, untainted by enjoyment etc.

जाग्रल्लोकं यतो हित्वा स्वप्नलोकं प्रपद्यते ।
तस्मादसङ्गोऽकर्ता च स्वयंज्योतिरितीक्ष्यताम् ॥४५१॥

Since (this inner self) comes to the world of dream state, after it has left (lit. abandoned) the world of the waking state, therefore it, viz. the self-luminous, is described as unconnected (with the objects) and non-agent (of any activity). So this should be understood. [451]

आत्माविद्यैव मृत्युः स्यान्नित्यस्यापि मृतेस्ततः ।
मृत्युर्वै तम इत्याह श्रुतिरप्यात्मनिहृवात् ॥४५२॥

Death¹ is merely ignorance about the Ātman and, therefore,

there is death even of that eternal one.² The Śruti also has (for the moment) ignored (the true nature of) the Ātman and said 'Indeed, death is darkness (*mṛtyur vai tamah*)'.³ [452]

In the word *mṛtyorūpāṇi* (BU 4.3.7), the meaning of *mṛtyu* is expressed. The cause for that expression is also given.

¹This is yet another meaning of death.

²This is the result of ignorance, since the Ātman does not really die.

³BU 1.3.28.

स्वतो मृतस्य मरणं नाविद्यातो यतोऽन्यतः ।
अविद्यामात्मनो मृत्युं तस्मादाहुर्विपरिचतः ॥४५३॥

Since the death of a person, who is dead, as the course of his life would have it (*svataḥ mṛtaḥ*), is not on account of ignorance but from (some) other cause, therefore, the wise ones have said, 'Ignorance is death of the Ātman'.¹ [453]

¹*Īsopaniṣad* 11: *avidyayā mṛtyuṃ tīrtvā vidyayāmṛtam aśnute*.

प्राणोत्क्रान्तिनिषेधोक्तिर्यत आत्मावबोधतः ।
सम्यग्ज्ञानस्य बाध्योऽर्थस्तस्मान्मृत्युरितीर्यते ॥४५४॥

Since there is a statement (in the Śruti) of rejection about the movement (after death) of Prāṇa, on account of the knowledge of its own nature (on the part of the Ātman),¹ therefore, it is said that death is the thing to be stultified by right knowledge. [454]

This is another reason why ignorance about the Ātman alone is considered as death. Cf. BU 4.4.6: *na tasya prāṇā utkrāṃanti*.

¹It is possible to understand the word *ātman* as reflexive pronoun or as having the sense of the Ātman.

रूप्यते यैरसौ मृत्युः कार्याणि करणानि च ।
तानि रूपाणि भण्यन्ते मृत्योस्तस्य परात्मनः ॥४५५॥

The effects and the means of bringing them about are those by which death is seen; they are called the forms of that death of the highest Ātman. [455]

This explains the meaning of word *rūpa*. Read SP: *paramā-
anas tadupādheḥ sābhāsasyājñānasyeti yāvat*.

verses 456-460 is stated an alternative view, viz. all the products non-Ātman are called *mṛtyu*.

विषमस्थं यतः सर्वं प्राणव्यापत्तिकारणम् ।
तुषाग्रमात्रमपि हि मृत्युः सर्वमिदं ततः ॥४५६॥

Since all (this world of external objects), which is in (some) danger (*viṣamastha*) is the cause of the death of *prāṇas*; therefore, all this, even if it is of the measure of the lip of chaff, is, indeed,¹ death. [456]

This is to say in the words of SP: *sarvam anātmajātam mṛtyuḥ*. *rvam idam* refers to this whole world; cf. the next verse.

¹Read SP: *kaṇṭhādiniṣṭhasyordhvam adhaś ca nirgantum
amarthasyālpīyaso 'py annapānāder mṛtyuhetutvam anubha-
siddham iti hisabdārthaḥ*.

मौढ्यं जाड्यमविद्या स्यान्नित्यबुद्धात्मवस्तुनः ।
अनात्मनि च तद्दृष्टं तेन मृत्युरिदं जगत् ॥४५७॥

On the part of the thing, viz. the Ātman, there would be foolishness, (or, delusion)¹ insentience and ignorance, whereas that is seen in what is non-Ātman and, therefore, this universe is (subject to) death. [457]

¹Read SP: *ajñānam hi maudhyāparyāyam mṛtyuḥ*.

न हि प्रमाणतो मृत्युः शक्यो दर्शयितुं ततः ।
रूपाणि मृत्योस्तेन स्युः कार्याणि करणानि च ॥४५८॥

Since it is not possible to show that there is death (of the Ātman), by some means of knowing, therefore, it is (possible to show) the effects,¹ and their causes (in the world of external objects) as the forms of death. [458]

¹Śaṅkara refers to the body and organs as effects and their causes.

अतिक्रामति तान्यात्मा जाग्रत्स्थानाश्रयाण्यतः ।
क्रियाफलाश्रयाण्येष तस्माच्छुद्धो ध्रुवश्च सः ॥४५९॥

Since¹ the Ātman goes beyond those places of resort in the waking state, on which the actions and their results depend, therefore, that (Ātman) is pure and immutable. [459]

¹This is how, the word *atah* has to be understood and not in the usual sense of 'therefore'.

अस्ति शुद्धो ध्रुवश्चात्मा स चैक इति यत्स्थितम् ।
अस्यैवार्थस्य दाढ्यार्थं पूर्वपक्ष उदीर्यते ॥४६०॥

What is thus established, viz. that there exists only one Ātman, pure and immutable; therefore, there is (now) stated the *prima facie* view for justifying (lit. making firm) that meaning. [460]

In verses 461-467 there is shown the fault in the Buddhist (i.e. the Sautrāntika school) view in accordance with the *prima facie* view (which is explained further).

ननु धीव्यतिरेकेण धीसाक्षी नाधिगम्यते ।
धिया समान इत्येवं यः प्रागात्मोपपादितः ॥४६१॥

'But,' (it is objected,) 'there is not known any witness of the intellect that is apart from the intellect (viz. the one, the Ātman), who is earlier presented as one equal to the intellect.'

[461]

This is an objection, based on the reference to verse 445 above. It relates to some Buddhist view—the view of the Sautrāntikas, called *bāhyārthavādin* (s).

तत्सद्भावे न नो मानं प्रत्यक्षानुमयोर्यतः ।
किञ्चिदप्यस्ति तत्सिद्धिरतः स्यान्निष्प्रमाणिका ॥४६२॥

(The answer:) 'Because there does not exist for us, beside direct perception and inference, any (other) means of (ascertaining) its existence; therefore, any postulation (or, affirmation) of its existence does not have (or, cannot be) an authoritative means (for the knowledge of its existence).'

[462]

The argument is based on some Buddhist acceptance of only direct perception and inference for knowing any object. This points to the wrong in the acceptance of the existence of the Ātman through any other means of knowing, (for, it simply does not exist or, become available).

पूर्वधीव्यतिरेकेण तत्कालीना परा यथा ।
न धीः प्रत्यक्षगम्यैवं नात्मा प्रत्यक्षगोचरः ॥४६३॥

'As there does not exist, as directly perceptible, any other (intellect), beside the already existing intellect, as belonging to that time; so there does not exist the Ātman as an object of direct perception.'

[463]

This is to explain (how and) why the Ātman cannot be directly perceived. Read SP: *yathaikasmin samtāne pūrvajñānātirekeṇa*

jñānāntaram tattulyakālaṁ na pratyakṣam tathātmāpi dhīvyatirikto na pratyakṣa ity arthaḥ. NKL (ms. p.604) repeats this.

न चानुमानतस्तस्य सद्भावोऽप्यवधार्यते ।
सति धर्मिणि धर्माणां चिन्तेयमुपपद्यते ॥४६४॥

‘Also, it is not possible to determine its¹ existence with the help of² inference, since such a thought (or, consideration) about the properties becomes (or, is) reasonable (only) if there exists an object which has properties.’³ [464]

¹That is: of the Ātman.

²Or, by means of inference.

³It is held by the Advaita Vedāntin that the Ātman is devoid of any properties. Therefore, it is not possible to infer the existence of the Ātman on the basis of (or, on seeing) some properties of the same in the same way as *dhūmād* (= *agnidharmād*) *agnibhāvaḥ*. This is clarified by SP thus: *yad drśyaṁ tat svātiriktadrśyaṁ yathā ghaṭo drśyā ceyaṁ dhūr ity anumānāt tatsiddhir* (i.e. *ātmasiddhir*) *iti (āśaikā)*.

व्यङ्ग्यव्यञ्जकयोर्यत्तु सादृश्यभ्रमकारणात् ।
तद्विवेकापरिज्ञानाद्युक्तं तच्चाभ्युपेयते ॥४६५॥

‘That is accepted as a properly distinct (property) from what is to be revealed and the revealer (only) on account of the non-grasping of the distinction between the two, which is caused by falsely (or, wrongly) conceived similarity between them.’ [465]

The argument is: One accepts the distinction between what is to be revealed (*bhāṣya*) and what reveals it (*bhāṣaka*), e.g. a pitcher and light, but this distinction is rooted in the error of not understanding the real nature of the *bhāṣya* (here, the Ātman) and the *bhāṣaka* (intellect).

व्यङ्ग्यव्यञ्जकयोर्भेदस्तत्संबन्धात्परा यतः ।
प्रमान्तरोपलब्धोऽतः काममस्तु तयोर्भिदा ॥४६६॥

'Since the distinction between what is revealed and what the revealer is known even before their conjunction¹ by another way of knowing,' therefore, there will be distinction between the two.' [466]

This is acceptance of the *prima facie* view only for argument's sake, or, for the time being.

¹Cf. *mithaḥ saṁśleṣāt* (SP), for *sambandhāt* (and *yogāt* in the next verse).

सादृश्यतस्त्वभिन्नोऽयमिति भ्रान्तिरियं मता ।
तद्वेदस्योपलब्धत्वात्तद्योगात्प्राक्प्रमाणतः ॥४६७॥

And this one, viz. this (Ātman) is non-distinct (from the intellect) on account of the similarity (of their properties) is to be considered as false perception (or error) because, even before (the operation of) the means of knowing, this distinction between the two is known (lit. obtained) and through their conjunction.¹ [467]

¹Cf. note 1 under verse 466.

Verses 468-472 point to the absence of any means of knowing the distinction between the Ātman and the intellect.

धीरेव चित्स्वरूपेयं प्रथते ग्राहकात्मना ।
तथा विषयरूपेण सैवैका प्रथते द्विधा ॥४६८॥

This intellect itself, which has the nature of sentience, appears (or, acts as) one having the nature of the perceiver and that one itself, though one, appears as twofold by assuming the nature of the object (perceived). [468]

This explains, according to the *prima facie* view, the opposition to accepting oneness of the Ātman and the intellect owing to the opposition to direct perception.

नातो धीव्यतिरेकेण प्रत्यगात्मोपलभ्यते ।
प्रत्यक्षतोऽनुमानाद्वा यो धीसाक्षीति भण्यते ॥४६९॥

Therefore, individual self is not known (or, does not obtain) in addition to the intellect, through direct perception or inference, the one which is described as the witness of the intellect. [469]

This verse states the result of the one intellect appearing as twofold (as stated in the preceding verse).

यश्च पूर्वमुपन्यस्तो दृष्टान्तो भेदसिद्धये ।
व्यङ्ग्यव्यञ्जकवद्भेदः साक्षिसाक्ष्यार्थयोरिति ॥४७०॥
त्वदभ्युपगमादेव तदभ्युपगतं मया ।
परमार्थेन तत्रापि नैव भेदोऽस्ति कश्चन ॥४७१॥

And, that example (*dr̥ṣṭānta*) which was adduced before for establishing the distinction between the witness and the object to be witnessed, viz. as having distinction between what is revealed and the revealer, [470]

that¹ was accepted by me, for the time being, only because of your acceptance (of it); but, there does not exist there also any distinction whatsoever in reality. [471]

These verses give reason for the acceptance of the Siddhāntin's view only for argument's sake, as in verse 466 above.

¹The word *tat* refers to (*dr̥ṣṭānta*) 'example'.

अवभासात्मकः कुम्भः क्षणमात्रस्थितिर्यतः ।
अन्योऽन्यश्च प्रबन्धेन यतस्तत्रापि जायते ॥४७२॥

Since a pitcher, which is really of the nature of an appearance,

exists only for a moment, therefore, owing to the continuity (*prabandha*), there comes into being another, (as stated) there.¹

[472]

It is implied that what is sought to be proved is only a weak statement; cf. SP: *ataḥ sādhyavikalateti śeṣaḥ*.

¹This refers to (*dr̥ṣṭānta*).

Verses 473-474 introduce the discussion regarding the faults in the *Vijñānavāda* doctrine. In verses 4743-477 is stated the view of *Vijñānavādin* Buddhist and later in verses 478ff. the view of *Śūnyavādhin* Buddhist.

विज्ञानमात्रमथवा वस्तु स्यात्पारमार्थिकम् ।
क्षणभङ्गि घटाभासं क्लृप्तानेकविशेषणम् ॥४७३॥

Or rather, let (that) thing (viz. the *Ātman*) be the reality called *vijñāna*; it perishes in a moment and is like their appearance of a pitcher with its many attributes imagined. [473]

SP clarifies this thus: *vyavahārārtham viśinaṣṭi ghaṭeti; katham tarhi paṭādivyavahāras tatrāha kl̥pteti*.

एवं च सति दृष्टान्तो भवतो नोपपद्यते ।
सर्वस्य ज्ञानमात्रत्वात्तदन्यासंभवत्त्वतः ॥४७४॥

And, this being so, the illustration, which you have given, does not stand to reason;¹ since all being merely, (*vi*)*jñāna*,² there is no possibility of existence of any other than that. [474]

¹SP clarifies: *āśrayahīnatvād iti bhāvaḥ*.

²For metre's sake, Sureśvara uses only *jñāna* for *vijñāna*, see the next verse also.

तस्यैव ज्ञानमात्रस्य ग्राह्यग्राहकलक्षणम् ।
मलं प्रकल्प्य तत्स्वास्थ्यं शुद्धिं व्याचक्षतेऽपरे ॥४७५॥

(Yet) some others¹ first imagine impurity of the same which is merely (vi)jñāna, viz. having the characteristics of what is to be grasped and what grasps, and then later explains its purity, viz. being in its own (real) state. [475]

¹ A section among vijñānavādins themselves.

अभिन्नोऽपि हि बुद्ध्यात्मा विपर्यसितबुद्धिभिः ।
ग्राह्यग्राहकसंवित्तिभेदवानिव लक्ष्यते ॥४७६॥

Indeed, the Ātman, (which is not distinct) from the intellect, is accepted (lit. seen, *lakṣyate*) by those, whose intelligence has gone wrong, as having the distinction of the cognized, cognizer and cognition. [476]

SP seems to hold this argument as the Vārtika of Dharmakīrti: *tat kalpitatve kīrtivākyam udāharati*.

तस्यापि शुद्धरूपस्य शान्तिमन्ये प्रचक्षते ।
मलवत्संवृतं रूपं यस्मात्तस्यापि कल्पितम् ॥४७७॥

And (yet) others¹ postulate the annihilation (*śānti*) of even that, which has only pure nature, since, in their view, even concealed nature possessing impurity, of that (pure vijñāna) is imagined. [477]

SP states: *asyārthaḥ— arthābhāve katham jñānam jñāyate 'rtho 'neneti vyutpatteḥ—*

*pararūpaṃ svarūpeṇa yathā samvriyate dhiyā /
ekārthapratibhāsinyā bhāvān āśritya bhedinah //
tayā samvrtanānātvāḥ samvṛtya bhedinah svayam /
abhedina ivābhānti // (Pramāṇavārtika 1.69-70)*

yathāha—

*anādivāsanodbhūtavikalparinirmitaḥ /
śabdārthas trividho jñeyo bhāvābhāvobhayāśrayaḥ //*

(*Pramāṇavārtika* 1.206cd-207ab)

¹Namely, the *sūnyavādin* Buddhists.

Now is controverted the view that the *Āgama* does not establish such existence of the *Ātman*.

आत्माद्यर्थे च संवादाभावाद्वाक्यस्य नेष्यते ।
 प्रत्यक्षवत्प्रमाणत्वं नापि प्रत्यक्षतो गतिः ॥४७८॥
 अनुमानविरोधाच्च न नित्यात्मादिसंभवः ।
 प्रमान्तरविरोधेन न प्रमेहास्ति का चन ॥४७९॥

And, owing to the absence of its correspondence to the thing (called the) *Ātman* etc.,¹ the sentence, is not accepted (lit. desired) as authoritative like direct perception; and further, there is no way (of knowing the real thing) other than direct perception; [478]

and also there cannot be the existence of the (so-called) eternal *Ātman* etc.² possible on account of the opposition of inference; and, in this respect, there is not any right knowledge whatsoever on account of the opposition of other³ ways of knowing. [479]

SP supports the argument thus: *yathāha*—

smṛtiḥ pūrvānubhūte 'rthe darśanam vārtamānike /
tayor atyantabhede ca kasyādhedaḥ pratīyatām //
śabdau bhinnau svarūpeṇa vācyo 'rtho 'py atibhedavān /
sa ity eṣa parokṣārthe pratyakṣe cāyam ity api /
tasmān mithyā vikalpo 'yam bhinneṣv ekārthatāgrahaḥ //
 (source not traced)

¹Read NKL (ms. p.605): *ādīpadān nityatvādigrahaḥ*.

²Cf. SP: *ādīpadena dharmādyuktiḥ*.

³Cf. this refers to *pratyabhijñā* 'remembrance'.

प्रत्यक्षस्यार्थसंवादादनुमित्यविरोधतः ।
 सौगतं दर्शनं पथ्यं दोषवत्त्वन्यदर्शनम् ॥४८०॥

The Buddhist¹ view is helpful² since it is in agreement with

(or, corresponds to) the object which is directly perceptible and since it is not opposed to inference; whereas (*tu*) the other view is faulty. [480]

Read NKL (ms. p.605) introductory: *kṣaṇavādo 'pi mānāhīno mānaviruddhaś cet tatrāha pratyakṣasyeti. pratyakṣam vartmānam bodhayad avartamānatāvyāvṛttam bodhayatīti tasya kṣaṇikārthenasamvādā (sic) vakṣyamānakṣaṇikatvānumānena ca samvādāt kṣaṇavāda eva sādhuḥ ity arthaḥ.*

SP adds the following: *pratyakṣasyeti. asyārthaḥ— asti pratyakṣasya kṣaṇikādāv arthe sarvajñoktisamvādah. yathāha— sarvajñavacanārtheṣu kṣaṇikanairātmyādiṣu yat saṁśayaviparyāsa-rahitatayopadarśitārthaprāpakam jñānam tat sarvajñavacanārtthā-visamvādīty ucyate iti (not traced).*

tad dhi vartamānam grhṇad avartamānavyāvṛttam eva grhṇāti. uktam hi— tasya viśayaḥ svalakṣaṇam iti (Nyāyabindu 1.12)

¹This stands for the view of different Buddhist sects mentioned earlier.

²Namely, free from blemishes.

कल्पनेतरतः सर्वं सम्यङ्मिथ्येति मानतः ।

सर्वशून्यस्य मोक्षत्वादनावृत्तिश्च सेत्स्यति ॥४८१॥

On the basis of the means of knowing, all that is considered in the other view as correct/true (*samyak*) and/or false, is merely imagination and owing to the acceptance that the nature of liberation (consists in) what is devoid of all (so-called existing things), there would result (lit. be secured) non-return (to transmigratory existence). [481]

SP states: *na hi pratyakṣam anumānam vā tatra mānam grāhyaprāpyabhedenā kṣaṇikāder eva tadviśayatvopagamāt. yathāha— caturvidhasya pratyakṣasya svabhāvayogitayā svalakṣaṇākhyas caturarthah satyasvabhāvo grāhyo viśayas tadanyagrahane prayojanābhāvāt prāpyam tu satyeṣu nairātmyād iti (possibly this latter is a statement from the Bhāṣya of Bhartṛprapañca); and*

so anumānasya tu yathoktanairātmyādisāmānyalakṣaṇam eva
śayaḥ prāpyaṁ tad eveti ca (not traced).

ere there is a reference to verse 468 above and there is an
objection (codana) raised by Siddhāntin.

ग्राह्यग्राहकयोर्भेदो ननु भेदानुभूतितः ।
भेदस्यैवं च मिथ्यात्वं प्रत्यक्षेण विरुध्यते ॥४८२॥
ग्राह्यादिभेदवद्रूपं प्रत्यक्षं लिङ्गसंमतम् ।
एकस्योभयरूपत्वं पण्डितैः सुनिराकृतम् ॥४८३॥

Indeed, the distinction between what is grasped and what grasps
(becomes known) on the basis of the experience of the
distinction; thus there is falsity in the distinction and which
is opposed to direct perception. [482]

(Thus) a form (of knowledge) having the distinction of what
is grasped etc.¹ is directly perceptible and confirmed by its
characteristic(s) (and) the twofold nature of just one (form)
has been ever disproved/refuted (*sunirākṛta*) by the learned.²

[483]

SP in all probability quotes the view of Bhartṛprapañca thus:
thāhuh— yadi vijñānād anyo nāsti katham tarhi jānātīty ucyate
nāntīti jñānasya kartur abhidānaṁ śabdenopalabhyate. tatraiva-
bdo 'rthavān kalpayitavya iti.

¹The word 'etc.' refers to what grasps and the means of
grasping.

²This is on the authority of SP. This refers to earlier authorities
with Śabara at their head.

verses 484-485 refer to fivefold knowledge arising from direct
perception which gives (i.e. causes) the error, viz. awareness
distinct objects—*prima facie* view.

ज्ञानाभेदात् तत्सिद्धिस्तदध्यासात्तथा परम् ।
प्रथते भेदवज्ज्ञानं न क्वचिद्वस्तुसंश्रयात् ॥४८४॥

But (*tu*) references to oneness of *avabhāśya* and *avabhāśaka* gets established on account of non-differentiation in the knowing one and the other (gets established) by a superimposition of it on that.¹ Appearing any knowing one with differentiation in is established nowhere on account of its relation (*saṁśraya*) to another thing. [484]

The earlier stated objection to accepting *jñāna* as Ātman is answered by *prima facie* view.

ग्राह्यग्राहकमित्येवं नैव तत्प्रथते यतः ।
नीलपीतादिविज्ञानं नीलमित्येव तद्यतः ॥४८५॥

Since what is grasped and what grasps do not become established (*prathate*) for the reason that¹ *vijñāna* 'particular knowledge' of blue and yellow etc.² is that it is exactly the blue etc. [485]

¹SP explains the meaning of second *yataḥ* in the verse is *ataḥ*.

²The word 'etc.' refers to various objects of seeing.

This verse states that savikalpaka knowledge is but false.

अतस्मिंस्तद्ग्रहात्सर्वं मिथ्या स्यात्सविकल्पकम् ।
असंपृक्तस्य सम्यक्त्वं स्वरूपेणावभासते ॥४८६॥

Hence, all that is false which has various notions associated with it, since there is acceptance of that (*viz. vijñāna*) in what it is not (and) the truth of what is not associated with it appears only on account of its own form. [486]

SP justifies/supports *svāsamprkṛtasya* thus:

*vijñānaṁ jaḍarūpebhyo vyāvṛttam upajāyate /
iyam evātmasaṁvittir āśya yā jaḍarūpatā //*

(*Tattvasaṃgraha* 2000; *Tarkabhāṣā* 10.29).

The words *atasmims tadgraha* remind one of Śaṅkara's accepted definition of *adhyāsa* in *adhyāsabhāṣya* of BSB: *adhyāso nāma atasmims tadbuddhir*

Verses 487-490 refer first to the error in knowledge, according to the *Vijñānavādin* and then state its refutation (in 489-490).

नन विज्ञानमात्रेऽस्मिन्सम्यङ्मिथ्यात्वधीगतिः ।

निर्विकल्पे कथं ते स्याद्वद भेदोऽत्र किंकृतः ॥४८७॥

ज्ञानरूपं यथा शुद्धं क्षणं चैवावभासते ।

विकल्पकं तथैव स्याद्विभागस्तेन दुष्करः ॥४८८॥

इदं मिथ्येति चैतस्मान्मिथ्यात्वस्य कथं ग्रहः ।

विकल्पश्चेन्न मिथ्यात्वान्न चान्या गतिरस्ति वः ॥४८९॥

Indeed, how could there be in respect of intermediate perception, the understanding (*dhīgati*) about what is true and/or what is false, while there exists merely this *vijñāna*? Tell me: By what is caused this distinction?¹ [487]

Since (*yathā*) the pure form of *vijñāna* appears only for one moment just as (*tathaiva*) what entertains the notion (of another) also exists for a moment; therefore (the desired) division is very difficult to make! [488]

And, further, how could there be the grasping of the falsehood (of what is grasped) in the form, 'This one is false on account of this one'? And if there is no entertaining of (any) notion because of its false character, you do not have any other way.² [489]

This is the argument (*codana*) raised by Siddhāntin.

¹The implication in the argument is: If that *vijñāna* of a subject momentary, there could not be *vijñāna* of the object in another moment. This is explained in the next verse.

²Namely, other than accepting the distinction between what grasped and what grasps

मिथ्यामिथ्याविकल्पो हि स्थायित्वे वस्तुनो भवेत् ।
क्षणवादे विनष्टानां कस्य किं केन गृह्यते ॥४९०॥

Indeed (*hi*), entertaining different notions, viz. 'this is false' and/or 'this is true', can be (possible) if there is a thing which is permanent; and, (in the opinion) of those who are lost in (holding) the theory of momentariness, in falsehood, how could there be grasping of something, by someone else and by what (means)? [490]

In verses 491-494, the Buddhist answers away the objection of the Siddhāntin.

मैवं बाधात्तु मिथ्यात्वसिद्धिः स्यान्मृगतोयवत् ।
बाह्यस्याप्यग्रहो बाधान्न तु स्थिरतया मतः ॥४९१॥

Do not say so, because on account of the stultification of what is perceived (by the perceiver) falsehood would get established in the same way as (the falsehood of) mirage. The stultification even of the external object(s) is not accepted on account of its (similar) stultification and that (viz. any external object) is not held (by the Buddhists) as permanent (lit. steady). [491]

ननु द्रवस्तस्य मिथ्यात्वसिद्धिः कथमिहेष्यते ।
नैवं दृष्टत्त्वतः सिद्धेर्दृष्टे नानुपपन्नता ॥४९२॥

(Once again the Siddhāntin would ask:) 'Indeed, how do you accept as established the falsehood of what has perished (just after one moment), since on account of its being established as what is perceived, what is (actually) seen cannot be unreasonable?'¹ [492]

SP states the usual adage: *na hi dr̥ṣṭe 'nupapannam nāma*.

¹The Vedāntins hold *dr̥śyatva* as the reason for proving

mithyāṭva.

बाह्यवादेऽपि मिथ्यात्वं ज्ञानबाधेन जायते ।

स्थिरस्यैव हि मिथ्यात्वं न चेदं राजशासनम् ॥४९३॥

In the accepted view of (the existence of) external objects (by the *bāhyārthavādins*) also, there results falsehood through the stultification of *jñāna* and, in the case of (what is accepted by you as) permanent there is no falsehood; and, further this is not a command of a king.¹ [493]

¹The view of the Siddhāntin, who is here an opponent, is not like a command of a king, which ought to be accepted.

इत्यादिकल्पनाः प्रत्यगैकात्म्याज्ञानहेतुजाः ।

विभीषिका इमाः सर्वा वेदवर्तमानुगामिनाम् ॥४९४॥

This and such other notions are produced from ignorance about the nature of the inner self as being only one; all these are (just) scarecrows (put before) those who follow the instruction (lit. path) of the Veda. [494]

This is the Buddhist's answering away the Siddhāntin, the believer in the Veda.

This view is supported by SP with quotations in some texts. P observes: *adhyakṣam tāvad vartamānagrāhiḥ pūrvottara-avacchedakam. yathāha—*

vastutām hi paricchindad avacchindad avastutām /

tadbāhyāsambhavam śaṁsad vastujñānam pravartate //

(not traced)

SP further adds: *anumānam api tanniścāyakam. uktam hi—*

yat sat tat kṣaṇikam sarvam iti vyāptiḥ pratīyate /

sattvam akṣaṇike bādhat kṣaṇikam niyatam yataḥ //

further clarifies that there is no difference whatever between them (*na vastuto bhedaḥ*) and also none between *kriyā* and *karana* us: *yathāha—*

*kṣaṇikāḥ sarvasaṃskārā asthirāṇaṃ kutaḥ kriyāḥ /
bhūtir yeṣāṃ kriyā saiva kārakaṃ saiva cocyate //*
(Tantravārtika 170.10 on 1.3.10).

It adds: *na ca śabdārthasambandhaḥ saṃketād anyo 'sti. yathāha—
śabdāḥ saṃketitaṃ prāhur vyavahārāya sa smṛtaḥ* (Pramāṇa-
vārtika 1.92).

Also, *na cākṛtiḥ śabdārthaḥ .. apohas tu tadarthaḥ. uktam hi—
dhiyaṃ vastupṛthagbhāvamātrabījaṃ anarthikāṃ /
janayaty atha tatkāriparihārāṅgabhāvatā //*
*vastubhedāśrayāc chārthe na viśaṃvādikā matā /
tato 'nyāpohaviṣayā tatkartāśritabhāvataḥ //*
(Pramāṇavārtika 1.113-14).

Verses 495 begins to explain *na svātmānavabhāsatvād ghaṭādeḥ*
in BUB.

विभीषिकानिषेधार्थमत्र प्रतिविधीयते ।
बाह्यार्थवादिदोषोक्तिस्तत्र तावदिहोच्यते ॥४९५॥

For rejecting (i.e. for ignoring) the scarecrow(s) here is now
a reply given in the statement of the faults in the arguments
of those who hold the external objects (as true); and, in that
respect, the following is stated: [495]

In verses 496-800, there is refutation of the *bāhyārthavāda*; i.e.
na svātmānavabhāsyam ghaṭādi.

स्वात्मावभास्यः कुम्भादिर्दीपादिश्चापि नान्यतः ।
इत्यादेर्न्यायबाह्यत्वं यथा तदभिधीयते ॥४९६॥

(Now) is explained (lit. will be said) as to how¹ it is illogical
(lit. outside logic (to hold)) that a pitcher etc.² is illuminated
(or, made known) by itself and also that a lamp etc.³ (is)
not (illuminated) by another. [496]

¹See *ityādeḥ* where *-ādi* refers to the tentatively accepted

duality of *avabhāśya* and *avabhāśaka*.

²This refers to the light which is associated with a pitcher (*sāloka*, *ghaṭa*).

³This refers (either) to another lamp, or (this might be better) to the intellect (*buddhi*).

स्वात्मावभास्यो बाह्योऽर्थ इत्येतदसमञ्जसम् ।

नानन्यव्यञ्जकत्वं स्याद्यस्मात्कुम्भादिवस्तुनः ॥४९७॥

It is unreasonable (lit. foolish, or not wise) (to hold that) an external object is illuminated by itself, since, in the case of thing(s), viz. a pitcher etc., there cannot be the nature of what is not illuminated by another (viz. light). [497]

This explains *na svātmāvabhāśakatvaṃ ghaṭādeḥ* (BUB p.541). It is clarified in the next verse.

तमस्यवस्थितः कुम्भः स्वात्मना नावभासते ।

तदन्यदीपयोगे तु नियमेनावभासते ॥४९८॥

A pitcher, which is (remaining) in darkness, does not illuminate itself (lit. does not become apparent to one of its own); but it becomes apparent invariably, when (it is) in conjunction with (some) light (which is) other than itself. [498]

The second line emphasises the fact that the form of a pitcher cannot become apparent of its own.

संश्लिष्टयोरपि तयोरन्यत्वमिति निश्चयः ।

संयोगे च वियोगे च विशेषस्य समीक्षणात् ॥४९९॥

And, even while the two¹ are in conjunction, it is certain that they are distinct (from each other), because the distinction (between them)² is well observed (whether there is) conjunction and/or disjunction (of them).³ [499]

- ¹These are the pitcher and the light.
²Namely, that they are two different particulars.
³The disjunction is noticed particularly when light is in conjunction with a piece of cloth and as disjuncted from the pitcher, as clarified in the next verse.

अन्यत्वमेव विज्ञेयमालोकघटयोस्ततः ।
 रज्जुकुम्भादिवन्नैक्यं विशेषस्य समीक्षणात् ॥५००॥

(Then,) it should be understood (or, known) that light and a pitcher are certainly distinct (from each other), owing to the distinctness seen (between them) and (that there is) not oneness (of them) in the same as (there does not exist oneness) between a rope and a pitcher.¹ [500]

This is the final statement regarding *vyāpti* which is understood in the argument.

¹This implies the distinction between the intellect and the Atman which is its illuminator. Cf. *naikyam buddhitadava-
 bhāsakayoḥ* and also, *yadbhāsyam tatsvātiriktabhāsyam yathā ghaṭo
 bhāsyā ceyam dhīḥ* (SP).

In verses 501-505 is stated a *prima facie* view: *dīpasya svā-
 bhāsyatvam*.

ननु दीपः स्वमात्मानं स्वात्मनैवावभासयन् ।
 दृष्टो दीपप्रकाशार्थं न हि दीपान्तराहतिः ॥५०१॥

(An objection by the *prima facie* view:) 'Indeed, a lamp is seen as illuminating itself by itself; and indeed bringing another lamp is not noticed for illuminating a lamp'. [501]

This stresses over the self-illuminating nature of a lamp. Read, or clearly getting at the purpose of this verse, NKL (ms. p.608):
*vam api dhīḥ svātiriktāvabhāsyā avabhāsyatvād ghaṭavad ity
 numātum śakyam dīpe vyabhicārād iti codayati nanv iti.*

नावभास्यत्वतुल्यत्वाद्दीपस्यापि घटादिभिः ।

घटवन्नात्मनात्मानं प्रकाशयति दीपकः ॥५०२॥

(The answer to the objection:) '(This is) not so because of the similarity of a lamp also with a pitcher and others (viz. external objects) on account of its requiring illumination (by another)—(indeed) a lamp does not illuminate itself by itself, (just) as a pitcher (does not, i.e. cannot, do it)'. [502]

The implication is: A lamp and a pitcher are both things which are illuminated by another; yet, unlike a pitcher, a lamp, despite its illuminating other things, is illuminated by a sentient being which is associated with the intellect. This is clarified in the next verse.

NKL (ms. p.608) on this verse is somewhat puzzling—read: *ghaṭādibhir ālokasya jadatvam aviśiṣṭam ato ghaṭavad ālokaḥ svātmānam prakāśayatīty arthaḥ*.

घटप्रदीपयोस्तावद्व्यङ्ग्यव्यञ्जकसंगतिः ।

तदन्यात्मैकनिर्ग्राह्या प्रत्यक्षेणानुभूयते ॥५०३॥

As for the case of (both) a pitcher and a lamp, there is an association of what is to be revealed and what is the revealer (and) that is grasped as illuminated by the Ātman which is other than them by direct perception. [503]

Read SP (for clarification of the argument) introductory: *yo bhāsyah sa svetarabhāsyō yathā ghaṭo bhāsyas cāyam ity ukte drṣṭānte vipratipattim āśaikyoktam smārayati*.

व्यतिरिक्तात्मविज्ञानव्यङ्ग्यत्वं घटवन्न सः ।

दीपो व्यभिचरत्यत्र तच्चाप्यनुभवाश्रयात् ॥५०४॥

एवं च सति दीपादेर्भिन्नजातीयचैतन-

व्यङ्ग्यत्वं घटवत्तावदवश्यम्भावि गम्यताम् ॥५०५॥

That lamp does not vary in its nature of being illuminated by the knowing of the Ātman (i.e. the intellect of an individual¹ which is) distinct/apart from itself and, (is heretofore), like a pitcher. Further, this also (is understood) here² by resorting to (one's own) experience. [504]

This being so, let it be understood that there is (i.e. occurs) invariably in a lamp etc. the nature of being illuminated by some sentience which is, in nature, different from itself, in the same way as in a pitcher.³ [505]

The argument is: as a pitcher cannot be noticed (i.e. illuminated), if it is without any light which illuminates it, so also a lamp, though illuminator of other objects, is not seen when there is absence of the intellect.

¹The meaning of *ātmajñāna* is an individual's intellect.

²That is, in everyday life.

³The word *ghaṭavat* is to be understood as *ghaṭe iva* by Pāṇini's rule 5.1.116: *tatra tasyeva*.

Verse 506 expresses a doubt that there is dissimilarity of a lamp and a pitcher.

ननु कुम्भादिवैधर्म्यं प्रदीपस्य समीक्ष्यते ।
नात्माभिव्यक्तये दीपो ह्यन्यमापेक्षते स्वतः ॥५०६॥

(An objection:) 'Indeed, the distinction of a lamp from a pitcher etc. is noticed. Indeed, a lamp does, not on itself, depend on (or, expect) another for its being revealed'. [506]

The argument is: A pitcher invariably expects light to illuminate it, whereas a lamp, which is an illuminator of other objects, does not so need it.

Further, read NKL (ms. p.608): *dīpasya svābhāsanāt prāg asaṭo viśeṣasyottarakālasattve tasya svābhāśakatvaṃ yukataṃ na ca dīpe svasmād anyasmād vābhāṣyatvopayogī viśeṣo 'sty ato dīpo svātmānam bhāṣayatīti vaco riktam ity arthaḥ*.

Verse 507 states that a lamp cannot be an illuminator of itself, owing to there being no particular distinct quality.

व्यनक्ति नात्मनात्मानं प्रदीपो घटवत्सदा ।
स्वतो वा परतो वास्य विशेषाभावहेतुतः ।
विशेषेऽसत्यसाध्वेतद्वतोदाहृतं वचः ॥५०७॥

(Just) like a pitcher, a lamp does not ever illuminate itself, since there is (noticeable) an absence of any particular difference (of it) from itself or from other, owing to the absence of any particular cause (of difference). (And) when there is not (any such) difference, this statement of yours¹ is not reasonable (lit. well-made). [50]

This verse explains the thought in BUB: *na svataḥ parato vā viśeṣābhāvāt*. NKL (ms. p.608) remarks only this: *tasmān na svābhāsyateti śeṣaḥ*.

¹That is, the one made in the preceding verse.

Verses 508-511 affirm that, as a rule, a lamp can illuminate only other substances.

दीपस्य घटवद्यस्माद्विन्नविज्ञानगम्यता ।
घटाद्यर्थाविशिष्टैव यत्त्वेतदभिधीयते ॥५०८॥
दीपोऽयमात्मनात्मानं व्यनक्तीति न तच्छुभम् ।
प्रागूर्ध्वं तदभिव्यक्तेर्विशेषस्यासमीक्षणात् ॥५०९॥

Since a lamp has, like a pitcher, the nature of being known by another, (who is) knowing (viz. the intellect),¹ (and what is) non-different from that of objects such as a pitcher. And now, as to what you have said, [50]

(‘viz.) this lamp illuminates itself, on its own,’ is not good (i.e. reasonable), because of the non-observation of its difference (from others) which is not seen, before and/or after. [50]

प्रदीपासंनिधौ यद्वत्कुम्भस्य प्रसमीक्ष्यते ।
 संनिधौ च विशेषो न प्रदीपे तद्वदीक्ष्यते ॥५१०॥
 आत्मत्वान्न हि दीपस्य कम्भादेरिव संनिधिः ।
 असंनिधिर्वा न्याय्योऽयं भेदेऽसौ द्रव्ययोर्यतः ॥५११॥

As the particularity (in form etc.) of a pitcher etc. is noticed when a lamp is not in the nearness (of it), but it (viz. any particularity) is not seen in the case of a lamp, even while that (lamp) is in the nearness (of the pitcher etc.; [510] because, the proximity of, or distance from a pitcher etc. (in the case) of a lamp is not in accordance with reason, owing to its own nature (viz. of being an illuminator itself), since this (particularity) is noticeable when there are two (different) *dravyas* (substances). [511]

This is based on the idea of a pitcher, which is to be revealed, and a lamp, which reveals it. In the case of the lamp, however, the case is different in that the lamp itself is the revealer of objects, The nature of being illuminated (i.e. seen) in the case of a lamp is owing to the grasping of it by an individual's intellect. SP points out verse 510 as a *vaidharmya dr̥ṣṭānta*.

एकाग्निव्यक्तेर्न यथा दाह्यदग्धत्वसंगतिः ।
 द्वयोरपि समानत्वाद्व्यङ्ग्यव्यञ्जकता तथा ॥५१२॥

As, there is not (i.e. cannot be) the presence together of what is to be burnt and what burns, while (there exists only) one, (substance, viz.) individual fire; so also, there (is not) the presence together of what is to be revealed and what reveals (in the case of but one lamp), since both of them are but one. [512]

This argument presupposes the difference between a lamp and a pitcher as two different objects being revealed by an individual's intellect and with the help of some light.

यत एवमतोऽसाधु भवतैतदुदाहृतम् ।
अभिव्यनक्ति दीपोऽयमात्मनात्मानमस्ववत् ॥५१३॥

Since this is so, it is not reasonably (or, well) said by you that a lamp reveals itself, since (it does) reveal itself by itself like a thing other than itself (viz. there is a pitcher, another thing). [513]

Verses 514-517 are a refutation of the notion that a revealer (or, an illuminator) is itself what is to be revealed (by itself), so that it becomes known.

विज्ञानमपि तद्विन्नजातिचिद्ग्राह्यमिष्यताम् ।
व्यञ्जकत्वाविशेषत्वाद्रविचन्द्रप्रदीपवत् ॥५१४॥

Let *vijñāna*¹ also be accepted as what is grasped by sentience which is of a genus/kind different from that of it (viz. *vijñāna*), since it does not have any difference in respect of being a revealer, like the sun, the moon and a lamp. [514]

¹Cf. SP: *yad vyañjakam tat svavijātīyavyaṅgyam*. In the next verse, this is paraphrased as or stated to be, *bodha*.

संचेत्यते यथा दीपो विज्ञानमपि तत्तथा ।
संशयो निश्चयश्चायमित्येतच्चानुभूतितः ॥५१५॥

As a lamp is revealed (by the intellect), so also is (revealed) even *vijñāna*. That there is a doubt and there is, similarly (*ca*), a decision (about its being what is revealed) proceed from (a person's own) experience (of them). [515]

चिद्व्यञ्ज्यत्वे च बोधस्य साक्षादवधृते सति ।
किं ग्राह्यज्ञानगम्यत्वं किंवा ग्राहकगम्यता ॥५१६॥

When it is directly confirmed that cognition is revealed by

sentience (a question arises:) 'What is it, viz. being grasped by the knowledge of what is to be known/grasped? or, is it being known/grasped by what/who grasps?' [516]

Cf. SP *prakṛtaṃ jñānam bodhaśabdārthaḥ*.

तत्र संदिह्यमानेऽर्थे यथालोकं विनिश्चितिः ।
लोके सिद्धा च दीपादेर्भिन्नग्राहकगम्यता ॥५१७॥

In this (lit. that) case, let there be a decision in respect of the doubtful matter, as (there is one) in the world. In the world, it is established that a lamp etc.¹ is grasped (cognized) by who is different (from the former). [517]

¹*ādi* refers to the sun, the moon and others which can illuminate other objects; see verse 514 above.

Verses 518-520 affirm that the *Ātman* is different from (what is) the one that grasps.

ग्राहकग्रहणग्राह्यभावाभावविभागवित् ।
ग्रहणादेश्च यो भिन्नः स आत्मेत्यवगम्यताम् ॥५१८॥

Let that be known as the *Ātman*,¹ who knows the division of the presence and the absence of what/who grasps, (the means of) grasping and what is grasped and who is different (from all of them). [518]

This refers to *vijñāna* of the Buddhists which has to be taken as being known to sentience.

¹This refers to sentience which is capable of understanding the different things mentioned in the verse.

ननु ज्ञानादिगम्यत्वे ज्ञानाद्यन्तरसंश्रयात् ।
अनवस्थेति दुर्वारा नैष दोषः कुतो यतः ॥५१९॥
स्वतो हि ग्राहकादीनां ग्राहकत्वादिसिद्धितः ।

ग्राहकाद्यन्तरापेक्षा नैव स्यादविशेषतः ॥५२०॥

(An objection:) 'But, indeed, when knowledge¹ is (to be taken as) what is grasped (only) by resorting to another knowledge etc.,² there is (acceptance of) *infinite regress*, which is unavoidable!' (The answer is:) '(No!) this is not a fault'. It may then be asked:) 'Why/Whence?', (and the answer is:) 'Since, [519] indeed, what/who grasps etc. do get established (or, come into existence) by themselves as what/who grasps etc. and do not expect (or, depend on) other(s) as what grasps, there being non-difference among them (in this respect)'. [520]

¹This seems to stand for *vijñāna* in the Buddhist's view.

²This stands for *vijñānāntara*.

Verse 521 points out that being an illuminator is the nature of knowledge.

स्वमहिम्नैव चेन्न स्याद्ग्राहकादि ततोऽन्यतः ।

न स्यादतिशयाभावाद्ग्राहकाद्यन्तरादपि ॥५२१॥

If what/who grasps etc.¹ would not come into existence by its own excellence, then that² would arise from another (and) also from any other that grasps etc.¹, there being no excellence³ in the same (i.e. the other that grasps etc.¹). [521]

¹This understands *grahāṇa* and *grahāṇa* (of those) which were already mentioned in verse 518 above.

²This refers to *grāhakādi* (i.e. *grāhaka* and *grahāṇa*).

³That means: they do not have the capacity to illuminate them etc.

Verse 522 states as the prima facie view, the result, viz. infinite regress.

ननु ज्ञानस्य तद्विन्नग्राहकग्रहणे सति ।
करणान्तरव्यपेक्षायामनवस्था प्रसज्यते ॥५२२॥

(An objection:) 'Indeed, when it is held that there is (need) for any knowledge of (i.e. of *viññāna/jñāna*) another that grasps (etc.), there would be need of yet an other and (so on), which would mean *infinite regress*'. [522]

In verses 520-521 there was an argument regarding *infinite regress* in respect of *grāhaka* and *grahaṇa*. And now it is related to the organs which act as the means of grasping the objects.

Verses 523-530 are the refutation of the aforesaid infinite regress.

नियमाभावतो नासावनवस्था प्रसज्यते ।
ग्राह्यग्राहकसंबन्धे नियमो न हि वीक्ष्यते ॥५२३॥

(The answer:) 'There would not contingently follow *infinite regress*, for there is not seen any rule¹ (invariable relation) (in respect) of what grasps and what is/are grasped'. [523]

¹Cf. SP: *niyamo 'tiriktakaraṇasya*.

ग्राह्यग्राहकसंभिन्नं दीपवत्करणान्तरम् ।
यथा सर्वत्र नैवं स्याद्ग्राह्यग्राहकसंगतौ ॥५२४॥

As there is everywhere no other means (or, organs) which is mixed (i.e. existing together) of what is to be grasped and what/who grasps, as (in the case of) a lamp,¹ (so are other things also), viz. what is to be grasped and what/who grasps. [524]

This is an argument based on *vaidharmya* = *dr̥ṣṭānta*.

¹Cf. SP: *vatih svarūpaviśayaḥ*; it means the need of an eye that grasps the existence of a lamp, though it (viz. the latter) illuminates other objects.

घटस्य दर्शनं तावत्प्रदीपादिपुरःसरम् ।
प्रदीपवीक्षणे नैव प्रदीपान्तरमार्गणम् ॥५२५॥

In other words (*tāvat*), the seeing of a pitcher is (invariably) preceded by (the existence of) a lamp etc. (which illuminates the former); but, in seeing a lamp, there is no necessity of (having the help of) another lamp. [525]

तस्मान्नैवानवस्थेह कथंचिदपि शङ्क्यते ।
करणद्वारिका नापि ग्राहकद्वारिका तथा ॥५२६॥

Therefore, there is not (or, cannot be) here,¹ in any way, possible to entertain suspicion about (i.e. the contingent fault of) *infinite regress*— not through (the need of) even² some means as also³ not through (that of) one who grasps. [526]

¹Cf. SP: *iheti buddhyādeḥ sākṣivedyatvoktiḥ*.

²This is *api* which necessitates the inclusion (or, postulation) of *infinite regress* related to the *kārya* 'action' (viz. *grahana*), as SP points out.

³The word *tathā* is for the inclusion of the result expected from action.

ग्राहकाद्यतिरेकेण तद्विरुद्धात्मवस्तुनः ।
सद्भावं प्रागवोचाम प्रत्यक्षैकप्रमाणतः ॥५२७॥

(And) I have already¹ stated (i.e. postulated) the existence of the thing (called) Ātman beside (i.e. in addition to) what/who grasps etc. (and that is) opposed (in nature) to it²—this on the authority of just direct perception.³ [527]

¹This is reference to SV.

²Refer to *tat* in *tad-viruddhātmavastunaḥ*.

³That is, *anubhava* 'experience'.

प्रत्यक्षादनुमानाच्च तथा चैवागमादपि ।

ग्राहकाद्यतिरिक्तरिचतिसिद्धस्तत्साक्ष्यतः परः ॥५२८॥

It is on the basis of direct perception, and of inference, as also of scripture, that there is established (the existence of) sentience which is beside (or apart from) what/who grasps etc. and its witness—and also higher than (lit. beyond) the same (lit. this one).¹ [528]

¹SP adds: *ato na tasmin vivaditavyam ity arthaḥ.*

लोकायतविचारेऽपि प्रत्यक्षैकप्रमाणतः ।

स्वतोऽलुप्तदृशोऽस्तित्वं प्राक्साक्षात्प्रतिपादितम् ॥५२९॥

In the discussion about (the view of) the Lokāyata also, there has been clearly/specifically (*sākṣāt*) propounded earlier¹ the existence of one who never loses (or, has never lost) (the power of) seeing, by oneself—(and that) on the authority of just one means of knowing, viz. direct perception.² [529]

This is said with a view to the opinion of them who do not accept inference as a means of knowing.

¹This is a reference to the passage which begins with the word *sarvatīrthadrśām* (in verse 4.3.158 above).

²SP adds: *anumānādivivādaś ca nirastas tatraiva.*

अन्तरेणापि मानानि प्रमातृत्वादिसाक्षितः ।

कूटस्थदृष्टेरस्तित्वं प्रागपि प्रतिपादितम् ॥५३०॥

Already, in earlier (portions) there is established the existence of the immutable seer, even in the absence of (i.e. without using) any authoritative means (of knowing) and (that was established) as being the witness of the nature of a knower etc. [530]

Verse 531 enunciates what the Vijñānavādin holds.

बाह्यार्थवादिनि ध्वस्ते तद्वद्विज्ञानवाद्यथ ।

ननु नास्त्येव बाह्योऽर्थ इति प्रत्यवतिष्ठते ॥५३१॥

Now,¹ after (the view of) those (Buddhists)² who hold the external existence of objects and, in the same way (of the others),³ there follows (the view of those) who hold (the view of) *vijñāna*. Indeed, they rise against (the view of the Vedāntin), holding that there does not at all exist any external object.⁴

[531]

¹SP observes that Sureśvara has followed in his discussion the same order in the refutation of the Buddhists' views as in BSB.

²These are the Sautrāntika Buddhists.

³The followers of the Yogācāra school; this is implied by *advat*, as SP points out.

⁴These hold only *vijñāna* as reality/real.

Verses 532-537 explain BUB: *nanu nāsty eva*, in this context.

ननु नास्त्येव बाह्योऽर्थो घटदीपादिलक्षणः ।

विज्ञानव्यतिरेकेण तस्य मानासमीक्षणात् ॥५३२॥

But, indeed, there does not exist, beside (i.e. in addition to) *vijñāna*, (any) external object, characterized as a pitcher etc., for there is not noticed any means of knowing (the same).

[532]

Here begins the statement of the Vijñānavādin Buddhist against the Vedānta view.

यद्वि यद्व्यतिरेकेण वस्तु नेहोपलभ्यते ।

तावदेवास्तु तद्वस्तु स्वप्नभूमिगवस्तुवत् ॥५३३॥

Let there be only that (much of¹ a) thing, without (i.e. apart

from) which another thing does not exist here;² and that thing is just like the thing(s) seen in the dream state?³ [533]

¹This is for *tāvat*— perhaps 'identical with that other thing'.

²*iha* refers to the waking state.

³Cf. SP: *yad yadvyatirekeṇānupalabdham tat tatas tattvato na bhinnam yathā svāpno 'rtho jñānātirekeṇānupalabdhas ca bāhyo 'rtha ity arthah.*

स्वप्नविज्ञाननिर्ग्राह्यं स्वप्नज्ञानातिरेकतः ।

नास्ति वस्तु यथा तद्वज्जाग्रद्वाह्यार्थवस्त्वपि ॥५३४॥

As there does not exist¹ a thing, which is obtained (i.e. known/grasped) in the dream state, as beside (i.e. apart from) the consciousness (of it obtained only) in the dream state; in the same way, there does not exist any external thing (known/grasped only) in the waking state.² [534]

This verse seeks to establish that the argument (in the preceding verse) is not weak.

¹Literally, is not true.

²SP adds: *jāgrajjñānātirekeṇānupalabdhatvāt.*

जाग्रत्कुम्भादिकं वस्तु जाग्रज्ज्ञानातिरेकतः ।

न सत्यं ग्राह्यतः स्वप्नज्ञानग्राह्यघटादिवत् ॥५३५॥

A thing such as a pitcher (grasped/known) in the waking state does not exist beside (i.e. apart from) the consciousness (of it obtained only) in the dream state, for it has the nature of what is (or, can be) grasped/known like a pitcher etc. which is (or, can be) grasped/known by the consciousness in the dream state (only). [535]

This argument is based on the reason that both types of things are what are (or, can be) grasped/known.

एवं च सति विज्ञानव्यतिरेकेण कुम्भवत् ।

अपि प्रतीचोऽसत्त्वं स्याज्ज्योतिषः स्थास्नुरूपिणः ॥५३६॥

This being so, there would (or, could) be non-existence (or, untrueness) of even the inner self, which is (according to you) a flame and has an eternal form, in the same way as a pitcher, beside (i.e. apart from the existence of some) consciousness.

[536]

SP puts the argument briefly thus: *jñānamātram sarvam itihite sati ... kṣaṇikajñānātirekenātmāpi nāsti*.

बाह्यार्थेऽपहृते चैवं प्रदीपादेरसंभवात् ।

दृष्टान्तो भवतः कः स्यात्कामितार्थप्रसिद्धये ॥५३७॥

And when any/an external object is (can be) thus denied,¹ there would not be (possible) the existence of a lamp etc.; (and then) what could be your illustration for establishing/proving the thing which you have desired.²

[537]

¹Literally, taken/proven away (as untrue).

²Namely, the Ātman (beside the intellect etc.) that grasp external objects.

verses 538-543 answer away the Vijñānavādin's view (and illustration) by stating 'there is an illustration for proving the Vedāntin's view'.

वस्त्वन्तराभ्युपगमाज्ज्ञानतो ज्ञानवत्त्वया ।

दृष्टान्तोऽस्त्यैव नो भूयान्न चेन्न भवतोऽप्यसौ ॥५३८॥

There is certainly (eva) an example (possible) for us (to give) since, by/from knowledge¹ there can be acceptance/grasping of another thing (viz. the Ātman), and owing to its being possessed of (i.e. its consisting in) knowledge. If it would not be there for us (i.e. in our view), then it could not be there

for you (i.e. in your view) as well!

[538]

Cf. SP has put this succinctly thus: *asty eva jñānād anyo 'rthas tvayā nesyaṭe cej jñānamātram sarvaṃ svapnavad iti bhavato 'pi na siddhyati, dr̥ṣṭāntābhāvād ity arthaḥ*— cf. verses 532-33 for the Vijñānavādin's view.

¹That is, *anubhava/avagati* 'experience'.

धीमानाज्ज्ञानमेवेदमभ्युपेत्य ततोऽपरम् ।
जाग्रत्स्वप्नादिकं वस्तु तन्मिथ्येति निषिध्यते ॥५३९॥

Having accepted *jñāna* 'consciousness'¹ itself as 'this (thing)' by the means of knowing, viz. the intellect, you reject the other thing(s) such as (that perceived/grasped) in the waking and/or the dream (state) as false.² [539]

The argument is: There is first the acceptance of the means, viz. the intellect, to lead to the understanding of *jñāna* and then there is, with the help of that latter, the denial of everything else—this is reciprocal (or, mutually) dependent, i.e. self-contradiction!

SP supports the argument in this verse, citing the following verse thus: *uktam hi*—

*tasyām yad rūpam ābhāti bāhyam ekam ivānyataḥ /
vyāvṛtam iva nistattvam parīkṣānāṅgabhāvataḥ //*
(*Pramāṇavārtika* 1.77)

Yet, it is worth noting that the AnSS edition reads a variant *dhīrūpān mānāj jñānam eva cedam* in SP for *-jñānam evedam* which, we think, yields good sense.

¹This is to be understood for *vijñāna*.

²That is, non-existent.

भावो वा यदि वाभावो ज्ञानवन्माननिश्चितः ।
नास्तीति ब्रुवतो लज्जा धाष्टर्यादेव न जायते ॥५४०॥

Be it a positive entity or a negative entity, it is determined

is possessed of (or, marked by) *jñāna* 'consciousness' through
 a means a knowing (and therefore) while you say that there
 does not exist (any means of knowing), you do not come to
 feel any shame—only through (your) audacity! [540]

SP supports the Siddhāntin's argument, viz. that there cannot
 denying of external object(s), citing a verse: *yathāha—*
dharmadharmaivavyavasthānam bhedo 'bhedaś ca yādṛśaḥ /
asamīkṣitatattvārtho yathā loke pratīyate //
 (*Pramāṇavārtika* 1.86)

अपि ज्ञानातिरेकेण बाह्योऽर्थोऽभ्युपगम्यते ।
 दीपकुम्भादिको बुद्धैर्व्यवहारप्रसिद्धये ॥५४१॥

And it is as different (or, apart) from knowledge that (the
 existence of) an external object such as (that of) a lamp,
 pitcher and so on is accepted even by the Buddhists, in
 order that their worldly activities¹ are performed (lit.
 established). [541]

This is an additional argument, beside that in the preceding
 se.

¹That is, worldly dealings.

सर्वस्य ज्ञानमात्रत्वान्ननु नाभ्युपगम्यते ।
 मया ज्ञानातिरेकेण तन्मानासंभवादिह ॥५४२॥

An objection:) 'But, indeed, since all is but consciousness,
 that is not accepted by me (i.e. a Buddhist) as existing beside
 i.e. apart from) consciousness for, in our activities, there is
 no means for proving that'. [542]

SP supports the argument in the verse by citing—
jñānād avyatiriktaṃ ca katham arthāntaram vrajet /
tasmān mithyāvikalpo 'yam arthesv ekātmatāgrahaḥ //
 (*Pramāṇavārtika* 1.72cd-73ab)

ज्ञानं घटो दीप इति शब्दार्थज्ञानभित्तये ।

अवश्यमभ्युपेयोऽत्र भेदो मानप्रमेययोः ॥५४३॥

In this context (viz. that of activity), one has to accept, by all means, the distinction between a means of knowing and an object of knowing, in order that there is secured the division of knowledge into the meanings of the (different) words such as knowledge, a pitcher (and) a lamp. [543]

Verse 544 affirms the need of a pramāṇa for knowing both bheda and abheda of jñāna and artha.

प्रमाणं भवता वाच्यं भेदाभेदत्वसिद्धये ।

नावयोर्निष्प्रमाणोक्तं यतः संगच्छते सुधीः ॥५४४॥

You have to point out a means of knowing that is useful for ascertaining (lit. establishing/proving) the nature (of thing(s)) as different or non-different since, for both of us, good understanding (or, valid knowledge) would not be (lit. go) without a (proper) means of knowing. [544]

Verses 545-546 point out that even the Buddhist has to accept discrete objects of knowledge for vyavahārasiddhi.

मामेयसंगतिफलभित्त्यभ्युपगमस्त्वया ।

कार्य ऐक्ये यतोऽमीषां व्यवहारो न सिध्यति ॥५४५॥

You have to accept (lit. make) the distinctions, viz. knowledge, the object(s) of knowledge, the connection between them and the result, since, in accepting the oneness of these, there is not (or, will not be) possible (any) activity, (or, worldly dealing). [545]

SP supports the argument in this verse by citing—

tat tathaiva samāśritya sādhyasādhanaśāṁsthitil /

paramārthāvatārāya vidvadbhir avakalpyate //
(*Pramāṇavārtika* 1.87)

उपादित्सन्ति मानानि ह्यज्ञातार्थोपलब्धये ।
अतोऽभ्युपेयोऽज्ञातोऽर्थः प्रमाणत्वप्रसिद्धये ॥५४६॥

Indeed, they desire to accept (i.e. understand) the means of knowing for getting to know (lit. securing) the objects which have not been known (before), therefore, one has to accept (i.e. hold that there is) the object which has not been known (before), for that would (i.e. in order that it would) secure their nature as the means of knowing. [546]

SP rightly points to the dissolution of the Saṃdhi: *ajñāto arthaḥ*.

Verses 547-541 state that *ajñātatvāsiddhi* leads to *pramāṇasiddhi* which, in turn, leads to the acceptance of the earlier unknown as established by the witness.

न च प्रमाणतः सिद्धिरज्ञातत्वस्य शक्यते ।
अन्योन्याश्रयतादोषः सत्येवं प्रसजेद्यतः ॥५४७॥

Also, it is not possible to get to know (or, to establish) the nature (of object(s)) as not having been known before, with (the help of) the means of knowing; therefore,¹ this being so, there contingently follows (or, would contingently follow) the fault (in your² argument) of reciprocal dependence (or having mutual dependence). [547]

¹Here *yataḥ* is for *ataḥ*.

²This refers to the *Vijñānavādin*.

प्रमाणाच्च न तत्सिद्धिस्तस्य मानविरोधतः ।
मानैश्चेदविरोधः स्यात्कुतोऽज्ञातत्वनिहनुतिः ॥५४८॥

And that¹ is not established by any means of knowing, on

account of its opposition to (i.e. the non-acceptance of) any means of knowing; (and) if it does not have any opposition to the means of knowing, (then, it is to be asked) 'Whence could there be the concealment (of an object of knowing), as what has not been known before?' [548]

The second line of this verse presents the argument by way of *vyatireka*.

¹That refers to *ajñāta artha*.

न स्वरूपेऽथवा स्वांशे मानमेयत्वसंभवः ।
सर्वदातिशयाभावाद्बोधाच्चाव्यतिरेकतः ॥५४९॥

Neither in its ¹ own form (i.e. fullness), nor in its part, can there be possible the state of being of (both) the knowledge and the object (of that knowledge), for (in that case) there would ever be the absence of (any) excellence ² and also a non-distinct cognition. ³ [549]

SP succinctly points out the exact import of the argument thus:
aṁśayor jñānād abhedo bhedo vā nādyo mānameyavyavasthāsiddher na dvitīyas tadbhedāpatter ity arthah.

¹That is, of *vijñāna* 'consciousness'.

²Namely, that which consists in the acquisition of some information/knowledge of some object not known before.

³In other words, there would not newly occur any knowledge.

प्रमाणं यदि विज्ञानं मेया नीलादिरूपता ।
मिथस्तयोरपेक्षा का यत उक्तं प्रसिध्यति ॥५५०॥

If consciousness were accepted as the means of knowing, then being possessed of the form of blue etc. would be the object of knowing and, therefore, ¹ what mutual dependence (lit. expectation) could there be between the two, viz. that from which would get established what is said (earlier)? ² [550]

¹This is for *yataḥ* which is the same as *ataḥ*.

²Namely, oneness, or rather, co-existence of *vijñāna* (*pramāṇa*) and its object (*meva*) as understood in the argument of the preceding verse.

आकारतद्वतोर्भेदो यदि नामाभ्युपेयते ।
अस्तु कामं प्रमामेयसंगतिर्गम्यते कुतः ॥५५१॥

Or, if (*yadī nāma*) it is accepted that there is the distinction (between the two) as that between a form and what has that form; well, let that be there,¹ (but) how (or, whence) is there understood (in your view) the connection of knowledge and the object of the knowledge? [55]

¹This is tentative (or, for argument's sake) acceptance.

Verses 552-556 affirm the need of accepting the witness for holding that there is one who grasps the connection between *māna* and *meva*.

कार्याशाद्यभिसंबन्धान्मानमेयत्वसंगतिः ।
अन्यैव तु विभिन्नात्मा वस्तुनोर्मानमेययोः ॥५५२॥

The connection between being knowledge and being an object of knowledge is (or, can be) owing to the close association of the (various) parts such as the effect(s)¹ (so it might be argued by the *Vijñānavādin*), but that connection of the things (called) knowledge and the means of knowledge is of a different kind (altogether)!² [55]

¹This refers to what are implied in the notions of *aṁśāṁsin* (cf. verse 549 above) and *ākārākārins* (cf. verse 551 above).

²This is well brought out by SP thus: *mānameyatvasaṁgate tadanyatamatve 'pi tatsādhakena bhāvyaṁ na hi jñānābheden tatsiddhis tasyās tanmātratvābhāvad iti*.

मानांशो यस्य मेयः स्यान्मेयांशो वा भवेत्प्रमा ।
संबन्धाभावतस्तस्य मानमेयौ न सिध्यतः ॥५५३॥

That knowledge and the object of (that) knowledge do not become/get established (or, proved as such) for him, (in whose view) there is a part of knowledge as the object of its knowledge and (*vā*) a part of the object of (some) knowing and right knowledge is a part of that means of knowing, since, (for him) in that case, there is no (possibility) of any connection (between them noticed).¹ [553]

¹ Possibly, this refers to (*saṃgati*)-*sādhakābhāva* as understood in note 2 on the preceding verse.

मानमेयत्वयो रूपं यस्मान्नैवेह गम्यते ।
मानमेयत्वसंसिद्धिर्नातस्तत्रोपपद्यते ॥५५४॥

Since here¹ is not (clearly or distinctly) understood the form of what is knowledge and what, the means of (that knowledge) each, there is not there¹ any proving of what is knowledge and what the means of (that) knowledge. [554]

¹ The words *iha* (in the first line) and *tatra* (in the second line)—expressive of the sense conveyed by locative case—convey the sense of (any) knowledge (situation).

एकस्मिन्नपि चेन्मानमेयत्वादिप्रकल्पना ।
साध्यानां साधनैकत्वादसाध्यासाधनात्मता ॥५५५॥

And, if there is (entertained) the notion of knowledge, the object of (that) knowledge etc.¹ in just one (place/thing), then what are to be accomplished, being just one (i.e. the same) with what accomplishes (them), there would not be understandable (lit. established) the nature of what is/are accomplished and what accomplish/accomplishes the same.²

[555]

¹The word 'etc.' indicates the notions of part(s) and whole(s) and/or the effect(s) and the cause(s).

²This refers to their identity (*anyonyābheda*).

फलानां साधनानां च भेदाभावे प्रसज्यते ।
शास्त्रोपदेशानर्थक्यं तत्कर्तुश्चापि मूढता ॥५५६॥

By (lit. in case) there is accepted the absence of distinction between what are the results and what the means of accomplishing (the same), there would contingently follow the purposelessness (lit. meaninglessness) of the instruction (imparted) in the authoritative texts and also foolishness (or, mistakenness) of the author of the same. [556]

For clearer expression of the argument here, read SP with profit.

Verses 557-562 explain BUB: *vijñānavyatirekeṇa bāhyārthābhyupagamāt*.

विज्ञानव्यतिरेकेण प्रतिवाद्यादिवस्तुनः ।
त्वदभ्युपगतेर्भेदः स्यात्प्रमाणप्रमेययोः ॥५५७॥

(Also) by your ¹ acceptance of such objects as the counter-disputant etc. ² beside (i.e. in addition to) consciousness, there would (contingently) follow (lit. be) the distinction between what is the means of knowing and what the object of knowledge. [557]

¹This refers to the *Vijñānavādin*, who himself is a *vādin* 'discussant'.

²This refers to to (vi)vāda 'dispute/debate' and also the *doṣas* 'defects' therein.

न ज्ञानमात्रमेवेदं भवताप्यभ्युपेयते ।

प्रतिवाद्यादिकं वस्तु तस्य दूष्यत्वकारणात् ॥५५८॥

Even you have not understood (or, accepted) that (all) this (world) is merely knowledge (*vijñāna*— here, *jñāna*), for the reason that there is (in your opinion or scheme of preachings) the existence of things (or, objects) such as a counter-disputant, to be given blame to (for holding wrong opinions). [558]

प्रतिवाद्यादिदूष्यस्य न स्वांशशित्वसंगतौ ।
निराकर्तुमभिप्रायः समूढस्यापि जायते ॥५५९॥

There would not occur to even an extremely foolish (person) the idea of refuting (lit. setting aside) an opponent etc. who is blamable, when there is accepted the relation of the parts and the whole(s) consisting of them. [559]

भिन्नग्राहकसंवेद्यं घटदीपादि सद्ध्रुवम् ।
जाग्रद्भूमिष्वतस्तस्य जाग्रत्स्थप्रतिवादिवत् ॥५६०॥

(Certainly) a pitcher, a lamp etc. is an existent (object), which is to be (or, becomes) known by another who (i.e. the seer) grasps it,¹ in the states of waking etc.;² therefore, (there would be external existence established) of the opponent etc.³ [560]

¹This points to the distinct seers in the states of dream and waking.

²The word 'etc.' refers to the dream state.

³SP rightly observes: *svātiriktagrāhaka-grāhyatvasattve 'pi sthāyitvaṃ ceti pratijñā draṣṭavyā*.

संतत्यन्तरवद्यद्वा विज्ञानान्तरवत्तथा ।
इत्येवमादि सौलभ्यं दृष्टान्तानामिहेष्यते ॥५६१॥

Similarly, (the existence of distinct external objects) is like distinct continuities/series (in respect of individuals)¹ or distinct consciousnesses.² This (illustration) and such others³ being

there, it is accepted that the illustrations have a great ease (in conveying the desired conclusion). [561]

¹SP points out to Caitra *saṃtāna* and Maitra *saṃtāna* for worldly connections—that refers to continuity in the existence of the same person.

²This indicates the non-continuity of consciousness, i.e. series of consciousness.

³The word *ādi* refers to the illustration of the disputants and others, stated earlier.

विज्ञानव्यतिरेकेण नातो विज्ञानवादिना ।
कूटस्थदृष्टिरात्मैको निषेद्धं शक्यते परः ॥५६२॥

Therefore, it is not possible for a Vijñānavādin to reject (the postulation by the Vedāntin) of the Ātman, the immutable, witness (or one who sees) the one who is single, and the highest as beside (or, apart from) consciousness. [562]

This is to affirm the Vedāntin's postulation of the Ātman as apart from any object of knowing.

Verses 563-564 state the prima facie view in regard to the non-difference between knowledge and its objects, determined on the basis of the dream state experience.

ननु स्वप्ने न वस्त्वस्ति विज्ञानव्यतिरेकतः ।
न जाग्रद्वस्तुवत्तत्स्याज्ज्ञानमात्रस्वरूपतः ॥५६३॥

(An objection:) 'But, indeed, there is not in the dream state anything beside (or, as apart from) consciousness, like a thing seen/experienced in the waking state, because of its having the nature of only consciousness'. [563]

This argument proceeds from the Vijñānavādin's position that a thing of the dream state is not different from consciousness,

as noticeable from verses 532 and 535 above.

विभागं लभते ज्ञानाज्ज्ञानवत्स्वप्नवस्तु चेत् ।
स्वमहिम्नैव तत्सिद्धेः कथं नास्तीति भण्यते ॥५६४॥

(The objection continues:) 'If (again) a thing (noticed) in dream state comes to have difference from consciousness, just as consciousness appears distinctly, then, since there is the proof of (or, establishing) it, on its own strength (lit. power/greatness), how is it said to be not existing?' [564]

SP brings out the twofold character possible of the thing of dream state thus: *svapnavastu jñānād bhedena drśyate na vā*. The verse then refers only to the first alternative, viz. the thing (perceived) in the dream state is seen as different from consciousness.

Verses 565-568 state that the external objects do exist even if they are not grasped as distinct.

ज्ञानस्यैवार्थरूपं तद्धोधवच्चेत्प्रकल्प्यते ।
परमार्थसतोऽसत्त्वं किंमानमिति भण्यताम् ॥५६५॥

(The objection continues:) 'If that form of (what is perceived) as an (external) object is but (that) of consciousness and also it is taken (or, considered) as having that knowledge (as its form), let it be told then as to what could be the means for knowing the non-existence of what 'is really an existent'. [565]

This is with reference to the second alternative mentioned in the note on the preceding verse.

विज्ञानव्यतिरेकेण नीलादिविषयो यदि ।
भावो वा स्यादभावो वा सोऽस्त्येवेति विनिश्चितिः ॥५६६॥

(The Vedāntin's answer:) 'If the (external) objects such as blue etc. are beside (or apart from) consciousness, then they might be positive entities¹ or negative entities,¹ they do exist—this is certainly the decision. [566]

¹The singular in *bhāvaḥ* etc. stands for the plural (*jātāv* *avacanam*).

स्वप्नादौ भवतैवायं जाग्रदनुभयते ।
घटादिज्ञानविषयः स कथं नेष्यते त्वया ॥५६७॥

This object of knowledge such as a pitcher is experienced by you yourself in the dream state etc.¹ as (it is experienced) in the waking state; how then is it not acceptable to you (as external)? [567]

SP observes significantly: *tatra cakṣurādyabhāve 'pi mano 'sti ca samanantarapratyayo 'nyad veti cintāntaram iti bhāvaḥ*.

¹SP states that this 'etc.' refers to *smṛtisamādhānādi* where *smṛti* 'memory', *samādhāna* 'answering away or query' and others—but the question is: 'what does this last 'and others' refer to?

यद्वस्त्वनुभवप्राप्तं तच्चेन्नास्तीति भण्यते ।
ज्ञानेऽपि स्यादनाश्वासस्तस्यानुभवसिद्धितः ॥५६८॥

If it is said that the thing, which is known by experience, does not exist; then, there would be disbelief (or, lit. absence of satisfaction) in even consciousness, for that (also) comes from (i.e. established by) experience. [568]

This is pointed out as a fault on the part of the Vijñānavādin, *bāhyārthasyānubhave 'pi asattvam*. This becomes clearer from the next verse.

Verses 569-573 state another reason for holding the object of

knowledge as different from knowledge.

ज्ञानादतिशयो यद्वन्नास्तीतीह तथैव सन् ।
घटोऽन्यो ह्यनुभूतेः सन्नास्तीति कथमुच्यते ॥५६९॥

‘How is it said (i.e. posited by you) that the existent pitcher (known from) experience as another, even if it remains the same there,¹ as (you have posited) that an object does not have any excellence² arising from knowledge?’ [569]

This is yet another argument to state that there is distinction between consciousness and the object(s) of experience.

¹This refers to the dream state.

²Cf. SP: *atiśayavacano 'nyaviṣayah*.

तदन्यकालासंदृष्टेरिति चेदसदुच्यते ।
क्षणान्तरे क्षणादृष्टेरसत्त्वं वः प्रसज्यते ॥५७०॥

If it¹ is said to be non-existent because it is not seen at a time other than one of that (viz. the dream state etc.); then there contingently follows for you (i.e. in your opinion) the non-existence of an object even when it is in some moment, for it is not seen in another moment?’¹ [570]

¹Cf. SP (a little modified) for clarification: *svakṣaṇe sattvena dr̥ṣṭasya kālāntare 'nupalambhād svakṣaṇe 'py asattv(am)*.

हेमन्तेऽनुपलब्धत्वाद्ग्रीष्मधर्मापनिहनुतिः ।
प्रतिज्ञातुमशक्या स्यात्तथा शून्यत्वमापतेत् ॥५७१॥

It would be impossible to affirm the non-existence (or, absence) of a feature of the Grīṣma (i.e. extremely hot summer) season because it has not been found¹ in Hemanta (extremely cold winter) also; (for, in holding that) there would (contingently) follow (complete) void.² [571]

That is, it is not experienced.

Cf. *sarvaśūnyatā* in SP.

देशकालादिगावस्थाभेदेनैवाखिलं यतः ।

वस्तु सिद्धं जगत्सिंस्तदपहनूयते कथम् ॥५७२॥

Since all things (*akhilam vastu*) in this world are known (lit. established) together with their differences in respect of the conditions belonging to (different) regions, (periods of) time, quarters¹ etc. how can that be denied (lit. concealed or kept out of view)? [572]

This is one more argument to support the existence (or, the absence of void) of external objects.

P adds: *vipakṣe vibhāgadhīr virudhyetety arthaḥ*.

The editor of the edition of MRI offers an ingenious explanation of *ādigāvasthā* ... thus: *deśe kāle vā gāminī yāvastheti* ... *aha*.

विज्ञानव्यतिरेकेण घटो नास्तीति जल्पतः ।

नास्त्यर्थोऽपि कथं जीवेदस्त्यर्थविरहादिह ॥५७३॥

In the case of him, who is of the opinion (lit. is saying) that there does not exist a pitcher (and the like of it) as distinct from consciousness, there does not exist any useful thing (*artha*); how would he then (be able to) live here (i.e. in this world)¹ in the absence of useful things? [573]

P points out to the import of this verse thus: *bāhyā-palāpino vyāghātāpattēś ca tadapalāpāsiddhiḥ*.

Alternatively, in the dealings which involve the presence or the absence of useful things—cf. *bhāvābhāvavyavahāra-niḥ* in SP.

verses 574-576 state that holding the non-existence of the existent things would lead to the non-existence of any object of knowledge.

अस्त्यर्थवत्स्वमात्रेण नाभावोऽस्ति विना सता ।
यथास्ति तव विज्ञानमेवं कुम्भाद्यपीष्यताम् ॥५७४॥

There does not obtain any negative entity in the absence of (some) existing (or, positive) entity, in the same way as there exists for you consciousness; let it be (then) accepted that (there exist) such objects as a pitcher. [574]

अस्त्यर्थव्यतिरेके हि न किञ्चिदपि सिध्यति ॥५७५॥
अस्त्यर्थव्यतिरेकेण विज्ञानादि यदीष्यते ।
अब्राह्मणादिवत्तत्स्यादसदेवेति निश्चितिः ॥५७६॥

Indeed, there cannot obtain (lit. be established) (the existence of) anything as distinct from¹ a positive entity. [575]
(Therefore,) if consciousness etc.² is accepted (lit. desired, as existent) beside (i.e. apart from) positive entities;² then all that (also) would be non-existent like a non-Brāhmaṇa etc.³—this is the decision. [576]

¹That is, as apart from, beside, or in addition to.

²The word 'etc.' refers to *kṣaṇikatva* etc.

³This is a truncated illustration. It is clarified in SP thus: *na hi brāhmaṇāder anyasya brāhmaṇādibhāvas tathā sato 'nyasya na sattety arthaḥ*. The word 'etc.' can be taken to refer to Kṣatriya, Vaiśya and Śūdra.

Verses 577-578 state the view of the Kṣaṇabhāṅgavādin that things are only momentary can be shown with the help of inference.

प्रतिक्षणविनाशीनि द्रव्याणीत्यवगम्यताम् ।
तेषामन्ते विनाशित्वात्प्रदीपादिविनाशिवत् ॥५७७॥

(An objection by Kṣaṇabhāṅgavādin:) ¹ 'May the substances ² be understood as perishable at every moment, since they are finally perishable like a lamp etc. which are perishable'. [577]

Cf. SP for clarification of the argument: *yad ante vināśi tat atikṣaṇavināśi yathā dīpo 'nte, vināśi ca sarvam ity anumānā-*
haḥ.

¹This is a section of the Buddhists who hold that all is momentary.

²This is for *dvaryāṇi*, viz. *jñānajñeyavastūni* (SP).

वैधर्म्येण च दृष्टान्तः प्रतिज्ञातार्थसिद्धये ।
प्रतिसंख्यानिरोधोऽत्र सर्वं सुस्थं भवेत्ततः ॥५७८॥

'The illustration is based on dissimilarity (of properties) in order to establish/prove the matter that is (first) enunciated, (for) herein there is conscious annihilation¹ of an (external) object—then (or, as a consequence), all (of our opinion) would be well-established.'

[578]

¹Cf. SP: *pratisaṃkhyānirodhaḥ sa ca buddhipūrvako bhāva-*
śaḥ.

verses 579-581 state the refutation of the inference by the *anābhāṅgavādin*.

अनुमानप्रयोगेऽस्मिन्प्रतिज्ञार्थः सुदुर्लभः ।
आवृत्तिवीप्सासद्भावात्क्षणिकोक्तेः प्रमाणतः ॥५७९॥

The Vedāntins'¹ refutation:) 'In this adducing of inference, the matter (i.e. the subject to be proved) of the proposition is very difficult to hold/accept on account of the falsehood in the repetition¹ and by the authoritative means, viz. the statement about momentariness.

[579]

Add: of some one act or by some one agent. See verse below for the explanation of *āvṛttivīpsā*.

अनेकव्यापृतिमती ह्यावृत्तिर्जगतीक्ष्यते ।

एकस्मिन्देवदत्तादौ सा च बौद्धस्य नेष्यते ॥५८०॥

It is known (lit. seen/accepted) in the world that repetition consists in more than one performance of some act in one agent, viz. Devadatta or someone else) and that (viz. *āvṛtti*) is not accepted by the Buddhists.¹ [580]

¹This is because they hold momentariness of all, i.e. persons, things and acts.

निर्व्यापाराः सर्वभावाः क्षणिकाश्चेति निश्चितेः ।
गतः प्रत्यागतश्चेति सावृत्तिः स्यात्सुदुर्लभा ॥५८१॥

Since there is the decided view (of them) that all entities (*bhāvāḥ*) are devoid of any activity and also momentary, that repetition, viz. that consisting in (such actions mentioned in words) 'he went and he came back', is very difficult for them to hold/accept. [581]

SP states: *yathāha— kṣaṇikāḥ sarvasaṃskārā asthirāṇāṃ kutaḥ kriyā iti* (*Tantravārtika* 170.10 on 1310; this is already cited by SP under verse 494 above).

Verses 582-585 show unreasonableness of repetition in *Kṣaṇa-bhaṅgavāda*.

नानार्थवाचिनां लोक आश्रयाश्रयिणामिह ।
व्याप्तिः क्रियागुणाभ्यां या सा वीप्सेत्यभिधीयते ॥५८२॥
युगपत्सापि बौद्धस्य न कथं चन युज्यते ।

In the world, that is said to be *vīpsā* where there is pervasion (or, connection) of many objects¹ by actions and/or properties, i.e. qualities, and of what are supports and supported.² [582] And that is also simultaneous³—yet somehow it is not acceptable/reasonable for a Buddhist. [583ab]

¹Cf. *parjanyo vrkṣam vrkṣam pariśiṅcatīti sarvavrkṣāṇāṃ tattaddeśasya ca secanakriyayā yugapad vyāptiḥ* (SP).

²Cf. *grāmo grāmo ramanīya iti sarvagrāmāṇāṃ taddeśasya ca yugapad ramanīyagunatvena vyāptiḥ*.

³Refer to the word *yugapad* in both the notes above.

कर्तृक्रियादिसादृश्यात्सान्यत्वेऽपीति चेन्मतम् ॥५८३॥

भूयोऽपि भुञ्जते गेहे ब्राह्मणा इति दर्शनात् ।

एतच्चानुपपन्नं स्यादुपचारपरिग्रहात् ॥५८४॥

If (the said) Buddhist (holds that) repetition and/or pervasion (is noticeable) even in different (objects, persons and actions) on account of the similarity (of them), [583cd] since it is noticed that (many) Brāhmaṇas eat food in (some/the same) house many times (or again and again) this also would be (i.e. is) unreasonable, owing to the acceptance (by the Buddhist) of a metaphorical statement (*upacāra*).¹ [584]

¹Cf. *mithyātvād upacāravijñānasya* in Śaṅkara's Bhāṣya on CU 16.3.

मुख्यस्यासंभवे यस्मादुपचारो न युज्यते ।

अभ्युपेतार्थहानं च तदभ्युपगमे सति ॥५८५॥

Since, in the absence of the principal (matter),¹ (this) metaphorical statement does not become reasonable in case that opinion (of the Buddhist) were accepted, there (would be) giving up what is taken up as the subject matter (viz. the existence of external objects). [585]

¹This refers to *mukhyavīpsā*.

Verse 586 states the unreasonableness of *vīpsā* in the Kṣāṇa-*hanigavāda*.

क्षणिकाः सर्वसंस्कारा इत्याद्यभ्युपगम्यते ।

क्षणिकाः सर्वसंस्कारा इत्यादिवचनैरियम् ।

वीप्सा व्याहन्यतेऽतश्च क्षणिकोक्तिर्न युज्यते ॥५८६॥

It is held (lit. understood) that all impressions are momentary and so on.¹ (Therefore), by such statements as² 'All impressions are momentary' is opposed (lit. struck down) the desire of pervading³ and, for this (reason (*ataḥ*)), the statement (about) momentariness (of objects)⁴ is not reasonable. [586]

¹The words 'and so on' (*ādi*) points to the lines *asthirāṇāṃ kutaḥ kriyāḥ* (quoted under verses 494 and 581) and *bhūtir yesāṃ kriyā saiva kārakaṃ saiva cocyate* (quoted under verse 494).

²The words 'such ... as' (*ādi*) signify/indicate many of the statements, as for example (SP quotes:)

*yāvad yāvac ca bhāvo 'yam pratyakṣeṇa pratīyate /
tāvat sa vartamānastho nānyakālavīśeṣaṇaḥ //
ekakṣaṇaś ca kālo 'yaṃ vartamāno vyavasthitaḥ /
tasmāt pratyakṣaḥ sarvaṃ kṣaṇikatvam matam mama //*
(source not traced)

³Pervading (*vīpsā*) indicates repetition (*āvṛtti*) —SP; these are already mentioned together in verse 579 above.

⁴Read SP: *kṣaṇikoktis tatsādhikā pratikṣaṇavināśīni dravy-
āñītipratijñeti yāvat.*

Verses 587-589 refute the alternative notion of momentariness.

अथापि क्षणिकानीति मत्वर्थोऽत्र विवक्ष्यते ।

सिद्धसाध्यत्वमेवं स्यादिष्टैव क्षणसंगतिः ॥५८७॥

Or, if in the word *kṣaṇika* is intended the meaning of *-matup*,¹ there would then be the fact (or, nature of the argument) of establishing what is (already) established and the connection of moments is just what we desire/accept.² [587]

¹The word *kṣaṇika* is understood as *kṣaṇavān*, i.e. the word *kṣaṇa* has taken the suffix *-matup*. Therefore, it means 'having

a moment', therefore 'momentary'.

²This would mean: relation between, at least, two moments.

स्थिरस्य वस्तुनोऽवश्यं निमेषक्षणलक्षणैः ।
कालभागैर्भवेद्योग इति नः सिद्धसाध्यता ॥५८८॥

(And thus) there would be involved the connection of the eternal (lit. steady) thing with (various) divisions/parts of time such as (or lit. characterized as, or, measured by) the wink (of an eye) and this would be, according to us, establishing what is already established. [588]

Here is rejected the second alternative.

क्षणिकार्थस्तिरोभाव इति चेदभिधीयते ।
अभ्युपेतार्थहानिः स्यात्तथापीष्टं न सिध्यति ॥५८९॥

If it is said that the meaning of (the word) *kṣanika* is 'disappearance (of a thing within a moment)', that would invite loss (or giving up) of what is (already) held/ accepted—and, even in that case (*tathā*), what is desired does not become established. [589]

In verses 590-618 there is explanation of the notion *kṣanikatva* and its refutation.

व्यक्तधर्मनिवृत्तिर्या कारणात्मतयेष्यते ।
स्थिरस्य धर्मिणः सेह तिरोभावगिरोच्यते ॥५९०॥

Here is expressed in the word *tirobhāva* that which is accepted/desired as withdrawal of some property, which has been visible/apparent (in some thing), (thus) consisting in becoming (its own) cause, belonging to the steady (object) which is possessed of that property. [590]

Here there is in these verses the rejection of the third

alternative.

यद्युत्पन्नानि नश्यन्ति स्यात्तदा सिद्धसाध्यता ।
 यस्मादादिमतां नाशः सर्वैरेवाभ्युपेयते ॥५९१॥
 यतो जनिमतावश्यं विनष्टव्यं तदन्ततः ।
 तथाभ्युपगतार्थस्य हानिः स्याद्वो न संशयः ॥५९२॥

If (again it is held that) 'What are produced (or, have come into existence) perish', then (also) there would (follow) the nature of what is to be established/proved in the case of what is (already) established/proved; (this is so) because it is agreed among all that what have a beginning do perish, [591] (also) because whatever has an origin (lit. birth) has finally to come to perish; (and) in that case (also), there would be for you the loss/abandoning of what is (already) held—this is beyond doubt (or, doubtlessly so!). [592]

These verses refute the fourth alternative.

अथोत्पत्तिक्षणे नाशो भवताभ्युपगम्यते ।
 सर्गनाशौ तदैकस्मिन्काले प्रसजतो ध्रुवम् ॥५९३॥
 ततश्च कार्यानुत्पत्तिर्यदि वा सर्वदास्तितता ।
 तद्विरोधाविरोधाभ्यां ध्रुवं प्राप्नोत्यनीप्सितम् ॥५९४॥

If (again) you accept that there is destruction/perishing (of an external object) in the same moment as of its origin, then there would certainly be the contingency that both the origin and the destruction occur (just) in the same (lit. one) moment, [593]

and from that would follow the non-origin of what is (called) an effect; or, perhaps, its all-time existence. Also, on account of their mutual opposition and mutual non-opposition being simultaneously occurrent, there will certainly follow what is not desired (by them). [594]

This is yet another alternative explanation, with comment on

the Kṣaṇikavādin's argument.

विरुद्धयोश्च क्रिययोरिष्टत्वादेककर्तरि ।
एककाले विरुद्धत्वात्सर्वलोको विरुध्यते ॥५९५॥

Also, because two opposing/opposite activities¹ are accepted as belonging to (i.e. performed by, just) one agent and because they are opposed in belonging to (just) one (moment of) time—the entire world (i.e. worldly experience)² is opposed.

[595]

¹These are the origin and the destruction/perishing referred to earlier in verse 593 above.

²Or, worldly notion about opposition of activities/actions.

अथाज्ञातानि नश्यन्ति जायमानानि वेति चेत् ।
तथाप्यसन्प्रतिज्ञार्थो न ह्यभावस्य नाशिता ॥५९६॥

Also, if it is held that those (objects which are) not known ever perish or (which) originate (lit. become born), then, in that case also, the matter in the proposition enunciated will not dispose (lit. destroy) a negative entity.¹

[596]

¹This refers to the proposition *ajātāni naśyanti*. SP brings out the import thus: *ajātasyāśattvād asataś ca saṃtānasyevānāśād ity arthaḥ*.

कातिशीतिरजातस्य विनाशागमने सति ।
प्रतिज्ञापदयोश्चात्र विरोधः स्यात्परस्परम् ॥५९७॥

What difference¹ can there occur in what has not originated (lit. what is not born), when there comes (to occur) the destruction? (Thus) there would be mutual opposition of (the two) words² in the enunciation (of the proposition).

[597]

This is another reason as to why the destruction of the

non-born is impossible.

¹Literally, excellence, i.e. change, or additional property.

²That is, *ajāta* and *nāśa*.

नश्यत्युत्पद्यमानोऽर्थ इत्येतन्मग्धभाषितम् ।
सर्वलोकविरुद्धत्वान्मानैश्चापि विरुध्यते ॥५९८॥

That an object, which is coming into existence (lit. being born), comes (also) to destruction is the statement of a foolish (or, ignorant) person, because it is opposed to the world (i.e. world's experience) and also because it is opposed (i.e. disproved) by (various other authoritative) means of knowledge.¹ [598]

The idea of verse 595 is repeated, because the Kṣaṇa-bhaṅgavādin would point to the opposition of the worldly acceptance about the nature of things to the singleness of the Brahman (i.e. Ātman).

¹The Vedāntin wishes to affirm that the singleness of the Brahman can be grasped/understood from one's own experience (cf. *sarvo hy ātmāstitvam pratyeti* in BSB under 1.1.1) and from the Vedānta texts (i.e. *śabda/śruti*).

अथोत्पन्नस्य नाशोऽयं द्वितीये स्यात्क्षणे यदि ।
प्रत्यभिज्ञामृते नायं प्रतिज्ञार्थः प्रसिध्यति ॥५९९॥

(If) again (it is held that) this destruction of the object(s) that is (or, are) born occurs in the second moment (of its/their existence), then (it has to be pointed out that) the matter (lit. subject) in the enunciated proposition does not get established, except by recognition.¹ [599]

¹Add: of the object of the second moment as the same as of the earlier/first moment.

य एव जायते कर्ता स एवायं विनश्यति ।

क्षणद्वये यथा स्थायी तद्वदस्तु क्षणान्तरे ॥६००॥

(The Kṣaṇabhaṅgavādin might say:) 'That one becomes born as the agent (of some activity) and the same one perishes—as (your) eternally abiding (Ātman) belongs to the two (lit. pair of) moments; so should (that object in your view continue to) be in the second (lit. other) moment.¹ [600]

¹That is, let that also be abiding in the second moment. Cf. SP puts it as: *sthāyī janmanāśakarteti śeṣaḥ*.

मतमुत्पद्यते नासौ नापि साक्षाद्विनश्यति ।
आदिमध्यान्तहेतूत्थविकल्परहितोऽपि वा ॥६०१॥

(The Vedāntin replies:) 'It is held (by us) that that one does not become born (lit. get produced), nor also does it actually (*sākṣāt*) perish (or, come to destruction/an end); or rather, it is without any such notions as arise in the beginning, in the middle and in the end. [601]

SP supports the argument in the second line by saying: *uktaṃ hi—*

*saṃsrjyante na bhidyante svato 'rthāḥ pāramārthikāḥ /
rūpaṃ ekam anekaṃ ca teṣu buddher upaplavaḥ //*

(*Pramāṇavārtika* 1.88) —thus it reminds one of the falsehood in the activity of the Ātman's adjunct, viz. *buddhi*.

हेतुप्रतिज्ञयोः स्पष्टो विरोधः स्यात्तथा सति ॥६०२॥
मतमन्ते विनाशश्चेत्कोऽयमन्तस्त्वयोच्यते ।
क्षणस्यान्तर्बहिर्वेति न तथाप्युपपद्यते ॥६०३॥

That being so,¹ there would be a clear opposition between the reason (*hetu*) adduced and the enunciated proposition. [602]

If it is held by you that there is destruction (of an object that is born) in the end, then what (i.e. of what nature) is

this end (that) is so called by you? whether it is within that moment (of the object's birth) or outside it?— But, so also, it is not reasonable. [603]

¹SP explains *sarvavikalpaśūnye bodhe sati*.

क्षणान्तश्चेद्भवेत्ताशः क्षणिकत्वं विहन्यते ।
क्षणान्तरेऽपि नाशोऽयं पूर्वाभावान्न युज्यते ॥६०४॥

If the destruction be at the end of that moment, then (your proposition of) momentariness is disproved (lit. struck down). Also this (said) destruction, if it is held to be in another (i.e. second) moment, is not reasonable (to be stated in your proposition), since there is absence of (lit. does not exist) earlier moment. [604]

This clarifies the unreasonableness in the enunciated proposition, as mentioned in the preceding verse. SP explains the argument thus: *ekasmin pūrṇe* (v.l. *pūrve*) *kṣaṇe kṣaṇikasya sthitir iṣṭā sā ca kṣaṇamadhye nāśe na sidhyati ... kṣaṇasya bahir nāma kṣaṇāntaram tatra nāśo na kṣaṇasya yuktaḥ pūrvakṣaṇottaravartino jñānasyottarakṣaṇasambandhānupagamāt*. This is further explained in the next verse.

उत्तरक्षणविध्वस्तौ न हि पूर्वो नियुज्यते ।
तस्योत्तरत्रासद्भावाद्घ्नौव्यं च स्यात्तथा सति ॥६०५॥

Indeed, in the destruction (of the object) in the later/subsequent (i.e. second) moment, the former (i.e. earlier moment) cannot be involved (lit. employed, as the agent of the destruction), because of its non-existence in the later (moment); (and) if it were so, there would be permanence (of it). [605]

In support of this argument: SP cites: *yathāha—
asato bhāsanāyogād utpādasya ca hānitaḥ /
kāryakāraṇayor ittham vastutvaṁ kena vāryate //*

(source not traced)

आदिमध्यान्तभागत्वे निरंशत्वं च दुर्घटम् ।
क्षणस्य संततौ चापि सिद्धसाध्यत्वमुच्यते ॥६०६॥

In the nature (of an object as) having a beginning, existence (for some time) and an end, it is difficult to suppose (or happen that there is in it) partlessness; (and) in (your) holding the continuity of a moment,¹ there is (to be) stated the situation (i.e. nature) of being established (in the case) of what is (already) established.² [606]

¹SP paraphrases *kṣaṇa* as *jñāna*.

²SP clarifies this thus: *yadi vikalkpāḥ samtatim anupatanto na jñānam anupatanti tadā vijñānam sarvavikalpam iti siddham eva tvayā sādhyate*.

असत्तश्च समुत्पत्तावन्ते च क्षयसंगतेः ।
द्विविनाशप्रसक्तिः स्यात्क्षणिकत्वं च हीयते ॥६०७॥

Again, (in holding) what is non-existent has an origin and is also connected, in the end, with destruction, there would be contingent the two times' destruction and that would lead to abandoning (or, disproving the theory) of momentariness. [607]

न चेदुत्पत्तिरसतो न विनाशः सत्स्तथा ।
कूटस्थवादसक्तिः स्यान्मिथ्यासंगतितस्तयोः ॥६०८॥

If (you held that) there is no origination of a non-existent, then there is not likewise its destruction as well. (But in our view, there is) no (such) contingency, for the two¹ have (only) false connection between them (or association). [608]

¹SP considers an alternative reading for *mithyāsaṅgatis tayoh*, viz. *mitho 'saṅgatis tayoh*— that is to be translated thus: for

there is no connection between the two (viz. *jñāna* and *vikalpa*, i.e. the knowing Ātman and the supposed external objects).

अन्त्यो नाशो महाश्चेत्स्यान्नाशः सातिशयो यतः ।
विशेषाभावतो नैवं तस्यानतिशयत्वतः ॥६०९॥

(The objector argues:) 'Since the last ¹ destruction was great, ² the destruction (which I posit now) is with some additional (feature of it)'. (The Vedāntin's answer:) 'This is not so, for there is not any difference of that destruction from this, as it (i.e. this latter) does not have any (new) distinctive (feature acquired)'. [609]

For a detailed discussion on this point, read SP which is very lucid.

¹This refers to the *prāgabhāva* 'previous non-existence' of the external object under discussion.

²There is comparison of the *prāgabhāva* with *dhvaṃsābhāva*; the latter being lesser in importance, according to the objector.

मत्वर्थानुपपत्तेश्च क्षणिकत्वाद्यसंभवः ।
द्रव्यतन्नाशयोर्यस्मान्नैवेहास्त्येककालता ॥६१०॥

'Also, because the sense of the possessive suffix *-matup* is unreasonable, ¹ there is impossibility of momentariness etc. (there being); ² (this is so), because there is not simultaneity in the point of (lit. the sameness of) the time between (the existence/origination of) a substance (i.e. object) and its destruction/perishing.' [610]

¹This is already pointed out in verse 587 above.

²The word 'etc.' refers to destructibility etc.

न च नाशस्य कालोऽस्ति क्षणमध्ये तथा बहिः ।
क्षणान्तरं बहिर्यस्मात्क्षणमध्ये ध्रुवत्वतः ॥६११॥

'Also, the time of (i.e. taken for) destruction does not occur in or outside the moment (when the object is said to originate and to perish (or, come to destruction)); because another moment is outside the moment (under reference) on account of the (object's continued) existence in that moment.' [611]

The purport of the argument is that there is no properly conceived relation of the object's destruction to the moment when it originated and existed.

धन्यासीदिति दृष्टश्चेन्न लक्षणविरोधतः ।

लक्षणे वर्तमानस्य कालस्य श्रवणं यतः ॥६१२॥

(An objection:) 'But (the sense of *kṣaṇika* as *kṣaṇavān* i.e. *kṣaṇa* with the suffix *-matub* is reasonable as) in the words 'he was a *dhanin*'¹ 'possessed of wealth,' it is seen that the sense of *dhanin* is understood as the reason even when he is seen today (without wealth). (The answer:) 'No, it is not so, since that would invite the fault in respect of the *lakṣaṇa* (seeing (some object)), for there in *lakṣaṇa* there is a reference to (lit. hearing of) the present (period of time)'.¹ [612]

¹SP clarifies this thus: *tad asyāsty asminn iti matub iti lakṣaṇe tamānakālasyāstīti śravaṇād bhūte bhāvinī vā na tatprayoga arthaḥ*. That means: the word *dhanin* would convey the simultaneous existence of wealth and the possessor of it at the present time.

त्रिकाललक्षणार्थं चेदस्तीति यदि भण्यते ।

तादर्थ्ये कारणाभावान्नैतदप्युपपद्यते ॥६१३॥

If one were to say the word *asti* is used (in *tad asyāstīti matub*) for indicating/conveying (all) the three times (i.e. periods of time); this also is not reasonable, since there is no reason (i.e. cause)¹ for (the word's) having that (proposed) sense. [613]

¹This is *hetu*.

प्रत्यक्षेण विरोधाच्च न क्षणस्य विनाशिता ।
 प्रत्यक्षानुमयोर्नापि विरुद्धाव्यभिचारिता ॥६१४॥
 सिद्धसाध्यत्वमथवा नङ्क्ष्यतीति मतं यदि ।
 क्षणिकत्वस्य हानिः स्यात्किं नश्छिन्नं तथा सति ॥६१५॥

‘Also, on account of the opposition of direct perception a moment does not have the nature of what is momentary. So also there is not mutual non-concomitance of direct perception and inference.’ [614]

‘Or, if it is held that the fault of what is to be proved is what is already proved will (itself) cease to be; then, there would be abandoning (or giving up) of (the view of) momentariness, (and) in that case, what will be lost of us (or, in our view)?’ [615]

SP offers on these two verses quite an elaborate explanation; it may be read with profit.

अर्थक्रियादिलिङ्गेन विरोधित्वाच्च नेष्यते ।
 क्षणिकाः सर्वभावाः स्युरिति यत्प्राक्समीरितम् ॥६१६॥

‘And (your) proposition, viz. ‘All external objects are momentary,’ which is stated (by you) earlier, is not accepted (by us), on account of its being opposed to the reason (*linga*)¹ in the form of practical activity.’ [616]

This argument is based on *arthānupattivirodha*.

¹Cf. SP: *lingaśabdenānupapattiḥ*.

शाल्याद्युद्धहनादि स्यादुत्पित्सोर्वा जनिस्तथा ।
 अर्थक्रिया न मानं वस्तुनैव विरोधतः ॥६१७॥

'There would be (the activity, viz) bringing etc.¹ (seeds of) paddy etc.² and, so also, the production (lit. origination) of that which is about to appear (lit. is to be produced) — this successful/practical activity is not (for you) a means of knowing (the continued existence) of (external objects), since there would be opposition to that means. [617]

This is further reaffirmed in the next verse.

¹This 'etc.' refers to the sower's going out for the seeds. These are mentioned in view of the word *utpitsoḥ* which follows.

²This 'etc.' stands for barley (and other corns).

क्षणिकत्वं न भावानां कथंचिदपि युज्यते ।
नष्टेन नश्यता वापि न शाल्याद्याहृतिक्रिया ॥६१८॥

In no way (then) the (postulation of) momentariness of (external) objects can be reasonable (lit. accepted); (for) the activity of bringing (the seeds of) paddy etc. (can-)not (be accomplished) by the (objects') having been destroyed or being destroyed. [618]

This is the statement of the result of *arthāpatti*, viz. being a means of proving momentariness of objects.

verses 619-620 reject (or refute) the two alternatives expressed *naṣṭena* and *naśyatā*.

संतत्योत्पद्यमानैश्चेत्फलहेत्वात्मभिर्भवेत् ।
भावैरर्थक्रिया सर्वा यथा दीपादिभिस्तथा ॥६१९॥
उत्पित्स्वजातं सज्जातमनष्टं वाभ्युपेयते ।
निनङ्क्षु नश्यन्नष्टं च प्रत्यभिज्ञामृतै कथम् ॥६२०॥

If (it is held by the objector:) 'All that successful practical activity¹ can (or, might) be accomplished by (the external objects) which are being produced in continuity (or, series) and have become the cause(s) of the result(s), in the same

way as it (viz. various activity is accomplished) by a lamp etc.,² [619]

(and) it is accepted that what is about to be produced (or is to come into existence) as unborn and (lit. or (vā)) what is born as non-destroyed', (then it can be asked, in return/refutation) 'How can what is about to get destroyed or is being destroyed and (what is) destroyed (be understood) without (there being) recognition?' [620]

¹This refers to *arthākriyā* mentioned in verse 617 above.

²The word 'etc.' refers to a pitcher, for example.

Verses 621-626 explain away the view: *saṃtatyā kāryam*

प्रबन्धेनार्चिषो धर्मा धर्मिण्यग्नौ व्यवस्थिते ।
अर्थक्रियां वर्तमानाः कुर्युर्ग्रामाद्यवासिवत् ॥६२१॥
दीपादिवदसंभाव्या भवतोऽर्थक्रिया यतः ।
क्षणिकत्वे न सा युक्ता तद्धेतुविरहात्सदा ॥६२२॥

(It is decided that) the activities (lit. properties)¹ of some flame abiding at present in fire, which remains there ever, by their (being in) series (*prabandhena*) would accomplish (or, serve) the purpose of the object(s), like some person, who (continues to exist for more than one moment) would have reached some village, town etc.;² [621]

since the performance of an activity by an object (or objects) is not possible, like in the case of a lamp etc.,³ when there is accepted the momentariness (of the object(s)), that⁴ owing to the absence (of the same as the) cause(s).⁵ [622]

¹*dharma* means *kriyā* 'activity (which is *sādhya*)' and *guṇa* 'property (which is innate)'.

²This 'etc.' would refer to the other activities of the person, performed by him, on reaching the village/town.

³The word 'etc.' refers to a pitcher (and other objects).

⁴This refers to *arthakriyā*.

⁵The word 'cause(s)' can be understood in the sense of 'agent(s)'. SP clarifies this thus: *maitrādes tu svato bhaṅguratve na kadācid api śālyāharaṇādyarthakriyā yuktā tatkartur abhāvādity arthaḥ*. Yet, one could understand it with reference to the momentarily existing objects which would not be able to be the cause of that activity.

नानुत्पन्नस्य हेतुत्वमुदकाद्याहतौ भवेत् ।

उत्पित्सूत्पद्यमानाभ्यामसत्त्वात्तद्वदेव न ॥६२३॥

There would (or, could) not be the action of a cause (viz. agent) in such (activity) as fetching water, (while its agent) has not come into being; so also, that would not be there in the case of what is about to be (born or produced, or to come into existence) and/or what is being (born or produced),¹ because of its non-existence. [623]

SP points to the absence of the cause (i.e. agent) of an activity in respect of (i) what is not born (or produced), (ii) what is about to be born or produced (or, to come into existence), (iii) what is being born (or, coming into existence); (iv) what is (already) destroyed (or, has already perished), (v) what is about to be destroyed (or, about to perish), and (vi) what exists in some moment. The first line is the refutation of (i), the second, of (ii) and (iii). The remaining (alternatives), viz. (iv) and (v) are refuted in verse 624 and (vi) in verse 625, below.

¹-*vat* in *tadvat* is according to Pāṇini 5.1.115: *tena tulyaṁ kriyā ced vatih*.

कर्मलोमादिवत्तद्वन्नापि तत्स्याद्विनश्यता ।

म्रियमाणो न शक्नोति पुत्रं जनयितुं क्वचित् ॥६२४॥

In the same way, (it would not be there) as in the case of the hair¹ on (the body of) a tortoise; also, it cannot (be accomplished) by one that is being destroyed (or, is perishing), (for), indeed, a dying person can nowhere (*na kvacit*)² be

capable of begetting a son.

[624]

¹SP refers in this context to *kūrmakṣīra* also.

²In *kvacit*, there is reference to only a place.

हेतुत्वं लभते नापि तथैवावस्थितः क्वचित् ।
आ कार्यावसितेः स्थाने सिद्धान्तस्ते विनश्यति ॥६२५॥

And, nowhere can it become (lit. attain the status of) cause (viz. agent), being (i.e. continuing to exist) in that moment, till there is completion of an activity; (for), in that case, your doctrine (of momentariness) becomes lost (i.e. defeated). [625]

SP brings out the import of the verse, saying that (i) in the moment of the object's origination (or, coming into being), it cannot do any activity (as said earlier) and (ii) it cannot continue to exist in the moment when that activity is performed.

विनाशक्रियया व्याप्तमुत्पन्नं चेद्विनश्यति ।
फलहेतुप्रबन्धेनेत्येवं सुस्थमिदं भवेत् ॥६२६॥

(An argument of the objector:) 'If what has come into existence (or, being) is (already) pervaded by destruction (i.e. becoming destroyed, or perishing), by the continuity of the cause of the result (viz. causing the activity), this (opinion/view of ours) becomes well-proposed'. [626]

In verses 627-631 the notion of saṃtāna is introduced by the objector and refuted by the Siddhāntin.

संतानानपपत्तेश्च नैवमप्युपपद्यते ।
संतनोतीति संतानः कर्ता चेदभिधीयते ॥६२७॥
तस्य चैकत्वनाशित्वात्संतानो नोपपद्यते ।
नाप्यपादानतः सिध्येन्न वाधिकरणाश्रयात् ॥६२८॥
न चान्यस्मिन्विभक्त्यर्थे यथोक्तेनैव हेतुना ।

Thus also (the view) is not tenable, if (i.e. when or for) the agent is called *saṃtāna* 'stream of consciousness' on the basis of (*iti*) the derivation (of that word from the verb root *tan* 'to stretch/extend' with the prefix *sa-*), viz. he who continues (to be). [627]

And, owing to its singleness and perishability, continuity cannot be tenable. Nor also can that (viz. continuity) get (or, be) established by (the object's) being an *apādāna* '(point of) departure, or a thing from which another departs', nor also by resorting to an *adhikaraṇa* 'a support'. [628]

Nor, also, in any other meaning signified by the (relevant grammatical) case—this on account of, or, owing to) the reason which is (already) stated. [629ab]

SP points out that the *saṃtāna* can be either a *kāraka* '(that which is) related to an activity-expressing verbal form', or a *bhāva* 'thing coming into existence'. Be it one of the notions signified by the grammatical case relevant: (i) the agent, (ii) the point of departure, (iii) the support, (iv) the object, (v) the instrument, (vi) the recipient in an activity. The second line of verse 627 and the first of 628 reject the notion (i); the second line of verse 628 rejects the notions (ii) and (iii); and verse 629ab refutes the remaining, i.e. notions (iv)-(vi); (for detailed explanations, see SP with profit); or it rejects a positive entity, this being stated in verses 629cd, 630 and 631 below.

संतानो यदि धात्वर्थो भावश्चेदभिधीयते ॥६२९॥

भवितारमपेक्ष्यैव भावः सिध्येन्न सोऽन्यथा ।

न चासौ लभ्यते तादृग्भविता हि विनश्चरः ॥६३०॥

If it is held (lit. said), 'Continuity is a positive entity, signified by the verbal root', [629cd]

(then the answer is:) 'A positive entity would come into existence (or, come to be established) only after depending on (lit. on having expected) what will come to be; (and) not otherwise. But (*ca*) that one one does not obtain (lit. is not

found), for the one of kind/sort of a thing/person is going to be is (only) perishable/destructible.' [630]

The argument in verse 630 is based on the question: Is continuity (*saṃtati*), i.e. the stream of consciousness (*saṃtāna*) in existence? or that it does not exist? The verse under reference (i.e. 630) discusses the first alternative—but, there also, out of the two sub-alternatives which are there—two in number: (i) permanent and (ii) momentary—the first of these is considered.

नित्यं भवितृतन्त्रत्वात्संतानस्याप्यनित्यता ।
धातूपसर्गयोरर्थस्त्वत्पक्षे न च लभ्यते ॥६३१॥

Even the stream of consciousness is impermanent, since it is ever dependent on what will come to be; and, moreover, the meaning conveyed by the preposition (*sa-*) and the verb root *tan* together is not in tune/agreement (lit. obtained) with your view. [631]

Verses 632-637 set aside (or, reject) the etymological meanings of the word *saṃtāna*.

नैकीभावो न विस्तारः क्षणिकत्वेऽस्ति युक्तिमान् ।
अतीतानागतानां च मिथः कालासमागमात् ॥६३२॥
वर्तमानस्य चैकत्वात्संतानो नोपपद्यते ।
संतानिभ्यश्च संतानोऽभिन्नो भिन्नोऽथवा द्विधा ॥६३३॥

Neither becoming one nor continuation (of something which is already in existence) is adduced with (good, i.e. valid) reason; for there is no connection (lit. conjunction) with one another (of two moments) of time, viz. that which is already gone by and that which is yet to come. [632]

Since the present moment of time is just single, its being the continued stream of consciousness is untenable. And (there are further questions that arise:) 'Is the stream of consciousness non-distinct from those which form into a stream? or, is it

distinct from the same? or, is it twofold (i.e. both non-distinct and distinct)?' [633]

The first two of these questions are answered in the next verse (i.e. 634) and the third, in verse 635.

अभेदेऽनित्यतासक्तिः स्थास्नुर्भेदे प्रसज्यते ।
कार्यकारणभावश्च न च वः स्यादभीप्सितः ॥६३४॥

If (it is held that it is) non-distinct, then (it would be contingent to accept that) it is not permanent and if (otherwise, i.e.) distinct, then (contingently) it would be permanent. And, as a consequence, the relation (between the two) as cause and effect, which you have wished to hold, would not follow (or, be there). [634]

SP cites, in support of this argument, the following thus: *yathāha— samtānaś ca pūrvāparībhūtānām kṣaṇānām sākṣād upādānopādeyabhāvenotpāda evocyata iti.*

भिन्नाभिन्नत्वपक्षोऽपि विरोधान्न च युज्यते ।
स्वसिद्धान्तस्य च ध्वस्तिर्न च संगच्छते जनः ॥६३५॥

Also the view that the two are both distinct and non-distinct is not tenable (i.e. reasonable, or, proper) because of the opposition (obtaining between them).¹ And no person would tolerate (lit. go with)² the refutation of his own doctrine/view.

[635]

¹ Namely, they do not occur at one and the same moment.

² One wonders if the verbal form *sangacchate* expects the accusative case of *dhvasti*.

संतानिनां स्वसंतानाद्विन्नाभिन्नत्वकल्पने ।
वाच्या दोषा यथायोगं संतानार्थानुरोधतः ॥६३६॥

In regard to accepting the (simultaneous) distinction and non-distinction of those that have continuum from their (own) continuance, there are to be pointed out (lit. stated) such blemishes as are in consonance with the thing (known as their) continuum. [636]

SP observes: *bhede samtānasvātantryādyāpattir abhede kṣaṇi-
katādihānir bhedābhede siddhāntavirodha ity arthaḥ.*

अवाच्यमिति पक्षश्चेन्मैवं तस्याप्यसंभवात् ।
अन्यानन्योभयात्मत्वकल्पने ह्यसदेव तत् ॥६३७॥

If there is the view; '(The nature of) the stream (or, continuum) of consciousness is indescribable', (it should be pointed out:) 'Even that is not possible (or tenable), for, indeed, that (viz. the threefold) acceptance of it as (altogether) distinct/different, or as non-distinct, or both, all that is but non-existent (or false)'. [637]

Verses 638-639 discard the view that there is the existence of another.

अवाच्यं यद्यनन्यत्वे ह्यन्यत्वे वाच्यमेव तत् ।
अथावाच्यं तदन्यत्वे इतरत्रास्तु वाच्यता ॥६३८॥

If it be (accepted as) indescribable, while it is non-distinct, it should then be regarded as describable while it is distinct. And, if it is indescribable while it has distinction, then let there be (accepted) describability in what is otherwise (or, elsewhere). [638]

Verses 639-646 set aside the notions of describability and/or indescribability both.

अन्यानन्यत्वयोश्चात्र वाच्यावाच्यत्वयोस्तथा ।
परस्परविरोधित्वान्न स्यादेकत्र संगतिः ॥६३९॥

Further, in respect of them as being distinct and non-distinct¹ and also in respect of their being describable and indescribable, their existence together (or association)² would not be (possible) owing to their being mutually opposed. [639]

¹Sureśvara uses *anyānanyatvayoḥ* for *anyatva-ananyatvayoḥ*; so also *vācyāvācyatvayoḥ* for *vācyatva-avācyatvayoḥ*.

²Literally, going (or, being) together.

वाच्यं वा यदि वावाच्यं कस्मादित्यभिधीयताम् ।
परबुद्धौ समारोप्यमवश्यं वस्तु चेद्वेत् ॥६४०॥

Also, (be it said that) the stream of consciousness is describable or indescribable, then it should be told (as to) why/whence (that is so); if there is/be inevitably/necessarily (some) thing on which another (or, substance) is superimposed. [640]

न चावाच्यं भवत्पक्षे किञ्चिद्वस्त्वभ्युपेयते ।
वक्तव्यभावं भवान्यत्र तत्र वस्तुनि का कथा ॥६४१॥

Also, nothing is accepted in your view as indescribable; what talk can be there (lit. in that thing) in respect of which (lit. where) you mention that it is a negative entity?¹ [641]

This is based on an argument of the objection: *saṃtāna*, though it is an object and has a property, viz. absence of describability.

¹SP brings out the purport of the second line thus: *ākāśaḥ pratisaṃkhyānirodhaś cety abhāvam api bhavān yadā vadati tadā saṃtāne vastuni vācyatvābhāvakathāpi na te yuktety arthaḥ*.

तद्रूपं चेदवाच्यत्वं भवताभ्युपगम्यते ।
नैवं साधारणत्वात्स्यात्पुद्गलादेरपीष्यते ॥६४२॥

Also, if you hold that indescribability is the nature of the form of that; this is not so, because, owing to its being a

common property, it would/could be accepted in the case of matter etc.¹ also. [642]

SP mentions, in this context, that even atoms etc., which are external, are indescribable—and this is acceptable to the objector.
¹This is *pudgala*, a term among the Jains in particular; it means: matter, externally existing atoms etc. The word etc. refers to other external objects.

अतोऽसाधारणं वाच्यं रूपं संतानवस्तुनः ।
 अथावाच्यत्वमेवास्य रूपमित्यभिधीयते ॥६४३॥
 उक्तं तर्हि त्वया रूपं संततेर्घटरूपवत् ।
 यदसाधारणं यस्य रूपं तत्तस्य भण्यते ॥६४४॥
 ततश्चावाच्यमिति ते प्राप्ता स्वोक्तिविरुद्धता ।
 तथा संतानविच्छिन्नकल्पनापि न युज्यते ॥६४५॥

Therefore, it is to be said that the nature (lit. form) of the thing called continuum is uncommon. Now, if (i.e. when) it is said that this one (viz. the stream of consciousness) has indescribability as its nature (lit. form), [643]

then, you have admitted (lit. said) that the nature (lit. form) of continuum is like the nature (lit. form) of a pitcher. Whatever is the uncommon nature of some thing has (lit. is) to be called (i.e. accepted) as its nature (lit. form). [644]

Therefore, (now your acceptance that) indescribability (is the nature (lit. form) of the continuum) means (your accepting) opposition to your own proposition (lit. statement). And, in that case (*tathā*), (thus entertaining) the notion of break in the continuum is not tenable. [645]

संतानस्याव्यवच्छिन्नौ सर्वदैव प्रसज्यते ।
 सभागसंततिः सा हि नाविच्छेदमृते यतः ॥६४६॥

(And,) in the absence of the break in the stream ..., there will ever be contingent the continuity of what has (or, is made up of) parts, since that (viz. *sabhāgasantati*) cannot be without

the absence of break. [64

In verses 647-648, Sureśvara discards the existence and/or non-existence of *saṁtāna*.

अनित्यत्वप्रसङ्गाच्च न सती संततिर्भवेत् ।
इत्युक्तेन प्रकारेण संतानासंभवो ध्रुवः ॥६४७॥

Also, on account of the contingency, viz. impermanence being there, there would not be an existent continuum. Thus, in the manner stated, there is certainly the impossibility of a continuum. [64

फलहेतुनिषेधाच्च न युक्तं सर्वथा वचः ।
संतत्या जायमानैस्तैरिति यद्व्याहृतं पुरा ॥६४८॥

Also, because of the rejection (or denial) of the cause of (any) result, the opinion (lit. say of the opponent) is, in no way, (supported) by reason. (And) what was said earlier, viz. *saṁtatyā jāyamānaiḥ*, is refuted (lit. answered away) earlier. [64

यच्च दीपप्रकाशादिक्रियावदिति चोदितम् ।
साधयार्थेन समानत्वात्तदप्युक्तमशोभनम् ॥६४९॥

And, as to what was stated as a counterargument (*codita*) viz. 'like the activities such as illuminating by a lamp,'¹ that also is an improper statement because of its being similar to what is to be established.² [64

¹Cf. the verse *prabandhenārciṣo dharmā dharmiṇi ...* in verse 521 above.

²Cf. SP: *dr̥ṣṭāntasyāpi pakṣatulyatayā kṣaṇikatvāsammater ity arthaḥ*. This is explained in the next verse.

अर्थक्रिया यथा नास्ति रथादेरुक्तहेतुतः ।

दीपादेरपि नैवासावस्ति तेनैव हेतुना ॥६५०॥

As there is not in the case of a chariot etc.¹ any activity towards (effecting a certain) object on account of the said reason,² it is not there in the case of a lamp etc.³ also, for the same reason. [650]

This would be the outcome of the objector's proposition.

¹The word 'etc.' refers to other inanimate objects.

²Namely, *kṣaṇikatva* 'momentariness' (SP).

³The word 'etc.' refers to a pitcher and other similar existent objects.

क्षणिकत्वं यथा नास्ति रथादेर्येन हेतुना ।

दीपादेरपि तेनैव क्षणिकत्वाद्यसंभवः ॥६५१॥

(Then) as momentariness does not occur (or, is not to be accepted) in the case of a chariot etc. for the reason (which is earlier adduced); therefore, for that very reason, there is not possible, in the case of a lamp etc., momentariness etc.¹

[651]

¹The word 'etc.' refers to *saṃtati* 'continuum'.

एककालौ मतौ यच्च नाशोत्पादौ तुलान्तवत् ।

अहेतुफलतासक्तेर्न चैतदुपपद्यते ॥६५२॥

And, as to that the destruction/perishing and origination are held to be belonging to one and the same time,¹ just like two pans of a balance,² that also is not tenable, since there would contingently follow the situation that there is result (produced even) without (or, in the absence of) a cause (being operative). [652]

¹SP clarifies it thus: *na hi bīje sthite 'nikuro jāyate naṣṭād eva tasmāt taddr̥ṣṭer iti yan matam ity arthah*. See next verse.

²SP adds: which are not related as a cause and its effect; t adds a simile 'like two horns (of an animal)'.

जनकव्यापृतेः पश्चाज्जन्यो निष्पद्यतेऽङ्कुरः ।
कार्यकारणताभेदस्तयोः स्याद्विन्नकालतः ॥६५३॥

(Actually) it is after the functioning of what produces (*janaka*, viz. a seed) that there comes into existence a sprout which is to be produced (lit. born (*janya*)) and the relation of the two as distinct, viz. the cause and the effect, would occur as at two different (points of) time. [653]

न चेत्कारकभेदोऽत्र कालभेदोऽथवेक्ष्यते ।
कुतो हेतुफलत्वं स्यात्सव्येतरविषाणवत् ॥६५४॥

If (suppose) one were to ignore the distinction between the two as *kāraṅkas* (viz. the agent and the object connected with the verbal root *pad* with the prefix *ut-*), how (or, whence) could there be their relation as cause and effect as (it would not exist) between the left and the other (i.e. right) horns (of an animal)? [654]

This verse denies the relation of a seed and the sprout (arising from it), since they (i) belong to two different points of time and (ii) are both momentary.

न च हेतुफलत्वं स्यादेककालीनयोस्तयोः ।
वैनाशिकेन सत्त्वेन त्वयाभ्युपगमात्तयोः ॥६५५॥

Also, there would not be between the two the relation of cause and effect, if (and when) they would be belonging to (only) one (point of) time; for, in your opinion (or view), they are (each) connected with perishability.¹ [655]

¹Read SP: *tayor ékasmin kṣaṇe sattvenābhyupagamād viṣāṇavat āryakāraṇatvābhāvasyeṣṭatvād iti yojanā*.

Verses 656-658 are in refutation of accepting any effect, with the help of ārambhavāda and pariṇāmanavāda.

न विकारो न चारभ्यं बौद्ध कार्यमसंभवात् ।

विकारे सांख्यसिद्धान्त आरम्भेऽत्यन्तभिन्नता ॥६५६॥

An effect is, O Buddhist,¹ neither a modification nor what is to be begun (by something else); (for) in holding (the effect as) a modification, (you would have taken) the position of the Sāṃkhyas and in holding (that there is) a beginning (of the effect, i.e. its coming into existence), (your acceptance would have) their total distinction.² [656]

¹It appears from an alternative explanation in SP: *yadi vā bauddhasyābhimataṃ kāryam* that one could read in the first line word as *bauddhakāryam*; cf. the MRI edition (p.986) which so reads.

²Possibly this would show the relation of cause and effect to be untenable, because they are unlike each other. The idea underlying this is: *kāraṇaguṇāḥ kāryaguṇān ārabhante* is an accepted principle of the Sāṃkhyas and others.

सत्त्वाद्विनिष्ठितार्थश्च सत्स्रोतोन्तरनिष्ठितः ।

घटस्तम्भादिवन्नापि मृद्वत्परिणमेत्स्वयम् ॥६५७॥

Further, an (externally existent) object,¹ which has originated from (another) existent (object) is made firm in another existing stream; also it would not modify itself in the same way as a pitcher, a pillar etc. (or) as a clay (do not modify themselves).² [657]

SP clarifies: *kāryakāraṇayor atyantābhede tadbhāvasyaivāyuktir ity arthaḥ*.

¹This also stands for a stream, in view of *-srotontara*.

²This denies the Buddhist's non-acceptance of *pariṇāmanavāda*

(of the Sāṃkhyas). Cf. SP: *kṣaṇikatvāc ca brahmaṇo vaiṣamyādity arthah*.

नापि चारभते कार्यं पुरतः कुम्भकारवत् ।
असत्त्वान्न द्वयं तेऽस्ति सांख्यकाणादपक्षवत् ॥६५८॥

Also, (what is momentary in nature) cannot begin (to produce) an effect, as does a potter. The pair (viz. a cause and its effect) cannot exist (or lit. are not in existence), as in the views of the Sāṃkhyas and the followers of Kaṇāda on account of its momentariness.

[658]

In verses 659, Sureśvara states his own refutation of *kṣaṇikatvavāda*.

इत्यादिदूषणान्यत्र वक्तव्यानि सहस्रशः ।
न च प्रमाणसद्भावः सर्वस्य ज्ञानमात्रतः ॥६५९॥

These and such other blemishes¹ can be stated (or, pointed out), (yes) in thousands. And, here (i.e. in respect of this theory of the Buddhists), there is not available (lit. is the absence of) any means of knowledge (in that theory) for the reason that (all is) merely consciousness.²

[659]

¹SP summarises these very clearly and also, points out that they do not beset the Vedāntin's theory thus: *yat tu vedā na ramāṇam nāpy apauruṣeyā nityā vā saṃketaś ca sambandhaḥ*.

²This is against the Vijñānavādins, the Yogācāra followers.

Verses 660-664 relate to the refutation of the Mīmāṃsakas' view that the Ātman has the nature of insentient knowledge.

शून्यत्वमपि नैव स्यादेतस्मादेव कारणात् ।
अहंप्रत्ययगम्यत्वमेकत्वादात्मनो न च ॥६६०॥

Also there cannot be the nature of (all as) void, this, also,

for this very reason (which is pointed out). Nor again is there the singleness¹ of the Ātman, which can be understood from the consciousness of I (i.e. that 'I exist')—(as in the view of the Mīmāṃsakas).² [660]

This brings in, further, an argument against the Bhāṭṭa Mīmāṃsakas (also), which is continued in the next verse as well.

¹It appears from SP (and also AnSS edition's variant reading) that the verse read: ... *gamyatvam etasmād ātmano* Also, SP notes: *ekatvād iti pāṭhe 'py ayam evārthaḥ*, i.e. it makes *etasmāt* and *ekatvāt* synonymous!

²The Mīmāṃsakas have come into the discussion, only incidentally, 'for this very reason (which is pointed out', which means, 'owing to the absence of any authoritative (or, correct) means of knowing (reality). This seems to refer to BUB: *pratyagātmagrāhyatā cātmano 'ham iti mīmāṃsāpakṣaḥ pratyuktaḥ*.

अंशंशित्वेऽपि नैव स्यात्पूर्वोक्तादेव कारणात् ।
क्षणभङ्गे च भावानां प्रत्यभिज्ञाद्यसंभवः ॥६६१॥

In (holding the view:) there being the relation of part(s) and the whole (in respect of what are conceived as cause and effect(s)) also,¹ (that view can-)not be (tenable), for that very reason (already) pointed out (lit. stated). And, further, in (accepting) the momentariness of (external) objects, there is no possibility of a recognition (being there)² etc.³ [661]

¹The thought of refuting (incidentally) the view of the Mīmāṃsakas (intended in the preceding verse) is still persisting.

²Once again, this is a reference to the view of the Buddhist; cf. SP *siṃhāvalokananyāyena baudham prati doṣāntaram āha*.

³The word 'etc.' refers to memory and the subsequent performance of activity (SP).

पूर्वदृष्टे पुनः सोऽयमिति बुद्धिर्न युज्यते ॥६६२॥

भेदः स एवायमिति कालरूपादिभेदतः ।

यदि नाम तथाप्यैक्यं तयोरनुभवाश्रयात् ॥६६३॥

In the case of (some one), who is seen again, it is not proper/reasonable to entertain the knowledge, viz. 'This one is the same'; [662]

(because) this (knowledge), 'This one is but the same', is related to the difference in (points of) time and nature/form'. If again, there is yet oneness of the two on the basis of (one's) experience, it is on the basis of (their) sameness/identity. [663]

सादृश्यात्प्रत्यभिज्ञानं कृत्तकेशनखादिवत् ।

इति चेन्नैतदेवं स्यात्सादृश्यासंभवात्तव ॥६६४॥

If it is held (by the Buddhist:) 'There can be recognition (by one) on the basis of the similarity in appearance, as in the case of hair and/or nails, cut earlier (and now grown),' then it has to be said in answer:) 'No, this one is not like (what) you (would hold), for (in) your (view of the world of objects) there is impossibility (for any supposition of) similarity'. [664]

ie, Sureśvara refers to BUB: *sādrśyāt pratyabhijñānaṃ kṛtto-
takeśanakhādīṣv iveti cet*

ses 665-671 refute the view: *sādrśyāt pratyabhijñā*.

सादृश्यासंभवश्चापि सर्वस्य क्षणिकत्वतः ।

नाप्यनेकार्थदर्शयिस्ति सादृश्यं स्याद्यतस्तव ॥६६५॥

and the impossibility (for any supposition of) similarity is owing to momentariness of all (as you have been holding) and, also because, according to you (*tava*), this (notion of) similarity does not relate to (lit. does not see) more things than one. [665]

सादृश्यान्न च केशादौ स एवायमितीक्षणम् ।

केशादिजातेरेकत्वाद्धीरियं तन्निबन्धना ॥६६६॥

Again, in respect of hair etc.,¹ there cannot be any grasping (lit. seeing) on the basis of the similarity that can be expressed as, 'This one is the same'; for, this is but a seeing, related to it, because of the oneness of the species of hair etc.¹,

[666]

¹The word 'etc.' refers to nails.

न हि लूनोत्थितेष्वेषु विना जातिसमाश्रयम् ।
त एवामी इति मतिः कस्यचिद्व्यक्तितहेतुजा ॥६६७॥

Indeed (*hi*), one cannot have a thought (or, knowledge) that has arisen on some (particular) object (appearing before one), viz. 'These are but the same' in the case of the hair, which have grown after they had been cut, unless one resorted to (or, unless there was (for one) the basis of) the species. [667]

अभ्रान्तस्य हि केशादौ यदा सदृशधीस्तदा ।
पूर्ववालैरिमे वालाः सदृशा इति जायते ॥६६८॥

Indeed (*hi*), in the case of anyone,¹ who is not mistaken (or, has not erred), when there arises (is) the knowledge of a similar (object/person), there appears a cognition as (for example) in respect of hair etc.,² that is of this form, viz. 'These hair are similar to what were (seen by me) earlier'.

[668]

¹This is owing to the force of *hi*; cf. SP: *ukte 'rthe sarvāvisamvādārtho hiśabdah*.

²The word 'etc.' refers to nails.

त एवामी इति मतिर्जायते न तु कस्यचित् ।
एकजातिनिमित्तातः प्रत्यभिज्ञेयमिष्यते ॥६६९॥

But, in the case of none, there arises the cognition (lit. notion),

'These hair are the same as those'. As such, this is understood (or, accepted) to be recognition, based (lit. caused) as it is on (their belonging to) the same species.¹ [669]

¹Cf. SP: *vyaktinimittatvāsambhavo 'taḥśabdārthaḥ*.

प्रत्यक्षं च तदेवेदमित्येतद्वस्तुकर्मकम् ।
उल्लिखज्जायते साक्षादतीतेऽहन्यधर्मकम् ॥६७०॥

And (this statement of yours), 'This is the same as that', is but the direct perception which has (some) thing as its object;¹ it arises, referring directly to it,¹ (from) what does not have the property (of that) when that has ceased to exist (lit. is bygone). [670]

Read NKL (ms. p.623): *bādhābhāvād abhrāntam ity arthaḥ*.

¹This refers to the grammatical object.

इदमेव तदेवेदमित्येषोऽनुभवो दृढः ।
प्रत्यक्षो बाध्यते नायमनुमानेन केनचित् ॥६७१॥

This firm direct experience (in the form), 'Just this, this one is only that' cannot (lit. is not) stultified by any inference.¹ [671]

¹On this, cf. SP: *agnyanuṣṇātānumānavat pratyakṣavirodhe mīkatvānumānaṃ nodetīti bhāvaḥ*. Also, *viparītam bādhyadhakatvaṃ pratyāha pratyakṣa iti*. This latter is clarified in the next verse.

verses 672-678 are in refutation of *anumānena pratyakṣabādhah*.

प्रत्यक्षेण विरोधे हि लिङ्गमाभासतां व्रजेत् ।
यतोऽतो नानुमानेन प्रत्यक्षस्यास्ति बाधनम् ॥६७२॥

Since, indeed, inference (*liṅga*) would be (so only) in

appearance, when (or, in case) there is its opposition to direct perception, therefore, there is not (i.e. cannot be) stultification of direct perception (of some thing) by inference (about it).

[672]

विज्ञातपूर्वकुम्भस्य पुनः कुम्भान्तरेक्षणे ।
सादृश्यप्रत्ययो युक्तौ न त्वसौ क्षणिकात्मसु ॥६७३॥

It is proper to entertain the notion (lit. experience) of similarity in appearance on (or while) seeing another pitcher to a pitcher, that is already (or, lit. earlier) known, but that cannot be (entertained) on seeing those (pitchers) which have the nature of momentary (objects).

[673]

पूर्वं दृष्ट्वापि चेत्तिष्ठेद्यावदागामिदर्शनम् ।
सादृश्यधीप्रसिद्ध्यर्थमित्यभ्युपगमेऽपि च ॥६७४॥
सिद्धा सादृश्यधीरेवं क्षणिकत्वं तु नश्यति ।
स्वरूपमात्रसंबोधि नात्मनोऽपि क्षयोदयौ ॥६७५॥
ज्ञानं प्रत्यभिजानाति ध्वंसित्वान्नापि चापरम् ।
सादृश्यक्षणिकत्वे द्वे त्वदिष्टे न प्रसिद्ध्यतः ॥६७६॥

If or even after seeing (some object) earlier, the (seer) remains (or, continues to remain) till when (he comes to have) the sight of (another thing) which is yet to come (to his) eyes/knowing, so that there can be (established/entertained the notion of) similarity—then, in this opinion (or, thus understanding) also,

[674]

there is established the understanding/grasping of similarity of appearance though, the (doctrine of) momentariness is lost i.e. has to be abandoned. (As against this) the knowledge which is the awareness (*sambodhi*) of only itself (lit. its own nature) does not recognise its own destruction and/or rise and not also another (thing) because of it (i.e. of this latter) being perishable. As a consequence, (therefore), the notions of similarity in appearance and momentariness, which are entertained (or, held) by you, do not become (or, get)

established.

[675-676]

न च स्मृतिस्तदेवेदमित्येवमनुभूतितः ।
वस्तूललेखी ह्यनुभवो नीलरक्तोत्पलादिवत् ॥६७७॥

Remembrance also is not experience referring to (some existing) object, on account of the experience (of it thus), 'This is only/just like that', since, indeed, an experience is ever referring to an object as of a blue or red lotus. [677]

नीलोत्पलानुभववत्तदेवेदमितीक्षणम् ।
अपूर्वार्थपरिच्छेदात्स्मृतिर्नातो भवेदियम् ॥६७८॥

This grasping (lit. seeing), viz. 'This is just that' is like the experience (i.e. seeing) of a blue lotus; (and), therefore, this would/could not be remembrance, for it covers (i.e. pertains to) an object not (seen) before.¹ [678]

¹That is quite some new object.

verses 679-682 refute the view that recognition is false, owing its basis in similarity.

मिथोविभिन्नरूपत्वात्सादृश्यं चेह दुर्घटम् ।
तदेवेदमिति मतौ वियन्नकुलयोरिव ॥६७९॥

Moreover, similarity of appearance is, in this case, very difficult to obtain on account of their having appearances (or, forms/nature) that are mutually different; as between the sky and a mongoose, in respect of the notion (i.e. knowledge), 'This is just that'. [679]

असाधारणरूपेण विभिन्नानां परस्परम् ।
क्षणानां क्षणिकानां वः सादृश्यं केन हेतुना ॥६८०॥

For (or, on account of, or, owing to) which reason do you

entertain (or, lit. there is for you, or, in your opinion) similarity (of appearance) ¹ between moments and/or momentary objects, which, by their uncommon (and, therefore, dissimilar) natures (i.e. forms or appearances), are mutually very different? [680]

¹This word refers only to objects which are momentary.

तेनेदं सदृशं वस्तु त्विति चापि न युक्तिमान् ।
व्यपदेशः पदार्थानां क्षणिकत्वात्स्वभावतः ॥६८१॥

The mention, 'This thing is similar (in appearance) to that', is also not reasonable (or, lit. with reason to support it), owing to the nature of the things being (only) momentary. [681]

इदं दृष्टमदोऽद्राक्षमिति नैवोपपद्यते ।
व्यपदेशः स्वभावेन व्यपदेष्टुर्विनष्टतः ॥६८२॥

Also, the mention, 'This was seen', or 'That I saw' is not tenable, because of the reference (to a thing) by (the mention of its very nature, while he, who thus makes the mention, is perishing. [682]

Verses 683-685 explain BUB: dr̥ṣṭavataḥ

व्यपदेशक्षणाभावात्पूर्वदृष्ट्यैव संक्षयात् ।
उत्तरानभिसंबन्धाद्व्यपदेष्टुः कुतो भवेत् ॥६८३॥
व्यपदेशो विना योगमतीतानागतार्थयोः ।
तत्स्थास्नुत्वाभ्युपगतौ क्षणिकत्वं विनश्यति ॥६८४॥

How could (there be that mention) ¹ by/of a person, since there does not remain the moment for making that mention, because (the moment for) the earlier seeing/experiencing (by him) is already gone? and also because there is no connection (of that moment) with the subsequent? [683]

Such a mention (is not possible) without the connection of the objects, viz. those bygone and those which have not (yet)

come; (and) in accepting the continuous existence (*sthāsnutva* 'lit. permanence') (of the two things, or the person who makes that mention),² (the theory of) momentariness gets lost (i.e. defeated/disproved). [684]

These verses are based on BUB: *dr̥ṣṭavato vyapadeśa-kṣaṇānavasthānāt*.

¹Namely, *tad evedam* mentioned in verse 679 or *idam dr̥ṣṭam* *ado 'drākṣam* in verse 682 above.

²That is, the person who had seen the object earlier.

जात्यन्धवन्न चादृष्ट्वा कश्चिद्व्यपदिशेदिह ।
सादृश्यधिषणां चेह न कश्चित्कर्तुमर्हति ॥६८५॥

And, further, nobody would make any mention (in such a case),¹ like the one who was born blind (and make such mention even) without seeing. So also, not anybody² would entertain (in such a case)¹ a notion of similarity (in appearance). [685]

¹This is for *iha*, referred by SP to *vyavahāradaśā*.

²SP qualifies this person by the adjective *prācīnadarśanaśūnya*.

Verses 686-687 conclude the discussion on the theory of momentariness.

प्रमाणविरहात्सिद्धा सेयमन्धपरंपरा ।
रक्ताम्बराणां सिद्धान्तस्तथाभ्युपगमात्स्वयम् ॥६८६॥

Thus, on account of the absence of an authoritative (or, trustworthy) means of knowing, it is established that this doctrine of the red-robed (monks) is but a line of blind men,¹ on account of the holding (lit. acceptance) of (the doctrine) by himself.² [686]

SP supports the thought of this verse by citing *yathāha*—

*riktasya jantor jātasya guṇadoṣam apaśyataḥ /
vilabdḥā bata kenāmī siddhāntaviṣamagrahāḥ //*
(*Pramāṇavārtika* 4.54).

¹That is, one blind man following another and so on.

²Add: owing to the absence of any trustworthy means of knowing (which is, here, propounding).

निरोधकाले चित्तस्य वासकत्वं न युज्यते ।
क्षणिकत्वादसंबन्धात्संतानान्तरबुद्धिवत् ॥६८७॥

At the time (i.e. after) the perishing (of consciousness), it is not reasonable to hold that consciousness has the capacity to give abode (to that which follows), owing to its being momentary (and therefore) the absence of connection (with it), like in knowledges (which occur) in another series of consciousness (that follows).¹ [687]

¹SP clarifies it thus: *bhinnaśaṃtānavartinyor buddhyor mithaḥ sambandhābhāvavad ity arthaḥ*.

Verses 688-689 explain BUB: *akṛtābhyupagamapraṇāśadoṣau*.

अकृताभ्यागमो दोषः कृतनाशश्च ते भवेत् ।
तस्माद्यः कर्मणां कर्ता स भुङ्क्ते कर्मणः फलम् ॥६८८॥

(And that) would invite for you the acceptance/holding of the acquisition of what has not been done and the destruction of what is done; therefore, (it is proper to hold that) the one, who is the agent of (some) deeds, enjoys the result of one's deeds.¹ [688]

¹The use of the singular form *karmanah* in apposition to the plural form *karmanām* earlier is to indicate the usually accepted principle *jātāva ekavacana*.

यस्मिन्नेव तु विज्ञान आहिता कर्मवासना ।

फलं तत्रैव संताने कार्पासे रक्तता यथा ॥६८९॥

(An argument of the objector) 'The result should occur in that very continued agent in which consciousness has occurred (lit. placed) the desire (or, impressions) for some activity, in the same way as redness (occurs) in (a gauge of) cotton.¹

[689]

The argument is based on the idea that the two faults which are pointed out in the preceding verse do not follow even when/if there is absence of a permanent nature of some thing.

¹SP clarifies this *dr̥ṣṭānta* thus: *yathā kārpaśabīje 'lakta-kādirasāvasikte tato jāyamānānikurādāv atyantabhinne 'pi rakta-tānuvartate*.

Verses 690-698 rejects the notions of the truth and/or the falsehood in holding *saṁtāna* in relation to *kartr̥tva* and/or *bhoktr̥tva*.

इत्यस्मिन्नपि सिद्धान्ते प्रसङ्गो न निवर्तते ।
संतानिव्यतिरेकेण यस्मान्नैव स विद्यते ॥६९०॥

(The Vedāntin's answer:) 'In this (proposition) also, a contingency is not (i.e. cannot be) avoided, since that¹ does not at all obtain as apart from what has a continuity'.² [690]

The argument in the second line presupposes the notion of the difference between the continued existence of both the agents and the enjoyer.

¹This refers to the activity by one resulting into the enjoyment of another.

²That is, unless there is oneness/sameness of the agent of an action and the enjoyer of its result/fruit.

संतानिनस्तु संस्कारा विद्यन्ते परमार्थतः ।
मिथश्चासंगतेस्तेषामतो दोषान्न मुच्यते ॥६९१॥

‘In reality, the impressions (of an earlier doing/intentions) of one, who has a continued existence, do continue to be (even later); therefore, (the objector) would not be left free from (having) the blemish (which is pointed out), for the two¹ have not been connected with each other.’ [691]

This argument has relation to the objector’s alternative notion that the agent of an action and his *saṁtāna* ‘continued (existence)’ are connected.

¹These are the agent of an action and his continued (existence) as an enjoyer of its result.

मानाभावान्न चेदिष्टा संततिर्येह कल्पिता ।
दोषोक्तिमात्रतस्तर्हि न पक्षः सिद्धिमश्नुते ॥६९२॥

(The objector would say:) ‘If it is not accepted that there is a connection of the two,¹ on account of there being no authoritative means of knowing (the same), then, it (viz. the connection) can be imagined’; (and the Vedāntin’s answer is:) ‘That view also cannot then be established just by the (earlier) statement of the fault’.² [692]

¹These are already clear from the preceding verses.

²Namely, what is imagined is non-existent (*asat*) and cannot, therefore, lead to any connection which is held as real (*sat*).

कार्पासबीजसंस्थैव योक्ता रक्तादिवासना ।
स्वाकारकार्यकृत्सैव न कार्यं कार्यकृन्मतम् ॥६९३॥

‘Also, the affording of an abode to redness etc. that is existing in the seed of cotton, as was (earlier) mentioned (by you), is itself the author (lit. maker) of an effect which (also) has its form (*ākāra*),¹ but it is not accepted/held (by you) as an effect.’²

[693]

¹Add: remaining in the later moment also; cf. SP: *sā sthāyiny eva svākāram anikurādikāryaṃ karoti*.

²SP adds: *nāsau kṣaṇikeṣu samtāneṣu hetuphalatve drṣṭānta ity arthaḥ*.

मिथः क्षणानां संबन्धः शृङ्खलाकटकादिवत् ।
सादृश्यव्यपदेशादि सर्वं सुस्थं भवेत्ततः ॥६९४॥
इत्येवं चेन्न तद्युक्तं क्षणिकत्वस्य हानितः ।
क्षणत्रयस्य संव्याप्तेः शृङ्खलाकटकादिवत् ॥६९५॥

(If it said:) 'There is connection between two moments as between a chain and its bits;¹ then, this (position of) similarity of appearance and the mention (as said above in *tad evedam*) would all be well-maintained (i.e. well argued)', then, [694] (the Vedāntin answers:) 'That is not reasonable (or, well argued), for that would entail the loss (or, abandoning) of (the principle of) momentariness, since there would be the inclusion (lit. pervasion) of (all) the three moments² as in the chain and its bits'. [695]

Here, Sureśvara has only briefly touched BUB which is clearer in details.

¹Or, a bridle and its bits.

²The first is when an object comes into being, the second, when it enters on producing an effect and, the third, when the effect has come into existence.

मम तवेत्यवच्छेदव्यवहारश्च त्रुट्यति ।
संबन्धाभावतस्तेषां क्षणानामपरस्परम् ॥६९६॥

'So also (*ca*) any dealings marked by the words 'mine' and 'yours' would come to naught (or, lit. would be cut short), owing to the absence of the mutual connection between the moments of them (marked by the notions of mine and yours).'¹

[696]

¹This is not possible because there is only one consciousness and which is momentary.

ज्ञानस्य च विशुद्धस्य स्वसंविन्मात्ररूपिणः ।
अन्यस्य तादृशोऽभावात्कुतो दुःखादिसंप्लुतिः ॥६९७॥

‘And, while consciousness, which is extremely pure and has the nature of knowing itself,¹ and, while there is the absence of any other (thing) of similar nature, how/whence could/can there be a flow of misery etc.? ² [697]

¹This is the use of genitive absolute construction.

²The word ‘etc.’ suggests the impossibility of holding consciousness (alternatively) as transitory, void and unreal; cf. verse 699 below.

न चानेकस्वभावांशवत्त्वं ज्ञानस्य संमतम् ।
स्वच्छैकरूपतस्तस्य दाडिमादिफलं यथा ॥६९८॥

‘Also, it is not held by you (or, acceptable to you) that consciousness which is pure and uniform is possessed of (or, made up of) parts of various natures¹ like a pomegranate or another fruit.’² [698]

¹Or, ... parts which differ with one another in nature.

²The different parts of the fruits yield different tastes.

Verses 699-700 set aside the notion that the whole of the object to be known is a part of knowledge.

प्रमेयत्वानुभूतेश्च न विज्ञानांशता तथा ।
अनित्यदुःखशून्यादेः पृथुबुधनादिरूपवत् ॥६९९॥

‘Again, on account of (consciousness) being cognized (or, experienced) as an object of knowing (in its pureness),¹ there cannot be parts of the cognition (or the cognizing?), viz. what

is momentary, misery and void etc., as (there are parts of the cognition of a pitcher) as the foot-bottomed form of it etc.'² [699]

¹Cf. the word *viśuddhasya* in the preceding verse.

²The word 'etc.' might suggest the pitcher's being useful for carrying water, its colour and so on.

ज्ञानमात्रमिदं सर्वं न ज्ञेयं विद्यते पृथक् ।

स्वप्नादिज्ञानदृष्टान्तात्प्रत्ययत्वादिहेतुतः ॥७००॥

'(Again, in your view), all this (what is postulated as the world of objects) is merely consciousness (and) there does not exist any object of knowing as different (from it); (therefore, the example understood in the preceding verse is not proper—this), on the basis of the example of the knowledge of the object(s) of the dream state and for the reasons, viz. (its/their)¹ being only cognition (awareness) etc.'² [700]

¹That is, of consciousness.

²Cf. *prṭhubudhnādirūpa* mentioned in the preceding verse.

Verses 701-703 refute the opponent's acceptance of inference on the ground that there is no statement in his scheme of enunciation, reason etc. that are members of any syllogism proper.

प्रतिज्ञाहेतुदृष्टान्तभेदस्तावत्परस्परम् ।

ज्ञानमात्रस्वभावत्वाद्भवता नाभ्युपेयते ॥७०१॥

'(Moreover,) you do not accept/hold such various distinct notions as enunciation (of a proposition), the reason (for it and) the example which have the nature only of (i.e. not distinct from) consciousness.' [701]

This verse stresses on the impossibility of drawing any inference regarding consciousness.

पक्षश्चायं प्रमाणेन प्रत्यक्षेण विरुध्यते ।

शरीराद्देशभेदेन भासन्तेऽर्था घटादयः ॥७०२॥

‘Again, this view is opposed by the means of knowing (called) direct perception. (See, for example) such objects as a pitcher¹ do become known as belonging to another place which is outside the body.’ [702]

This verse points to the opposition of direct perception.

¹These are a piece of cloth, a lotus and so on.

अभ्रान्तं चेन्द्रियज्ञानं तेषु चैवोपजायते ।

भिन्नाभिन्नविकल्पाहं त्वत्प्रत्यक्षं च नेष्यते ॥७०३॥

‘Further, in respect of them (viz. those objects), there arises with the help of the organs the knowledge which is not mistaken (or, not false) and, then, there is not accepted direct perception (which is held) in our view and which is prone/likely to cause various alternative notions of objects (such as) distinct and/or non-distinct (from one another).’ [703]

SP points out the difference between knowledge which is acceptable to the Vedāntin and consciousness which is held by the Buddhist.

Verses 704-709 are in refutation of the unauthoritativeness of savikalpaka jñāna in the opponent’s view.

दूरे स्थितं प्रपश्यामि यत्र दृष्टमिदं तथा ।

एवंप्रकारं प्रत्यक्षं स्वसंवेद्यं न बाध्यते ॥७०४॥

‘That, “I do not see what obtains in the distance and I have seen this one”—such is¹ direct perception; it is not stultified (by any other means), knowable/known as it is by itself.’ [704]

The argument is in this verse is: direct perception pertains to the different external objects and, therefore, it stultifies inference of consciousness. Cf. NKL (ms. p.625): *abādhatvān mānam evety arthaḥ*.

दुःखाद्यात्मकमेवेदं विज्ञानं चेत्त्वयोच्यते ।
तद्वियोगाद्विशुद्धं तदिति वः कल्पना कथम् ॥७०५॥
यतः संयोगिनिर्मुक्तौ वस्तु शुद्धमिहेष्यते ।
स्वरूपस्य तु निर्मुक्तौ किमन्यदवशिष्यते ॥७०६॥

'If it is held (lit. said) by you that this consciousness is of the nature of misery etc.¹ and also that it is extremely pure (i.e. unaffected by anything else) owing to the absence (*viyoga*) of that (viz. misery etc.¹)—how can that (*viññāna*) be pure in your proposition?' [705]

'for, indeed a thing is accepted as extremely unaffected (by anything else, i.e. pure) when it is released (or, is in state of detachment) from what was connected with it. (This is so, since) what else would remain there (than that/such thing) when its own nature is released (from what affected it)? [706]

The argument in these verses is: The nature of the real thing is unaffected by any other thing (for, it does not *really* exist) and, therefore, there is no necessity of postulating its attaining unaffectedness or purity.

Read, on this verse, NKL (ms. p.625): *asambhavaṃ sādhayati ata iti ... puṣpasya svābhāviko guṇaḥ śuklatvaṃ dravyāntareṇa puṣpakārane saṃskriyamāṇe 'pagacchati guṇāntaraṃ ca raktatvaṃ cōtpadyate tathā vijñānasya caturvidhabhāvanā prakarṣād duḥkhāgamo viśuddhiś cōtpadyata iti tanmatam anuradati svābhāvika . iti* (introducing the next verse).

¹The word 'etc.' should refer to momentariness, void and unreality (*asattva*).

स्वाभाविकगुणवस्तौ रागाद्यागन्तुकात्मता ।
दृष्टा पुष्पेष्विति वचो यच्चापि समुदाहृतम् ॥७०७॥

सम्यङ्निरस्तं तत्पूर्वं वियोगाच्चापि लिङ्गतः ।
संयोगपूर्वता तस्य लिङ्ग्यते मेषयोरिव ॥७०८॥

‘And, that statement which you had made, viz. “It is noticed in the case of flowers there is first the destruction of their natural (i.e. original) property¹ and there is the coming (or, appearance) of redness (or, any other colour)” [707] is earlier well disproved (lit. set aside as untenable) for the reason (*lingataḥ*), that there is absence (lit. separation) of (the cause).’ That (viz. the effect) is seen to have been preceded by a union (of the cause and the effect) as (that) of two sheep.² [708]

Read NKL (on these verses, ms. p.625): *ātmā kartrādirūpaś etyādaḥ svabhāve sthite tadvināśo na sambhavatīty uktam pariharati samyag iti. kiṃ ca puṣpasya śuklatvaṃ na svabhāvaḥ puṣpe saty api viyujyamānatvān malavad ato na puṣpaguṇo dr̥ṣṭānta ity āha viyogāc ceti. kiṃ ca śauklyasya svābhāvikatve ’pi sadr̥ṣṭāntatvam tasya dravyāntarenācchāditasya nāśābhāvād ity āha dravyāntareti* (introducing the next verse).

¹Alternatively, quality, viz. colour. Read the’ note on the preceding verse, for clarification.

²The example is not clear; nor also is it clarified by SP. Yet the idea at the basis is: *viyogaḥ samyogapūrvakaḥ*.

द्रव्यान्तराच्छादनाद्वा सहजस्याप्यनीक्षणम् ।
तद्द्रव्यसंक्षये यस्मात्पूर्ववत्सहजेक्षणम् ॥७०९॥

Or, perhaps, there can be obscurity (lit. non-seeing)¹ of a natural (property of a thing) by the covering of it by some other substance, because the natural appearance/seeing of (it becomes possible) after that substance has ceased to exist (or, lit. has come to perish). [709]

This is one more argument against the opponent which is under reference, as noticed from verse 707 above. Read also

the note on the preceding verse which introduces this verse.

¹That is, absence of the sight of it. SP clarifies this point with the following remark: *drśyate hi vastrāḍau haridrārāgāpagame athāpūrvam śauklyam iti bhāvah.*

This verse sets aside the notion about misery as jñānamala.

ग्राह्यग्राहकरूपेण यच्चापि मलकल्पनम् ।

अन्यसंसर्ग्यभावात्तत्तुषकण्डनवद्धृथा ॥७१०॥

And, the notion of (the authoritative) impurity (which is) entertained, owing to the nature (of consciousness as) that which/who grasps that which is to be grasped¹ is also baseless (i.e. meaningless), like the pounding of husk, since there does not exist any other (object) connected (with the earlier existing object).

[710]

¹It is assumed/accepted by the Vijñānavādin that consciousness *grāhyagrāhaka!*

verses 711-713 point to the difficulty in accepting the Buddhist's view that mokṣa also is like a bondage.

फलाश्रयस्य चाभावान्निर्वाणादि स्वलक्षणम् ।

फलं च घटते नेह युक्तिभिः शाक्यपुङ्गवे ॥७११॥

And, in (the postulated doctrine of) the brave (*paṇḍita*) follower of the Buddha, the result, viz. such as *nirvāṇa*,¹ which has its own characteristic, does not bear any relation to (or, lit. get connected with) arguments of reason, owing to the absence of the support for the result.²

[711]

¹*nirvāṇādi* implies *abhyudaya* 'rise in worldly prosperity'.

²This is because consciousness, remaining merely pure (i.e. unaffected in its nature), cannot be a support for anything. In other words, positing the idea of a support is not possible. As

such, the support for the result is a negative entity.

शल्यविद्धस्य तच्छल्यनिष्कर्षोत्थं सुखं फलम् ।
शल्यविद्धमृतौ कस्य फलं स्यादिति कथ्यताम् ॥७१२॥
न संयोगो वियोगो वा यस्य केनचिदिष्यते ।
विनाशतः स्वतस्तस्य कीदृशी फलसंगतिः ॥७१३॥

In the case of one, who is afflicted with some dart, the result (desired) is happiness, which arises from the removal of the dart, in the case of the death of one who is afflicted by that dart; therefore let this be told, as to whom there would accrue the result (when the dart is removed, lit. has ceased to be).

[712]

What sort of connection with the result would there be in the case of one, who meets with destruction, the one, in whose case someone (viz. the Buddhist) does not hold the occurrence of both connection and separation?

[713]

The argument seeks to refute the Buddhist's acceptance of momentariness. The sufferer, unless he continues to exist for a later moment, cannot have the resulting happiness!

Verses 714-715 are intended to support the Vedāntin's own view that all that misery originates in ignorance (avidyā).

भवत्पक्षेऽपि तुल्यं चेन्नाविद्यामात्रहेतुतः ।
कारकादिविभागस्य वस्तु पूर्णं स्वतो यतः ॥७१४॥

(A view of the objector:) 'This¹ is similarly (occurring) in your view also'. (The Vedāntin's answer:) 'No, it does not (so occur), because that (sort of occurring), or the division (of the objects) in various *kāraṅkas* etc., is owing merely to ignorance and the (real) thing (i.e. sentience) is complete in itself'.

[714]

¹This refers to the earlier verse.

पुरुषार्थात्मकं वस्तु कूटस्थं तत्स्वतो यतः ।
अविद्यया तथाभूतं तद्द्वैतवस्तौ किमपेक्षते ॥७१५॥

Since the immutable thing (viz. reality, i.e. sentience) is, in its own right, of the nature of (what is considered to be) the end/object of an individual's life, has become of that sort¹ only through ignorance, therefore, what does (or, will) it expect when that² is destroyed? [715]

That is, sorrow-stricken owing to the affliction caused by art.

This refers to ignorance.

verses 716-717 affirm the absence of any blemish in accepting worldly dealings as established by the witnessing principle, sentience.

अनुमानेन तादृक्षं वस्तु प्राक्प्रतिपादितम् ।
न चानुमाने दोषोऽपि तत्र कश्चिद्विभाव्यते ॥७१६॥

And) that kind of thing (viz. reality, i.e. sentience) is already established (or, explained).¹ Moreover, there is not (or, cannot) also² be entertained (or seen) any fault there (i.e. in the inference about it). [716]

Read SP: *vimato vyavahāro 'samhatajyotirnimitto vyavahāra-
tvād ādityādikṛtavyavahāravad ity anumānād brāhmaṇāda
uktam vastu sādhitam ity arthaḥ*. The reference is to BU 4.3.156-159.

SP relates the use of *api* 'also' to the earlier discussion on the Lokāyata view (cf. BUBV 4.3.156-159).

सहोपलम्भसंस्कारात्पुनर्धीर्यैकदर्शनात् ।
सानुमा संभवस्तत्र व्यभिचारस्य चेन्न हि ॥७१७॥

‘That is inference¹ which is one’s (entertaining) awareness (of some thing) again (for a second time) owing to (the) impression (of it as occurring, or having been) together (with another). (And, if one were to argue against this that) there is possibility of fallacious reasoning in that.’, (our, i.e. the Vedāntin’s answer is:) ‘Not, indeed, is there fallacious reasoning’.

[717]

¹SP clarifies the nature of inference by citing—

*sambandho vyāptir iṣṭātra lingadharmasya līṅginā /
vyāpyasya gamakatvaṃ ca vyāpyatvaṃ gamyam iṣyate //*
*yo yasya deśakālābhyāṃ samo nyūno ’pi vā bhavet /
sa vyāpyo vyāpakas tasya samo vābhyadhiko ’pi vā //*
tena vyāpye grhīte ’rthe vyāpakas tv aśya grhyate /
(Ślokavārtika 5(4).4-6ab).

Verses 718-721 refute the opponent’s view that there is, in the Vedānta exposition, the fault of vyāptyasiddhi.

ननु चाव्यभिचार्येव संबन्धो गमको भवेत् ।
सहोपलम्भमात्रेण न यतः पितृसूनुवत् ॥७१८॥

(An argument of the objector:) ‘But, indeed, (what you have called as) the invariable relation (between the pervader and the pervaded) would become a pointer (to the fallacy), since (that)¹ does not become (a sound reason for inference) by merely occurring together, as in the case of a father and his son.²

[718]

¹This refers to the invariable relation of *vyāpya* and *vyāpaka* owing to the occurrence together of two *dharma*s and *dharmin*s. SP refers, in this context, to *vyāpteś ca dr̥śyamānāyāḥ kaś cid dharmāḥ prayojakaḥ* (Ślokavārtika 5(4).13cd).

²SP explains this thus: *pitāputrau (śiṣyācāryau vā) saha sakṛd-dr̥ṣṭavat ’nyataradarśane ’nyatarabuddhir notpadyate*.

अस्त्वेवं शङ्क्यते नो चेद्व्यभिचारः स्वगोचरे ।
प्राथर्यते व्यभिचारो हि जाताशङ्के न गोचरे ॥७१९॥

Let this be so; if varying nature is not noticeable in the case of its object; for, they never entertain (lit. desire that there is) varying nature (of it) in relation to the object about (or, in relation to) which there has arisen a doubt.¹ [719]

¹That is, as to its veracity/validity.

सहोपलम्भमात्रेण सा तु सर्वत्र जायते ।
धियो नो विषये शङ्का व्यभिचारानुसारिणी ॥७२०॥

Yet, that (doubt) arises everywhere by the very occurrence of it together with itself; (and), in relation to (correct) knowledge, there is not any doubt about its varying nature.¹ [720]

¹SP supports this argument by citing—

yāvac cāvyatirekitvaṃ śatāṃśenāpi śaṅkyate /
vipakṣasya kutaś tāvad dhetor gamanikābalaṃ //
(*Nyāyakusumañjali* 1.182.5)

तदाशङ्कानिवृत्त्यर्थमतः कार्यं प्रयत्नतः ।
साध्याभावेन तद्धेतोरभावपरिमार्गणम् ॥७२१॥

Therefore, for averting (or, setting aside) the doubt about that,¹ a search has to be made, with effort, for ascertaining the absence of the reason of that² (indeed) in the absence of the thing to be proved. [721]

SP brings out the purport of this verse thus: *vyabhicāraśaṅkāyā* *loṣatve tannivṛttyartham vyāpakābhāvena vyāpyābhāvo jñātavya* *i phalitam.*

¹This refers to *vyabhicāra* 'erroneous or fallacious reasoning'.

²This refers to *sādhyaābhāva*.

Verses 722-725 refute the concomitance of vyatireka with the absence of the object to be proved.

साध्याभावे कथं हेतोरभाव इति कथ्यताम् ।
ज्ञानलक्षणसंप्राप्तावथवाप्यविशेषतः ॥७२२॥

Let this be told: (i) 'How can there be the absence of the reason while there is the absence of the thing to be proved? or, (ii) while all the signs (indicators/reasons *linga*) of knowledge (i.e. the knowledge of the pervader) or are noticed (lit. obtain) are generally noticeable?' [722]

The verse points out the faults in holding the *sādhyā* and *sādhaka* as different; as two alternatives.

यदि मालक्षणाप्तस्य साध्याभावादि भण्यते ।
तदा भ्राष्ट्राद्यदूरस्थे साध्याभावादि सज्जते ॥७२३॥

'If it is said that, there is the absence of the thing to be proved etc.,¹ with respect to (the concomitant) which is known through the operation of valid means of knowledge; then, there would contingently follow the absence of the thing to be proved while a cooking pot (of clay -*bhrāṣṭra*) or iron² etc. are not found in the far. [723]

SP clarifies the meaning of the verse thus: *saṃnikṛṣṭe loṣṭādaṁ yogyānupalabdheḥ sādhyāgnyabhāvam buddhvā tena dhūmābhāvadhīḥ tvannmate syān na cesyate loṣṭādāvagnyabhāvavad dhūmābhāvasyāpi sujñānatvād ato yogyānupalabdhisiddhāgnyabhāvasya na dhūmābhāvalingatety arthaḥ.*

¹The word 'etc.' refers to the absence of the *linga*; e.g. the absence of smoke which is the *linga* of fire.

²SP refers to a line from some lexicon: *klībe 'mbarīṣam bhrāṣṭro nā kandur vā svedanī striyām.*

प्रत्यक्षगोचरे साध्याभावश्चेत्प्रतिपाद्यते ।
प्रत्यक्षेणैव सिद्धत्वादनुमैवं वृथा भवेत् ॥७२४॥

If it is postulated in respect of what is directly perceived that there is absence of the thing to be proved; then, inference itself would be meaningless for the reason that (the thing to be proved) is already established by direct perception alone.

[724]

So far alternative (i) has been answered. In the following verse is answered alternative (ii).

अधित्यकादौ देशे तु ह्युपलब्धेरसंभवात् ।
मा भूदग्न्याद्यभावेऽपि कदाचिद्धूमसंभवः ॥७२५॥

And (*tu*) as in a region like the slope of a mountain,¹ there is no possibility of finding (or, obtaining the sign, i.e. *linga*), let there not be (understood) ever the presence of smoke, even while there is the absence of fire etc.²

[725]

¹The word *ādi* in *adhityakādi* refers to *upatyakā* 'region around (or, near) the mountain'.

²Possibly, this word 'etc.' refers to 'other things to be proved'.

Verses 726-728 set aside the notion of a rule that there is always *anvavyatireka* in *tarka*.

यद्येवमन्वयोऽप्यत्र नैव प्राप्नोति तत्कथम् ।
अन्यत्र यदि नाम स्याद्धूमभावेऽग्निभावता ॥७२६॥

If this¹ is so, then the concomitance also would not be noticed (or, obtain); how then could there be the presence of fire while there is the presence of smoke elsewhere?¹

[726]

This is to point out the absence of concomitance of what is to be proved and what its reason (*linga*).

¹*anyatra* means *sapakṣa* 'a similar instance' (SP).

दर्शनादस्तु सा कामं दर्शनाधीनसिद्धितः ।
अधित्यकादौ देशे तु यावत्साक्षात् दर्शनम् ॥७२७॥
तावन्नावसितुं शक्यं भवितव्यमिहाग्निना ।
इति धूमोपलम्भत्वाद्भ्राष्ट्रधूमोपलम्भवत् ॥७२८॥

Let that ¹ be there owing to the sight of it; since the existence (of anything) is dependent on the sight of it. In places such as the slope of a mountain, it is not possible to decide that there is fire on the same, so long as there is no direct sight of it, (only) on account of seeing (lit. finding) smoke there, as in the case of seeing smoke related to a cooking pot (of clay or iron). [727-728]

¹The existence of fire.

Verses 729-730 refute the idea of *anvayavyatirekagamyatva* in *tarka*.

इदं तावद्वदत्वत्र लिङ्गलक्षणतत्त्ववित् ।
धूमादिलिङ्गेनेहार्थो भवता कोऽनुमीयते ॥७२९॥

Let (then) the knower of the definition of the sign (*linga*) tell this: 'What is the thing that you infer here, ¹ from (i.e. on seeing) the sign such as smoke etc.?' ² [729]

¹That is the mountain (in relation to the proposition *parvato vahnimān* ...).

²This can refer to one of these: (i) Fire which is to be known, (ii) The mountain (i.e. some particular region), (iii) The relation of the fire and the mountain, only the sign itself. These are refuted in the next verse.

नाग्निस्तस्य प्रसिद्धत्वान्नापि देशः प्रसिद्धितः ।
न च संबन्धमात्रं स्याद्यथोक्तादेव कारणात् ॥७३०॥

It is not fire, for it is already known (i.e. seen). Also, it is not the region, for that also is known. Nor also is it merely the connection of these two¹ (since that cannot be described, or, ascertained) also for the reason already stated.² [730]

¹This is on the basis of sacrifice; but the verse does not appear clear in referring to the third alternative.

²This refers to establishing what is already established (*siddhasādhyatva*).

Verse 731 is for introducing the refutation of the authoritativeness of inference.

तस्मान्नैवानुमा नाम मानं युक्तिमदिष्यते ।
मेयाभावादिति प्राप्तावत्र प्रतिविधीयते ॥७३१॥

Therefore,¹ the means of knowledge, viz. inference, is not (found to be) reasonable;² for there is the absence of what is to be known.³ In this respect, (now), there follows our (i.e. the Siddhāntin's) answer:⁴ [731]

¹That is, owing to the difficulty in seeing clearly what is to be known and what indicates (or, leads to) the same.

²In other words, it does not have a good reason for the proof of the proposition.

³This implies the absence of what leads to the knowledge of it.

⁴From *atra pratividhīyate*, there is stated the refutation of the *prima facie* view which is stated earlier.

Verses 732-740 are a refutation of the alleged non-authoritativeness of inference.

सहोपलब्धिः संस्कारवशाद्ब्रूमादिदर्शनात् ।
अग्न्यादौ विप्रकृष्टेऽर्थे निश्चिता जायते मतिः ॥७३२॥

On account of the impression about their being found (or, noticed) together (and) on seeing the smoke etc.,¹ there arises a definite knowledge in respect of (the object) such as fire² (though) it is in the distance. [732]

¹The word 'etc.' would refer to other characteristics of other objects to be known.

²This is to indicate the other objects to be known.

लिङ्गात्तावदिदं ज्ञानं जातं बाधकवर्जितम् ।
उत्पन्नत्वात्तदुत्पन्नं नानुत्पन्नं कथं चन ॥७३३॥

As to the knowledge, which has arisen from the sign, it is free from any stultifier (of it);¹ and as (your argument about) that (viz. the knowledge) which has not arisen, it (is to be said that) it has (certainly) arisen, (and you cannot say), in any way, that it has not arisen.² [733]

¹This answers away the alternative (ii) noted above and rejects the idea of any stultifying cause as existence.

²The second line rejects alternative (iii).

जातं किमविनाभावसंबन्धेनेदमीदृशम् ।
किं वा नेति परीक्षेयं जातत्वात्स्यादपार्थिका ॥७३४॥

This query, viz. whether or not this knowledge, as described (in the preceding verses), was (at all) produced, thanks to their relation as invariably concomitant, is without any purpose/meaning,¹ for (the simple reason of its) being produced. [734]

This verse points to the alternative (iv) as not worth-considering.

¹In other words, this query is baseless.

सर्वथा फलवज्ज्ञानं जातत्वान्न तदन्यथा ।
 तस्मात्प्रत्यक्षवर्तिकचिद्व्यभिचारकृदञ्जसा ॥७३५॥
 यावन्नेक्षामहे तावन्नाप्रमाणमितीर्यते ।
 तदपह्वमानस्य तवात्यन्तमसंभवात् ॥७३६॥

Certainly, (or, lit. in every way), knowledge (produced) by inference) has a purpose to serve,¹ since it is produced;² it is not otherwise.³ Therefore, so long as we do not clearly see in it, as in direct perception, what causes variance we shall not say that it (viz. inference) is not authoritative.⁴ Since it is not altogether possible while you are seeking to deny (lit. conceal) it. [735-736]

¹That is, it is purposeful or useful.

²The known rule is: there can be no activity which has not any purpose whatever.

³Namely, unmeaningful or useless.

⁴This implies the denial of the usefulness of inference in the dealings of men, which do not have, in the eyes of the Vedāntin, a philosophically accepted reality. SP supports this implication by citing—

anye paraprakṛtānāṃ vyāptināṃ upajīvakāḥ /
drṣṭer api na tair iṣṭā vyāpakāṃśāvadhāraṇā //
 (Nyāyakusumanījali 1.183.3; Ślokavārtika 5(4).14cd-15ab).

And this leads to the statement in the last line, i.e. it sets aside the objector's view as put by SP thus: *sādhyasya durnirūpatvād anumānāprāmāṇyam*.

अत्राह यदि विज्ञानजन्ममात्रात्प्रसिध्यति ।
 प्रतिज्ञामात्रतः सिद्धेर्वृथा स्याद्धेतुकीर्तनम् ॥७३७॥

In this respect (or, at this juncture, the objector) says: 'Let that knowledge¹ be (accepted) as established by the mere rise (or, origin of consciousness; (and) thus) it, being established by mere enunciation (of the proposition), the statement of the reason (*hetu*) is futile (or, unnecessary)'. [737]

This verse brings out another argument of the objector, referring to the unauthoritativeness of inference (for, he has already considered direct perception likewise).

¹That which is taken as arising from inference.

बाढमेवं भवेदेतदाशङ्काकारणं न चेत् ।
किञ्चित्तत्रोपलभ्येत ह्यनवद्यं भवेद्वचः ॥७३८॥

(The Vedāntin's answer:) 'Well, it would be so; if there were not found any cause (for entertaining) a doubt whatever and (your) statement would be free from blemish'. [738]

SP clarifies it thus: *pratijñāvākyaṁ the vyāpake pratipanne viśeṣadarśanādi saṁśayakāraṇaṁ na dr̥śyate cet pratijñāvākyaṁ nirdoṣaṁ hetvanapekṣaṁ eva vyāpakaṁ niścāyayatīty arthaḥ*.

पुरुषादिनिमित्तस्तु जायते यत्र संशयः ।
अन्वयव्यतिरेकाभ्यां हेतोः स्यात्तत्र निश्चयः ॥७३९॥

Where, however, there arises a doubt that is owing to human fault or mistake etc.,¹ there is a decision arrived at (or made) in that case, with the help of the positive and the negative concomitance (of the reason and the object of knowledge). [739]

¹This refers to the defective speech, hearing, or any organ of man.

उत्पन्न एव ज्ञानेऽतस्तत्संदेहनिवृत्तये ।
अन्वयव्यतिरेकौ स्तो न ताभ्यामनुमेयधीः ॥७४०॥

Therefore, in respect of (some) knowledge, which has arisen (in a person, or, which has been produced in a person), the positive (and the negative) concomitance (of the means to

the knowledge and the object of it) serve (lit. are) useful in averting (any) doubt about it; it is not that the knowledge of the object to be known (is produced) by them.¹ [740]

This verse emphasises the usefulness of Anvaya-Vyatireka in inference.

¹Add: as held by the objector.

Verses 741-742 set aside the not finding/knowing of *svabhāvakārya* as causing inference.

संदेहनिर्णयादन्यत्स्वभावादि यदुच्यते ।
तस्यानुमित्यनङ्गत्वात्प्राप्तं तत्तुषकण्डनम् ॥७४१॥

(Further) as to what is said by you about things such as the nature of things (*svabhāva*) as other than doubt and decision, there follows only the act like pounding the husk, since (all) that is not a part of (or, an ancillary to) inference. [741]

These are *kārya* 'an effect' and *anupalabdhi* 'non-cognition' and they do not have any direct perception in relation to it.

अविनाभावसिद्धयर्थं नन्विदं वर्ण्यते त्रयम् ।
त्रिष्वेव त्वविनाभावाद्भद्रं तैरपि कीर्तितम् ॥७४२॥

Indeed, for establishing the invariable concomitance (of the object to be known and its sing), this triad¹ is stated (as) necessary; (and) it is only in these three that there obtains the invariable concomitance²—they (viz. the Buddhists) also have (so) stated. [742]

¹This refers to *svabhāva* 'a thing's own nature', *kārya* 'an effect' and *anupalabdhi* 'non-cognition'—these are noticed as under reference in the preceding verse. This is Dharmakīrti's view as specifically stated in verse 753 below.

²In connection with *avinābhāva*, SP quotes Kīrti (i.e.

Dharmakīrti?):

*pakṣadharmas tadamśena vyāpto hetus tridhaiva saḥ /
avinābhāvaniyamād dhetvābhāsāt tato 'pare //*
(*Pramāṇavārtika* 1.3).

Verses 743-748 reject the *svabhāva*hetu.

स्वभावादविनाभावे स्यादौष्ण्यस्याग्निलिङ्गता ।
स्वभावोऽथाविनाभावात्कार्ये प्राप्ता स्वभावता ॥७४३॥

Hotness is a sign of fire when it has, by its (very) nature, invariable concomitance (with it). If, on the other hand (*atha*), the nature (of smoke) is caused by (or, is owing to) its invariable concomitance (with fire), then, it would follow (contingently that the state of being hot) is (only) the nature of the effect¹ (viz. smoke). [743]

The verse is based on two questions, one in each line, which can be put to the Buddhists: (i) Is it that the nature of smoke has invariable concomitance with fire? Or (ii) Is it invariable concomitance of smoke and fire that produced the nature of the things related? The two lines are then in reply to the two questions respectively. SP brings out the purport of each.

¹Smoke is taken as the effect (*kārya*) of fire.

औष्ण्यस्वभावो दृष्टोऽग्निस्तस्यान्यत्रापि दर्शनात् ।
क्षितितोयाग्निमरुतां दृष्टा स्पर्शस्वभावता ॥७४४॥

It is experienced (lit. seen) that fire has hotness as its nature (i.e. natural characteristic). But that (viz. the nature of being hot) is seen elsewhere also!¹ Also, it is noticed that the nature of having touch (as a characteristic) occurs (or, is found) in earth, water, fire and wind.² [744]

The verse is very cryptic. In the first line, *auṣṇyasvabhāva* is used as an adjective of fire, i.e. the word is a Bahuvrīhi

compound and the word *tasya* implies *auṣṇyasvabhāvasya* which has to be taken as a noun, i.e. the word is a Karmadhāraya compound. Then, the second line refers to some examples of things, which have the same nature, but that is not the invariably concomitant characteristic of each of them. The point which the verse establishes is: The nature of a thing does not result into it invariable concomitance with that thing alone. Cf. the introductory remark in the comment on the next verse: *anuṣṇyādira svabhāvo 'nekavṛttitvāt*.

¹This is a reference to the sun and, as *ādi* in SP (cf. *ādityādau*) implies, to some hot substances, like a heated piece of iron and hot water.

²In the scheme of *dravyas* 'substances', it is only *vāyu* 'wind' which has *sparsa* 'touch' as its distinguishing (*avacchedaka*) characteristic (see the definition in Logic: *sparsānumeyo vāyuh*) but that same 'touch' existing in *kṣityādi* (in the verse) is only an adventitious property.

मतं चेदस्वभावोऽसौ यो नैकार्थप्रवृत्तिमान् ।
धवादावपि तद्वृत्तेर्वृक्षात्मा शिंशपा न हि ॥७४५॥

If it is held that, what has its existence in more than one thing, is not the nature of (some one thing), then (we have to invite attention to the fact that it is not so), because of the existence of that ¹ in (other) trees such as Dhava (Grilea Tomentosa, or Anogeissus Latifolia) also; indeed, what is of the nature of a tree is not (invariably the tree) Śimśapā (Dalbergia Sissoi). [745]

Even this verse is, like the preceding, cryptic! It refutes the proposition that existence of a characteristic in many is like conjunction obtaining among many things.

¹This refers to the property, or characteristic, existing in more than one thing.

शिंशपा वृक्ष एवेति ह्यविनाभावकारणात् ।

क्षणिकत्वं न भावानां स्वभावः स्यात्तथा सति ॥७४६॥

Indeed, Śimśapā is certainly a tree (not anything else),¹ for the reason that there is invariable concomitance;² but/and that being so,³ momentariness would not be the nature of the positive entities.⁴ [746]

¹This is the implication of *eva* after *vrkṣaḥ*.

²Add: of the nature of being a Śimśapā and (also) being a tree.

³This is to say: if it be accepted in the way, viz. existing in more than one individuals (things/beings) and having different natures of them.

⁴Since *vrkṣatva* is the abiding nature of all trees, one could not say that it, as well as any tree (here, Śimśapā), is momentary.

तस्यानेकार्थशायित्वादहेतुत्वं प्रसज्यते ॥७४७॥

(For/And) it would contingently be a non-reason (*ahetu*) owing to its abiding in many (lit. more than one) effects. [747]

This is clarified further in the next verse.

क्षणिकत्वं यदैकस्य तदासाधारणात्मता ।

हेतोः साधारणात्मत्वं यदानेकस्य तन्मतम् ॥७४८॥

When momentariness (is accepted as a characteristic) of (only) one, then it has the nature of abiding in that particular (individual, i.e. object/person), for, when the reason is accepted as of general nature, then it is accepted (as abiding) in many.

[748]

Read SP: *kṣaṇikatvam ekasyaivānekasya vā, nādyah satī sapakṣe tadapraveśād asādhāraṇatvāpatter dvitīye prakṛtahetor anaikāntikatety arthaḥ*.

Now follows in verses 749-751 the refutation of the notion that an effect can be the reason for inference.

अग्नेर्धमाच्च धमस्य कार्यत्वस्य समीक्षणात् ।
अनैकान्तिकता हेतोः कार्यत्वस्येह सज्जते ॥७४९॥

And in the inference of fire from smoke (as the reason), since it is considered (lit. seen/accepted) that smoke is an effect of fire; therefore, there forcefully follows here (i.e. in so doing) that the reason, in being an effect, belongs not to one, i.e. to more than one, (effect). [749]

Read SP (for some clarification): *dhūmasya kāryatvam agnikṛtam pūrvadhūmakṣaṇakṛtam ca dr̥ṣṭam pūrvottarakṣaṇānām etuphalabhāvopagamād ato dhūmād atrāgnir iti na śakyam anumātum kāryatvasya dhūmāgnyavinābhāvahetor vyabhicāritvān na hi dhūmāgnyor anvayavyatirekau dhūmād api parasya utsiddher ity arthaḥ.*

यदि नाम सदा स्पर्शो वाय्वादावपि वर्तते ॥७५०॥
नैतावता भवेत्लोके गौरस्पर्शस्वभाविका ।
भुवो हि स्पर्शवत्त्वस्य लोकेऽस्मिन्सुप्रसिद्धितः ॥७५१॥

As indeed (the property of being an object of) touch ever abides in wind etc., (only) thereby it does not happen that earth, (an object) of the world, would be without the nature of touch—and, indeed, the nature of earth, as being possessed of the property of touch, is well known. [750-751]

SP puts the purport of this verse succinctly thus: *na hi abhāvasyāvinābhūtatvam niyatam*. This argument is Sureśvara's following what Śaṅkara has said. Cf. *svabhāsyāvinābhūtatve doṣam anubhāsyā* which is introductory to the comment on the next verse.

Now follows in verses 752-758 the refutation of the view that

the nature of an individual (i.e. a thing/person) is the reason for inference.

किं चाप्यव्यभिचारेण स्वभावत्वं विवक्षतः ।
स्वभावान्नैव संसिध्येद्वस्तुनोऽव्यभिचारिता ॥७५२॥

Moreover, (in your case) while you wish to state that the nature of an individual (i.e. a thing/person) is invariably (associated with it), then (it has to be pointed out that) being the invariableness of that (individual) thing does not at all follow from (lit. get established by) its nature. [752]

The next verse adduces support for the argument here.

त्रिष्वेव त्वविनाभावादिति यद्धर्मकीर्तिना ।
प्रत्यज्ञायि प्रतिज्ञेयं हीयेतासौ न संशयः ॥७५३॥

(This is so) because Dharmakīrti has affirmed the invariable nature of only three (things)—and this affirmation would undoubtedly be declined by you (who hold what is said (in the preceding verse)). [753]

This refers to the *pratijñāhāni* by a Buddhist follower as it is disregarding a noted Buddhist authority!

तथैवाव्यभिचारेण स्वभावत्वं विवक्षतः ।
पुरैवाव्यभिचारस्य संसिद्धेः किं ततोऽपरम् ।
स्वभावहेतुना साध्यं वद यत्ते विवक्षितम् ॥७५४॥

Furthermore, while you thus wish to state that the nature of an individual is invariably existing in it, (it has to be pointed out that) the absence of invariability, being already proved, what (other argument) can follow? Tell me, what do you wish to point out as the result (viz. inference) by (adducing) the nature of the individual as the reason (for it). [754]

Read SP: *avinābhūtatvādhīnam svabhāvatvamity atra doṣāntaram*
a.

अग्नेश्चाव्यभिचारित्वात्कार्यस्यापि स्वभावता ।
धूमस्याप्नोति भेदो वा द्वयोर्हेत्वोर्निवर्तते ॥७५५॥

(In the case that you accept) that, because of its invariable association with fire, there follows the nature of its effect (viz. smoke as invariably abiding in it), and (*vā*) then there does not (any more) remain (lit. there ceases to be) any difference between the two (viz. reason and the result from it). [755]

This is to point out yet another fault.

On this verse, read SP: *yady avyabhicāreṇa svabhāvaḥ sādhyate*
śo 'yaṁ śiṁśapātvād iti tadā dhūmasyāgnikāryasyāpi
svabhāvatā syād avyabhicārasya sattvāt. yathāha— kāryasyāpi
abhāvapratibandhe tatsvabhāvasya tatutpatter iti. tataś ca
abhāvakāryahetvor abhedadhvastes triṣv iti pratijñāyogāt ta ete
ryasvabhāvānupalabdhilakṣaṇās trayo hetava iti kathā vṛthety
haḥ.

कार्यत्वेऽपि च धूमादेर्न सोऽशोऽनुमितौ मतः ।
व्यभिचाराच्छराच्छृङ्गाच्छरस्योत्पत्तिरीक्ष्यते ॥७५६॥

And in the smoke's being the effect (of fire) that aspect (viz. invariability) is not accepted in drawing the inference (from it), on account of the variability, (just) like that (variability) is noticed in the origination of a *śara* from either a *śara* or a horn (of an animal). [756]

कार्यत्वान्नैव धूमादिरेति निश्चयहेतुताम् ।
व्यभिचारहेत्वसद्भावादग्नेर्हेतुत्वमेत्यसौ ॥७५७॥

Smoke etc. does not come to have the nature of the reason for a decision (i.e. inference), because of its being an effect of fire; (on the contrary), it comes to have the nature of

reason (for the inference) of fire owing to the non-existence of (any) variable (association of the two). [757]

Read SP: *avyabhicārasambandhād eva dhūmo 'gner gamako na kāryatvād ity arthah.*

अनेककारणं कार्यं यस्माद्दृष्टं शरादिकम् ।
तस्मादव्यभिचारेण कार्यमप्येति हेतुताम् ॥७५८॥

Since there is noticed an effect to have more than one causes for it, as *śara* etc. (for the existence of fire), therefore, even an effort (viz. smoke) becomes the reason for the inference (about the existence of fire)? [758]

Read SP in this context: *kāryasya kāraṇa mātragamakatvena tadviśeṣāgamakatvaṃ tadviśeṣāt taddhīs tu na kāryatvakṛtā kiṃ tv avyabhicārādinā tanmātrāt tanmātradhūr api tathaiveti bhāvaḥ.*

Verses 759-763 point out the instance of the (rise of) the *Kṛttikā* constellation to be the reason for inferring the rise of the *Rohiṇī* constellation, even if the former is not the cause for the latter.

अपेक्षाप्यत्र लिङ्गोक्तेः कार्यादौ नैव जायते ।
अकार्यश्चास्वभावश्च नालिङ्गं कृत्तिकोदयः ॥७५९॥

Also, there does not at all (*eva*) arise (i.e. exist) any need (lit. expectation) of the reason (for an inference) to be an effect etc. (in relation to some thing); (for) the rise of the *Kṛttikā* (constellation) is not an effect of and have the nature (similar to that) of the *Rohiṇī* (constellation). [759]

कृत्तिकात्वादिति ह्युक्तेनैव कार्यस्वभावयोः ।
अपेक्षा जायते किंतु ह्यन्वयेतरमात्रतः ॥७६०॥

Indeed, by merely stating¹ that there is (i.e. has arisen the constellation called) *Kṛttikā*, there does not at all follow any

(notion) of an effect or (its) nature (similar to that) of (Rohiṇī constellation); but the notion (of the rise of the latter) occurs (only) on account of the sequence (of the two, viz. Rohiṇī follows Kṛttikā). [760]

¹Alternatively, from the mere statement of.

अकार्यत्वास्वभावत्वादविनाभावमात्रतः ।
उदयः कार्तिको लिङ्गं प्रत्यासत्तेर्भवेद्ध्रुवम् ॥७६१॥

The rise of Kṛttikā, (though) not being an effect of or not having the nature of and not being in invariable association with it, becomes the reason (for inferring the latter's rise) certainly because of the proximity (of their appearances). [761]

रौहिणस्योदयस्यातो न स्वभावाद्यपेक्षते ।
यतोऽतो न स्वभावादेर्हेतुत्वमुपपद्यते ॥७६२॥

Since (thus) the rise of Rohiṇī does not, for this reason, expect the nature etc. (of Kṛttikā), therefore, it does not follow that the nature etc. have to be (or, have the capacity for being) the reason (for an inference). [762]

नात्मनि स्यात्स्वशब्दोऽत्र विरुद्धा स्वात्मनि क्रिया ।
कार्यस्यापि स्वभावत्वं भवेदात्मीयवाचके ॥७६३॥

In this context, (it should be remembered that) the element/member (lit. the word) *sva* (in the compound word *svabhāva*) does not (signify) the Ātman; (for) any activity in the case of the Ātman¹ is opposed (to its nature); also if (that word *sva* were taken to be) expressive of what belonged to the Ātman, then (it would mean that) the nature of the effect² (would be that of) the Ātman. [763]

Incidentally, Sureśvara discusses, in this verse, the significance of the constituent *sva* in the word *svabhāva*. He thinks of two

possibilities in this respect: (i) *sva* 'belonging to it, i.e. being its property (*guṇa*)'; but this cannot be accepted in the case of the *nirguṇa* Ātman; and (ii) 'belonging to itself as an activity' which also would mean what is contrary to the *akriya* Ātman.

¹SP strengthens this by citing: *uktam hi*:

*sa eva cobhayātmāyaṁ gamyo gamaka eva ca /
asiddhenaikadeśena gamyaḥ siddhena bodhakaḥ //*

²Cf. a citation in SP: *yathāhuh— na hy anyathā bhavaty eṣā vyāpyavyāpakatā tayoh*.

Verses 764-766 are an alternative refutation of the notion of *svabhāva* to be the reason for an inference.

किमात्मैव स्वशब्देन किं वेहात्मीय उच्यते ।
स्वभाव आत्मनो भाव इति चेद्वक्तो मतम् ॥७६४॥

(A question can be asked:) 'Is it the Ātman itself or what belongs to the Ātman that is expressed here¹ by the word *sva*? and also, is it (your) opinion that *svabhāva* means some becoming or modification of the Ātman?' [764]

¹Read SP: *svabhāvo gamaka iti vakyam ihaśabdārthaḥ*.

स्व एवात्मा स्वभावश्चेत्तदान्यस्य ह्यसंभवात् ।
व्यतिरिक्तस्य मेयस्य स्यादात्मैवात्मनोऽनुमा ।
तथा च पक्षहेत्वादेरनन्यत्वं प्रसज्यते ॥७६५॥

(The answer given is:) 'If one understands *sva* as the Ātman itself; then, since there is no possibility of (the existence of) another (to be inferred from it)—(for in that case) there would, indeed (*hi*); be the inference of the Ātman itself beside it as the object to be inferred. And, in that case, there would contingently follow the sameness of (both) the *pakṣa*; and the *hetu*¹ etc.² [765]

SP rightly introduces this verse thus: *gamyasvarūpam eva*

gamakam ity atroktan doṣam anudravati.

¹That is to say: *pakṣa* is not at all *saṁdigdhasādhya*!

²Read SP: *gamakasya gamyamātratve pakṣāder api gamakāntarbhūtasya gamyābhinnatvād ahumānapravṛttis tatas ca pakṣadharmas tadamśena vyāpto hetur iti vyartham syād ity arthaḥ.*

अथ स्वस्य स्वभावश्चेदात्मीयोऽर्थो विवक्षितः ।

आत्मीयः शिखिनो धूमस्तस्यापि स्यात्स्वभावता ॥७६६॥

And again (or, if then) it is intended to state that by *sva* is understood as an object that belongs to the Ātman—(then) there would follow (the difficult situation) that the smoke, which belongs to fire, is (i.e. has to be understood as) its nature!

[766]

Verse 767 refutes anupalabdhi as a means of inference.

संवित्तिभावयोर्भेदो यथैवं तदभावयोः ।

न भेदोऽनुपलब्धिर्वो नातो लिङ्गं कथं चन ॥७६७॥

As there is difference between knowledge and (its) object to be known; so there will be (that difference) between the non-existence of them (as well). Therefore, neither distinction (between some two individuals/things) nor between the non-existence (of them) is in any way the reason (for inference).

[767]

Read SP: *na saṁvedyābhāve lingam ekasminn eva lingalingitvāyogāt tathā ca pradeśaviśeṣe kvacin na ghaṭa upalabdhi-prāptasyānupalabdher iti pramattagītam iti bhāvaḥ.*

Verses 768-775 are an examination of the Buddhist view about svabhāva.

एवं लौकिकतादात्म्यतदुत्पत्ती प्रतीरितम् ।

अथ स्वप्रक्रियाकलृप्तं स्वभावादि परीक्ष्यते ॥७६८॥

Thus it has been stated with reference to what are worldly notions about *tādātmya* 'oneness of a thing with another' and *tadutpatti* 'the origin of a thing from another'. Now then is (will be) examined *svabhāva* etc. which is posited in (the Buddhist's) own process (of argument).¹ [768]

While clarifying the verse, SP states: *yathāha— svabhāva-pratibandhe hi saty artho 'rthaṃ na vyabhicarati sa ca tadātmatvād iti. kāryasyāpi svabhāvaḥ pratibandhaḥ tatsvabhāvasya tadutpatter iti ca—evam bauddhaporakriyāsiddhasvabhāvādy apy agamakam iti nirūpyate 'nantarasandharbhenety arthaḥ dvedhā hi tasya prakriyānyāpohasya gamyatvam gamakatvaṃ cety ekā. yathāha— tasmādapohaviṣayam iti liṅgam prakīrtitam / anyathā dharmiṇaḥ siddhāv asiddhaṃ kim ataḥ param // iti. tadviśiṣṭasya tathātvam ity anyā. uktam hi tadvyavacchedaviṣayam siddhaṃ tadvat tato 'param iti tatrāpi cānyā vyāvṛttir anyo vyāvṛtta ity api / śabdāś ca niścayāś caiva saṃketam anurundhate // iti ca.*

अन्यापोहनपक्षेऽपि शब्दव्यावृत्तिभेदतः ।

न हेतोः स्यात्स्वभावत्वं क्रियात्वं च न विद्यते ॥७६९॥

Also, in the view advocating the exclusion of another object through difference in words-distinction, there would be in the reason (for an inference) the nature of its own or of its activity.

[769]

Read SP on *śabdavyāvṛtti ...: śiṃśapāśabdārthāśiṃśapāvyāvṛtter vrkṣaśabdārthāvrkṣavyāvṛtteś ca mitho bhedaḥ aśiṃśapākhyā-pohasya ca na svabhāvatvaṃ nāpi kāryatvaṃ na hi mitho bhinnaghaṭapataṇayoh svabhāvatvaṃ kāratvaṃ vāsti tenātyantabhinnayor uktāpohayoh svabhāvatvādyabhāve 'pi gamyagamakatvopagamād anupalabdheś ca tatrāniṣṭeḥ svabhāvāder gamakatve vyabhicāra ity arthaḥ.*

वृक्षोऽयं शिंशपेत्यत्र त्ववृक्षार्थविविक्तकम् ।
 वृक्षव्यक्तिषु सर्वत्र रूपमस्ति किलेदृशम् ।
 अशिंशपाविविक्तं च तद्वदेवाभिधीयते ॥७७०॥

In the statement, 'This tree is Śimśapā', there is (effect-
 ed/achieved) distinction¹ of (the tree) from what is not a
 tree. In all the individual trees, there is indeed such a form
 of it (viz. it is a tree). Therefore, (in statements like that
 which is first made) is then (*kila*) expressed that which is
 distinct from non-Śimśapā tree. [770]

¹See SP on *viviktaka*: *kaḥ svārthe. bhāve niṣṭhā*. This means
vivikta is *viveka*.

तत्रावृक्षविविक्तेऽर्थे संकेतो वृक्षसंज्ञया ।
 अशिंशपाविविक्ते च संकेतः शिंशपेति च ॥७७१॥

There, in that case (viz. the statement), convention is (accepted)
 in respect of an object distinguished from a non-tree through
 the utterance of the word tree and further (*ca*¹) (there is)
 convention about what is distinct from a non-Śimśapā tree
 (only (*ca*¹)) in (the expression) Śimśapā. [771]

¹Cf. SP: *ekas cakāraḥ samuccaye dvitīyo 'vadhāraṇe*.

वृक्षोऽयं शिंशपेयं च भवेद्व्यवहृतिस्ततः ।
 शब्दार्थारोपणेनैव सविकल्पधियो जनिः ॥७७२॥

Therefore, your use (lit. dealing of) the words, 'This tree is
 Śimśapā', has achieved merely by putting together the word
 and the sense from which there is the rise of some particular
 knowledge. [772]

शब्दार्थापोहयोर्लिङ्गे ज्ञेया गमकगम्यता ।
 स्वभावकार्ये लिङ्गे स्तः स्वाभाव्यादि च लिङ्ग्यते ॥७७३॥

In respect of the *apohas* 'exclusions' (resulting from) the word and its sense (then) there is to be understood in the reason (of some inference) the relation of what conveys and what is to be conveyed.¹ And, (in respect of the reason) in the form of an object (or, a thing)) and (also) the effect, what is conveyed by them (lit. inferred from them) is the nature of (each of) them. [773]

¹This refers to the *saiketa* 'convention' regarding the word's meaning. On this, SP cites: *yathāha— te yathā vyatirikte 'vyatirikte vā prayoktum isyante tathā niyuktās tam apratiḥandhena prakāśayantīti.*

न तत्र तावद्विज्ञानं तद्ग्राह्येऽस्तीह वस्तुनि ।
स्वभावो वाथवा कार्यं विकल्पोऽयं मतौ यतः ॥७७४॥

This is so, because, in the first instance (*tāvat*), there is not here (in this expression) specific knowledge (which arises) about a thing to be grasped—if (or, when) one held that (there is) in it an option as regards the nature of the thing or its effect. [774]

न वस्तुस्पृग्विकल्पत्वाच्छब्दालम्बनमात्रतः ।
शब्दाः सन्तः कथं तेऽर्था ह्यर्हन्ति भवितुं क्वचित् ॥७७५॥

Words are not (or, lit. do not exist as) words only by referring to things or by (the meanings) dependence on words— how indeed (*hi*)¹ could they deserve to be their meanings? [775]

Read in this context SP: *śabdajñānānupatītyādiyogasūtre 'pi vikalpasya vastusaṃsparśitvaṃ nāstīti prasiddham astīti hi-śabdārthaḥ.*

Verses 776-778 point to the mutual dependence of meanings understood in the theory of exclusion (*apoha*).

स्वभावकार्यतासिद्धिरनुमानसमाश्रयात् ।

ताभ्यां चाप्यनुमासिद्धिरेवमन्योन्यसंश्रयः ॥७७६॥

There is (first) the understanding (or, establishing) of being the nature of a thing and/or the effect of it, by resorting to (the process of) inference and (then (ca)) by/from those two there is (some) inference achieved (or, drawn)—such is the mutual dependence (involved in the process). [776]

अशिंशपानिवृत्तिर्हि न स्वभावो भवेद्यतः ।

अवृक्षापोहरूपस्य तयोरत्यन्तभेदतः ॥७७७॥

Since indeed (*hi*), there would not be the warding away/avoiding (or, exclusion) of what is not a Śimśapā to be the exclusion of the nature of what is not a non-tree for the reason that the two are totally different (from each other). [777]

अप्यधूमनिवृत्तिश्चानग्निव्यावृत्तिरूपिणः ।

न कार्यं स्यात्स्वभावो वा तयोरत्यन्तभेदतः ।

तद्व्यवतेरग्निकार्यत्वान्न सा कार्यं भवेद्यतः ॥७७८॥

Also, avoiding/excluding non-smoke from what is pervasive of non-fire (do not convey) either its effect or its nature, as they are totally different (in nature). And from this (it follows that) the thing, not being an effect of fire, would not be any (i.e. of the nature of an) effect (as well). [778]

This also points to that *svabhāva* etc. is not a *gamaka/linga*.

Verses 779-781 purport to reject the possibility of any *gamyā-gamaka* relation obtaining in the theory of exclusion.

अथान्यापोहवद्वस्तु गम्यं गमकमेव च ।

वक्तव्यं तत्र किं मानमदृष्टौ न त्रिरूपता ॥७७९॥

Now, with reference to the thing, be it to exclusion, what one has to infer and wherewith to infer that, it is to be shown (lit. shown) as to what is the means of knowing (the excluded thing) which is not seen—not (indeed is it its) threefold (character). [779]

Read in this context SP: *apohavadvastuno gamakatve tasmīn kim mānam iti prṣṭe tvayā vācyam mānena gamakasyādrṣṭau tasya pakṣadharmatvaṁ sapakṣe sattvaṁ vipakṣād vyāvṛttir iti trirūpatāsiddhir anumānaṁ hi tri- rūpāl lingato 'rthajñānārtham iti sthiraṁ na hi dharmiṇy apramite dharmapratītiḥ tathā ca—hetos triṣv api rūpeṣu niścayas tena varṇitah / asiddhavi-parī-tārthavyabhicāri-vipakṣataḥ // ity upekṣitam iti bhāvaḥ.*

अशिशपानिवृत्त्यात्मरूपं वस्त्वेव चेन्मतम् ।
अवृक्षापोहरूपं च तयोर्गमकगम्यता ॥७८०॥

If it is held: 'It is only that thing which has a nature in not being a non-Śimśapā (tree) and its having a form of its own that is excluded, viz. a non-tree—then (it may be said) they have (between them) the *gamyā-gamaka* relation. [780]

अशिशपानिवृत्त्यात्मस्वभावाद्गमकं भवेत् ।
अवृक्षात्मनिवृत्त्यात्मगम्यं च स्यात्तदेव तु ॥७८१॥

Being of the nature of a non-Śimśapā (tree), it would be the *gamaka* 'means of inference' and that itself would be what (is to be inferred) in itself being inferred as not a non-tree. [781]

Verses 782-788 state Sureśvara's own opinion in respect of the refutation of the Buddhist's view.

स्वपक्षसिद्धयेऽप्येवं क्लिश्यतोऽपि न सिध्यति ।
पक्षोऽयं बुद्धभक्तस्य यथा तदभिधीयते ॥७८२॥

Now is stated as to how this view of the follower (lit. devotee) of the Buddha does not become established, even if he is thus taking pains to prove his own view (i.e. doctrine). [782]

अशिंशपानिवृत्तिर्वः कुतोऽज्ञायि प्रमाणतः ॥७८३॥

(A question can be put to him:) 'From what authoritative means of knowing, is it known, viz. this exclusion of what is a non-Śimśapā (tree)?' [783]

प्रत्यक्षेण न तावत्सा तस्य सद्वस्तुमानतः ।
लिङ्गान्तरस्य चाभावान्नापि लिङ्गात्प्रसिध्यति ॥७८४॥

'In the first instance, this¹ is not (or, cannot) be known by direct perception, since that is authoritative (in respect of) an existent object (only). And, also because there is no other (indicative) reason, it cannot become known (or proved) by (any) other (process of) inference.' [784]

¹sā refers to *aśimśapānivr̥tti* which is mentioned in the preceding verse.

उपलप्स्यामहे शब्दादेवैनामिति चेन्मतम् ।
अनादिमद्वयवहतेः संबन्धस्य च सिद्धितः ॥७८५॥

If it is held, 'We get to know this¹ from (the) word itself', '(It would mean that) there is established some relation (of that inference) to a dealing which has no beginning (at all).' [785]

¹Cf. note 1 on the preceding verse.

किंमानपर्वकोऽस्यार्थसंबन्ध इति नोच्यते ।
सिध्यत्यैवं भवत्पक्षो दोषोऽपि स्यादनीप्सितः ॥७८६॥

‘Also it is not pointed out (lit. said) as to the means which has preceded that relation (inferred) to the object. But that (thus) establishes in your view the undesired fault (viz. of becoming inconclusive) also.’ [786]

एवं यतोऽभ्युपगतौ लिङ्गं स्याच्छब्द एव तु ।
न स्वभावोऽथवा कार्यं प्रतिज्ञा च मृषा भवेत् ॥७८७॥

‘Since, in thus accepting (the process of inference), the reason (for it) will be only word—not the nature (of the thing) and (not) also its effect (of the thing inferred), so your starting proposition¹ would prove false/meaningless. [787]

¹Namely, *svabhāva* or *kārya* as the reason leads to inference.

त्रिष्वेव त्वविनाभावादिति योक्ता प्रयत्नतः ।
प्रतिज्ञार्थस्य संत्यागो न युक्तः शाक्यभिक्षुभिः ॥७८८॥

‘And (that initial proposition) which was put forth (lit. stated) with (all) effort, viz. owing to the invariable association (etc.) i.e. only in three (factors)—and it is not proper that the Buddhist (lit. Śākya) mendicants should give up their initial proposition.’ [788]

Verses 789-791 state answers to two doubts of the Buddhist.

ननु चांशिशपाद्यर्थविविक्तोऽर्थः प्रतीयते ।
शब्दादेव तु तज्ज्ञानादवृक्षार्थमतिर्भवेत् ॥७८९॥

But, indeed, the thing (or, object) which is distinct from being a non-Śimśapā, is understood only from the word (i.e. the Śimśapā tree); and there would arise the knowledge of that (i.e. which is a tree) (and) the knowledge of that (viz. which is not a tree). [789]

अंशिशपानिवृत्तिर्या कासाविह भवन्मता ।

नाभावोऽसौ यतोऽभावो मतो वोऽनुपलब्धतः ॥७९०॥

(A question can be put:) 'What again is that, in your¹ view, viz. the exclusion of (some) non-Śimśapā?' (It has to be observed:) 'It is not (certainly) a negative entity, since a negative entity is known in your view,² by its non-cognition (lit. not finding/seeing it).' [790]

¹The view of a Buddhist is meant.

²In this context, read SP: *yathāca— ekaḥ pratiśedhaḥetur iti*. Also: *aśimśpāvyāvṛttis tu śābdīṣṭā tathā ca tasyā nānyābhāvatety anyāpohavato 'pi gamakatvādy ayuktam ity arthaḥ*.

शिंशपानुपलब्धिश्चेदन्यव्यावृत्तिरूपतः ।

ततोऽभावात्तथा सिद्धोऽवृक्षाभावोऽपि सर्वदा ॥७९१॥

'If (again) it is (in your view) the non-cognition of the Śimśapā, in some form which is distinct from any other.'—(then it has to be observed) 'in that way, from any negative entity (there would) ever (become known) the absence of (any other) tree as well.' [791]

In verses 792-805 are stated the faults in understanding the absence of objects which are to be known from the absence of knowledge (of some other object(s)).

उपलब्ध्यभावतो नैवं यथा तदभिधीयते ।

कोऽभावानुपलब्ध्योर्वो भेदः स्यादिति कथ्यताम् ॥७९२॥

It is not thus as is stated (by you,¹ viz.) "From the absence of finding/knowing (a thing), (another becomes known)." Let it be told as to what distinction you have (or, you posit) between the absence of a thing and the non-cognition of it.

[792]

¹Cf. verse 767 above—this is pointed out by SP.

ननुपलब्ध्यभावो योऽनुपलब्धिः स उच्यते ।
भावाभावस्त्वभावोऽपि प्रसिद्धं जगति द्वयम् ॥७९३॥

(An argument could be:) 'But, indeed, not finding a thing is itself called (by us) the non-finding or, absence of it; for there is (already) known a pair in the world, viz. the absence of a positive entity and (also) a negative entity'. [793]

सत्यमेवं तथाप्यत्र प्रष्टव्यमवशिष्यते ।
किं चोपलब्ध्यभावेन सा सिद्धा किं ततोऽन्यतः ॥७९४॥

(To this, the answer is:) 'True, that is so; yet there is first to be asked/inquired (this): 'Is it¹ established by cognizing the absence of it or by a thing other than that?' [794]

SP clarifies the second line thus: *sā khalv anupalabdhir asiddhā siddhā vā jñeyābhāvam jñāpayen nādyā indriyātiriktānām jñātakaraṇatvāṅgīkārād anupalabdheḥ sattāmātreṇa gamakatve cātiprasaṅgād dvitīye 'pi sā kim upalabdhibhāvena siddhā kim vopalabdheti praśnārthaḥ.*

¹Namely, *anupalabdhī*.

घटाभावं घटो यद्वद्वटाभावत्वकारणात् ।
मिनोति नात्मनोऽभावमुपलब्धिस्तथैव च ॥७९५॥

As (the existence of) a pitcher fixes/sets up the absence of a pitcher, through the cause of being its absence; (but) it does not fix/set up, in the same way, its presence and also the absence of its own. [795]

SP makes a significant clarifying observation on this verse thus: *na hi svakṣaṇe satō 'pi dīpasya kṣaṇāntare svābhāvagamakateti bhāvah.*

माभावस्याप्यभावेऽस्मिन्संसिद्धेरनुभूतितः ।

सैवातोऽनुपलब्ध्युक्त्या भवद्विरुपवर्ण्यते ॥७९६॥

‘That which (or, since) it is described by you as the non-cognition (of the object) becomes established on the basis of experience even when there is absence (of any object to be known) while there is absence of (any) knowledge.’ [796]

भावाभावोऽपि किं चातः शृण्वतो यद्विष्यति ॥७९७॥

‘The absence of a positive entity also—but what (could result) from that?’ ‘Listen, what will happen (as a result of the same).’ [797]

उपलब्ध्या विनाभावाद्यद्यभावः प्रसिध्यति ।

तदोपलब्ध्यभावोऽसौ यो भावो भवतोच्यते ॥७९८॥

‘If a negative entity becomes established by (or, can be inferred from) some negative entity, while there is no cognition (of an object), then that absence of (any) cognition (of an object) becomes described by you as some positive entity.’ [798]

यदि तद्व्यतिरेकेण तदा वक्तव्यमेव ते ।

किंभूतं ते तदा चित्तमभावप्रसमीक्षणे ॥७९९॥

If (you consider it) to be apart from (or, beside) that, then you have to say what it is; of what nature your mind has become, then, when it is (an occasion) for consideration about the non-existence (of the knowable and the means of knowledge). [799]

उपलब्ध्यभावं मुक्त्वेह नान्यादृक्चित्तमीक्ष्यते ।

किं चोपलब्धितः सर्वसिद्धिमाप्नोति नान्यथा ॥८००॥

Here, i.e. in this case, is not noticeable any thing other than (which is) like that, except the absence of (object that is to be) the cognition, then what other than (mere) cognizing (some

object) would establish the existence of all? (It could) not (be) otherwise. [800]

न तादात्म्यतदुत्पत्ती मिथोऽयोगादपोहयोः ।
न स्वलक्षणयोस्तद्वन्नाप्यपोहवतोस्तयोः ॥८०१॥

There does not obtain (the relation of) *tādātmya* and *tadutpatti* between the two exclusions, owing to their not (having any) connection (between them), and similarly in the case of two also, involving mutual exclusion, (each of the two) have their own, i.e. peculiar characteristics of its own. [801]

नासत्सद्व्यतिरेकेण नासता च सदन्वितम् ।
सति नासदभावोऽपि ह्युक्तं तादात्म्यमागमात् ॥८०२॥

A non-existent object does not exist as apart from some existent (object), nor also is an existent (object) associated with (lit. followed by) a non-existent; for (*hi*) it is said that there is no *tādātmya*, viz. the presence of any non-existent in an existent—(so it is learnt) from tradition. [802]

यथासत्सति संवित्तौ सदप्येवं प्रतीयताम् ।
तदेतदिति च स्पष्टं श्रुतिरैकात्म्यमब्रवीत् ॥८०३॥

Just as a non-existent is a matter of (lit. in) one's knowledge, so is an existent to be understood (or, accepted) (while there is a non-existent)—and the Śruti has clearly declared that there is only oneness of the Ātman (i.e. there is only the single Ātman), in the words *tad etat*¹ [803]

¹Cf. BU 1.4.15; cf. NKL (ms. p.636): *tad etad brahmety upakramyāyam ātmā brahma sarvānubhūtir ity anubhavaikarasa-tvaśruter ity arthaḥ*.

न च भेदमनाश्रित्य स्वभावादि प्रसिध्यति ।
योगस्य भेदनिष्ठत्वान्न च भेदः पुरोक्ततः ॥८०४॥

Again, the nature of a thing etc. cannot become established, unless one has accepted duality (in the world). And since any (i.e. every) conjunction is based on (or, rests on) duality the distinction does not come about by (making) a statement about the same, beforehand! [804]

स्रजि सर्पादिकः क्लृप्तो नाभिन्नो भिन्न एव वा ।
यथोक्तन्यायमार्गेण स्वभावादि ततः कुतः ॥८०५॥

A serpent etc., (which is) imagined (or, is taken to be existing) in a wreath (of flowers), is not one and the same with it, nor is it distinct from it (in existence)—in this way (thus) stated,¹ then, how could there exist (such things as) one's own nature? [805]

¹Read NKL (ms. p.636): *yathā sarpādibhedādirūpeṇa dur-*
canam evam uktanyāyamārgena jagad atyantadurvacanam iti
vat.

verses 806-807 show that there cannot be any scope for (truth
the other theories.

एवमागमतः सिद्ध एकात्म्येऽनुभवाश्रयात् ।
नान्यसिद्धान्तसंसिद्धिर्लभ्यते सर्वतार्किकैः ॥८०६॥

Thus, when the singleness of the Ātman is established by (lit.
from) tradition and as it has a basis in (everybody's) experience;
there cannot, (therefore) be secured (any) success by others
who reason out their doctrines, established by them. [806]

स्वोक्त्यैवापह्नुतेः कृत्स्नवस्तुनोऽतो न यत्यते ।
निराचिकीर्षया शून्यवादिनोऽविषयत्वतः ॥८०७॥

Therefore, because of the rejection (lit. concealment) of all
the (other) objects in their (own) statement(s), there is not

any effort made (by us) with a desire to refute the opinion of those who hold the theory of the void. [807]

Thus far si refuted the Buddhist view on *svabhāva* as a reason for inference.

Now follows in verses 808-832ab the discussion on BU 4.3.8, after the Buddhist's view on *svabhāva* is refuted.

न मृत्यवः स्वभावोऽस्य कार्याणि करणानि च ।
कुतस्तदिति चेदाह स वा इति परा श्रुतिः ॥८०८॥

(It was stated that) the (various) activities and organs, which are deaths,¹ are not the nature of this one. (And) if one were to ask, 'Whence it is so?', (the question is answered in) the subsequent Śruti, beginning with (or, in) the words *sa vā* [808]

This is introductory to BU 4.3.8.

¹Cf. BU 4.3.7; this is actually the forms of death.

स्वप्नो भूत्वा यथात्येति मृत्यो रूपाण्यसङ्गतः ।
आत्मैकस्मिन्नपि तनौ म्रियमाणस्तथैव सः ॥८०९॥

As, after having become the dream,¹ the Ātman transcends² the forms of death just (*api*) in one body,³ owing to its being unattached (to the body, its organs etc.); so does it, in the same way, when it dies (lit. is dying).³ [809]

¹That is, objects of the dream.

²Read SP: *kāryakaranāny abhimānato grhītāny āsaṅgābhāvād ekasminn eva dehe sthite (yathā) atyeti*

³Cf. *atīkrāmati mṛtyo rūpāṇi* in BU 4.3.7. Read SP: *mriyamāṇo vartamānaṁ janma tyajāṇ janmāntaraṁ copādadānaḥ (kārya-karmaṇāny atīkrāmati)*.

शरीरमिति वाक्येन जायमानविशेषणम् ।
क्रियते न स्वतस्तस्य जन्माद्यैः संगतिर्यतः ॥८१०॥

By the sentence *śarīram* ..., there is used a distinguishing attribute of (the word) *jāyamāna*; since there is no connection of that (Ātman) with origination (lit. birth) etc.¹ [810]

This verse explains away the possible understanding of repetition in the statement *śarīram abhisampadyamānaḥ* after the use of the word *jāyamāna*.

¹This appears to refer to the known *bhāvavikāras* associated with whatever was born.

मोहाल्लिङ्गात्मनोत्क्रान्तः श्रुतकर्मानुरूपतः ।
मिथ्याभिमानतो देहं यदात्मैत्यभिमन्यते ॥८११॥
देहं संपद्यमानोऽजस्तदात्मा जायते खवत् ।
घटादिजन्मना तद्वत्तन्नाशे म्रियतेऽमरः ॥८१२॥

The unborn is said to be assuming a body when it identifies itself with the body as 'I am this', owing to its false identification with the body which is caused in accordance with the (performance of) ritual action(s) that were (i.e. prescribed in the scriptures), moving up as it is from the nature of a subtle body, through its ignorance (about its true nature), [811]

but (in reality) the Ātman becomes born in the same way as the sky (is said to be born) through the origination of a pitcher;¹ so also, like that (viz. the pitcher), the immortal one is said to die, when (there is) perishing of that (body). [812]

¹Actually, the sky is never born, but it becomes delimited by a pitcher, palms of a hand etc. and is said to have been born in different shapes. So does the Ātman, delimited by its adjuncts, appear to have been born.

Verses 813-821 explain the meaning of the word *vai*.

संपद्यमान एवात्मा जायते म्रियते यतः ।
न तत्पूर्वं तदूर्ध्वं वा तेन वा अवधारणम् ॥८१३॥

Since the Ātman (thus only apparently) assuming (a body, or bodies) is (said) to have been born and to die, so before that (false happening), or after that, or by that (viz. body assumed) is there (any) delimitation (of it). [813]

This clarifies the purport of *vai* in the relevant Śruti statement.

पाप्मेति देहसंबन्धहेतुमात्रमिहोच्यते ।
आ विरिञ्चात्तथास्थाणोः सर्वं कर्मात् उच्यते ॥८१४॥

(In the use of) the word *pāpman* 'sin' is stated merely the cause of the (Ātman's) association with a body (right up to that of) Viriñca; so also, all the activities are said to be of (i.e. performed by) the eternally abiding (Ātman). [814]

This explains the meaning of *pāpman* which consists in purposeful ritual activity.

ब्रह्मादीनां शरीराणि श्वसूकरशरीरवत् ।
यतो जिहासितान्येव तस्माद्धर्मेऽपि पाप्मणीः ॥८१५॥

Since the bodies of (the god) Brahmadeva and others are, like the bodies of dog(s) and pig(s), sought to be abandoned; the word *pāpman* 'sin' there signifies even *dharma*¹ 'religious duty'. [815]

¹It consists in the performance of ritual activities which aim towards obtaining some results.

दुःखाभावः सदेहस्य नैवास्तीति श्रुतेर्वचः ।
तस्माद्वैवोऽप्यनर्थः स्याद्देहो नाशाच्च सर्वदा ॥८१६॥

(Since) there is a statement of the Śruti, viz. that there can (never) be freedom from (lit. absence of) misery for one, who is possessed of a body;¹ therefore, the body of even a god also has ever the undesired (i.e. misery), owing to its perishing. [816]

कर्म नारभते यावद्दुःखादिफलमात्मनः ।
असत्समं भवेत्तावत्तदपूर्वात्मना स्थितम् ॥८१७॥

So long as ritual activity does not begin to produce for the Ātman misery etc.,¹ it would be as if non-existing (and) only till then remain as *apūrvā*.² [817]

¹The word 'etc.' refers to enjoyment of pleasures, hankerings for and/or impressions of the same.

²This is the well-known conceptual entity of Mīmāṃsā.

शरीरं पाप्मनां कार्यं धर्माधर्मात्मनामिदम् ।
तस्मिन्नात्माभिमानो यः सा संपत्तिरविद्यया ॥८१८॥

This body is the product (lit. effect) of *pāpmans* 'sins' which are of the nature of *dharma* 'religious duty' and *adharma* 'what is not religious duty'. (Therefore) the notion that of identity with it (i.e. *śarīra*) is becoming that (viz. *pāpman*) owing to ignorance (about the real nature of the Ātman). [818]

The verse explains the significance of the suffix *-bhiḥ* of the instrumental as expressive of the nature of *pāpman* to be the cause (*hetu*), or better the agent '*kartr*' of *śarīra-saṅghāta*.

देहकर्मक्षये देहपातश्चास्य यदा तदा ।
पाप्मनः कर्मकार्याणि विजहात्यमृतोऽव्ययः ॥८१९॥

When, after the exhaustion of the (result) of the activity performed through (the help of) the body, there is perishing

(lit. fall) of the body, the immortal and inexhaustible (Ātman) abandons all the performance of (religious) activities (arising) from *pāpman* 'sin'. [819]

This explains *sa utkrāman* ... in BU.

जहाति मृत्यो रूपाणि मृतिस्वप्नादिभूमिषु ।
न तु मृत्युमृते ज्ञानाज्जहात्यात्मा निजं तमः ॥८२०॥

(The Ātman) abandons the forms of death (that occurred) in the (various) states of dying, dream etc.,¹ but not death which occurs in the absence of knowledge; (then, after acquiring that) it abandons its own ignorance (lit. darkness). [820]

¹This indicates the waking state.

पाप्मादिप्रकृतादानत्यागाभ्यामनिशं यथा ।
धिया समानः सत्रात्मा संसरत्या विमोक्षतः ॥८२१॥
परलोकेहलोकौ च तथैवायमविद्यया ।
मृतिजन्मप्रबन्धेन संसरत्या विमोक्षतः ॥८२२॥

As the Ātman transmigrates, being the same as (lit. equal to) the intellect, by continuously performing and/or abandoning whatever *pāpman* 'sin', is taken up (or, begun) till (the moment of acquiring) liberation, [821]

so does this one transmigrate, till (the moment of acquiring) liberation, in this world and that beyond, owing to (its own ignorance, in (or, by) the chain of deaths and births. [822]

This is the purport of the complete sentence *sa vā* There is clarification of both the *dr̥ṣṭānta* 'example' and the *dār̥ṣṭāntika* 'what is supported by the example'.

यत एवमतः सिद्धा देहादिभ्योऽन्यतात्मनः ।
तत्संयोगवियोगाभ्यां स्रग्वस्त्राभरणादिवत् ॥८२३॥

Since this is so, therefore is established the difference of the Ātman from the body and others,¹ on account of (its) conjunction and disjunction from (them), like those of a wreath (of flowers), garments, ornaments etc.² [823]

¹The word *ādi* refers to the different states of waking and dream, the regions, the belongings and so on.

²The word 'etc.' refers to other decorations of a body.

न हि चिह्नत्रेण कर्णेन तद्वानस्मीति मन्यते ।
यथैवमवशिष्टेन तद्विशेषणहेतुतः ॥८२४॥

Indeed, a person, who has his ear cut off (from his body), does not think, 'I have it' (lit. I am possessed of it). Like this, (the Ātman) is (in conjunction with) the remaining (properties of a body),¹ because they are only for specifying (lit. qualifying) it.² [824]

¹This refers to the subtler forms of the body.

²That is, functioning as its adjuncts.

Verse 825 begins the discussion of the superimposed (i.e. imagined) relation of the body to the Ātman—it continues up to verse 830. There follows, in verses 826-828, the discussion on BU 4.3.9.

आभिमानिक एवास्य येन येन विशेष्यते ।
आत्माविशेषणोऽतः स्यात्स्रगाभरणवस्त्रवत् ॥८२५॥

Therefore, all, by whichever (it, i.e. the Ātman) is specified (or, qualified), is (the product) of (its) identity (with it); that is why the Ātman is unspecified, (by a body etc. which are) like a wreath (of flowers), ornaments and garments. [825]

ननु न स्तोऽस्य लोकौ द्वौ यावात्मा संचरत्ययम् ।
मृत्युजन्मप्रबन्धेन जाग्रत्स्वप्नाख्यलोकवत् ॥८२६॥

(An argument of the objector:) 'But, indeed, the two worlds, which the Ātman travels over, do not exist, owing to its continued connection with death (and) birth, like the two worlds of waking and dream states (which do not, in reality, exist)'. [826]

स्वप्नजागरितौ लोकौ यथा प्रत्यक्षमानतः ।
परलोकेहलोकौ तु न तथा मानगोचरौ ॥८२७॥

As the two worlds of waking and dream states (are grasped as external objects) by the means of knowing (called) direct perception, so (are not grasped), however, as external objects of (any) means, the two worlds, this and the one beyond. [827]

This verse is based on the introductory in BUB to BU 4.3.9.

प्रात्यक्ष्यादस्य लोकस्य नास्त्याशङ्कास्तित्तां प्रति ।
परलोकेऽपि नाशङ्का तत्सिद्धेरागमात्सदा ॥८२८॥

As to the existence of this world (of the waking state),¹ there is no doubt (at all), because of its being (the object of) direct perception; so in relation to the world beyond also, there should not be (entertained any) doubt, for it is established by the (Vedic)² tradition (as existing for) ever. [828]

This verse indicates the purpose of the sentence *tasya vā etasya* ... in BU 4.3.9.

प्रत्यक्संवित्प्रमाणत्वं परलोकेहलोकयोः ।
स्वप्नवन्नान्यमानत्वमित्यस्तित्वं विवक्षितम् ॥८२९॥
इत्याशङ्क्योत्तरो ग्रन्थस्तस्य वा इति भण्यते ।
इत्येष तावत्संबन्धस्तथान्योऽप्यभिधीयते ॥८३०॥

The world beyond and this world have the nature (of being

known through) the knowing by the inner self as the means (of knowing) and not of being known, like (the world of) the dream state, by any other means—if (only) the existence (of them) is intended (lit. sought to be stated)— [829]
 having (taken note of) this doubt has the Śruti stated the subsequent portion *tasya va ...* this is the relation (between the earlier and the subsequent portions)—to begin with¹—so also is (i.e. will be) another relation² stated. [830]

¹That is, it is stated in accordance with what is stated in BUB.

²This is to refer to the explanation offered by Bhartṛprapañca.

Verses 831-832 state the relation of the portion (to be under discussion) to the earlier portion.

आत्मा ज्योतिरिति ह्येकः समान इति चापरः ।
 पाप्मनो विजहातीति पदार्थाः सूत्रितास्त्रयः ॥८३१॥

(In this Brāhmaṇa) there are stated (lit. strung together) three things as the subject matter, viz. that one light (of the inner self) is the Ātman; the second is *samāna* and (the third), who gives up the sins.¹ [831]

There is in verses 831 and 832, Bhartṛprapañca's explanation about the relation between BU 4.3.7 and 4.3.8.

¹Note SP, after stating: *yathāhus tānyetāni trīṇi vastūny upanyastānīti*, it adds: *tathodāhṛtatadīyabhāṣyāvadyotī hiśabdah*.

स्वप्नेन निर्णयो वाच्य एतेषामित्यतोऽधुना ।
 तस्येति वर्ण्यतेऽथेदं विधिना येन तच्छृणु ॥८३२॥

Now, there is to be stated a decision (i.e. clear explanation) of these (portions) by (stating the illustration of) the dream (state). Therefore, then (*atha*), hear that by which, the injunction, that is explained in (the sentence) *tasya* [832]

In verses 833-836, there is stated by Sureśvara his own view regarding the relation between the earlier portion and that which follows.

अयं चाप्यभिसंबन्धस्तथा चान्योऽपि वर्ण्यते ।
स्वयंज्योतिर्य आत्मोक्तस्तस्याविद्याक्रियोद्भवाः ॥८३३॥
कर्मोपभोगसिद्ध्यर्थं वर्ण्यन्ते भूमयोऽधुना ।
इदं जन्म परं चैव स्वप्नस्तन्मध्यगस्तथा ॥८३४॥

And this also¹ is the close relation (of the same): In addition to this (*tathā ca*), there is yet another (relation) stated then. In respect of that Ātman, which is described as self-illuminated, there are now described the states (or, regions) which have arisen from its performance of activities, owing to (its) ignorance, in order that they are useful in causing the ritual action and the consequent enjoyment(s)—thus, (they are) this birth and (yet) afterwards also and similarly the dream state and that during the same (state).² [833-834]

¹*api* indicates Sureśvara's approval of Bhartṛprapañca's view.

²The states of the enjoyments are mentioned in the BU sentence *idaṁ ca paraloka*

भावि यज्जन्म यच्चेदं प्रत्यक्षमनुभूयते ।
एते एव विभोः स्थाने द्वे एवेत्यवधारणात् ॥८३५॥

The birth that will be and also this one, which is directly experienced—only these two are the two states (or regions) for/of this pervader of all; this is so specified in the words *dve eva*. [835]

This verse states the meaning of the BU sentence *tasya vā ... paralokasthānaṁ ca*.

ननु स्वप्नोऽपि लोकोऽस्य कथं स्यादवधारणम् ।

द्वे एवेति न संध्यत्वात्स्वप्नस्य स्थानयोर्द्वयोः ॥८३६॥

(A question is asked:) 'But, indeed, how could there be the specification *dve eva* to convey that for this one (viz. the individual/inner self) there is a world of the dream also?' (The answer is:) 'No, (this cannot be questioned,) since the dream state is the intermediate (state) between the two states (lit. abodes of the individual/inner self)'.¹ [836]

¹SP clarifies this thus: *na hi grāmayoḥ saṁdhis tāv apeksya tṛtīyo bhavaty ato 'vadhāraṇasiddhir ity arthaḥ*.

Verses 837-840 assert the notion of the third state, viz. dream.

संध्यं तृतीयमित्युक्तिः पूरणप्रत्ययश्रुतेः ।
न स्थानान्तरनिह्नूत्यै यत्तूक्तमवधारणम् ॥८३७॥
तदयोगव्यवच्छिन्न्यै नान्ययोगव्यपेक्षया ।
तस्मिन्संध्य इतीदं च तथा सति समञ्जसम् ॥८३८॥

The statement *saṁdhyam tṛtīyam* is for the hearing of (*śruti*, i.e. conveying) what completes the enumeration¹ (and) not for the averting (or, denial) of (the notion of) any other state (or, region). As for the specification, which is stated, it is for setting aside the (notion of) the absence of any non-connection (of the two, earlier stated) and not out of (any) consideration of (any) connection with (some) other state (or, region); and, in that case (or, that being so), the phrase *tasmin saṁdhye* would be consistent (or, having propriety). [837-838]

¹*pūraṇapratyaśruteḥ* is paraphrased in SP as *pūraṇapratyaśraṇāt*.

स्वप्नेहलोकयोस्तावत्सत्त्वं प्रत्यक्षगोचरम् ।
परलोकस्य सद्भावे किं प्रमाणमितीर्यताम् ॥८३९॥

(The answer is:) 'As for the existence of the two worlds (in the states), viz. that of the dream and this world, it is the object of direct perception. (But) in respect of the existence of the world yonder, what is the means (of knowing it)? Let this be told'. [839]

This verse is to introduce a doubt which evokes the reply in the immediately following sentence *tasmin saṁdhye sthāne*

अस्मिन्नेव तु स स्वप्ने स्थाने तिष्ठन्प्रपश्यति ।
एमं लोकं परं चात्मा कर्मज्ञानादिसंस्कृतः ॥८४०॥

Abiding (lit. standing, i.e. staying) in this very dream state, it, i.e. the Ātman, sees this world and that yonder, being (or, remaining) affected (lit. modified) by (the earlier performed) ritual activity, (worldly) knowledge etc.¹ [840]

¹The word 'etc.' stands for *vāsanās* 'impressions' of the two worlds, or of earlier life/lives. (Perhaps, this latter is explained in the next three verses.)

Verses 841-844 affirm the possible memory (in childhood) of the world of earlier life

भूतजन्मनि यद्वक्तं कर्म तद्भावंनाञ्जितः ।
पौर्वदैहिकमेवातो वयस्याद्येऽभिवीक्षते ॥८४१॥

(In the case of this person it so happens that) because he is tinged by the notions (or impressions) of that activity which was performed in the past life, in the first phase of his life; he sees in his dream state what was related to his earlier (or former) body. [841]

मध्ये वयसि कार्कश्यात्कारणानामिहार्जिताः ।
प्रायेण वीक्षते स्वप्ने वासनाः कर्मणो वशात् ॥८४२॥

(And) in the middle of his life, he sees in his dream state mostly¹ the impressions (of the objects of that time etc.) which he has gathered here (i.e. in this very life), on account of the grossness in his experiences² and (also) under the influence of his (worldly) activities. [842]

¹SP states: *ihāsamabhāvitam api svapne kadācid adṛṣṭavaśāt paśyati prāyeṇety uktam.*

²Read the paraphrase in SP: *kārkaśyam sthūlārthagrahaṇa-āmarthyam.*

यियासुः परलोकं तु कर्माविद्यादिसंवृतः ।
भाविनो जन्मनो रूपं स्वप्ने प्रायेण पश्यति ॥८४३॥

And (*tu*) when he is (now) about to depart for the yonder world, being covered with (the impressions of his) activities, ignorance etc.,¹ very (or, more) probably² he sees (his own) form in the forthcoming life (lit. birth). [843]

¹This refers to his hankering for the pleasure and the status, which he would hopefully get in the next life.

²According to SP, *prāyeṇa* indicates the objects of his sight, which do not, as a rule, present themselves before him. Yet, we think, the word conveys that sense which we have chosen under the preceding verse.

भुक्ततत्वादविवक्षेह व्यतिक्रान्तस्य जन्मनः ।
परलोकेहलोकौ तु गृह्येते संध्यसिद्धये ॥८४४॥

Here,¹ there is no intention (lit. desire) to say, in relation to this state, about what has been there in the past life, because that has been (already) experienced (by him). But, here are understood (lit. taken up) the yonder world and this world, in order that there be established the intermediate state. [844]

¹This refers to the dream state, as the intermediate state.

Verses 845-850 explain the statement *atha yathākramam*

सुखेन दर्शनं तावदैहिकस्येह जन्मनः ।

यथा तु परलोकस्य तथाथेत्यभिधीयते ॥८४५॥

As for the sight of this life here, it (occurs only) easily; and (*tu*) now is said as to how it also (would occur easily likewise) in the words *yathā tu paralokasya tathā*. [845]

This refers to the purpose of the Śruti statement *atha yathākramam*

स्वप्नस्थानं समाश्रित्य परलोकं प्रपश्यति ।

विधिना केन किं चात्मा समाश्रित्य प्रपश्यति ॥८४६॥

अथैतदुच्यते स्पष्टं तद्यथावत्प्रतीयताम् ।

येनाक्रामत्यमुं लोकं सोऽस्याक्रम इहोच्यते ॥८४७॥

In what manner this individual resorts to (i.e. abides in) the dream state and then well (*pra*) sees the yonder world and also what it is that the Ātman (later) resorts to (or, takes support of), is clearly stated in the sentence (beginning with the word) *atha*. Let this be understood properly. That is called here this individual's *ākrama* 'approach' by which he approaches that world. [846-847]

यादृक्साधनमस्येह परलोकाप्तये चितम् ।

आक्रमः स यथा यस्य सोऽयमात्मा यथाक्रमः ॥८४८॥

That is the (adopted) way of this (individual), i.e. the kind of means (which is) acquired (by him) for attaining to the yonder world. (As such) this Ātman is (described as) *yathākrama*, i.e. the one who has that as his (adopted) way.

[848]

यथाक्रमो यथोपायो विद्याकर्मादिलक्षणः ।

परलोकोन्मुखीभूतं तमाश्रित्याक्रमं स्वकम् ॥८४९॥

स्थानं निर्माय संध्याख्यं विपाकानुभयानयम् ।

अधर्मधर्मयोरात्मा दुःखानन्दान्प्रपश्यति ॥८५०॥

(The word) *yathākrama* (means) *yathopāya* 'having the means as (are) adopted by him'—thus *yathākrama*, he, who is characterized by (his) knowledge, activity etc.,¹ resorts to his adopted way which has turned upwards for (attaining to) the yonder world and then, [849]
having created that abode (or, resort) which is called *sandhyā* 'the intermediate one', this Ātman sees both sorts of results from the performance of non-duty and duty, viz. miseries and joys (or, happiness). [850]

This explains the meaning of *tam ākramam ... paśyati* in BU.
¹See note 1 on verse 843 above.

verses 851-854 refer to the result stated in *pāpmanah paśyati*.

पाप्मनोऽधर्मकार्याणि तथानन्दांश्च धर्मजान् ।

आगमादन्यतः साक्षात् तु पापादिदर्शनम् ॥८५१॥

(That means: he sees) the sins, viz. the effects of (the performances of non-religious) actions and, so also (*tathā*) joys (which are) the products (of the performances) of religious duty. (And) the sight of the sins (is so understood) on the authority of scripture, but it cannot be perceived directly. [851]

The first line is in explanation of what is said in the preceding verse.

धर्माधर्मप्रयुक्तो वा देवतानुग्रहात्तथा ।

आनन्दान्पाप्मनश्चित्रान्स्वप्न आत्मा प्रपश्यति ॥८५२॥

Or (perhaps,) being urged (or propelled) by *dharma* and

adharma as also on account of the favour(s) of the deity/deities, the Ātman sees in the dream state varied joys and (results of) sins. [852]

इह जन्मन्यसंभाव्यं स्वप्ने यस्मात्प्रपश्यति ।
परलोकाश्रयं तादृक्तस्मात्स्वप्नसमीक्षणम् ॥८५३॥

Since it sees in the dream state what is impossible to occur in this (actual) life, therefore, (there is) sight of the dream-(-objects) of that sort, which is supported (or, occurring) in the yonder world. [853]

संध्यस्वप्नविधिस्तावदेवं समुपवर्णितः ।
परलोकप्रसिद्धयर्थं तस्य वा इति वाक्यतः ॥८५४॥

Thus is described in the sentence *tasya vā* ..., in the first instance (*tāvat*) the manner of (the sight of the objects in) the dream state, intermeditae state, in order that (the nature of the objects in) the yonder world becomes clear (lit. established). [854]

Verses 855-856 explain sa yatra svapiti

यदुक्तं विरहेऽशेषसूर्यादिज्योतिषामयम् ।
पुमान्व्यवहरत्यात्मज्योतिषैवेति लिङ्गतः ॥८५५॥

As to what is said (earlier), viz. this individual (lit. man) does (all his) activities, even in the absence of all the lights such as the sun,¹ (it was so said) for the reason that he does so only with the light of the Ātman. [855]

¹This refers to BU 4.3.6. *ādi* means the moon, fire, and others mentioned in BU 4.3.1-6.

भान्वादिसर्वज्योतिभ्यो विविक्तोऽयं पुमानिति ।
क्व सिद्ध इति वक्तव्यं यथोक्तार्थप्रसिद्धये ॥८५६॥

Now is to be stated as to where is established that this individual (lit. man), who is quite distinct from all the lights such as the sun, in order that what is thus said (above) becomes established. [856]

This serves as an introductory to the discussion of the BU sentence *sa yatra*

verses 857-862 affirm that the *Kaṇḍikā* purports to explain *svayaṃ jyotiḥ*.

स्वयंज्योतिःप्रसिद्धिर्वा पूर्वमक्तानुमानतः ।
साक्षादव्यवधानेन तत्प्रसिद्धिरर्थोच्यते ॥८५७॥

Or rather, the proof (or, establishment) of the self-shining character of the Ātman was stated earlier in the form of an inference. Now is stated the proof of it by the direct experience of it without any obscuring force (or, any hindrance). [857]

स स्वयंज्योतिरात्मैव बाह्यज्योतिर्विवर्जितः ।
यथा भवति साक्षाच्च तथेदमभिधीयते ॥८५८॥

Now it is to be said as to how the Ātman, apart from (i.e. without having the help of) any external light, becomes self-shining in a directly perceptible manner. [858]

This is made clear by citing the example of the dream state experience. SP invites attention to the following statement (possibly of Bhartṛprapañca): *svayaṃjyotir ity upanyastam ātmā-jyotir ity anenābhidhānāntareṇa tannirṇayārtham svapnadr̥ṣṭānta-ādiyate*.

यत्र यस्यामवस्थायां स्वपितीत्यभिधीयते ।
पुरुषोऽजं स्वमात्मानं तदापीतो भवत्ययम् ॥८५९॥

yatra ... means: (that state or condition) wherein, it is said, (the man) sleeps, i.e. this one merges into itself, the unborn.

[859]

This is the meaning of the BU sentence *sa yatra praspapiti*.

जाग्रत्कर्मक्षयादात्मा बाह्यदेहाभिमानतः ।

व्युत्थाय स्वप्रधानः सन्स्वप्नमायां समीक्षते ॥८६०॥

On the cessation (lit. loss) of (all) external activity, the Ātman, having risen above (its own) identity with the external body, becomes prominent itself (or, independent, i.e. fully free) and sees the wondrous world of the dream state.

[860]

प्रवृत्तं फलदानाय यदिदं जन्म वर्तते ।

अस्येति लोकशब्देन तदेतदभिधीयते ॥८६१॥

Since this birth (of the Ātman) has been active towards bringing about (i.e. producing some) result(s), therefore, it is mentioned (or, referred to) by the word *asya* 'of this one', that signifies the world.

[861]

This explains the meaning of *lokasya* in the BU phrase *asya lokasya*.

जुहोत्यादिक्रियाद्वारा यस्मात्सर्वमवत्ययम् ।

सर्वावानिति तेनायमात्मा देहान्त उच्यते ॥८६२॥

Since this one favours¹ or protects all (viz. the superintending deities of the organs) by such (ritual) activities as (are signified by such verbs) as *juhoti* 'the (individual) makes an offering', therefore is this Ātman (which is) inside the body² is described as *sarvāvat*.³

[862]

This verse, which follows BUB, presents an example of the Brāhmanical explanation of the word *sarvāvat*. It is, nevertheless,

possible that the adjective form *sarvavat* can be derived as *sarva* with the *-matup* suffix (i.e. *vat*) attached to *sarva* and, in the Vedic text, it would cause lengthening of *a* in *sarva*; the meaning would be: 'of (this) all-inclusive (world)'. It is this explanation which is correct as shown by the next verse and also as it is in keeping with the Vedic style. Yet, Sureśvara takes *sarvāvat* to have been formed from *sarva* and *avat* and thus relegates to the background the said linguistic peculiarity in the Upaniṣadic word. This leads him to offer yet another (and correct) explanation of the word in the next verse.

SP refers this to BU 2.5.14-15.

¹This is the Vedic meaning of the verb root *av*. The other meaning 'to protect' also cannot be ruled out.

²*dehānta* is explained by SP as *buddhyādir dehāntaḥ kartā saṁbhātaḥ puruṣo yāgādidvārā*

³*sarvāvān* is explained by SP thus: *sarvaṁ devādi yato rakṣati tenāyaṁ lokyamānaḥ sarvāvān ity ucyata ity arthaḥ*. Yet, see the verse 864.

Verses 863-873 justify how *svakarman* is *sarvarakṣaka*.

कृत्स्नं जगदुपादाय क्रियैकैकस्य सिध्यति ।
जुहोत्यादिर्जगद्धेतुः सर्वावानुच्यते ततः ॥८६३॥

Since each (of the *saṁghāta*'s) activity can be accomplished after taking up the entire world (of objects etc. around); therefore the cause of the world consisting in making an offering etc.,¹ is called *sarvāvat* 'being possessed of all (material for sacrifice)'. [863]

This verse is based on the statements in the Madhu Brāhmaṇa conveying the sense: *sarvaṁ sarvasya kāryam syāt* (NKL); cf. SUBV 2.4.135-147; but verses 135 and 145 in particular.

¹The word 'etc.' refers to various such other activities of the sacrificer as *śamsati* in connection with the sacrifice.

अध्यात्मादिविभागेन सर्वा वास्यात्मनो यतः ।
भूतभौतिकमात्राः स्युः सर्वावानुच्यते ततः ॥८६४॥

Or, it is described as *sarvāvat* 'all-inclusive', since all the elements and their portions,¹ existing in the form of divisions, viz. *adhyātma* etc.² have originated from this (very) Ātman. [864]

This is an alternative explanation of *sarvāvat*, offered by Sureśvara. Cf. our note on the preceding verse.

¹Or, products/modifications.

²The word 'etc.' refers to *ādhibhautika* and *ādhidaivikā mātras*.

सर्वावतोऽस्य देहस्य स्वप्नभोगप्रसिद्धये ।
आदाय वासनामात्रां स्वप्नमायां तनोत्ययम् ॥८६५॥

This one produces (lit. stretches itself out into) the wondrous world of the dream state by taking up (or lit. deriving) from this body of the all-inclusive (form of its own) the portions of impressions, in order to secure the enjoyment of (the objects in) dream. [865]

अध्यात्मादिविभागेन मात्रा जागरिते यथा ।
भोगेनेहापचीयन्ते प्रचीयन्ते च कर्माभिः ॥८६६॥

As the portions (of *vāsanās*), existing in the divisions such as *adhyātma* etc., reduce (in quantity) through the enjoyment (of them), so do they grow also by (various) activities. [866]

This verse seeks to answer away a doubt that the *vāsanā-mātrā-kṣaya* might lead to liberation.

स्वप्नभूमावपि तथा कर्मणोत्थापिता इमाः ।
क्षयवृद्धिप्रबन्धेन मात्राः स्युर्वासनात्मिकाः ॥८६७॥

These portions (of *vāsanās*), which have increased even in

the dream state due to the (force of) activity in a continuous chain of loss and gain, are for the nature of impressions. [867]

धिया धियेति च तथा प्रागेतदुपपादितम् ।
हासवृद्धिप्रबन्धेन यथेदं वर्तते जगत् ॥८६८॥

So, that is already reasoned out earlier, in the words *dhiyā dhiyā*, in order to explain as to how this world goes on in a chain of decrease and increase. [868]

This is referring to BU 1.5.2, i.e. a passage in the Saptāṇṇa Brāhmaṇa.

स्वयमेव विहत्येति देवताप्रतिषेधकृत् ।
विशेषणं स्वयमिति देहपातेऽस्य भण्यते ॥८६९॥

The phrase *svayam eva*¹ *vihatya* rejects (or, effects in the rejection of) other deities; for, the specification of this one whose body has fallen (i.e. perished) is made by the word *svayam*. [869]

¹The word *eva* gives emphasis on the word *svayam*.

स्वात्मापसर्पणाद्देहं निःसंबोधं करोति यः ।
सुषुप्सुः कर्मणां ध्वस्तौ विहत्येत्युच्यते ततः ॥८७०॥

The one, who wishes to sleep and, therefore, renders its own body devoid of all consciousness by moving out of (lit. away from) it when activities have ceased (lit. have been destroyed), is referred to (in the use of the gerund) *vihatya* (as the agent of the activity mentioned thereby). [870]

भान्वाद्यनुग्रहाद्बोध आत्मनश्चक्षुरादिषु ।
देहस्य व्यवहारार्थं देहव्यवहृतिस्तथा ॥८७१॥
आत्मकर्मप्रयुक्तैव धर्मादिफलभुक्तये ।
कर्मणः फलभोगान्ते देहो यस्मात्पतत्ययम् ॥८७२॥

In the case of (the organs, viz.) the eye etc.,¹ cognition comes to them from (i.e. on account of) the Ātman, through the favour(s) of (deities such as) the sun² and which is for (facilitating) the activity (or, activities) of the body;³ and thus there is activity (or, are activities) of the body, caused only by the Ātman, for the experience (lit. enjoyment) of the results of *dharma* etc. (This is so), because this body perishes (lit. falls) at the end (i.e. after the exhaustion) of the experience of the results(s) of activity (or, activities). [871-872]

¹The word 'etc.' stands for the ear, the nose, the tongue and so on.

²This implies the deities superintending over the organs of the body. The verse does not state if the Ātman favours them; though that is intended; cf. verse 874 below.

³This refers to the waking state.

निर्मायेति स्वयं तद्वदात्मकर्मव्यपेक्षया ।

स्वप्नप्रपञ्चनिष्पत्तिर्यस्मात्तस्माद्विशेषणम् ॥८७३॥

In the same way, owing to the dependence on the activity of the Ātman, there arises (or, occurs) the world of activities in the dream state and, therefore, there is the specification (of the Ātman's activity in the words) *svayaṃ nirmāya*. [873]

Verses 874-876 explain the meaning of the word *vāsanāmaya* in the *Bhāṣya*.

अपास्ताशेषकरणदैवतस्यापि चात्मनः ।

क्रियाकारकसिद्धयर्थं भावनैवास्य कारणम् ॥८७४॥

And, also in the case of the Ātman, that has set aside all of the organs and their deities, it is only the impression which becomes the cause of its accomplishing various activities

through the agents and others related to them.

[874]

निर्मातव्योऽथ भोक्तव्यो यो लोकोऽभिहात्मनः ।
तेन तेन स्वरूपेण भावना व्यवतिष्ठते ॥८७५॥

Similarly (*tathā*),¹ whatever was the world² that was for the Ātman what was to be produced, and what, enjoyed, in the form of every one of them, remain there as the impression (to continue).

[875]

¹This is pointed out by SP: *athaśabdas tathāśabdaparyāyaḥ*.

²Add: Be it *ihaloka* or *paraloka*.

अपेतकारकत्वोऽपि कर्मोत्थापितभावनः ।
भावनाकारकेक्षित्वादात्मैकः कारकायते ॥८७६॥

The Ātman, though it had given up (or, set aside all) capacity of being an agent, had the impressions of activities aroused in itself and, therefore, being the witness of (those) impressions and means (or, aids) of activities, becomes an agent (connected with activities).

[876]

Verses 877-882 explain the distinct meanings of *svena*, *bhās* and *jyotiṣā*.

जाग्रतो यदुपात्तं प्राग्भावनालक्षणं स्वयम् ।
भास्वद्धीसंश्रयं ज्ञानं भाःशब्देन तदुच्यते ॥८७७॥

Whatever of the nature of impressions of earlier (state(s)) acquired by it from the waking state is but its knowledge, abiding in (or, dependent on) the intellect, and that is mentioned by the word *bhās* 'lustre'.

[877]

बुद्ध्यादिकरणोत्थाया व्यावृत्त्यर्थं विशेषणम् ।
स्वेनेति भासः प्रत्यक्चिदभिव्यक्तकृतोऽभिदा ॥८७८॥

(The word) *svena* is an adjective (or, specification) of (the word) *bhās* and of *jyotis* (used) for excluding (the idea of its having) arisen from the means of activity, viz. the intellect etc.,¹ and (it is) a conveyor of (that *bhās* also which) causes the manifestation of sentience within (i.e. the inner self). [878]

¹It conveys the activity in the dreams state also.

स्वशब्दाविह विज्ञेयावात्मीयात्मार्थवाचिनौ ।
भाज्योतिरनुरोधेन सामर्थ्यादेव कारणात् ॥८७९॥

The two (i.e. twice used) words *sva* (used) here (in the BU sentence) are to be understood as expressing the sense 'belonging to oneself', so as to be in consonance with the bright light, for the only reason of (or, in other words, so as to be having) suitableness. [879]

This is to explain the purposeful repetition of the adjective *sva* going with *bhās* (= *kuṭasthajyotis*) and *jyotis* 'the light within (and individual being)'—this latter is beset with limitation.

परार्था भावना यस्मात्स्वार्थं ज्योतिश्चिदात्मनः ।
उक्तार्थवाचिनौ तस्मात्स्वशब्दौ समुदाहृतौ ॥८८०॥

(This is so) because the impression is related to another object whereas the light of oneself is the light of the sentient Ātman itself. As such, these two (i.e. twice used) words *sva* are explained (here) as expressive of two said senses. [880]

This explains the suitableness already referred to in the preceding verse.

स्वयंज्योतिरिति प्रोक्तो निष्क्रियोऽकारकोऽफलः ।
यः स एव स्वयंज्योतिर्ज्योतिःशब्देन भण्यते ॥८८१॥

The one, who is described (lit. stated) as devoid of (any)

activity, and not an agent (of it), and also not having any result (of the same), the self-shining, is expressed here in (the word) *svayanjyotis* as *jyotis* 'light'. [881]

This is the meaning of the word *jyotis*.

निःशेषलोकधीवृत्तिसाक्षिणैवाविकारिणः ।
प्रतीच ईदृशी वृत्तिः स्वपितीत्यभिधीयते ॥८८२॥

What is expressed by the word *svapiti* is the kind of activity only of the inner self, the witness of the entire activity of people's intellect, (the one) who is immutable (or lit. does not undergo any modification). [882]

This states the meaning of *prasvapiti*.

In the first line there appears to be a case of double Saṁdhi thus: *-sākṣiṇaḥ eva ...* (= *-sākṣiṇa eva ...*, and then) = *-sākṣiṇaiva ...*

Verses 883-888 amplify the meaning of the word *prasvapiti*.

पीताध्यात्मादिकज्योतिर्जाग्रच्छब्दादिवर्जितः ।
वासनोपाधिरात्मैकः स्वयंज्योतिरितीर्यते ॥८८३॥

It is only the Ātman that is described as self-shining; the one which has pervaded (lit. drunk, or swallowed up) the lights such as the one belonging to a body,¹ beyond the expressions (lit. words) such as *jāgrat*² and also having the impressions as its delimiting adjuncts. [883]

¹This refers to the various organs in the body and also the deities superintending over them, viz. Āditya and others.

²These are *susupta* and *svapnāvastha*.

मातृमानप्रमेयादिसामग्री वासनात्मिका ।
स्वप्ने भाःशब्दवाच्यास्य स्वयंज्योतिष आत्मनः ॥८८४॥

For this self-shining Ātman, there is, in the dream state, the assemblage of the means of activity, viz. the knower, the means of knowing and to the object to be known,¹ which is (really) of the nature of impressions²—(and it is) to be expressed by the word *bhās*. [884]

¹*ādi* should refer to *kriyā* 'action', *deśa*, *kāla* and so on.

²This refers to the character of *vāsanās* as *upādhis* 'the delimiting adjuncts'.

प्रमातृत्वादिका सर्वा प्रथते विषयात्मना ।
भावना स्वार्थरूपस्य प्रतीचोऽलुप्तचक्षुषः ॥८८५॥

The (whole of the) impression (*bhāvanā*)— such as being the knower etc.¹ of (the Ātman), which has the form of its own object(s), viz. the inner self, the one who has not lost its power of seeing,² and appears (lit. extends itself) in the form of the objects (of its knowing). [885]

¹This is, in reality, the object of seeing by the inner sentience.

²*aluptacakṣus* justifies the word *svārtharūpa*.

मातारं मेयसंबद्धं जाग्रद्वृत्तौ यथेक्षते ।
निष्क्रियो वासनाराशिं स्वप्नभूमौ तथेक्षते ॥८८६॥

As the one, who is (really) without any activity, sees in the waking state the knower as related to the object of its knowing, so does it see, in the dream state, an assemblage of impressions. [886]

स्वयंज्योतिरयं प्रत्यङ्सर्वसाधननिस्पृहः ।
कूटस्थो वासनाः स्वप्ने चिदाभासाः करोत्ययम् ॥८८७॥

This inner self is self-shining, cherishing desire for none (or, lit. all) of the means and immutable. In the dream state, this

one makes the impressions as having the semblance of sentience. [887]

तत्संनिधौ चिदाभत्वं कार्यकारणवस्तुनः ।
यत्तदस्यात्मनो मोहाद्द्रष्टृत्वमुपचर्यते ॥८८८॥

(And) the semblance of sentience in the case of the things as cause(s) and effect(s), in the proximity of sentience, is but metaphorically attributed nature of the seer in the case of (or, as belonging to) this Ātman, which is caused by its ignorance (about its own true nature). [888]

Verses 889-892 affirm the seer Ātman to be (so-called) through delusion.

ज्योतिषाकारकेणात्मा वर्ततेऽसंस्पृशन्परम् ।
चिदाभा वासनाश्चैवं संगतिर्न तयोर्मिथः ॥८८९॥

The Ātman exists as (or, appears to be) without touching the other (object-world) by means of its (own) lustre, which is not (in any way) related to any activity, whereas (or, and) the impressions have the semblance of sentience; but there is not any connection between (or, contact of) the two. [889]

This justifies *mohād draṣṭṛtvam* in the preceding verse.

यथा जात्यमणेः शुद्धा ज्वलन्ती निश्चला शिखा ।
संनिध्यसंनिधानेषु घटादीनामविक्रिया ॥८९०॥
निःशेषबुद्धिसाक्ष्येवं परमात्मप्रदीपकः ।
संनिध्यसंनिधानेषु धीवृत्तीनामविक्रियः ॥८९१॥

As in a pure gem, there is noticed a natural brightly-burning and unmoved (lit. steady) flame, (and which) does not undergo any modification even while the pitchers etc. are in the proximity of and/or at a distance from it, [890]
so is this highest Ātman, which illuminates (all other things),

viz. the one, who is the witness of all of the intellects remains unmodified, even while it is in proximity of and/or at a distance from all the functions (or, modifications) of the intellects. [891]

न प्रकाशक्रिया काचिदस्य स्वात्मनि विद्यते ।
उपचारात्क्रिया सास्य यः प्रकाशस्य संनिधिः ॥८९२॥

(In fact) there is not any activity of illuminating in the nature itself of the Ātman, but that activity is (metaphorically attributed to it) and is really owing to (or, dependent on) the proximity of what is to be illuminated. [892]

This verse sets aside two notions: the light of the Ātman is (i) for illuminating itself and (ii) illuminating other objects.

Verse 893 explains the instrumental forms svena bhāsā as itthambhūtalakṣaṇe.

यदेवं वर्तनं श्रुत्या स्वपितीति तदुच्यते ।
इत्थंभूते तृतीयातः स्वेन भासेति गृह्यते ॥८९३॥

What is said to be such existence (lit. doing) of the Ātman, is described by the Śruti (in the word) *svapiti*. And, therefore, in the words *svena bhāsā* is understood (lit. accepted the use of) the instrumental case for conveying (the sense of) a mark or attribute (of the particular state).¹ [893]

¹Cf. Pāṇini 2.3.21: *itthambhūtalakṣaṇe*.

Verses 894-896 state that the intention of the above is to convey the non-agency of the Ātman (in any activity).

सामग्र्यभावान्नैवेह कर्तृत्वादि विवक्ष्यते ।
आत्मनोऽकारकत्वं च प्राधान्येन विवक्षितम् ॥८९४॥

Here,¹ agentship etc. is not at all intended (in any activity)

on account of the absence of the assemblage² of the means etc. and indeed it is intended (to bring out) mainly the non-agentship of the Ātman. [894]

The purpose of the verse is: The instrumental case in *svena* *tiṣā* is not a conveyor of either the agent or any means for as in *rāmeṇa śareṇa (hataḥ vālī)*.

¹This refers to the dream state.

²Cf. verse 884 above.

भान्वादिबाह्यज्योतिर्भिः संकीर्णः प्रागभूदयम् ।
अन्यस्य ज्योतिषोऽभावात्स्वयंज्योतिः पुमानयम् ॥८९५॥

Earlier, this (lustrous Ātman) was commingled with the external lights, viz. the sun and others; (but, now, in the dream state) this one is self-shining, because there does not exist any (such) light. [895]

नान्यत्र कारणाद्वृत्तिः कार्याणां जागरेऽपि हि ।
कारणं च तमस्व्यात्मा नातः स्वप्ने मनस्स्थितिः ॥८९६॥

Indeed, even in the waking state, the effects do not exist elsewhere than in their cause. But in the dream state the cause is the Ātman, which is possessed of the darkness (i.e. overpowered/covered by ignorance); therefore, there is no presence (or, working) of *manas*. [896]

verses 897-902 state the *prima facie* view in respect of the Ātman *akāraka* and also its refutation.

ननु जाग्रच्छरीरादेर्मात्रोपादानमीरितम् ।
तस्मिन्सति स्वयंज्योतिः कथमात्माभिधीयते ॥८९७॥

An objection:) 'Indeed, it was pointed out that, in the waking state, there is acceptance of the organs of the body (by the Ātman); therefore, (it may be asked:) while that (body)

continues to exist, how can this Ātman be described as self-shining?' [897]

This objection pertains to the BU sentence *atrāyam ... svayanjyotir bhavati*.

सत्यमेवं तथापीदं मात्रादानं परात्मनः ।
सर्वदा विषयीभूतं गन्धर्वनगरादिवत् ॥८९८॥

True it is that this is so said. Yet, the acceptance of the organs by the highest Ātman has always been an object (of reference) like the city of Gandharvas.¹ [898]

¹That is, it does not all exist; or it is purely imaginary.

एतस्मिन्ननृतोपाधौ शक्यो दर्शयितुं परः ।
वासनालक्षणे साक्षात्स्वयंज्योतिःस्वभावकः ॥८९९॥

(Therefore,) while there is this (really) delimiting adjunct (of the Ātman), it is possible to state (lit. show) that the highest (Ātman) which is of self-shining nature is directly perceived, (even) while the characteristic of having (some) impression (is obvious). [899]

सर्वोपाधिविनिर्मुक्तौ नैव शक्यः स ईक्षितुम् ।
सुषुप्त इव तेनासन्मात्रादानमिदं कृतम् ॥९००॥

(To say the truth,) it is not possible to perceive it (i.e. the Ātman) directly, when there has occurred its freedom from all delimiting adjuncts; therefore, this acceptance of the non-existing means of activity (by the Ātman) is like what occurs in the sleep state. [900]

ननु जाग्रद्वदीक्ष्यन्ते ग्रहीतृग्रहणादयः ।
स्वयंज्योतिः कथं तेषु सत्सु स्वप्नेऽभिधीयते ॥९०१॥

(An objection:) 'But, indeed, there are noticed (in the dream state) the one who grasps (lit. takes up) the act of grasping (lit. taking up (various objects)) etc., how then is the Ātman called self-shining, while those are (observed/known as) existing?' [901]

नैतदेवं कुतो जाग्रद्वैलक्षण्यात्मकत्वतः ।
स्वप्नस्य देहबुद्ध्यादेः स्वप्नवृत्तावसंभवात् ॥९०२॥

(The answer:) 'This is not so'. (Once again, a question:) 'Why is this so said?' (The answer:) 'Since the dream state is of an altogether different nature, (when compared to what occurs,) in the waking state. (The activities performed by the body, the intellect etc. are impossible in the dream state.' [902]

verse 903 explains *jāgarite hi* in BUB.

आत्मबुद्धिमनश्चक्षुरालोकार्थादिलक्षणम् ।
जाग्रदेव न तु स्वप्नो भावनामात्रशेषतः ॥९०३॥

It is only the waking state which is characterized by (various) objects, viz. the Ātman (i.e. the inner self), *manas*, light, the eye etc.;¹ but the dream state is not so, for there remain only impressions. [903]

This is clarification of the sentence *jāgarite hi* ... in BUB serving as introductory to BU 4.3.10.

¹This word 'etc.' refers to further distinctions/kinds of the means and their objects (SP).

Now in verses 904-928, there is a discussion on BU 4.3.10 and relevant BUB is introduced.

आविश्चकीर्षुः साक्षादिममर्थं च श्रुतिः परा ।
न तत्रेति प्रवृत्तैषा प्रत्यगात्मविशुद्धये ॥९०४॥

(Now,) for clarifying (lit. revealing) this thought (or, matter) in a forthright manner, there proceeds the following Śruti *na tatra* ... with a view to exposing the thing called the inner sentence. [904]

कर्मकृद्विषणान्तो यः कामाविद्यासमन्वितः ।
स्वापबोधाविमौ तस्य न तु तत्साक्षिणो दृशेः ॥९०५॥

These two, viz. the dream and the waking states, belong to (lit. are of) that one, who is an agent of activity (or, activities) abiding within the intellect and is beset with desire and ignorance, but, not the witness of them (viz. the two), the seer. [905]

This verse sets aside the two possibilities, viz. (i) the Ātman has impurities as his properties and (ii) there is only metaphorical purification of it.

Verses 906-908 explain the nature of the dream state.

कूटस्थज्योतिषैवास्ते स्वप्नस्थानेऽक्रियोऽद्वयः ।
चिदाभया वासनया तत्साक्षित्वं प्रकल्पते ॥९०६॥

This one, who does no activity and who is just single, remains in the dream state only as characterized by immutable lustre/light; its nature of being the witness of it¹ becomes possible² (only) through the impression which appears as the sentient. [906]

There is explanation here as to why the experiences in the dream state are not real in the case of the Ātman.

¹This refers to objects in dream state.

²Translation follows the reading in the AnSS edition; this is *karane tṛtīyā*. However, if the variant reading *prakalpayate* is accepted, the translation would then be: ... of it would be accepted/considered in the light of the impression ...; this would

lakṣaṇe tṛtīyā.

तत्प्रयोक्तृक्रियाभावाद्बुद्ध्यादिज्योतिषामिह ।
न व्यापृतिरतः प्रत्यङ्ज्योतिषा स्वेन वर्तते ॥९०७॥

In the case of the lights such as those of the intellect etc.,¹ there is no activity (possible), because of the absence of the compelling force for (or, behind) them; therefore, the inner self acts with its own light.

[907]

जाग्रद्वस्तनि सर्वाणि भावनामात्ररूपताम् ।
जाग्रत्कर्मक्षये यान्ति स्वप्नकर्मोद्भवे सति ॥९०८॥

At the end (lit. loss/cessation) of the activities in the waking state, all the things of the waking state become changed into (lit. go to) the form of mere impressions(s), i.e. when there arise the activities of the dream state.

[908]

verses 909-913 explain na atha rathāḥ sṛjate.

ता भावना उपादाय प्रत्यङ् स्वप्ने रिरंसया ।
करोत्येष रथाद्यर्थं स्वप्नभोगप्रसिद्धये ॥९०९॥
करणं कर्म कर्ता च कर्मैतत्कारकात्मकम् ।
प्रत्यङ्मोहैकनिष्ठं सच्चिदाभत्वात्तदात्मनि ॥९१०॥

Taking up those impressions (of the waking state), the inner self produces in the dream state the object(s) such as a chariot, with a desire to amuse itself, so as to secure the enjoyment(s) in the dream state.

[909]

and (the product(s) of) this activity, which has (or, have) the nature of what are related to the activity, viz. the means of an activity, the object (of it) and the agent (of the same), based on (or, supported in) only ignorance (about the nature) of the inner self, because they have the semblance of the (ever) existent sentence.

[910]

कार्यकारणरूपेण कर्मैतत्प्रथते जगत् ।
आत्मन्येतत्समध्यस्तमात्माविद्यैकहेतुतः ॥९११॥

This world, viz. the object (of activity), comes into being in the form of the cause(s) and the effect(s); (the one) superimposed on the Ātman on account only of ignorance (about the nature) of the Ātman. [911]

सर्वस्य कर्मणोऽत्यन्तमात्माकर्ता विलक्षणः ।
तत्संहतः स्वयं त्वात्मासंहतो निर्गुणः शुचिः ॥९१२॥

The Ātman is not the agent of all activity,¹ and is extremely different (from it), though commingled with it;¹ for, the Ātman is, in nature (i.e. by itself), non-commingled (with any other thing), devoid of any (or, every) property, (and just) pure. [912]

SP rightly points out the Samdhi in *ātmā* and *akartā*.

¹This commingling of the Ātman with the object-world is purely imaginary (or, a product of ignorance).

अविद्यया स्वमात्मानमशुद्धं मन्यते यदा ।
जाग्रत्स्वप्नसुषुप्तानि तदैतानि प्रपद्यते ॥९१३॥

When, owing to ignorance, (the Ātman) considers itself to be impure, it falls to (or, acquires) these (states), viz. of waking, dream and deep sleep. [913]

Verses 914-919 explain *na tatra rathāḥ*

रथा दार्वीद्यसद्भावान्न सन्ति स्वप्नदर्शने ।
न सन्त्यश्वादयस्तद्वद्रथयोगाः सवर्त्मकाः ॥९१४॥
रथादीन्सृजतेऽथात्र जाग्रत्कर्मादिहेतुकान् ।
अविद्याकामकर्माणि सृष्टिबीजमिदं दृशेः ॥९१५॥

At the time of the sight (of them) in the dream state, there

are no chariots (in existence) because there exists (or, is) no wood etc.;¹ similarly, there are no horses etc.² that are yoked to the chariots, and also the roads together with them. [914]
 (Under these circumstances) now, (the Ātman) creates³ the chariots etc., which have for their cause the activity etc.⁴ of the waking state—this, viz. ignorance, desire and activity, is the seed of the creation by (lit. of) the seer. [915]

¹This refers also to the other material which is used in chariot-making.

²Other animals are intended.

³The Ātmanepada form is worth-noting; the result of the action by the agent is acquired for only itself.

⁴The *kartr*, *karana*, *dravya* etc. are meant.

कर्मणो गमनस्येह साधनाभावहेतुना ।
 स्वप्ने मृषात्वमाहैवं गमनादेः श्रुतिः स्वयम् ॥९१६॥

Thus, the Śruti itself has stated the unreality (or lit. falsity) of (one's) movement (lit. going) during the dream state, because there is absence of any means of (that activity of) going. [916]

न कर्मफलमप्यत्र स्वप्ने तद्वैतसंभवात् ।
 नानन्दा अपि तत्रेति ह्यतः श्रुतिरभाषत ॥९१७॥

Also, there is not here in the dream state (produced any) result of (any) activity, since there is no cause (i.e. the means for the production) of it. Therefore, indeed, the Śruti has affirmed (lit. spoken) that "there are no joys" also. [917]

आह्लादाः स्युरिहानन्दा हर्षश्चात्र मुदस्तथा ।
 प्रकर्षगुणसंबन्धाः प्रमुदो मुद एव तु ॥९१८॥
 पल्वलास्त्वह वेशान्ताः प्रसिद्धार्थं तथोत्तरम् ।
 इत्येवमसतामेव स्रष्टात्मा स्वात्ममायया ॥९१९॥

Here, (i.e. in the sentence of the Śruti), *ānandas* mean

delights;¹ and *muds*,² joys; so also *pramuds* are just *muds* with greater quantity and/or quality of them. [918]

vāsanās mean tanks, and then (*tathā*) the subsequent part (of the Śruti)³ has the well-known meaning(s) (of the words). Thus the Ātman itself is the creator of all the non-existents, owing to its own *māyā* 'magical ignorance'. [919]

The verses point out that the words do not present repetition of meanings.

¹This refers to the general character of happiness.

²SP states: these joys are caused by the birth of a son (or of a daughter— *ādi*) etc.

³This refers to that part of the Śruti which actually precedes *sa hi kartā*.

Verses 920-921 reassert that creation proceeds from *māyā* 'delusion'.

चिदाभकारकोद्भूतवासनाकर्महेतुतः ।

स्वयं निर्माय सृजत इत्यकर्मापि भण्यते ॥९२०॥

For the reason¹ that there is activity of the impression(s) that has arisen from the *kāraka* 'instrument/agent of an activity'; (viz. the intellect), which has the semblance of sentience, (the Ātman), which, though non-performer of (any) activity, is said to have (first) created (the external objects etc.) and then performed (various) activity.² [920]

¹We have changed the reading of the AnSS edition on the basis of the variant reading in the footnote occurring there. This change yields a better understanding of the verse, which would have been awkwardly expressed (and also translated!) otherwise.

²Actually, the two verbal expressions *nirmāya* and *sṛjate* express but one sense, viz. creating. Yet we have connected the first with the objects and the second with any activity which has no purpose whatsoever. Cf. *Gītā* 18.9: *kāryam ityeva yat karma*

niyatam kriyate 'rjuna/ saigaṇ tyaktvā phalaṇ caiva ...//

अविचारितसंसिद्धं क्रियाकारकलक्षणम् ।

जाग्रद्भूमावपि मतं किमु स्वप्नैकनीडगम् ॥९२१॥

It is held that (this world) in the waking state is already established even without the need of any consideration (of cause(s)) as characterized by activity/activities and *kāraṇās* 'those related to the same (for accomplishing it)'. What then to say about that (world) which has a nest (i.e. support) in the dream state? [921]

Verses 922-928 explain sa hi kartā

रथादिवासनानीडचित्तवृत्तिसमुद्भव-

कर्महेतुत्वतः कर्ताकर्ताप्यात्माभिधीयते ॥९२२॥

Being (therefore) the cause of (all) activity which has arisen from the modification(s) of apparently sentient intellect¹ having a nest (i.e. support) in the impressions of chariot etc., the Ātman is said to be the agent (of the relevant activity), even though it is not an agent (of that activity). [922]

Our emendation of the text in AnSS edition in verse 920 above stands vindicated by this verse.

¹We have translated *citta* as 'apparently sentient intellect' with a view to differentiating it from the intellect which merely represents (in the first instance) an internal organ. See *Yogasūtra* 1.2: *yogaś cittavṛttinirodhaḥ* where there is reference to an individual's intellect which is associated with sentience within.

अकर्तुरपि कर्तृत्वं स्वात्माज्ञानैकहेतुतः ।

तदन्यस्येह कार्यत्वात्कर्तात्मैव तमोवधिः ॥९२३॥

The character of being an agent (of some activity) is attributed to even one who is not an agent (of that activity) for only

one reason, viz. ignorance about one's own inner self. That (viz. *kartr̥tva*) is attributed to one that is another (viz. the Ātman who is not an agent of any activity). Here,¹ because there exist (objects as) what are to be accomplished, the Ātman itself, being limited by darkness (i.e. ignorance), is called the agent (of some activity). [923]

¹That is, in the world of dealings (*vyavahārabhūmi*).

स्वप्नवृत्तावुपादानं साधनं वा न विद्यते ।
रथादेरसतस्तस्माद्द्रष्टैवात्मा न कारकः ॥९२४॥

In the dealings (*vṛtti*) of the dream state, there does not exist any material cause or any instrumental cause. Therefore, there being (real) non-existence of chariot etc., the Ātman is but the seer and not an agent (i.e. *kāraka* 'related to the activity of seeing'). [924]

अस्ति यत्राप्युपादानं साधनं वास्य जागरे ।
तत्राप्यात्मचिदाभासमनोबुद्ध्यादिकारकैः ॥९२५॥
रथादिवासनानीडधीवृत्त्युद्भवकारणम् ।
कर्म निर्वर्त्यते तेन स हि कर्तेति भण्यते ॥९२६॥

And, also wherever, i.e. in the waking state, there is this one¹ taken up (*upādāna*) as an instrumental cause; there also, the activity, which has an origin (lit. a cause) in the rise from the modification of the intellect,² which has a nest (i.e. support) in the impressions of chariot etc., is accomplished with such means (of activity) as the individual self, the semblance of sentience, *manas*, (previously acquired) knowledge³ etc.; it is the Ātman which is called the agent (of some relevant activity). [925-926]

These verses point to the Ātman's being a *kartr̥*— also not merely a *sākṣin* as said earlier—cf. *dr̥śi* in verse 915 above.

¹Here, there is reference to chariot etc.

²Sureśvara uses the word *dhī* and not *citta* which is used in verse 922 above; therefore, there is a little change in the translation—mostly the same phrase occurs in both the verses though!

³The word *buddhi* here does not refer to the internal organ. In every likelihood, it refers to the knowledge of the manner in which an activity is to be accomplished.

भान्वादेरिव कर्तृत्वं कर्त्राद्यर्थावभासनात् ।
बुद्ध्यादिकर्तृसाक्षित्वात्कर्तृत्वाद्यात्मनो भवेत् ॥९२७॥

As agentship of some activity is attributed to (lit. said to be of) the sun etc.,¹ on account of their illuminating the things/objects like an agent; so would there be agentship attributed to (or, said to be of) the Ātman, owing to its being the seer of the intellect etc. [927]

This verse justifies the reference to the Ātman in the words *na kārakah* 'not a *kāraka*' in verse 924 above.

¹There is here reference to the other lights like the moon, fire and so on, earlier in BU 4.3.3ff.; and also to various organs of the body.

क्रियाकर्तृत्वमेवास्य हेतुर्बुद्ध्यादिसंगतौ ।
यथावस्त्वपरिज्ञानाद्धीति हेतावतः पदम् ॥९२८॥

The word *hi* is used here (in the statement of the Śruti *sa hi kartā*) to convey (the sense of) the cause with reference to (the Ātman), because agentship of an activity can be mentioned of it, when there is its association with the intellect etc. (and) because there is complete (*pari*) ignorance about the thing (viz. reality) as it is. [928]

Now in verses 929-938, there is explanation of BU 4.3.11. Verses 929-937 explain the three verses in BU, which begin with the word *svapnena* and verse 928 presents an additional meaning

of *ekahaṃsa*.

स्वयंज्योतिष्ट्वमस्योक्त्वा बुद्ध्यादेश्चातिरेकताम् ।
मन्त्राञ्जगादाथात्रार्थे ब्राह्मणोक्तेरनन्तरम् ॥९२९॥

Having discussed (so far) the Ātman's nature of being self-shining and its distinction from the intellect etc.,¹ (the Śruti) recited (some) Mantras, in (order to convey) the same sense; now (*atha*) after (it has made) statements in the Brāhmaṇa¹ portion. [929]

This is a statement of the meaning of the BU sentence *tad ete*

¹The word 'etc.' refers to other organs of the body.

²There is here reference to the prose portion of Veda, viz. the non-Māntrika portion of the Upaniṣad.

स्वप्नवृत्त्या विहत्येमं जाग्रदेहं क्रियाक्षयात् ।
असुप्तो भावनारूपान्सुप्तान्प्राणान्प्रपश्यति ॥९३०॥

Having struck down (all) this body of the waking state through the annulment of activity, (this Ātman), who is not asleep, sees, in the dealings of the dream state,¹ the sleeping *prāṇas* 'organs' which are (really) the forms of impressions. [930]

¹*svapnavṛtṭyā* is to be understood for *svapnavṛttau*.

असुप्तोऽकर्महेतुत्वात्सुप्तान्प्राणान्क्रियोत्थितेः ।
कूटस्थदृष्टिस्वाभाव्यात्स्वप्न आत्मा प्रपश्यति ॥९३१॥

Thanks to its having the nature of being immutable, the seer, the Ātman, which is not asleep owing to its not being the cause of (any) activity,¹ sees in the dream state the *prāṇas* 'organs' which are asleep² on account of the rise of their activities. [931]

¹That is, *akarmaheturva* of the Ātman explains why it is not asleep; absence of sleep points to the ever obtaining nature of the Ātman as a knower.

²The sleep state of the organs in the body is characterized by their incapacity for knowing (or, experiencing) which causes activity in them. This is in contrast with the absence of (any) activity in the Ātman.

प्राणादिशुक्रमादाय कृत्वा तद्भावनामयम् ।
लोकमात्माक्रियः स्वस्थश्चाकशीत्यभिपश्यति ॥९३२॥

Having taken (or, picked) up the bright (flame, or lustrous form) of the *prāṇas* and others¹ and thereby rendering the world full of impressions of the same, the Ātman, which is non-active and remains (unaffected) in its (natural) state, observes them and shines on them. [932]

क्षीणस्वप्नोत्थसंभोगो जाग्रद्भोगाश्रयं पुनः ।
याति बुद्ध्यादिकं स्थानं पुमान्हंसाभिधो ध्रुवः ॥९३३॥

Having exhausted the enjoyment(s) which arose from the dream state, the Puruṣa, called swan,¹ goes (i.e. returns) to the ever-abiding place,² viz. the intellect etc. which is the seat (lit. support) of the enjoyments of the waking state. [933]

This explains *punar eti* in the verse cited in BU.

¹We have translated *haṁsa* literally as 'swan'. Yet it stands for the 'ever-abiding sentience', as the context makes it clear. Hume translates it as 'spirit', Röer, 'wanderer', Mādhavānanda in a simialr sense: 'one who moves', and which the next verse supports.

²We have rendered the word *sthāna* as seat (or place), despite the use of that word in nearby context means 'state' as e.g. in *svapnasthāna*. This is because of its specification by the word *buddhyādika* which is again stated to be *jāgradbhogāśraya*.

पर्यायेण यतश्चोभौ लोकौ हन्त्येकलः स्वतः ।
एकहंस इति प्रोक्तः पुराणज्ञैस्ततः प्रभुः ॥९३४॥

Since it moves,¹ all alone and on its own, to the two worlds² in succession, the Master (or, the Lord) is described by knowers of the Purāṇas³ by an attribute *ekahaṁsa* 'lone wanderer'.

[934]

¹SP states that the verb root *han* has the sense of moving; it cites *hana himsāgatyoh* as supporting evidence from (some) Smṛti.

²These are *ihaloka* and *paraloka* in relation to the two states of waking and dream.

³SP first explains *purāṇajña* as 'knower of the reality which is (both) beginningless and endless' and then understood *purāṇa* to refer to that class of ancient texts, called by the name Purāṇa. It cites the following for justifying the meaning of *haṁsa* as the eternal Puruṣa:

(i) *ekam pādamaṁ notkṣipati salilād dhaṁsa uccaran/
sa ced udakhidat pādamaṁ na mṛtyur nāmṛtambhavet//*

(Atharvaveda 11.4.21; cf. Nirukta 12.29)

*yoginas tam prapaśyanti bhagavantam sanātanam/
(not traced)*

(ii) *marīcir damano haṁsaḥ*

(iii) *eko naikaḥ savaḥ*

(Mahābhārata 13.135.91; Viṣṇusahasranāma 9.1)

(iv) *anantam acalam meruṁ haṁsam nārāyaṇam prabhum/
dhātāram ajaram nityam tam āhuh param avyayam//*

(Mahābhārata 1.57.86)

The editor of the BUBV from MRI adds: *kasmāt satatam ṛtvijaṁ sadā yāgādikam akurvāṇam yadi uddharet jñānāt tadā na saṁsārah nāpi mokṣo bhavet* (supported from Sanatsujātīya 512). Also, *haṁsaḥ viṣṇuḥ gacchati sarvaśarīreṣu iti haṁsaḥ*.

हिरण्यं ज्योतिर्विज्ञानं तावन्मात्रसतत्त्वकः ।

हिरण्मयस्ततो देवः स्वार्थेऽत्र मयडिष्यते ॥९३५॥

hiranya means lustre, (specific) knowledge (or, consciousness), i.e. having only itself (lit. that much) as its nature. Therefore, the shining one¹ is stated by the word *hiraṇmaya*— herein, i.e. in this word, the suffix *-mayat* is used as pleonasm.² [935]

¹For *deva* referring to the immutable Ātman, cf. *Gauḍa-pāḍakārikā* 1.9-10; 2.12.

²This means *hiraṇyamaya*; *hiraṇyamaya* does not have the usual sense of the suffix *-mayat* as adding to its own meaning. Read SP: *svārthe mayato vikārārthatvaṃ vyāvartayati*. That is, it has only redundancy.

परस्य पुरुषस्यायं तदबोधप्रकल्पनात् ।
साक्षिमात्रादिकस्तस्मात्पौरुषोऽयमितीर्यते ॥९३६॥

Since this one is for the other Puruṣa¹ because of its entertaining various notions on account of ignorance, and is merely the witness etc.;² therefore, it is described as belonging to Puruṣa. [936]

This verse explains the Mādhyandina recension's reading of the citation in BU: *hiranyaḥ pauruṣa ekahaṃsaḥ*.

¹This is a reference to the individual self. Hereafter also it is so used on many occasions.

²In the word *sākṣimātrādi*, *ādi* would indicate *akāraka*, *kūṭastha* etc. Yet see SP: *ādipadena meyaṃ kartā karmetyādiḥ vibhāgo grhītaḥ*— this possibly means the agent of an activity, the means to it etc. which are falsely conceived of, in the case of the Ātman.

पूरणान्निखिलस्यास्य कार्यकारणवस्तुनः ।
पुरुषोऽयं भवेदात्मा पूर्णत्वाद्वाद्वात्मानः ॥९३७॥

The Ātman becomes¹ Puruṣa owing to his bringing completeness to the entire mass of objects which comprise

the cause(s) and the effect(s). Or, (this is said) of the non-dual Ātman, because of its being complete in itself. [937]

¹This verse explains the word *puruṣaḥ* in the Kāṇva recension: *hiranyaḥ puruṣaḥ* ...; it offers two derivations: (i) from *pūraṇa* and (ii) *pūrṇa*.

हानेनाङ्गविकल्पानां नवानां संचयेन च ।
हंसत्वमृषयः प्राहुरात्मनः पारदर्शिनः ॥९३८॥

The Ṛṣis 'seers of old', who had seen the end/truth of the transmigratory world, have posited of the Ātman the nature of a *haṁsa* 'swan' on account of its giving up various limbs and assuming new ones.¹ [938]

This is another explanation of the word *haṁsa*. It refers to the immutable Ātman's assuming different bodies at different times on account of *vāsanās* 'impressions', as explained earlier.

¹SP supports this verse by another (yet very similar) verse thus:

hānena gatakalānām navānām sañcayena ca /
śarīrāṇām ajasyāhur haṁsatvam pāradarśinaḥ //
(*Brahmapurāṇa* 235.34).

Verses 939-941 explain BU 4.3.12 which begins with the word *prāṇena*.

प्राणेन ह्यवरं रक्षन्मरणाद्देहकं परः ।
बहिर्देहं चरित्वाथ पुनरैति यथागतम् ॥९३९॥

Guarding the lesser body with *prāṇas* 'life-breaths'¹ (and thus) from death, the 'highest'² (Ātman), after rambling out of the body,³ comes back to it later, in the same way as it had gone (out). [939]

This is to explain the verse *prāṇena* ... cited in BU.

¹ Here, *prāṇas* are the five winds in the body.

² Actually, *para* stands in opposition to *avara*; therefore it should be translated as 'higher'. But *para* in connection with the Ātman is ever the 'highest'!

³ In fact, Prāṇa (i.e. sentience) is inside the body, while in the dream state. Yet, it is devoid of any false notion of its identity with the body etc., and, therefore, it is said to be outside the body (SP).

नाडीस्त्यक्त्वा यतः स्वप्ने जाग्रद्भोगप्रदाः पुमान् ।
स्वप्नभोगप्रदा याति बहिर्नीडादतस्तदा ॥९४०॥

Since, after leaving the veins (which bring or yield to it) enjoyments of the waking state, that Puruṣa goes to (those) in the dream state which bring to it the enjoyments of the dream state, therefore, it is (said to be) outside the nest.¹

[940]

This verse clarifies how the seer (Puruṣa) is, in the dream state, outside the body.

¹ This refers to the body; cf. verses 921-22 and 926 above.

कर्मणोद्भाविता यत्र वासना कामरूपिणी ।
तामादायैति देहं स्वं हंस आत्मामृतोऽव्ययः ॥९४१॥

This swan, the Ātman, the immortal one (and) the never-diminishing (or, never-perishing) one, moves to its own body,¹ whenever there is aroused by activity the impression, that assumes the form of (various) desires, after it has taken (or picked) up the same.

[941]

¹ It is difficult to say definitely which body is meant. SP paraphrases *svam deham* as *svakarmocitam deham* and adds *apne gacchatīty arthah*. This indicates that the body of both the waking and the dream states is but one, the only difference being that the body in the dream state is, for enjoyment of

objects, falsely considered as identical with that in the waking state.

Verses 942-943 explain BU 4.3.13, viz. *svapnānta*

कर्मज्ञानानुरूपेण रूपमुच्चावचं मुहुः ।
स्वप्नमायाप्रपञ्चस्थ आत्माप्नोतीव निष्क्रियः ॥९४२॥

Time and again, the actionless Ātman obtains, as it were,¹ high and low forms in keeping with its knowledge about the activity. when it abides in the magical world of ignorance of the dream state. [942]

This is the meaning of *svapnānte*

¹iva 'as it were' justifies the actionlessness of the Ātman (SP).

नर्मार्थो जक्षतिर्ज्ञेयो हर्षार्थो मोदतिस्तथा ।
अविद्यया भयं चेह स्वप्ने तद्धेतुत्वसंभवात् ॥९४३॥

The verb root *jakṣ* is to be understood in the sense of having a *tête-à-tête* (or, enjoying humour); so also the root *mud* in the sense of feeling (or, deriving) delight. Here, in the dream, fear is (caused) by ignorance, since there is no (real) cause for it. [943]

This summarises the meaning of *uteva strībhīḥ*

Verses 944-968 explain the meaning of BU 4.3.14 and also discuss, at some length, some *prima facie* view concerning the same.

आराममेव मायोत्थं स्वप्ननिर्माणलक्षणम् ।
मायिनस्तस्य पश्यन्ति न तं पश्यति कश्चन ॥९४४॥

(Only) those, who are under the influence of ignorance, see (the Ātman's) sport which arises from magical ignorance and

which is the sign (or, the indicator) of the creation of the dream state, (and) yet nobody sees it. [944]

बुद्ध्यादेर्व्यतिरिक्तत्वं स्वयंज्योतिष्ट्वमागमात् ।
आत्मनः प्रतिपाद्याथ लोकतोऽपि विभाव्यते ॥९४५॥

It is noticed that, after having (thus) expounded on the basis of scripture(s) the distinction of the Ātman from the intellect etc. and its having the nature of being self-shining, the Śruti (explains the same) by citing an example from the world also. [945]

Verses 946-953 introduce *taṃ nāyatam* ... in the sentence from BU.

सुप्तं न बोधयेद्वाढमिति वादो हि लौकिकः ।
किमर्थमिति चेत्तत्र लोकः कारणमीक्षते ॥९४६॥

Indeed, there is a popular saying: 'One should not wake up a person who is in deep sleep'. (If one were to ask:) 'Why is this so?', then, in that respect people see a reason.¹ [946]

This refers to BUB which SP has put this way: *bhṛśaṃ suptaṃ kṛtsā na bodhayed ity atra praśnapūrvakaṃ hetumāha*.

¹This is given in the next verse.

प्रबोधनाडीस्त्यक्त्वात्मा स्वप्ननाडीरयं गतः ।
इति लोकप्रसिद्धत्वात्तस्मिन्ल्लोकोऽनुशास्ति तत् ॥९४७॥

(The reason is:) Because it is well known among people that the Ātman (of/in the sleeping person) has entered into (lit. gone into) the veins (which appear to exist) in the dream state, after it has abandoned (its stay in) the veins (of the person who is) in the waking state. (Therefore), in the case of him,¹ people instruct (that way).² [947]

¹Add: who is in the sleep state. Instead of *tasmin*, there is a reading *tasmāt*, as noted by SP. However, it seems to be inferior and SP has correctly kept from adopting it.

²That refers to the popular saying, viz. an instruction, as it were.

नाडीव्यत्यासगमनशङ्क्यैवानुशासति ।
सुप्तं न बोधयेद्गाढमिति तद्दोषदर्शिनः ॥९४८॥

For fear that there might be a reversal in respect of the individual self's going to the veins, they (the knowers among the people), who notice a harm (lit. a fault), arising out of that, instruct (others, or anyone), 'one should not awaken a person who is in deep sleep'. [948]

Śaṅkara has added here *sahasā* 'all of a sudden', though BU does not use the word. Sureśvara ignores Śaṅkara's statement; except by qualifying *suptam* with the use of *gāḍham*.

यथायोगमयं नाडीर्गाढं सुप्तः प्रबोधितः ।
न प्रपद्येत तेनायं स्यात्सुदुःखभिषक्क्रयः ॥९४९॥

This one, who is in deep sleep, when awakened, would not (be able to) go to the right veins and would become very difficult for doctors (or, medicine-men) to cure (or, treat). [949]

This explains the *doṣa* 'a harm' which is under view, according to the preceding verse. SP adds (following BUB): *tenāndhyabādhiryādiprasaṅgeneti yāvāt*.

देहप्रवेशनिर्याणहेतोर्देहाद्गृहादिवत् ।
बुद्ध्यादिव्यतिरिक्तत्वमात्मनोऽस्यावसीयताम् ॥९५०॥

Let it be understood (lit. concluded) that there is distinction of this Ātman from the intellect etc., as in the case of a

person who has it from his body, since he is the agent (lit. cause) of entry into and/or exit from the same. [950]

This is the conclusion drawn from the popular notion as well as from Mantras and Brāhmaṇas. SP asserts that the self-shining nature of the Ātman is also emphasised.

अध्यात्मादिपदार्थेभ्यो विविक्तं स्वात्मनि स्थितम् ।
तं न पश्यत्यहो कष्टं दौर्भाग्यं दुष्टचेतसाम् ॥९५१॥

It is, (therefore), a pity (or, great sorrow) that there is misfortune in the case of them, whose mind (*cetas*) is affected by the fault, viz. in that (any) one (of them) does not see the Ātman (sentience), though it is abiding in his own self (or, himself—a reflexive pronoun), as completely distinct from the (external) objects such as those that belong to the body etc.¹ [951]

¹This refers to *ādhidaivika* and *ādhibhautika* objects also.

प्रत्यक्षगोचरं देवं लोकं चातिप्रमादिनम् ।
दृष्ट्वा श्रुतिः शिरस्ताडमनुक्रोशति दुःखिता ॥९५२॥

Having taken note of (lit. seen) the shining one and also the extremely (or, too much) faltering people, the Śruti, becoming full of sorrow/grief, commiserates with them, beating its head, (as it were!). [952]

प्रत्यक्षतममप्येनं वितमस्कं स्वयंस्थितम् ।
अहो कष्टं न पश्यन्ति कं याम शरणं वयम् ॥९५३॥

What a pity (or, great sorrow) that they do not see this (Ātman) which is the most direct (to perceive), which is devoid of (all) ignorance (in reality) and which exists in its own right! Whom shall we approach, as a shelter? [953]

Verses 954-960 decide the *paurvāparya* of the Śruti sentences on the basis of *arthakrama*.

स्वयंज्योतिष्ट्वमारभ्य यच्छ्रुत्योक्तमिहात्मनि ।
उच्यते पूर्वपक्षोऽयं तस्य सिद्धान्तरूपिणः ॥९५४॥

(Now,) in respect of what is said by the Śruti about this¹ Ātman, viz. (in the statement) beginning with (the mention of) its having the self-shining nature, there is not stated (what is an argument against the same, i.e.) the *prima facie* view on what has the nature of the proved doctrine. [954]

This verse relates the Śruti statement *atho khalvāhuḥ* ... to the earlier passage, viz. the *prima facie* view.

¹This refers to *sa yatra prasvapiti* ... (BU 4.3.9).

स यत्रेति ह्यतः पूर्वं पूर्वपक्षत्वहेतुतः ।
अथो खल्वाहुरित्यादिग्रन्थं पश्येत्तथा क्रमात् ॥९५५॥

Therefore, one should consider (or understand) the passage beginning with (the words) *atho khalvāhuḥ* as the *prima facie* view even first, in the sequence, before the passage *sa yatra* [955]

On this suggested sequential order, SP makes the following interesting observation: *pūrvapakṣānantarabhāvī siddhānta itī karmasyocitatvād arthakrameṇa pāṭhakramasyāgnihotrayavāgupā-kavad bhaṅgād ity arthaḥ*.

स्वप्नस्य जाग्रत्स्थानत्वमथो खल्वितिवाक्यतः ।
यानि ह्येवेति हेतूक्तिः प्रतिज्ञातार्थसिद्धये ॥९५६॥

From the clause (lit. statement) *atho khalu* ... (one has to) understand (as the enunciation:) the dream (state) has but the nature of the waking state (and) in (the clause) *yāni hyeva*, there is (made) the statement of reason for proving the matter

enunciated.

[956]

This is an analysis of the statement of the *prima facie* view.

जाग्रत्समीक्षणं यासु पुंसो नाडीषु तास्विदम् ।
स्वप्नेक्षणं विजानीयान्नान्यत्रेति विनिश्चयः ॥९५७॥

This seeing (i.e. experience) in the dream state, on the part of (or, for) the individual self, should be, one should understand, possible in those veins in which it is there for it, in the waking state: this is the decision to be understood.

[957]

This is the statement of the reason adduced in the *prima facie* view.

स्वप्ने तमेव चात्मानं सप्तोऽयमभिमन्यते ।
यमनस्तप्रबोधस्थं न ततोऽन्यं कदा चन ॥९५८॥

In the dream state (a person considers) that the same Ātman whom he identifies (thus:) 'This one is asleep' (as the Ātman), from whom the experience of the waking state (*prabodha*) has not disappeared, (it is certainly) not any other than that (viz. of the waking state).

[958]

This points to the sameness of the Ātman in the two states of waking and dream.

जाग्रद्वन्धुपुरग्रामपश्वारामादिलक्षणान् ।
स्वप्ने प्रत्यभिजानाति तानेव न ततोऽपरान् ॥९५९॥

It (i.e. the Ātman) recognises in the dream state those very (objects) belonging to the waking state, i.e. those which are characterized as relatives, cities, towns (or villages), animals and gardens etc. and not any other than them.

[959]

This refers to the identity of the objects seen in both the states.

The printed text is a corrupt printing of the line.

अपूर्वमेव सं पश्येत्स्वप्नदृग्जाग्रतो यदि ।
उक्तस्वप्नो भवेदन्यो यथा पूर्वगतस्तथा ॥९६०॥

If the seer in the dream state would see some never-before-(existing or) seen object (as different/distinct from that) of the waking state, then the dreaming person would be¹ other than that, just like one who had appeared for the first time in the waking state (*pūrvagataḥ*). [960]

This is the concluding verse of the *prima facie* view.

This is here the expression of the same idea as in verse 958 above, but only by way of *vyatireka* mode of argument.

¹On the basis of SP, the preposition *sam-* in the first line is understood with the verb *bhavet* in the second line to yield the form *sambhavet*. However, it was possible to connect *sam-* with *paśyet*, these together (in the same line) would form the verb *sampaśyet*. Thus, it could be a later writer's adoption of the earlier tendency noticeable in Kālidāsa: ... *taṁ pātayāṁ prathamam āsa* (*Raghuvamśa* 9.61), (cf. Mallinātha on this: *kr̥ñcānuprayujyate liti— ity akr̥ñcāśabdasya vyavahitaviparyasta-prayoganivṛttyarthatvāt pātayāṁ prathamamāsa ity apaprayogaḥ iti pāṇinīyāḥ yathāha vārtikakāraḥ— viparyāsanivṛttyartham vyavahitanivṛttyartham ca iti*) and also yet earlier in Vedic Sanskrit where the preposition generally stood apart from the verbs. The verb *bhavet* in the second line would yield the same sense as understood from *sambhavet*. This would mean that the preposition does not modify the sense of the verb. Also, another alternative could be: read *sa* (and not *sam*) to go with *svapnadṛk*— this could be more natural, perhaps! But, this is without any manuscript evidence and would, therefore, be an emendation which, as far as possible, one should avoid.

Verses 961-964 refute the reality of objects in the dream state.

इत्येवमाहुः केचित्तु न तु तद्युक्तिमद्वचः ।
अयुक्तिमद्यथा चैतत्तत्पूर्वं प्रतिपादितम् ॥९६१॥

Thus, indeed (*tu*), have some (thinkers) said; but (*tu*) that statement (of theirs) is not (supported) with (good) reason. How it is not (supported) with (good) reason is already¹ expounded. [961]

Now is introduced the refutation of the *prima facie* view.

¹That is, in the BU passage *na tatra rathāḥ*

अत्रायमित्यनेनात्र पूर्वपक्षनिराक्रिया ।
न्यायेनोक्तेन पूर्वेण वक्ष्यमाणेन च ध्रुवम् ॥९६२॥

In the statement *atrāyam* ..., there is (stated) the refutation¹ of the *prima facie* view; i.e. (of the view) stated in the earlier statement with reason (in *atho khalvāhuḥ* ...) and, certainly, what will be said now hereafter. [962]

¹SP takes *dhruvaṃ nirākriyā* together.

न जाग्रद्वेशगः स्वप्नो जाग्रत्सामग्र्यभावतः ।
अध्यात्माद्यर्थविरहे यतः स्वप्नान्प्रपश्यति ॥९६३॥

The dream (experience) does not belong to the state/region of the waking state, on account of the absence of the ensemble of the means of the waking state—this, on the ground that one sees (the objects of) the dream state (even) in the absence of such things as belong to the body.¹ [963]

¹These are other various *kāraṇas*, particularly the *karaṇas* 'instruments' of activity.

स्वयंज्योतिष्ट्वमस्योक्तं स्वप्ने चाकारकात्मता ।

मृत्युरूपात्ययश्चैवं प्रतीचः पूर्ववाक्यतः ॥९६४॥

Already there is stated the nature of this (Ātman) as being the self-shining (thing), whereas, in the dream state, (it has) the nature of not being a *kāraka* (or, of being a non-*kāraka* 'not connected with activity in any way'). Also (there is understood) from the preceding sentences¹ the transcending (by it) of the (various) forms of death. [964]

¹SP invites attention to *atrāyam puruṣaḥ svayanījyotiḥ* (BU 4.3.9), *na tatra rathāḥ* (BU 4.3.10) and *atīkrāmati mṛtyo rūpāṇi* (BU 4.3.7).

Verses 965-970 state the king's intention in asking his question again. Also, from verse 969 up to verse 1063, there is discussion of the thought in BU 4.3.15.

कामादयः स्वभावोऽस्य मृत्यवोऽथ न वा भवेत् ।

इत्याशङ्क्य नृपो दोषं याज्ञवल्क्यमपृच्छत् ॥९६५॥

Now, having doubted if the deaths (i.e. the forms of death), viz. desire and others,¹ were or were not² the nature of this (Ātman), the king asked Yājñavalkya about (some) harm³ (involved). [965]

¹There is reference here to the effects of desire.

²That is, if death was not the Ātman's nature—a definite reply is sought.

³This means: There may not occur liberation, in case death was the Ātman's nature. The word *doṣa* is already used in this sense in verse 948 above. It could alternatively refer to a fault in reasoning as well!

पृष्टं वस्तु सुनिर्णीतं मयेतिप्रकृतोक्तिततः ।

निविवृत्सुं नृपो विप्रं भूयोऽपृच्छद्विमुक्तये ॥९६६॥

For securing (the knowledge) for liberation, the king again asked the sage, who was (now) about (lit. wishing) to turn away (as is understood) from the statement of the matter in hand (i.e. under discussion— *prakṛta*), viz. 'the matter which was asked (lit. put in the form of a question) is well settled by me'.

[966]

स्वयंज्योतिष्ट्वमुदितं मुक्तेरङ्गममन्यत ॥९६७॥

न चाङ्गनिर्णयोक्त्यैव निर्णयं मन्यतेऽङ्गिनः ।

यतोऽतो मोक्षमुद्दिश्य याज्ञवल्क्यमपृच्छत ॥९६८॥

He (i.e. the king) thought, (thus far) is told (me) about the Ātman's having the nature of the self-shining (thing, viz. reality) and which is (but) ancillary to (the knowledge about) liberation,

[967]

and since they do not consider it to be the decision about the principal thing (as given) by the statement about what is ancillary;¹ therefore, he asked Yājñavalkya with regard to (or, with a desire of acquiring the knowledge of) liberation.

[968]

¹In connection with the first line of verse 968, SP observes how Sureśvara keeps in view a principle of interpretation according to Mīmāṃsā which is thus stated: *aṅgini hi darśādaṁ nirṇīte grāhakagrahaṇasāmarthyād aidamarthyenāṅgāni nirṇīyante, śrutyādīni tu dvārārpakāṇi na tv aṅganirṇayād evāṅginirṇayo nyāyābhāvāt*.

आसङ्गप्रविवेकार्थं स वा इत्यादि भण्यते ।

कामादिप्रविवेके हि मोक्षयोग्यत्वमात्मनः ॥९६९॥

The statement *sa vā ...*¹ is (i.e. will be) made for completely (*pra-*) separating attachment. Indeed, the Ātman² becomes eligible for (securing) liberation (only) when there is complete separation of desire etc.³

[969]

¹This occurs in 4.3.15, to be discussed soon.

²This is the individual self (i.e. Ātman).

³kāmādi explains āsaṅga 'attachment'.

कामाद्यात्मगुणश्चेत्स्यादनिर्मोक्षः प्रसज्यते ।
न हि गुण्यविनाशेन तद्गुणस्य निराकृतिः ॥९७०॥

If desire etc. is a property of the (individual) Ātman, then there would contingently arise absence of liberation; for, without the destruction of one which is having a property, there cannot be the removal of that property. [970]

Verses 971-974 explain the meaning of rūpāṇy evātikrāmati na mṛtyum.

रूपाण्येवायमात्मात्र मृत्योः स्वप्नेऽतिवर्तते ।
न तु मृत्युं यतः स्वप्ने मोदत्रासादि दृश्यते ॥९७१॥

It is only the (various) forms of death which the Ātman transcends in the dream state, but not death itself; since, in the dream state, there are experienced (lit. seen) joy, feeling of trouble etc. [971]

मोदत्रासादिको मृत्युः स्वभावो न यथात्मनः ।
तथात ऊर्ध्वं प्रब्रूहि भगवन्मे विमुक्तये ॥९७२॥

Please tell me, O revered master, as to how joy, feeling of trouble etc. are death and not the nature of the Ātman, in order that there will result (for me) liberation. [972]

सहस्रदानं त्वत्तस्य स्वयंज्योतिष्टवस्तुनः ।
निर्णयाघाटविज्ञप्त्यै नाशेषप्रश्ननिर्णयात् ॥९७३॥

As to (tu) the (promise of the) gift is for firmly (or, completely or finally) giving the decision about the thing (told), viz. (the Ātman's) having the nature of being self-shining; it is not

(given) for the decision of (or, regarding) the entire question (viz. the way of acquiring liberation). [973]

स्वयंज्योतिः स वा एष यः पुरा प्रतिपादितः ।
स्वप्नभूमावसङ्गोऽसौ संप्रसादे प्रसीदति ॥९७४॥

This (Ātman), which was earlier explained to be self-shining in the dream state,¹ was itself stated in the (Śruti sentence) *sa vā eṣa*, as the same one becoming pleased (or, feeling happy) in deep sleep,² while remaining unattached (to any objects).

[974]

¹Cf. BU 4.3.9.

²This is the meaning of *samprasāda*, though it literally means 'complete tranquillity'.

Verses 975-979 state the meaning of the word *samprasanna*.

अपां कतकसंपर्काद्यथात्यन्तप्रसन्नता ।
अपास्ताशेषसंसारभावनस्यैवमात्मनः ॥९७५॥
स्वास्थ्यं प्रसन्नतैतस्मिन्सुषुप्ते भवतीत्यतः ।
संप्रसादमिमं प्राहुः सुषुप्तं तद्विदो जनाः ॥९७६॥

As there comes (i.e. results) extreme clarity in water owing to its contact with a clearing nut (i.e. seed of the Kataka plant), so does tranquillity (lit. clarity) and its own nature come to (i.e. exist in) this (Ātman) in the deep sleep state—in this Ātman, which has abandoned the entire impressions of the transmigratory existence; [975]

therefore, have the knowers of that (viz. the nature of the Ātman) described the deep sleep¹ state as complete tranquillity (of the Ātman). [976]

¹Read quotation in SP thus: (*uktam hi:*) *samprasāda iti suṣuptasthānam ucyate samyak prasīdaty asminn iti nirvacanād (iti).*

मात्रादानं यदकरोदात्मा स्वप्नरिरंसया ।

तत्क्षये स निरासङ्गः स्वात्मन्येव प्रसीदति ॥९७७॥

Since the Ātman (the individual self) took (or, picked) up the portions (of impressions), with a desire for enjoyment in the dream, so it (becomes) unattached (to the same) when the same (i.e. portions of impressions) get exhausted and, (therefore), becomes completely tranquil in itself. [977]

जाग्रद्व्यपेक्षया स्वप्ने किञ्चिच्छेषः प्रसीदति ।

तस्याप्यस्तमयात्प्राज्ञे समिति स्याद्विशेषणम् ॥९७८॥

Only a bit of that (belonging to the individual Ātman) becomes tranquil in the dream state as compared to (what belongs to) the waking state, (therefore), in the case of that (individual self, called in the deep sleep state by the name) Prājña, the preposition *sam-* functions as (lit. is) a modifier (of the root *prasada*). [978]

केवलाज्ञानमात्राधिरिह प्रत्यङ् व्यवस्थितः ।

कारणात्मा यतस्तस्माज्जाग्रत्स्वप्नाख्यकार्यकृत् ॥९७९॥

Since, here,¹ the inner self remains with its delimiting functions² only in the form of ignorance;³ the one which has the nature of being the cause is, therefore, in the waking state the cause (lit. maker) of the effect called the dream state.⁴ [979]

This describes the nature of Prājña which is mentioned in the preceding verse.

¹That is, in the deep sleep state.

²Sureśvara uses the word *ādhi* for *upādhi*, abbreviated obviously for metre's sake.

³This is indicative of the gross effects/products of ignorance.

⁴SP supports this by citing (*uktaṃ ca*) *suṣuptākhyam tamo*

'jñānam bījaṃ svapnaprabodhayoh.

Verses 980-987 explain the statement in BUB *katham sampannah.*

कथं केन क्रमेणात्र प्रत्यगात्मा प्रसीदति ।
इत्येतदधुनाचष्टे रत्वेत्यादिगिरा श्रुतिः ॥९८०॥

Now, the Śruti states in the words (lit. statement) which begin with *ratvā* as to how,¹ i.e. in what manner, the inner Ātman becomes here² completely tranquil. [980]

This is to state the purpose of the following portion of the sentence, viz. *ratvā cartivā*

¹This refers to *katham* in the BUB question *katham samprasannah.*

²That is, in the deep sleep state.

स्वप्नभूमावयं रत्वा क्रीडां कृत्वात्ममायया ।
चरित्वा च विहृत्यात्मा वासनामात्रसाधनः ॥९८१॥

This (Ātman), after having had enjoyment, i.e. having (variously) played/sported through its own (*ātman*— a reflexive pronoun) *māyā* 'magical ignorance' and after having had rambled, (now) having only impressions for its instruments (becomes completely tranquil in its Prājña form),¹ [981]

¹This is to be understood from verse 987 below, in the words *prājñe prasīdati.*

दृष्ट्वैवेत्येवशब्देन कारकत्वं निवार्यते ।
पुण्यपापफलं चेह पुण्यपापगिरोच्यते ॥९८२॥

By (the use of) the word *eva* in *dr̥ṣṭvaiva* is rejected (or, denied) (the Ātman's) agentship (lit. in relation to activity); so also by the word *punya-pāpa* is meant (lit. stated) the result, viz. merit and demerit. [982]

This explains *dr̥ṣṭvaiva* ...; this explanation continues up to verse 985 below.

अस्य जाग्रदवस्थायामिन्द्रियार्थादिसंभवात् ।
क्रिया निर्वर्त्यते सा च सुखादिफलदात्मनः ॥९८३॥

In its waking state, (the relevant) activity is (i.e. can be) accomplished, since there is the possibility (of the existence) of the organs and their objects and that (viz. activity) is, for the Ātman, what yields enjoyment (lit. result) etc. [983]

This explains why the relation of the Ātman to any activity is rejected in the preceding verse.

स्वप्ने तु कारकाभावात् क्रियासिद्धिरात्मनः ।
चिदाभं वासनामात्रं प्रथतेऽतोऽविकारिणः ॥९८४॥

Insofar as (*tu*) the dream state (is concerned), there is no accomplishing (lit. securing the completion of) any activity by the Ātman owing to the absence of any *kāraṇa* 'instrument (of activity)' possessed by it); therefore, there prevails only the impression, which has the semblance of sentience, (on the part of) the Ātman, which does not undergo any modification. [984]

SP points usefully to the dissolution of the Saṃdhi: *ato avikāriṇaḥ*.

यतोऽत्र न क्रिया तस्मादवदधे श्रुतिः स्वयम् ।
दृष्ट्वैवात्मा न कृत्वेति प्रत्यङ् तस्मान्न कारकः ॥९८५॥

Since there is (i.e. can be) no activity (performed by the Ātman), therefore has the Śruti itself affirmed emphatically in *dr̥ṣṭvaivātmā na kṛtvā* 'the Ātman, only after seeing and not after doing', therefore, the inner self is not an agent of

any activity.¹

[985]

Here concludes the explanation of the use of *eva*.

¹According to SP, this conveys the immutability of the Ātman.

पुण्यपापफलं चेह पुण्यपापाभिधं मतम् ।
कार्यं कारणवत्तस्मादुपचारात्समीरितम् ॥९८६॥

It is understood that 'the result of merit and demerit' has for it the expression 'merit and demerit'. Therefore, it is said by way of indication (or, metaphorically, *upacārāt*) that the effect is just the same as (or, similar to) the cause.¹ [986]

¹SP clarifies this by *gobhiḥ śrīṇīta* 'mix with cows' as standing for *gopayobhiḥ śrīṇīta* 'mix with the milk of cows', which is accepted in the practice of Mīmāṃsā.

स्वप्नकर्मव्युपरमे ततः प्राज्ञे स्वयंप्रभः ।
प्रसीदति परो देवः प्रतीच्येव परे पदे ॥९८७॥

Then, after the cessation of (all) activity in the dream state, the highest,¹ the shining one, the self-shining (Ātman) becomes completely tranquil in (becoming one that is known by the name) *Prājña*,² (thus merging) only (or, just) in the inner self, the highest state (of its own). [987]

¹This indicates the oneness of the *vijñānātman* 'knowing individual) Ātman' with the highest (*para*) Ātman.

²The words *prājñe prasīdati* stand connected with *ratvā* ... mentioned in verse 981 above.

Verses 988-991 state the significance of the word *punaḥ*.

पुराप्यसकृदात्मायं स्थानात्स्थानान्तरं गतः ।
यतोऽतः पुनरित्येवं संप्रसादाप्तितोऽभिधा ॥९८८॥

Since this Ātman has earlier also moved several times from one state to another, therefore, it is said 'again', i.e. in the sense, 'after acquiring complete tranquillity'.¹ [988]

¹This refers to *punaḥ pratinyāyam ... svapnāyaiva*.

आनुलोम्यं सुषुप्ताप्तिरेवमुक्तेन वर्त्मना ।
तद्व्युत्थानं प्रतिलोम्यं स्वप्नादिस्थानसंचरः ॥९८९॥

In this way which is thus described, there is in direct order the obtaining (lit. experiencing) of the deep sleep state and, in the reverse order, its swerving away from the activity (i.e. movement) in the dream state etc. [989]

प्रतिलोम्यार्थ एवातः प्रतिशब्दोऽयमिष्यते ।
विपरीतागतिः स्वप्ने प्रतिस्थानं तथैत्यजः ॥९९०॥

Therefore, this word (i.e. preposition) *prati*¹ is desired (or, is understood) to have the sense of the reverse order; so, the coming into the dream state (of the Ātman) is its reverse (lit. inverted) movement—thus the unborn moves back to every state. [990]

This is further explained in the next verse.

¹In both the forms: *pratiyoni* and *pratinyāya*.

यथार्थे प्रतिशब्दोऽयं निश्चयार्थे निरित्ययम् ।
अयनं गमनं च स्यादायो धातोरिणो घञि ॥९९१॥

This word (i.e. preposition) *prati* is in the sense of *yathā* 'as'¹ (and) this (preposition) *nis*, in the sense of *niścaya* 'definiteness/certainty'; *ayana* is (lit. would be) *gamana* 'going' and the word *āya* is (derived) from the verbal root *in*² with the affix *ghan*³ added to it. [991]

This explains the word *pratinyāya* by dividing it into its

components: *prati*, *ni* and *āya* (which is equal to *ayana*).

¹This refers to the earlier mentioned direct order in verse 989 above.

²Cf. Pāṇini's *Dhātupāṭha*: *in gatau*.

³The suffix *-ghanī* is added to roots when mere action is denoted; cf. Pāṇini 3.3.18: *bhāve (ghanī)*. SP states the full *prakriyā* 'progress' in the formation. Yet, cp. Pāṇini 3.3.38: *para anupātyaye naḥ* leading to the formation *paryāya*.

Verses 992-1000 clarify the meaning of the word *yoni* in the Mādhyandina recension of BU.

श्रोत्रादिकरणान्यत्र मात्रादानस्य कारणम् ।

योनिशब्दाभिलष्यं स्याज्जाग्रद्देहसमाश्रयम् ॥९९२॥

In this (state),¹ the organs such as the ears are the cause of (the Ātman's) taking (or, picking) up the portions (of the impressions) and what is to be expressed by the word *yoni* is² (all of that, viz. the organs etc.) what has for its abode (lit. support) in the body of the waking state. [992]

The Mādhyandina recension relevant here is; *sa vā eṣa etasmin apnānte ratvety upakramya pratiyony ādravati buddhāntāya*.

¹The dream state is under reference. Yet, SP suggests as the alternative, the waking state.

²This is for *syāt* 'would be'.

मात्रादानस्य या यस्य योनिरासीत्पुरात्मनः ।

तामेवायं पुनर्योनिं स्वप्न आत्मा प्रपद्यते ॥९९३॥

Whichever was the *yoni* 'abode (or, support)' of/for which(ever) Ātman's taking (or, picking) up of the impressions,¹ to that very *yoni* does that (i.e. this, which is under reference)² Ātman go (lit. resort) again, in the dream state. [993]

This explains the meaning of *ādravati* after that of *yoni* has

been stated.

¹This is referring to the *yoni* in the waking state.

²This is sentience which is not the same as the individual sentience that is mentioned in the translation as whichever.

यथादानं कृतं पूर्वं मात्राणां स्वप्नसर्जने ।

स्वप्न आदाय ता मात्राः स्वाप्नीं योनिं प्रपद्यते ॥९९४॥

As there was done the action of taking (or, picking) up the impressions (by the Ātman) earlier,¹ so (i.e. in the same manner) does (the Ātman), after having taken (or, picked) up those impressions, go (i.e. take) to the impressions of the dream state, at the time of the occurrence of the dream state.

[994]

This is the meaning of *pratiyony ādravati svapnāya* as read in the Kāṇva recension of BU. For elaborate explanation of this, see SP.

¹This refers to the waking state.

प्रतिन्यायगिरा चास्य यथावत्तर्माभिधीयते ।

प्रतियोनिरवेणैव यथास्थानमिहोच्यते ॥९९५॥

By the word *pratinyāya*, with reference to this Ātman's movement in the state, is stated the meaning *yathāvartma* 'in accordance with the manner'. (And) by the utterance (lit. sound) *pratiyoni* is expressed here¹ the sense of *yathāsthāna* 'in accordance with the state'.

[995]

This explanation befits the reading of both the recensions of BU. Yet for elaborate details, read SP.

¹That is, in the sentence under reference or consideration.

यस्माद्यस्मादुपादाय मात्राः स्वप्नं चकार सः ।

तत्र तत्रैव ता धत्ते मात्राः स्वात्मांशुभिः सह ॥९९६॥

After having taken (or, picked) up the impressions, from whichever (objects) that (Ātman), made the dream state, there (i.e. in each of them) it puts (or, places) those impressions, together with its own rays. [996]

This is the conclusion about the meaning of the sentence under reference, in accordance with its reading in the Mādhyandina recension of BU.

येनैव वर्त्मना यातः पुनस्तेनैव वर्त्मना ।
याति मात्राः समादाय कर्मवायुसमीरितः ॥९९७॥

By whichever way it had gone, it goes back by that very way among (them), after having taken (or, picked) up the impressions, impelled (or, urged) onwards as it is by the wind in the form of activity.¹ [997]

This is the meaning of the sentence according as it is read in the Kāṇva recension of BU.

Read SP: *svapnagativartma karmādīty etat prakāṣayitum gaṇ-
am viśinaṣṭi karmeti.*

स आत्मा पुण्यपापोत्थं फलं नानाप्रभेदकम् ।
तत्र स्वप्नविधौ तिष्ठन्पश्यतीह समीक्षते ॥९९८॥

That Ātman, staying (lit. standing) there, i.e. in the activity of the dream state, sees the result arising out of merit and demerit and which has numerous different objects in it. (So also) does it see here (i.e. in the waking state).¹ [998]

This is the meaning of *sa yat tatra*

punya-pāpottham phalam nānāprabhedakam is implied after *ikṣate*; cf. verse 1000 below. The word *iha* means *jāgradvidhi* in contrast with *svapnavidhi*.

नैनं स्थानान्तरं प्राप्तं ग्रामाद्ग्रामान्तरं यथा ।

शुभाशुभं यदद्राक्षीत्तत्साक्षादनुगच्छति ॥९९९॥

Whatever auspicious and/or inauspicious (this Ātman) saw (in the dream state),¹ does not actually follow (it) when it has gone to another state (viz. the waking state), as that (auspicious and/or inauspicious) follows a person (who goes) from one village (or town) to another. [999]

This is the explanation of *ananvāgatas tena*.

¹This is under the influence of *svapnavidhi*, i.e. *svapna* which the preceding verse has referred to.

शुभाशुभक्रियैवेह पश्यतीत्यभिधीयते ।
न तु यद्वास्तवं वृत्तं पश्यतीत्यक्रियात्मनः ॥१०००॥

It is said, (the Ātman) sees here¹ just the auspicious and/or inauspicious (activity and /or its result)— but it does not see² what is the real state (*vṛtta*)³ of the non-active (Ātman). [1000]

¹This refers to both the states which involve activity arising out of ignorance.

²This is not the 'seeing' by the immutable Ātman.

³This is from the verb root *vṛt* 'to be', and means '(actual) being' which signifies its form (*rūpa*), as SP points out.

Verses 1001 and 1002 state the reason for holding irrelevance of the *ananvāgatatva* which is enunciated.

तेनानन्वागत इतिप्रतिज्ञातार्थसिद्धये ।
असङ्गो हीति हेतूक्तिः प्रतिज्ञार्थोऽथवा भवेत् ॥१००१॥

The sentence *asaṅgo hi* is the statement of the reason for proving the matter which is enunciated, viz. *tenānanvāgatah* Or, it could be the thing enunciated (itself).¹ [1001]

¹This is said with a view to reversing the relation between

the two sentences, that are relevant here. And this becomes clear from the next verse.

यदैवं पूर्वमेव स्यात्तदा हेतुवचः स्फुटम् ।
तेनानन्वागत इति प्राक्कृतेनैव कर्मणा ॥१००२॥

(And) when it is (taken) like this,¹ then the earlier sentence of the Śruti would be the clear statement of the reason, viz. *tenānanvāgataḥ*; (this is) because of the action done earlier.²

[1002]

¹This is as was said at the end of the preceding verse in 'Or, ... itself'.

²This is to refer to the dream state.

Verses 1003-1005 state the view that *asaṅgatva* is *pratijñā* 'enunciation' and *ananvāgatatva*, the *hetu* 'reason'.

सासङ्गत्वं समाशङ्क्य प्रवृत्तैषा यतः श्रुतिः ।
अनन्वागत इत्यस्य हेतुत्वं हिगिरोच्यते ॥१००३॥

Since this Śruti sentence (*sa vā eṣa etasmin samprasādaḥ* ...) proceeds on the basis of (lit. after having entertained) the doubt about (the Ātman's) being attached (to desire etc.); therefore, the nature of the sentence *tenānanvāgataḥ* as the reason is expressed by the word *hi*.

[1003]

This is to justify the view expressed in the preceding verse. SP has elaborated on the details involved in the argument of this verse.

न कर्म कुरुते स्वप्ने कारकाणामसंभवात् ।
फलमात्रमयं तत्र भुङ्क्ते स्वाभासवर्त्मना ॥१००४॥

In the dream state (the Ātman) does not perform any activity, on account of the absence of any *kāraḥ* 'objects related

to any activity'; only the result does (this one) enjoy there, being in the form of its own semblance. [1004]

न हि निष्पद्यते स्वप्ने क्रिया जागरिते यथा ।
कर्त्रादिकारकस्थाने नातोऽन्वेत्यक्रियात्मनः ॥१००५॥

(It means:) Because, in the dream state, any activity there does not come to any effect (i.e. is not performed) as in the waking state, which is the abode of (or, place for) what are *kāraṅkas* 'related to activity'; there does not continue to exist (lit. follow), in the case of (the Ātman) who is not of the nature of performing any activity. [1005]

Verses 1006-1009 state that the Śāstra begins with the idea of its non-relation to (any) activity in the dream state.

यदि स्थानान्तरं प्राप्तमन्वियात्स्वप्नजा क्रिया ।
शास्त्रारम्भो वृथैव स्यात्स्वप्ने को नापराध्यति ॥१००६॥

If activity, which belonged to the dream state, followed in (lit. goes to) the other state,¹ then the purpose (lit. activity) of scripture would be futile; who (indeed) does not falter² (lit. commit an offence) in the dream state. [1006]

¹That is, state of waking, for example.

²That means 'who is not under the influence of ignorance?' This is offence against the immutable action! Further, cf. the word *vibhrama* in the next verse. Yet, SP understands 'who does not commit offences which render him ineligible for actions prescribed in scripture?', we wonder if that is *really* meant.

अपेतसाधनस्यापि पश्यतः स्वप्नविभ्रमम् ।
बिभर्ति वासनैवास्य क्रियाकारकरूपताम् ॥१००७॥

In the case of a person, who sees the error¹ (caused) in the dream, while all instruments (of activity) have departed

(or, gone away) from him, it is only impression (of the earlier experience or activity) that assumes the form of activity and its related objects. [1007]

¹The word *vibhrama* 'error' conveys the idea of the influence (or, effect) of ignorance. This, we think, justifies our understanding of *ko nāparādhyati* in the preceding verse.

फलसंभोगमात्रं च यस्मात्स्वप्ने समीक्ष्यते ।
फलान्तरारम्भविधिर्नातः स्यादक्रियात्मनः ॥१००८॥

Since there is noticed in the dream state enjoyment of the results (of activity); there is not (seen) any understanding or acceptance of an activity for other result(s), on the part of the non-active (Ātman). [1008]

Cf. the comment of SP: *pratītyatiriktam svapne sukhādi nīṣkriyasyātmano na sidhyatīty arthaḥ*.

न करोति यतः स्वप्ने क्रियामिव समीक्ष्यते ।
प्रक्रियाफलसंयोगो नातो बोधेऽस्य वीक्ष्यते ॥१००९॥

Since (the Ātman of the dreamer) does not perform any activity (but) sees that activity, as if it were, (performed), therefore, it is noticed that there is not any of this Ātman's relation to (or connection with) the result of what (seemed to have) had begun. [1009]

Verses 1010-1013 state yet another reason for holding falsehood of the activity in the dream state.

तृप्तः स्वप्नेऽथ संबुद्धः क्षुत्परीतः प्रबुध्यते ॥१०१०॥
यस्मादनृतमेवेदं यत्किञ्चिदिह वीक्ष्यते ।
प्रत्यङ्ङकारकस्तस्माल्लिप्यते न क्रियाफलैः ॥१०११॥

And (also) (*atha*) one, who is in the dream stated satisfied,¹

is known to have become awake, hunger-stricken (or, over-powered by hunger), [1010]

since this is so, viz. whichever is seen here (i.e. in the dream state), is false, therefore, the inner self which is not an agent (lit. a *kāraka* 'related to activity'), is not affected by (lit. smeared with) the results of activity. [1011]

स्वप्नस्कन्ननिमित्तं तु प्रायश्चित्तं यदुच्यते ।
सत्येन्द्रियविकारत्वात्तच्चापि न निराश्रयम् ॥१०१२॥

And (*tu*) what is prescribed (lit. stated) as an expiation occasioned by (a person's) emitting semen in the dream state¹ is also not without a cause (lit. basis) for it, since that has the nature of being some deviation (from the normal state) of a real² organ. [1012]

¹In this connection, SP cites the following:

*svapne ced indriyadaurbalyāt striyaṃ drṣtvā kṣared yadi /
prāyaścittaṃ tu tasyoktam prāṇāyāmās tu ṣoḍaśa //*
(*Vāyupurāṇa* 1.18.14; *Līṅgapurāṇa* 1.90.17)

²The word 'real' does not refer to philosophical real, but to what is considered to be so in usual life.

स्वप्नस्कन्नं यथा स्वप्ने तथा बोधेऽपि वीक्ष्यते ।
आत्मचैतन्यवत्तस्मात्प्रायश्चित्तं तदुद्भवम् ॥१०१३॥

As emitting semen is noticed (as occurring) in the dream state, so is it noticed in the waking state also, like the sentient. *Ātman* (in a person);¹ therefore, there is (prescribed for it) an expiation caused for (or, arising from) it. [1013]

¹The word *ātmacaitanya* could be translated alternatively as 'one's own sentience'. That is to say, the word *ātman* is to be (or, can be) taken as a reflexive pronoun. The idea seems to be like this: Be it the dream state or the waking state, one's sentience has always remained in one; so does remain the

expiation for emitting semen, in both of the two states.

एका तावदियं व्याख्या यथोक्तैषोपवर्णिता ।
व्याचक्षतेऽन्यथा चेदं वाक्यमेतद्यथोदितम् ॥१०१४॥

So far (*tāvat*) is given one interpretation (of the sentence *ananvāgataḥ* ...) as was stated by (Śaṅkara in BUB). And yet (*ca*) there are some others,¹ who explain this sentence in a manner which is like this one, already stated.² [1014]

¹SP mentions the other scholar to be Bhartṛprapañca.

²This suggests Sureśvara's approval of the other view.

Verses 1015-1020 present the explanation as given by Bhartr-prapañca.

अनन्वागतवाक्येन विवेकः कर्मणः कृतः ।
असङ्गवचसा त्वस्य कामनिर्मोक उच्यते ॥१०१५॥

(Thus) there is distinction established (lit. made) of an activity (from the Ātman). And (*tu*) by the statement (about its being) unattached is pointed out this one's release (or, freedom) from desire. [1015]

This verse points out the purport of the two sentences *ananvāgataḥ* ... and *asaṅgaḥ* ... It may be noted that *karmaviveka* is ancillary of *mokṣajñāna*.

ननु नैव क्रिया साक्षाद्भानवृद्धी प्रतीष्यते ।
अपि जागरितस्थाने कामो हेतुर्यतस्तयोः ॥१०१६॥

But, indeed, (one might argue), '(In the dream state), activity is not considered to be responsible (or, cause) for the direct abandoning or entertaining (desire); for, in the waking state also, desire is the cause of the two'. [1016]

SP cites an opinion on this: (*yathāhuh*) *jāgaritadeśe 'py upacayāpacaye na kriyaiva hetuḥ, kiṃ tarhi, kāmo hetur (iti)*—possibly a statement of the objector's view by Bhartṛprapañca. A refutation of this is given by him in the manner stated in the next verse.

अकामस्य क्रिया यस्मान्निष्फलैव समीक्ष्यते ।
स यथाकाम इत्यादि तथा चोद्धर्षं प्रवक्ष्यते ।
इत्यस्य परिहारार्थमसङ्गो हीति भण्यते ॥१०१७॥

‘(That should not be so understood) because, in the case of the desireless (Ātman), activity is looked upon only as unproductive of (i.e. not producing) any result. So also will this be stated later, viz. *sa yathākāmaḥ* This is (stated here) for the refutation (of the above objection); (indeed) it is said *asaṅgo hi*’ [1017]

The purport of the answer is: The Ātman does not have any desire at all.

यमासङ्गमिह स्वप्ने कामं त्वमनुपश्यसि ।
स्वपतो न भवेत्काम इत्येतदभिधीयते ॥१०१८॥
असङ्गो हीति वाक्येन तद्वतोऽसंभवादिह ।
ग्रस्तमत्र मनः कामि वासनामात्रशेषतः ॥१०१९॥

This is said here: That desire will not be one entertained by the sleeping (Ātman): the attachment, which you see here, i.e. in the dream state, as desire; [1018]

since, there is impossibility here of its being here in one with that (desire), as (conveyed) by the sentence *asaṅgo hi* It is *manas* that has a desire, affected (lit. swallowed up) as it is by the remainder only of (or, in) impression (of objects). [1019]

यतोऽतोऽसङ्ग एवायं पुरुषः स्वप्नभूमिगः ।
बहिः कुलायादित्युक्तं पाप्मनो विजहाति च ॥१०२०॥

Since this Puruṣa (i.e. the individual self) in the dream state is only unattached to this (*ataḥ*, with reference to desire) and it is (already) said (about it) *bahiḥ kulāyāt* '(it is) outside the nest'.¹ (Also) further, *pāpmano vijahāti*, 'it gives up sins'.²

[1020]

¹Cf. BU 4.3.12.

²Cf. BU 4.3.8.

In verses 1021-1024, it is pointed out: (In the dream state) it is *manas* that becomes modified as the objects and therefore there is no desire on the part of it.

देहाश्रयादृते कामाः सन्ति नान्यत्र कुत्रचित् ।
स्वप्नप्रपञ्चः सर्वोऽपि वासनामात्रमेव तु ॥१०२१॥

Desires do not exist without the shelter of a body and not at all elsewhere; all this (extensive) world of the dream state is indeed (*tu*) the impressions (of objects therein) only. [1021]

SP supports this, citing (probably from *Bhārṭṛprapañca*) thus: (*yathāhuh*) *śarīrasambandhinaś ca kāmā mṛtyo rūpāṇi pravibhaktas cāyam śarīreṇa bhavati (iti)*.

व्याचक्षाणो यतः स्वप्नं ज्ञानमात्रं प्रभाषते ॥१०२२॥
जाने पत्रायुतं जातं जाने पितरमागतम् ।
तथा चैवर्गिरा युक्तान्स्वप्नान्व्याचक्षते जनाः ॥१०२३॥

Since, explaining (the nature of) the dream state (and the world in it), he (i.e. Yājñavalkya) talks merely (about) knowledge (of the Ātman); [1022]

(thus:) 'I know about ten thousand of sons' and also, 'I know about the father who has come'. So also, by similar words (*tathā caiva*) do the people speak about dreams. [1023]

रथादेरसतो यद्वत्स्वप्ने निर्माणमीक्ष्यते ।
शरीरेन्द्रियकामादेरसतस्तद्वदेव तु ॥१०२४॥

As one sees, in the dream state, the creation of a non-existing chariot etc.¹; so also (does one see the creation of) the non-existing body, organs (in the same) and desire etc.² [1024]

SP quotes (apparently from Bhartṛprapañca) thus: (*yathāhuh*) *yathaiva rathādīnām asatām nirmāṇam bāhyānām tathā śarīreन्द्रियānām cāntarānām (iti).*

¹This refers to other external objects.

²The activity and its result connected with every one of them is intended.

Verse 1025 affirm that the desire (created) in the dream state is also false.

रथेन्द्रियादिवत्तस्मात्कामोऽप्यत्र समीक्ष्यताम् ।
स्वप्नेऽतोऽयं निरासङ्गः पुमानभ्युपगम्यताम् ॥१०२५॥

Let this be known (or, considered, lit. seen) that desire here, i.e. in the dream state also, is (false), like a chariot, organs etc.;¹ therefore, let this Puruṣa be understood as having no attachment (whatsoever). [1025]

This is to state the result from the falsity in *kāma*. In support, SP quotes thus: (*uktaṁ hi*) *yahtaiva sarvasyāsato vinirmāṇam asato darśanam evam asyāpi śarīrendriyapakṣabhūṭasyāsato darśanam (iti).*

¹Namely, products of imagination.

Verses 1026-1029 state yet another meaning of the word *asaṅga*.

कौटस्थ्यं यदि वा पुंसोऽसङ्गशब्देन भण्यते ।
क्रियाश्लेषमृते यस्मान्नाद्यक्षफलसंगतिः ॥१०२६॥

Or rather (*yadi vā*), the immutability of the Puruṣa is thus expressed by the word *asaṅga* 'unattached'; since, without association to (or, connection with) activity, there can be no conjunction of the witness (or, seer—*adhyakṣa*) with the result.¹ [1026]

¹SP states: (*uktaṃ ca*) *śuddho 'yam puruṣaḥ (iti)*.

ननु कर्ता पुमानेष स हि कर्तेतिवाक्यतः ।
नैवं स्वप्ने यतः पुंसः कर्तृत्वं भावनाकृतम् ॥१०२७॥

(One would object:) 'But, indeed, this individual self is the agent (of activity), on the basis of the sentence *sa hi kartā*'. (The answer is:) 'No, it is not so, since agentship (of the activity) in the individual self is produced by impressions (of the external objects)'. [1027]

कर्तृकार्यावभासित्वाज्जाग्रत्कालेऽपि चात्मनः ।
कर्तृत्वं न स्वतः स्वप्ने किमु वक्तव्यमिष्यते ॥१०२८॥

Even in the waking state, there is no agentship of the (individual) Ātman (of an activity) in its own right, since the agent and the activity (both) are (only) apparent (i.e. false). What then could be said as regard dream state? [1028]

अविद्यास्रोतसैवास्य क्रियाकारकतात्मनः ।
तत्स्थचैतन्यबिम्बेन भुङ्क्तेऽसौ कर्मणः फलम् ॥१०२९॥

This (individual) has the nature of being (both) the activity and its means only through the stream (i.e. force/influence) of ignorance. It enjoys (or, experiences) the result of (the) activity only by the reflection of sentience in it (viz. ignorance).¹ [1029]

¹SP explains this succinctly thus: *na hi tadasyakriyāphala-ākṣitvātiriktaṃ kriyāpekṣam astīty arthaḥ*.

Verses 1030-1044 affirm that the nature of (the Ātman as) the agent is also belonging to the earlier period of the waking state.

कर्त्रादिसाक्षिणोऽस्याभूत्कर्तृत्वं यत्पुरात्मनः ।
स हि कर्तेति तस्यैव वचनं स्यात्पुनःश्रुतिः ॥१०३०॥

In the (sentence of the Śruti) *sa hi kartā*, (there is mention made of) the Ātman, the witness of the agent etc. as, being the agent of activity, in the earlier¹ (state) and there would itself be a mention made again (*punah*)² in the Śruti (statement). [1030]

¹This is to refer to the waking state.

²This excludes the reference to the dream state.

नन्वस्यैव तु तत्कर्म भावनापेक्षयाखिलम् ।
प्रवर्तते कथं तस्य कर्तृत्वं विनिवार्यते ॥१०३१॥

(An objector asks:) 'But, indeed, that entire activity proceeds only from this one, through dependence on the impressions (of external objects); how is then rejected its being the agent of activity?' [1031]

This argument proceeds from the notion of *arthāpatti* 'contingency' *sarvam api karma kāmāpekṣayātmanah sukhādi dātum pravartate, na ca phalam akartṛstham muktiṃ vinā siddhyati, 'śāstraphalam prayoktari' tallakṣaṇād iti nyāyāt ...* (SP).

कामं प्रवर्ततां कर्म न च दोषोऽत्र कश्चन ।
भावेनेयं यतः कर्मगुण एव सती सदा ।
स्वसाक्षिणं भावयन्तौ न त्वसावात्मनो गुणः ॥१०३२॥

(The answer:) 'Well,, let there be (lit. proceed) activity, but (*ca*) there is no difficulty (lit. fault) in this (happening), since this impression (of the external objects) itself, being subordinate

to (or, helpful to—lit. a property of) activity, ever brings about (the notion (or being) of) its witness—but that is not (really) the property of the Ātman'. [1032]

SP supports this, citing (the opinion/remark probably of Bhartṛprapañca): (*yathāhuh*) *bhāvanā hi karmaguṇa eva satī lpayatīty arthah*.

पुष्पगन्धः पुटस्थोऽपि पुष्पस्यैव यथा तथा ।
बुद्ध्यादिकारकस्थस्य भावना कर्मणो गुणः ।
आत्मनस्तूपचारात्स्यान्न तु साक्षाद्गुणो भवेत् ॥१०३३॥

'As the fragrance of a flower, which is abiding even in its calyx, belongs only to the flower, so is the impression (of external objects) a property of activity which is abiding in the *kāraka* 'instrument of activity' such as the intellect etc. It would be (described as) of the Ātman, (only) metaphorically, but not of it (which is) actually (perceptible *sākṣāt*).' [1033]

SP clarifies the example, citing (*uktaṃ hi*) *yathā puspagandhaḥ puṭam bhāvayati, sa puspaguṇa eva na puṭaguṇa, evam bhāvanā karmaguṇa eva nātmaguṇaḥ (iti)*. Also, with reference to the 1st line, SP appears to quote from Bhartṛprapañca: (*yathāhuh*) *bhāvanānuranjite vijñānātmavijñāne kartrtvopacārah (iti)*.

उत्पत्तौ भोगकाले च कर्मादायैव भावनाम् ।
स्वात्मानं लभते यस्मात्तां विना तदनर्थकम् ॥१०३४॥

'Since activity, whether at (the time of its) origination or at the time of its enjoyment (i.e. being enjoyed), comes into being only after taking (the support of) the impression (of the external objects), therefore, it would be meaningless (if it is) without the same. [1034]

SP supports this argument, quoting: (*uktaṃ ca*) *tām evānuranjanām kartrtvenāṅgīkurute karmotpattibhogālayoh (iti)*.

कर्मणोऽपि तथात्यन्तं प्रयोगैकसमाश्रयात् ॥१०३५॥
 बुद्ध्याद्यर्थाभिसंबन्धपक्षतैवावसीयते ।
 न त्वात्मगुणता तस्य कर्मणः स्यात्कदा चन ॥१०३६॥

Further, in respect of activity also, necessarily through being supported (i.e. caused) only through the employment (of them), [1035]

there can certainly be decided the participation of its close association (or, connection) with the intellect and other objects—but never can that activity be of the nature of the Ātman's property. [1036]

SP supports the argument, citing (*tad uktam*) *karmaṇo 'py antam prayogāśritatvād buddhyādisaṃnikarṣapakṣataiva na kadācanātmagunatā (iti)*.

प्रयोगापेक्षमेवास्ते कर्म बुद्ध्यादिसंक्षये ॥१०३७॥
 स्वात्मनः प्रतिलाभाय न त्वात्मानमपेक्षते ।
 सभावनमतः कर्म प्रतीचः प्रविविच्यते ॥१०३८॥

After the intellect etc. have perished,¹ activity remains (i.e. continues to be) only as dependent on the employment (of the same)² [1037]

and (*tu*), it does not depend on the Ātman, in order that it comes into being (lit. it occurs).³ Therefore, being associated with the impression (of the external objects) is the activity distinguished from the inner self. [1038]

¹What is meant is: there is not absolute perishing of the intellect etc.; they continue to exist only in their subtle forms—their gross forms are completely obscured/lost. SP supports this, citing (*uktam hi*) *buddhyādikṣaye 'pi karma prayogāpekṣam evāste svātmalābhāya nātmānam apekṣate (iti)*.

²Activity does require the help of *kāraṇas*, which are required to continue to exist (at last), in their subtle forms—the

employment of these becomes then helpful in the activity of the yonder world.

³In *svātmalābha*, the word *ātman* is a reflexive pronoun. Therefore, *svātmalābha* is the same as *svarūpalābha*.

तस्मात्कर्मगुणस्यैव कर्मस्थस्यैव सर्वदा ।
साक्ष्यात्मा भावनारूपकामस्य स्वप्नसद्गति ॥१०३९॥

Therefore, in its abode (or, state) of the dream, the individual self (i.e. the *Ātman*) is ever the witness of only what is subordinate¹ to activity (and) which exists only in activity.

[1039]

SP supports this (apparently with the remark of Bhartr-
prapañca) thus: (*tad āhuḥ*) *tasmād ayaṁ etasmin svapne
karmaguṇasyaivāsaṅgasya karmasthasya draṣṭā pravivikta ātmā
nirāsaṅgaḥ (iti)*.

¹Cf. *karmaguṇa* mentioned in verse 1032 above. It refers to the *bhāvanā* 'impression (of the external objects)' which belongs only to the activity (*karman*).

आसङ्ग आत्मनश्चेत्स्यात्साक्षाच्चैतन्यवद्गुणः ।
न पश्येदात्मवत्कामं कर्मस्थं स्वप्रबोधयोः ॥१०४०॥

If attachment were a property of the individual self, in the same way as sentience (which is) actually (perceptible), then it would not (i.e. would not be able to) see the desire related to (lit. residing in) activity, in (i.e. during the time of) the states of dream and of waking, as (it does not see) the *Ātman*.¹

[1040]

¹Cf. the use of the suffix *-vat* (in *ātmavat*) which is in accordance with Pāṇini 5.1.115: *tena tulyaṁ kriyā ced vatih*.

एवं चावस्थिते पक्षे श्रुत्याकारि समञ्जसम् ।
प्रसिद्धवदुपादानमसङ्गो हीति सादरम् ॥१०४१॥

When the point under discussion remained (in the condition) thus, the Śruti respectfully¹ adopted a clear (lit. smooth, for understanding) use of the words *asaṅgo hi*, as some well-known use.²

[1041]

¹The actual purport of *sādaram* is not clear to us. However SP introduces it with the remark: *abhyāsaṁ tātparyalīṅgaṁ dyotayati*.

²The idea of similarity, at the basis of this use *prasiddhavat*, still demands clarity.

न कर्मोपचयोऽतोऽत्र स्वप्ने जाग्रद्वदिष्यते ।
सर्वासङ्गविनिर्मोकाद्वासनामात्रशेषतः ॥१०४२॥

Therefore, owing to the complete release from all attachment and the remainder in the form of only the impression (of the external objects),¹ there is not accepted (or, understood) here, i.e. in the dream state, accumulation of activity, as in the waking state.²

[1042]

¹SP supports the argument in this verse, citing (*uktaṁ ca*) *yasmāc cāsaṅgo 'to na karmopacayaḥ svapnaḥ (iti)*.

²This shows the distinction of the waking state from the dream state.

नायं कर्ममयो यस्मान्न च काममयः स्वतः ।
प्रत्यगज्ञानतस्तस्मात्तन्मयत्वमिवेक्ष्यते ॥१०४३॥

Since this one (viz. the inner self, the Ātman) is not connected with (or, made up of) activity, it is not, on its own, full of (or, connected with) desire also. Therefore, it is understood (lit. seen) due to the ignorance that the inner self is, as it were, full of (or, connected with) that (viz. activity and/or desire).

[1043]

नानासाधनसंबन्धात्कर्तृत्वं जगतीक्ष्यते ।

अयं त्वसङ्गो येनातो न करोति न लिप्यते ॥१०४४॥

Agency (of some activity) is understood, in this world, on account of his connection/association with (or, relation to) numerous (lit. varied) instruments (of that activity). But, since this one (viz. the inner self) is unattached (to any of them), it neither does any activity, nor is it affected by (lit. smeared with the same).. [1044]

Verse 1045 states that the inner self, which is not attached to anything is both immutable and just single (i.e. without any second).

मूर्तामूर्ताद्यपह्नुत्या ह्यात्मनस्तत्त्वमब्रवीत् ।

नातोऽनात्माभिसंबन्धः कूटस्थैकात्म्यहेतुतः ॥१०४५॥

(The Śruti) has described (or declared) the true nature of that (sentience) by the rejection of its being either gross or subtle in form.¹ Therefore, for the reason of being immutable and (just) single, it has not any connection whatsoever with any non-Ātman. [1045]

Now, there is here reference to the stage of deep sleep; it continues in three verses which express the objection. The word *śuṣupta* means, in this context, *śuṣupta* 'the deep sleep state'.

¹SP points to *neti neti* (BU 3.9.26), in particular, and *asthūlam* (BU 3.8.8).

Verse 1046 points out to the question connected with *samprasāde* .
atvā caritvā

सुषुप्ते नन्वसंबोधाद्रत्वादि कथमुच्यते ।

न त्वित्यपि तथा वाक्यं न बाह्यं चेति वक्ष्यति ॥१०४६॥

(An objection:) 'But, indeed, in the deep sleep state, there

is not any awakening (to the external objects), how then (has the Śruti made the statement) *ratvā* etc.?'¹ (The answer:) 'So also, there is a statement (in the Śruti), viz. *na tu ...*,¹ and also it will state *na bāhiyam*'² [1046]

¹BU 4.3.23 and 30.

²BU 4.3.21.

Verses 1047-1048 point out a counterquestion: there is no *asaṅgatva* in the dream state.

स्वप्ने रत्वाद्यथ मतं नैवमप्युपपद्यते ।

अनन्वागतगीः कुप्येत्स्वप्नेऽन्वेत्येव तत्कृतम् ॥१०४७॥

If it is held that (the statement) *ratvā ...* (is held as true), then also, it is not to be accepted as tenable, since, otherwise the statement (or, the word) *ananvāgata* would be opposed (lit. get agitated)—in dread also it does follow what is done.¹

[1047]

¹SP brings out this argument thus: *svapne ratyādi* (cf. v.l. *ratvādi*— better!) *drṣṭam cet sa yat tatretyādi virudhyeta tatra kṛtasya taddraṣṭṛgāmitvād ity arthaḥ*.

यथा जाग्रत्कृतं कर्म कर्तारमनुगच्छति ।

जाग्रत्स्थं स्वप्नकर्मैवं स्वप्ने समधिगच्छति ॥१०४८॥

As the activity, which is done (by one) in the waking state, follows (or, accompanies, lit. goes together with) its agent (in/of state); so does the activity which is done in the dream state goes together with (the agent) in that state. [1048]

We think, this verse explains what is said in the preceding verse in *svapne 'nvety eva tat kṛtam*.

Verse 1049 explains away this said fault—one opinion of some.

इत्येवं चोदिते केचित्परिहारं प्रचक्षते ।

पदच्छेदेन कुशला अरत्वेत्येवमादिना ॥१०४९॥

When there is such a question asked, some clever persons answer: ¹ 'By the break-up of the words in the Samdhi thus: *aratvā* etc.' ² (this can be answered away). [1049]

¹This is an answer, according to some fellow Vedāntins. Yet it does not meet with Sureśvara's approval, as is clear from the next verse.

²Read, according to these, one should read: *samprasāde aratvā*. SP adds *acaritvā, adrṣtvā ... iti nañanvayapadacchedena vākye yākyāyamāne nāvadyam* [Add: *śrutivākyam* or *asmanmatam*].

Verse 1050 states Sureśvara's seeing a fault in the preceding view.

स यत्तत्रेत्यसङ्गोक्तेर्नेदमप्युत्तरं भवेत् ।

दृष्टिं तत्रापि चाद्यस्य परिहारं प्रचक्षते ॥१०५०॥

But, this also is not (or, would not be) an answer, ¹ since there is (soon to follow) the statement (of the Śruti) *sa yat tatra ...* and which tells about the nature of the Ātman's being unattached (to any desire or activity). (And therefore) the others ² also state their refutation (of the view under dispute) by having (accepted) the superimposition of seeing (there also). ³ [1050]

¹This is Sureśvara's mild disapproval of the explanation stated in the preceding verse.

²The other Vedāntin—these are acceptable to Sureśvara.

³That is, in deep sleep.

verses 1051 states that the dream state etc. are also (the results of) superimposition (*drṣṭi*).

अस्ति भोगः सुषुप्तेऽपि तथा चानन्दभुङ्मतः ।

ऐश्वरो वात्र भोगोऽस्ति सर्वस्थानाभिमानतः ॥१०५१॥

In the deep sleep state also, there is enjoyment, (for) in that sense (of an enjoyer) is the Ātman understood as the experiencer of joy (or, happiness).¹ Or, this experience may be belonging to the Lord,² on account of its identifying (itself with one belonging to all the states) [1051]

¹Cf. *ānandabhuk tathā prājñah* (Gaudapādakārikā 1.3, with reference to Māṇḍūkyaopaniṣad 5).

²Cf. *īśānah prabhuh* ... (Gaudapādakārikā 1.10, with reference to Māṇḍūkyaopaniṣad 6).

Verse 1052 is the statement of yet another notion about *susuptih*

कार्यभूमिगतो ह्यात्मा सुषुप्तं प्रसमीक्षते ।

कार्यस्य कारणव्याप्तेर्न सुषुप्तपरोक्षता ॥१०५२॥

Indeed, the individual self (the Ātman), which has been abiding in (some) stage (of the nature) of (a certain) effect, experiences (lit. sees) the state of deep sleep. (And), since the effect is (ever) pervaded by its cause; therefore, the deep sleep state does not have the nature of being imperceptible. [1052]

The objection is based on the acceptance of a person's becoming awake or dreaming as connected with deep sleep; in other words, the former are the effects of the latter. And, since a cause and its effect(s) have the same properties, the deep sleep state also must be like the state of waking and the dream state is perceptible. For yet more details, reads SP with profit.

In verse 1053, Sureśvara states his decision in this regard.

यदि वा स्वप्न एवास्तु रत्वादि यदुदीरितम् ।
स्वप्नयोरभितः प्राज्ञादनन्वागतताप्यतः ॥१०५३॥

Or rather, let *ratvā* etc., which is mentioned, be in (connection with) the dream state alone; on account of *Prājña*.¹ With the dream state on both the sides,² the (individual self's) nature of not being followed (by desire and activity) is also (justified) thereby. [1053]

Cf. SP for elaborate details.

¹This indicates the deep sleep state.

²That is, both before and after the state of deep sleep.

Verses 1054-1062 state the conclusion of the three states from the deep sleep of the individual self as stated in *samprasāde ratvā*

त्रिधा त्रिधा वा क्लृप्तेः स्यादेकैकस्येत्यदोषता ।
जाग्रत्स्वप्नसुषुप्तानां जाग्रत्स्वप्नसुषुप्ततः ॥१०५४॥

Or, there could be the absence of blemish in (holding) *ratvā* ... in relation to the deep sleep state, by dividing in threefold (nature of) each one of the states of waking, dream and deep sleep, on account (of the existence) of (one in deep sleep) in the states of waking, dream and deep sleep. [1054]

In verses 1055 and 1056 Sureśvara explains the threefold division of *jāgrat*; in 1057-1059, of *svapna* and finally in 1059, of *susupta*.

कार्याकार्यादि यत्साक्षात्प्रमाणात्प्रसमीक्षते ।
जाग्रज्जागरितं तादृकतत्स्वप्नो यन्मृषेक्षणम् ॥१०५५॥
कामादिविषयासक्तेर्न किञ्चिद्विविनक्ति यत् ।
जाग्रत्सुषुप्तं तादृकस्यान्निर्विवेकस्वभावतः ॥१०५६॥

The waking state of (the individual self) is of that sort when

it sees, by means of direct perception, what is to be done and what not etc.;¹ the dream state (of the same)² is (also) similar, viz. false (i.e. unreal). [1055]

Owing to its attachment to such objects as desire; and that sort of state wherein (it) does not (i.e. cannot), in any way, ascertain (the nature of objects), is the state of deep sleep of (the individual) in the waking state—this, on account of its nature of being devoid of (any capacity for) ascertaining.

[1056]

This is division of the waking state into three states, as intended in verse 1054 above.

¹This is to refer to *bhaksya*, *abhaksya* and so on.

²That is, in the waking state.

सुप्तोऽपि कर्म कुरुते नरः स्वप्ने प्रबोधवत् ।
 स्वप्नजाग्रत्तथारूपं स्वप्नः स्वप्नात्मकोऽत्र यः ॥१०५७॥
 दृष्ट्वापि यत्समाख्यातुं प्रबुद्धो नैव शक्नुयात् ।
 तादृक्स्वप्नसुषुप्तं स्यात्सुषुप्तं च त्रिधोच्यते ॥१०५८॥
 सुषुप्तजाग्रन्मूढः स्याच्छान्तोऽसौ स्वप्न उच्यते ।
 ऐकात्म्यतत्त्वासंबोधः सुषुप्तः प्राज्ञ उच्यते ॥१०५९॥

In the dream state, the individual self, though in sleep, does activity as in the waking state—that nature is the waking state of the dream state; and the dream (in this) is what is of the nature of a dream (i.e. being related to the false objects);

[1057]

and, the deep sleep state is of that sort when, after waking up (in the dream itself), it is unable to tell what it had seen; further, the deep sleep state also is described as threefold:

[1058]

the awakened person in the state of deep sleep is (lit. would be) ignorant (fully); it is said to be dreaming while it is pacified and, with no knowledge of its nature of singleness; it is said to be Prājña of the dream state.

[1059]

त्रिविधत्वात्सुषुप्तस्य सर्वं रत्वादि युज्यते ।
दृष्टान्तः संप्रसादो वा स्वप्नजाग्रदवस्थयोः ॥१०६०॥

In view of (this) threefold nature of the deep sleep state (then), all (of the statement), viz. *ratvā* ... is reasonable (as connected with it). Or, (the state of deep sleep) yielding complete happiness is an example for (distinguishing it from) the dream and the waking states. [1060]

Translation of the second line of this verse has in view the next verse.

यथा रत्वाद्यसंभाव्यं संप्रसादे तथैव च ।
इतरत्रापि विज्ञेयं तत्र वस्त्वसमीक्षणात् ॥१०६१॥

As *ratvā* ... is not possible in the case of the state of (deep sleep, i.e. in) experiencing complete happiness, so is it to be accepted elsewhere as well, because of (the individual self's) not seeing the thing (i.e. reality).¹ [1061]

¹SP indicates a variant reading in the second line: *tattva-amīkṣaṇāt*; but that does not seem to make any material difference. Also, there is no manuscript evidence showing such variant reading in the Kārikā proper!

यत एवमतः कर्मकामदोषविवर्जितः ।
पुरुषोऽयं स्वतः सिद्धो यथोक्तेनैव वर्त्मना ॥१०६२॥

Since this is so, therefore, this (individual self, viz. Puruṣa) is established as devoid of the blemishes, viz. activity, desire etc., in the manner stated.¹ [1062]

¹This is to state: as was shown earlier by pointing out how desire is subordinate to activity, that activity was dependent on the employment of the *kāraṇas* 'means of activity' etc.

Now follows in verses 1063-1080 an objection to *asaṅgatva* being considered as the cause/reason (in verse 1063) and also discussion on BU 4.3.16 and 17.

असङ्गत्वादकर्तेति नन्वसिद्धोऽयमुच्यते ।

स्वप्ने कामस्य दृष्टत्वाद्यत्र काममिति श्रुतेः ॥१०६३॥

(A doubt:) 'But, indeed, the statement of the reason: viz. the individual self is a non-agent, since it has no attachment, is not (properly) proved (or, stated); and that because it is understood from the Śruti statement *yatra kāmam* ... there is desire noticed in the dream state. [1063]

इत्यस्य परिहारार्थं स वा इत्यादिकं वचः ।

पुनः स्वप्नसमारम्भो गतत्वात्किमितीर्यते ।

बुद्धान्तादेर्यथा तद्वन्नातः स्यात्पुनरुक्तता ॥१०६४॥

For the refutation of this¹ (which is just stated) 'Thus, there is the statement (in the Śruti) *sa vā* ...'.² On this, one would yet once more say:) 'Why is the activity of the dream state thus stated again, since it has been already mentioned (lit. has already gone, in the earlier discussion)'. (The answer:) 'There is no repetition in the use of the words in respect of the waking state and another,³ (there is,) (therefore, no repetition of those words)'. [1064]

¹This refers to the use of the words *ratvā caitvā*

²There is reference here to *sa vā eṣa etasmin* ... (BU 4.3.16).

³This is the dream state (beside it).

निशायां संप्रवृत्तायां संहताक्षस्य निद्रया ।

अवस्थां तैजसीं भुक्त्वा स्वापो भवति देहिनः ॥१०६५॥

When the night has set in, the one in a body (i.e. the individual self) has his eyes closed by (i.e. under the influence of) sleep, i.e. after it has experienced the state of being Taijasa, the

one in the body (comes to have) deep sleep.

[1065]

स आनन्दः परो ज्ञेयः सुखदुःखविवर्जितः ।
सततं सर्वभूतानां तिष्ठत्येष पुरीतति ॥१०६६॥

That ¹ should be known as the highest delight, it is free from happiness and/or sorrow; ever does this one ² abide in the Purītat vein ³ of (each of) all beings. [1066]

¹This refers to the state of deep sleep. This implies oneness of *avasthā* 'the (deep sleep) state' and *avasthāvat* 'the one having it', viz. the inner self.

²The word *eṣa* refers to its being the nearest (i.e. being one with the inner self).

³This points to the inner self's existence as the Brahman (SP).

तत्र रत्वा यथाकामं कंचित्कालं यदृच्छया ।
तामवस्थां तिरश्चक्र आधियासुस्ततोऽपराम् ॥१०६७॥

Having experienced delight there for some time, according to its will, it somehow ¹ abandons that state, wishing to come to a state other than that. ² [1067]

This sets aside a notion that the state of deep sleep is that of liberation, wherefrom there cannot be any movement of the individual self to some (or any) other state.

¹This is for *yadr̥cchayā* which means without any controller for its so doing.

²This would refer to the dream state (SP). But, that is made clear in the next verse.

भावनाविग्रहो भूत्वा तत्र स्वप्नरिरंसया ।
उच्चावचानि वस्तूनि भावनातः करोति सः ॥१०६८॥

Having (then) assumed the form of the impression(s) (of the external objects), that (individual self) produces from that (or,

those) impression(s) many objects, high and low, with a desire to deriving delight (from them) in the dream state. [1068]

This emphasises the unreality of the individual self's doings.

गतौ प्राणवियोगः स्याद्यथाकालस्य चेक्षणम् ।
तदसंभाव्यदेशादौ दर्शनात्तन्मृषात्मता ॥१०६९॥

If (there were actual) movement, there would have been death, lit. separation of life(-breaths); also there would be the seeing (by a dreaming person of objects) having relation to some specific time (or, period of time). On account (again) of the sight of impossible objects (of the dream state), there is falsity (in them). [1069]

यावत्स्वप्नेऽस्ति वक्तव्यं प्राक्तदुक्तमशेषतः ।
तस्मान्नासङ्गन्धोऽपि स्वप्ने पुंसोऽस्य विद्यते ॥१०७०॥

Whatever has to be stated in respect of the dream state has been already¹ stated in fullness; therefore, in the dream state, there is not even a bit of (lit. smell of) attachment for the individual self (to desire etc.). [1070]

¹Refer to verse 1021ff. above.

Now follows, in verses 1071-1079, the discussion on BU 4.3.17. In verses 1071-1074, there is reason given for holding the waking state as false.

असङ्गत्वादसंबन्धो यथेह स्वप्नकर्मभिः ।
जाग्रत्यपि न कर्तायमेतस्मादेव कारणात् ॥१०७१॥

As there is not here¹ any (real) connection (of the individual self) with the activities in the dream state, on account of its being unattached; similarly, in the waking state also, this one is a non-agent (i.e. without any activity), for the same reason.

[1071]

There is stated here the oneness in nature of the inner self in both the waking and the dream states.

¹The dream state is meant.

असज्जाग्रदवस्थेयं जाग्रद्रूपत्वकारणात् ।
स्वप्ने जाग्रदवस्थावत्तथा चाद्यन्तवत्त्वतः ॥१०७२॥

This state of waking (of the individual self) is what is not existent owing to the cause, viz. its having the form of the one who is in reality not awake. So also, in the dream state, as in the waking state, (it is so) on account of its having a beginning and an end. [1072]

This is to reaffirm the unreal nature of the individual self's awakening (and also dreaming).

अज्ञानोत्थमिदं जाग्रज्जडरूपसमन्वयात् ।
तथापेक्षात्मकत्वाच्च मृगतृष्णोदकादिवत् ॥१०७३॥

This (waking state of the individual self) has arisen from (i.e. is produced by) ignorance, owing to its invariable association with insentient objects; so also, on account of its nature, viz. of being dependent (on something else), (it is) like the water of mirage. [1073]

निरासङ्गः पुमानेष स्वप्नबुद्धान्तयोरपि ।
संप्रसादे किमङ्गायं यत्र किञ्चिन्न वीक्ष्यते ॥१०७४॥

This individual (self) is devoid of any attachment whatsoever (*nirāsaṅga*), in both the waking and the dream states; what then to say about it in the deep sleep state, i.e. there, where nothing is seen? [1074]

Verses 1075-1076 state a *prima facie* view regarding the non-active

nature of the Ātman in the waking state.

ननु जाग्रदवस्थायां दृष्ट्वैवेत्युच्यते कथम् ।
प्रत्यक्षकर्तृता तत्र यत आत्मन ईक्ष्यते ॥१०७५॥

(A question:) 'But, how indeed is *dr̥ṣtvā* stated (of the individual self) in the waking state?' (and) this is asked because there is directly seen (the Ātman's) doing an activity. [1075]

नैवं कर्त्रादिसाक्षित्वात्तच्चिदाभासतस्तदा ।
कर्तृत्वमात्मनो बोध उपचाराद्यतस्ततः ॥१०७६॥

(The answer:) 'This is not so, since the direct perceiving of agentship is then (i.e. in that state) ¹ on account of the same being the semblance of sentience; the individual self as an agent of some activity and also its knowing (or, knowledge) are then taken only in a figurative sense'. [1076]

We have emended the first line of AnSS edition -*bhāsatas tathā* to -*bhāsatas tadā*. This is on the basis of the variant reading noted in that edition and also, in view of *jāgradavasthāyām* in verse 1075 which precedes.

¹The state of waking is under reference.

Verses 1077-1086 affirm the nature of the individual self as the agent of some action to be only metaphorical.

From verse 1081 to 1155 there is discussion on BU 4.3.18.

आत्मनैवायमिति च ध्यायतीवेति च श्रुतेः ।
नात्मनः कारकत्वं स्यात्सर्वावस्थातिलङ्घिनः ॥१०७७॥

From (the statements in) the Śruti *ātmanaivāyam* ¹ and also *dhyāyatīva*, ² (it follows that) there is not in the case of the individual self *kārakatva* (doership) 'what is associated with activity'—of (really that Ātman) which transcends all the states.

[1077]

¹BU 4.3.6.²BU 4.3.7.

वेदात्मापि तथा चाह प्रपन्नाय किरीटिने ।
 संसारहेतुनिबिडध्वान्तोच्चिच्छित्सयादरात् ॥१०७८॥
 अनादित्वान्निर्गुणत्वात्परमात्मायमव्ययः ।
 शरीरस्थोऽपि कौन्तेय न करोति न लिप्यते ॥१०७९॥

So also has the Ātman of the Veda said to Arjuna who took to him (or, sought shelter of him), with due regard (for him, the devotee), with a desire to destroy (lit. cut off) the pitch/thick darkness (in the form of ignorance) which is the cause of transmigration: [1078]

The highest Ātman is immutable (lit. undiminishable) owing to its having no beginning and having no attributes. And, though residing in a body, it does no activity, nor does it get affected (lit. smeared) thereby,¹ O son of Kuntī. [1079]

¹Cf. *Gītā* 13.31. Also note how Sureśvara identifies Lord Kṛṣṇa with Vedātman.

स्वप्नबुद्धान्तवाक्याभ्यां मृत्योरासङ्गलक्षणात् ।
 विविक्ततैवं यत्नेन निर्णीता प्रत्यगात्मनः ॥१०८०॥

Thus is decided with due care the nature of the inner self as being apart from death, which has the nature of being attachment, by (the statement of) the two sentences pertaining to the dream and waking states. [1080]

This has a connection with BU 4.3.18, which follows immediately, cf. *mahāmatsyākhyā* ... in verse 1116 below.

अन्योन्यपरिहारेण स्वप्नजाग्रदवस्थयोः ।
 कामकर्मात्मकासङ्गविविक्तत्वमिहोदितम् ॥१०८१॥

By mutual opposition (lit. setting aside, or disproving) of the (two) states of waking and dream, there is stated (or, brought out) here¹ the distinction (of the individual self in the two states) in respect of attachment that has the nature of activity and desire. [1081]

¹SP paraphrases this as *pūrvatra darśitam*.

Now follows in verses 1082-1152 the discussion on BU 4.3.18.

यथोदितार्थ एतस्मिन्दृष्टान्तोऽप्यधुनोच्यते ।
निरासङ्गत्वसिद्धयर्थं प्रत्यगात्माख्यवस्तुनः ॥१०८२॥

In relation to this matter, as stated before, there is now (to be) stated an example also; (this is) for the purpose of establishing the nature of the inner self (i.e. Ātman), viz. the (real) thing, as being unattached (to desire and activity). [1082]

This points out the purpose served by the example.

स्वातन्त्र्यप्रतिपत्त्यर्थं महानिति विशेषणम् ।
नादेयस्रोतसाहार्यो मत्स्यो दृष्टान्त उच्यते ॥१०८३॥

The adjective *mahān* (in this verse) is for conveying (lit. causing the understanding of) the independence¹ (of the Ātman). The example which is stated here is of the fish who is not overcome (lit. not flown away)² by the stream of a river. [1083]

¹Or, freedom of will. *asrotasāhārya* is to be split as *asrotasā ahārya*

²SP paraphrases *ahārya* as *akampya* 'unmoved'!

यथा सिन्धोर्महामत्स्य उभे कूले मिथः पृथक् ।
अनुक्रमेण संचरन्मत्स्योऽन्यः कूलतो मतः ॥१०८४॥

(That is to mean:) As a big fish, moving to the wholly distinct

(lit. mutually different) banks of a river,¹ i.e. here and there (i.e. in succession), is known (or, accepted) as distinct from (i.e. on account of its connection with) each bank. [1084]

¹It is worth-noting that Sureśvara has used the word *sindhu* the sense of a river, as in *Rgveda*, e.g. 1.61.1; 3.33.9; 7.61.7.

कलाभ्यां क्रमसंबन्धाद्व्यतिरेकाच्च कलतः ।
स्रोतोमध्ये द्वयाप्राप्तेरसङ्गोऽयं तिमिर्यथा ॥१०८५॥
जाग्रत्स्वप्नकुलाभ्यां क्रमसंबन्धतस्तथा ।
व्यतिरेको द्वयाप्राप्तेरसङ्गोऽयं पुमानपि ॥१०८६॥

(That means:) As this (big fish, called) Timi, is unattached (to any bank), which is not obtained (i.e. restricted, or made as its own) in any of the two banks, remaining in the midst of the stream (of the river), and distinct from (each) bank, while coming into contact with both of the banks in succession, [1085]

there is similar connection in succession (of the inner self) with the abodes (i.e. the nests, in the form of) the waking and the dream states. There is distinction of it from each owing to its not (really) obtaining in both (the states)—(therefore) this inner self also is unattached (to anything else). [1086]

In verse 1086, Sureśvara has explained what is exemplified (*prastāntika*).

Now is introduced here (in verse 1087) the view of Cārvāka to be followed by a statement and the refutation of it by *praprāṇa* in verses 1088ff.)

युगपत्स्याद्द्वयोर्भोगो जाग्रत्स्वप्नकुलाययोः ।
भूतमात्राविशेषत्वात्ताभ्यामात्मा न चैतृथक् ॥१०८७॥

the individual self were not distinct (from them both), there

would have been simultaneous enjoyment in both the abodes (lit. nests, in the form) of the states of waking and sleep, on account of the non-distinction of all the elements (which formed them). [1087]

This verse is based on the view of the *dehātmanvādin* 'the one who holds the body to be the Ātman'.

In verse 1088 is stated the intention of Bhartṛprapañca in regard to the illustration under reference.

संबन्धं कुर्वते केचिदन्यथैव महाधियः ।
महामत्स्यादिवाक्यस्य स यथोक्तस्तथोच्यते ॥१०८८॥

Some persons of great intellect¹ present (or expound) in another way the relation of the sentence about the big fish²—(now) that is being discussed (lit. talked about) in the way it is presented. [1088]

¹This is reference to Bhartṛprapañca.

²SP points to this relation as that between this sentence about the fish and the one about a woman in BU 4.3.21.

In verses 1088-1103, there is discussion on the view of Bhartṛprapañca in connection with the relevant example in BU.

बाह्यं कर्मास्य बुद्ध्यादिप्रयोगाश्रितमेव हि ।
पुंसः किल ततोऽभ्येत्य भावनाप्नोति देहिनम् ॥१०८९॥
तस्या विवेको व्याख्यातो यथोक्तवचसात्मनः ।
अविद्या त्वात्मविज्ञानसंश्रितैव न सान्यतः ॥१०९०॥

The external/outside activity of this individual self, indeed, is dependent on (or, rooted in) the employment of the intellect etc. (towards some purpose). Having proceeded (*abhyetya*) from that,¹ impression (of the external objects) the one which is embodied gets (attached) to (them). [1089]

The distinction of the individual self is explained by the sentence as stated.² As for (tu) ignorance, it is based on (or, related to) the knowledge on the part of the individual self and (it does) not (proceed) from elsewhere.³ [1090]

¹That is, the employment of the intellect etc. with reference to this. SP appears to quote from Bhartṛprapañca: (yathāhuh) *ya hi puruṣasya bāhyaṃ karma buddhyādiprayogāśritam (iti)*.

²That is, *asaṅgo hy ayam puruṣaḥ* (BU 4.3.15).

³To support this, SP quotes: (*tad uktam*) *tataḥ karmaṇo nāvanā sametyainam āskandati tayoṛ viveko 'saṅgo hītyādinoktaḥ (y arthaḥ)*.

यत्तद्विज्ञानमात्मीयं तद्विकृत्यावतिष्ठते ।

मिथ्याज्ञानग्रहायासावविद्या प्रत्यगात्मनः ॥१०९१॥

What is described as that specific knowledge on the part of the individual self abides in it (only) by affecting (or, modifying) it; it is ignorance on the part of the inner self for its grasping of false knowledge.¹ [1091]

¹Or, for its grasping the knowledge of false (i.e. unreal) object. SP clarifies the argument, citing (*uktam ca*) *tad eva vijñānaṃ kṛtya viparītagrahāya prakalpayati (iti)*. The word *mithyājñāna* seems to paraphrase the word *vijñāna* which is used in these two verses, viz. 1090 and 1091.

अविद्याविषसंदष्टं तज्ज्ञानं परमात्मनः ।

पारंपर्येण बुद्ध्यादौ स्थूलीभावं निगच्छति ॥१०९२॥

That knowledge of the highest self,¹ which is affected by the poison (in the form) of ignorance, attains in the intellect etc. gradually (*pāramparyeṇa*) to grossness.² [1092]

¹This reference to the highest Ātman is to indicate and affirm identity with the individual self.

²That is, there follows the unusual process as the intellect's assuming the form of the objects etc. (*viṣayākārabhavana*).

स्थलीभता बहिः सेयं प्रकाशत्वाय कल्पते ।
एवं बहिरविद्येयं निष्क्रामत्यात्मनः पृथक् ॥१०९३॥

This ignorance, thus known (*sā*), on becoming gross outside, results in this way into the manifestation (of various objects) ¹ and thus proceeds from the individual self, as distinct from it. [1093]

¹SP cites for support: (*uktam hi*) *sa vijñānaviśeṣo buddhi-paramparayā sthūlībhūto bāhyaḥ prakāśo vyavahārāya kalpate (iti)*.

Verses 1094-1100 explain the illustration of the big fish.

स्वप्ने विवेको व्याख्यातः कर्मणोऽस्यात्मनोऽधुना ।
अविद्याप्रविवेकोऽयं वक्ष्यतेऽस्यात उत्तरम् ॥१०९४॥

The distinction of activity from this individual self, in the dream state, is (thus/so far) explained; now hereafter ¹ will be explained (lit. stated) this distinction of this one from ignorance. [1094]

This points to the relation of the example of the fish to the earlier portion of the Śruti.

¹SP states, in connection with this, this comment (of *Bhārtr̥prapañca*): (*yadāhuh*) *ya āsaṅgakṛtaḥ saṁsargas tena viveko vyākhyāto yas tv avidyākṛtaḥ saṁsargas tena viveko vyākhyātavyaḥ (iti)*.

कर्मणा निर्मितं लोकमात्मा पश्यत्यविद्यया ।
तयोर्विवेकादुभयोः स्वाभाव्यं प्रतिपद्यते ॥१०९५॥

The individual sees the world which is created by ignorance (and), by (grasping) the distinction between the two, ¹ it attains

to its natural state.²

[1095]

¹That is, the world around and the world of the dream state.

²That is, the state of liberation. At this point, SP's remark becomes useful: *dvayor vivekāḍ ātmano muktir na karmamātra-vivekāḍ avidyāvivekābhāve tato 'narthodayād ity arthaḥ*.

रूपादिविषयासङ्गः करणैश्चक्षुरादिभिः ।

अनुप्रविश्य भोक्तारं रञ्जयित्वावतिष्ठते ॥१०९६॥

The attachment of the organs, viz. the eye etc., to the objects, such as the form, enters into the enjoyer and, tinting it (thereby), remains (there, in it).

[1096]

This points to the necessity of understanding the distinction of desire from the individual self.

विज्ञानं पौरुषं शुद्धं तेनासङ्गेन दूषितम् ।

तमेवासृत्य निर्गम्य बाह्यतो व्यवतिष्ठते ॥१०९७॥

Specific knowledge which abides in the individual self (only naturally)¹ is pure, but it is rendered impure² by that attachment;³ having followed⁴ (lit. flown) after that and then having proceeded outwards, remains there.

[1097]

¹This refers to the natural state of the self, as the knowing one (*cit*).

²With reference to this, SP quotes the comment (of Bhartṛprapañca?): (*yathāhuḥ*) *āsaṅgas tu viṣayendriyadvāreṇa bahisthaḥ samāgamyātmānam anupraviśati (iti)*.

³This is understood from the preceding verse.

⁴*āsṛtya* is possibly *anusṛtya*; cf. SP. Yet the variant reading, noted in the AnSS edition, viz. *āśṛitya* is not altogether an improbable reading of the original.

आसङ्गाविद्ययोरेवमन्योन्याश्रयतोदिता ।

अभावादनयोरात्मा स्वात्मस्थः संप्रसीदति ॥१०९८॥

Thus is explained the mutual dependence of attachment and ignorance; in the absence of these two, the individual self, remaining in its own (state), is completely joyful. [1098]

प्रसिद्धमेतल्लोकेऽपि यदि रोगादिसंगतिः ।

न भवत्यथ जल्पन्ति स्वस्थोऽयमिति लौकिकाः ॥१०९९॥

It is well-known also among the people (lit. in the world) that, if a person is not affected by (lit. has no connection with) (any) disease etc., the people say, 'This person is in good health (lit. in his own, natural condition)'. [1099]

निरासङ्गस्य विदुषस्तस्मान्मुक्तिं प्रतीमहे ।

स्यादन्यतरवैकल्ये न वेत्येतदनिश्चितम् ॥११००॥

Therefore, we hold (lit. believe) that liberation is (certain) for the knower (or, learned), who is unaffected (to activity etc.). It is not certain if that (viz. liberation) would be, or would not be, (possible) in (the condition of) being without (even) one of them.¹ [1100]

¹These two are *āśaṅga* 'attachment' through *kāma* 'desire' and *karman* 'activity'. There are under reference the verses 1097-1098 which have just preceded. Cf. the phrase in SP: *kāmakarmavivekayor anyatarasyāpy asattvena*

Verses 1101-1104 show the distinction between the individual self (viz. the *Ātman*) and ignorance, as stated in *tad yathā śyenah* ... up to the end of the illustration of the woman (cf. verses 1296 onwards).

तद्यथा श्येन इत्यस्माद्यावत्स्त्रीब्राह्मणादिति ।

अविद्याप्रविवेकार्थमेवमेतावदुच्यते ॥११०१॥

Beginning with (lit. from) the sentence *tad yathā śyenah*¹ ... up to the sentence about a woman,² this much (i.e. all this) is said for discriminating ignorance (from the individual self). [1101]

¹Cf. BU 4.3.19.

²This refers to the prose portion (i.e. Brāhmaṇa) in relation to a woman at BU 4.3.21.

स्वप्नजाग्रत्प्रचारेऽस्मिन्नात्मा श्येनः पतन्निव ।
परिश्रान्तः सुषुप्ताख्यं नीडं धावत्यथात्मनः ॥११०२॥

In this (known, or already described) activity in the dream and/or waking states), the individual self is like a flying falcon; (when) tired, it runs then to its own¹ nest (i.e. abode) called the state of deep sleep. [1102]

¹In *ātmanh* ... *needam*, the word *ātman* is a reflexive pronoun.

कर्माविद्याविनिर्मुक्त एतस्मिन्नेव लक्ष्यते ।
सर्वशोकातिगः स्वस्थः स्तिमितः स्वात्मनि स्थितः ॥११०३॥

It is only in this state that it (viz. the individual self) is seen as completely freed from activity and ignorance; (being) transcendent over all unhappiness (*śoka*),¹ resting in itself, motionless, it has (then) remained in itself.² [1103]

¹SP explains *śoka* as *kāma* (which is really the cause of it).

²In *svātmani*, *ātman* is once again a reflexive pronoun.

इति व्याचक्षते केचिन्महामत्स्यादिकां श्रुतिम् ।
तन्न्याय्यमथवान्याय्यं यत्नान्न्यायैः परीक्ष्यताम् ॥११०४॥

Thus have some (thinkers) explained the Śruti having its beginning in (the example of) the big fish. Whether this is reasonable or unreasonable, let it be duly examined¹ with

good reasons.

[1104]

In Sureśvara's opinion, verses 1101-1103 convey the view of some thinkers (identified by SP under verse 1116 below as Bhartṛprapañca) on the purport of the Śruti passages under reference (as above), viz. it seeks to discriminate ignorance from the individual self. This examination of the view runs up to verse 1115 below.

¹Due examination means, according to SP, an attempt to set aside (i.e. disprove) what Bhartṛprapañca has adduced as reason(s).

In verses 1105-1111, Sureśvara explains the faults in the view stated above.

आत्मवस्त्वतिरेकेण नास्ति वस्त्वन्तरं यदि ।

बाह्यान्तःप्रविभागोऽयं किमाश्रित्य प्रकल्प्यते ॥११०५॥

If there does not exist anything beside the (real) thing, i.e. the Ātman, then (the question is:) 'On what basis is this division into the external and the internal (objects) entertained?' [1105]

This refers to *bāhyaṃ karma* stated in verse 1089 above. The argument in this verse proceeds on the basis of the non-acceptance of anything other than Ātman.

विषयेन्द्रियादि यद्वस्तु नाविद्याव्यतिरेकि तत् ।

वस्त्वन्तरस्य सद्भाव एकात्म्यं बाधते यतः ॥११०६॥

Whatever thing there is, viz. the object(s), the organs etc., it is not distinct from ignorance; since, in (accepting) the existence of these other thing(s), the singleness of the Ātman becomes stultified.

[1106]

Here is rejected the idea of the existence of all the things other than the Ātman.

आसङ्गस्यागतिरतो विषयेन्द्रियवर्त्मना ।
न्यायाभावादयुक्तैव नाप्यविद्या तमानयेत् ॥११०७॥

Therefore, (the notion of) the advent of (any) attachment (to the Ātman) through the (external) objects and organs is only without any reason and, therefore, improper; even ignorance cannot bring (lit. produce) the same. [1107]

This verse has reference to the argument in verse 1089 above. It sets aside two possibilities: Desire affects the Ātman (i) through the external objects, and (ii) through ignorance.

मिथ्याज्ञानमृते नान्यत्कार्यं किञ्चिदपीष्यते ।
अविद्याया यतो नात आसङ्गाद्याहतिः स्वतः ॥११०८॥

Since, there cannot be any activity whatever (performed) without false knowledge (or the knowledge about the false, i.e. unreal, objects being there), on account of ignorance, therefore, there cannot be any bringing about of the attachment by the Ātman, of/on its own. [1108]

The verse states the reason for the argument in the preceding verse.

आत्माविद्याप्रसिद्धयैव ह्यविद्याप्यात्मनो यतः ।
न स्वतः परतो वातो वस्तुतः प्रत्यगात्मनि ॥११०९॥

Since there is (affection) of the Ātman by ignorance only owing to (the coming into existence of) ignorance; there is, in reality, not on the part of the inner self (ignorance), on account of itself or of another. [1109]

This argument relates to an earlier statement *avidyā tv ātmavijñānasaṁśritā* (cf. verse 1090 above).

निःशेषविक्रियावर्गप्रतिषेधश्रुतेस्तथा ।

आत्मज्ञानं विकृत्यास्तेऽविद्येत्येतच्च दुर्भणम् ॥१११०॥

Further (*tathā*), from the Śruti (statement) which denies (the existence of) the entire mass of modifications, (it is clearly) difficult to say that ignorance exists after modifying/affecting the Ātman's (capacity for) knowing. [1110]

This is to refute the argument *tad vijñānam ātmīyam* (cf. verse 1091 above).

प्रत्यक्चिदाभाविद्यातो ह्यविचारितसिद्धिका ।

सिद्धायते प्रतीचीयं प्राक्सम्यग्ज्ञानजन्मनः ॥११११॥

Therefore, this ignorance, which has the light of sentience within (an individual), has its proof which did not require any deliberation about it (and) this (i.e. it) finds itself (lit. gets established) in the inner self before (there is in it) the rise of the proper knowledge. [1111]

Verses 1112-1113 point out the want of thought resulting from ignorance, with the support from the sentence about the falcon.

जाग्रत्स्वप्नविवेकोऽतो वाक्यार्थप्रतिपत्तये ।

वाक्यार्थप्रतिपत्त्यैव प्रत्यग्ज्ञाननिहनुतिः ॥१११२॥

Therefore, the distinction (of the state of deep sleep from the states of waking and dream results in the understanding of the meaning of (the Śruti) sentence. It is only by the understanding of the meaning of (the Śruti) sentence that there occurs removal (lit. concealment) of the ignorance on the part of the inner self. [1112]

This verse pertains to *avidyāpravivekārtham* in verse 1101 above. For elaborate explanation, refer to SP.

जाग्रत्स्वप्नसुषुप्तेषु संचारोऽयं प्रमान्तरात् ।
सिद्धो यस्मादतस्तस्मिन्वाक्यं स्यादनुवादकम् ॥१११३॥

Since this movement (of the individual Ātman) in the (three) states of waking, dream and deep sleep becomes (i.e. is) established (proved) by another knowledge¹ (also), therefore there is, in that respect (*tasmin*), the sentence (of the Śruti) which is (merely) corroborative (or, repetitive). [1113]

¹SP paraphrases *pramāntara* as *pratisaṁdhāna*. The idea seems to be: this Śruti statement acts merely as a reminder of what is already known (viz. experienced).

Verses 1114-1116 point to the Śruti sentence regarding attaining to the Brahman in the state of deep sleep.

क्रमसंचारिणस्तस्य जाग्रत्स्वप्नसुषुप्तिषु ।
ब्रह्मत्वं नान्यतोऽज्ञायि वाक्यं तत्प्रतिपत्तिकृत् ॥१११४॥

The nature of that (individual self), which is successively moving in the states of waking, dream and sleep, is only being the Brahman—this does not become (i.e. is not) known from elsewhere; therefore, the sentence (of the Śruti) causes the understanding about it. [1114]

This is to state that what is called a Mahāvākya is not merely repetitive—it actually causes (i.e. leads to) understanding of the nature of the inner self as the Brahman. This is reasserted in the next verse.

आत्मनो ब्रह्मता साक्षाद्ब्रह्मणोऽप्यात्मता स्वतः ।
तत्त्वमस्यादिवाक्यस्य विषयोऽयमिहोदितः ॥१११५॥

That the individual self is the Brahman is directly perceptible. Also, that the Brahman is the individual/inner Ātman is, in its own right, (experienced/realised). (Thus) is stated here (in

this sentence of the Śruti) the subject-matter of the sentence
tat tvam asi. [1115]

This brings to an end Sureśvara's examination of the view of Bhartṛprapañca expressed in verses 1101 to 1103.

Read SP (for further clarification): *pratyakṣāder nirviśeṣe brahmātmaikye 'pravṛtter vākyaikagamyah tad ity arthah.*

महामत्स्याख्यदृष्टान्तः स्वप्नजाग्रदवस्थयोः ।

व्याख्यातोऽप्यन्यथा त्वन्ये दृष्टान्तं व्याचक्षिरे ॥१११६॥

Though the example (described as that) of a big fish for (explaining) the two states of waking and dream is (thus) explained, the others¹ have explained the example in another way. [1116]

It seems that SP considers that the above explanation has followed the lead of BUB.

¹This is once again to refer to the thinkers whose view was stated in verses 1101 to 1103 and examined in verses 1104-1115; SP identifies these thinkers as Bhartṛprapañca.

Now, in verses 1117-1127, Sureśvara puts forth his thoughts about another way of looking at that view—other than what is presented above.

विज्ञानं प्रस्तुतं तस्मिन्संदेहो नः प्रजायते ।

किमेतद्वैतिकं ज्ञानं भूतेभ्योऽन्यस्य चात्मनः ॥१११७॥

What is taken up (for discussion) is the (specific) knowledge (on the part of the inner self): 'In that respect, there arises, (in) our (opinion), a doubt. Is this the knowledge pertaining to the elements or does it pertain to the Ātman which is other than the elements?' [1117]

विज्ञानं भौतिकं तावद्धृतसंसर्गजन्मतः ।

यथैव बाह्यनयनप्रकाशार्थाभिसंगतेः ॥१११८॥

विषयज्ञानजन्मैवमात्मनो भूतसंगतेः ।

बुद्धीन्द्रियादिसंसर्गादभिव्यक्तिः समीक्ष्यते ॥१११९॥

संविज्ज्ञानविशेषस्य तथा सति न किं चन ।

व्यतिरिक्तस्य विज्ञातुर्विज्ञानेऽस्ति प्रयोजनम् ॥११२०॥

As for (*tāvat*) the individual self's (specific) knowledge, it occurs on account of its origin¹ from (its) contact with the elements, just in the same way (i.e. sight of things occurs) from the close contact of the external objects with the eye and light. [1118]

Similarly, the rise of the (specific) knowledge of the (external) objects, on the part of the (individual) Ātman, is owing to its association with the elements and the manifestation (of the same) and is perceived through the contact of the intellect, organs etc. [1119]

That being so, there is not a bit of the specific (or, matchless) knowledge of/by the knowing one² (the Ātman). And, there is a purpose (served) for a specific knower (i.e. the individual self) which is there in that specific knowledge. [1120]

In connection with the verses 1117, 1118, 1119 and 1120 only up to *saṁvijñānaviśeṣasya*, SP quotes the following: (*uktaṁ hi*) *athaiva bāhyacakṣuṣaḥ prakāśārthayoḥ saṁsargād viśeṣaprakāś-
nābhiv্যक्तिर एवम बुद्धीन्द्रियासंसर्गाद उपलब्धिविज्ञाना-
भिव्यक्तिः (iti).*

¹Translation adopts an emendation in the first line: *-janmataḥ* read for *-janmanaḥ*, a variant reading noted in the AnSS edition. This emendation is justified by the words *-arthā-
hisamgateḥ* (in 1118) and *bhūtasamgateḥ* (in 1119), both indicating the source, which occur in the next two lines.

²*saṁvid* is understood as connected with *jñānaviśeṣa* by the genitive case of it. It stands here for the individual self which is taken to accept sensations of the external objects. This is supported by the use of *saṁvid* in verse 1123 below.

इत्येवं चोदिते कैश्चिदत्र प्रतिविधीयते ।
 व्यतिरिक्तो न चेज्ज्ञाता भूतेभ्योऽभ्युपगम्यते ॥११२१॥
 तुल्यत्वाद्भूतमात्राणां स्वप्नजाग्रदवस्थयोः ।
 विज्ञानजन्म युगपत्तदा प्राप्नोति ते ध्रुवम् ॥११२२॥

Here, i.e. in respect of such an objecting statement of others, there is (the following) said in reply. If it is accepted that the knowing one is not distinct from the elements¹ — [1121] then, there will be for you (a contingent acceptance of) the simultaneous rise of (the specific) knowledge (of all kinds), since the positions of (all) the elements would be owing to their equality, their presence (i.e. operative) in the states of waking and dream. [1122]

SP adduces, in connection with the second line of verse 1121 and verse 1122, the support (of evidently the comment of Bhartṛprapañca) thus: (*yathāhuḥ*) *yadi vyatirikto vijñātā na syāt tena svapnakāle bhautikasyaiva jyotiṣo 'viśeṣārambhe sati svapnabuddhāntayor bhūtamātrāṇām aviśeṣeṇa vidyamānatvād yaugapadyenobhaya tropalabdhiḥ syāt (iti).*

¹The objecting argument comes from the *dehātmanavādin* 'the believer in the theory that the body is the self'.

From this verse up to verse 1130, there appear to be stated various views, to be refuted by the Vedāntin (or Sureśvara) later.

क्रमवृत्तेस्तु बोधस्य न बोधो भौतिकस्ततः ।
 अन्यस्यैव हि संवित्स्यात्स्वप्नबुद्धान्तनीडतः ॥११२३॥
 इत्यस्यार्थस्य विज्ञप्त्यै दृष्टान्तौऽत्राभिधीयते ।
 क्रमेण संचरन्नद्यां महामत्स्यो यथा बली ॥११२४॥

But, since there is (specific) knowledge (in the two states) occurring in succession, the knowledge is not, therefore, produced by/from the elements. Indeed¹ (specific) knowledge would occur from the (two) nests of dream and waking states,

for one other (than the body/elements). [1123]

(And) for conveying this meaning there is stated (by the Śruti) here the example (of the big fish), viz. 'As a big fish of great strength² moving in a river, in succession ...'.³ [1124]

¹On the word *hi* 'indeed', SP states: it is indicative of Bhartṛprapañca's comment: *yathoktabhartṛprapañcabhāṣyadyotī hiśabdah*.

²SP justifies the use of *balī* thus: *nādeyaśrotasā kampyātārāhityam balīyastvam*.

³SP states: *sañcaran vartata iti śeṣah*.

मत्स्याभिसंगतिर्यद्वत्पर्यायेणेह कुलयोः ।

क्रमेण ज्ञातृसंबन्धस्तद्वत्स्वप्नप्रबोधयोः ॥११२५॥

As there is connection of the two banks (of a river) here¹ with a fish, in succession, so there is the connection of the (specific) knower with the two (states of) dream and waking. [1125]

¹SP points to *iha* as having the sense of the river; *nadī saptamyarthah*.

व्यापित्वादात्मनोऽप्येवं युगपज्ज्ञातृतेति चेत् ।

भूतमात्रावदित्येवं समानं चोद्यमावयोः ॥११२६॥

(An argument against the Vedāntin:) 'If, owing to the pervasiveness of the Ātman, there will be simultaneously its nature of being the knower (of all experiences in the different states) as in the portions of (all) the elements, then the objections of both of us would be the same.¹ [1126]

¹*samāna* has the sense of *eka*.

कस्तर्हि क्रमहेतुः स्याद्देवताहेतुकोऽस्तु सः ।

क्रमेण वृत्तिस्तासां स्यादधिष्ठातृत्वकारणात् ॥११२७॥

(Yet another argument in objection:) (The question would be:) 'What then could be the cause of the succession?' (The answer would be:) 'Let it be that (the succession) has a cause in the (difference among) deities and their functions would be in succession, on account of their being the superintendents (of various organs)'.¹ [1127]

¹In connection with this SP quotes: (*tadāhuḥ*) *tāsāṃ cādhiṣṭhātrīṇāṃ paryāyeṇa vṛttir utpadyate (iti)*.

Verses 1128-1131 refer to the contingent simultaneity of the specific knowledge in the waking and dream states.

अत्रापि युगपज्ज्ञानमुक्तयोः पक्षयोर्यथा ।
व्यापित्वाद्देवतानां स्यात्स्वप्नजाग्रदवस्थयोः ॥११२८॥

(The answer:) 'Even here, there would be simultaneous rise of the (specific) knowledge (of the individual self), on account of the pervasion by the deities in both the states of dream and waking, as in the two views (already) stated'. [1128]

असंभवात्प्रयत्नस्य युगपद्देवतात्मनः ।
नातः स्याद्युगपज्ज्ञानमिति चेन्न तथापि तत् ॥११२९॥

(If it is said) 'There would not be (simultaneous rise of) the (specific) knowledge (on the part of the individual self), because of the impossibility (of simultaneous) efforts¹ of those,² which are of the nature of deities', (then the answer is:) 'No, that will not be (so), (for) even in that case (*tathāpi*), that (does rise simultaneously)'.³ [1129]

¹We understood *prayatna* in singular to stand for *prayatnas* in plural, because there are several deities of the organs involved in their various activities. It is, nevertheless, possible that Sureśvara has used the singular to indicate the simultaneity in

ose various efforts.

²*devatātmanah* is also in singular, though it is necessary to understand it as in plural, in view of the mention *devatānām* just the preceding verse. Possibly, Sureśvara has used the word *devatātman* in the place of *devatā*; the reason for that is not clear! The translation here tried to put it as those having the nature of a deity—only with a view to securing literal translation.

³The argument seems to be: the effort of an individual is not caused principally by each one of the deities of organs. It is the *dharma/adharma* acquired by the individual which is principally the cause of the individual's (specific) knowledge. This will be clarified in verses 1134 and 1135 below.

प्राहात्मपक्षवाद्यत्र सिद्धं नो यत्समीहितम् ।
कुतस्तदिति चेन्मतः शृणु सर्वं यथोच्यते ॥११३०॥

(The objector persisted:) 'The person, who holds the theory of the Ātman (as the ultimate and non-attached), has said, 'What we have stated (lit. wished) is proven (or, established)'. (Now I ask), 'How (does it become proven)?'. (The answer of the Vedāntin:) 'If (you say this, then) listen (as to) how that is so.' It is (now) being explained (lit. said). [1130]

सर्वत्र यौगपद्यं स्याद्विभुत्वाद्देवतात्मनः ।
ऐश्वर्याच्च प्रयत्नोत्थकार्येष्वस्यात्मनो न तु ॥११३१॥

There would be simultaneity everywhere in respect of the effects which arise from the efforts of (those) deities, on account of their pervasion by the Lordship.¹ But (this is) not (so, in the case) of the Ātman. [1131]

¹This points to how the effects of *dharma/adharma* cannot be uncontrolled as those of the deities' doings which are not determined (or, controlled) by any force outside themselves. Also, the individual self is not all-pervasive and entirely free or unbound

like the deities. SP supports this argument by some citation: (*uktaṃ hi*) *devatāyā vibhutvāt prayatnakāryeṣu yaugapadyaṃ na tu vijñātmanah* (iti).

Verses 1132-1135 state the reason for *devatānadhiṣṭhāna*.

अधिष्ठेयेन्द्रियाणां हि स्वप्नभूमावसंभवात् ।
व्यापारो नास्त्यतः स्वप्ने देवतानां मनागपि ॥११३२॥

Indeed, since, in the dream state, there is no possibility (of the functioning) of organs, which are to be superintended over (by their deities), therefore,¹ there is not even a little of the effort of the deities (possible). [1132]

¹Cf. SP: *adhiṣṭheyam antareṇādhiṣṭhātrtvāyogo 'taḥśabdārthaḥ*.

अतो भोक्ता स्वयंसिद्धो यथोक्तेनैव हेतुना ।
प्रयत्नायौगपद्येन स्वप्नजाग्रद्द्वयाद्विरुक् ॥११३३॥

Therefore, the enjoyer is (the individual self) which exists in its own right and which is apart (lit. far) from the two states of waking and dream, only for the reason which is stated (so far), viz. on account of the efforts (of the deities) not being simultaneous. [1133]

SP appears to quote from the comment of Bhartṛprapañca (cf. note on verse 1116 above) thus: (*yathāhuh*) *anena bhoktrtvaprayuktatvena hetunā prayatnāyugapadyena vyatiriktadraṣṭṛgrahanaśiddhiḥ* (iti).

आत्मनो भोक्तृतासिद्धिर्ज्ञातृत्वं च प्रसिध्यति ।
व्यापित्वेऽप्यस्य यत्नो य आत्मनः कर्तृतां प्रति ॥११३४॥
न संभवत्यसौ यत्नो यौगपद्येन नीडयोः ।
दृष्टत्वात्परिपाट्या स्यात्तस्माद्धृत्तिरिति स्थितम् ॥११३५॥

The nature of the Ātman's being the enjoyer has to be effected;

so also) its nature of being the knower will have to be effected. Whatever be the effort of this (Ātman)¹ towards being the agent of activity—even though it is a pervader— [1134]

It is not possible to be of the occurrence of the two nests simultaneously is not possible; owing to their occurring (lit. being seen) in succession; therefore, the existence (of the Ātman as the enjoyer has to be) in succession. [1135]

P clarifies the thought in the verse by citing (*yathoktam*) *ya hi svapnāntabuddhāntayor vyāpitve 'pi yo 'asau draṣṭṛtvena trtvam prati yatno na sa yaugapadyena sambhavati tasmāt tasya yāyena draṣṭṛtve pravṛttir ity avasthitam (iti).*

Verses 1136-1137 state: it follows from the preceding verses that Ātman is distinct from the body.

अयौगपद्यदर्शित्वमात्मास्तितत्वेऽनुमेष्यते ।

तथा तद्व्यतिरिक्तत्वे जाग्रत्स्वप्नकुलायतः ॥११३६॥

The nature of being the seer of the non-simultaneous occurrence of the two states of waking and dream) is accepted as a proof of the Ātman's existence, and so also of its being apart from (i.e. being unaffected by) the nests in the form of the waking and dream states. [1136]

As was said earlier, in verse 1126 above, that the *dehātmavādin* the Vedāntin have a common ground for proving their ideas; this is answered away in this verse. In the case of the Ātman accepted by the Vedāntin, it is *kramadraṣṭṛ*— such is not, cannot be, the position of the *dehātmavādin*.

P supports, citing (*tad uktam*) *upalabdhyayaugapadyam āstitve lingam (iti)*. This seems to be in conformity with the line of verse 1134 above.

न च स्वप्नविनिर्माणे देवताव्यापृतिर्भवेत् ।

यथास्वं स्थानमायान्ति ता मृतिस्वापयोर्यतः ॥११३७॥

Also, there would not be (i.e. is not) any activity (or, functioning) by deities in respect of the occurrence (lit. creation) of the dream state, since they go back to their own places (i.e. whence they have come) at the time of death and of dream. [1137]

The first line is the reaffirmation of the reason which is stated in verse 1132 above—and that reason is further supported by yet another, in the second line.

SP seems to quote from the comment of Bhartṛprapañca thus: (yathāhuḥ) *na hi devatānām svapnakāle svavyāpāras tā ucchakramiṣor lokāntaram prati viśeṣakāryāny ādhyātmikāni hitvā svāni sthānāni pratipadyante 'agnim vāg apyeti' ityādiśrutes tathā pratipitsor devatā apakrāntā bhavati (iti).*

In verses 1138-1144, there is stated a prima facie view regarding the creation of the world of the dream state by repeated activity of deities and also a refutation of it.

मतं यथा मृतौ देवास्त्यक्त्वा स्वं स्वमनुग्रहम् ।
 देहारम्भे पुनर्देवा यथास्वं कुर्वते क्रियाम् ॥११३८॥
 तद्वत्सुषुप्सोरुत्क्रम्य देवताः स्वाधिकारतः ।
 स्वप्नसर्गे पुनस्ताः स्वमधिकारं प्रकुर्वते ॥११३९॥

(The objector's doubt:) 'We have held that as the deities, each one of them abandons its own favoured (organ of the body) at the time of (a person's) death and again at the beginning of a (new) body (coming into existence), each commences (or, begins to perform) the function (which had been) its own (before), [1138]

in the same way, the deities, after leaving (lit. going out from the body of) one, who was asleep,¹ from their own spheres of activity, (begin) to perform (the activity) of their own spheres, once again, when there occurs (lit. is created) a dream'. [1139]

¹Sureśvara's use of *suṣupsu* is to be understood as *supta*.

इत्येवं चोदितेऽथात्र परिहारोऽभिधीयते ।

लिङ्गकार्यानिभिव्यक्तेर्नालं कार्याय देवताः ॥११४०॥

When such an objection is raised, there is (now) stated an answer for explaining it away (or, in refutation of it). 'It is to be understood that) the deities are not able to (or, are held to be unable to) perform their own functions,¹ since there has not been (or, is not) any manifestation of functions in the subtle form of the body (*linga-[deha]*)'. [1140]

SP justifies this thought by quoting: (*yathoktam*) *na hi devatā adācil liṅgaṃ jahāti, sā tv anabhivyakte liṅge nālaṃ viśeṣa-kāryāya (iti)*.

¹The singular form indicates plurality (of functions)— *jātāv avacanam*. This is in view of *devatāḥ* a plural form.

कारणान्यसमर्थानि यथा देहमृते मृतौ ।

स्वकार्यस्याभिनिष्पत्तौ तथा स्वप्नेऽपि देवताः ॥११४१॥

करणान्यनपाश्रित्य नालं स्वाधिकृतिं प्रति ।

स्वप्ने च करणाभावः श्रुत्यैव प्रतिपादितः ॥११४२॥

As, after death, causes (*kāraṇāni* which should be taken as *kāraṇāni* 'organs') cannot (lit. are not able to) bring about their effects, without (resting in) the body, so also are the deities unable while (a person is) in dream, [1141] without resorting to the organs (of the body), for (performing) their own functions. (And) the Śruti itself has declared the absence of the organs in the dream state.¹ [1142]

¹Cf. *prāṇaṃ tarhi vāg apyeti*, cp. CU 4.3.3.

यत एवमतः स्वप्ने नाशङ्का देवताः प्रति ।

अधिकारो यतस्तासामात्मनो देहसंगतौ ॥११४३॥

Since this is so, therefore, there cannot be (or, is not) any idea of (or, doubt if there are any) deities in the dream state, inasmuch as they can perform (or, have the ability to perform) their functions, only when the Ātman (i.e. the inner sentience) and the body are in contact (or, connection) with each other.

[1143]

मुक्तवैव देहसंबन्धं स्वप्नोऽयं प्रत्यगात्मनः ।
बहिष्कुलायवचनादेतच्चाध्यवसीयते ॥११४४॥

Only after it has left the contact with the body, there can be for the inner self this (state of) dream and that is concluded from the statement (in the Śruti) about (its being) outside the nest.¹

[1144]

This verse concludes Sureśvara's examination of another Vedāntin's (i.e. Bhartṛprapañca's) view.

¹Cf. BU 4.3.12.

Verses 1145-1146 state the opinion of Sureśvara himself.

नातो भौतिकमेतत्स्यान्नापि स्याद्देवताकृतम् ।
चैतन्यं स्वप्नगं स्वार्थं शरीरद्वयवर्जनात् ॥११४५॥

Therefore, in the dream state, this sentience (within the body) is not made of the elements; nor also is it made by deities; it exists, for its own sake, by avoiding (or, lit. giving up) the two bodies.¹

[1145]

¹These are the gross and the subtle bodies.

निरनुग्रहं निष्करणं वासनोपाधिमात्रकम् ।
स्वप्नदर्शनमेतत्स्यात्प्रत्यग्धीवस्तुसंश्रयम् ॥११४६॥

This sight of a dream is ¹ (then) without any favour (of the

deities), who are with (lit. without) any organs (of activity), and has only impression(s) (of the external objects) as its delimiting adjuncts, having a resort (i.e. basis) merely in the inner consciousness.² [1146]

SP supports the argument in the verse, citing (*uktam hi*) *ubhayor kālayor vyatirekād vyatirikto draṣṭā na bhautikaṃ darśanam nāpi devatākṛtam (iti)*.

¹This is for *syāt* which means *asti*.

²Sureśvara uses the word *pratyagdhī* which literally means 'the intellect within'; and it is to be understood as *pratyakcidrūpā dhī*.

Verses 1147-1152 state the view of *Bhartṛprapañca*: it is proper to hold *dehātmatvavyapoha*.

पृथक्त्वे वापृथक्त्वे वा भूतेभ्यो देवतात्मनः ।
किमर्थं देवताशङ्का क्रियते हिरुगात्मनः ॥११४७॥

'Be there the distinction or non-distinction of deities from the elements, why is there entertained a doubt that deities are apart (or far) from the individual self?' [1147]

Earlier, there was stated *Bhartṛprapañca*'s explanation of the example of a big fish, from verse 1116 onwards. And, taking the cue from *Bhartṛprapañca*'s explanation, Sureśvara refuted the argument of the *dehātmatvādin*s respectfully with a few details. In this verse are pointed out the shortcomings in the argument of *Bhartṛprapañca*. For elaborate details, SP should be consulted.

मत्स्यदृष्टान्तवचस एतावत्फलमिष्यते ।
मृत्युरूपमिदं सर्वं कार्यं च करणानि च ॥११४८॥

This much is accepted (lit. desired) to be the purpose served by stating the example of a big fish; viz. all activity and its means are (but) forms of death. [1148]

SP brings out the thought of this verse succinctly thus: *kāma-karmasahitaḥ saṅghāto mṛtyurūpo nātmadharma ity arthaḥ*.

ताभ्यां विलक्षणस्त्वात्मा स्वप्ने योऽयं प्रपञ्चितः ।
स्थूलसूक्ष्मशरीराभ्यां केवलश्चेतनोऽक्रियः ॥११४९॥

And (*tu*) this (individual) Ātman, which has been (so) extensively discussed in the dream state, is different from the gross and the subtle bodies; (it is) alone (and aloof/apart from),¹ sentient, and without any activity. [1149]

¹That is, non-attached to them.

तथैव कामकर्मभ्यामत्यन्तं स्याद्विलक्षणः ।
प्रयोजकाभ्यां देहस्य तथैव करणस्य च ॥११५०॥

In the same way, it is (lit. should be taken as) extremely (or, in extreme) distinct from desire and activity, also from those two, which cause (or, produce) the (movement etc.) of the body and its organs.¹ [1150]

¹These are the gross and the subtle bodies.

अविद्याकृतमेवातः संसारित्वं न तु स्वतः ।
अतोऽविद्यासमुच्छ्रितौ मुक्तिः स्यात्परमात्मनः ॥११५१॥

Therefore, the transmigratory nature is (for the Ātman) caused by ignorance and not on account of its own; and there would be liberation for it when (there has occurred) the removal (lit. destruction) of ignorance. [1151]

इत्यवतः पूर्ववाक्येन समदायार्थ ईदृशः ।
पौर्वापर्यं समीक्ष्यात्मा निष्क्रियः केवलोऽद्वयः ॥११५२॥

Thus is explained the total meaning (or, thought) by the earlier

statement.¹ Having then considered (*samīkṣya*, the relation of) the earlier and the later (portions, one comes to understand that) the Ātman is non-active, aloof (from every other thing)² and without duality.³ [1152]

¹The earlier sentence is *sa vā ayam puruṣo jāyamānaḥ* ... (BU 4.3.8) and the later, *tad yathā mahāmatsyaḥ* ... (BU 4.3.18).

²Cf. verse 1149 above.

³SP clarifies this thus: *pūrvatra vyākhyātavākyānām pūrvā-paribhāvam ālokya karmaṇā kāmēna dehadvayena ca viviktaḥ pratyagdhātur nityaśuddhatvādirūpo 'dhigata ity arthaḥ*.

Verses 1153-1155 introduce BU 4.3.19.

अपास्तकार्यकरणकर्मासङ्गो न तु क्वचित् ।
आत्मोपपादितः साक्षाद्वचस्येकत्र यत्नतः ॥११५३॥

Yet, nowhere has the Ātman been described directly in one sentence and with due care as one who has cast off all attachment to effects, their means and activity. [1153]

SP points out: *niḥśeṣaviśeṣaśūnye pratīci drṣṭāntopanyāso yat-*

सासङ्गश्च समृत्युश्च सकार्यकरणस्तथा ।
अविद्यया यतो बोध आत्मायमुपलक्ष्यते ॥११५४॥

Since this (individual) self is noticed to be having attachment (to objects),¹ death and also (some) activities and the means (to perform the same),² on account of (its having specific) knowledge through/by ignorance. [1154]

This states the reason for the Śruti's doing, which is mentioned in the preceding verse. The individual self's state of waking is under reference.

¹That is, in the description of the waking state.

²For a similar use of *kāryakāraṇa*, cf BUBV 4.4.150. Or, alternatively: with the effects to be accomplished and the means for accomplishing the same.

स्वप्ने तु वासनाकामसंयुक्तो मृत्युवर्जितः ।
संप्रसादे प्रसन्नश्च तथासङ्गोऽपि वीक्ष्यते ॥११५५॥

As for (that self) in the dream state, it is connected with impression(s) (of the external object(s)) and desire(s), free from death. So also, it is noticed in the state of deep sleep to be completely happy/joyful and non-attached (to anything else). [1155]

In verses 1156-1164, there is stated in general the meaning of the Śruti sentence about a Śyena.

तद्वा अस्यैतदित्यत्र यथोक्तं रूपमात्मनः ।
वक्ष्यमाणमतस्तस्य दृष्टान्तोऽयमिहोच्यते ॥११५६॥

The nature of the individual self which is stated (in the preceding portion of BU), is to be (lit. is being) stated in (the sentence) *tad vā asyaitad* ..., ¹ therefore is here stated the example.² [1156]

¹Cf. BU 4.3.21: *tad vā asyaitad aticchandā apahatapāp-mābhayaṃ rūpam*.

²The example of Śyena in BU 4.3.19.

स्वतो बुद्धं च शुद्धं च मुक्तं रूपमिहात्मनः ।
एकवाक्योपसंहारै न पुञ्जीकृत्य दर्शितम् ॥११५७॥

Here, the nature of the individual self (which has really) awakened (i.e. is possessed of knowledge) on its own, pure, and free (from all connection with other objects etc.), is not presented (lit. shown) after putting (the whole of) it in just one sentence as summary.¹ [1157]

¹SP paraphrases it thus: *nādhastāt piṇḍīkrtyoktam iti yāvat*.

तद्यथा श्येन इत्युक्त्या तद्दृष्टान्तप्रदर्शनात् ।
शुद्धबुद्धादिकं रूपमात्मनः संप्रदर्श्यते ॥११५८॥

By/in the statement *tad yathā śyenaḥ* ... there is presented (lit. shown) an example of/for it and thereby is revealed the nature (lit. form) of the individual self (as) pure, awakened etc.¹ [1158]

¹That which is stated in the preceding verse.

स्वप्नबुद्धान्तयोर्वेह दृष्टान्तः संप्रदर्शितः ।
संप्रसादस्य दृष्टान्तः श्येनेनाथाधुनोच्यते ॥११५९॥

Or, (it may be taken that) there is already given an example (to clarify the nature of the individual self) in relation to the states of dream and waking. (And) now is stated in/by the sentence about Śyena the example in relation to the state of deep sleep. [1159]

This is in keeping with the explanation in BUB.

श्येनः शशादो विज्ञेयो बृहत्कायश्च रोहितः ।
क्षिप्रः श्येनः सुपर्णस्तु बलवानल्पविग्रहः ॥११६०॥

A Śyena is to be known as the cater of rabbits, one possessed of a big body (or shape) and red (in colour), but/and (*tu*) a Suparna is a quicker Śyena, full of strength and (yet) of small size. [1160]

This verse explains away a possible doubt about repetition in the use (or, mention) of the words *śyena* and *suparna*.

श्येनः श्रान्तो यथाकाशे भक्ष्यहेतोः परिभ्रमन् ।

पक्षौ वितत्य नीडं स्वमेति हि श्रमहानये ॥११६१॥

यथा तथायमप्यात्मा जाग्रत्स्वप्नौ परिभ्रमन् ।

श्रान्तस्तच्छ्रमहानार्थं ब्रह्मनीडं प्रपद्यते ॥११६२॥

As when a Śyena, (while) hovering about in the sky for securing some prey, spreads its wings and flies unto its nest for overcoming (lit. driving away) its fatigue, [1161]

so also, in a similar way, this individual self performing activities in (lit. moving about) the states of waking and dream, takes to the nest¹ (in the form) of the Brahman, for overcoming (lit. driving away) its fatigue. [1162]

¹This is the meaning of *antāya dhāvati* in BU, cf. the next verse.

अन्ताय धावतीत्युक्तं तस्यान्तस्य विशेषणम् ।

यत्र सुप्तो न कर्मति जाग्रत्स्वप्ननिषेधकृत् ॥११६३॥

(The meaning of) *antāya dhāvati* is stated (in the preceding verse). Now, there is a specification (lit. qualification) of that nest (*anta*) in *yatra supto na kam ...*;¹ it (is for) rejecting (the idea of the states of) waking and dream. [1163]

¹That is, *yatra supto na kam cana kāmam kāmāyate na kam cana svapnam paśyati* (BU 4.3.19).

सुप्तस्तिषृष्ववस्थासु सामान्येन यतस्ततः ।

विशिनष्ट्यात्मनः स्वापं यत्र सुप्तगिरा स्फुटम् ॥११६४॥

Since, in (all) the three states, it is sleeping, (remaining the same individual self) in common;¹ therefore, (the Śruti) clearly specifies the sleep of the individual self in the word *yatra supta*² [1164]

¹This has a reference to Sureśvara's statement in verses 1054-1059 above about the threefold character of each of the

three states, wherein the deep sleep state is common.

²Cf. *yatra supto na kaṁ cana kāmam kāmāyate na kaṁ cana svapnam paśyati* (BU 4.3.19).

In verses 1165-1166 is stated the purpose of other specifications (of the inner self) in the sentence, *na kaṁ cana*.

न कंचनेति कामो यः स्वप्नजाग्रदवस्थयोः ।

निषिध्यते सुषुप्तेऽसौ तथा स्वप्नोऽपि यस्तयोः ॥११६५॥

By the use of the words *na kaṁ cana* is rejected whatever desire there is in the states of waking and dream, as existing in the deep sleep state; so also (is rejected) the dream state in the two.¹

[1165]

¹This points to the significant use of *na kaṁ cana svapnam* in the sentence cited above under note 2 on the preceding verse.

स्वप्ने वा कामविरहाद्यथोक्तेनैव वर्त्मना ।

जाग्रत्कामनिषेधोऽतस्तत्र कामादिसंभवात् ॥११६६॥

Or, because of the absence of desire in the dream state, in the way stated,¹ there is rejection of desire in the waking state (also), for there is possible (the existence) of) desire etc. (in that state).²

[1166]

This is an interpretation of *na kaṁ cana kāmam kāmāyate*.

¹This refers to the statement *asaṅgo hy ayam puruṣaḥ* in BU 3.16.

²SP clarifies the last part of the verse *tatra kāmādisambhavāt* thus: *sati mātari bādhavidhuro jāgrati kāmādiḥ* (svapne tu naivam y arthaḥ).

Verse 1167 points to the significant use of each of the specifications in every threefold state.

एकैकस्यामवस्थायां जाग्रत्स्वप्नसुषप्तिभिः ।
यदि वा विद्यते भेदः कंचनेति च लिङ्गतः ॥११६७॥

And, if there is any distinction of desire in each one of the (three) states, owing to (the threefold character of each of) the states of waking, dream and deep sleep, that (in the dream state is rejected in the words) *na kaṁ cana*,¹ which is (expressive of) the reason. [1167]

This also is yet another explanation of *na kaṁ cana svapnam paśyati*.

¹These words, followed by *svapnam*, become the *liṅga* (= *hetu*) 'reason' for the statement enunciated.

In verses 1168-1171, there are stated the Śruti supports for the thought in the preceding verse.

त्रय आवसथा इति तथा च श्रुतिशासनम् ।
जाग्रत्स्वप्नसुषुप्तानां त्रैविध्यप्रतिपादकम् ॥११६८॥

So also, there is a teaching of the Śruti (in the words) 'There are three abodes,'¹ which affirm the threefold character of each of the (three) states of waking, dream and deep sleep. [1168]

¹The full sentence is *tasya traya āvasathās trayah svapnā ayam āvasatho 'yam āvasatho 'yam āvasatha iti* (Aitareyopaniṣad 1.3.12).

तत्र त्रयाणां स्थानानां जाग्रत्स्वप्ननिषेधनम् ।
न कंचनेति वाक्येन तयोरेव ग्रहः श्रुतेः ॥११६९॥

With respect to that (*tatra*), there is rejection of (only two of them, viz.) the states of waking and dream, in/by the statement *na kaṁ cana ...*; '(because) there is mention (i.e. use— *graha*) made of only (those) two.'¹ [1169]

¹This is to refer to the actual mention of *jāgrat* and *svapna*.

स्वप्नं न कंचनेत्युक्त्या सर्वस्वप्ननिषेधनम् ।
इति प्रबोधस्वप्नाभ्यां विविक्तं स्थानमुच्यते ॥११७०॥

In/By the statement *svapnam na kaṇ cana*,¹ there is rejection of all (the three types of) the dream states²—thus, there is pointed out the (character) of the deep sleep state as distinct from the waking and dream states.³ [1170]

¹For metre's sake, Sureśvara has altered the order in the actual wording of the Śruti.

²These pertain to each dream state in all the three states, as postulated by Sureśvara under the lead of *Aitareyopaniṣad*.

³In connection with the waking state, SP specifically points out: *kāmaṇ na kaṇ canety uktyā sarvajāgranniṣedhanam ity api praṣṭavyam*. (SP also has altered the order in the actual wording of the Śruti.)

जाग्रत्स्वप्नात्मकौ पक्षौ वितत्यात्मात्ममोहवान् ।
भुक्त्वा भोगानथ श्रान्तः पक्षौ संहृत्य चात्मनि ॥११७१॥

Having spread out the two wings in the form of the waking and the dream (states), the individual self, having association with (lit. being possessed of) ignorance about its own nature, the tired one (returns to 80 the natural state of the Ātman), after having experienced (lit. enjoyed) the enjoyments, folding its wings within. [1171]

This explains the meaning of *antāya dhāvati*.

verses 1172-1184 bring out the significance of the words *saṁhatya pakṣau*.

अविद्यायामवस्थानं तदुद्धृतस्य वस्तुनः ।
संहृत्यपक्षोपमया श्रुत्येह प्रतिपाद्यते ॥११७२॥

By/In the simile expressed in the words *saṁhatya pakṣau*, the Śruti conveys here,¹ the dwelling² in ignorance of the (real) thing (i.e. the inner self) that has arisen from it. [1172]

SP puts this as: *sābhāsāyām avidyāyām jagato 'vasthānam ity arthah.*

¹That is, in respect of ignorance (*avidyā*).

²Or, abode, i.e. final resort.

संलयायेति यच्छुद्धं रूपं स्यात्प्रत्यगात्मनः ।
प्रत्यविचदाभ आगत्य ध्रियते प्रत्यगात्मने ॥११७३॥

In the word *saṁlayāya* (is conveyed or indicated) the pure form which is (lit. would be) of (i.e. belonging to) the inner self. The (inner self), having the semblance of the inner sentience, having approached towards that the inner self, is supported (by itself or by the Ātman absolute). [1173]

This verse explains the meaning conveyed by *saṁlaya*. It does not state the expressed sense of the word, but it points to what is exemplified, viz. the final abode of the individual self. It should be noted that Sureśvara's verse also, is like the one in BU itself, awkwardly expressed. BU refers to the bird's flight towards its nest thus: *viparipatya ... saṁhatya pakṣau saṁlayāya* which would expect the verb *upagacchati*— all the verbal forms being connected with the bird as the agent of the actions conveyed by each of them. Then comes the verbal form *dhriyate* in the passive and expects another agent offering the support, put in the instrumental case. Therefore, SP adds *āgatyā ātmānam dhārayati*, changing the passive form in the sense of the active—so is this done in BUB also. Hume's translation reads: 'As a falcon ... is borne down to its nest...' (*śyenah ... saṁlayāya dhriyate*); Röer also translates '... is drawn to his nest,' with a footnote to it 'of its own accord'. there is thus some difficult construction which is (to use the Greek expression) an *anakoluthon*. It seems

men that there is correpondence between *saṁlayāya dhriyate* and *dhriyate paramātmāne*. SP has supplied after *dhriyate* the agent *ātmanā*, which is a bit vague expression!

बुद्ध्यादिकार्यसंहारे प्रत्यक्चैतन्यरूपिणः ।
चिद्विम्बस्यापि संहारो जलार्कप्रविलापवत् ॥११७४॥

At the withdrawal (lit. destruction) of the effect, viz. of the intellect etc., there occurs the withdrawal (or, merger) of the reflection of sentience (absolute) which has been (earlier) in the form of sentience within (the body, viz. the individual self) as the merger of (the rejection of) the sun in water. [1174]

SP indicates Śaṅkara's argument in BSB under 2.3.7, which may be stated here (by us) in brief: ... *brahmaṇa evāvikṛtasya to 'py ekasyānekabuddhyādimayatvam ... upādhyutpattyāsyopattipralayena ca pralaya iti*.

अविद्यावान्पुरा योऽभूदविद्याकार्यगश्चितिः ।
अविद्यया विभागोऽस्य चिद्विम्बस्योपजायते ॥११७५॥

It is owing to ignorance that there is effected the division of the reflection of the sentience (absolute), viz. of that sentience (i.e. the individual sense) which has been earlier¹ affected by ignorance and residing in the effect(s) of ignorance. [1175]

This affirms the oneness of the individual self with the Ātman.

¹This refers to the two states of waking and dream.

प्रत्याख्यातैव साविद्या सकार्या सर्वदात्मना ।
प्रत्याचष्टे तु नाविद्या निरात्मत्वाच्चिदात्मनः ॥११७६॥

That ignorance, together with (all of) its effects, is ever abandoned by the Ātman; ignorance, however, does not give up (the sentient individual selves) owing to its nature of being

non-Ātman.

[1176]

अविद्यातज्जकार्याभ्यामात्मान्यानवशेषतः ।

संबध्यते स्वतोऽसङ्ग आत्मत्वादेव कारणात् ॥११७७॥

The individual self is connected with ignorance and its effects; yet, because it is (really) of the nature of the Ātman, it is, in its nature, non-attached (to any other thing). [1177]

अविद्या यच्च तत्कार्यमात्मानं स्वात्मसिद्धये ।

संबिभत्सत्यनात्मत्वादात्मा तन्नानुमन्यते ॥११७८॥

Ignorance and whatever is its effect, all that seeks (lit. wishes) to be connected with the Ātman, so that it can itself¹ come to be established (as existent); but the Ātman does not consent to that (happening),² because of its (viz. ignorance) being non-Ātman. [1178]

This verse suggests, as SP puts it: *tasyāvidyākṛtasambandhe 'pi na vāstavāsaṅgatahātih.*

¹In the word *svātmānam*, the element *ātman* is a reflexive pronoun.

²Or, as SP puts it, it does not tolerate any such connection.

निःसङ्गस्य ससङ्गेन कटस्थस्य निरात्मना ।

आत्मनोऽनात्मना योगौ वास्तवो नोपपद्यते ॥११७९॥

(To accept) a real connection of the Ātman, which is (by its nature) non-attached (to anything else) and immutable with the non-Ātman (i.e. ignorance which is associated with attachment to the external objects) and is without immutability is not reasonable.¹ [1179]

¹Or, as SP puts it: *niścalasvabhāvarahita.*

प्रत्याख्यातात्मनैवेयं प्रत्यगात्मानमेकलम् ।

अविद्यालिङ्गते वह्निं घृतपिण्ड इवोल्बणम् ॥११८०॥

This ignorance, (though) rejected by the Ātman, clings to the individual/inner self, which is (in reality) just single,¹ as does some lump of ghee (cling to) powerful fire. [1180]

This explains the unreal connection of ignorance with the Ātman.

¹SP explains it as *saṁbandhāsahiṣṇutva*.

अविचारितसंसिद्धा संगतिः परमात्मनः ।
अविद्यातज्जकार्याभ्यामेवमेवेति गम्यताम् ॥११८१॥

Let it be understood that this association of the highest Ātman with ignorance and its effect(s) is thus, i.e. likewise, only established without any deliberate consideration. [1181]

एवं सत्यस्य बाधः स्यात्परमार्थात्मसंश्रयात् ।
संसारानर्थसंबन्धहेतोरात्मप्रमाणतः ॥११८२॥

This being so,¹ there will (lit. would) be the removal (or, stultification) of this connection with the undesired thing, viz. transmigratory existence, by resorting (or, taking) to the Ātman, the highest (real) thing, by resorting to the means of (knowing) the Ātman.² [1182]

¹This refers to the relation of ignorance to the Ātman as described in the preceding verse.

²This is Śruti sentences like, for instance, *tat tvam asi* (as points out).

प्रत्यग्धीमात्रतः प्रत्यङ्ङद्वयत्वविशेषणः ।
निःसंबन्धात्मसंबन्धादनात्मा त्वात्मवन्न सन् ॥११८३॥

The inner self becomes related to the attribute of being without (or devoid of) duality, only through (the acquisition of) the

knowledge of the inner¹ Ātman; while, however, the non-Ātman, not being like the Ātman,² (does not abide) owing to its connection with what has no relation whatever (to it).³

[1183]

¹Sureśvara uses the word *pratyak* to refer to (i) the self in (or, in association with) a transmigratory being, and (ii) sentience *par excellence*, viz. Ātman.

²This is sentience *par excellence*.

³Namely, ignorance (*avidyā*); cf. verse 1179 above.

समस्तव्यस्ततामेवं सति व्याचक्षतेऽत्र ये ।
कर्षन्ति नासिकाग्रेण कर्णमूलं सुखेन ते ॥११८४॥

While this is so, those,¹ who expound this context (viz. the veracity in the theory of) the Ātman's comprising collectivity and particularity, are (only) happily scratching the ear by the tip of the nose!

[1184]

¹This is, on the authority of SP, reference to Bhartṛprapañca.

Verses 1185-1186 are for rejecting the existence of non-Ātman.

आत्मवस्त्वतिरेकेण नान्यद्वस्त्वस्ति मानतः ।
तन्मानमिति चेन्मैवं यतस्तत्प्राक्प्रबोधतः ॥११८५॥

There is no existent thing other than (or, apart from) the real thing, i.e. Ātman, (that can be known) by any means of knowing. If (however, one says that) 'There exist means',¹ (our reply is:) '(Do) not (say) so, it (may be said to exist before the rise of knowledge (about the real nature of the Ātman))'.

[1185]

This is an argument of one who holds the theory of *sama-stavyastatā* of the Ātman, i.e. Bhartṛprapañca, referred to in the preceding verse.

¹ Also, there are meant *pratyakṣa* etc. that are commonly known means of knowledge; the singular stands for the plural.

अस्तु वस्तुवन्तरं चान्यत्तस्याप्यात्माभिसंगतौ ।
को हेतुरिति वक्तव्यं नाविद्याकारकत्वतः ॥११८६॥

Well, (suppose) there is a thing other (than the Ātman); but then, in that case, it is to be told as to what would/could be the reason for its close association with (or, relation to) the Ātman. Also, that cannot be ignorance owing to its nature of not being (really) productive.¹ [1186]

¹ SP rightly invites attention to the Saṃdhi of *avidyā* and *ārakatvataḥ*.

समस्तव्यस्तताव्याख्या तस्मादन्धपरंपरा ।
वैश्वानरवरादेव न तु न्यायानुसारतः ॥११८७॥

Therefore, the explanation in the view (of those about the Ātman's comprising) collectivity and particularity (which has been under reference in the preceding verses) is but a line of blind men. It has proceeded (or, suggested itself) only through the favours of fire;¹ but² not in keeping with (accepted code of) reasoning. [1187]

This verse introduces the refutation of Bhartṛprapañca's view.

¹ This is often mentioned by Sureśvara in relation to the expounder of the theory, i.e. Bhartṛprapañca. This justifies SP referring the earlier verses to that thinker.

² SP reads in *tu* some more meaning thus: *anātmārthasyātmani vighaṭanābhāras tuśabdārthaḥ*.

It follows, in verses 1188-1194, the exposition of the example of a falcon, according to Bhartṛprapañca.

अस्य हि द्वैतविषये विज्ञानं भानुरश्मिवत् ।

विकीर्णं बोधदेशीयं समन्तात्प्रथते दृशेः ॥११८८॥

Indeed,¹ in the case of this seer (i.e. the individual self form of the Ātman), its (specific) knowledge is, like the sun's rays, spread all over the world (lit. area) of duality. [1188]

SP seems to quote from Bhartṛprapañca thus: *taduktam: asya i. dvaitaviṣaye viśeṣavijñānam ādityaraśmivad vikīrṇam jāgṛtadeśavat samantād avabhāṣata iti.*

¹This *hi* is, according to SP, *yathoktabhāṣyadyotaka*.

तत्र कर्मप्रसूतोऽयं कामः सर्वप्रवृत्तिकृत् ।
जाता कर्मण एवेयं भावनास्यान्तरात्मनः ॥११८९॥

There,¹ this desire, which is produced by/from activity, causes all dealings. (And) this impression² (of the external objects) which belongs to the inner self, is (also) produced only from activity.³ [1189]

¹This is a reference to *dvaitaviṣaye* which is already mentioned in the preceding verse.

²*bhāvanā* has its variant *vāsanā*, so noted in the AnSS edition. But that does not make any difference, since Sureśvara has used both these words synonymously.

³SP supports this, citing *uktam hi— tatra kāmāḥ karmanāḥ phalaḥ karmanā eva tu vāsaneti.*

यथालक्षणया कर्म कृतं भावनयात्मना ।
फलं तादृग्विधं दातुमेकीभवति सात्मनः ॥११९०॥

That impression becomes one with the Ātman, viz. that whose nature is already stated and through (the force of) which an activity is done by the individual self, in order to yield (to it) that kind of result which is in accordance with itself. [1190]

This refers to the experiences in the waking state.

तयानुरञ्जित इव ह्यात्मा कामान्परीप्सति ।

वासनालक्षणः कामः स्वप्नसर्गाय जायते ॥११९१॥

Thus,¹ the Ātman, (in this context, the individual self) which is tinted by it (viz. *bhāvanā* or *vāsanā*), as it were, wishes to acquire (the fulfilment of) desires, (and) desire,² characterized by (that) impression, leads to (lit. becomes born for experiencing) the creation (or, coming into existence) of the dream state. [1191]

This, now, refers to the dream state.

¹This is for *hi* which, according to SP, refers to the Bhāṣya under reference: *uktabhāṣyārtho hiśabdah*.

²For clarification SP seems to quote from Bhartṛprapañca: (*tadāhuh*) *tadanuranjito vijñānātmā kāmāṃ kāmayaṭa ity etad bhavati (iti)*.

सुखादिफलभोगाय स्वप्नः क्षुद्रस्य कर्मणः ।

परिच्छेदेन निर्मातृज्ञानं च प्रत्यगात्मनः ॥११९२॥

The dream state is for the enjoyment (or, experience) of the results, viz. happiness and/or misery,¹ of acts which are (in fact) insignificant. And, there is, on the part of the individual self, the knowledge of being the creator (of the objects etc. in that state), through its delimitation (by ignorance).² [1192]

¹SP apparently quotes from the comment of Bhartṛprapañca: (*tadāhuh*) *tatra kāmataḥ svapnanirmāṇaṃ sukhaduḥkhaṃ darśayati (iti)*.

²But SP states: *pratīco jñānam arthasya vāsanotthasya iścāyakam ity arthaḥ*; accordingly, the translation could be: ... (state) definitive of them. In this case, *paricchedena* is in the instrumental case, expressive of *itthambhūtalakṣaṇa* (Pāṇini 2.3.21) 'the mark or attribute' of that knowledge. Our translation takes the instrumental form of *avidyā* as expressive of the agent (Pāṇini

2.3.16).

विज्ञानानविधायी हि विकारः कर्मणो यतः ।

विज्ञानं विपरीतार्थदर्शनं चेह भण्यते ॥११९३॥

Since the modification (i.e. the effect) of activity is indeed¹ in accordance with the (specific) knowledge (of the individual self);² therefore, it is said that the specific knowledge (of it) here³ is caused by the sight of the object(s) affording wrong (view, i.e. unreality).⁴ [1193]

¹Indeed, for *hi*, is, according to SP, taken over by Sureśvara from the Bhāṣya under reference.

²SP states in this context: (*uktaṃ hi*) *vijñānam punar bhāvanāparicchedavinirmātr vijñānānuvidhāyino hi karmaṇo vikriyā (iti)*.

³Here means 'in the dream state'.

⁴Cf. SP: *viparītadarśanam avidyeti bhāṣyeṇa tat (=vijñāna) svarūpam āha*. SP justifies its explanation here of *paricchedena* in the preceding verse, thus: *arthopalabdhiṃ vinā karmaphala-bhogāyogāt tadvikriyā bhavati jñānānuvidhāyinī tato yuktaṃ jñānasya paricchedakatvam ity arthaḥ*.

साविद्या सति बाह्येऽर्थे द्रष्टव्येऽलं न चासति ।

कामः स एव बोधेऽस्य विज्ञानात्मन इष्यते ॥११९४॥

That ignorance is capable of showing (some thing), when there exists an external object and not (so) when there does not exist (any such object);¹ (and) that itself is called the desire of the individual self having (specific) knowledge, at the time when it is in the waking state.² [1194]

¹This leads to *mithyājñāna*; this is justified by SP which quotes: *yathoktam) sāpi sati dravye viparītaṃ grāhayed (iti)*.

²Translation follows the text *bodhe 'sya* as it is. There is, nevertheless, a note by the editor of the AnSS edition. *bāhyo*

'syeti syāt which means that the desire of the individual self is external (i.e. pertains to external object). And this seems to be more likely because (i) there is a Śruti statement: *jāgratsvapnayor jīvasya yaḥ kāmo 'vidyāśahitaḥ sa tato bahir-eveṣyate 'saigo hi ...* and (ii) apparently a quotation from the comment of Bhartṛprapañca: (*tadāhuḥ*) *sa eṣa bāhyo vijñānātmā ity uktam (iti)*.

Verses 1195-1202 present the conclusion drawn from the view of Bhartṛprapañca.

प्रयोक्त्री भावना तत्र कर्म त्वस्य विकारकृत् ।
विपरीतग्रहाय स्यादन्यथेति विनिश्चितिः ॥११९५॥

In that context, the impression (of external objects) is the cause of the employment (or, impelling) (of the individual self in an activity) and (*tu*) that activity is its modifier;¹ otherwise, there is a likelihood that its definite understanding would be wrong.² [1195]

¹Read SP: *kāmo bhāvanā puruṣaṁ viṣayeṣu pravartayati karma tasya sukhādivikāra-kāri*. Also read the quotation in SP: (*tad uktam*) *tatra prayoktrī bhāvanā karma vikarṭṛ (iti)*. Activity thus brings about some change in the individual self.

²Read SP: *anyathā viniścitiḥ mithyājñānam tadviparītagrahaṇaḥ etur na yathārtham paricchettum alam*.

कामेहाभावनाज्ञानपदार्थानां यथाक्रमम् ।
परस्परव्यपेक्षत्वादेवं स्यादेकवाक्यता ॥११९६॥

Thus, there would be the consistency in the meanings of the (different) words *kāma*, *īhā*, *bhāvanā* and *jñāna*, which are mutually dependent, in the order of their enumeration, having the capacity to present one cogently (meaningful) sentence.

[1196]

Read the quotation in SP: (*uktaṃ hi*) *evaṃ kāmakarma-bhāvanāvijñānānām parasparāpekṣatvād ekārthatā (iti)*.

तत्र भावनयैवात्मा कामान्कामयते तथा ।

विद्यया वीक्षते चार्थानविद्योत्थापितानिह ॥११९७॥

There, in that context, the individual self longs for desires only on account of the impressions (of the external objects) and, in the same way (*tathā*),¹ sees (i.e. understands), through (its acquired specific) knowledge (*vidyā*)² the (external) objects produced (lit. raised) by ignorance. [1197]

¹SP points to the use of *tathā* as a part of the example of *bhāvanā*. Yet, in the way which we have accepted it, that word connects the earlier part with *vidyayā vīkṣate* that continues the train of the thought smoothly.

²*vidyā* is understood here as *vijñāna*. The note by the editor of AnSS edition in relation to *vidyayā* reads: *avidyayeti cchedo 'pekṣito na veti vicāraṇīyaṃ vidvadbhiḥ*. Obviously, this note has arisen from the manuscript style of writing the original work in *saṃhitā* (= *paraḥ sannikarṣaḥ*) form, i.e. all the letters are written together, marking no division into distinct words and, therefore, there is every likelihood that ... *tathāvidyayāvīkṣate* ... could be split into the words *tathā avidyayā vīkṣate*, (though there is juncture of the two lines between *tathā* and *avidyayā/vidyayā*). It seems that there is a deliberate use of word *vidyayā* by Sureśvara, in contrast with *avidyā* (occurring later in a compound form though!) Also, let us not forget his use of the word *vijñāna* in the sense of wrong/false knowledge in contrast with its usual sense of right/correct knowledge.

Also, the apparent quotation from the comment of Bhartr̥prapañca: (*yathāhuḥ*) *tatra bhāvanayā kāmāyate vidyayā paśyati dvaitaviṣayaṃ (iti)* — though not clear in respect of the dissolution of the Saṃdhi, its use of the object *dvaitaviṣaya* points to the unusual sense of *vidyā*, which is offered by us, and not in the usually accepted sense. (It may be noted, in passing, that one

ms. of SP seems to read *kāmayate* 'vidyayā' as noted by the editor of AnSS edition and of MRI edition).

संप्रसादे तु बाह्यस्य वस्तुनोऽसंभवादिदम् ।
कर्म निस्पन्दमेवास्ते भावनापि च शाम्यति ॥११९८॥

But, in the state of deep sleep, this activity is only without any flutter, on account of the impossibility of (the existence of) any external object; so also does the impression (of external objects) dies down (or, lit. becomes quiet). [1198]

प्रयोज्यविरहात्कर्मकार्यस्यासंभवात्तथा ॥११९९॥
विद्यापि विपरीतस्य प्रविभक्तस्य वस्तुनः ।
अभावादविशेषात्मज्ञानोऽयं व्यवतिष्ठते ॥१२००॥

Owing to the absence of one, who should be incited (to act), and, so also (*tathā*), owing to the impossibility of there being any effect (to be produced by any) activity, [1199]
there is the (specific) knowledge (on the part of the individual self)¹ about (lit. of) a false thing separated (i.e. distinct) from itself (and) this (individual self) remains without any knowledge of any particular nature, owing to the absence (of any distinct thing).² [1200]

¹This is again a case where the Samdhi could be of *tathā* and *avidyā* (as doubted by the editor of the AnSS edition earlier; under verse 1197 above). He has, nevertheless, kept here from expressing the doubt. Possibly he is under the influence of the citation of SP from Bhartṛprapañca: (*tad āhuh*) *vidyāpi viparītasya pravibhaktasya grāhayitavyasyābhāvān na viśeṣavijñānāya kalpate (iti)*.

²In the last line, we understand the repetition of *pravibhaktasya vastunah*.

दाह्याभावाद्यथा वह्निः स्वात्मन्येवोपशाम्यति ।
कर्मण्यस्तमिते तद्वत्प्रत्यङ्ङास्ते स्वभावतः ॥१२०१॥

As fire goes out (i.e. becomes extinguished) on its own, when there is not a thing to be burnt; similarly, the inner self, by its nature, remains (non-attached to activity) when activity has disappeared (in the deep sleep state). [1201]

Compare the well-known saying: *atṛṇe patito vahniḥ svayam evopaśāmyati*.

एवं कृत्वेदमत्राह श्रुतिः कामं न कं चन ।

कामकर्मादिनिर्मुक्तं सुषुप्ते रूपमात्मनः ॥१२०२॥

Having done this,¹ here (i.e. in this context) the Śruti has stated *kāmaṁ na kaṁ cana*, (thereby referring to) the form (or, nature) of the individual self (which is not distinct from the Ātman) in the deep sleep state as totally free (*nirmukta*) from desire, activity etc. [1202]

¹SP states: *uktarītyā susupte kāmādidhvastir astīti kṛtvā*. Yet, it is possible to understand it to mean: 'having thus described the state of deep sleep (so far),' now the Śruti uses the example of *śyena* to corroborate the earlier statements.

Verses 1203-1205 reaffirm the need for carefully examining the explanation by *Bhārṭṛprapañca*.

इत्येवं श्येनदृष्टान्तः कैश्चिद्व्याख्यायि सादरैः ।

तत्र युक्तमयुक्तं वा श्रुतिवाक्यानुसारतः ॥१२०३॥

न्यायैर्जगति संसिद्धैः स्वयमेव विचार्यताम् ।

अपक्षपातपतितैर्विद्वद्भिर्वस्तुसिद्धये ॥१२०४॥

Thus, i.e. in this manner, was explained the example of falcon by some thinkers¹ who are full of respect (for the Śruti). What is correct or incorrect (lit. proper or improper) therein, in accordance with the statements in the Śruti, [1203] should be considered by the impartial learned, on their own,

(and) with the methods of reasoning (known) in the world, so that (the nature of) the real thing becomes (firmly) established. [1204]

¹Once again, this refers to Bhartṛprapañca.

एतदस्य स्वतो रूपं यदत्रोपप्रदर्शितम् ।
अविद्याकामकर्मादिविविक्तं यत्सुषुप्तगम् ॥१२०५॥

This is the form of this one, in its own right, which is described (or, revealed) here;¹ viz. that which belongs to the state of deep sleep, (and) is entirely distinct from ignorance, desire, activity etc.² [1205]

¹This refers to the portion of the Śruti explained a little before, just now.

²The word 'etc.' refers to the products of each of those which are mentioned.

Now, in verses 1206-1213, there are introductory remarks for the discussion of BU 4.3.20 in verse 1209 up to 1295; they bring out the nature of ignorance as of no significance whatever.

इतोऽन्यथा तु यद्रूपं जाग्रत्स्वप्नस्वलक्षणम् ।
तदस्य परतो ज्ञेयमात्माज्ञानैकहेतुकम् ॥१२०६॥

Whatever other form (of this one); which has the character of one in the states of waking and dream; that has to be known as away (i.e. different, *parataḥ*) from this one and should be known as having only ignorance about itself as its cause.

[1206]

यद्धेतुकमिदं रूपं साविद्यानर्थकारिणी ।
सा स्वतः परतो वास्येत्येतदत्राधुनोच्यते ॥१२०७॥

That ignorance, by which is caused this (above mentioned)

form (of the Ātman), is but the origin/maker of all that is undesirable/undesired. Now, then, is discussed whether it has come to be (so) on account of itself or of some other thing.

[1207]

न त्वागन्तुरविद्येयमनिर्मोक्षप्रसङ्गतः ।

आत्मस्वभावोऽविद्येयं न वेत्येतद्विचार्यते ॥१२०८॥

(One would say:) 'But, indeed, this ignorance is not adventitious; otherwise, there would occur the contingency of (one's) not attaining liberation. (Therefore), it is to be considered whether or not this ignorance is the nature of the Ātman.

[1208]

SP points out that this question is introduced in BUB and is repeated by Sureśvara accordingly.

अविद्याकामकर्मादिप्रविविक्तमिहात्मनः ।

रूपं पूर्वमुपन्यस्तं तस्य साक्षाच्चिकीर्षया ॥१२०९॥

In this respect, there is already stated earlier what form the Ātman has, viz. that which is fully distinct from ignorance, desire, activity etc.—(this was done) with a desire to make it directly understandable (or, perceptible).

[1209]

अविद्यायाश्च यत्कार्यं तच्च वाच्यमशेषतः ।

इत्याविष्कृतिसिद्ध्यर्थं परो ग्रन्थोऽवतार्यते ॥१२१०॥

(Nevertheless) whatever are the effects¹ of ignorance have to be pointed out (lit. stated) in their entirety (lit. leaving out none of them); in order, therefore, to reveal (or lit. to accomplish the description of) the same in the subsequent portion of the text.

[1210]

This is to state why the discussion on the veins is introduced

kāryam, though in singular, is understood for *kāryāṇi* in plural.

नाड्यायत्ता यतोऽविद्याकार्यदृष्टिरतः परम् ।

नाडीनां स्यादुपन्यासस्ता वा अस्येतिवाक्यतः ॥१२११॥

The answer:) 'Since the sight (i.e. clear understanding) of the effects of ignorance is dependent on the veins, therefore, there is taken up (lit. desired) the introduction (of the discussion about) the veins, from the sentence *tā asya*' [1211]

verses 1212-1217 refer to the portion on *nādīs* for proving the nature (or, character) of the dream objects.

यद्वा मृषात्वसिद्ध्यर्थं नाड्युपन्यास इष्यते ।

अत्यन्ततनुतो ह्यन्तर्विन्ध्यादेरीक्षणं कुतः ॥१२१२॥

or perhaps the introduction (of the thought) of veins is for the purpose of establishing/proving the false nature of that ignorance). (A question is asked in this context:) 'Whence can there be the sight of the mount of Vindhya and others beside (them, despite) indeed the extreme fineness (or, smallness) of the same?' [1212]

अविद्याकार्यमेतच्चेदविद्यावन्मृषेष्ण्यते ।

अतो मृषात्वसिद्ध्यर्थं तनुनाडीपरिग्रहः ॥१२१३॥

and this effect of ignorance is accepted (lit. desired to be), like ignorance (itself), false. Therefore, (it is) for proving its falsity that there is discussion taken up of the veins which are fine. [1213]

follows in verses 1214ff., word to word explanation of BU 20.

ता वा अस्य हिता नाम नाड्यः सूक्ष्मा हृदि स्थिताः ।

अपकर्षेतरौ याभिः कार्यस्यात्मा समीक्षते ॥१२१४॥

Those indeed are the veins of this (individual's body) named Hitā,¹ fine (in size), situated (or, resting) in the heart (of the same), and through which the individual sees the decrease and increase (lit. the otherwise) of the effect (of activity).²

[1214]

¹These are mentioned earlier also, in BUB 2.1.19 and 4.2.3.

²This line, viz. the second, is for explaining the purposful association of the veins and the individual self.

सहस्रतमभागेन केशस्य परिणाहतः ।

नाड्योऽणिम्ना समानास्ता नानान्नरससंभृताः ॥१२१५॥

Those veins are, in their magnitude, equal of a hair in its one thousandth part (of division) and they are full of various serums (lit. juices).

[1215]

तास्वन्नरसपूर्णासु स आत्माविद्ययात्मनः ।

रक्तपीतादिरूपत्वं मन्यते स्वप्नमध्यगः ॥१२१६॥

It is in those (veins), which are full of (i.e. filled with) the saps of foods that the individual self sees (lit. thinks as existing) the nature of being red and/or yellow (in colours as its own) on account of ignorance (which has affected it), while it is in (lit. the midst of) the dream state.

[1216]

रसवर्णानुरोधेन रक्तपीतादिरूपताम् ।

प्रतीचो भोगसिद्ध्यर्थं देवतैति मृषात्मिकाम् ॥१२१७॥

In accordance with the colour of the sap (of food) does the deity¹ attain the nature of the colour red and/or yellow, which is merely of false nature, in order that there is secured (lit. established) the experience (lit. enjoyment) of the inner self.

[1217]

¹SP clarifies this as *lingādiśabdā*, i.e. which can be described as having a subtle form, with respect to every kind of sap and/or organ. This *linga* is mentioned in BUB as *saptadaśaka* 'consisting of seventeen (organs)'—these seventeen are: five organs of the sense, five, of action, five vital airs, the intellect and *manas* alternatively, five elements, ten organs, vital force (in its fivefold aspects) and *manas* (in its 3/4 aspects).

Verse 1218 states the reason as to why there has been description of veins in the fourth Adhyāya (i.e. BU second Adhyāya).

बौद्धविज्ञानविक्षेपसंहारकथनाय तु ।
चतुर्थे नाड्युपन्यासो विज्ञानात्मविशुद्धये ॥१२१८॥

As for the introduction (of the discussion on the nature) of the veins in the fourth¹ Adhyāya, it was only for explaining the expansion and contraction of the intellect,² for (the purpose of) clarifying the nature of the individual self. [1218]

¹This is the old traditional reference to BU 2.1.

²The word *vijñāna* is used here in two senses: (i) the intellect *buddhi*, i.e. *buddhi*, on the aspect of the internal organs) and (ii) the Vedāntin's acceptance of that word in the sense of individual self which is possessed of specific knowledge (beside knowledge, of the Brahman).

Verse 1219 states the reason as to why there is description of veins in the sixth Adhyāya (viz. BU 4th Adhyāya).

देवतान्नरसाणुत्वज्ञानाय च पुनर्ग्रहः ।
षष्ठादौ सूक्ष्मनाडीनां तद्द्वारात्मावबुद्धये ॥१२१९॥

And this (introduction of the discussion of veins) once again is for the purpose of making known the subtleness of the sap of the food for the deities. (And) in the beginning of

the sixth¹ the (introduction of) subtle veins is for the purpose of getting to know (the nature of) the Ātman through them.

[1219]

¹This is traditional reference to BU 4.2.

Verse 1220 states the reason for introducing the discussion of veins here.

भोक्तुः स्वरूपविज्ञप्त्या इह नाडीपरिग्रहः ।
क्रियते कामकर्मादिविवेकस्य विवक्षया ॥१२२०॥

Here, the introduction (of the discussion on the nature) of the veins is brought in for conveying (or, making known) the nature of the experiencer (lit. enjoyer), with the intention of (lit. the desire to speak about) the discrimination among desire, activity etc.

[1220]

Verses 1221-1223 state why individual selves are different, even though sentience within is the same.

न विज्ञानात्मनो रूपं चैतन्यादन्यदिष्यते ।
स्वात्माविद्यैकहेत्वेव तस्य रूपान्तरं यतः ॥१२२१॥

It is not accepted (lit. desired to agree to) that the nature of the individual self (possessing specific knowledge) is different from (that of) sentience (absolute), since its other form is (grasped by one) as rooted in (i.e. caused by) only ignorance about its own nature.

[1221]

Read SP: *kāmādyātmano ... ity arthah.*

विज्ञानपुरुषाणां हि सर्वेषामेकरूपता ।
चैतन्यात्मतया ज्ञेया तदबोधात्तु भिन्नता ॥१२२२॥

Indeed, all of the individual selves have the sameness of nature,

which is to be known as being sentience; but there is noticed variety (among them) owing to the non-knowing of it. [1222]

अध्यात्मादिविभागोऽयं न स्वतः प्रत्यगात्मनः ।
तदबोधैकहेतुत्वादप्राप्तैकात्म्यवस्तुकः ॥१२२३॥

This division, viz. *adhyātma* etc.¹ does not exist in (or, is not of) the individual self, as being caused on account of itself; it belongs to the thing (of reality), which has not obtained (i.e. existed, its real nature, viz.) singleness, because of its having the non-knowing of itself as its cause. [1223]

¹The *ādhibhautika* and *ādhidaivika* are meant.

verses 1224-1225 state what obstructs the desires etc. in remaining their natural form.

लिङ्गमेव ततो रूपमात्माविद्यैकहेतुकम् ।
कर्मोत्था भावना याश्च रूपं ता अपि लिङ्गवत् ॥१२२४॥

Thence the subtle form¹ itself is having the cause only in ignorance about (the nature of) the inner self. Those impressions, which arise from activity, also are (having) a form similar to (that of) the subtle form.² [1224]

¹Cf. note 1 on verse 1217 above.

²Cf. Pāṇini 5.1.116: *tatra tasyeva*.

लिङ्गं चाप्यतिसूक्ष्मं तन्नाडीमध्यगतिक्षमम् ।
स्वामिकर्मवशात्तच्च रूपं गृह्णाति दैवतम् ॥१२२५॥

Also, the subtle form is extremely small in magnitude and is suitable (in size) for its movement through the veins (of the body) and a deity takes (or, assumes) that (subtle) form under the sway (or, influence) of the activity of the master (viz. the individual self). [1225]

Verses 1226-1231 state that the enjoyment/experience of the individual self is in consonance with the magnitude/form of the object(s) of experience.

भोगमात्रप्रसिद्धयर्थं चैतन्याभासमात्रतः ।

नानात्मरूपमात्मायं किञ्चिदन्यदपेक्षते ॥१२२६॥

Only for securing the experience (lit. enjoyment) does this individual self depend on this other insignificant thing, which has in it a variety of forms, only through the semblance of (its) sentience. [1226]

विज्ञानपुरुषः सोऽयमधिदैवादिवसनः ।

लिङ्गदेहानुरोधी सल्लिङ्गे कर्त्रादिविक्रियाम् ।

अविद्योपहतात्मा सन्नात्मत्वेनाभिमन्यते ॥१२२७॥

Having its nature (as) affected by ignorance, this known (so 'yam) individual self, becoming possessed of (specific) knowledge, having impressions which are rooted in *adhidaiva* etc.¹ and having regard to the subtle form, considers the modifications in the subtle form such as becoming the agent etc. to be belonging to itself. [1227]

¹*adhibhautika* is also meant.

लिङ्गस्य विक्रिया यापि सा रसानुविधायिनी ॥१२२८॥

अधिदैवादिदेहस्य रसहेतुः स्थितिर्यतः ।

एताभिर्वा इति तथा तेनैता इति च श्रुतिः ॥१२२९॥

And whatever be the modification in the subtle form, it also is agreeing with the serum (in the vein). [1228]

Since the sustenance of the body, which is *adhidaiva* etc.,¹ has the serum (in the vein) as its support (i.e. basis, or cause), therefore, there are the Śruti statements *etābhir vā ...* and also *tenaitāh* [1229]

¹adhibhautika is also meant.

रसोऽपि चायं जग्धान्नपरिणाममपेक्षते ।
यतोऽतो वातपित्तादीन्धातून्सोऽप्यनुरुध्यते ॥१२३०॥

And, since this serum also depends on the modification of the food which is eaten, therefore, that (viz. serum) also agrees with the humours, viz. wind, bile etc.¹ [1230]

¹The word 'etc.' refers to phlegm.

धातुरूपानुरोधी सन्नसो रक्तादिमेत्यथ ।
तं वर्णं देवतादेहो यथोक्तमनुरुध्यते ॥१२३१॥

Agreeing with the humour(s), that serum also then mixes into (lit. goes to) blood etc. and then the body of each of the entities comes to have that colour which is in keeping with what is said (viz. the colour of the serum as stated). [1231]

verses 1232-1237 state the *pranālī* 'manner' of enjoyment of individual self.

आत्मनोऽविक्रियस्यैव लिङ्गे स्वाभासवर्त्मना ।
दर्शनं शुक्लपीतादेर्जायते कर्मणो वशात् ॥१२३२॥

As a result of acts, the sight of the individual self, though (in reality) not undergoing (any) modification, also becomes in its subtle form as of one which is white, yellow etc. in colour, in the way of its semblance. [1232]

आत्मन्येष यतः सर्वस्तदविद्यैकहेतुकः ।
अध्यात्मादिप्रपञ्चो हि श्रुतिकारजतादिवत् ॥१२३३॥

All this extensive world of *adhyātma* etc., in the individual self, has for its cause only ignorance (about the nature) of

itself—it is like (that of) silver in a mother-of-pearl.¹ [1233]

¹The use of the suffix *-vat* is according to Pāṇini 5.1.116: *tatra tasyeva*.

सत्यानृतविभागोऽयं तथाप्यनृतवस्तुनि ।
जाग्रद्भूमौ प्रसिद्धोऽस्य लोके स्वप्ने यथा तथा ॥१२३४॥

So also, this division into truth and falsehood is (actually occurrent) in a false thing; for this individual self as (it is) well-known among people to be in the state of waking, so (it is) in the state of dream. [1234]

चित्स्वभावातिरेकेण नाविद्यादेः प्रसिध्यति ।
सत्यत्वमिव मानेन मिथ्यात्वमपि वस्तुनः ॥१२३५॥

As truth, so also falsehood, of the thing, viz. of ignorance etc.,¹ does not get established (or, proven) as existing apart (or, distinct) from what is of the nature of sentience. [1235]

¹This 'etc.' refers to the various effects of ignorance, desire and activity.

चिन्मात्रतैव तेनास्य कार्यकारणवस्तुनः ।
श्रुत्येहोच्चैः प्रत्यपादि तत्त्वमस्यादिरूपया ॥१२३६॥

Therefore (or, for that reason) has the Śruti, which is in the form of (sentences like) *tat tvam asi*, loudly (i.e. clearly or effectively) declared here¹ that this thing, viz. the effect(s) and the cause(s), is mere sentience (in reality). [1236]

¹That is, in the context of liberation.

मिथ्याभावनमात्राधेर्निरस्तविकृतेरिह ।
प्रतीचो दर्शनं स्वप्ने श्रुत्या मिथ्येति वर्ण्यते ॥१२३७॥

It is declared by the Śruti¹ that the experiencing (lit. seeing) on the part of the inner self, which is far away from any modification (or, has cast off all modifications), is false, on account of the delimiting adjuncts which are but falsely conceived notions. [1237]

¹SP refers to *yatrainam* ... to refer it to the dream state.

verses 1238-1241 bring out the purport of such distinctions as *kla* etc. in the Śruti.

शुक्लं स्यात्कफभूयस्त्वे वातपित्तसमागमात् ।
 नीलं कृष्णं च वातस्य परिणामं प्रचक्षते ॥१२३८॥
 पिङ्गलं पित्तबाहुल्याद्धरितो मन्दपित्तकः ।
 इति वैषम्यतो वर्णो धातुसाम्येऽतिलोहितः ॥१२३९॥

They describe the modification (of food which is eaten and has become the serum) as white, when there is phlegm in great measure (than other humours); as blue owing to the connection (or, mixing) of wind and bile; and black as (the modification) of/by wine. [1238]

(It is) brownish owing to the profuseness of bile (and) green owing to smaller/lesser measure of bile; thus, the colour is caused by the unequal proportion (of humours); but when the humours which have equality of proportion, (the food is) extremely red. [1239]

इत्येवमादि बहुधा परिणामं प्रचक्षते ।
 चिकित्साशास्त्रतत्त्वज्ञा जग्धस्यात्रस्य नाडिगम् ॥१२४०॥

Thus and in other ways¹ have they variously described the modification (into serum) of the food which is eaten in the veins; they, who know the science of medicine. [1240]

¹On this, SP offers a fairly long citation: (*uktam hi*) *tāsāṃ hāsvaṃ turīyāṃśavibhāgena pañcasaptatyadhikaśatam anila-*

raktam bhavati

Also, it adds: *suśruto 'py āha—*

arunāḥ śirā vātavahā nīlāḥ pittavahāḥ śirāḥ /

asṛgvahās tu rohinyo gauryaḥ śleṣmavahāḥ śirāḥ // iti

(*Suśruta* 3.7.18, but exactly the same).

and

yājñavalkyaś cāha—

anantā raśmayas tasya dīpavad vyavasthitā hr̥di /

sitāsītāḥ kaṇḍūnīlāḥ kapilāḥ pītalohitāḥ // iti

(*Yājñavalkya-smṛti* 3.166).

Verse 1241 is introductory to the description of the delusion on the part of the individual self which is described in 1242-1243.

अथैतस्मिन्नन्तरसपरिणामे यथोदिते ।

प्रत्यङ्मोहस्य यत्कार्यमधुना तत्प्रपञ्च्यते ॥१२४१॥

Now, as (or, since)¹ this modification of the food which is eaten into serum is thus described, there is described in full extent that which is the effect of ignorance about the nature of (or, on the part) the inner self.

[1241]

¹This for *athaitasmin* ... which SP explains as *nimitte saptamī*.

जगदात्मनि निर्माय साधिभूताधिदैवतम् ।

शुक्लाद्याकृतिनाडीस्थमात्मा पश्यत्यविद्यया ॥१२४२॥

Having created within itself, this world which, together with its *adhibhūta* and *adhidaivata* forms, abides in the veins such as are white in appearance (*ākṛti*) (and) the individual self sees (lit. within) owing to ignorance.

[1242]

अविद्यायाः परा काष्ठाथेदानीमुच्यते स्फुटम् ।

तत्कार्यतारतम्येन साविद्या भिद्यते यतः ॥१२४३॥

Now is stated clearly the farthest limit of ignorance, since

that ignorance has differentiated itself in accordance with greater or lesser measure of its effect(s). [1243]

This verse points out the purpose of the ensuring portion, even after the effect of ignorance is already explained in *atha yo 'nyām ...* (BU 1.4.10).

Now follows in verses 1244-1262 exposition on the nature of ignorance.

First, in verses 1244-1246, there is stated the rejection of distinctions in ignorance.

लिङ्गादिकार्यभेदेन साविद्या भिद्यते सदा ।
स्वतस्त्वविद्याभेदोऽत्र मनागपि न विद्यते ॥१२४४॥

That ignorance ever differentiates itself into the distinction(s) among the effect(s) of the subtle form etc. (In reality), however, there does not obtain (or, exist) any of (lit. even a little of) the distinctions in ignorance. [1244]

This verse discards the view of some Vedāntins (*svayūthyas*) who hold that there are distinctions in the nature of ignorance (SP). This explains *yāvanti jñānāni*

तल्लिङ्गं वासनानीडं सूक्ष्मं स्वच्छस्वभावकम् ।
नाडीगतरसोपाधिसंसर्गात्स्फटिकादिवत् ॥१२४५॥

The subtle form (produced from ignorance) is having its nest (i.e. basis or support) in the impression(s) (of the external objects), very minute, of a pure nature and, like a crystal etc., (possessed of that colour which is produced) by the contact of the attribute of the serum that flows (or exists) in the nerve. [1245]

धर्मादिप्रेरकोद्भूतरथस्त्रीहस्तिलक्षण-
नानाकृतिरसाद्यात्म ह्यात्मनोऽलुप्तचक्षुषः ।

प्रथते पुरतोऽविद्यामात्रतत्त्वं विनश्वरम् ॥१२४६॥

(That subtle form produced from ignorance,) which has various appearances of a chariot or of a woman or of an elephant, have their origin in the urging force of merit etc.¹ and, being of the nature of the serum etc.,² presents itself before the individual self that has not lost its vision—(and is) perishable and of the nature of ignorance. [1246] .

It is possible to read *dhamādi ... rasādyātma* as two words thus: *dharmādi ... nānākṛti* and *rasādyātma*; for, the original single word is an inordinately long compound! However, even the first word of this proposed division is equally long! Therefore, we have refrained from suggesting any emendation. Yet, as the translation shows, we can read the too long compound as a Dvandva compound comprising the two compounds. Accordingly, we have joined them by 'and'. So also is noticeable the division in the meaning offered by SP: *jāgradbhogadādrṣṭa ... nānākāropetam* and *aśītādi ... sahakṛtam*.

This refers to the distinct effects of ignorance in the waking state.

¹ The word 'etc.' stands for *adharma* and *adrṣṭa*.

² This 'etc.' refers to desire, impression and so on.

एवं तावदविद्यैकनीडानामदितो विधिः ।

भावनानां विनिष्पत्तौ बोधे स्वप्नेऽथ भण्यते ॥१२४७॥

Thus far (*tāvat*) are stated the modifications (or the world) of (ignorance) and (of the external objects) which have a basis (lit. nest) only in ignorance; now (*atha*) is stated (the happening) with regard to their rise (in the form of) cognition (in the dream state). [1247]

This refers to the distinct effects of ignorance in the dream state.

अथ यत्रात्ममोहोत्थं घनन्तीवैनमितीक्षणम् ।
जिनन्तीवैनमिति च मृषैवमभिमन्यते ॥१२४८॥

Now as regards that where there is the experience (lit. seeing) 'They are, as if, killing this one', which has arisen from ignorance (about the real nature) of the individual self, and also that 'They are as if¹ overpowering this one' (which) it (viz. the individual self) thinks falsely (to be about itself).

[1248]

¹iva 'as if' is expressive of fancy (*utprekṣā*); it indicates the falseness of the experiences.

नास्त्यत्र हन्ता जेता वा किंत्वज्ञानोत्थमेव तत् ।
वासनाविष्टविज्ञानो हननाद्यभिमन्यते ॥१२४९॥

There is (indeed) not any killer or any victor; it has arisen only from ignorance; (the individual self) having (some specific) knowledge, which has entered (lit. come to) it, thinks about the killing etc. (as pertaining to itself).

[1249]

अधर्मादिप्रकर्षोत्थं गर्तादिपतनादिकम् ॥१२५०॥
प्रतीचो दर्शनं स्वप्ने मूढस्येहोपजायते ।
मिथ्यात्वकारणं प्राह यदेवेति श्रुतिः स्वयम् ॥१२५१॥

The falling into a ditch etc.¹ is also what has arisen from the dominance of in demerit etc.,²
in this, (i.e. the dream state), the sight (of that) occurs to the inner self which is mislead (by ignorance); for, the Śruti itself has stated its cause, viz. falseness.³

[1251]

¹This refers to being caught in fire, running around and other activities which cause fear.

²By the word 'etc.' is meant increase in the force of ignorance and other effects of the same, together with those of demerit.

³This is the purport of the sentence *yad eva jāgrat paśyati*

....

Verses 1252-1253 state the purport of the Kaṇḍikā which begins with the word jāgrat

जाग्रद्विषय एवायं यदैक्षिष्ट पुराप्यसत् ।
तदत्र स्वप्नेऽसंभाव्यं मन्यतेऽविद्ययैव सः ।
नाविद्या नापि तत्कार्यं यस्मादात्मसमीक्षणे ॥१२५२॥

Whatever this (individual self) had seen earlier in the state of waking was also non-existent; and that (non-existent) it sees here in the dream state (though) not of possible occurrence, (considering it to be occurring) owing to ignorance alone—but, there would not (remain as truth, i.e. existent) either ignorance or its effect(s). [1252]

भयं त्वेकान्ततोऽविद्याकार्यमाहुर्विपरिचतः ।
यतो विज्ञाततत्त्वानां भीतिर्नास्ति कुतश्चन ॥१२५३॥

Fear is indeed the effect of ignorance alone—(so) have the wise people declared (lit. said), since there is not fear from anywhere (or, any source) for those who have known the truth. [1253]

एतदुक्तं भवत्यत्र पूर्वोपात्तस्य कर्मणः ।
फलं प्रबोधे यदुक्तं तच्छेषो भावनोच्यते ॥१२५४॥

This is (meant to be) said here: The remainder of whatever result was produced by an earlier (accomplished) activity was enjoyed in the waking state is known as impression.¹ [1254]

¹SP states about this *vāsanā sā ca svapne vyajyate*; this is through the force of the word *pūrvopātta*.

यदि नामावसितार्था फलं दत्त्वेह भावना ।
पुंभोगसमये कर्म प्रयुङ्क्ते सा पुनर्नवम् ॥१२५५॥

f when, after yielding its result, at the time of the individual self's experience (lit. enjoyment) here (i.e. in the waking state), it) has fulfilled (lit. completed) its purpose, the impression (of the external objects) does cause (lit. employ or bring about) a new activity. [1255]

It is understood that, despite their being numerous, the impressions are but one impression, since they originate only from ignorance and are essentially like one another.

उत्पत्तिभोगयोरेवं भावना कर्मणः सदा ।
प्रयोक्त्री भावनैवात्मकर्तृभोक्तृत्वयोर्मृषा ॥१२५६॥

Thus, at the rise and enjoyment (of the results) of an act, there is only the impression (that is the employing force). (And) that impression is the employing force in respect of the individual self's nature of being the agent (of that act) and also of being the experiencer (lit. enjoyer) which is (in fact) false. [1256]

In verses 1257-1267 it is stated that *sā vāsanā bhāvanākhyā ... ahkaranasthety ucyate nātmasthā*.

एवं सति प्रबोधे यद्भुक्तं प्राक्कर्मणः फलम् ।
तस्यानुवासना धीस्था भावनेत्यभिधीयते ॥१२५७॥

This being so, the impression, which comes to dwell in the intellect (of an individual), is but of the result (by an individual) of a previous activity, enjoyed in its waking state—it is called by that name (viz. the impression, *bhāvanā/vāsanā*). [1257]

आत्मचैतन्यबिम्बेन बिम्बिता धीर्यथा तथा ।
कर्मोत्थफलबिम्बेन बिम्बितेयं मतिः सदा ॥१२५८॥

As the intellect comes to have a reflection in it, on account

of (or, by) the image of sentience in the individual self, in the same way, does the intellect also come to have a reflection in it on account of (or, by) the image of the result arising from (an) activity. [1258]

This emphasises that the intellect has ever on it the image of the results of activity.

अविद्याग्रथितः सोऽयं परमात्माशरीरतः ।
कर्ता भोक्तेव चाभाति स्वप्नजाग्रदवस्थयोः ॥१२५९॥

This known (so 'yam) highest Ātman, which is (thus) affected by (lit. entangled in) ignorance, appears, on account of its being bodiless, like an agent (of an act) and/or an experiencer (lit. enjoyer of the result of it), in (both) the waking and dream states. [1259]

न चाविद्यातिरेकेण कौटस्थ्यात्प्रत्यगात्मनः ।
हेतुमन्यं प्रपश्यामः कर्तृत्वादिप्रसिद्धये ॥१२६०॥

In view of the immutability of the inner self, we do not think of any cause other than ignorance for effecting (lit. establishing) agentship etc. [1260]

रजोधूमतुषाराभ्रनीहाराद्यन्वितं वियत् ।
संभाव्यते यथा मूढैरात्मैवं कर्तृतादिभिः ॥१२६१॥

As the sky is considered by the foolish to have been covered (lit. associated) with dust, smoke, mist, clouds and fog¹ etc., so is the individual (considered by them as being) an agent (of an act) etc. [1261]

¹Yet read SP: *tuṣārapadena himasyoktatvān nīhāraśabdena tamo gr̥hyate*.

धर्मधर्म्यभिसंबन्धा नेक्ष्यन्ते मानतो यथा ।

वियत्येवं न वीक्ष्यन्ते प्रत्यग्दृष्ट्या यथोदिताः ॥१२६२॥

As the relations between properties and those who are possessed of them, are not seen (or, perceived) with the help of the (usual) means of knowing; so also are not seen by the sight of the inner self the things as they are enumerated (above) in (or, on the part of) the sky. [1262]

SP supports the thought in this verse by a citation: (*uktam hi*)

*ākāśam ekam hi yathā ghaṭādiṣu prthag bhavet /
tathātmaiko 'pyanekaś ca jalādhāreṣv ivāṁśumān //*
(*Yājñavalkyaśmṛti* 3.144).

In verses 1263-1288, there is exposition of the nature of *bhāvanā*(= *vāsanā*).

चैतन्याभाससंमोहं भावनेयं समाश्रिता ।
सत्य आत्मनि कूटस्थ आश्रिता इति भण्यते ॥१२६३॥

This impression has taken shelter of the semblance of sentience; it is said that it is based (or, resting) on the truth (i.e. reality) i.e. the Ātman, the immutable. [1263]

स्वामिन्येव यतः सर्वं समवैति क्रियाफलम् ।
ममाहमितिहेतुत्थं स्वामित्वं चाप्यबोधजम् ॥१२६४॥
देशकालादिहीनस्य ह्यनवच्छिन्नवस्तुनः ।
अहं ममेत्यवच्छेदो नात्माविद्यामृते यतः ॥१२६५॥

Since (or, as) the entire result of acts accrues to (or, gets invariably associated with) only the master; the notion of being a master (on the part of an individual, in respect of all acts) is aroused by (such) causes as '(This is) my belonging (or, doing)' or 'I (have done this)' arises from non-knowing (on the part of the individual self); [1264]
since, indeed, (any) such particularization as 'I' and/or 'mine'

in respect of the thing (viz. reality) which is not particularized (or, discriminated from any other objects) and which is above (lit. without or bereft of) a (certain) region and/or (period of) time cannot be without (there existing) ignorance (to cause it). [1265]

This affirms that *svāmitva*, *karṭṛtva* and *bhokṭṛtva* all belong to one, the individual self.

वासनैकाधिकरणश्चिदाभासोऽभिधीयते ।
भावनारञ्जितज्ञानो भवतीति न निर्द्वयः ॥१२६६॥

It is (only) the semblance of sentience, that is said to become the sole basis (or, support) of the impressions (and) it becomes possessed of (that) knowledge (which is) tinged with impressions—and not the one, which has not (any association with) duality. [1266]

भावनारञ्जितमतिसाक्षित्वादात्मवस्तुनः ।
भावनाश्रयवद्भाति प्रत्यङ्जडधियामतः ॥१२६७॥

Therefore (or, for this reason), the (real) thing (called) the inner self appears to persons of dull intellect, on account of its being the witness of the intellect, that it is tinged by the impression(s). [1267]

There follows in verses 1268-1288 the explanation of yad eva jāgrad bhayam.

बहुनात्र किमुक्तेन यदेवायं समीक्षते ॥१२६८॥
बोधे हस्त्यादिकं स्वप्ने तदेवाविद्ययात्मनि ।
संभावयति मिथ्यैव नभो नीलं यथा तथा ॥१२६९॥

Why say more? Whatever this one sees [1268]
in the state of waking, viz. an elephant etc., the same thing
in the state of dream (also), under the influence of (or, owing

to) ignorance and somehow considers (the same as real); (but that is) just false in the same way as the blue (appearance/colour of the) sky. [1269]

This concludes the meaning of *yad eva jāgrad bhayam ... anyate* in BU.

कार्यमेतदविद्यायाः प्रोद्धृतायाः प्रदर्शितम् ।
अथापकृष्यमाणायाः कार्यतः कार्यमुच्यते ॥१२७०॥

This/Thus shown (the nature of) the effect of ignorance which has appeared (in the form of the impression(s)). Now is (to be) stated the effect of (that ignorance) being withdrawn (or destroyed) since it is itself an effect. [1270]

देवादिविषयोद्धृतवासनास्य यदा तदा ।
जाग्रद्भूमावथ स्वप्ने जायते सैव भावना ।
देवो राजेव चास्मीति स्वप्नकर्मवशाद्विभोः ॥१२७१॥

When there arises in this (individual self), in its waking state, the impression, which has appeared as pertaining to gods etc., that same impression arises (in it) then, i.e. in the pervader, in its dream state (also); thus: 'I am god', or 'I am a king, as it were' owing to (or, under the influence of) the activity in the dream. [1271]

ध्वस्तात्ममोहतत्कार्यः स्यात्प्रबोधे यदा तदा ।
सर्वमस्म्यहमेवेदमिति स्वप्नेऽभिमन्यते ॥१२७२॥

If, (the individual self) is, in its state of waking, one who has destroyed the ignorance about itself and also the effect(s) of the same, then, in the dream state also, it considers (or, thinks) 'I myself alone, am all this'. [1272]

This is the meaning of *aham evedam ...* in BU.

अहमेवेति चिन्मात्रमात्मनोऽत्रावधार्यते ।
इदंशब्देन चाविद्याकार्यमत्र विवक्षितम् ॥१२७३॥

Here (i.e. in this sentence) is specified, in the words *aham eva*, merely sentience in the individual self and by the word *idam* is intended here (to be expressed) the effect of ignorance.

[1273].

अविद्यायाः समुच्छिन्नावलमेवमिदं वचः ।
सर्वः कृत्स्नोऽहमस्मीति तदैतदुपपद्यते ॥१२७४॥

Thus, this statement,¹ is capable for the destruction of ignorance; then² is it (or, does it become) reasonable (to say), 'I am complete (or the whole— *sarva*)',³ i.e. I am (the) entire (world that is considered to be existing)'. [1274]

¹This means *aham evedam*.

²The translation follows *tadaitad* ... in the AnSS edition. Yet, the variant reading (noted therein) would also yield a good sense: This, viz. 'I am ...', becomes reasonable.

³This indicates, as SP points out, *paricchedakābhāva* in relation to the individual self.

एषोऽस्य परमः पूर्णः कृत्स्नो लोकस्तु विद्यया ।
इतोऽपरे तु ये लोकास्तेऽस्याविद्याप्रकल्पिताः ॥१२७५॥

(And) this whole world is for this (individual self) *parama* 'complete/whole and fully (obtained)' through the knowledge (of reality).¹ The worlds which are other than this one are construction of imagination. [1275]

¹Cf. *vidyayāmṛtam aśnute* (Īśopaniṣad 11; Maitrāyaṇyupaniṣad 7.9).

देवो राजेव यत्स्वप्ने दर्शनं प्रत्यगात्मनः ।
विद्याफलं न तन्न्याय्यमिवशब्देन संगतेः ॥१२७६॥

Whether the thought (lit. seeing) of the inner self, in the dream state (be it) 'I am a god' or 'I am a king, as it were', is not the result of knowledge (of reality) (and) that is not according to the (usual) mode of reasoning, owing to its connection with the word *iva*. [1276]

घनन्तीवाविद्यया यद्वन्मन्यते स्वप्नभूमिगः ।
देवो राजेव चास्मीति मोहादेवं क्रियाफलम् ॥१२७७॥

As (the individual self) considers (or thinks), 'They are killing me, as it were!', owing to (its) ignorance, while it is in the dream state; so also (the thoughts), 'I am god' and 'I am king, as it were!', are the result of its activities arising from (its) ignorance (about its own nature). [1277]

verses 1278-1285 state that the awareness in the dream state in all this' pertains to the highest reality.

अहमेवेति न स्वप्नः साक्षादत्रात्मवस्तुनः ।
बोधेऽविद्यासहायत्वमिह त्वात्मैव निर्द्वयः ॥१२७८॥

(It might be argued:) 'In "I, myself alone, ..." is not a dream experience; since that is directly perceived (i.e. experienced) the (real) thing, viz. the individual self, in its waking state'. The answer is:) 'No, it is not so; there, in the waking state there is (its nature of) having ignorance as an aid, but here (in the dream state), there is only the individual self, all by itself, without any duality'. [1278]

यावत्किञ्चिदविद्योत्थमिदमा तदनद्यते ।
यथाव्याख्यातमैकात्म्यमहमित्याभिधीयते ॥१२७९॥

Whatever be the thing which has arisen from ignorance, it is referred to (lit. restated) by the word *idam* (and) by *aham* expressed the singleness of the individual self (i.e. Ātman),

as explained (before).

[1279]

शरीरान्तमिदं रूपं साधिभताधिदैवतम् ।
प्रतीच्यविद्ययाध्यस्तमहमैतद्विशेष्यते ॥१२८०॥

This form, which ends in a (worldly) body, together with its *adhibhūta* and *adhidaivata* (forms), is but superimposed on the inner consciousness, through ignorance (about its true nature)—this is discriminated (or, distinguished from all others) by the word *aham*. [1280]

अन्वयव्यतिरेकाभ्यां यथोक्ताभ्यां पदार्थयोः ।
विज्ञातयोरिदं वाक्यमहमेवेदमित्यतः ॥१२८१॥

Therefore, the sentence *aham evedam* (is expressive of the meanings together) of the two words, as explained (above) through the method of Anvaya and Vyatireka,¹ and are (therefore) known well. [1281]

¹See [Vol.1:1982] Introduction.

Verses 1282-1288 bring out the *sāmānādhikarānya* in the stultification of *idam sarvam aham eva*

बाध्यबाधकयोरेवं ज्ञातयोरुक्तवर्त्मना ।
प्रतीचि जायते ज्ञानं वाक्यादज्ञानहानिकृत् ॥१२८२॥

When the two (things— *padārthas*), viz. what is to be stultified and what stultifies, are thus known by the way stated (earlier), there arises from the Śruti sentence, on the part of the inner self, the knowledge that causes the destruction (lit. loss) of ignorance. [1282]

ज्ञानाद्धवस्ते हि तमसि धवस्ते द्वैते सहेतुके ।
सर्वः कृत्स्नो भवेदात्मा मनोवाचामगोचरः ॥१२८३॥

When darkness (i.e. ignorance) is destroyed by¹ knowledge, and (also) when (all) duality, together with its cause, is destroyed, all (appearance of the world) would become the whole (or complete) Ātman, (which is) not an object for *manas* and words of speech.² [1283]

¹The word 'by' expresses *hetau pañcamī*.

²This is based on the plural from *manovācām*.

स एष पर उत्कर्षो विद्यायाः संप्रदर्शितः ।
संप्रसाद इदं सर्वमात्मनैवावशिष्यते ॥१२८४॥

This is then stated (lit. shown/established) as the highest excellence of knowledge (of reality) in that all this remains in the deep sleep state, only in (lit. by) its (real form, viz.) the Ātman (absolute). [1284]

This is the meaning of *so 'sya paramo lokah ...* in BU 4.3.20.

एक आत्मेति तद्वद्धीः स्वप्नजाग्रदवस्थयोः ॥१२८५॥
अविचारितसंसिद्धिस्तथैवानात्मधीरपि ।
व्यभिचारस्वभावोक्ता प्रत्यगात्मैकसाक्षिका ॥१२८६॥

In the same way, there is the knowledge¹ (acquired) in the (two) states of dream and waking, [1285]
so also, there is knowledge¹ about the non-Ātman which has its proof (lit. is established) without (any) deliberate consideration—it is described as having the nature in variance with its witness in the inner self alone. [1286]

¹This is specific knowledge, involving subject-object relation among things/objects. Therefore, there is the deliberate use of the word *dhī*.

व्यभिचारिमतिष्वेवं बुद्धिरव्यभिचारिणी ।
व्यभिचारित्वसंसिद्धिहेतुरैकात्म्यनिष्ठिता ॥१२८७॥

Thus, among (the different individual selves) having varying intellects, there exists (in reality) knowledge which is not (at all) varying; the cause of the proof (of the varying intellect'), viz. variance, is resting in (i.e. dependent on) the singleness of the Ātman (absolute). [1287]

सत्यामपि त्वविद्यायां प्रमाणानुगमात्पुरा ।
वास्तवं वृत्तमीदृङ्गनः सिद्धं ह्यनुभवाश्रयम् ॥१२८८॥

And (*tu*), even while there exists ignorance earlier (as understood) from experience,¹ the real existence (lit. happening) is proved for us as having its basis in experience.² [1288]

This concludes the discussion on the sentence *aham evedam...* in BU.

¹This refers to the experience of the states of waking and dream.

²This is the experience of the single Ātman, not associated with duality.

Verses 1289-1295 are an introductor to the discussion of the meaning of BU 4.3.21. It shows the relation between the two, in respect of the statement about aticchanda.

अविद्याविद्ययो रूपं कार्यं चापि समासतः ।
व्याख्यातमेवं मानानां प्राक्सूतेरनुभूतितः ॥१२८९॥

Thus, the nature and the effect of ignorance and knowledge (about the true nature of the Ātman) is explained in brief, with the help of experience,¹ because of its occurrence before² the means of knowledge (begin, or have begun) to operate. [1289]

This is to begin the statement on the relation between BU

4.3.20 and 4.3.21.

¹SP takes *anubhūti* as indicative of Śruti.

²SP understands *prāk* in relation to the states of dream and deep sleep!

अनात्मवस्तुमानानां प्राग्नात्माभिसंगतेः ।

स्वतःसिद्धात्ममेयोत्थरूपतैव प्रतीयते ॥१२९०॥

Before there occurs the connection of the means of knowledge, which are non-Ātman objects, with the non-Ātman (viz. ignorance), there is experienced only (the thing's, i.e. the real Ātman's) having the nature (of knowledge) arising from the thing to be known, viz. the Ātman, which exists (or, is established) in its own right. [1290]

चिद्रूपैरेव तैः सद्विरनात्मार्थोऽपि शक्यते ।

प्रमातुं तदृतेऽनात्मा ह्यन्धकारप्रनृत्तवत् ॥१२९१॥

Only through them (i.e. the means of knowing), which are conceived as existent only on account of their being the semblance of sentience, even non-Ātman things¹ can become known; since, without that, non-Ātman things would be like a dance performance in darkness.² [1291]

This is to assert that the worldly knowledge and its means are basically non-sentient and, therefore, depend on the sentient Ātman for their worldly-being.

¹This plural is from the use of the word in the singular.

²That is, it would be meaningless, because that cannot be seen (i.e. experienced).

अनात्मापि विनात्मानं नैवानात्मायते यतः ।

अवस्तुत्वान्निरात्मत्वाद्धन्धयासूनुनृशृङ्गवत् ॥१२९२॥

Since, (thus,) the non-Ātman cannot behave as a non-Ātman, without (or, in the absence of) the Ātman; (therefore), it is

like the son of a barren woman or the horn of a man, owing to its nature of not being the (real) thing and not having the Ātman as the (essential) part of it. [1292]

जाग्रत्स्वप्नसुषुप्तेषु त्वात्माविद्या मृषा सति ।
व्यवहारपथं प्राप्ता स्वतःसिद्धात्मसाक्षिका ॥१२९३॥

In the states of waking, dream and deep sleep, however, ignorance about (the nature of the) Ātman enters into (i.e. influences) the way of worldly dealings, becomes self-established, and is having the Ātman as its witness—(all the while), remaining (only a) false (thing). [1293]

सर्वोऽस्मीति हि विद्येयमविद्यातोऽन्यदर्शनम् ।
उभयं संविदायत्तं दर्शनं प्राक्प्रमागमात् ॥१२९४॥

That (awareness), viz. 'I am all (this world)' is awareness (or, knowledge of the real, the Ātman) and any awareness (there could be) other than what is ignorance. Both of them are dependent on the knowing reality (*saṁvid*) and the sight of both of them (as two distinct knowledges) can be (or, is possible) only before the rise of right knowledge (about the Ātman). [1294]

This is to point out that such discrimination as *vidyā* and *avidyā* is based on the awareness of duality, i.e. absence of the knowledge about the Ātman as the single thing of reality.

Now follows in verses 1295-1355 the discussion on BU 4.3.21.

एषोऽस्य परमो लोको यः सर्वोऽस्मीति दर्शितः ।
अतः परं परावस्था निरविद्या प्रदर्श्यते ॥१२९५॥

For this one (viz. the individual self), this is the highest world which has been stated (lit. shown) in (the words) 'I am all (this world)'. Now, hereafter, will be explained (its) highest

self, (which is) altogether free from ignorance.

[1295]

अनाप्तकाममस्योक्तमात्माविद्यैकहेतुकम् ।

रूपं पूर्वमिह त्वस्य ध्वस्ताविद्यमथोच्यते ॥१२९६॥

That form of this one (i.e. the individual self or the Ātman)¹ was explained earlier¹ which did not have in it any desire obtaining (and) which had only one cause (of its existence), viz. ignorance about itself (or, the Ātman).²

[1296]

¹This refers to the dream state, that was described before this individual self's awareness in the form *aham evedam* was described.

²SP holds this reference as being to the Ātman (absolute).

छन्दः कामोऽधिकारात्स्यात्साहचर्याच्च पाप्मना ।

अतिक्रान्तं यतश्छन्दमतिच्छन्दमिदं ततः ॥१२९७॥

This (word) *aticchanda* is so formed (as meaning) that which has transcended *chanda*,¹ wherein *chanda* means desire, since that is the *adhikāra* 'topic (for discussion)' and also because of its association with sin.²

[1297]

In this connection, attention is to be invited to two more points: (i) The Mādhyandina recension reads *aticchandaḥ* for *aticchandā* in our text. It is a neuter form alright and goes well with *rūpam*. In BUB, we have first to understand *aticchandā(h)* as a qualifier of *lokaḥ* and later *aticchandā* as equivalent to *aticchandam*. In Mādhyandina, this is avoided.

¹It is pointed out in SP that this word *chanda* (ending in the vowel *a*) is to be understood as apart from *chandas* (ending in the consonant *s*); the first means 'desire' while the other 'a metre (in verse)'—like Gāyatrī etc. It is to be noted, however, that both Sureśvara and (consequently) SP have followed BUB.

²In Vedic literature, there occurs pairs of such words as end both in a vowel and in a consonant after that vowel. Thus, e.g.

barhi and *barhis*. It is, therefore, not likely that BU might have used the word *chandas* beside *chanda*. And Sureśvara seems to be aware of this which lead him to say *vivṛtiś chāndasi jñeyā* in just the next verse.

विवृतिश्छान्दसी ज्ञेया लक्षणासंभवादिह ॥१२९८॥

पाप्मशब्देन चात्र स्याद्धर्माधर्मपरिग्रहः ।

पाप्मनो विजहातीति तथा चैव पुरोदितम् ॥१२९९॥

Here,¹ this relation (or, change in the word) should be known as a Vedic (characteristic), since there is no indication (whatsoever of any other reason). [1298]

Also, by the use (lit. choice— *graha*) of the word *pāpman*, there should be understanding (lit. acceptance) of (the meaning) merit and demerit;¹ for, it is already said (so) in (actual words:) *pāpmano vijāhati*.² [1299]

¹That is, in using the long ending of the word *aticchandā*.

²Cf. BU 4.3.8. This explains the word *apahatapāpman*. All ritual activities are understood as causing sins.

Verses 1300-1304 state a justification of holding as real the form of the *Ātman*, which is noted in the word *apahatapāpman*.

अपेतकारकत्वादिहेतोरज्ञानतो हतेः ।

धर्माधर्मादिपाप्मानो रूपमात्मन उच्यते ॥१३००॥

सदापहतपाप्मेति भयहेतोश्च लङ्घनात् ।

आत्मनोऽस्याभयं रूपं सदानस्तमितोदितम् ॥१३०१॥

Because of the destruction of the ignorance which is the cause, viz. in the form of an instrument etc., (there results) it is said (the real) form of the *Ātman*, i.e. that which was earlier (in the form of) sins (consisting in) merit and demerit; [1300] (that was indicated) in the statement of its ever being *apahatapāpman* 'free from sin'; so also, on account of its transcending the cause of fear (viz. ignorance), there comes

to be that form of the Ātman which is free from fear. The word *sadā* conveys that (this form) has neither a beginning nor an end. [1301]

वास्तवेनैव वृत्तेन ज्ञेयकार्यसमाप्तिः ।
अतः सर्वं कृतं ज्ञानं नातोऽन्यदवशिष्यते ॥१३०२॥

(Thus) because of (the Ātman's) having accomplished all of its knowable activities by its real nature (lit. action); all (activities of the world) are (said to be) done by it (and) there remains nothing (to be done). [1302]

यत एवमतो यावत्किञ्चित्कार्यान्तरायकम् ।
मोहव्यवहितं वा यत्प्राप्तं तद्ब्रह्मबोधतः ॥१३०३॥

Since this is so, whatever (could occur as) an obstacle to the Ātman's (accomplishing) some task (lit. effect), or whatever is obscured by ignorance, becomes contained (i.e. accomplished and overcome respectively) by knowing the Brahman. [1303]

This is the meaning of the sentence *asyaitad aticchandā*

कामकर्ममहामोहरहितं रूपमात्मनः ।
श्रुत्या प्रदर्शितं साक्षात्करविन्यस्तबिल्ववत् ॥१३०४॥

That form of the Ātman, which is without the powerful/effective ignorance, which is (caused by) desire and activity, has the Śruti presented (lit. shown) as directly perceptible like a *bilva* fruit placed on (one's) hand. [1304]

Verses 1305-1322 pertain to a doubt that the Ātman's nature of being self-shining is also an effect that is produced.

स्वयंज्योतिष्ट्वमुक्तं यदात्मनः प्राक्प्रयत्नतः ।
तदप्यात्मन आगामि शङ्क्यते कामकर्मवत् ॥१३०५॥

(A doubt is raised:) 'It is feared (lit. doubted) whether what was earlier stated with great care as the self-shining nature of the Ātman would also come to be in the individual self, as associated with desire and activity'. [1305]

यस्मात्सषुप्त आत्मायं नात्मानं नाप्यनात्मनः ।
जाग्रद्वद्वेत्ति तेनास्य चैतन्यं कामकर्मवत् ॥१३०६॥

'Since this individual self, that is in the deep sleep state, does not know (anything), as in the waking state it knows either itself or (any) non-Ātman, therefore, its sentience is associated with desire and activity.' [1306]

नैतदेवं यतो भेदज्ञानं मोहोत्थकारक-
संश्रयादेव न पुनर्मोहाभावे तदिष्यते ॥१३०७॥

(The doubt is thus answered away:) 'No, this is not so, since this awareness of duality (has arisen) only because of its basis in those means of activity which are produced by ignorance; it is not accepted (to be coming) on account of the absence of ignorance'. [1307]

यत्र वा अन्यदित्येवं भेदज्ञानमभाषत ।
सत्येव प्रत्यगज्ञाने तस्याज्ञानसमन्वयात् ॥१३०८॥

(Also the Śruti) has stated¹ (or, described) the awareness of duality thus, i.e. in the sentence *yatra vā anyad eva ...*; for, while there has occurred the knowledge (about the true nature) of the inner self (or sentience), there could not be any association of it (i.e. the inner self) with ignorance. [1308]

¹Cf. BU 4.3.31.

यत्र त्वस्येति विध्वस्त आत्माज्ञाने प्रबोधतः ।
तत्केन कमिति श्रुत्या भेददृष्टिर्निषिध्यते ॥१३०९॥

When (on hearing the Śruti) *yatra tv asya ...*,¹ the ignorance (of an individual) about the self (or, Ātman) comes to be destroyed and (there has arisen) awakening (to its own nature), then (at that time), the Śruti rejects the notion (lit. seeing) of duality (in the statement) *tat kena kam*¹ [1309]

¹Cf. BU 2.5.15.

एकत्वमेव तेनात्र भेदादर्शनकारणम् ।
स्त्रीपुंद्ष्टान्तवचसा तदेतत्प्रतिपाद्यते ॥१३१०॥

Here therefore (or, thereby) the reason for (one's) not seeing duality is noticed—and it is this that is affirmed in the words expressing the example of a woman and a man (uniting with her). [1310]

चेतो नुरागसिद्धयर्थं प्रिययेति विशेषणम् ।
द्विष्टायां सत्यपि स्त्रीत्वे चेतो नैवानुरज्यते ॥१३११॥

The qualifier *priyayā* (of the woman) is (here used) for establishing (the rise of) love (or, attachment) in the heart (of the person); for, in the case of the woman (who is) disliked (lit. hated) by him, his heart would not at all be tinged (i.e. inspired or roused) by (any) longing for her. [1311]

अतीव कामवशगः स्त्रीगुणोपेतया स्त्रिया ।
प्रियया कामयन्त्या च परिष्वक्तः पुमानिह ॥१३१२॥

This person, quite affected (or, overcome) by desire is here¹ stated to be embraced by a woman, possessed of (all) feminine excellences, (which are very) dear to him, and longing (for him). [1312]

¹Read SP: *iheti pariṣvaṅgaphalavācyaṃ karmocyate pumān na iti sambandhaḥ.*

परिष्वक्तगिरा चात्र व्यामिश्रीभाव उच्यते ।
 पृक्तावयवयोः प्रीत्या स्त्रीपुंसोरपरस्परम् ॥१३१३॥
 उत्पन्नसंभोगफलः पुमान्मैथुनकर्मणि ।
 स न वेत्ति यथा बाह्यं सुखाविष्टो न चान्तरम् ॥१३१४॥

And, by (the use of) the word *pariṣvakta* here,¹ there is conveyed the sense of (their) becoming united; since a male comes to have in the act of copulation the result of the union accrued to him, when the sex-organs of the man and the woman have joined together with a feeling of love. And he does not experience (lit. know or become aware of) the joy coming from any external or internal (source).² [1313-1314]

¹This refers to the sentence in the Śruti: *yathā priyayā ... veda nāntaram*.

²Read the comment of SP at the end: *dvayor ukte karmani tatphale tadadhīnājnānasāmye 'pi prādhānyāt puṁso nirdeśaḥ*.

परिष्वङ्गाद्यथा पूर्वं वेद बाह्यान्तरं स्फुटम् ।
 परिष्वक्तस्तु नैवं स वेद बाह्यं न चान्तरम् ॥१३१५॥

As the man did know before the embrace (by/of the woman) clearly either external or internal (joy), so does he not know either external or internal (joy).¹ [1315]

¹Or, world; cf. the next verse.

तमोव्यवहितैकात्म्यस्तथाविद्योत्थकार्यगः ।
 वेद बाह्यं जगत्सर्वं स्वं चात्मानं तमस्विनम् ॥१३१६॥

The man knew (i.e. became aware of) all of the external world and also his own self as his (awareness of the) oneness with the Ātman was covered (or obscured) by ignorance and he himself was affected by (lit. was a part of) the effect arising from ignorance. [1316]

This verse explains the first line of the preceding verse. Also, from here onwards up to verse 1334 below, there is discussed the nature of the self in the deep sleep as equivalent to that of the Ātman absolute.

कार्यकारणरूपः संस्तद्विरुद्धैकरूपिणा ।

परिष्वक्तः पुमान्प्राज्ञे प्राज्ञेनात्मायमात्मना ॥१३१७॥

तमस्विनि निवृत्तेऽस्मिन्देहान्ते प्रत्यगात्मनि ।

वितमस्कात्मना योगे स्वप्नजाग्रत्क्रियाक्षये ॥१३१८॥

This individual self, being of the nature of effect(s) and cause(s), is embraced, in its Prājña¹ state by the Prājña² 'wise' Ātman which has a nature opposed to its (own nature); [1317]

and also when the inner self, having darkness (enveloping it), has returned inside the body³ (that is to say), when (all) activity of the dream and waking states has ceased to be (lit. has been completely diminished) and when (then) there is thus its union with the Ātman which is without any darkness. [1318]

These verses bring out the sense of *evam eva*.

¹This is the name given to the individual self in the sleep state.

²This attribute of the Ātman is taken in the sense: 'the fully knowing'; cf. *prajña* which is the same as *prājña* by the addition of the suffix *-a* as *svārthe* not modifying the original sense in any way; Pāṇini 5.4.38: *prajñādibhyaś ca*, laying down the *taddhita* suffix *-an*.

³The word *dehānte* is to be understood as 'inside the body' convey the sense of the individual self's entering into the intellect (*buddhi*) alone.

अविद्यान्वेति कार्यं स्वं न त्वात्मानमकार्यतः ।

कार्यं स्वकारणस्थं च न त्वात्मस्थमकारणात् ॥१३१९॥

Ignorance continues to be associated with (lit. follows) its effect, but not the Ātman, owing to its not being an effect (of ignorance); an effect (always) abides (here, merges) in its cause (here, impression or the intellect) but it does not abide (i.e. merge) in the Ātman which is not a cause (of it). [1319]

SP sums up the argument in the verse thus: *ajñānatajjayor anyonyam eva yogo nātmaneti samudāyārthah.*

आत्माभासोऽपि योऽज्ञाने तत्कार्ये चावभासते ।
कार्यकारणतारूपस्तमप्येषोऽतिवर्तते ॥१३२०॥
कूटस्थात्मानुरोधित्वात्तावन्मात्रात्मकत्वतः ।
न कार्यं कारणं चातः कटाक्षेणापि वीक्षते ॥१३२१॥

And this Ātman transcends also that semblance of the Ātman which appears (or, is felt) in ignorance and in its effect(s), and which appears to be in the form of effect(s) and cause(s) [1320]

and it does not cast even a glance at (both) the effect(s) and the cause(s), because of its being similar to (lit. following) (the nature of) the immutable and because of its being only that much (i.e. not being different from it). [1321]

विज्ञानात्मा परिष्वक्तः प्राज्ञेनैव परात्मना ।
भेदकारणविध्वस्तौ भेदधीर्विनिवर्तते ॥१३२२॥

(Thus) the individual self, which has (specific) knowledge, is embraced by the Prājña 'wise' Ātman, i.e. the highest Ātman (or, self) and the awareness (*dhi*) of distinct (or, variety in) objects becomes lost (or disappears), for there is the cause of the distinction removed (lit. destroyed). [1322]

यस्मादेवमतः प्राह न बाह्यमिति नः श्रुतिः ।
ऐकात्म्यमात्रावसितेर्न वेदान्तर्बहिस्तथा ॥१३२३॥

Since this is so, therefore, the Śruti stated for (or, told) us

(*naḥ*) *na bāhyam*; since also there is the end (of all distinctions) in the singleness of the Ātman, the individual self did not know anything within or without. [1323]

This is the meaning of *na bāhyaṃ kiṃ cana veda nāntaram*.

क्रियाकारकसंभेदहेतौ सत्यसतीदृशम् ।
सर्वदैवात्मनो रूपं निरस्ताशेषभेदकम् ॥१३२४॥

Whether or not there exists the cause for (any) distinctions consisting in activity and the means of it, such (alone) is ever the nature of the Ātman, from which has remained away the entire cause of distinction.¹ [1324]

¹SP states that *nirastāśeṣabhedaka* is the explanation of *īdrśa* 'ch'.

नात्मवृत्तमपेक्षयेदं नापि बाह्यस्य वस्तुनः ।
क्रियाकारकवद्वस्तु किञ्चिदीक्षामहेऽमितेः ॥१३२५॥

We do not accept (lit. see) anything, which comprises action and its means, by depending on (or, lit. having depended on) the nature (*vṛtta*) of the Ātman and also owing to non-grasping (lit. non-knowing) of any external object. [1325]

सर्वमन्यानपेक्षं सत्स्वात्ममात्रतयेक्षितम् ।
ऐकात्म्यतो हिरूपं न वस्तूत्प्रेक्ष्यतेऽण्वपि ॥१३२६॥

All this is understood (lit. noticed) as existing and not dependent on (any) other (thing) because of its being only the Ātman; not indeed an extremely small thing is seen to have a form (which is) apart (or, far) from the state (of the Ātman as) being single. [1326]

आपेक्षिकं तु यद्रूपं तन्मिथ्येत्युपपादितम् ।
स्वतो यद्वस्तुतो नास्ति तत्कुतौऽन्यव्यपेक्षया ॥१३२७॥

And (*tu*) whatever be the form (of a thing), which is dependent (on some other thing), is affirmed to be false; for, in its own right, it is not an existent (thing); how could it (then exist) through its dependence on another (thing)? [1327]

अतः सर्वानपेक्षं यत्स्वमहिम्नैव सिध्यति ।
तदेव परमार्थं स्याद्वस्त्वैकात्म्यस्वलक्षणम् ॥१३२८॥

Therefore, that is the highest reality which exists on account of its own power (or, greatness), as not dependent on all (other things), and has its peculiar characteristic, viz. singleness in nature. [1328]

यस्मादेवमतः प्राह तद्वा अस्येति नः श्रुतिः ।
उक्तात्मवस्तुनो रूपं कामाविद्यादिवर्जितम् ॥१३२९॥

Since this is so, the Śruti has therefore told (lit. stated for) us in *tad vā asya*¹ The form of the thing, which is described (thus), is devoid of desire and ignorance etc.² [1329]

¹*tad vā asyaitad āptakāmaṁ āptakāmaṁ akāmaṁ rūpaṁ.*

²This refers to the various effects of these.

कामकर्मादिवन्नेदं मृत्योर्धर्मो भवेदतः ।
चैतन्यं प्रत्यगात्मैव यस्मादुक्तेन हेतुना ॥१३३०॥

Since the inner self itself is sentience, for the reason stated above, therefore, this is not a property of death, like desire and activity. [1330]

आत्मत्वान्न विभागोऽत्र ज्ञातृज्ञानादिलक्षणः ।
अनपास्ततमस्कोऽपि भेदं नात्मनि पश्यति ॥१३३१॥

Because of its being the Ātman, there cannot be (lit. is not) here (i.e. in the individual self) a division characterized as

the knower, knowing etc.,¹ the one,² who has got over (lit. cast off) darkness, also does not notice any distinction (as existing) in the Ātman.³ [1331]

¹This refers to the means of knowing, the object of knowing and so on.

²That is, the individual self, who is getting rid of ignorance.

³This is because the absolute Ātman is devoid of any duality (dvaya). This indicates also the absence of duality for the person in the deep sleep state.

अविद्यावर्त्मदृष्टयैव ह्यविद्याकार्यवस्तुगम् ।
द्वैतमाभासते व्योम्नि नीलदिङ्मण्डलत्ववत् ॥१३३२॥

Indeed, only by the way of (one's being misled/overpowered by) ignorance, there appears (for that one) duality obtaining in things, which are the effects of ignorance, as (there appear for one) the blue (colour) and circle of (i.e. division in) quarters, in the sky. [1332]

This argument is in keeping with the Śruti statement *yatra dvaitam iva ...* (BU 2.4.14; 4.5.15) as SP points out.

Verse 1333 explains the meaning of the sentence *tad vaitat*.

निरविद्यं तु यद्रूपमनन्यापेक्षसिद्धिकम् ।
तद्वा अस्यैतदिति तच्छ्रुत्या निर्वर्ण्यतेऽधुना ॥१३३३॥

and (*tu*) that form (of the Ātman) which is not affected by (or, does not have) ignorance, and whose proof does not depend on another (thing) is now explained by the Śruti in the statement *tad vā asyaitat ... (rūpam)*. [1333]

Verses 1334-1336 explain the sentence about *āptakāma*.

सर्वैकात्म्यमिदं यस्मादात्मनो रूपमीदृशम् ।

तदाविष्क्रियते तस्मात्करविन्यस्तबिल्ववत् ॥१३३४॥

Since the form of the Ātman is such (as this, viz) all this is (but) the existent singleness of the Ātman, therefore, it is revealed (lit. made clear) like a *bilva* fruit placed on one's hand. [1334]

आत्मनो यदविद्योत्थं रूपं संसारभूमिगम् ।
अनाप्तकामं तत्सर्वमपेक्ष्येदमिहोच्यते ॥१३३५॥
आप्तकामादिकं सर्वं वस्तुवृत्तव्यपेक्षया ।
आप्ताप्तव्यादिहीनत्वादानन्दैकात्म्यवस्तुनः ॥१३३६॥

Having kept in view all that form of the Ātman, which (it seems) has arisen from ignorance, and which has not obtained (the fulfilment of) its desire(s) and, thus, belongs to the transmigratory world, this (i.e. the following) is stated here: [1335]

in *āptakāma* etc., that is (so described) in view of the nature of the (real) thing, since that thing, viz. joy, i.e. single (existence) of the thing called the Ātman, is devoid of what can be described as obtained and/or what is to be obtained. [1336]

Verse 1337 states the purpose of *āptakāma* etc.

पुमर्थः कामशब्दार्थो नान्योऽर्थः काम्यते यतः ।
आप्ताशेषपुमर्थोऽयं सर्वसाधननिस्पृहः ॥१३३७॥

The meaning of the word *kāma* is the end/goal of human (lit. man's) life, since no other object (than the Ātman) is desired. Therefore, this individual self is one that has obtained all the ends/goals of human life and is not at all desirous (*nispr̥ha*) of all of the means (of accomplishing various objects in life). [1337]

This verse asserts that the word *kāma* means *pumārtha*; it

s justified in the next two verses, in two alternative ways.

सत्यकामादिशब्देन यदप्यन्यत्र भाषितम् ।
एतद्वाक्यानुरोधेन व्याख्येयं तदपि स्फुटम् ॥१३३८॥

Whatever is understood (lit. said/mentioned) elsewhere by the word(s) *satyakāma* etc.¹ is also to be explained clearly in accordance with (or, following) this sentence.² [1338]

¹Cf. *satyakāmaḥ satyasaṅkalpaḥ* (CU 8.1.5), also *Maitrā-nyupaniṣad* 7.7.

²This refers to *aticchandavākya* (BU 4.3.21).

Verses 1339-1346 amplify the ideas in *āptakāma* etc.

आत्ममात्रं समुत्सृज्य सत्यत्वं नान्यतो यतः ।
तत्रैव निरधार्येतद्यत्र नान्यदिति श्रुतेः ॥१३३९॥

Since there would not be (obtained) the nature of what is true in any other thing, i.e. by excepting what is only the Ātman; this¹ is decided/determined (*niradhāri*) only there, i.e. in the Śruti *yatra nānyat*² [1339]

The translation has tried to put the meaning of the verse only too literally. Alternatively it could be: The nature of truth cannot be ascertained from (or obtained in) anything else than only in (the reality called) Ātman.

¹That is, *kāma* means *pumārtha*. The preceding verse stated the Śruti as an authority, whereas this verse points to the realising itself for causing realisation of Truth.

²Cf. CU 4.24.1: *yatra nānyat paśyati nānyac chruṇoti nānyad jānāti sa bhuīmā*.

सुखसंविद्धि काम्योऽर्थो बाह्यसाधनसाधनः ।
संविदेव सुखं यस्मादाप्तकाममिदं ततः ॥१३४०॥

(It is known that) an object which is desired and has (some) external means for obtaining (or, acquiring the same) yields (or, is the cause) of the experience of pleasure. (That is how) this (Truth, viz. Ātman) which is described as *āptakāma* 'what has acquired the end of human life,' i.e. the *saṃvid* 'knowing one' is itself pleasure.¹ [1340]

¹SP points to BU 3.9.28: *vijñānam ānandam brahma* as the basis of this argument.

कामकामिप्रभेदेन प्रतीचोऽस्याप्तकामता ।
हिरण्यगर्भवत्किं वा निर्भेदस्येह भण्यते ॥१३४१॥

This inner self has the nature of an *āptakāma* 'one who has obtained (the fulfilment of) desire(s)', through (its own) division into desire and the desirous. Or, here¹ is stated about this one, as in the case of Hiranyagarbha,² who is without any division in it. [1341]

¹That is, in the Śruti.

²Cf. Pāṇini .5.1.116: *tatra tasyeva*.

आत्मैव कामा निःशेषा नात्मरूपप्रभेदतः ।
आत्मैवेदं सर्वमिति प्रत्यङ्मात्रावशेषतः ॥१३४२॥

The Ātman alone is all desires without exception (*niḥśeṣa*); (they do not exist) as apart from the Ātman. The Ātman alone is all this; for there remains (here)¹ only the inner self. [1342]

¹Once again, this seems to be the reference to a person (or, the individual self) in deep sleep.

समस्तव्यस्तताशङ्कामुच्छेत्तुं चोत्तरं वचः ।
अकाममित्यतो ऽवस्तसमस्तव्यस्तरूपकम् ॥१३४३॥

And the later statement (of the Śruti) is for answering away (lit. destroying) any doubt/suspicion about (the Ātman's existence in) collectivity and particularity. That is to say, (the word) *akāma* conveys (the sense of) one who has removed (lit. destroyed) all collective and particular forms. [1343]

आप्तकामात्मकामत्ववचसैव निराकृताः ।
कामाः सर्वेऽकाममिति तथापि पुनरुच्यते ॥१३४४॥

(One can ask about the veracity in the notions about) all the desires (as existing) have been set aside by the very statement about the Ātman's being *āptakāmātmakāma* and yet there is once again stated (the meaning of the nature of the Ātman by the use of) the word *akāma*. [1344]

The doubt in verse 1344, which is based on the preceding verse is: the words *āptakāma* and *ātmakāma* have already set aside the notion of *śamastavyasta* nature of the Ātman, hence there is no need of using the word *akāma*. This is answered away in the next verse.

आत्माश्रयत्वं कामानां केचिद्व्याचक्षतेऽबुधाः ।
अतस्तत्प्रतिषेधार्थं भूयोऽकाममितीरणम् ॥१३४५॥

Some unwise persons posit the idea that desires have a support/basis in the Ātman and, therefore, (only) for rejecting that position there is the use of the word *akāma* once again (i.e. even after the idea to be conveyed by it is already conveyed by other words). [1345]

कामादिहेतुकः शोकः कामाद्यज्ञानहेतुकम् ।
तदभावादर्थैकात्म्यं शोकान्तरमितीर्यते ॥१३४६॥

Grief has desire etc. as its cause/origin (and) desire etc. have ignorance as their cause/origin. Owing to the absence of these then is expressed that the form of the Ātman is without any

grief.¹

[1346]

¹On *śokāntara* BUB comments *śokacchidra*, *śokaśūnya* or *śokamadhya*, i.e. 'essence of grief'. The Mādhyandina recension reads *aśokāntaram*; cf. verse 1350 below.

Verses 1347-1351 state another meaning of the word *śokāntara*.

यदि वा शोकवद्वस्तु शोकशब्देन भण्यते ।
गुणत्वाच्छोकशब्दस्य मतुपो लुप्तता भवेत् ॥१३४७॥

Or perhaps, a thing, which has *grief* associated with it, is described (or, understood) by the word *śoka*, the word *śoka*, being a conveyor of a property (*guṇa*) of some object (*dravya*), has possibly its possessive suffix (*-matup*) dropped.¹ [1347]

¹That is to say: *śoka* is *śokavat* 'one having grief,' the *-vat* (in Pāṇini's terminology *-matup*) is apparently dropped.

शोकार्हवत्पदार्थेभ्यो जात्यन्तरमिदं यतः ।
अहेतुफलरूपत्वाच्छोकान्तरमतो मतम् ॥१३४८॥

Since this (form of the *Ātman*) is different from (that of) the other objects, which can have (lit. deserve having) grief, therefore, it (i.e. the *Ātman* itself) is understood (i.e. known) to be *śokāntara* 'devoid of grief' for it is itself having a form which is not either a cause or a result.¹ [1348]

¹That is to say: it does not originate anything else and also is not an effect of something else.

शोकस्य प्रत्यगात्मा वा शोकान्तरगिरोच्यते ।
शोकहेतोरपि प्रत्यङ्मात्मा स्याच्छोकवान्कथम् ॥१३४९॥

Or, it is possible that the word *śokāntara* conveys the sense of the inner self on the nature of grief; thus, therefore, how

can the inner self, itself being the nature of grief, be grief? ¹

[1349]

¹In connection with this, SP makes a pertinent comment: *na i sarpasya rajjuṃ vinā sattvābāve tasyās tadvattvaṃ 'stīti bhāvaḥ*.

अशोकान्तरमिति वा श्रुत्यन्तरसमाश्रयात् ।

अशोकादपरोऽशोकोऽशोकान्तरमितीर्यते ॥१३५०॥

Or, by turning (lit. resorting) to another Śruti, (the word should read:) *aśokāntara* and that would then mean: an *aśoka* other than some *aśoka*, i.e. then *aśokāntara*.

[1350]

Sureśvara has taken for this verse, as its basis, the reading of the Mādhyandina recension of BU 4.1.22 which reads: *cchando 'pahatapāpmābhayaṃ rūpam aśokāntaram*; cf. note 1 in verse 1346 above. The text is commented upon by Vidyāranya who explains *aśokāntaram* thus: *na vidyate śokāntaram madhye asya tad aśokāntaram śokaśūnyam iti yāvat*. This, in purport, is comment agrees with the comment of BUB.

Sureśvara, however, gives his own interpretation of this reading of the Mādhyandina recension, in the next verse.

शोकायोग्यः शुचा हीनोऽशोकशब्देन भण्यते ।

यद्वान्तरयते शोकमानन्दैकस्वभावतः ।

शैत्यं हुताशवत्तस्माच्छोकान्तरमिदं भवेत् ॥१३५१॥

One who should not be (lit. does not deserve to be) in grief, (or, in other words,) one who is without grief, is mentioned by the word *aśoka*. Or perhaps, this one, who removes (or, takes away) grief (*śoka*), owing to its nature of being only joy/happiness (is *śokāntara*), like fire (which removes cold), is *śokāntara*.

[1351]

Sureśvara has first explained the word *aśoka* as read in the Mādhyandina recension, and then, following the Kāṇva recension,

offered his own explanation of the word *śokāntara*.

शोकादेर्जनकं यद्वा तच्छोकान्तं भवेत्तमः ।
तस्यारं छिद्रमेतत्स्याच्छान्दसी वर्णनिहन्तिः ॥१३५२॥

Or perhaps, that which causes (lit. originates) grief, viz. darkness (i.e. ignorance), is called *śokānta*; and this (viz. the Ātman) would (then) be *ara*, i.e. a hole in it (i.e. the piercer of it) and then there could be (or, has been) the loss (lit. concealment) of a letter (viz. *a*) in the Vedic manner. [1352]

This is yet another explanation of *śokāntara*, given by Sureśvara. According to him, the word *śokāntara* should have been *śokāntāra*, with the dropping of *a* in *ara* in Vedic manner!

अविद्याकामकर्माणि निःसङ्गत्वस्वभावतः ।
अतिवर्तत आत्मायं वस्तुवृत्तानुरोधतः ॥१३५३॥

This Ātman¹ transcends ignorance, desire and activities by its having the nature of one who is devoid of attachment in its entirety (*niḥsaṅga*) and being in accordance with the nature of the (real) thing. [1353]

¹Possibly, this is the reference to the individual self that is experiencing deep sleep; cf. the preceding verse.

स्वतो बुद्धं यतो वस्तु स्वतः शुद्धमतोऽद्वयम् ।
स्वतो मुक्तमतः सिद्धमविद्यातज्जहानतः ॥१३५४॥
यत एवमिदं वस्तु अतिच्छन्दादिलक्षणम् ।
निःशेषद्वान्तसंबन्धव्यतिक्रान्तमिदं ततः ॥१३५५॥

Since the (real) thing is, in its own right, enlightened/awake; in its own right, pure and, therefore, without any duality (associated with it); (being so) in its own right, (completely) free and therefore it is established/proven through (by abandoning, or, casting off) ignorance and its effect(s). [1354]

Since this is so, therefore, this thing, whose characteristic is *aticchanda* etc., has transcended the relation to darkness in its reality. [1355]

Now follows up to verse 1376 the discussion on BU 4.3.22.

जन्यकारणसंबन्धात्कार्यकारणसंगतेः ।

जन्यहेत्वतिवृत्तत्वात्पिताप्यत्रापिता ततः ॥१३५६॥

Since the cause and its effect are well acceptable¹ owing to the (invariable) connection (of the cause) with the effect (to be) produced (by or from it), therefore, here (in the illustration), the father becomes a no-father as the effect is beyond (or, above)² the effects of it, viz. the (one to be) produced.³ [1356]

In the translation, we have adopted the usual order of the mention of cause and effect, though not in strict conformity with their mention in the text.

¹*saṅgateḥ* is understood as *susambaddhatvāt*.

²That is, transcends; cf. verse 1369 below.

³This is the doing(s) of *janya*, viz. what is effected by the performance of *dharma* 'merit' or *adharma* 'demerit' by a son that is born of a father (who is the *kāraṇa*). SP clarifies it further as *suptau ca tatsambadhābhāvāt* (viz. *pitāputrayoḥ kārya-kāraṇatvopagamo*) *tannibandhanakāryakāraṇanivṛtter jāgarādaupitāpi susupte bhavaty apitā*) and adds *putre 'pi tulyam etad* *ty arthaḥ*.

अविद्यैव यतो हेतुः कर्तृत्वस्य न वस्तुतः ।

कर्तृत्वे सति कर्माणि नान्यथाकर्तुरात्मनः ॥१३५७॥

Since ignorance alone is the cause of agentship (in the case of the Ātman and) it is not (an agent) in reality; (therefore), on the part of the Ātman which (by its nature) is not an agent,¹ there could be activities only when (it is held to have)

agentship (and) not otherwise.²

[1357]

¹SP rightly points out the break-up of *nānyathākartur* ... into *nānyathā akartur*

²This suggests the absence of liberation (*anirmukti*), in case the Ātman is accepted as an agent of activities.

अविद्यायामतोऽसत्यां नात्मनः कर्तृकर्मणी ।
पितृपुत्रादिसंबन्धो नातोऽस्तीह सुषुप्तगे ॥१३५८॥

Consequently (*ataḥ*), while there is no presence (or existence) of ignorance, there cannot be agentship and objectship (acceptable) in the case of the Ātman.¹ (Indeed) here there is not (at all) any relation such as² that of a father and (his) son in the case of (the Ātman) which is in (deep) sleep.

[1358]

¹Read SP: *kartr̥tvasyāvāstavatvam akartuḥ karmābhāvaś cātaḥ-śabdārthaḥ*.

²The word *ādi* suggests the other relations (or connections) mentioned in BU 4.3.22.

असङ्गोऽयं स्वतो यस्मान्नातः केनचिदात्मनः ।
सर्वावस्थासु संबन्धः संबन्धोऽतोऽस्य मोहतः ॥१३५९॥

Since this one (viz. the Ātman) is by its very nature unattached¹ (to anything), therefore, there is no relation of the Ātman to any (of the) objects, in all the states of the Ātman (and), therefore, there can be its relation (to such objects only) on account of delusion.²

[1359]

¹That is, unrelated to, or, not affected by.

²This is *moha* for *avidyā* 'ignorance'.

Now follows up to verse 1369 the purport of *atra stenah* ... in BU.

शुभकर्माभिसंबन्धः केवलो नास्य वार्यते ।
निषिध्यते यतो योगः कुत्सितेनापि कर्मणा ॥१३६०॥

(However) the relation of this one to only auspicious activities is not set aside,¹ since there is (noticed in the Śruti passage the mention of) its connection with (other) censureable² (activities) also. [1360]

¹Or, denied; cf. *apahatapāpman* the Ātman on BU 4.3.21 above.

²Literally, censured.

विप्रहाटकहार्यत्र स्तेनशब्देन भण्यते ।
भ्रूणघनसहचारित्वाच्चाण्डालो ब्राह्मणीसुतः ॥१३६१॥
शूद्रेण जातो विज्ञेयः प्रातिलोम्योपलक्षणः ।
वरिष्ठब्रह्महा चेह भ्रूणहेत्यभिधीयते ॥१३६२॥

It is the stealer of a Brāhmaṇa's gold that is expressed by the word *stena*, on account of his association with the killer of (a Brāhmaṇa in the form of) a foetus.¹ A Cāṇḍāla is to be known as the son of a Brāhmaṇa woman, [1361]
born from a Śūdra—(thus) characterized by marriage² in reverse order. Here,³ the word *bhrūṇahā* is expressed in the sense of a killer of a Brāhmaṇa who is (of) the highest caste.⁴ [1362]

¹This refers to the future sacrificer, a Brāhmaṇa to be born.

²SP quotes:

*āyogavaś ca kṣattā ca cāṇḍālaś cādhamo nṛṇām /
prātilomyena jāyante śūdrād apasadās trayah //*

(*Manusmṛti* 10.16); and also

*brāhmanyām kṣatriyāt sūto vaiśyād vaidehakas tathā /
śūdrāj jātas tu cāṇḍālah sarvadharmabahiskṛtaḥ //*

(*Yājñavalkyasmṛti* 1.93); cf. *Manusmṛti* 10.11-12.

³Sureśvara points out the significance of the word *bhrūṇahā*

in BU 4.3.22.

⁴This explains the purpose of *viprahāṭakahārī*; also read NKL (ms. p.668): *saṃgavedāvadhyānī* (sic) *bhrūṇa iti*. Earlier, under verse 1361, NKL reads: *bhrūṇo garbhas tasya hantā bhrūṇaghnaḥ*.

उत्पन्नः क्षत्रियायां यः शूद्रेणैव स उच्यते ।

पौल्कसः पुलकसो ज्ञेयः स्वार्थ एव च तद्धितः ॥१३६३॥

He is designated as a Paulkasa who is begotten in a Kṣatriya woman by a Śūdra.¹ He is to be known as the same as Pulkasa; for (in Paulka there is addition of) a *taddhita* (secondary) suffix which conveys the same sense (as of the basic form).²

[1363]

¹SP supports this, citing *Manusmṛti* 10.18:

jāto niṣādāc chūdrāyām jātyā bhavati pulkasaḥ /

(*Manusmṛti* 10.17ab—reading *pukkasah* for *pulkasah*);

and also

viprān mūrdhāvasikto hi kṣatriyāyām viśaḥ striyām /

ambasthaḥ śūdryām niṣādo jātaḥ pāraśavo 'pi ca //

(*Yājñavalkyasmṛti* 1.91), cf. *Manusmṛti* 10.8.

²Read NKL (ms. p.668): *vayata e vāyasa itivad ananyārthatvāt (ta)ddhitasyāntapratyasyety arthaḥ*(sic)?

निकृष्टदेहसंबन्धप्रापकैरपि कर्मभिः ।

असंबद्धः सुषुप्तस्थः कर्महेत्वन्भिप्लुतः ॥१३६४॥

Though not connected with activities which cause connections with lower bodies,¹ (the Ātman) abiding in deep sleep and not overpowered² by causes of (those) activities, (is said to be so affected).³

[1364]

¹That is, with bodies of those born in lower castes.

²This is based on the variant reading in AnSS edition. Also cf. *anabhisambandhaḥ* in the next verse.

³This is to be supplied in view of SP's remark: *stenādi-*

ākyaatātparyam upasaṁharati.

तथैवानभिसंबन्ध आश्रमाख्यैश्च कर्माभिः ।

परिव्राट्श्रमणो ज्ञेयस्तापसाश्रमसंनिधेः ॥१३६५॥

In the same way, (the Ātman of) a wandering ascetic¹ should be taken (or understood) as having no connection (whatever) with activities known as (belonging to) various stages of life (and which are performed by him) owing to (his stay in) the proximity of ascetics' abodes.² [1365]

The text shows the absence of Saṁdhi in *parivrāṭśramaṇo*; usually *parivrācchramaṇo* is expected.

¹Cf. SP: *śramaṇaśabdasya kṣapaṇakarūḍhim āśanikyāha parivrāḍ* i. Also refer to the next verse.

²SP rightly points to these as *śubhāśubhadehasambaddhahetu*.

वर्णाश्रमादिहेतूनां सर्वेषामपि कर्मणाम् ।

उपलक्षणकृज्ज्ञेयः परिव्राट्तापसग्रहः ॥१३६६॥

(This) mention (*graha*) of a wandering ascetic should be taken as the cause for indication of all of the activities which arise from¹ various castes and stages (of life) etc.² [1366]

NKL (ms. p.669) introduces this verse thus: *āśramadvaya-
rahaṇam pariśiṣṭāśrama(?)varṇakarmanām upalakṣaṇam ity āha*.

¹Literally, having the cause in belonging to.

²The word 'etc.' indicates the age of a person and his abilities, f. SP: *ādiśabdena vayovasthādi grhyate*. But NKL (ms. p.669) reads: *ādipadena jātaputratvādigrahaḥ*.

इत्येवमादयोऽनन्ताः संबन्धा मोहहेतवः ।

नरेण परिसंख्यातुं न शक्याः कल्पकोटिभिः ॥१३६७॥

These and such others are numerous (lit. innumerable) relations (which are) the (various) causes of delusion;¹ they are not

possible for a human being² to count (or enumerate) (even) in crores of Kalpas.³ [1367]

¹Cf. the word *moha* and note thereon in verse 1359 above.

²Literally, a man.

³These are immense measures of time-periods; a *kalpa* is a period of four thousand three hundred twenty million years of mortals.

पुण्यापुण्ये हि निखिलसंबन्धस्येह कारणम् ।
प्राज्ञोऽनन्वागतस्ताभ्यां कर्महेत्वसमन्वयात् ॥१३६८॥

Indeed¹ merit and demerit are there² the causes of all (kinds of) relations (of man) to his different experiences of the results, i.e. *bhogas*. (Hence) *Prājña* (i.e. the *Ātman* in the state of deep sleep) is unaffected by them, since there is not any connection (of it) with the cause(s) of activities.³ [1368]

¹That is, 'Since this is referred to in BU third Ahdyāya also,' as noted by SP, in *pañcame 'py uktam etad iti*.

²That is, in the case where the *Ātman* is subjected to transmigration owing to delusion or ignorance; cf. SP: *ajñānottham kārakam taddhetus tasya 'nanvayād iti yāvat*.

³NKL (ms. p.669) explains: *ajñānasambandhābhāvena karmānanvayād asambandha ity arthah*.

परं रूपं समापन्नः कर्माविद्यानिमित्तकम् ।
पितृमात्रादिसंबन्धं सुषुप्ते सोऽतिवर्तते ॥१३६९॥

Having attained to (oneness with) the highest state¹ (of the *Ātman*), that one transcends,² in the state of deep sleep,³ (every) such connection with (or, relation to) father, mother and others⁴ that is caused by actions and ignorance. [1369]

¹Literally, form (which is connected with deep sleep).

²Cf. *ativṛttatva* in verse 1356 above.

³SP refers to *satā somya tadā sampannah*, CU 6.8.1.

⁴This refers to one's caste, stage of life, age and consequent duties laid down for one.

The explanation of the part of BU 4.3.22 above is hereafter, .e. up to verse 1407, stated in the form of a question and an answer to it.

जीवत्येव शरीरेऽसिंस्तत्स्थ एव कथं पुनः ।
सर्वसङ्गव्यतीतोऽयं भवतीत्यभिधीयते ॥१३७०॥

(A question can be asked thus:) 'How then can this one have transcended all the attachments, while abiding in this living body? ¹'—to this (an answer) is now stated. ² [1370]

¹This refers to the *transmigratory* existence of the Ātman.

²Add: in the statement *ananvāgatam*

यतोऽनन्वागतं रूपं सुषुप्तेऽस्यात्मनः स्वतः ।
उभाभ्यां पुण्यपापाभ्यां कुतस्तदपि चेन्मतम् ॥१३७१॥

Since the state ¹ of this Ātman which exists in its own right ² is not affected ³ by both merit and demerit, therefore, it might be thought, 'Why is that also so?' [1371]

This elucidates *katham punaḥ ... abhidhīyate* in the preceding verse.

¹Or, form; cf. verse 1369 and the note on it above.

²Or, is by itself (or, its own nature) not affected

³Or, touched.

हृदयातिक्रमाद्यस्मात्तद्धर्मानतिवर्तते ।
कर्मप्रयोजकान्कामांस्तस्मात्सुस्थं यथोदितम् ॥१३७२॥

(In answer to the above, it is said:) 'What has been stated (in *ananvāgatam* ...), is well stated, ¹ since (the Ātman), by

transcending the heart, goes beyond its properties,² i.e. desires which cause³ the activities (of transmigratory being)'. [1372]

This explains *tīrṇo hi ...* in BU.

¹Or, as to what has been stated stands (reasonable) alright. Cf. SP: *suptau karmāsambandhād aśeṣasambandharāhityam iti yāvat.*

²This refers to matters/factors related to desires; see the next verse and note thereon.

³That is, prompt.

हृदयस्यैव धर्मास्ते शोककामादयो यतः ।
तीर्णबुद्धिर्हि तद्धर्मास्तस्मादेषोऽतिवर्तते ॥१३७३॥

Since those properties, viz. grief, desire etc.,¹ are of the heart itself;² therefore, the individual, whose intellect has gone beyond³ the properties of that (heart), transcends (them all).

[1373]

¹Cf. BU 4.4.6 (the verse below, at the beginning of BU 4.4.7) which is identical with *Kāthopaniṣad* 6.14. These are *saṅkalpa*, *vicikitsā*, *śraddhā*, *aśraddhā*, *dhṛti*, *adṛti*, *hrī*, *dhī* and *bhī*, cf. BU 1.5.3 and *Maitrāyaṇyupaniṣad* 6.30.

²Read NKL (ms. p.669): *kāmādīnām ātmaguṇatvāt katham tadatikrama ity āha hr̥dasyeti.*

³Or, has transcended.

पुण्यपापाभिसंबन्धः स्वप्ने हृदयसंगतेः ।
वासनामात्रया त्वत्र सापि प्राज्ञे निवर्तते ॥१३७४॥

The connection¹ (of this transmigratory Ātman) in the dream (state) with merit and demerit is (but) owing to its association with² the heart, only in (the form of) impression(s); but that also refrains from³ (that) while it is (in the state of) Prājña.

[1374]

¹Or, affection.

²Cf. -*saṃgati* which is *susambaddhatva* in verse 1356 above.

³Or, keeps away from, recedes from.

करणत्वं विहायेह केवलाज्ञानमात्रकम् ।
स्वप्न आस्ते मनोरूपं वासनामयविग्रहम् ॥१३७५॥

In the dream state, there exists (of the transmigratory Ātman) only that form which consists in *manas*, that which has the form (i.e. nature) of impression(s), i.e. when it has given up its nature as an organ consisting only in ignorance. [1375]

This explains how *vāsanā* leads to the state of the transmigratory Ātman as that consisting in *manas*.

वासनामय एवातो भुङ्क्ते स्वप्ने क्रियाफलम् ।
न हि स्वप्नदृशो योगः स्वप्नेऽन्येनास्ति केनचित् ॥१३७६॥

Therefore, (this transmigratory Ātman) which consists mostly in impressions, experiences in a dream the result of an activity.¹ Indeed, in the dream state, there is no connection whatever of the seer of the dream² with another (external) object.² [1376]

This is to bring out that the Ātman cannot have any experience whatever; since, in reality, *manas* does not exist as an organ.

¹Or, of activities in the dream.

²According to SP, this indicates the absence of any experience gross objects.

From verse 1377 up to 1789, there is discussion on BU 4.3.23-31.

स्वाभासवर्त्मनैवास्ते जाग्रत्स्वप्नसुषुप्तिषु ।
अविद्याकामकर्मादि बिभर्तीव न तु स्वतः ॥१३७७॥

(The Ātman) abides in the waking, dream and sleep states

only by way of its semblance and, therefore, it appears to have¹ desire, activity etc. that are caused by ignorance;² but it does not have the same in reality.³ [1377]

This is a direct expression of Sureśvara's theory of *ābhāsa*.

¹That is, it is affected, as it were, by desire

²*avidyākāmakarmādi* is broken up as *avidyā-janita-kāma-karmādi*; SP supports this by the Śruti about the *asaṅgatva* of the Ātman, cf. BU 4.3.15.

³Or, by its nature.

चैतन्यमपि नैव स्यादात्मनः कामकर्मवत् ।

धर्मानन्वयतः प्राज्ञ इत्येवमभिचोदिते ॥१३७८॥

स्त्रीपुंद्दृष्टान्तवाक्येन परिहारश्च दर्शितः ।

विभागहेत्वसद्भावाज्जाग्रद्वन्नोपलभ्यते ॥१३७९॥

Further, in respect of what is pointed out, i.e. that sentience in the Ātman, is not ever a performer of (any) action (produced) from (some) desire and (thus), on account of any association (of it) with merit,¹ it is (designated as) *Prājña*,² [1378]

there is presented a refutation³ in the form of the statement of the illustration about⁴ a woman and (her) man; (it is thereby argued that) there is not noticed (any activity⁵ of them), owing to the absence of (any) cause of (their) distinction⁶ as in the waking state. [1379]

¹This implies *adharma* also, i.e. any activity; cf. verse 1374 above.

²Though this is the designation of the Ātman (viz. transmigratory being) in the deep sleep state, a derivational meaning of the name as *prakarṣeṇa ajñāḥ prājñāḥ*, with the *taddhita* suffix *-ka* causing no change of meaning, is also not kept out of view; cf. verse 1374 above.

³Or, an answer.

⁴That is, about the intercourse (*sampariṣvaniga*).

This is *dharma* (or *adharma*) as understood in BU sixth
yāya later.

Literally, division.

अविभागात्मतां यातं न पुनः कामकर्मवत् ।

साधितं च प्रयत्नेन स्वयंज्योतिष्ट्वमात्मनः ॥१३८०॥

That state of the Ātman, i.e. its being self-illuminating, has
not again attained¹ the nature of being undivided, like an
act of sexual love, and what is not brought with effort,² to
this state, i.e. to the state of being self-illuminating. [1380]

This implies being divided, or distinguished, like a woman
and her man.

Since there was no division, there was no need of (or,
reason for) rejoining the so-called divided parts, or distinguished
objects.

यद्यात्मायं स्वयंज्योतिः कामकर्मादिवत्कथम् ।

सुषुप्तेऽस्य स्वभावत्वाज्जह्याच्चैतन्यमित्यतः ॥१३८१॥

नास्य धर्मो भवेदेतत्सुषुप्ते तददर्शनात् ।

नात्मधर्मो विनष्टत्वात्तस्माच्चैतन्यमत्र तत् ॥१३८२॥

One may be asked, 'How can this Ātman, which is self-illuminated,
in the state of deep sleep, a performer of (any) activity
(produced) from (some) desire and (later) give up its
attentiveness,¹ (which it is possessed of) by its very nature?';

[1381]

The answer given is:) 'There is not noticed any merit,² on
the part of this one, in the deep sleep state, owing to the
loss of its own nature;³ therefore, it is (the same) sentience
(as before)'.⁴

[1382]

This is not to be understood as different from the Ātman.
cf. verse 1378 above and note 1 thereon.

dharma has here another meaning, viz. it is *prāṇaprada*

vastudharma.

⁴This is for reasserting that the Ātman of the transmigratory being is not, in reality, insentient.

अपि विप्रतिषिद्धं च यत्स्वयंज्योतिरात्मकम् ।
प्रत्यग्वस्तु न वेत्तीति भवतेहाभिधीयते ॥१३८३॥

Also, it is stated: 'What is contradicted here (i.e. in the deep sleep state) is that the inner reality (i.e. the being within the body), being in the state of self-illumination, does not know¹ (anything else)'. [1383]

¹Or, is not aware of. This affirms the existence of all-time awareness (or, ever knowing state) of the Ātman.

ऐक्यादनपलब्धिश्चेदनैकान्तिकता तथा ।
यतोऽभावैऽप्यसंवित्तिश्चैतन्यस्येह दृश्यते ॥१३८४॥
इत्यस्य परिहारार्थं परो ग्रन्थोऽवतार्यते ।
यद्वै तदित्युपक्रम्य प्रत्यग्वस्तुविशुद्धये ॥१३८५॥

If (it is argued that) there is no obtaining/seeing (of what is intended in the illustration) owing to the singleness (of the Ātman), then (it has to be observed that) there (follows) unsteadiness/uncertainty (of reasoning);¹ for, even in the absence (of any other external object), there is noticed on the part of sentience (i.e. Ātman) the non-awareness (of another object); [1384]

in order to refute/answer away this, there occurs the subsequent portion (of the Śruti) which, having begun with the words *yad vai*, (purports) to clarify/elucidate (the nature of) the inner reality. [1385]

The question mentioned in verse 1384 is answered away in verse 1385; cf. SP: *svaprakāśana na taj jaḍam iti tadviśuddhis tadarthaṁ codyaṁ samādheyam tadarthena yad vai tad ityādipravṛttir ity arthaḥ*.

So far, Sureśvara has explained the connection between the question and the answer to it, as stated in BUB.

¹Strictly speaking, it is according to Nyāya logic the fault consisting in the undistributed middle. This is explained by SP thus: *loke pāṣāṇādaḥ caitanyasyābhāve 'py anupalabdher aiikyasya utprayojakatvaṃ vyabhicārīty arthaḥ*.

Now follows the introductory to BU 4.3.23; its explanation begins, however, in verse 1414 below.

There is, first, in verses 1386-1396, a statement of the view of Bhartṛprapañca as regards the connection between BU 4.3.22 and 23 and, then, in verses 1397-1407, the refutation of that view.

तथा परोऽपि संबन्धः कैश्चिदत्राभिधीयते ।

Also, there is stated in respect of this (connection) another explanation offered by some others,¹ thus: [1386ab]

¹This refers to Bhartṛprapañca.

अशोकान्तरमित्युक्तं याथात्म्यं प्रत्यगात्मनः ॥१३८६॥
ज्योतिर्मात्रतयैवात्मा सुषुप्ते व्यवतिष्ठते ।

The nature of the inner Ātman, as it is, is stated in the words *aśokāntaram*;¹ [1386cd]

(for) in the form of light alone does the Ātman abide there in deep sleep.² [1387ab]

¹This refers to the word *śokāntaram* in the end of BU 4.3.21 earlier and explained in BUB thereon as *śokavarjitam* and so also in BUBV in verses 1347-1352 above.

²Read SP: *yathāhur aśokāntaram ity uktam tad evāsmiṃ kāle jñānātmanā jyotimātreṇa bhavati* (possibly from the commentary of Bhartṛprapañca).

कुतः पुनरिदं सिद्धं विशेषज्ञानसंक्षये ॥१३८७॥

(It may then be asked:) 'How/Whence is this proved, when there is complete loss (lit. destruction) of knowledge of (all) particular object(s)?' [1387cd]

ज्योतीरूपमिदं तत्त्वं सुषुप्ते व्यवतिष्ठते ।

उक्तं प्राग्व्यतिरेकेण स्वयंज्योतिष्ट्वमात्मनः ॥१३८८॥

This reality (*tattvam*) has the form of light and it abides in deep sleep (in that very form). (And) it was stated earlier in Vyatireka (form of argument) that (the nature) of the Ātman is being self-illuminating.¹ [1388]

¹SP cites (probably the actual words of Bhartṛprapañca): *uktam hi— vyatirekeṇa svayaṁjyotiṣvam iti* and further explains it as *vyatirekeṇa vinādityādinā vyavahārasya dr̥ṣṭatvād iti yāvat*.

ननुक्तं प्रागिदं सर्वं विशेषज्ञानमात्मनः ॥१३८९॥

अविद्यापक्षपात्येव न तत्स्याच्चित्तिवत्स्वतः ।

नैतदेवं यतोऽदर्शि पूर्वमेतत्स्फुटं मया ॥१३९०॥

(It may be asked:) 'Well, all this particular knowledge on the part of the Ātman is already stated earlier, [1389] as falling within the sphere of ignorance,¹ and it would not be, like sentience, existent in its own right'. (But it may be stated in answer to this:) 'No, this is not so, (for) this is clearly explained by me (that way)'.² [1390]

¹SP cites (probably the words of Bhartṛprapañca): *uktam hi— tadviśeṣavijñānam avidyāpakṣasyaiveti*. Cf. *avidyāpakṣabhāk*.

²Refer to BUBV 4.4.91, 100, 123. And, the next verse clarifies that view (in brief).

सर्वमेवाहमस्मीति यद्यपीदं विशेषवत् ।

विज्ञानं न तथापीदमविद्यापक्षभागिति ॥१३९१॥

Thus (have I said:) 'Even if all this, viz. "I am indeed all this (myself)", is a particular knowledge, it is still not the particular knowledge which falls within the sphere of ignorance'.¹

[1391]

¹SP clarifies this in fullness.

नानात्वदर्शनं यस्माद्भयादज्ञानजं मतम् ।
प्रतिपक्षमविद्याया अहमेवेदमित्यतः ॥१३९२॥

Since it is considered that the awareness (lit. seeing) of variety (of external objects) is, owing to its (causing) fear, a product of ignorance, therefore, (the knowledge), "I myself am (all) this", is (to be understood as) an opponent of ignorance.¹

[1392]

¹Cf. in this context *dvitīyad vai bhayam bhavati* (BU 1.4.2) and *yad eva jāgrad bhayam paśyati tad atrāvidyayā manyate* (BU 4.3.20).

तदेतन्मथ्यमानं सदैक्यदर्शनलक्षणम् ।
भवत्यतीव संशुद्धं प्रसन्नं व्यवतिष्ठते ॥१३९३॥

Thus, this existent (viz. Ātman), being distinguished¹ as having the characteristic of singleness (or, being alone), is (ever) extremely pure and abides (in its own right/state) as (only) clear (or, untainted by anything).

[1393]

¹SP rightly explains *mathyamāna* '(lit.) being churned' as *bhedadarśanād vivicyamānam iti yāvat* and refers probably to Bhartṛprapañca's explanation thus: *tad etad ekatvadarśanam mathyamānam sadā śuddham prasannam bhavatīti bhāṣye bhavatipadasyārtham āha*.

विशेषदर्शनासूतेरसंबोधस्तदात्मनः ।

देदीप्यमाना विज्ञप्तिर्विशेषात्मावतिष्ठते ॥१३९४॥

Then, since there is no seeing of any particular (objects), there is no awareness (of anything whatever) and, therefore, there remains/abides (only) resplendent special knowledge (*vijñapti*) which is the very (nature of the) knowing Ātman.¹ [1394]

¹SP seems to quote from Bhartṛprapañca: *uktam hi— svena viśeṣavijñānātmanā dedīpyamāno bhavatīti*.

सुषुप्तस्थानं रूपं तदेतत्प्राक्प्रदर्शितम् ॥१३९५॥
तत्रैतच्छङ्क्यते ज्ञानेऽसंबोधः कथमात्मनः ।
सति स्याच्चेदनाशङ्का स्त्रीपुंद्दृष्टान्तनिर्णयात् ॥१३९६॥
नैतदेवं यतस्तत्र सत्स्वेव ज्ञानहेतुषु ।
अविभक्तो विशेषेषु भवतीति प्रदर्शितम् ॥१३९७॥

Thus is shown/explained first this form (of the Ātman) in the deep sleep state. [1395]

In this respect, this is pointed out as a doubt, 'How can there be absence of any awareness on the part of the Ātman, when it is (in reality, in the very state of) knowledge?'. (To this an answer is given:) '(This) is not a doubt/question, as decided/settled by the illustration of a woman and (her) man, [1396]

(and also) since it is not thus (as you have held); because, there, the Ātman is undivided (i.e. unaffected/undifferentiated) even in the midst of particular objects—this is already pointed out'. [1397]

इह पुनर्न शक्यन्ते विशेषाः प्रसमीक्षितुम् ।
यतोऽत्राप्रविभक्तेन स्वेन बोधेन तिष्ठति ॥१३९८॥

(And), again, it is not possible to think of (various) particular (objects), since the Ātman abides here (in this state) in its (own form of the) knowing one. [1398]

असंबोधः सति ज्ञाने कथं स्यादिति शङ्क्यते ।

तम एवेति चेन्नैवं स्वयंज्योतिष्ट्वमात्मनः ॥१३९९॥

महतेह प्रयत्नेन यतः प्राक्प्रतिपादितम् ।

सिद्धान्तस्य स्थितत्वाच्च यथावदुपपत्तिभिः ॥१४००॥

What is doubted is: 'How can there be absence of (any) awareness, while there is (present) knowledge (in the form of the Ātman)?' (and) if (the answer is: 'Because there exists/is that Ātman as) darkness';¹ (then the argument is:) 'Thus, there is not self-illuminating nature of the Ātman', [1399] because (already) that has been earlier² propounded here,³ with great effort, and because the conclusion (*siddhānta*) has remained (unopposed)⁵ with suitable (*yathāvat*) reasons (or, well reasoned arguments). [1400]

¹SP seems to quote Bhartṛprapañca in *tad āhus tama evaitadrūpaṃ syān na jyotir iti*.

²Read SP: *prāg iti brāhmaṇārambhābhīdhānam*.

³SP states that *iha* refers to earlier statements in the Śruti.

⁴SP seems to quote Bhartṛprapañca thus: *uktaṃ ca—jyotī-rūpatvasya mahatā prayatnena vibhāvitatvād iti*.

⁵SP seems to quote Bhartṛprapañca thus: *tad uktaṃ sthitatvāc ca siddhāntasyeti*.

प्रदीपवद्विनष्टोऽयमिति चेदभिधीयते ।

प्रत्यभिज्ञानतो नैवं पूर्वदृष्टस्य वस्तुनः ॥१४०१॥

If (now) it is said (i.e. argued): 'This one becomes extinct/lost like a lamp', then it is said (in answer:) 'This is not so, since there is recognition (of the same as the real existent seen (in deep sleep) earlier'.¹ [1401]

¹Read SP (to understand this as discarding the Buddhist view of Kṣaṇavāda:) *utthitasya pūrvabodhe dr̥ṣṭam adhikṛtya pratyabhi-jñādr̥ṣṭeḥ svāpe pūrvadraṣṭur nāṣe draṣṭrantarasya cotthāne tadayogān na kṣaṇavādaśaiketi pariharati (pratyabhijñānata iti)*.

This is clarified further in the next verse.

यतः प्रत्यभिजानाति सुषुप्तादुत्थितस्ततः ।

सर्वावस्थास्वयं नित्य आत्मा नैव विनश्यति ॥१४०२॥

Since (the Ātman) recognises (itself) when awake from deep sleep, therefore, this Ātman is ever unchanged (*nitya*) in all the states (of it)—it never perishes.¹ [1402]

¹Read SP: *utthitasya yaḥ suptaḥ sa jāgarmūti pratyabhijñānād ātmano 'vasthātraye 'pi sthāyitvān nāsau svāpe naśyatīty arthaḥ.*

समस्तैरिन्द्रियैर्हीनः संप्रसन्नो निराकलः ।

सुप्तः स्वप्नान्न जानाति यः स आत्मैति भण्यते ॥१४०३॥

That one is understood (lit. called) as the Ātman, who, having had complete bliss (*samprasanna*), devoid of all organs, unagitated¹ (while it had) slept does not know (any objects seen in) dreams. [1403]

¹SP explains *nirākula* as *sthūlasūkṣmākulatāvikalah*.

नाद्राक्षं स्वप्नमद्येति प्रतिबुद्धोऽभिभाषते ।

जाग्रत्स्वप्नसुषुप्ते च तस्मादात्मा स एव सः ॥१४०४॥

When awake (from deep sleep), it says, 'I have not seen any dream, today'. Therefore, in (all the states, viz.) waking, dream and deep sleep, the Ātman remains the same. [1404]

स्वप्नमेति सुषुप्ताच्च स्वप्नाद्बुद्धान्तमेव च ।

इति श्रुत्या पुराप्युक्तं तस्मान्नात्मा विनश्यति ॥१४०५॥

And even earlier the Śruti has stated "It moves from the state of deep sleep to the dream state and from the dream state to waking state". Therefore, the Ātman (it has to be concluded) never perishes. [1405]

Cf. BU 4.3.15-17.

स्वयंज्योतिःस्वभावस्थस्तस्मादात्मा सुषुप्तगः ।

प्रत्यगज्ञानतत्कार्यैरसंस्पृष्टः स्वभावतः ॥१४०६॥

Therefore, the Ātman, abiding in deep sleep, remains in its own nature as the self-illuminated and is, by its very nature, untouched (i.e. unaffected) by the ignorance on the part of the inner self (in a body) and its effects.¹ [1406]

¹SP seems to quote Bhartṛprapañca thus: *uktam hi—svātmanaiva jyotiṣāvasthānam iti*.

यत्तु तच्छङ्क्यते कस्मादात्मा प्राज्ञे न पश्यति ।

चैतन्यात्मस्वभावोऽपि तच्चापि शृणु सांप्रतम् ॥१४०७॥

And, as to what is doubted, viz. 'Why does not the Ātman, in its state as Prājña, see (any external objects), though it has its own nature of being sentience?'; (it is said) 'Even that, do you now hear/listen'. [1407]

Now, in verses 1408-1536, Sureśvara explains the words in BU 4.3.23 before he takes up the refutation of the unacceptable notions in the view of Bhartṛprapañca in verse 1537 below. Verses 1408-1409 convey Sureśvara's own thought in this regard.

स्वभावो नात्मनः कामकर्माविद्यादिबोधवत् ।

असङ्गानन्वयोक्तिभ्यां कामादेश्च मृषात्वतः ॥१४०८॥

The nature of the Ātman is not like that of knowledge from (i.e. which is produced by) desire, activity, ignorance etc.,¹ because of the falsehood/unreality of desire etc.² (as understood) from the statements (in the Śruti about the Ātman's being) unattached/unaffected.³ [1408]

¹For expounding the compound *kāmakarmāvidyādijanya-bodhavat*, cf. verse 1377 above. The suffix *-vat* is understood with Pāṇini 5.1.116: *tatra tasyeva*.

²Cf. note 1 on verse 1373 above.

³That is, unattached to/unaffected by (any external objects).

चैतन्यमात्मनस्तत्त्वं कूटस्थं न तु कामवत् ।
अनाद्यविद्यायोगोऽस्य तत्कार्यैरादिमान्मतः ॥१४०९॥

Sentience (which is) the true nature of the Ātman is immutable; (it is) not like (that of) desire etc.;¹ the association of this one (viz. the Ātman) with the (so-called) beginningless ignorance and with its effects is held/understood to have a beginning.² [1409]

¹Cf. note 1 on the preceding verse.

²The word *ādimān* implies *antavān* 'that which has an end'.

Verses 1410-1411 convey an alternative explanation of *yad vaitat*

....

अज्ञानमिथ्याविज्ञानसंस्थस्यास्यात्मनः क्व नु ।
उपदेशादिसंबन्ध इत्येतदिह भण्यते ॥१४१०॥

'Where indeed can there be any possibility (lit. connection) of instruction about this Ātman which abides in (i.e. despite) absence of knowledge (or, ignorance) and false particular knowledge(s) about it?', (to this question an answer)¹ is stated here: [1410]

¹Read SP: *suṣupte saṁsāranirmuktam ātmatattvaṁ siddham tajjñānam mokṣāyeti vaktuṁ yadityādi vākyaṁ ity arthah*.

न पश्यत्येष आत्मात्र स्वयंज्योतिश्च स स्वतः ।
इति विप्रतिषिद्धं यत्तदैकात्म्यान्न दुष्यति ॥१४११॥

(An objection can be this:) 'In this (state of deep sleep), the Ātman does not see (any external objects) and yet it is, by its (very) nature self-illuminating'—this involves contradiction'.¹ (The answer to it is:) 'Owing to the singleness (of the Ātman) it is not (a) faulty (argument)'. [1411]

¹This is involved in the Śruti statement *paśyan na pasyati*.

Verses 1412-1420 are sureśvara's own explanation of *yad vai tat*

....

चोदितार्थानुवादोऽयं परिहारविवक्षया ।
यद्वै तदिति यत्नेन श्रुत्येह क्रियतेऽञ्जसा ॥१४१२॥

This¹ is a restatement of the objection with a desire to refute (the same); here (i.e. in the statement), viz. *yad vai tat* ..., is made and observation of the Śruti for clarity (*añjasā*). [1412]

¹This refers to the argument in the objection stated in the preceding verse.

न पश्यतीति मन्वीथाः सुषुप्ते यत्र तत्तथा ।
पश्यन्नेवाविलुप्ताक्ष आत्मायं वर्तते यतः ॥१४१३॥

What you think, viz. that (the Ātman) does not see (any external object(s)) in deep sleep, is not like that, since this Ātman is ever seeing, while seeing (reality) with the eye is (never) lost.¹ [1413]

¹SP observes: *kartr̥tvam vārayati avilupteti*.

न पश्यत्येव नन्वत्र चक्षुरादेरसंभवात् ।
करणान्यन्तरेणेह जात्यन्धादिर्न वीक्षते ॥१४१४॥

(It may be argued yet:) 'Indeed, it does not see (any external objects), for there is absence (*asambhava*) of eye etc.;¹ here

(i.e. in this world) a person who is born blind does not (i.e. cannot) see without (the help of) limbs'.² [1414]

¹The word 'etc.' refers to the other organs.

²Yet, actually, the eye alone is meant. Therefore, the implication is the absence of the eye (for seeing) in a dream.

नैतदेवं यतो द्रष्टुः कारकस्य समीक्षणे ।
करणानि व्यपेक्ष्यन्ते न त्वकारकेवीक्षणे ॥१४१५॥

(The following can be said in answer:) 'This is not (or, cannot be said) so, since (it is only) in the case of an agent of some activity (*kāraṇa*) that limbs¹ are expected; but not in the case of one (viz. the Ātman) who is not an agent (of any activity, and is yet in the act of) seeing'.² [1415]

¹See note 2 on the preceding verse.

²SP brings out the purport thus: *sākṣiṇaḥ ... naiva (kāraṇa-vyapekṣā) nityajñānatvāt*.

स्वप्नेऽपि चक्षुरादीनामपीतिः श्रूयते श्रुतौ ।
कुतः सुषुप्तौ तानि स्युर्यत्र तद्वासनापि न ॥१४१६॥

It is heard in the Śruti¹ that there is merger of the eye etc.² (in reality, viz. the Ātman), while a person is in the dream state also; how (then) can they be there in the deep sleep state, wherein impression (on the intellect) of that³ also does not exist? [1416]

¹Cf. BU 4.3.11: *asuptaḥ suptān abhicākaśīti*.

²See note 1 on verse 1414 above.

³SP adds: *tacchabdaś cakṣurādiviṣayaḥ*.

न पश्यतीति वचनं कारकादेरसंभवात् ।
वास्तवं वृत्तमापेक्ष्य पश्यन्वै तदितीयते ॥१४१७॥

The statement (in the Śruti) *na paśyan* ... is made on account of the absence (*asambhava*) of any means of activity (*kāraṇa*). And that statement, viz. *paśyan vai* ... is made with the actual happening (lit. activity) in the case of the reality, viz. the Ātman (*vāstava vṛtta*). [1417]

Thus is concluded the non-contradiction in the statement of the Śruti.

पश्यन्नेवायमत्रास्त इत्येतच्चेत्कुतो भवेत् ।
इत्यस्य हेतुसिद्धयर्थं न हि द्रष्टुरितीरणम् ॥१४१८॥

If there is (the statement in the Śruti, viz.) 'This one, (i.e. the Ātman), abides here (i.e. in the deep sleep state) as only the seeing one'—how/whence can it be (reasonable)?, to explain/establish the cause for it (viz. that happening/activity) is made (in the Śruti, yet another statement, viz. *na hi draṣṭuh* ...). [1418]

मेयमानप्रमातृणां व्यभिचारेऽपि चात्मनः ।
अनन्यानुभवादेव सिद्धिस्तद्धवंससाक्षितः ॥१४१९॥

And, (that is to say:) even in the absence (*vyabhicāra*) of the object of knowing, the means of knowing and the agent of knowing, there is established (the truth in the statement) on the strength of the exceptional experience of the Ātman through its witnessing the destruction of them all. [1419]

प्रमात्राद्यनभिव्याप्तं वस्तु पूर्वं समीक्ष्य हि ।
नाद्राक्षमिति संधत्ते दृष्टवत्स्वचिदात्मना ॥१४२०॥

Indeed (*hi*) having first well thought over the real thing (viz. Ātman) as (being) non-pervaded by (i.e. uncharacterized as) the agent of knowing etc.,¹ one's own sentience (i.e. the inner self) considers, 'I have not seen' as in the case of some seen object,² by itself. [1420]

¹Cf. *meyamānapramātr* in the preceding verse.

²*drṣṭavat* has the suffix *-vat* in accordance with Pāṇini 5.1.116: *tatra tasyeva*.

There is now in verses 1421-1432 fuller explanation of *na hi draṣṭuḥ* ... in BU 4.3.23.

यस्माद्द्रष्टुर्हि या दृष्टिर्यया द्रष्टा प्रसिध्यति ।
तस्या विपरिलोपोऽयं हेत्वभावान्न युज्यते ॥१४२१॥

(The Śruti statement means:) Since that (viz. the power of) seeing of the seer by which (i.e. being possessed of which)¹ is the seer established (as such)—this loss of it (which is meant) is (in reality) not reasonable on account of the absence of (any) cause (for that loss). [1421]

¹This is on the basis of SP: *trīyetthambhāve*.

नाशोत्पत्त्यादयो धर्मा हेतुमद्वस्तुनो यतः ।
निर्हेतुसाक्षिणो न स्युरागमापायिसाक्षितः ॥१४२२॥

Since the happenings (*dharma*), viz. destruction, origination etc.¹ are (possible only) in the case of the thing which has a cause for it;² they do not obtain in the case of the causeless witness on account of its witnessing the origin and the destruction (of them). [1422]

¹These are the well-known *bhāvavikāras*.

²Namely, which has an origin in something else. This is *jātāv ekavacanam* 'an expression in the singular for a class of things'.

नाशादि न स्वयं सिध्येद्विना नाशादिसाक्षिणा ।
नातो विपरिलोपः स्याद्द्रष्टुर्दृष्टेः कदा चन ॥१४२३॥

Destruction etc.¹ would not occur,² of itself, (if) without (i.e.

there is not assumed to exist) the witness of destruction etc.; therefore, there would never be the loss of the (power of) seeing of the seer. [1423]

¹The word 'etc.' implies (possibly) other known *bhāvavikāras*.

²Literally, become established; or, get to be known. Cf. SP: *vyathā jadatāhānir iti bhāvah*.

द्रष्टुरात्मैव या दृष्टिः प्रत्यग्दृष्ट्या समीक्ष्यते ।
तस्या विपरिलोपोऽत्र न कथं चन युज्यते ॥१४२४॥

That (power of) seeing, which is the very nature (*ātmaiva*) of the seer/witness, is well seen (or, known/understood) by the (power of) seeing that belongs to sentience within (viz. the transmigratory Ātman).¹ The loss (or, perishing) of that, here (i.e. in deep sleep), is in no way² understandable.³ [1424]

¹This refers to one's experience.

²That is to say: whether it occurs itself or is caused by something else.

³That is, it cannot stand to reason; or, it is not stated with itable reasoning.

आत्मैवात्मीयभूतस्य या दृष्टिरविनश्वरी ।
द्रष्टुर्विनाशिनस्तस्या नोच्छित्तिरुपपद्यते ॥१४२५॥

(Further) that imperishable (power of) seeing which belongs to the perishable (lit. perishing) seer (within),¹ that has (really) become (an aspect) of the (imperishable) Ātman,² is the very nature (*ātmaiva*) of it—the destruction (or loss) of it does not stand to reason. [1425]

¹This refers to the commonly known seer.

²This is to say that it is merely an adventitious nature (*upādhi*) of the Ātman. Therefore, being an *upādhi*, it cannot be destroyed (in the real sense of coming to destruction).

आगमापायिनो द्रष्टुर्दृष्टिस्तत्साक्षिणीं तु या ।
द्रष्ट्रादिलोपसाक्षित्वात्तस्या लोपो न युज्यते ॥१४२६॥

And (*tu*) that (power of) seeing which is the witness of that seer, that comes into being and perishes, is not understandably lost,¹ because of its being the witness of the loss of the seer etc. [1426]

¹That cannot perish in a way that is understood with suitable reason(s).

सत्येव साक्षिणि यतो भावाभावौ प्रसिध्यतः ।
जगतोऽतो न नाशः स्यादात्मदृष्टेः कुतश्चन ॥१४२७॥

Since the coming into existence and perishing of the world become understandable (or, lit. established), if and when there is (accepted the existence of) the witness. Therefore, there cannot be, on any account, perishing/loss of the (power of) seeing which belongs to the Ātman. [1427]

SP on this verse ends with *iheti hetuvākyoktiḥ*; why? There is not in the verse the word *iha*! Possibly, this should be the introductory to the comment on the next verse.

ननु विप्रतिषिद्धोक्तिर्भवतेहाभिधीयते ।
न विनश्यति सा दृष्टिर्द्रष्टुश्चेत्यतिसाहसम् ॥१४२८॥

(An objection:) 'But indeed you have said here what contains an internal contradiction, viz. (in the sentence) that (i.e. the power of) seeing does not perish and (all the same) it belongs to the seer¹—this is very bold!'² [1428]

¹It is the imperishable Ātman.

²That is, it defies all reason.

कर्तृकार्याभिसंबन्धो द्रष्टुर्दृष्टेरितीर्यते ।
ततश्चापरिलोपोऽस्याः कार्यत्वान्नोपपद्यते ॥१४२९॥

(Thus,) what is stated (by you) is: 'There is between the seer¹ and the (power of his) seeing the relation of an agent (of some activity) and (its) activity (which is accomplished)'. And (it is) from this that it becomes non-understandable (or, unreasonable) to hold that there is no perishing of this one (i.e. the power of seeing). [1429]

The verse explains why there was, in the preceding verse, reference to boldness, i.e. unreasonableness.

ननु न लुप्यत इति वचनान्न विलोप्स्यति ।
नैवं यतो मितिप्राप्तं वचो नाशं न वारयेत् ॥१४३०॥

But indeed (it may be argued:) 'It will not perish by merely making the statement, viz. it does not perish'.¹ (The answer is:) 'No, this is not so, since the statement obtained by (resorting to) inference² will not avert the (certain occurrence of) perishing'. [1430]

¹In this connection, read NKL (ms. p.672): *mānā-ntaraviruddham vacanam api na bodhayed anyathāndho maṇim avindad ityādeḥ svārthe mātva-prasaktiḥ*.

²That is, logical reasoning in 'whatever is produced perishes'. Cf. SP: *yat kṛtakam tad anityam ity vyāptyanugrhitānumāna-virodhād vaco na kāryanityatvabodhīty āha*.

सिद्धस्य व्यञ्जकं मानं न तु तत्कारकं यतः ।
उक्तेर्नातोऽविनाशित्वं द्रष्टुर्दृष्टेरिहेष्यते ॥१४३१॥

'Since a means of knowing is the revealer of an accomplished (already existing) thing and not its creator; therefore, the imperishable nature of the (power of) seeing of the seer is not accepted/understood here¹ from the mere statement (about

that effect).'

[1431]

¹The word *iha* means: 'in the argument about the imperishable (power of) seeing of the seer'—the statement which can be the basis of logical reasoning (alone).

नैष दोषो यतो द्रष्टुः श्रुतिराह विशेषणम् ।
द्रष्टुर्दृष्टेरिति ततो द्रष्टा नैवेह कारकम् ॥१४३२॥

(Further) this ¹ is not a fault, ² since the statement about (the power of) seeing (merely) made (lit. stated) the attribute of the power of seeing of the seer (and) from that (it follows that) here (i.e. in this case) the seer is not an agent (of any production). ³

[1432]

¹Namely, making the statement about the imperishable nature of the seer's (power of) seeing.

²That is, faulty argument.

³Namely, a *kāraṇa*.

There is in verses 1433-1440 an alternative explanation of *draṣṭur drṣṭer alopaḥ*.

देहान्तो दृष्टिकारी यो द्रष्टा धर्मादिहेतुमान् ।
दृष्टेर्द्रष्टुश्च लोपोऽत्र प्रत्यग्दृष्टयेकसाक्षिकः ॥१४३३॥

The seer is the one (abiding) inside the body, ¹ who does the action of seeing (and) is having merit etc. ² as its cause. (And) here (in the worldly happening mentioned as) perishing of the seer's (power of) seeing ³ has for it the witness the lone (seer who sees) within (the body). ⁴

[1433]

¹This is referring to the transmigratory Ātman.

²Refer to verses 1378 and 1382 above.

³Namely, in the state of deep sleep.

⁴It implies oneness of the seer within with the imperishable

Ātman.

प्राक्प्रमात्रादिसंभूतेर्या तु दृष्टिरकर्तृका ।
द्रष्टादिनाशसाक्षित्वात्सा दृष्टिरविनश्यती ॥१४३४॥

That (power of) seeing (of the seer)¹ is imperishable, viz. that which is a non-agent (of any activity) and (exists even) before the origination of the knower (of external objects) etc.²—this is so, because of its nature of being the witness of the perishing of the seer etc.³ [1434]

¹This is the imperishable Ātman.

²The means and the objects of knowing are meant.

³This refers to the worldly seer of the so-called (or, so-accepted) external objects.

दृष्टिरेव तु सा द्रष्टा न तु कारकलक्षणः ।
द्रष्टुर्विशेषणत्वेन दृष्टेरिति परिग्रहात् ॥१४३५॥

And (*tu*) it is but the (power of) seeing which is the seer but (*tu*) not that which is possessed of the characteristic of the agent (of the activity, viz. seeing)—(this is so), because of the employment (lit. acceptance) of (the word) *dr̥ṣṭi* as an attribute of (the word) *draṣṭr*. [1435]

SP rightly points out *sā dr̥ṣṭir eva draṣṭā na tatkartā* which is already stated as the reason/basis for the argument.

परिलोपो हि कार्याणां लोके सिद्धः स्वकारणे ।
नातः कारणरूपस्य नाप्यकारकवस्तुनः ॥१४३६॥

It is an accepted (lit. established) fact in this world that those things which are products merge (lit. perish) in their own cause;¹ therefore, (that fact² is) not (acceptable) in respect also³ of what is (both) the cause (of the supposed effects) and the real thing (viz. Ātman) which is not an agent (of

any activity).

[1436]

¹The singular form stands for the class of the factors which produce (some products).

²Namely, the nature of the thing as perishing.

³Read NKL (ms. p.673): *ajñānavan niranvayasya nāśaḥ syād atrāha nāpīti. kāryakāraṇavilakṣaṇatvān nityatvam ity āśayaḥ.*

अभावस्य च भावत्वाद्भावसिद्धेश्च दृष्टितः ।

दृष्टौ नाभावशङ्कातः सर्वसिद्धेस्तदन्वयात् ॥१४३७॥

(Further, since it is accepted here that) a negative entity becomes a positive entity and (that) positive entity becomes an acceptable (or) established thing (only) through the (power of) seeing; therefore, there cannot be entertained here any doubt about the perishing of the (power of) seeing as all (accepted things) become so through their being produced (lit. following) that (viz. the power of seeing). [1437]

न सुषुप्तप्रसिद्धिः स्याद्दृष्टेलोपो भवेद्यदि ।

जन्मनाशादिहीनेयमतो दृष्टिः परात्मनः ॥१४३८॥

The state of deep sleep would not occur (lit. get established) in case there would occur the perishing of the (power of) seeing; therefore, this (power of) seeing of the highest Ātman is not devoid of (or, beset with) origination, perishing etc.¹

[1438]

¹This is reference to the other *bhāvavikāras*.

शतृजन्तश्रवणादृष्टिश्चेत्स्यात्सकर्तृका ।

पश्यन्द्रष्टुरिति ह्येवं नैवं कर्त्राद्यसंभवात् ॥१४३९॥

(If it is argued:) 'In the words *paśyan* and *draṣṭuḥ* there are heard the forms ending in suffixes *-śatr* and *-tr* and, therefore, *drṣṭi* '(the power of) seeing' is indeed (lit. should be taken

as) thus, having (some) agent', (the answer is:) 'This is not so, on account of the absence (or, impossibility) of an agent etc.'¹ [1439]

¹The word 'etc.' implies the material, the instrument(s), and the purpose which are related to an activity. This becomes clear from the next verse.

नेह बुद्ध्यादिसद्भावस्तदापीति श्रुतेर्भवेत् ।
सुषुप्तेऽतो न धात्वर्थः प्रत्ययार्थश्च नेष्यते ॥१४४०॥

Here, i.e. in the deep sleep state, there do not exist the intellect etc., because there is heard a Śruti about the merger (of these into reality);¹ therefore, the (usual grammatical) meanings of the verbal root and the suffix are not to be accepted (or, understood). [1440]

¹Cf. *prāṇaṃ tarhi vāg apyeti*, quoted by SP—cp. *Kauṣītakiyupaniṣad* 3.3.

Verses 1441-1442 introduce the subject regarding the use of the *śatr* suffix in *paśyan*

Verses 1443-1447 consider that the relation of *draṣṭṛ* 'seer' and its *drṣṭi* 'the power of) seeing' a *kāraṇa* and its *kārya* is indescribable. In verses 1443-1444 is discussed whether the *draṣṭṛ* is a *kurvat* 'operative' *kāraṇa* and, in verses 1445-1446, the relation of the two as *akurvat* 'non-operative'. Verse 1447 supports the thought about the natures of the cause(s) and (their) effect(s) in the preceding verse.

In verses 1448-1450, Sureśvara continues to discuss *drṣṭi* and *draṣṭṛ* as *kriyā* 'effect' and *kriyāvat* 'cause' emphasising the nature of *kriyā* as *kārya* or *akārya* 'what is to be accomplished or what is not to be accomplished'.

कर्त्रादिकारकं नो चेत्सुषुप्ते विद्यते कथम् ।
पश्यन्द्रष्टुरिति वचः कूटस्थ उपपद्यते ॥१४४१॥

(It may be argued:) 'If there do not exist in the deep sleep state any *kāraḥ* 'factors related to an activity' such as an agent, how can there be made a statement, viz. *paśyan ... draṣṭuḥ?*'; (the answer is:) 'In the case of the immutable (Ātman, that statement) can stand to reason'. [1441]

This is clarified in the next verse, with an illustration.

यथावकाशदान्त्रिति भण्यते निष्क्रियं वियत् ।
शतृजन्तवचसा तथात्मा भण्यते ध्रुवः ॥१४४२॥

'(Since) the sky, which is inactive,¹ is described as 'one that offers space (to something else)', so also is the unmoved (or, immutable) Ātman mentioned in relation to words ending in (the suffixes) *-śatr* and *-trc*.' [1442]

स्वभावः कारकाणां च यदकृत्वेह कुर्वते ।
अकुर्वत्कारकं तस्मात्कुर्वतोऽतिशयः कुतः ॥१४४३॥
प्राविक्रयाया विनिष्पत्तेः कुर्वद्रूपं न लभ्यते ।
यतोऽतोऽकुर्वदेवेह स्यात्सर्वत्रैव कारकम् ॥१४४४॥

'(Such) is the nature of *kāraḥ* that, without doing (any activity), they (are said to) do (some activity); therefore, the *kāraḥ* here is not doing (any activity). How can there be excellence (or, change) in the case of what does (an activity)?' ¹ [1443]

'(Again,) since the form of what is doing (an activity) is here not noticeable (or, noticed) before the activity has been completed (or accomplished), therefore, (then one would have to accept that) everywhere a *kāraḥ* would be not doing (any activity)'. ² [1444]

¹ NKL (ms. p.673): *drṣṭeḥ kāryatvaṃ nirākartuṃ kurvat (-n, sic) kārakam akurvad veti vikāpyādyam pratyāha svabhāva iti, atīśayaḥ kuta iti. kurvadrūpasya kāryasyātīśayāvayavattve kāryasyāpi*

kāryāntaraprasaktir āgantukatvāviśeṣād ity anavasthety arthaḥ.

²NKL (*ibid.*) introduces this verse thus: *kurvadrūpasyā-gantukatvam eva kuto 'trāha prāg iti.*

शक्तिमत्कारकं चेत्स्यात्स्यात्कार्यं शक्तिवत्सदा ।
 शक्यानामपि सद्भावः शक्तिवत्सर्वदा यतः ॥१४४५॥
 न मिथो व्यतिरेकेण शक्तिशक्यौ प्रसिध्यतः ।
 परस्परव्यपेक्षत्वाच्छक्तिशक्यस्वरूपयोः ॥१४४६॥
 शक्तीनां नियमः शक्याच्छक्यानां चापि शक्तितः ।
 परस्पराश्रयत्वं च प्राप्नुयाच्छक्तिवादिनः ॥१४४७॥

If it is held that a *kāraka* (here, *kāraṇa* 'cause') has the power (to produce an effect), then the effect (*kārya*) should ever be possessed of the (same) power;¹ for the existence/state of what are possible (to be the effects of some cause) should (also) ever be possessed of that power. [1445]

The two (things, viz.) *śakti* (here *kāraṇa*, 'possessed of some power' and *śakya* (here *kārya* 'what is) possible (product of that)' cannot exist without each other, since the natures of *śakti* and *śakya* have the nature of dependence on each other.

[1446]

śaktis (i.e. *kāraṇas*) have (some) restraint on them (with regard to what are) their *śakyas*² (i.e. *kāryas*) and so also *śakyas* (have restraint with regard to what are their) *śaktis*;² thus, those, who hold the theory of *śakti* (in respect of *kāraṇa* and *kārya*) have (to take recourse to the principle of) mutual dependence.

[1447]

¹Cf. *śaktasya śakyakaraṇāt* in *Sāṃkhyakārikā* and also the known principle in Logic: *kāraṇaguṇāḥ kāryaguṇān ārabhante.*

²The use of singular forms *śakyāt* and *śaktitaḥ* has the meaning of plural forms. (Possibly the singular is used for metre's sake and though this is often Sureśvara's manner of using expressions.)

क्रियायाश्चाप्यकार्यत्वे कारकं न प्रसिध्यति ।
 कार्यत्वे चानवस्था स्यात्कुर्वच्चापि सुदुर्लभम् ॥१४४८॥

क्रियातत्फलयोश्चापि पौर्वापर्याप्रसिद्धितः ।

किं साध्यं साधनं चेह निश्चयो नोपपद्यते ॥१४४९॥

अविद्यामात्रहेतौ तु सर्वमेतत्समञ्जसम् ।

तत्कार्यत्वाच्च सर्वस्य न किञ्चिदसमञ्जसम् ॥१४५०॥

Further, if *kriyā* is not what is to be produced (or, an effect), then there cannot exist a *kāraka* (i.e. productive element, viz. the cause).¹ If on the contrary (*ca*) it is an effect, then there would result *infinite regress* and in that case what is operating (i.e. productive, i.e. the cause) would be difficult to obtain (i.e. would not exist),² [1448]

on account of the non-knowing³ about the earlier and the later between *kriyā* and its result (viz. *kārya*)— for there is, further, no decision possible⁴ in this case (*iha*)⁵ as to what is to be accomplished and what accomplishes it. [1449]

But, all this is easily/smoothly understandable in case (it is accepted) that it, (viz. *kriyā-kārya* relation) has only ignorance as its cause. And, all (of that) being the effect/product of it (viz. ignorance), there is nothing (in our view)⁶ unclear (i.e. non-understandable). [1450]

¹Read SP: *kriyāṃ kurvat kārakam iti sthiteḥ*, and NKL (ms. p.673): *kriyāṃ kurvataḥ kārakatvād ity arthaḥ*— this contradicts *kriyāyā akāryatva*.

²Cf. SP: *tasyā mūlakṣayakarātvena doṣaparyantatvam*.

³That is, non-ascertainment.

⁴Or, decision which can be justified with reason.

⁵Read SP: *kāryakāraṇavyavahārah saptamyaṛthaḥ*.

⁶Cf. SP: *nāsmatpakṣe tad asti*.

यत्रात्मनोऽस्य संबन्धोऽनात्मनेह विवक्ष्यते ।

अविद्याहेतुकर्त्रादिसंगतिस्तत्र मोहजा ॥१४५१॥

When/Where (again) it is intended to say that here (i.e. in the deep sleep state) there is the relation of this (individual/transmigratory) *Ātman* with the non-*Ātman*(s), there

also is the connectiⁿ (or, association) of it with the agent¹ etc. that have (only,) ignorance as their cause (and it, i.e. the latter) is caused by (i.e. has originated in) delusion. [1451]

¹This stands for the agents' capacity for action. Also, the word 'etc.' refers to other *kāraṇas*.

यत्र त्वात्मेति धीरस्य जायतेऽनात्मधीरिव ।
यथावस्त्वेव धीस्तत्र नात्राविद्याद्यपेक्षते ॥१४५२॥

When/Where, however, there arises, (in the same way) as (arises) the (usually known) awareness of being the non-Ātman, the awareness in (lit. of) this (individual/transmigratory Ātman), viz. ('I am Ātman'), (this) following the nature of the reality, then there is not (i.e. does not obtain) here (i.e. in this situation) ignorance. [1452]

NKL (ms. p.674) rightly points out the doubt at the basis of this verse thus: *karṭṛtvādiññānam bhramaś ced ātmadhīr api tathā syā(d) dhītvād atrāha yatreti*.

Verses 1453-1456 state that the real thing, i.e. the Ātman, which is without any *prapañca*, gets established thanks to the seer.

जाग्रत्स्वप्नप्रहाणेऽपि प्रत्यङ्मात्रं न हीयते ।
तद्धानेरात्मसाक्षित्वात्प्रत्यङ्जन्मादिवर्जितः ॥१४५३॥

Even when there is loss (or, destruction) of the waking and the dream (states), there is no loss of the lone (-*mātra*) inner self, on account of (there) being (i.e. existence) of the witness of that (loss); (indeed) the inner self is not (beset) with birth etc. [1453]

Thus, there concludes here the immutability of the inner self as the witness/seer.

रज्ज्वज्ञानमनादाय न सर्पादीक्षणं यथा ।
आत्माज्ञानमनादाय न तथानात्मवीक्षणम् ॥१४५४॥

As there is not (i.e. cannot be) the seeing (i.e. sight) of a serpent etc. (by a person), unless he has taken up (i.e. has been affected by) ignorance about a rope etc.;¹ so also there cannot be (in the case of a person) the awareness of being some non-Ātman (viz. individual self) unless he is affected by ignorance about the (immutable) Ātman. [1454]

¹Here is implied *ādi* in view of the later *sarpādi*.

कल्पनाबीजविरहात्कल्पना न हि लभ्यते ।
प्रतीचि कल्पितोऽनात्मा प्रतीचि व्यभिचारितः ॥१४५५॥

In the absence of the root cause (lit. seed) of any (false) notion,¹ there cannot be any (false) notion; the non-Ātman (also) is imagined (to exist) on the basis of (assuming the existence of) the inner self² but it is absent (*vyabhicārita*) in that inner self. [1455]

¹Or, imaginary existent object.

²Add: which is *really* the immutable Ātman.

आत्मनोऽव्यभिचारित्वं सर्वत्रात्मैकसाक्षिकम् ।
यतोऽतस्तत्परिज्ञाने नात्माज्ञानमपेक्षते ॥१४५६॥

Since the presence (lit. non-absence) of the Ātman has everywhere (or, at all times) the (immutable) Ātman alone as its witness, therefore, the (immutable) Ātman does not depend on (lit. expect) ignorance for (the purpose of) fully (*pari-*) getting to know it. [1456]

Cf. SP: *sarvāvasthāsv avyabhicāritvenātmanah svataḥsiddhatvam uktam bhavati*.

Verses 1457-1463 explain that the nature of the Ātman as illuminator is owing to its supposed relation to what is to be illuminated—it is not an activity.

प्रकाशयार्थाभिसंबन्धे कर्तृत्वं सवितुर्यथा ।
अप्रकाशप्रकाशित्वान्न तथात्मप्रकाशने ॥१४५७॥

As the capacity (lit. agency) of the sun (is well known/obvious) in relation to the objects to be illumined (by it), because of its capacity of/for illuminating what(ever) is not illumined (or, obvious), so it is (in the case of the immutable Ātman) with respect to revealing itself (*ātmaprakāśana*). [1457]

The basis of this illustration is the question as stated in SP and NKL (ms. p.674) following it): *svayam evātmā svātmānam āśayan ca prakāśayan katham kūṭasthaḥ syāt*.

बाह्यार्थभासनेऽप्यस्य सूर्यादेरिव कर्तृता ।
सर्वदैवैकरूपत्वाद्धानोर्नापूर्वकारिता ॥१४५८॥

In respect of illuminating (or, revealing) the external objects also, there is (accepted) the an agentship of this one (viz. the Ātman), as in the case of the sun etc.,¹ on account of having for itself (or, being possessed of) only one form (or, status)—(all the same), in the case of the sun (there is not accepted) the capacity/agency of revealing what was not there (in existence) before. [1458]

¹ Possibly other luminaries like the moon are meant.

यथा जात्यमणेः शुभ्रा ज्वलन्ती निश्चला शिखा ।
संनिध्यसंनिधानेषु प्रकाशयानामविक्रिया ॥१४५९॥
न प्रकाशक्रिया काचिदस्य स्वात्मनि विद्यते ।
उपचारात्क्रिया सास्य यः प्रकाशयस्य संनिधिः ॥१४६०॥

As in the case of an excellent (or, a genuine) jewel, a beautiful

(or, bright), burning, steady flame remains unchanged (even) in the proximity or otherwise of the objects to be revealed, [1459]

(so also) there is no act of revealing in the case of this (immutable Ātman) (or it is attributed to it). Metaphorically that act of this (Ātman) is (but) the proximity of an object to be revealed. [1460]

न चेदं दर्शनं गौणमग्निर्माणवको यथा ।

इतोऽन्यथावबोधस्य प्रतीचोऽनुपलब्धतः ॥१४६१॥

Not also is this seeing secondary/metaphorical like (the understanding in respect of the statement) 'The pupil is fire', for there is no knowing (lit. obtaining) of the inner self otherwise than (in) this (way). [1461]

Note on this NKL (ms. p.674): *anyasya mukhyasyābhāvād idam eva mukhyam ity arthah.*

ननु भङ्गुरधात्वर्थे तृचप्रयोगो जगत्यपि ।

द्रष्टृशब्दाभिलष्यस्य नित्या दृष्टिः कथं भवेत् ॥१४६२॥

(An objection:) 'But indeed (there is noticed) in the world the employment (or, use) of the suffix *-trc* in the sense of the meaning of a root, to be liable to destruction;¹ how can it be there that the (power of) seeing of the one is expressed by the word *draṣṭṛ*, viz. as (what is) non-perishing (lit. everlasting)?' [1462]

¹SP cites the examples of the words *chettā* and *bhettā* from the verb roots *chid-* and *bhid-* with the suffix *-trc* added to them.

नोक्ततत्वात्परिहारस्य सूर्यादावपि दर्शनात् ।

प्रकाशयिता सविता व्याप्तु वापि वियत्तथा ॥१४६३॥

(The answer is:) 'No, not so, since already an answer has been given;¹ viz. such (a happening) is noticed in the case of the sun etc.² The sun is the illuminator³ and so also is the sky the pervader'.³ [1463]

NKL (ms. p.674) introduces this verse thus: *kādāditkakriyāṃ nāpi savitā prakāśayaty ākāśaṃ vyāpriti* (sic., for *vyāpnoti* ?) [non-understandable!] *kartr̥trjantaprayogadarśanān maivam ity āha ti.*

¹Cf. verses 1457-1458 and 1442 above.

²The word etc. seems to refer to other luminaries like the moon; cf. note 1 on verse 1458 above.

³This is by the force of the form ending with (the suffix) *c*; though actually no activity by the so-called agent whatever is meant.

Verses 1464-1468 affirm that the *Ātman* can be described both as an agent and an illuminator.

अस्तु प्रकाशकेष्वेवं न प्रतीचीति चेन्मतम् ।

नैवं प्रकाशकत्वात्स्यात्प्रत्यगात्माख्यवस्तुनः ॥१४६४॥

If (it may yet be argued further:) 'Let this be so in the case of luminaries, (but this) is not (to be, i.e. cannot be, accepted) in the case of the inner self'. (The answer to this is:) 'No, this is not (lit. should not be) so on account of the illuminating nature of the (real) thing (viz. the *Ātman*) called (here in the case of an individual) the inner self'.¹ [1464]

This is so established already by the *Śruti*—cf. SP: *pratīcāś prakāśatvasyānavacchinnaṭvasya ca śrūtītyādisiddhatvāt kartr̥- vinā prakāśakatvādyaviśiṣṭatvam*. The next verse clarifies further.

प्रत्यक्षमात्मना लोके द्रष्टाद्यर्थावभासनम् ।

स्वयंज्योतिष्ट्वशास्त्राच्च प्रत्यगात्मा प्रकाशकः ॥१४६५॥

It is commonly known to the people from experience that there is (i.e. can be) illuminating of object(s) such as the seer (in an individual) etc.; so also¹ is the inner self an illuminator, on the strength of the (statement in the) scripture about its being self-illuminating. [1465]

¹Cf. SP: *cakāro draṣṭrāder jādyān na svato bhānam iti yuktisamuccayārthah.*

अप्यात्मैवेह सर्वत्र स्वयंज्योतिः प्रतीयते ।
ज्योतिषामपि तज्ज्योतिस्तमेवेति च शास्त्रतः ॥१४६६॥

Also, only the Ātman is here (in all the states of an individual) known (or, experienced) as ever¹ self-luminous and further (it is so known) from the scriptures² (viz. as in) *jyotiṣām api taj jyotiḥ* and *tam eva*. [1466]

¹SP clarifies the sense of the locative, as understood from the words *iha* and *sarvatra* thus: *saptamūbhyām bhāsyo 'rtho grhītaḥ*.

²Cf. BU 4.4.16, also *Muṇḍakopaniṣad* 2.2.10 and 4.4.21.

साक्षात्पश्याम्यहं कुम्भं न पश्यामीति लोकतः ।
अनुभूतेः प्रसिद्धत्वात्नैवं स्यादिति चेन्मतम् ॥१४६७॥

(An argument:) If it is said (lit. thought) that "This can never be so, since it is known among the people from their experience (expressed) thus: "I directly perceive a pitcher and/or I do not perceive it".' [1467]

मैवं पश्याम्यहं कुम्भं न पश्यामीति दर्शनात् ।
सदानश्वरदृष्टित्वं प्रतीचो गम्यते स्फुटम् ॥१४६८॥

(The answer is:) 'Do not think thus; for, from the experience (lit. seeing of the people in the statement) "I do not see

a pitcher", there is clearly¹ suggested/conveyed the nature of the inner self as having a never-perishing (power of) seeing'.

[1468]

¹The next verse explains the significance of the word *sphuṭam* 'clearly' in this verse.

verses 1469-1474 point out that the Ātman as the seer is the means for effecting the knowledge of *na paśyami* as that of *paśyāmi*.

पश्यामीत्यस्य साक्षित्वं प्रतीचो गम्यते यथा ।
न पश्यामीति चाप्यस्य तथैवेहात्मसाक्षिकम् ॥१४६९॥

As the witnesshood of the inner self is understood from (lit. suggested by) this (statement, viz.) 'I am seeing (or, I can see)'; in the same way it (is understood) here (i.e. in the experience stated) in (the words), 'I am not seeing (or, I am not able to see)'. [1469]

SP remarks, at the end of the comment on this verse: *masākṣikaṃ jñānam ajñānaṃ ceti śeṣaḥ*.

उत्खातचक्षुषां चापि दृष्टिः स्वप्नेऽनुभूयते ।
द्रष्टृदृष्टयतिरेकेण नित्या दृष्टिरतो मम ॥१४७०॥

In the case of those who do not have seeing eyes¹ also, it is known (lit. experienced) that they have the (power of) seeing (objects etc.) in their dream state; therefore, even in the absence of the seer and the (power of) seeing, there is, according to me, eternal (power of) seeing (in the case of the immutable Ātman). [1470]

¹Literally, those whose eyes are removed, i.e. those who are blind (or, have become) blind.

ज्योतिषामपि तज्ज्योतिरस्मद्वीपरिमोषणात् ।
तमोरूपमिवाभाति भानुर्नक्तंदृशामिव ॥१४७१॥

That light of (all) lights¹ appears to have (for us) the form of darkness, on account of the obscuring² of our intellect, in the way the sun appears to be dark for those who can see only in the night(s). [1471]

¹Cf. note 2 on verse 1466 above.

²Literally, 'stealing away', (add) by ignorance.

यत एवमतो दृष्टिर्नित्यैवात्मन इष्यताम् ।
अनित्यत्वस्य सर्वस्य प्रत्यग्दृष्ट्येकसाक्षितः ॥१४७२॥

Since this is so, therefore, let it be accepted that the (power of) seeing of the (immutable) Ātman is perennial (or, ever obtaining); (this is so) on account of all non-perennial (object(s))¹ having the lone witness (of them) in the (power of) seeing of the inner self. [1472]

¹Cf. *āgamiāpāyinaḥ* in verse 1426 above.

तयासाधनया दृष्ट्यापरिणामस्वभावया ।
पश्यन्नेवायमात्मास्ते तद्दृष्टेश्चोद्यहेतुतः ॥१४७३॥

With that (power of) seeing, which is not a means (of any activity), which has the nature of not undergoing (any) modification does this (individual) Ātman keep on seeing (various external objects), owing to the cause (which is stated in) the objection (raised earlier about) its (power of) seeing.¹ [1473]

¹Thus it was stated (as SP rightly points out): *svaprakāśaś ced ātmā kutaḥ supte svātmānam anyam ca na vettīti codya-pramukhasya dvaitasyātmadr̥ṣṭeḥ siddheḥ na tasyā lopo 'stīty arthaḥ*.

पश्यामीति यथाद्राक्षीरात्मदृष्ट्यैव जागरे ।
न पश्यामीत्यपि तथा नित्यदृष्ट्यैव वीक्षसे ॥१४७४॥

As you have experienced (lit. seen) in the waking state, "I am seeing", with your own (*ātman* power of) seeing itself; so do you experience (lit. see), "I do not see" also, with the perennial (power of) seeing.¹ [1474]

¹Add: in the deep sleep state (also).

Verses 1475-1480 show that *pramāṭṛtva* and *draṣṭṛtva* of the *Ātman* is dependent on *kāraṅkas* 'means of activity'; the *Ātman* is, nevertheless, only connected with the act of seeing.

पश्यन्कुम्भादिकं वस्तु देहान्तो ग्राहको यथा ।
दृष्ट्या संबध्यते द्रष्टा द्रष्टृत्वस्य तदाश्रयात् ॥१४७५॥
अकारकस्वभावत्वान्नैवं वृत्तं ममात्मनः ।
आत्मदृष्टिरतो ग्राह्या प्रत्यङ्मात्रानुरोधिनी ॥१४७६॥

In the way the perceiver within the body, who sees (lit. is seeing) the things¹ such as a pitcher, is connected with (i.e. related to) the (power of) seeing and is (called) the seer through (or, on account of) the capacity of the seer residing in him, [1475]

so there is not (lit. does not get connected) the activity in the case of my *Ātman*,² owing to its nature of being a non-agent (of any activity); therefore, it is necessary to accept the (power of) seeing of the *Ātman*, viz. that which follows³ merely (the nature of) the inner self.³ [1476]

¹By the word *vastu* in the singular is intended the plural.

²My *Ātman* means 'the *Ātman* which is posited in my theory'.

³Thus do, both SP and NKL (ms. p.675) observe: *na hi draṣṭur yāder artham upasaṃharati*, marking the completion of the meaning of the two sentences pertaining to the proposition

enunciated and the argument of cause—cf. *pratijñāhetuvākyayor artha* in the beginning of SP on the next verse. Yet, NKL (ms. p.675) observes there: *hetuvākyārtham saṁgrhya* (this is regarding the earlier portion) *pratijñārtham prapañcayati* (*yathokteti*).

यथोक्तार्थप्रसिद्धत्वाद्द्वैशब्दोऽत्र प्रयुज्यते ।

तत्र पश्यतिशब्देन कारकत्वं निषिध्यते ॥१४७७॥

The word *vai* is used here¹ owing to its being well known in the sense of 'as what has been stated earlier (*yathoktārtha*)'.² (And) in the phrase (lit. word for expression) *tan na paśyati*, there is negated (i.e. negation of) *kāraakatva* (doership).³ [1477]

¹See references to NKL explanation in note 3 of the preceding verse—that is more proper.

²Read SP: *kūṭasthadṛṣṭitvasyātmanah sarvopaniṣatprasiddheḥ*.

³This refers to agentship of the activity of seeing attributed to the seer. This is elucidated in the next two verses by an illustration.

दृश्यार्थासंभवाद्यद्वत्पश्यन्नपि न पश्यति ।

न पश्यामीतिफलतः कारकस्य यथा तथा ॥१४७८॥

अकारकात्मनोऽदृष्टिर्द्रष्टव्यार्थाप्रयुक्ततः ।

वस्तूक्तं दृष्टिशब्देन न क्रिया नापि कारकम् ॥१४७९॥

(This, i.e. the above, is meant) in the same way as (*yathā tathā*) in the happening that an individual does not see (external objects), since there is absence of any perceptible object(s) even as he does not see (himself); while he is seeing (it), for the activity (lit. effect) of (i.e. produced by) the *kāraaka* (i.e. the agent) stated in (the words), 'I do not see (or, am not seeing)'; [1478]

(that is to say:) for the reason of the non-statement (i.e. of not stating) the object(s) to be seen by the (power of) seeing and the consequent not-seeing by the Ātman which has the nature of a non-agent.¹ In (or, By) the word *drṣṭi*² there

is stated the (real) thing (i.e. Ātman), neither an activity nor a *kāraka* (thing connected with activity, i.e. really an agent, is stated therein). [1479]

¹It must be confessed that the above translation of 1478-79ab is only belaboured, for it has tried to follow the text, as it is, the note by the editor of the AnSS edition being ignored. NKL (ms.) does not offer any help!

²SP rightly points out: *dr̥ṣṭiśabdena paśyann itiśabdenety arthah.*

ग्राहकग्रहणग्राह्यहीनं रूपं यदात्मनः ।
तद्दृष्टिरिति वचसा साक्षान्नः प्रतिपाद्यते ॥१४८०॥

That which is the form of the Ātman, i.e. that which has no connection whatever with (or, lit. which is bereft of) the (notions of) one who grasps, the act of grasping and the object to be grasped, is directly declared (or, expounded) to us by the phrase *tad dr̥ṣṭiḥ*. [1480]

This is the reason for saying in the preceding verse *vastūktan dr̥ṣṭiśabdena*— it is the unsaid part of the statement (*vākyasēṣa*).

Verses 1481-1487 go to remove the supposed contradiction in paśyan na paśyati.

प्रतीच्येव समाप्तं यदक्रियाकारकात्मकम् ।
न पश्यतिगिरा रूपमात्मनस्तदिहोच्यते ॥१४८१॥

Here ¹ is meant (lit. found) in the phrase *na paśyati* that form of the Ātman which is noticed only in the inner self and is not of the nature of an activity and/or a *kāraka* (i.e. agent). [1481]

This is the meaning of *tan na paśyati*.

¹Perhaps 'in the deep sleep state', or in the phrase *na paśyati*.

ननु चोद्यानुवादोऽयं न पश्यतिगिरोच्यते ।
कृतोऽकारकवस्त्वत्र प्रमाणादभिधीयते ॥१४८२॥

(An objection:) 'But, indeed, in the statement *na paśyati*, there is here a restatement of the objection (that was raised); on the authority of what means (of knowing) is it then said here (i.e. in this respect) that there is (in this statement a mention of) the thing which is not an agent (*kāraka*)?' [1482]

ऐकात्म्यमेव नो ज्ञातं सर्वत्रैव पुरा मितेः ।
अज्ञातमेव च ज्ञातं नातश्चोद्यस्य संभवः ॥१४८३॥

(The answer:) 'What we have known is only the singleness of the Ātman. And since everywhere (in discussions and in the world) it is only what was not known before (that) right/correct knowledge makes known, there is no possibility of (or, scope for) an objection'. [1483]

स्वतःसिद्धानुभूतिश्च नाज्ञानाद्व्यतिरिच्यते ।
सांख्यराद्धान्तवन्नातश्चोद्यं मत्तोऽन्यतः कृतम् ॥१४८४॥

Further, the experience which becomes/gets established by itself (i.e. on its own strength) does not differ from ignorance. Therefore, there is not coming from me (lit. made by me) any objection, as resulting from another (condition), like the doctrine of the Sāṃkhyas. [1484]

ऐकात्म्यवादिनावश्यमेको मेयोऽर्थ इष्यते ।
मेयान्तराभ्युपगमे न ह्यैकात्म्यं प्रसिध्यति ॥१४८५॥

A person who holds the theory of the singleness of the Ātman has necessarily to accept that there is (only) one object to be known: for, in accepting (that there exists) a second object to be known, there will not be proved the singleness of the Ātman. [1485]

This is to affirm: *aikātmīyam evājñātam meyam*. No other thing/object such as a pitcher is to be taken as *ajñāta* for scriptures; cf. SP: *na ca tadaprasiddhir astu* (*meyam* to be supplied) *sarvopaniṣadvyākopād iti bhāvaḥ*.

साधनानामसामग्र्यात्सामग्र्याच्चेह कर्त्तरि ।
न पश्यतीक्षत इति विरुद्धार्थो यथोच्यते ॥१४८६॥
पश्यन्न पश्यतीत्यत्र न तथात्मनि युज्यते ।
दृङ्मात्राविक्रियात्मत्व एकत्वाकारकत्वतः ॥१४८७॥

As, on account of incompleteness and (at the same time) completeness in respect of the means (of the activity of seeing) the mutually contradictory thought (lit. meaning) conveyed in the case of (the Ātman which is) the agent (lit. the seer), by the words *na paśyati* and *īkṣate*, [1486] so, it is reasonably stated in the words *paśyan na paśyati*, in respect of the Ātman, having the nature of not being modified as merely seeing, since it is being single (i.e. having no second beside itself) and non-agent. [1487]

Verses 1488-1489 affirm that *paśyati-kriyā* is possible in the case of the Ātman even in the absence of any *kāraka*.

यत एवमतः पश्यन्नित्यस्यैवोत्तरं वचः ।
न पश्यतीति व्याख्यानं कारकादिनिषेधनम् ॥१४८८॥

Since this is so, therefore, the subsequent (or later) statement *na paśyati* is an explanation of the (earlier statement) *paśyan*; (and) it negates (or, rejects the presence of) a *kāraka*¹ 'agent of an activity' etc. [1488]

¹Literally, what is connected with an activity; the word *ādi* refers to *sādhana*, *sthala* and such other factors connected with an activity.

पश्यन्न पश्यतीत्यत्र तस्मादेकोऽर्थ उच्यते ।
अकारकात्मकं ज्योतिरद्वयं प्रत्यगात्मकम् ॥१४८९॥

Therefore, in (the statement) *paśyan na paśyati*, there is (only) one thing (lit. meaning, i.e. activity) conveyed (lit. expressed), viz. a non-dual light which is of the nature of the inner self and which does not have the nature of a *kāraka* 'agent' (connected with an activity). [1489]

Verses 1490-1500 discuss the variant reading noted in the *Mādhyandina* recension.

ग्रहीतृग्रहणग्राह्यं वस्तु द्रष्टव्यमुच्यते ।
प्रमाणदृष्टियोग्यत्वात्प्रमात्राद्यात्मवस्तुनः ॥१४९०॥

The thing to be grasped (or, seized/taken) in the activity called grasping by the agent who grasps is designated (in the Śruti by the word) *draṣṭavya* '(what is) to be seen' on account of its being suitable for seeing by the means (viz. the power of seeing, i.e. eye) for the (real) thing called the Ātman, the knower (i.e. 'the seer'). [1490]

Here, Sureśvara comments on the reading of the sentence in BU of the *Mādhyandina* recension: ... *paśyan vai tad draṣṭavyam* which includes the word *draṣṭavyam* that is not found in the *Kāṇva* recension.

प्रात्यक्ष्यं च यथैतेषां तथा पूर्वमवादिषम् ।
द्रष्टादेरात्मनश्चोक्तं वैलक्षण्यं तथा पुरा ॥१४९१॥

As to how there is direct perceptibility in these is according to what I have said earlier; so also the difference in nature of the Ātman from the (usually/ordinarily understood) seer also has been pointed out (lit. stated) earlier. [1491]

दर्शनादर्शनोक्तिभ्यामविभागात्मको दृशिः ।

इहाभिधीयते ज्योतिरन्यत्र तु विभागवत् ॥१४९२॥

By/In in the statements of seeing and non-seeing here (i.e. in the deep sleep state), there is mentioned the seer who has the nature of being undivided;¹ elsewhere (i.e. the waking and dream states), however, (the same is mentioned as) having divisions in it. [1492]

¹The reference is to *pramātr*, *prameya* and *pramāṇa*, the triad necessary for any *māna*, i.e. activity of knowing.

चित्तेरकारकत्वाच्च सर्वान्तरतमत्वतः ।

कात्स्न्यात्तदन्यथात्म्यात्पश्यन्नपि न पश्यति ॥१४९३॥

न पश्यति यथा प्राज्ञ उक्तहेत्वविशेषतः ।

तथैवैतद्ग्रहीतव्यं स्वप्नजाग्रदवस्थयोः ॥१४९४॥

Since sentience (i.e. the immutable Ātman) is not a *kāraka* (and further) it is the innermost of all (beings), it is (again) full/complete (in itself)¹ and has its real nature (quite) different from that of (all) other(s);² it does not see while it is seeing. [1493]

As Prājña (i.e. the Ātman in the deep sleep state) does not see, owing to its having non-different cause(s)³ which is (or, are already) stated; in the same way is this (i.e. the inner self)⁴ to be taken (or, understood to have the same nature) in the dream and waking states (also). [1494]

¹This refers to its being *avibhāgavat*; also cf. BU 4.5.13.

²The various objects and the individual selves which are affected by ignorance.

³Namely, those mentioned in the preceding verse, i.e. *akāraka-tvāt* etc.

⁴It is, in reality, not different from the Ātman, though it is affected by ignorance.

चित्तेर्यथाविनाशश्च स्वप्नजाग्रदवस्थयोः ।

तथैव संप्रसादेऽस्मिन्नुक्तहेतुसमन्वयात् ॥१४९५॥

As there is absence of destruction in the case of sentience in the dream and waking states, so also (it is there) in this deep sleep state, owing to its being possessed (or, lit. being closely associated with) the causative characteristics (which are already) stated.¹ [1495]

¹These are the reasons (*hetus*) *akāra*katva etc. in verse 1493 above (and earlier elsewhere also).

न हीति हेतुवचनं प्रतिज्ञातार्थसिद्धिकृत् ।
द्विप्रकारो विनाशश्च द्विर्हेतुवक्त्या निषिध्यते ॥१४९६॥

The statement *na hi* ... effects the proof (lit. establishing) of the matter stated;¹ and the destruction of two types² is twice negated by the statement of the reason.³ [1496]

¹Namely, *ātmā kūṭasthadr̥ṣṭiḥ*.

²These are stated in the next verse.

³Read SP: *ekenaiva hetunā pratijñātārthasiddher vyartham hetvantaram ityāha dviprakāra iti*.

निरन्वयो विनाशोऽस्य हीत्युक्त्या निषिध्यते ।
अविनाशीति चाप्यत्र विकारापह्नुतेर्वचः ॥१४९७॥

In/By the statement *na hi* ... is denied complete (or absolute) destruction of this (immutable) Ātman and in (the use of) the word *avināśī* there is stated the concealment of a modification (in it).¹ [1497]

¹This is owing to ignorance (i.e. *adhyāsa*)—*sāvaśeṣa nāśa* in opposition to *niranvaya nāśa*. Read SP at the end of the comment on this verse: *niravaśeṣanāśavat sāvaśeṣanāśasyāpy ayogāt kūṭasthadr̥ṣṭir ātmety arthaḥ*.

अविनाशीति मैत्रेय्यां द्विधानाशनिषेधकृत् ।
वचनं प्रागुपन्यस्तं तदेवात्रापि हेतवे ॥१४९८॥

The statement *avināśī* in Maitreyī (Brāhmaṇa)¹ purports to negate/reject (the notion of) twofold destruction. The same statement is here introduced first (*prāk*) to convey that very reason (for non-destruction). [1498]

¹This is BU 4.5 on the authority of BUB (p.590).

सर्वोच्छ्रित्यात्मसाक्षित्वादुच्छ्रितेश्चाप्यसंभवात् ।
तथा सर्वविकाराणां प्रत्यङ्मात्रैकसाक्षिता ॥१४९९॥

This is so, because the destruction of all¹ has the (immutable) Ātman as its witness and the utter destruction² (of it) is also not possible and also because all modifications have only the inner self as their witness. [1499]

This verse is an explanation as to why the immutable Ātman is not subject to absolute destruction.

¹These seem to be the individual Ātmans. Read SP: *sarvātmanocchittir niranvayo nāśas tatrātmanah sākṣitvān na tadvattety arthah*. (This appears to us somewhat unclear.) And in the same way, NKL (ms. p.677) reads: *sarvocchittirūpānanvayanāśasya vā (sic) bhāve hetum āha*.

²SP explains *ucchiti* as *sāvaśeṣo nāśo hetusaṃsargaḥ*.

पश्यन्नेवायमत्रास्ते सान्वयानन्वयौ ध्रुवः ।
नाशौ यस्मादतः सिद्ध आत्मा कूटस्थदर्शनः ॥१५००॥

Since this (immutable Ātman) keeps on seeing/witnessing the twofold destruction, viz. absolute and partial; therefore, it is established as (i.e. proved to be) having an immutable (i.e. non-perishing power of) seeing/witnessing. [1500]

Verses 1501-1502 affirm that the Śruti statement *paśyan na paśyati* is independently true or meaningful.

पश्यन्न पश्यतीत्येतत्स्वतन्त्रं चागमं वचः ।
न हीति तु प्रतिज्ञोक्तिरनुमोक्त्यनुसारिणी ॥१५०१॥
हेतुक्तिरविनाशित्वादित्युक्तार्थप्रसिद्धये ।
विनाशशक्त्यभावोक्तेर्न प्रतिज्ञैकदेशता ॥१५०२॥

Or (ca), the scriptural statement *paśyan na paśyati* is independent¹ and (tu) the proposition (in the words) *na hi* is in accordance with the inference;² [1501]

the statement of the reason (or, cause), viz. having destruction (or, imperishability) etc.³ is (only) for revealing (lit. proving) what is (already) stated (*artha*). (Further,) since there is an express statement about the absence of the liability of (its) destruction (i.e. destructibility), it (viz. *na hi ...*) is not a part of the proposition.³ [1502]

¹This refers to *nirapekṣapramāṇatva* of *āgama vacaḥ* (incidentally, *āgama* which is used in opposition to *vacas*, functions like its adjective).

²SP clarifies this thus: *drṣṭer nityatvam pratijñāya tasyaiva pratijñātasya siddhyartham anumānānusārīṇi hetūktir avināśitvād iti prayujyate tathā cānumānavat sādhanatety arthaḥ*.

³SP: *na vinaśyatīti pratijñā vinaṣṭum ayogyatvaṃ hetus tan nānāyor ekārthatety arthaḥ*.

In verses 1503-1505, there is stated an alternative way of understanding *paśyan na paśyati*.

प्रतिज्ञावचसी द्वे वा पश्यन्नित्यादिनोदिते ।
न हीति हेतुवचसी द्वे स्यातामुत्तरे तयोः ॥१५०३॥
पश्यन्नेवास्त इत्यस्याः प्रतिज्ञोक्तेः प्रसिद्धये ।
हेतुर्न हीतिवचनमुत्तरस्यापि चोत्तरम् ॥१५०४॥
निरन्वयविनाशस्य निषेधोऽत्र विवक्ष्यते ।

प्रथमे हेतुवचसि परिणामस्तथोत्तरे ॥१५०५॥

..., in the words *paśyan* ..., there are two propositions stated and the words *na hi* ... are two subsequent reasons for the same; [1503]

(us), in order to establish/prove the proposition *paśyann* *āste* 'It keeps on seeing', the statement *na hi* is (the statement the reason); (the same) is the answer to the subsequent proposition, viz. *na paśyati*) also. [1504]

(in this way) is here intended to express the negation of (any kind of) absolute destruction—thus, the first (occurs) in the statement of the reason and, in the subsequent, (there is the statement of) the result. [1505]

is is another way of dividing (i.e. marking the distinction between) the proposition and the statement of reason. Read (ms. p.677): *paśyann iti pratijñā na paśyatīti cet prapratijñā hetur na hīti dvitīyā pratijñāhetur avināśitvād iti ga ity arthaḥ. (?)*

is yet another alternative way stated in verses 1506 and

द्वौ वा हेतू यथोक्तार्थौ द्वयोरपि प्रतिज्ञयोः ।

आभ्यां संभूय सिद्धोऽर्थ एव सति भवेद्यतः ॥१५०६॥

there are two reasons, whose meanings (i.e. natures) have been (already) explained (are stated), in respect of both (these) positions; since that being so, the matters (in the positions) would be proved by (the strength of) the two (reasons) come) together.¹ [1506]

is a statement of yet another way of connecting each of the two reasons with both the propositions.

clarifies this thus: *ābhyāṃ hetubhyāṃ sambhūya* *bhyāṃ ātmano dr̥ṣṭitvam anāśaś ca [dr̥ṣṭirūpatvam ...* *bhāvaś ca* in NKL (ms. p.678)] *vivakṣito 'rthaḥ ... siddhyati.*

पश्यन्नेवायमत्रास्त इति चेत्कथमुच्यते ।

न पश्यतीति वचनं शृणु तच्च यथा तथा ॥१५०७॥

(A question:) 'If, here (in the deep sleep state), this (Ātman) keeps on seeing, how is it said (then) *na paśyati*?'; (the answer:) 'Hear that (*tathā*)', as to how (*yathā*) it is said: [1507]

Verses 1508-1514 explain the purport of na paśyati.

पुरा यदभवन्मोहात्स्वप्नजाग्रदवस्थयोः ।

प्रतीचो न तदत्रास्ति रूपं यत्कारकात्मकम् ॥१५०८॥

'Whatever was earlier the form of the inner self, owing to ignorance (on the part of it), in the two states of dream and waking, does not continue to be (i.e. not exist) here (i.e. in deep sleep)—that (form) which was of the nature of a *kāraka* (i.e. an agent of the activity of seeing).¹ [1508]

¹Read SP: *kāra-kātmakam pramāṭṛlakṣaṇam iti yāvat.*

आत्मनोऽद्वयतत्त्वस्य द्वितीयं यदविद्यया ।

सुषुप्ते न तदस्तीह प्रयुक्तं यत्स्वगोचरैः ॥१५०९॥

That which is, owing to ignorance, there the dream and waking states other than (lit. second or in addition, to external objects etc.) the Ātman, which is in reality non-dual (i.e. having no connection with duality whatever) does not exist here, in the deep sleep state—viz. that which is caused by other objects belonging to it. [1509]

सजातीयप्रयुक्तं यद्बुद्ध्यन्तं रूपमात्मनः ।

धर्मादिहेतुकं प्राज्ञे तद्धवस्तं कर्मणः क्षयात् ॥१५१०॥

Whatever be the form of the Ātman in the waking state, viz. that which is caused by those of its kind¹ and has merit

etc. as its cause, is all of it destroyed in the Prājña (form of it in the deep sleep state), on account of the cessation (lit. loss) of activity. [1510]

¹The Ātman is then, owing to the ignorance affecting it, possessed of various organs such as ears etc. that also are product of ignorance, therefore, they are its *sajātīya* 'belonging to its kind'.

तमोन्तात्कारणात्तद्वि द्वितीयं कार्यरूपतः ।
ततोऽन्यद्ग्रहणं नास्ति विभक्तं ग्राह्यमेव च ॥१५११॥

That second (form of the Ātman) is (or, occurs) on account of the cause in the form (rooted) in ignorance (lit. darkness) which is of the nature of (its) effect(s); therefore, there is no grasping of another (object) and so also (not) any (object) to be grasped, viz. that which is different from itself. [1511]

This is to convey the idea that there is no relation such as that of a *pramātr* and *prameya* etc. where the word 'etc.' refers to other *pramāṇas*.

स्वप्नेऽप्येतन्नयं नाभद्वासनामात्रशेषतः ।
किमु विध्वस्तनिःशेषद्वैतहेतौ सुषुप्तगे ॥१५१२॥

In the dream state also, this triad was (i.e. is) not there, since the objects etc.) are the remainders in the form of impressions alone; what then can one say in respect of (the Ātman) which is in the deep sleep state, i.e. the one (state) wherein the totality of entire (mass of) cause(s) is destroyed? [1512]

सुषुप्ते योऽवशिष्टोऽत्र कौटस्थ्यान्नान्यदर्श्यसौ ।
योऽप्यन्यदर्शी सोऽप्यत्र नास्ति तद्वैतसंभवात् ॥१५१३॥

What then remains here, in the deep sleep state, does not, on account of its immutability, see (any) other (thing/object);

for, whosoever is (known in worldly happenings), i.e. the seer/experiencer of other (objects), does not exist here, since there is (complete) absence of the cause of them (viz. ignorance). [1513]

द्वितीयदर्शनायालं रूपमासीद्यदात्मनः ।

तत्रास्ति तद्द्वितीयं च विभक्तं नात ईक्षते ॥१५१४॥

Whatever be the form of the Ātman there was necessary for (lit. capable of) seeing/witnessing other (objects), does not either exist, or does not exist as apart from it; therefore, (it) does not see/experience (any object). [1514]

This concludes the meaning of *na tu*

Verses 1515-1519 explain yet another meaning of the word dvitīya; it is ignorance about reality, i.e. it is merely a semblance of it.

अविद्यावद्द्वितीयं वा नित्यदृष्टेर्विवक्ष्यते ।

सदाहीनाननुदितभास्वदेकदृगात्मनः ॥१५१५॥

Further (lit. or), what is mentioned as second the perennial seeing (or, seer) is intended to be that which is affected by (lit. associated with/possessed of) ignorance, the one which is ever less than (i.e. inferior to) the Ātman and wherein there has never appeared (lit. arisen) the sole bright seer. [1515]

SP aptly sums up the nature of the postulated second thus: *sābhāsam ajñānam dvitīyam ity arthah.*

तादात्म्यव्यतिरेकाभ्यां तमस्तज्जं च नात्मनः ।

विरोधादेशतोऽकार्यकारणत्वात्परात्मनः ॥१५१६॥

Ignorance and what is produced by it do not belong to (i.e. are not connected with) the Ātman, (as understood) from the

instruction (in the Śruti about the) opposition (to them in nature) of the highest Ātman and because of its not being any effect and/or cause. [1516]

विभक्तं यत्तमोऽस्तीव नाविभक्तं मनागपि ।
तमोऽन्वितत्वाद्बुद्धयन्ते न प्राज्ञेऽनन्वयात्तमः ॥१५१७॥

Ignorance is ever distinct (from the Ātman) and not even a little unseparated from it—(this is so) because of the individual Ātman's connection (or, association) with ignorance in the waking state; so also (because) ignorance does not obtain in Prājña state of the Ātman, owing to the absence of its connection (with it). [1517]

कूटस्थदृष्टावेकस्मिन्नविभक्ते सहस्रधा ।
नामरूपादिभेदेन विभक्तं यत्तमो दृशेः ॥१५१८॥
तत्तु द्वितीयं नेहास्ति तमोऽनर्थस्य कारणम् ।
द्रष्टादिरूपसंभेदाद्यत्पश्येज्जागरे यथा ॥१५१९॥

Since, that ignorance, which is divided thousandfold in the variety of names and forms is distinguished (lit. separated) from the immutable seeing, viz. the seer which is (just) single and undivided; [1518]

therefore, indeed, that second (viz. ignorance and its products) does not exist here (i.e. in the deep sleep state). Ignorance is (but) the cause of the undesirable, since (on account of or because of its connection with the same, the individual Ātman) sees (lit. would see variety) owing to its being a conglomeration of the seer etc.¹ and the forms (of objects). [1519]

¹The word *ādi* refers to his activity and the means for accomplishing it.

अविद्यादेरभावोक्त्या कूटस्थात्मैव भण्यते ।
कारणात्मा यतोऽभावः कार्याख्यस्येह वस्तुनः ॥१५२०॥

By stating the absence of ignorance etc. is stated only the immutable Ātman of the nature of the cause; for, there is here (i.e. in the deep sleep state, complete) absence of the thing(s) called the effect (of ignorance). [1520]

This affirms that the absence of ignorance is but the existence of the Brahman.

अज्ञानान्नान्यदस्तित्वं सर्वस्यानात्मनो यथा ।
निवृत्तिस्तद्वत्तद्वेतोर्नावगत्यात्मनोऽपरा ॥१५२१॥

As there is no existence of all non-Ātmans apart from (that) in ignorance; in the same way, there is no removal (or, cessation) of that which is other than (i.e. apart from) knowing (the nature of) the Ātman, the cause of it (viz. ignorance). [1521]

तत्तु नैवेह वस्त्वस्ति द्वितीयं मोहहेतुजम् ।
साक्षिणो विषयीभूतं विभक्तं कार्यरूपतः ॥१५२२॥

And (tu) there is not (any external existent) thing and the product of delusion,¹ which is other than (lit. second to the Ātman), i.e. the one that is (lit. has become) an object (of seeing) for the (immutable) witness, that is (accepted to be) divided (in variety) in its form as the product (of ignorance). [1522]

¹SP offers a Rgvedic support for this, viz. *indro māyābhiḥ pururūpa īyate* (6.47.18).

संविदैव समाप्तत्वात्तमोजस्य पुरोत्थितेः ।
लभते न द्वितीयत्वमन्यत्वासंभवात्तमः ॥१५२३॥
कार्यस्यापि च बुद्ध्यादेस्तद्वेतोरविभागतः ।
न तदस्ति द्वितीयत्वं संविदैव समाप्तितः ॥१५२४॥

Whatever (be) the product of ignorance (lit. darkness), being overcome (lit. obtained/pervaded), before (even) its rise, by the very sentience (within the body), ignorance does not turn up (i.e. obtain itself) as the second (for sentience), since there is impossibility of (lit. absence of) being the second (i.e. in addition to sentience).¹ [1523]

Even in the case of (its) product(s), viz. the intellect etc.,² which have their cause, not divided (into variety) as such; there cannot be (or is not) the nature of its being the second; since (already) there has been the obtaining/pervasion (of the same) by the very sentience (within the body). [1524]

These two verses state that, in deep sleep, sentience within the body overcomes ignorance and its products, even before they would make their appearance.

¹SP clarifies the thought succinctly thus: *na hi tamaso nirvācyasyānyatvaṃ na ca tadabhāve dvitīyatety arthaḥ*.

²The reference here is to *manas*, the different organs and their activity.

यत एवमतः प्राह नेह तद्वस्तु विद्यते ।

यत्पश्येद्गोचरापन्नं सुखशब्दादिलक्षणम् ॥१५२५॥

यत्पश्येदिति कर्तृवितर्द्रष्टात्राशङ्क्यते यतः ।

तत्रास्ति विषयोऽल्लेखिदर्शनस्येह कारणम् ॥१५२६॥

Since this is so, therefore has (the Śruti) said, 'Here (i.e. in deep sleep) there does not exist such a thing which (the inner self or Ātman) would see, as what has become its object, i.e. what is characterized by words such as happiness;¹ [1525] in the phrase 'what (the inner self or Ātman) would see', there is statement (and, therefore, acceptance) about the agent; and, since the very seer is in a state of doubt (i.e. is doubted) here (viz. in deep sleep), there is here (in connection with the deep sleep state) not mentioned the seeing of any cause, expressive of objects. [1526]

¹ By *ādi*, possibly *duḥkha* is principally understood; maybe other kinds of experiences are also meant.

श्रोत्रादिकरणोपेतं यतोऽन्तःकरणं दृशेः ।
बाह्यार्थदर्शने हेतुः कौटस्थ्यान् तदक्षरम् ॥१५२७॥

Since it is the internal organ which, accompanied by other organs such as ears, is the cause of the seer's seeing external objects; it is not the imperishable on account of the latter's being immutable. [1527]

The basis for this verse is the Śruti statement *nānyo 'to 'sti draṣṭā* (BU 3.7.23) to mean that, since the seer is rejected (i.e. denied as existing) in the deep sleep state, it is the rejection of (the existence of) the Ātman. But that is not an acceptable argument, because the Ātman is said to be the same when it is, under the influence of delusion, possessed of the internal organs etc.; it is, in reality, ever immutable.

Read SP in this context: *śrutis tu cakṣurādidvārā rūpā-dyākāramanovikāre dr̥ṣṭyādisabdite sākṣitāsyāivety evamparā.*

तमोन्तः कारणं बुद्धेर्द्रष्टान्तःकरणावधिः ।
सुखी दुःखी च देहान्तः प्रत्यगज्ञानहेतुतः ॥१५२८॥

The cause of the intellect is the ignorance (lit. darkness) within (an individual's body); the seer (exists) so far as there exists the internal organ and the inner self is happy and/or miserable (while existing) in the body on account of the ignorance/delusion (that is) the cause (of its transmigratory existence). [1528]

Verses 1528-1529 state that in all the dealings through ignorance the real cause is but the inner self.

बुद्ध्यादेशच समुत्पत्तौ धर्माद्येवात्र कारणम् ।
यतोऽतः कारणध्वस्तौ बुद्ध्याद्येत्यात्मकारणम् ॥१५२९॥

Further, since merit etc.¹ is the cause of the rise (i.e. coming into existence) of the intellect etc.² here (i.e. in the Ātman under delusion), therefore, when there is destruction of cause(s), the intellect etc. merge into their (real root-)cause (i.e. the Ātman).³ [1529]

¹Demerit and related ritualistic activities are meant.

²Namely, *manas* and other organs of activity.

³Which has, under the influence of delusion, undergone modification into these.

Verses 1530-1531 firmly state that in the case of the non-affected Ātman there is no ignorance.

तमोन्वयस्तमःकार्ये बुद्ध्यादावेव युज्यते ।
न त्वकारणकार्येऽस्मिन्नित्यबुद्धे परात्मनि ॥१५३०॥

The connection of ignorance is to be understood with reason only in the case of the intellect etc., which are the product of ignorance, but not in the case of this highest Ātman which is neither a cause nor an effect and is ever enlightened (i.e. consisting in knowledge). [1530]

वृत्तिं च लभते कार्यं न स्वकारणतोऽन्यतः ।
न कार्यं कारणं वास्ति प्रत्यग्वृत्तव्यपेक्षया ॥१५३१॥

An effect does not come into existence from anything else than its own cause (viz. ignorance), whereas there does not come into being (or, existence) any effect or cause in relation to (*vyapekṣayā*, or through dependence on) the inner self.[1531]

In verses 1532-1536, there is explained paśyan na vai paśyati.

बुद्ध्यन्तस्यास्य मूढस्य सुखशब्दादिदर्शिनः ।
स्वकारणक्षयाद्धवस्तौ नात्मा पश्यन्नपीक्षते ॥१५३२॥

When there has occurred destruction of this deluded (individual self) which has its intellect as the last (organ to perish) and which experiences (lit. sees) happiness, words etc.;¹ then, on account of the destruction of itself (viz. of ignorance), that Ātman also does not (any more) see, though (it is) seeing.²

[1532]

¹This indicates miseries and other objects of knowing.

²This is despite its being *svaprakāśa* 'self-illuminating'.

द्रष्टृत्वादिविभागेन विभक्तो यस्त्वविद्यया ।

स कूटस्थात्मनापीतो रज्ज्वा सर्पो यथा तथा ॥१५३३॥

That one which is, on account of ignorance, divided into (such discrete things as) *draṣṭṛ* 'seer' (or 'experiencer') is overcome (or, drawn within) by the immutable Ātman, in the same way as a serpent (that is imagined to be existing) by a rope (which is its basic reality).

[1533]

द्रष्टृदर्शनदृश्यानां संबन्धोऽतो न वीक्ष्यते ।

तमस्विनः प्रलीनत्वान्नाविद्याकार्यमीक्षते ॥१५३४॥

Therefore, any connection is not seen there (in the deep sleep state) among the seer, the act of seeing and the objects of seeing—thus, because the one, overpowered by ignorance, having merged (into the immutable Ātman), that (individual Ātman) does not see (any) effect of ignorance.

[1534]

द्रष्टृदर्शनदृश्यादिभेदोऽविद्याप्रकल्पितः ।

यतोऽतो मोहविध्वस्तौ द्रष्ट्राद्यात्मनि नेक्ष्यते ॥१५३५॥

Since the division (i.e. distinctly existing world of objects), consisting in the seer, the act of seeing and the object(s) of seeing, is also created by (lit. imagined on account of) ignorance, therefore, when (that) ignorance is overcome (lit.

destroyed), there is not seen in the (immutable) Ātman (the discrete objects, namely the world of) the seer and others.

[1535]

उत्तरेष्वपि वाक्येषु यथोक्तमुपपादयेत् ।
व्याख्यानमेतदेवेति नातोऽन्यदवशिष्यते ॥१५३६॥

In the subsequent sentences (of the Śruti)¹ also, one should accept this very explanation, i.e. what has been presented (lit. stated above), therefore, nothing else than this (holds good and) remains to be stated. [1536]

¹This is reference to *yad vai tan na jighrati* (4.3.24-30).

As stated earlier in a note on verse 1408 above, the explanation of Bhartṛprapañca (from verse 1386 earlier up to that verse) was acceptable to Sureśvara; but that explanation is now subjected to critical examination, i.e. refutation up to verse 1566, up to verse 1645 below.

Verses 1537-1547 explain the exposition of yad vai tat—according to Bhartṛprapañca.

अन्ये पुनरिमं ग्रन्थमन्यथैव यथोदितात् ।
व्याचक्षते हि व्याख्यानात्तच्चापीह विभाव्यते ॥१५३७॥

Others,¹ however, explain (this portion of) the Śruti in a way different from the explanation which is presented (lit. stated) above; and that also is now examined (or, considered, lit. seen).

[1537]

¹This refers to Bhartṛprapañca.

निरस्य पूर्वपक्षोक्तीः परिहारोक्तिभिः क्रमात् ।
ज्योतिर्मात्रितया स्थानं दृशेः प्राज्ञे जगौ सुधीः ॥१५३८॥

The wise one, after having refuted the (various) arguments

of the holder of the *prima facie* view, one after another (*kramāt*) by statements for explaining them away, stated (lit. sang) that, in Prājña, the state (*sthāna*) of the seer/witness (i.e. the immutable Ātman identified with the individual self) is only being a light. [1538]

साधयित्वा स्वयंज्योतिः सुषुप्ते युक्तिभिः स्फुटम् ।
अथैवं ज्ञस्वभावोऽपि कस्मात्प्राज्ञे न पश्यति ॥१५३९॥
इत्याशङ्कापनुत्त्यर्थं परो ग्रन्थोऽवतारितः ।
तद्व्याख्यानं यथावच्च ह्यक्षराणां विभाव्यते ॥१५४०॥

Having (then) clearly established with (suitable) reasons that, in the deep sleep state, there is (only) the self-illuminating (reality), he introduces the subsequent portion (of the Śruti) for answering (lit. removing) the doubt (about the same): 'Now, though having the nature of a knower, why does it (i.e. the immutable Ātman, i.e. the individual self) not see (i.e. is not able to see) in (its state of) Prājña?' Then, the explanation of that, as presented (by those others) is being considered (i.e. examined) as indeed it is given in different words (*yathāvac ca hy akṣarāṇām*).¹ [1539-1540]

¹SP states in this context: *tadvyākhyānaṁ tacchīṣyāṇām prasiddham iti hisabdārthah*.

यद्वै न पश्यतीत्येवमात्मानमतिशङ्कसे ।
तन्मा शङ्कीर्यतः प्राज्ञे पश्यन्नात्मात्रं वर्तते ॥१५४१॥

Do not doubt what you strongly doubt thus, viz. 'the Ātman cannot (i.e. does not) indeed see', since here in Prājña (i.e. in the deep sleep state) the Ātman keeps on seeing.¹ [1541]

¹That is, it does not lose its power of seeing. SP quotes: *uktam hi— paśyann evāyaṁ tasmīn kāle bhavatīti* (possibly in the Bhāṣya of Bhartṛprapañca).

इत्थं सतत्त्वकस्तावद्द्रष्टव्यः श्रुतियुक्तिभिः ।
न पश्यतीति न पुनर्द्रष्टव्यो हेत्वसंभवात् ॥१५४२॥

(The Ātman) has to be understood (lit. seen), on the basis/support of the Śruti and reason, as being possessed of such nature,¹ but indeed it is not to be understood (or, taken, lit. seen) as one which cannot (i.e. does not) see; for, there is no reason possible (for that to be so). [1542]

¹SP refers to *paśyan* ... as a statement in the Śruti and *jaḍasyānātmataḥprasaktir ityādyā yuktiḥ*.

In verses 1543-1553 there is reasoned out how both paśyan and na paśyati are understandable.

विशेषवन्न चाप्यस्य विज्ञानमिह जायते ।
पश्यन्न पश्यतीत्येवं पदार्थद्वयमीरितम् ॥१५४३॥
तदाविष्करणे ग्रन्थः क्रमेणारभ्यते परः ।
न हि द्रष्टुरितीत्थं च सौकर्येणावगम्यते ॥१५४४॥

Also, there does not occur to (arise in) this (Ātman), here (i.e. in the deep sleep state) any specific knowledge (or, any knowledge which has some particular object).¹ Thus are explained (lit. stated) the two (lit. is ... a pair of) meanings of the words *paśyan na paśyati*. [1543]

(And) there is now begun (the subsequent portion of) the Śruti for the purpose of exposing the nature of that. (In that way, i.e.) are thus the words *na hi draṣṭuḥ* ... is thus (i.e. thereby) understood with ease.² [1544]

¹In this connection SP cites (possibly a sentence from the Bhāṣya of Bhartṛprapañca): *yathāhuḥ— na cāśya viśeṣajñānam prādurastīti*.

²Read NKL (ms. p.680): *na hītyādivākyaṃ paśyan na paśyatīty asya vyākhyānam iti pakṣe sukaram yojayitum ity āha na hīti*.

द्रष्टा दृष्टिक्रियाकारी विज्ञानात्मा पुमानिह ।
बुद्ध्युपात्तस्य रूपादेर्विज्ञानं च ततः परम् ॥१५४५॥

(They understood) here (i.e. in the worldly affairs that) the seer is the individual person who does the action of seeing—and (here in the deep sleep state) the specifically knowing Ātman is (the seer) of the form etc. presented (lit. brought) to it by the intellect—and it is later that there is for it (any) specific knowledge. [1545]

NKL (ms. p.680) explains this, briefly though, very clearly thus: *rūpāder buddhiviśayasya dr̥ṣṭi(=draṣṭi sic)kartā draṣṭocyata ity arthaḥ. yat tasya kartr̥tvaṃ kāraṇapauṣkalyāt sampannam tad anantaram cakṣurādīdvāra vijñānam ghaṭādigocaram syād ity āha vijñānam ceti.*

तत्रापि च धियो वृत्तेर्ग्राह्यग्राहकरूपतः ।
घटादिमेयविषयात्पूर्वोत्पन्नक्रियात्मनः ॥१५४६॥
क्रियान्तरस्य निर्वृत्तौ द्रष्टा तत्रापि पुरुषः ।
दृक्शक्तिः पुरुषे तत्र या रूपाद्यनुरोधिनी ॥१५४७॥

There also,¹ it is the activity of the individual Ātman² even before the function of the intellect which consists in the form of (being) one that grasps what is to be grasped, and which has a pitcher etc. as the object(s) to be grasped, [1546] (and then) also, with respect to another activity which is performed, it is the individual (who is) the seer.³ (And) what power rests there in that individual is also in conformity with the form etc. (of the objects for the seer).⁴ [1547]

¹*tatra* has a reference to *vijñāna* mentioned in the preceding verse.

²In this context SP states: *uktaṃ hi— tatrāpi buddhipratyayasya ghaṭādeś ca grāhyagrāhakabhāvena sambandhāt kriyāntaranirvṛttau draṣṭaiveti* (possibly a comment of Bhartṛprapañca himself).

³The word *puruṣaḥ* has metrical lengthening of the letter *pu*

which we often come across in the *Gītā*.

⁴In this connection, SP quotes: *tad uktam tatra yasmin puruṣe drkśaktī rūpagrahaṇādisambandhinīti*. Both SP and NKL add: *śabdādisamvedanakartr̥tvasāmarthyam ātmāśritam jadasya tad-nyogād ity arthah*.

क्रियाभावोऽवगन्तृस्थो विज्ञानात्मैककर्तृकः ।
तस्या दृष्टेः क्रियाया हि द्रष्टृधर्मत्वतः सदा ॥१५४८॥
द्रष्टृविपरिलोपोऽत्र मनागपि न विद्यते ।
गुणिस्थित्यनुरोधित्वाद्गुणानामग्निदाहवत् ॥१५४९॥

The happening (*bhāva*), called activity, (really) belongs to (lit. is in) the one who comes to know, that is (in other words) the act of seeing has, for its agent, the Ātman which has that property (i.e. of specifically knowing). (Further,) because that activity, viz. seeing, is also of the nature of the property ever abiding in (i.e. belonging to) the seer, [1548] there is not noticed even a little of the absence (lit. destruction/perishing) of the seer—this is in conformity with the existence of properties in the one who is possessed of them (i.e. the properties), just in the same way as the power of burning (ever rests) in fire.¹ [1549]

¹SP cites here: *uktam ca— yāvad guṇibhāvino hi guṇā yāvad agnis tāvad auṣṇyam iti* (possibly, a remark of Bhartṛprapañca himself).

यत एवमतो यावदात्मा द्रष्टा न नश्यति ।
न तावत्स्यात्समुच्छेदो द्रष्टुर्दृष्टेस्तदाश्रयात् ॥१५५०॥

Since it is thus, for the reasons(s) (stated above), that so long as the Ātman, viz. the seer, does not perish, there cannot be (or, is not) the perishing (or, utter destruction) of the (power of) seeing in the seer. [1550]

On this verse, SP comments: *sāmānyanyāyam prakṛte yojayati*.

This means: In verses 1545-1849, there was exposition on the nature of the seer (in common parlance) and the nature of that worldly seer can (or, has to) be attributed to the Ātman—Prājña in the present context also.

मतं गुणिविनाशेन तद्गुणोऽपि विनङ्क्ष्यति ।
अग्न्याद्यौष्ण्यादिवच्चैत्र द्रष्टुरस्याविनाशतः ॥१५५१॥

If it is held that, 'On the perishing of the one possessed of (some) property, that property also perishes, in the same way as the heat (of fire) disappears (or, becomes lost) on the extinction of fire'; then (the reply is:) 'No, that is not so, for there is not (ever) perishing in the case of this seer'.

[1551]

At the end of SP, read: *nityo hi draṣṭeti bhāṣyena dūṣayati*.

अत आहविनाशित्वाद्द्रष्टुर्दृष्टिकृतः सदा ।
विनष्टुं नात्मनः शीलं घटादेरिव युज्यते ॥१५५२॥

Therefore has the Śruti stated. Since the seer (lit. the agent of seeing) is ever non-perishing, therefore, it is not reasonable (to hold that) the Ātman has the nature of becoming lost (or, is liable to perish) as (it is the nature) in the case of a pitcher etc.

[1552]

On this, the concluding statement in SP is: *yathāhuḥ— na hy asya vinamṣtum śīlam vidyata iti*.

न विनश्यत्यसौ कस्मादिति हेतुरिहोच्यताम् ।
सर्वात्मत्वात्तथैकत्वाद्द्रष्टुर्नाशो न विद्यते ॥१५५३॥

(One would argue:) 'Why/Wherefore does it not perish? Let there be told a reason for it (lit. this)'. (The answer is:) 'There is no perishing of the seer because of its being the nature/essence of all and also because of its being alone (i.e.

only one, without any second)'. [1553]

Verses 1554-1558 point out the reason for the impossibility of the Ātman's perishing.

येनास्याशङ्क्यते नाशस्तेनास्याप्रविभागतः ।
संभाव्यते न नाशोऽस्य नष्टुर्नाशविभागतः ॥१५५४॥

(Further,) a person, who doubts/apprehends that there is perishing/destruction of this (Ātman), (holds so) on account of its not being divided (into discrete objects). But (it must be observed that) there is no perishing of this one by (lit. from) the destruction of the destroyer without any division'.

[1554]

SP supports this argument by quoting: *yathāhuḥ—yena hy anyena dvitīyena nāśa āśaṅkyeta na tad asti tena avibhaktatvāt tasyeti* (possibly from the Bhāṣya of Bhartṛprapañca).

न च तेनैव तस्यैव विनाश उपपद्यते ।
ऐकात्म्याद्द्वैतविषये यथाग्नीन्धनयोस्तथा ॥१५५५॥

'Nor also does it stand to reason that there is destruction of that (lit. itself) by that itself, while it is there in the state of singleness (or, liveness) and non-duality; in the way of (or, that there are required) the two, viz. fire and fuel (for the latter's destruction).'

[1555]

The argument of the preceding verse is supported by an illustration of what is to the opposite effect (*vaidharmyadr̥ṣṭānta*). Also, SP quotes: *tad uktam na ca tenaiva tasya vināśo 'stīti* (possibly from Bhartṛprapañca).

द्रष्टुस्ततोऽविनाशित्वान्नित्या नित्यस्य धर्मिणः ।
आदित्यरश्मिवद्ग्राह्या दृष्टिरप्यविनाशिनी ॥१५५६॥

‘Therefore, as a consequence, it is to be accepted that the (power of) seeing of the seer (or, witness) does not have destructibility and it is perennial, on account of the indestructibility of the perennial one which has that as its property (*dharmin*).’ [1556]

नित्योऽतो नित्यया दृष्ट्या पश्यन्नेवाविलुप्तया ।
द्रष्टास्ते प्रज्वलन्त्यात्र सुषुप्ते यो विवक्षितः ॥१५५७॥

‘From this (it becomes clear), the perennial seer (ever) keeps on seeing with its never-perishing (power of) seeing—the one, who is kept in mind (lit. meant to be mentioned) in (connection with) the deep sleep state.’ [1557]

SP supports the argument (viz. the conclusion which is arrived at) by stating *tad uktam— sa tayā drṣṭyāvipariplutayā paśyann evāsta iti* (possibly from *Bhartṛprapañca*).

एवं तावत्स्थितं पूर्वं पश्यन्निति यदीरितम् ।
न पश्यतीति यत्तूक्तं तदिदानीं प्रपञ्च्यते ॥१५५८॥

So far (or, to begin with) is thus settled¹ (the thought), viz. that it is first stated, ‘(It) keeps on seeing’. Now will be explained what is said, viz. *na paśyati*.² [1558]

¹This is with reference to *iti sthitam*.

²There is now a statement of what is said in BUB (p.620): *dvitīyaṃ viśayabhūtam* (to mean) *dvitīyaṃ padārthaṃ nirṇetum upādatte*.

Verses 1559-1570 discuss the meaning of *na paśyati*.

न पश्यतीदं द्रष्टव्यमिति यत्सूत्रितं पुरा ।
पश्यन्नेव यदि ह्यास्ते कथं तदुपपद्यते ॥१५५९॥

(A doubt is stated:) ‘How can that, what was stated earlier,

namely *na paśyatīdam draṣṭavyam*, be reasonable (or, stand to reason), if it keeps on seeing only?' [1559]

This is the meaning of BUB (p.620): *katham tarhi na paśyatīti* (SP). Also read NKL (ms. p.681) the introductory to this verse: *adi paśyann evāste katham na paśyatīty ucyata iti dvyaāvarttyaśaṅkām āha na paśyatīti*. The words *idam draṣṭavyam* do not form a part of BUB; they signify what is implied through the force of the arguments in the verses nearby.

यथोपपद्यते सर्वं शृणु तच्चापि भण्यते ।
पश्यन्नेवायमत्रास्ते पूर्वहेतुसमाश्रयात् ॥१५६०॥

(The answer is given:) 'Hear as to how all (of that) is reasonable. That is (how) to state—"This one, here (i.e. in the deep sleep state), keeps on seeing," for the reason (which is stated) earlier'.¹ [1560]

¹This refers to verse 1558 above. The reason, which is meant, *nityadr̥ṣṭitva*.

तत्तु द्वितीयं नेहास्ति द्रष्टव्यं यत्समाश्रयात् ।
विशेषबुद्ध्यभिव्यक्तिर्जाग्रद्वृत्ताविवेक्ष्यते ॥१५६१॥

But, that second (external object) is not here (in the deep sleep state) which is to be seen and resting on which there could be accepted the expression (or, revealing) of some particular (impression on) the intellect in the waking state.' [1561]

ननु द्रष्टव्यमस्त्येव द्वैताद्वैतात्मकत्वतः ।
ब्रह्मणोऽस्य कथं नास्ति द्रष्टव्यमिति भण्यताम् ।
द्रष्टव्यं स्याद्विभक्तं तत्राविभक्तं यथोदितम् ॥१५६२॥

An objection is raised:) 'But, indeed, there is certainly (*eva*) an object to be seen, owing to the nature of (both) duality

and non-duality (as accepted in our ¹ view)! How then could there not be an object to be seen? Let this be answered (lit. said).’ (The answer is:) ‘If there is an object to be seen, it should be divided (into discrete variety of the same); (but) it is not (so) divided as argued earlier’. [1562]

¹This refers to the view of Bhartṛprapañca.

यदि ह्यन्यत्ततो द्रष्टुर्दृश्यं तत्स्याद्विभागवत् ।
ततः पश्येद्विभक्तं सन्न त्वेवमिह विद्यते ॥१५६३॥

‘If (the object) to be seen is other than (i.e. distinct from) the seer, (only) then it would be (i.e. appear as) divided (into variety) and (the seer) would see it as being distinct (i.e. as what has variety in it), and/but such (the existence of it) does not appear here (in the deep sleep state).’ ¹ [1563]

This explains *na tu tad dvitīyam asti* in BUB.

¹Or, alternatively, here in our opinion/view.

पश्यन्नेवायमत्रास्ते द्रष्टव्यासंभवात्सदा ।
न पश्यतीति द्रष्टोक्तो न तु दृष्टिविनाशतः ॥१५६४॥

Indeed, it keeps on seeing here (in the deep sleep state), owing to the ever obtaining absence of (any object) to be seen (and), therefore, in (the words) *na paśyati* is described (or, mentioned) the seer; but not owing to the perishing (or, destruction) of the (power of) seeing. [1564]

ज्वलन्नपि यथा वह्निर्नानभ्याहितमिन्धनम् ।
दहतीह तथा द्रष्टा नाप्राप्तं दृश्यमीक्षते ॥१५६५॥

As here ¹ fire, though (ever) burning, does not burn fuel which is not kept near it; so does the seer not see what has not come its way. [1565]

This is based on BUB: *tad yathāgnir jvalann api nānabhyāhitam ahati tadvat (iti)*.

¹That is, in the world around us (*vyavahārabhūmi*).

व्याख्यानमेतत्सुधियां श्रद्धधाना उपासते ।

युक्त्यक्षरबहिष्ठात्तत्र विद्वांस उपासते ॥१५६६॥

Those (followers), who have faith in their learned (or, intelligent preceptors),¹ honour (or, adopt) this explanation (given by them); the wise ones, (however), do not honour (it) as it is outside (the sphere of) the expression with logic (as its basis).²

[1566]

¹This is reference to *Bhartṛprapañca* in plural form.

²That is, not based on logical arguments. This indicates the non-acceptability of the view of *Bhartṛprapañca*.

यथा चेदमसंबद्धं न युक्त्यक्षरसंश्रयम् ।

तथासकृत्पुराप्युक्तमधुनाप्यभिधीयते ॥१५६७॥

How this (view of *Bhartṛprapañca*) is irrelevant (i.e. not properly connected with the basic Vedānta text) and is not based on logical arguments is shown (lit. stated) by me, more than once; but, even then, the following is stated (by me).¹

[1567]

¹SP adds: *tadvyākhyāne duṣṭatoktiḥ samyaktvabhrāntinirāsā-am ity arthaḥ*.

पश्यन्नेवायमत्रात्मा सुषुप्ते व्यवतिष्ठते ।

एवंसतत्त्व एवायमिति हेतुरिहोदितः ॥१५६८॥

Here (in the argument of *Bhartṛprapañca*) is mentioned the reason as to why this Ātman exists, with such of its nature,¹ in the deep sleep state, though it keeps (only) on seeing (*paśyan va*).

[1568]

¹Add: *avinastadrṣṭi* 'not having lost its (power of) seeing.

न च प्रादुर्भवत्यस्य ज्ञानमन्यद्विशेषवत् ।

न पश्यतीति वाक्यस्य व्याख्यानमिदमीरितम् ॥१५६९॥

Nor does there occur to it another knowledge which has some special nature. Thus is stated (by me, or by those who hold this view of mine) as the explanation of the (Vedānta) sentence *na paśyati*. [1569]

पश्यन्नेवेति चेदेतद्वस्तुयाथात्म्यमुच्यते ।

इत्थंसतत्त्व इत्युक्त्या कथं द्रष्टृक्रियोच्यते ॥१५७०॥

If (it is said that) 'in the words *paśyann eva*, there is stated the nature of the (real) thing as it is, viz. it is the (power of) seeing', then (it has to be asked:) '(thereby) stating that (the Ātman) has such nature how can there be attributed (to the Ātman) the activity of the seer (i.e. agent)'. [1570]

This verse is based on a twofold doubt: Is the Ātman, described in *paśyann eva*, (i) the (power of) seeing, i.e. *drṣṭi*, or (ii) the agent of seeing (viz. an activity)? The first alternative is answered in the verse under translation. SP states the argument (in answer) of the verse succinctly thus: *pratyagātmetthamṣatattvo drṣṭisvabhāvo na tatkartā*.

The second alternative is answered in the next verse.

Verses 1571-1576 set aside the notion of the Ātman's having the property of being a seer.

द्रष्टृधीना क्रियाद्रष्टिरिति चेद्वक्तव्यते ।

कथं विपरिलोपोऽस्याः क्रियात्वे सति वार्यते ॥१५७१॥

(Also), if it is said by you that the seeing, which is an activity, rests in the seer (i.e. the agent of that action), then, (it has

to be asked:) “how could that, being an activity, perish (or, lit. have destruction)? how could that (happening) be avoided/warded off?” [1571]

SP clarifies this argument thus: *kriyā hi parilupyate kriyātvād gativat tathā ca na hītyādinīṣedhavirodhaḥ syāt*. It is to be remembered that the Śruti has declared the non-perishing of the Ātman.

अभूतदृष्टिकर्तृत्वे द्रष्टृत्वं द्रष्टुरिष्यते ।
प्रादुर्भावे तथासत्याः क्रियायाश्च क्रियात्मता ॥१५७२॥

(In your view) is held (or, accepted) seership in the case of the seer, even while there has not (ever) existed in it agentship of seeing. (And) only in the case that it comes to be (or, to occur) in it, there (seems) to be (held) the activeness of the action which has not been there. [1572]

द्रष्ट्रा च क्रियते दृष्टिर्न चासौ परिलुप्यते ।
इति स्ववचसैवैतद्विरुद्धमभिधीयते ॥१५७३॥

And, in your own statement, that the (power of) seeing is produced by the seer and that it does not perish (or, get lost) there are mutually contradictory statements. [1573]

The idea is: *dr̥ṣṭi*, being a product does perish—if *draṣṭṛ* creates it. Therefore, to say that *draṣṭṛ* creates it and that it never perishes would involve contradiction.

कार्यस्यापि च नित्यत्वं वचनाच्चेत्प्रसिध्यति ।
वचनस्याप्रमाणत्वं कारकत्वात्प्रसज्यते ॥१५७४॥

If, again, there is (thus) established the perenniality of an effect (or, a product) from the statement (so conveying); then, there follows, as contingent, the non-authoritativeness of (that) statement for the reason that there is acceptance of (the

immutable Ātman) as an agent of activity.

[1574]

The basis for the argument in this verse is the doubt about the contradiction in the statement *na hi draṣṭur dr̥ṣṭeḥ aparilopaḥ*: it involves contradiction to say that *dr̥ṣṭi*, which is a product of the *draṣṭr*, is perennial and that *draṣṭr* is the agent of the activity, viz. production of *dr̥ṣṭi*. Here, in this verse, the first alternative is discarded and in the next verse, the second.

प्रमाणं बोधकं सर्वं तच्च सिद्धस्य वस्तुनः ।

पूर्वं प्रमाणसंबन्धाद्व्यङ्ग्यव्यञ्जकसंगतेः ॥१५७५॥

All authoritative means is (merely) capable of informing of whatever is (already) existing (or, lit. established as existent), owing to the relation (or, connection) between them as what is to be revealed and what reveals, before (the acceptance of) the (actual) relation/connection of the means of knowing (with the object of knowing).

[1575]

At the end SP adds: *vidyamānaviṣayāpekṣatvād ghaṭadīpādau tathādr̥ṣṭatvād iti śeṣaḥ*.

अनुमानविरोधस्य वचसोऽस्य प्रसज्यते ।

अविनाभाविता यस्मादनित्यकृतकत्वयोः ॥१५७६॥

There follows as contingent the opposition of this statement (of the Śruti) to this inference since there is invariable concomitance of the non-eternal (or, non-perishing) and what is a product.

[1576]

SP refers to CU 8.1.6: *tad yatheha karmajito lokaḥ kṣīyate*

...

This verse paraphrases the words *yato na paśyati*.

द्वौ पदार्थावुपन्यस्तावित्येतदतिदुर्घटम् ।

यतो न पश्यतीत्येतदनूद्यान्यद्विभाव्यते ॥१५७७॥

That there are two senses conveyed by (these) words¹ together is very difficult to happen (i.e. to achieve), since, after repeating (the words) *na paśyati*, there is noticed another (statement conveying the presence of what is produced). [1577]

¹This refers to (i) *paśyan* and (ii) *na paśyati*.

Verse 1578 raises doubt about what the statement *na paśyati* would convey.

न पश्यतीति प्राप्तत्वान्नापूर्वोऽर्थोऽवबोध्यते ।
न पश्यतीत्यतोऽनूद्य पश्यन्निति विधीयते ॥१५७८॥

Since there has been known (the meaning of) *na paśyati*, there is brought out (or, conveyed the sense of what is) not (known) before, therefore, it is that, after repeating (the words) *na paśyati*, (the word) *paśyan* is stated. [1578]

पश्यन्नित्यस्य वा व्याख्या कारकत्वनिवृत्तये ।
न पश्यतीति वचनं न त्वर्थान्तरमुच्यते ॥१५७९॥

Or, the explanation of this (word) *paśyan* is for (purpose of) setting aside (the notion of the Ātman's) being an agent of activity (*kāraṇatva*) and (tu) the statement *na paśyati* is not stated as (conveying) the sense of another (object to be seen). [1579]

There follows, in verses 1580-1582, the refutation of the other view.

किमयं दृष्टिकारित्वात्पुमान्द्रष्टेति भण्यते ।
दृष्ट्यात्मकं वा किं वस्तु द्रष्टेत्यत्र विवक्ष्यते ॥१५८०॥

(A question is asked:) 'Is it that this individual is said to

be the seer because it performs the act of seeing? Or, is it something which is of the nature of being seen that is intended to be expressed by the word *draṣṭṛ* 'seer'? [1580]

न तावद्धृष्टिकर्तृत्वं कौटस्थ्यादात्मवस्तुनः ।
कौटस्थ्यसिद्धौ हेतुंश्च प्रागवोचमनेकशः ॥१५८१॥

(This is said in answer to the question:) 'In the first place, there does not belong to (or, exist in) the thing, called the Ātman, the agency of performing the act of seeing, since it is established to be immutable in nature.¹ And, in order to establish the immutability (of the same), I have already stated the reasons many times'. [1581]

¹That is to say: performing any action would be a sign of liability to modification, i.e. a change in nature.

क्रियाकारकरूपस्य प्रत्यङ्मात्रसत्त्वतः ।
नातोऽस्य कारकत्वं स्यात्साक्षित्वाच्च क्रियावताम् ॥१५८२॥

(Now, secondly) because it is of the nature of being merely the inner self, it has not the nature of a *kāraka* 'what is connected with an activity', which belongs (only) to what is of the nature of an action and/or its agent or instrument (*kriyākārakarūpa*), and also because of its being only the witness of those that are connected with action (*kriyāvat*). [1582]

Verses 1583-1585 set aside the notion about the Ātman's being a *bhoktr* 'enjoyer'—even in the form of its semblance.

बुद्ध्युपात्तस्य रूपादेर्विज्ञातृत्वं न चात्मनः ।
भोक्तृत्वमपि तस्येह चैतन्याभासवर्त्मना ॥१५८३॥

Nor also does belong to the Ātman any knowership of (some) form etc., brought/presented to it by the intellect; nor also the enjoyership is said to belong to it by way of accepting

it as a semblance of sentience (i.e. the immutable self). [1583]

मणेरेव विकारोऽयं यालक्तादिसरूपता ।
नालक्तकादेर्विकृतिर्निष्क्रियत्वादिहेष्यते ॥१५८४॥

That a jewel has the same colour as of *alaktaka* 'a red paint' is but some modification (which appears to exist) of the jewel (and) it is not accepted that there is any (real) modification caused by that *alaktaka* etc., (so also) here (is not) accepted (any modification of the Ātman) owing to its being devoid of any activity. [1584]

रक्तत्वादिप्रसिद्धयर्थं विक्रियां न प्रपद्यते ।
अलक्तकादिः सर्वत्र यथैवं ह्यात्मवस्त्वपि ॥१५८५॥

As *alaktaka* etc. does not anywhere undergo any modification in order that (there is effected) redness etc. (in a jewel etc.); indeed in this very way the (real) thing, namely the Ātman also (does not undergo any modification). [1585]

Verses 1586-1588 discard the notion of *guṇas* in *guṇasthiti*.

गुणिस्थित्यनुरोधित्वं न च सर्वत्र वीक्ष्यते ।
गुणानां केशकृष्णत्वं व्येति केशेषु सत्स्वपि ॥१५८६॥

Also it is not noticed everywhere that qualities (do) have conformity with the condition/state of what have those as property; (for example), blackness of hair disappears even while they (continue) to exist. [1586]

अग्नेरात्यन्तिको नाशो भवतापि न मृष्यते ।
न चोष्णत्वं सतोऽप्यग्नेः काष्ठादावुपलभ्यते ॥१५८७॥

You also cannot accept (lit. tolerate) that there is complete extinction (lit. destruction) of fire and also there is not noticed (any) heat (lit. hotness) in (a piece of) wood etc. even while

there is fire residing in it.

[1587]

गुणिस्थित्यनुरोधित्वमस्तु नाम गुणात्मनः ।
द्रष्टुर्दृष्टेः किमायातं क्रिया दृष्टिर्गुणो न तु ॥१५८८॥

Or (rather,) let there be conformity of what is of the nature of a quality with the condition/state of what have those properties; what (then) comes (i.e. follows) from the act of seeing the witness/seer? Indeed (tu) the activity called seeing is not any quality.

[1588]

Verses 1589-1590 discard the idea that the activity of seeing is ever going on.

कारकाणां स्वभावोऽयं यदकृत्वा प्रवर्तनम् ।
यथाभूत्वा तथा भावः क्रियायास्तत्त्वमुच्यते ॥१५८९॥

(Again) such is the nature of *kāraṅkas* (i.e. what are connected with an activity) that without (actually) doing (anything) they promote (the activity)—to this effect that the nature of an activity is to have become that which it had not been (before).

[1589]

यावद्द्रव्यानुरोधित्वं नावश्यं गुणकर्मणोः ।
द्रव्ये सत्यपि लोकेऽस्मिन्व्यभिचारस्य दर्शनात् ॥१५९०॥

(Therefore,) even while there is some substance, there is no need of any property and activity (in the case of an object) to have conformity with that (substance); for there is¹ noticed in the world a variable nature (of things) in this (respect).

[1590]

¹Or, are noticed examples contradicting (the argument concerning conformity in nature).

Verses 1591-1596 discard permanence of (i) seeing and (ii) the

seer.

जातिक्रियागुणादीनां निषेधादात्मवस्तुनः ।
अस्थूलं नेति नेतीति प्रतीचोऽन्यन्निषिध्यते ॥१५९१॥

Since there is denial (or rejection) of *jāti* 'genus', *kriyā* 'activity' *guṇa* 'quality' etc. in the case of the reality in the form of the self by the use of the words *asthūla* ... and *neti neti*; therefore, (it is to be understood that) anything else than the inner self (as existent) is denied/rejected. [1591]

द्रष्टुश्चापि न नित्यत्वं क्रियोद्धृतिनिमित्ततः ।
क्रियाकारकयो रूपमितरेतरहेतुकम् ॥१५९२॥

So also (*ca*) the perennial nature of the witness/seer is not accepted because of the occurrence of activity (of seeing in it)—in the case of an activity and its *kāraka*¹ the nature of each is determined (lit. produced) by (that of) the other. [1592]

¹ Here, an agent is meant.

स्वमात्रेण न यत्सिद्धं तत्सिद्धं परतः कथम् ।
स्वमात्रेण च यत्सिद्धं तस्यापेक्षान्यतः कुतः ॥१५९३॥

How can that be established (i.e. produced) by another, (that) which cannot be established (i.e. come into existence) by (or, on the strength/capacity of) itself alone? And, how can that, which becomes established only by itself, have expectation of (i.e. dependence on) another? [1593]

न सिद्धयोर्मिथोऽपेक्षा न स्वतोऽसिद्धयोस्तथा ।
इत्यादेः पूर्वमुक्ततत्त्वान्नेह भूयोऽपि यत्यते ॥१५९४॥

There is not (or, cannot be) mutual dependence of two (self-)established things as also of two which are not self-established things—this and other (related) matter, having

been said (or, explained) before, there is not made any effort again (to prove that). [1594]

नासतो विद्यतेऽपेक्षा नापि कूटस्थवस्तुनः ।
शक्त्यवस्थं यतो वस्तुहेत्वपेक्ष्यैति विक्रियाम् ॥१५९५॥

That which is a non-existent does not have an expectation (of, or dependence on, another); nor has the immutable thing (viz. the Ātman) have (any expectation ...); because whatever is a thing in the state of potentiality (or, has the potential to become produced)¹ undergoes a modification only depending on (or, expecting the help of) another thing (viz. the existent, immutable Ātman).² [1595]

¹This refers to ever active ignorance; cf. verse 1446 above.

²This suggests the origination of external objects through delusion/ignorance of the Ātman.

नित्यं न भवनं यस्य यस्य वा नित्यभूतता ।
न तस्य क्रियमाणत्वं खपुष्पाकाशयोरिव ॥१५९६॥

That, which is ever existing (lit. becoming) or that which has ever been (existent), does not have the nature of being produced (through some activity); as not there in the case of a sky-flower and/or sky. [1596]

The idea is: the immutable is ever existent (*bhūtaṃ vastu*).
BSB (p.69): *iha tu bhūtaṃ brahma jijñāsyam nityatvān*

उत्पत्त्यादौ तु यच्छक्तं शक्तिमात्रात्मना स्थितम् ।
तदेव हेत्वपेक्षं सदुत्पत्त्यादि प्रपद्यते ॥१५९७॥

That, which is potent (or capable) in respect of (effecting) production etc. and exists as a potentiality, alone can become a product (lit. begin to produce) etc. being dependent on (or, expecting some) cause. [1597]

उत्पत्त्यादावशक्ततत्त्वात्कौटस्थ्यादात्मवस्तुनः ।

अद्वितीयत्वतश्चास्य नोत्पत्त्यादि प्रसिध्यति ॥१५९८॥

(And) in the case of the (real) thing, viz. the Ātman, there does not proceed (or, become possible) any production etc. since it is not potent in respect of production etc. owing to its immutability and nature of being (or, existing) without any (thing as) second (to it). [1598]

शक्त्यवस्थानि वस्तुनि योग्यहेतोरसंभवात् ।

नार्तवानि प्रसूयन्ते योग्यहेतौ च तज्जनिः ॥१५९९॥

Products particular to (different) seasons are not produced (i.e. do not get produced) when there is absence of proper/suitable cause (viz. season) and remain as things in the state of potentiality; however (ca), they become produced (lit. their birth is possible) when there is (or, exists) suitable cause. [1599]

कार्यं नाक्रियमाणं सन्नाकुर्वत्कारणं तथा ।

मिथो न व्यतिरेकेण सिध्येते कार्यकारणे ॥१६००॥

An actual (or, existing) effect is not what is not being produced; so also a cause (does not exist) which is not producing/functioning. (Thus) a cause and an effect, in the absence of each other (or, when mutually unconnected) do not exist (lit. get established). [1600]

Verses 1601-1612 point out that in draṣṭuḥ ... dr̥ṣṭeḥ there is not any idea of kriyā and kāraka.

वस्त्वैव दृष्टिरत्रातो न क्रिया नापि कारकम् ।

तस्मादेवाविनाशित्वादिति हेतुरिहोदितः ॥१६०१॥

Therefore, *dr̥ṣṭi* '(the power of) seeing' is here the (real) thing

(viz. Ātman) itself—it is neither an activity nor a *kāraka* (connected with it). To this purport, there is stated here¹ the reason, viz. 'because of imperishability'. [1601]

¹That is, in the Śruti statement *na dr̥ṣṭer viparilopaḥ*.

निर्णीतं प्रथमं वस्तु पश्यन्निति यदीरितम् ।
न पश्यतीति यत्तूक्तं तस्य व्याख्याधुनोच्यते ॥१६०२॥

What thing is stated to be seeing is of the nature that is already settled.¹ And now is offered the explanation of what is stated, viz. *na paśyati*.² [1602]

¹This refers to the explanation already given in verses beginning with *na hi*; (cf. verse 1544 above). NKL (ms. p.684) states: *na tu dvitīyam ityādivākyaavyākhyāna(m) tadīyam anuvadati*.

²NKL (ms. p.684) introduces the second line with *na hīty-ādivākyaanuvādena nanv ityādy avatārayati na paśyatīti*.

दृष्टेरपरिलोपश्चेदथ कस्मान्न पश्यति ।
प्रबोधवत्सुषुप्तेऽस्मिन्निति प्रतिविधीयते ॥१६०३॥
पश्यन्नेवायमात्मेति यथोक्तन्यायसंश्रयात् ।
न तु द्वितीयं जाग्रद्वत्पश्यत्यात्मा सुषुप्तगः ॥१६०४॥

(A question is asked:) 'Why does it not see, if (the power of) seeing does not perish?' (The answer is given:) 'In the words *prabodhavat susupte 'smin*, there is answered away (that difficulty)— [1603]

By resorting to the reason as stated, (it is explained)¹ in the words *paśyann evāyam ātmā* that the Ātman resting in the state of deep sleep does not indeed (*tu*) see any other (lit. second object) as in the waking state'. [1604]

¹This refers to the reason which is stated earlier in connection with *avināśitvāt*.

द्वितीयं नेक्षते कस्मादित्यत्रैवाभिधीयते ।

हेतुर्न तु तदस्तीति पश्येद्यद्वस्तु बोधवत् ॥१६०५॥

विशेषदृष्ट्यभिव्यक्तिर्यदाश्रित्य प्रसिध्यति ।

न तदस्ति यतस्तस्मात्पश्यन्नपि न पश्यति ॥१६०६॥

(If it is asked:) 'Why does it not see any other (lit. second) object?'; in regard to this is now stated the reason (by way of an answer:) 'There is not (i.e. does not exist) that (object) which the (real) thing (viz. the Ātman), consisting in knowledge, would see (i.e. would have to see), [1605] since there does not exist that by resorting to which there is (said to be) established some specific seeing';¹ therefore, (as it is said) *paśyann api na paśyati*. [1606]

This is the outcome of the sentence, discussed so far, viz. verses 1602ff.

¹That is, the seeing of objects having particular nature.

इति व्याख्या न साधवीयं द्रष्टव्यासंभवे यतः ।

न प्रात्यक्ष्यं द्रष्टृदृष्टयोः स्यात्सुषुप्तप्रसिद्धिवत् ॥१६०७॥

The explanation thus¹ is not in accordance with reason (lit. is not acceptable/proper), because, in the absence of an (i.e. any) object of seeing, there would not be direct perceptibility with regard to the (power of) seeing and the seer, as it is not there (taken as established) in the deep sleep state.² [1607]

In this regard (like in many others in this context), Sureśvara is very cryptic, i.e. he takes for granted what is said earlier and leaves only a vague reference to it.

By *iti vyākhyā*, Sureśvara conveys the earlier explanation *draṣṭavyasya śabdāder abhāvāt paśyann apy ātmā* (i.e. *draṣṭā* etc.) *na paśyati* (NKL ms. p.694 and SP).

This portion is explained in SP at length. But NKL (ms. p.694) states it neatly and briefly thus: *draṣṭavyābhāve draṣṭṛasyor asambhavāt tadabhāve tayor bhāvaś cet tadā tayor svāpe*

pratyakṣatā syāt, na hi tathā yathā susupter na pratyakṣatā tatkāle, tasmād draṣṭavyābhāve draṣṭrdrṣtyor asambhava ity arthaḥ.

तमस्यवस्थितोऽपश्यञ्ज्ञातृज्ञानतमांसि हि ।
 प्रपद्यते विवेकेन यथा कुम्भादिवीक्षणे ॥१६०८॥
 न प्राज्ञे तु ततोऽयुक्तं दृश्यमात्रनिषेधनम् ।
 ग्राहकग्रहणग्राह्यभावाभावाद्यपह्नुतेः ॥१६०९॥

As, in relation to seeing a pitcher etc., a person, who is standing in the dark, would come to know¹ the knower (i.e. himself), the knowledge (viz. that there is dark around) and the dark (i.e. darkness) by his (capacity of) distinguishing; [1608]

(so does he not do) also (*tu*) in the state of Prājña;² therefore, it is improper/unreasonable to reject the existence merely of what is the object of seeing, i.e. since there is concealment/obscurity in relation to the presence or absence of the one who grasps, the act of grasping and the object of grasping etc.³. [1609]

¹This knowing consists in one's distinguishing the knower etc., not actually seeing, that is possible only while there is acceptance of that there really exists a pitcher. That indicates the opponent's view: *draṣṭavyābhāve 'pi sator apratyakṣatā*.

²The opponent's argument appears to be like this: *suptistho 'pi ātmā śabdādyagrahe 'pi suptim andhakārasthānīyāṃ tatsiddhiṃ ca draṣṭāraṃ ca vivicya jānīyāt*. It should be noted that the illustration and the illustrated would only indicate *viveka* by experience (*anubhūti*) and there is actually no seeing/knowing (*vivekadhī*)!

³Various modifications (*pariṇāmas*) are to be understood. The two notes above would bring out, it is hoped, the purport of the argument. Yet, the cryptic (so it appears to us!) and, therefore, a little awkward expression of Sureśvara leaves us in somewhat unclear mind!

ननु चास्त्येव तद्दृश्यं समस्तव्यस्तरूपतः ।
यथोक्तवस्तुनो मैवं तस्यानत्यन्तभेदतः ॥१६१०॥

But, indeed, (the opponent argues still) 'There does exist that object which is to be seen, in its collected and several forms of the (real) thing which is stated (or mentioned before). (Therefore) do not say so (viz. that there is no object of seeing)', since there is absence of extreme diversity. [1610]

बाढमस्त्येव तद्दृश्यं न त्वत्यन्तविभागवत् ।
स्याद्विभक्तं तदन्यच्चेत्पश्येदेव प्रबोधवत् ॥१६११॥

(The answer:) 'Granted that there is the object to be seen; but (it is) certainly not with division (into discrete objects associated with it). If there existed that with (such) division, then it (i.e. the seer), being possessed of knowledge, would see it without fail'. [1611]

नात्यन्तमेव सर्वत्र विभागोऽयं समीक्ष्यते ।
विशेषणमतोऽन्याय्यमत्यन्तमिति भण्यते ॥१६१२॥

(And) this (i.e. such) division is not accepted (lit. seen) everywhere¹ (and) to its extreme (logical extent); therefore, this specification² is said (i.e. to be accepted) as extremely improper. [1612]

¹Cf. SP: *avasthātraye 'pi*.

²That is, *viśeṣavijñānabhāvābhāvau*.

Now follows the refutation of the view regarding difference in non-difference.

विभक्तमविभक्तं वा वस्तु वस्त्वन्तराश्रयात् ।
सर्वैकत्वे विभागो वाविभागो वा न युज्यते ॥१६१३॥

A thing (can be said to be) distinct or non-distinct (only)

by resorting (or, in relation) to another thing. (As against this, existence of) division or non-division cannot be reasonable when (it is accepted that) there is (only) oneness (or singleness) of all (apparent distinct things). [1613]

Read SP: *idaṃ sarvaṃ yad ayam ātmā ityādiśruteḥ sarvasyādvayātmamātratre dvitīyavastvabhāvāt kuto bhedābhedāvatārah ity arthaḥ.*

यद्धि यस्माद्विभक्तं स्यात्तदेव स्यात्ततः कथम् ।
अविभक्तं विरुद्धत्वात्तस्मादुक्तमशोभनम् ॥१६१४॥

How can that (thing) be non-distinct from that wherefrom it is (accepted as) distinct?, for, that (i.e. such acceptance) is opposed (to every reason). Therefore, what is said (in the opponent's view) is improper (lit. unbecoming of intelligence).¹ [1614]

¹Read SP: *uktam ekam eva bhinnābhinnam tvayā kathitam iti yāvat.*

अपह्नुतिर्विभागस्य ह्यविभक्तगिरोच्यते ।
विभागान्नापरं वस्तु ह्यविभक्तगिरा ततः ॥१६१५॥

In (lit. By) the statement of non-division is conveyed the negation (lit. concealment) of division. From that statement of non-division (follows that) there (does not exist) anything else thanks to division. [1615]

अन्यद्विभक्तमिति च तथा द्रष्टव्यमित्यपि ।
सामर्थ्यादेक एवार्थो भूयो भूयोऽभिधीयते ॥१६१६॥

In (the statement) *anyad vibhaktam* and also in *tathā draṣṭavyam*, there is expressed only one thought (lit. thing) conveyed repeatedly—this is thanks to the force (in the tenor of the statements). [1616]

Sureśvara now states how he understands the words *tato 'nyad vibhaktam*.

अस्मत्पक्षे तु दोषोऽत्र मनागपि न विद्यते ।
द्रष्टव्यो दृष्टियोग्योऽर्थो ह्यन्योऽनन्यश्च युज्यते ॥१६१७॥

In our view, however, there is not even a little of a fault; for, the object to be seen, viz. that which is worthy to be seen is (there) reasonably explained (lit. connected) as 'other' and 'non-other' (than the seer). [1617]

परमार्थात्मनस्तद्वत्कल्पिताज्ञानलक्षणः ।
अविभक्तोऽपि चान्यः स्याद्वैलक्षण्यात्परस्परम् ॥१६१८॥

So also (*tadvat*) the other (thing, i.e. object to be seen), though (in reality) non-distinct from the highest reality, i.e. the Ātman, has the nature (of the product)¹ of ignorance and therefore only what is imagined; (this is so, i.e.) they are mutually distinct on account of (so-called) distinct characteristics (or, natures). [1618]

¹This explains the meaning of the word *anya*.

धर्मादीनां विभक्तत्वमविभक्तेऽपि धर्मिणि ।
एवं न पुनरुक्तत्वं द्रष्टव्यादेः प्रसज्यते ॥१६१९॥

Thus it is held that in respect of (what is held to be) a thing having (some/certain) properties and which is (in reality) non-distinct (from them), there are properties etc. and that they have a distinction (from that). In this way (i.e. by accepting our view) there does not follow the contingency of repetition in the words (expressive of the) objects to be seen. [1619]

This explains the idea of *vibhakta*.

साक्ष्यार्थो दृष्टियोग्यः स्यादन्यो मात्रादिरात्मनः ।

द्रष्टृदर्शनदृश्यार्था विभक्ताः स्युः परस्परम् ॥१६२०॥

The meaning (lit. object) conveyed by the word *sākṣin* is one that is capable of seeing and the other (viz. what is to be seen) is the means of knowing etc.¹ Thus the various objects (of the words), i.e. the seer, the act of seeing and the object of seeing) are distinguished from one another. [1620]

¹This refers to *pramāṇa*, *prameya* and *pramā* (of the *pramātr*).

द्वैताद्वैतात्मकत्वं च प्रमाणान्नोपपद्यते ।

यथेह वस्तुनः साक्षात्तथा पूर्वमवादिषम् ॥१६२१॥

And as to how, here (i.e. in this Śāstra), the nature of what consists in dual and (at the same time) non-dual in respect of the (real) thing does not expressedly (*sākṣāt*) become justified by any means of knowing, have I already stated. [1621]

पूर्ववाक्ये यथा व्याख्या कृता कृत्स्ना तथैव सा ।

उत्तरेष्वपि वाक्येषु कर्तव्या पण्डितैरतः ॥१६२२॥

Therefore, hereafter,¹ the explanation, which has been given (by me) in respect of the earlier sentence,² should, the whole of it, be followed by learned men in respect of the subsequent sentences also. [1622]

Sureśvara has completed the discussion on the explanation of *vijñāya* etc. as given by Bhartṛprapañca and turns now to his own explanation referring to that on the sentence *yad vai tan na paśyan* ... as what needs to be extended to the subsequent sentences of the Śruti.

¹We have taken *ataḥ*, which occurs at the end of the verse, to stand at the beginning and understood it to have a double sense, i.e. *tasmāt hetoḥ* and *itaḥ uttarām*. In this regard, NKL does not offer any help. However, SP understands *ataḥ* to be

in the right place, i.e. at the end, and adds after *ataḥ vyākhyāprakārasāmyād arthaviśeṣo vācya nāsti*.

²That is with reference to *yad vai tan na paśyati*.

दर्शनादिक्रियाणां यदस्तित्वं तन्न वास्तवम् ।

सदसत्त्वादिसंभेदशून्यत्वादात्मवस्तुनः ॥१६२३॥

What is taken as (the actual occurrence of) activities such as seeing is not a matter of reality, since the thing, i.e. the Ātman, is devoid of being any mixture/combination (*sambheda*) of what is existent and what is non-existent. [1623]

This is to assert that, in all the relevant statements of the Śruti, there is reference to only the single sentient Ātman.

विदितादन्यदेवैतत्तथैवाविदितादधि ।

ब्रह्मात्मवस्त्विति ज्ञेयमिति श्रौतं वचः स्फुटम् ॥१६२४॥

There is a clear statement of the Śruti, i.e. 'This thing called the Brahman, the (real) thing is other than (object(s), viz.) what is (taken as) known;' ¹ so also 'from what has been not known'. [1624]

¹Cf. *Kenopaniṣad* 1.4; cp. *Īsopaniṣad* 10 and 13.

द्रष्टुरिति तृजन्तेन कर्तृत्वमभिधीयते ।

द्रष्टा कस्येत्यपेक्षायां दृष्टेरित्यभिधीयते ॥१६२५॥

There is stated here agentship of an activity (in the case of the Ātman) by the word *draṣṭr*, (in its inflexional form *draṣṭuḥ*) (which is) a stem ending in the suffix *-trc* and in answering the query, 'of what?', is stated the word *drṣṭi* (in the genitive form *drṣṭeḥ*). [1625]

This is the opinion of Bhartṛprapañca, possibly his wording *vas kasya draṣṭā drṣṭeḥ (iti bhāṣyārtham āha)*— SP.

Now is stated what Sureśvara accepts as the meaning of the word *dr̥ṣṭi*.

दृष्टिरित्यपि भावः स्यात्समाप्तिर्या क्रियात्मनः ।
फलाश्रितोऽसौ भावोऽत्र दृष्टिशब्देन भण्यते ॥१६२६॥

Also, in the word *dr̥ṣṭiḥ* is expressed some becoming, viz. that which is accomplished (i.e. effected) by what is of the nature of an activity; thus it is a becoming based on some result¹ and is mentioned here by the word *dr̥ṣṭi*. [1626]

¹SP adds: *dr̥ṣṭir iti bhāvaḥ kriyāsamāptiyarthāḥ phalāśrito nir̥diśyate*.

फलं प्रकाशनं ज्ञानं तत्कर्तृत्वं च वस्तुनः ।
प्रत्येकमुच्यतेऽत्रैतद्वाक्येष्वेतेषु वस्तुनः ॥१६२७॥

The word result means revealing (something which is here), i.e. knowledge; and the agency in respect of that (viz. the revealing) which belongs to the (real) thing (viz. the Ātman); here in each one of these sentences is mentioned this (viz. the agency). [1627]

SP adds: *tad āhus tad etat prakāśanam ca jñānakartṛtvam ceti dharmadvayam pratyekam upadiśyata iti*— possibly a remark of Bhartṛprapañca.

इह यद्दूषणं वाच्यं तदुक्तमिति नोच्यते ।
कारकादेरसद्भावात्सुषुप्ते परमार्थतः ॥१६२८॥

What is to be pointed out (lit. to be said) here (i.e. in respect of this argument), viz. the faultiness is (already) stated¹ for the reason that there is absence of the *kāraka* etc. in the state of deep sleep, in its real sense. [1628]

¹That is, because it is refuted in the fifth (i.e. the third) Ahdyāya.

कारकादिविधर्मापि प्रत्यगज्ञानहेतुजैः ।
ग्राहकग्रहणग्राह्यरूपैरात्मैक्ष्यते तथा ॥१६२९॥

So also there is seen (in the deep sleep state) the Ātman, even if it differs in (regard to) properties, from the *kāra*kas (as characterized) by (such) forms as the one who grasps, the grasping and the (object) to be grasped which have originated from ignorance about (the nature of) the inner self.

[1629]

कर्तृकार्यावभासित्वात्कर्तृकार्यादिसाक्ष्ययम् ।
कर्तृकार्यादिवद्भाति कूटस्थोऽप्यात्ममोहतः ॥१६३०॥

This one is the witness of the agent and its activity (or, activities) because it has the nature (or, capacity) of illuminating/revealing the agent and its activity (or, activities); (thus) the immutable Ātman, through its delusion about itself, appears to be the agent and its activity (or, activities) etc.

[1630]

एकैवेयमतो दृष्टिर्जन्महानादिवर्जिता ।
बहुत्वजन्मनाशादि यात्यविद्योत्थसंगतेः ॥१६३१॥

Therefore, this *dr̥ṣṭi* is but one (viz. unique) and without (i.e. unaffected by) birth, loss etc.¹ and (yet) it comes to be (*yāti*) having multiplicity, birth, destruction etc., owing to its connection with ignorance.

[1631]

This points to the identity of *dr̥ṣṭi* and *draṣṭṛ*; cf. SP: *sā pratyagbhūtā kūṭasthaikarasety arthaḥ*.

¹This perhaps refers to six modifications. Cf. verse 343 above.

Now follows the discussion on BU 4.3.25.

यत्र रसयतीत्यत्र विजानन्वा इतीर्यते ।

विरूपं प्रस्तुताद्रूपादन्याय्यं भण्यते कुतः ॥१६३२॥

It¹ is read (in the text of the Mādhyandina recension) *yan na rasayati ... vijānan vai*, viz. that which is an irregular reading and different from what should be the proper reading; why should the unreasonable be read (lit. said)? [1632]

Here, Sureśvara questions the propriety in the reading of the Mādhyandina recension. Yet he offers some justified meaning of it in the next verse though he dubs it as unreasonable.

¹It reads *yad vai tan na rasayate vijānan vai tan na rasayati* (as reported by SP, but, in the text printed by Limaye and Vadekar, it reads *vijānan vai tad rasam (na paśyati)*! (Also, incidentally, the two scholars report *na hi rasatyitū rasāt* instead of the text in the Kāṇva recension).

नैष दोषोऽत्र विज्ञप्तिमात्ररूपे परात्मनि ।

दृष्ट्यादिशक्तिभेदोऽयं मा प्रसाङ्क्षीदित्तीर्यते ॥१६३३॥

There is not (altogether) any fault here: It is said here (i.e. in that recension) 'Let this division into discrete objects such as the powers/capacities of seeing etc. not contingently come from (i.e. cling to) the highest Ātman which is merely knowledge in its form'. [1633]

यत एवमतो ज्ञप्तिमात्रमेवाभिधीयते ।

दृष्ट्यादिशब्दैस्तस्माच्च सलिलादिवचोऽर्थवत् ॥१६३४॥

Since this is so, therefore, there is expressed in the words *dr̥ṣṭi* etc. merely knowledge/understanding (about the nature of the Ātman) and thereby becomes meaningful the statement (that the Ātman is) like water etc. [1634]

बाह्यदृष्ट्याद्युपाधिस्था प्रत्यगात्मैकलक्षणा ।

दृष्टिर्दृष्ट्यादिवाच्येह विनाशादिनिषेधतः ॥१६३५॥

The (power of) seeing, which is expressed here by the words *dr̥ṣṭi* etc., is what is based on the limiting adjunct, viz. the external (object called) the eye; (and) which is, (all the same), having the nature of the inner self, because of the rejection of its perishing etc. [1635]

Now is given the meaning of *mananavijñānayoḥ* in the *Bhāṣya*.

अन्तर्भावेऽपि दृष्ट्यादौ मतिविज्ञानयोरिह ।
स्वातन्त्र्येणापि तद्वृत्तेः सिद्धेर्भूयः पृथग्ग्रहः ॥१६३६॥

Even if thought and specific knowledge are included in *dr̥ṣṭi* etc.; yet, owing to their freedom in (connection with) their activity, they are mentioned separately¹ for establishing them. [1636]

¹This is based on *yad vai tan na manute yad vai tan na vijñānāti*.

Sureśvara now begins to discuss *bhedābheda* in respect of *dr̥ṣṭi* etc.

दहनौष्ण्यादिवद्वहेर्विभिन्नाः स्युः परस्परम् ।
द्रष्टुर्दृष्ट्यादयो धर्मा भिन्नाभिन्नात्मना स्थिताः ॥१६३७॥
उतैकस्यैव धर्मस्य तदबोधोत्थभेदतः ।
भेदोऽयं लक्ष्यते मोहाद्रवेः स्वोत्थैर्जलैरिव ॥१६३८॥

The qualities of the seer, viz. *dr̥ṣṭi* and others, are different from one another like the power of burning and the heat abiding in fire—they remain (there in the seer) as different and non-different (from one another). [1637]

Or, this difference is noticed in one and the same quality, due to the non-knowing¹ about that (viz. the nature of the inner Ātman), as (different showers of waters, though coming

from (only one source, viz.) the sun.²

[1638]

¹Read SP: *ātmanah sarvādhiṣṭhānatvāt tasmin dharmasabdah.*

²Cf. *ādityāj jāyate vr̥ṣṭiḥ* (Mahābhārata 12.255.11).

इह व्याचक्षते केचिन्नानात्वैकत्वरूपता ।

स्वत एवात्मनो ग्राह्या चैतन्यमिव सर्वदा ॥१६३९॥

Here (or, in this respect), some say that the qualites of being many and also of being (just) one have to be taken as of (i.e. as belonging to) the Ātman in the same way as sentience, whichever (remains but one).

[1639]

भेदाभेदात्मकं सर्वं वस्तु दृष्टं यतस्ततः ।

परपक्षे न दृष्टान्तः कश्चिदप्युपलभ्यते ॥१६४०॥

Since every thing is seen as involving distinction and also non-distinction, therefore, there is not to be found any example of the other person's (i.e. our opponents, or Bhartṛprapañca's) view.

[1640]

एकैव गोता गोपिण्डे सास्नाद्यर्थानुसारिणी ।

सास्नादयो मिथो भिन्ना न चान्योन्यविरोधिनः ॥१६४१॥

There is just one cowness in the body of a cow, viz. that which is in accordance with the notion about the object as one that has dewlap etc.; but the dewlaps (in different cows) are mutually different (in different cows) and they are not mutually opposed.

[1641]

न च सामान्यबुद्धयेह भेदबुद्धिर्निवर्तते ।

नापि सामान्यधीबाधो विशेषोत्थधियेष्यते ॥१६४२॥

Further, the awareness of the discrete objects does not go away (i.e. get removed) by (having known) the generality (in them), nor also is there accepted the stultification of the

awareness of the generality by the knowledge which has arisen from the discreteness in the objects. [1642]

स्थूलेषु यद्वत्सामान्यविशेषात्मकता तथा ।
संभावनीया निःशेषसूक्ष्मवस्तुष्वपीदृशी ॥१६४३॥

As one accepts having the nature in the gross objects of both generality and particularity (in them); so does one have to accept that condition in relation to all of subtle things also. [1643]

Now there is exposition of the sentence yathā sthūleṣv ekatvaṃ nānātvaṃ ca ... in BUB.

नानात्वैकत्ववत्स्थूलं दृष्टं वस्तु यथा तथा ।
आत्माद्यतीन्द्रियं वस्तु वस्तुत्वादिति गम्यताम् ॥१६४४॥

As a gross object is accepted (lit. seen) to have in it both variety and unity, so should be accepted (lit. known) such things as the Ātman etc., which are beyond perception (by sense-organs as having them), since they have the nature of being the (real) thing (to be known). [1644]

इत्येवं पण्डितमन्या अनुमानबलादिह ।
भिन्नाभिन्नात्मकं वस्तु स्थापयन्त्यविशेषतः ॥१६४५॥

Thus do those, who consider themselves to be learned men, establish, on the support (lit. strength) of inference, that the things¹ in this world are both of the nature of having (mutual) difference and non-difference without any exception in them. [1645]

¹The plural is used in translation since there is intended reference to the various objects of the world.

Now follows the refutation of the view just stated.

इत्युक्तपरिफल्गुत्वप्रबोधायाभिधीयते ।

न्यायः श्रेयोऽर्थिनां मा भूद्भ्रान्तिर्वेदान्तवस्तुनि ॥१६४६॥

Therefore, for conveying the complete (*pari*) meaninglessness in (the view) which is (earlier) stated, there is reason given for ensuring that there should not be among them, who desire the good, any wrong notion about the reality (conveyed by) the Vedānta (texts). [1646]

भेदग्राहि न नो मानं कृत्स्नेऽपि जगतीक्ष्यते ।

वस्तुस्वरूपमुज्झित्वा मेयं नास्त्यपरं मितेः ॥१६४७॥

In the whole of the world there is not for us (i.e. in our opinion) any authoritative means of knowing differences (or, discrete objects) (and) there is not for correctly knowing (*miti*) any object of knowing other than the nature of the (real) thing (i.e. the Ātman). [1647]

There is now reference to the *nyāya* 'reason' which is intended for explanation as stated in the preceding verse. In this verse, it is the nature of reality as being some discrete object(s) which is under reference.

न च स्वरूपे भेदोऽस्ति कस्यचिद्वस्तुनः क्वचित् ।

स्वरूपाच्चान्यतो भेदः प्रमाणाभासगोचरः ॥१६४८॥

Also, there does not occur in anything, anywhere, difference in its (own) nature or that from any other object so that it can be apparent from/through the appearance of an authoritative means (of knowing). [1648]

There follows now the refutation of the distinction between generality and particularity

असाधारणरूपेण व्यावर्तन्ते परस्परम् ।

यथा विशेषाः सामान्यं तथा व्यावर्तते ततः ॥१६४९॥
 तेऽपि सामान्यमात्रं चेद्विशेषा भवतो मताः ।
 विशेषविरहात्तर्हि सामान्यमपि दुःस्थितम् ॥१६५०॥

As particulars exclude (i.e. differ from) one another by each (of them) having its own specific form, so also does generality exclude (i.e. differ from) them (viz. particular forms) [1649] and if the particulars also are held by you (to exclude) only generality; then, owing to the absence of (any) particularity, generality also is in bad state. [1650]

In verses 1651-1654, Sureśvara discards the notion of difference in non-difference in the case of generality and particularity.

भिन्नं वा स्यान्न वा भिन्नं सामान्यं चेद्विशेषतः ।
 भेदे विशेष एव स्यात्सामान्यं खण्डमुण्डवत् ॥१६५१॥

Generality could be either different or non-different from particularity; if generality were different from particularity, there would be some particularity in it, as Khaṇḍa and Muṇḍa. [1651]

भेदभेदवतोभित्तावनवस्था प्रसज्यते ।
 धर्मधर्म्यप्रसिद्धिश्च तदभेदेऽपि सज्यते ॥१६५२॥

And there would contingently result *infinite regress* in case difference and what is possessed of that difference were taken to be distinct (from each other) and, in the case of non-distinction (between them), a *dharma* 'quality' and a *dharmin* 'what is possessed of that quality' would not become known (lit. established). [1652]

आत्मैव चेद्विशेषाः स्युर्धर्मिणो धर्मलक्षणाः ।
 व्यतिरेको न संसिध्येदात्मत्वं स्यात्तदात्मनः ॥१६५३॥

If it were that the Ātman itself were the particulars; that is, if the particulars were the *dharma*s of the Ātman, the *dharmin*,

then there would not be established any difference (between them); for, that would mean: the Ātman is ever itself.¹ [1653]

¹This is further elucidated in the following verses.

स्वयंरूपत्वतो नात्मा ह्यात्मनो व्यतिरिच्यते ।
अनात्माभिजना ह्येषा व्यावृत्तिर्यात्मनो भवेत् ॥१६५४॥

Indeed the Ātman could not be taken as being apart from itself, for (those particulars would be) only the form(s) of itself. Indeed, this distinguishing of the Ātman would not be on account of (lit. not be produced by) the non-Ātman(s).

[1654]

Verses 1655-1661 purport to set aside such differences as draṣṭṛ and drṣṭi.

न च धर्म्यन्तरासत्त्वे प्रत्यगात्मातिरेकिणः ।
धर्मा लभन्त आत्मानं पारतन्त्र्यात्मकत्वतः ॥१६५५॥

Also, in the absence of any (thing) that would be possessed of those (particulars as its) *dharma*s, which is apart (i.e. distinct) from the inner self, the *dharma*s would not be existent (i.e. be coming into existence), since they are of the nature of being dependent on another (which would be possessed of them).

[1655]

धर्म्यन्तरस्य चास्तित्वे प्रतिज्ञार्थो न सिध्यति ।
समस्तव्यस्ततारूप आत्मैवैक इतीरितः ॥१६५६॥

Further, if there were (accepted the) existence of any other *dharmin*; then, the matter (as stated) in the proposition would not get established, since it is already stated (there) that there is only a single Ātman having a collective form and other particular forms also.

[1656]

व्यस्ता अपि तदात्मानो धर्माः स्युश्चेत्समस्तवत् ।
विशेष उच्यतां कोऽत्र समस्तव्यस्तरूपयोः ॥१६५७॥

(Under such circumstances—or, in that case) if the *dharma*s of the Ātman, though (existing as distinct) particulars (and yet) would appear as a collective form; then, let it be told, as to what distinction would there be in the particular forms (on one hand) and the collective form (on the other). [1657]

धर्म्यन्तराश्रितैर्धर्मैर्नान्यो धर्मो विशेष्यते ।
धर्मिधर्मत्वरूपस्य संबन्धस्यासमन्वयात् ॥१६५८॥

No other *dharmin* is qualified/specified by the *dharma*s which are based/resting in another *dharmin*, because (that being so) there cannot be any connection which is of the nature of a *dharmin* being possessed of the *dharma*s.¹ [1658]

¹SP explains this with the illustration that the properties residing in a pitcher cannot be said to belong to a cart.

नेति नेत्यादिवाक्यानां नैरर्थक्यं च सज्यते ।
समस्तव्यस्तरूपत्वं यदि स्याद्ब्रह्मणः श्रुतेः ॥१६५९॥

And (on accepting that view) that the Brahman has both a collected form and particular forms, there would arise as the contingent state, the meaninglessness of the statements (in the Śruti) such as *neti neti*. [1659]

व्युत्थाप्य ब्रह्मणो द्वैतं तदनूद्य श्रुतिः पुनः ।
आत्मैवेत्यब्रवीत्साक्षात्कुतो भेदस्य संभवः ॥१६६०॥

(Thus) having raised (*vyutthāpya*) the idea of the distinction (*dvaita*— of the world) from the Brahman and then repeated it again and again, the Śruti has clearly (*sākṣāt*) stated *ātmaiva*; how (then) could there be any possibility of (that) distinction?

व्यावर्ततेऽस्वरूपं चेत्स्वरूपाद्वस्तु मानतः ।

अनवाप्तस्वरूपं सद्वस्तु स्याच्छशशृङ्गवत् ॥१६६१॥

(Then) if something which does not have any form of its own is (shown/said) to be distinct from (what has a) form—then from that (so supposed) authoritative means of knowing there would (be said to be) existing a formless thing like the horn(s) of a hare.

[1661]

Sureśvara discusses in verses 1662-1664 whether difference (bheda) means absence of the (real) thing or, (real) distinction.

मानं विधिमुखं मुक्त्वा न व्यावृत्त्येकवर्त्मना ।

लभते मेयसंबन्धं तत्सद्वस्तूपलम्भतः ॥१६६२॥

An authoritative means of knowing does not get connected with the object of knowing by being stated as distinct (from that), except through an injunction, since there does obtain the existent (real thing).¹

[1662]

¹Read SP (which is useful): *nanu mānasiddho bhedo na yuktyāpahnnavam arhati. tatra kiṃ so 'nyonyābhāvaḥ kiṃ prthak-tvam ādye kiṃ mānam bhedaṃ eva grhṇāti kiṃ vā vastv api. nādyā ityāha mānam iti.*

अघटादिव्युदासेन न घटाद्यर्थसंगतिः ।

मितेरनेवंधर्मत्वान्नाभावे व्यापृतिर्मितेः ॥१६६३॥

There is not (or, cannot be) the connection of an object such as a pitcher with proper (i.e. right) knowledge (showing/stating its) distinction from what is not a pitcher etc. (Thus) : on account of such nature (of right knowledge), there cannot be (i.e. is not) any function (served by the means of knowing etc.) in the absence (of things).¹

[1663]

¹Read the last remark of SP: *na hi mānasvānvanisedhe*

vyāpāras tasya vastubodhitvaṃ vinā niṣedhabodhitvābhāvād ity arthah.

अप्रसिद्धघटाद्यर्थोऽघटाद्यर्थापनोदनम् ।

मानेनेह कथं कुर्यादन्योन्याश्रयकारणात् ॥१६६४॥

How can an object such as a pitcher, which is not known (lit. established as existent) remove such objects as are not a pitcher etc. by any authoritative means of knowing? (This is so) because they have (in that case) a mutual dependence.¹

[1664]

¹Read SP: *dharmyādijñāne sati bhedajñānaṃ tatas tajjñānam y anyonyāśrayān na vastudhīpūrvikā bhedadhūr ity arthah.*

Verses 1665-1667 point out a contingent difficulty, viz. mutual dependence.

घटबोधप्रयुक्तेयमघटस्य ह्यपाक्रिया ।

अघटार्थव्युदासाच्च घटार्थस्यावबोधनम् ॥१६६५॥

Indeed, this removal (of the knowing) of what is not a pitcher is caused by the knowing of a pitcher and (then) by the removal (of the notion) of what is not a pitcher does there occur the knowing (that there is) an object called pitcher. [1665]

घटवच्चाघटस्यापि तदन्यापाक्रियां विना ।

नैवाधिगतिरित्येवमनवस्था प्रसज्यते ॥१६६६॥

मातृमानाप्रसिद्धिश्च तदन्यापोहनादृते ।

ताभ्यां विना प्रमेयोऽर्थो नितरां न प्रसिध्यति ॥१६६७॥

As in the case of a pitcher, so in the case of what is not a pitcher also, there can be no knowing about it unless there is the removal of the notion of an other object than that (i.e. itself) and thus there will be contingent infinite regress.

[1666]

Moreover, the non-existence (lit. being non-established) of the knower and the means of knowing (or, act of knowing) can occur without the removal of what is other than the same. (So also) the object to be known cannot at all be established without those two. [1667]

For clearly understanding these two verses, read SP: *etena yugapad-ubhayagraho nirasto na hi dharmyādikāryam bheda-jñānam tena saha bhavati kāryakāraṇayoḥ paurvāparyaniyamāt.*

Verses 1668-1674 refute the theory that distinctions/differences consist in having a separateness (or, separate existence).

पृथक्त्वं चापृथक्त्वं च गुणो येषां च वादिनाम् ।
तत्प्रक्रियानुसारेणाप्यत्र नैवास्ति भेदधीः ॥१६६८॥

Also further, according to the procedure of those disputants, who hold separateness/difference and non-separateness/non-difference (each) as *guṇa*, there cannot be (or, is not) accepted the notion of distinction(s). [1668]

पृथग्गुणस्ततोऽन्येभ्यः पृथक्त्वे वा पृथग्गुणात् ।
अपृथग्वा मिथस्ते स्युर्न तथापि भिदेक्ष्यते ॥१६६९॥

An object having distinct property, if considered different from others due to the distinct property or (as mutually non-distinct, the distinction between between them is not (properly) grasped. [1669]

अपृथक्त्वगुणद्रव्यं पृथक्त्वं संश्रयेत्कथम् ।
परस्परविरोधित्वाच्छैत्यं यद्वद्विभावसुम् ॥१६७०॥

How can a substance, which has non-distinction as its property, become distinct (lit. come to have distinct)? (That cannot be) on account of their being in mutual opposition in the same

way as cold cannot (or does not) abide in the sun (or, better, as cold is opposed to the sun). [1670]

पारतन्त्र्यस्वभावाच्च न चाप्राप्तसमाश्रयः ।

गुणत्वं लभते लोके गुणः कश्चिद्गुणी यथा ॥१६७१॥

In the (or, this) world, a *guṇa* does not come to be a *guṇa*, in the same way as a *guṇin* 'one who is possessed of it' (cannot come to be that), since it has the nature of being dependent on another (i.e. having that as a substratum for itself), (and thus) it has not found (lit. got) any substratum. [1671]

NKL (ms. p.689) observes on this verse: *tasmān nirūpya-nāṇabhedasyāsamabhavād bhedadhīr bhrāntir ity arthaḥ*.

असंभित्तिः पृथक्त्वस्य ततोऽन्येभ्यः प्रसज्यते ।

पृथक्त्वस्य न चेदन्यत्पृथक्त्वान्तरमिष्यते ॥१६७२॥

For that reason of its non-distinction or separateness from others there contingently follows the absence of distinction(s) and there is not accepted any other separateness for (that) separateness. [1672]

अन्यापेक्षं पृथक्त्वं च स्वयमेवापृथग्घटः ।

बलीयानन्तरङ्गत्वाद्बहिरङ्गं प्रबाधते ॥१६७३॥

And, separateness is dependent on another (which is some substratum); but/and a pitcher is, by its very nature, not separate (from itself)—(thus) intrinsic (nature), being stronger, sets aside (or, precludes) extrinsic (nature). [1673]

Read in this context NKL (ms. p.689): *bhedaguṇāt dravyaṁ arma sāmānyam ca vyāvṛttam tvayocyate tasya dravyāder bhedaḥ vyāvṛttasya svābhāvikam rūpaṁ aprthaktveti svarūpatvenā-taraṇigatvād balīyān dharmatvena bahiraṅgam bhedaprābhedo ādhate ity arthaḥ*.

पृथग्गुणाच्च व्युत्थाप्य द्रव्यादेः किं स्वलक्षणम् ।
स्वतोऽपृथक्त्वात्सर्वस्य पृथक्त्वमपि दुर्लभम् ॥१६७४॥

What is the peculiar characteristic of a substance after having taken it away (i.e. disregarding) what has separateness. In the case of some thing which is itself not separate (from others) in quality/qualities, separateness (of it from) all (things) of different quality would be impossible to obtain. [1674]

Verses 1675-1677 refute separateness, on the strength of (or, in view of) experience.

अथानुभवतोऽस्तीति पृथक्त्वं भवतो मतम् ।
मैवं मिथ्यानुभूतित्वाच्छ्रुतकारजतादिवत् ॥१६७५॥

If, in your opinion, there is separateness (of something existing) on account of (an individual's) experience (of it); let this not be so (held), because that could have falsity of experience like in that of silver in a mother-of-pearl. [1675]

नैकानुभूतिबलतो वस्तुनो लभ्यते भिदा ।
भिन्नानुभूतितो नापि मिथस्तासामसंगतेः ॥१६७६॥

(Also) separateness of a thing cannot be found/known on the strength (of some one's) experience, and not also, (on the strength of) some other experience, because experience would be having non-connection between one another. [1676]

एकस्यामनुभूतौ चेद्वेदो नात्मन इष्यते ।
मृषा तत्रैव स मिथो व्यभिचाराद्ध्रुवं भवेत् ॥१६७७॥

If, in one experience, the distinction of the Ātman (from other objects) is not accepted, then there would be certainly falsehood in it owing to the mutual variance among them. [1677]

In verses 1678-1681, the notion of distinction resting on experience is rejected.

नानुभूतिः प्रतीचीयमभेदाद्वेदमीक्षते ।
स्वरूपाव्यतिरेकाच्च नापि चानात्मनीक्षते ॥१६७८॥

This subsequent (*pratīcī*) experience does not consider that difference (is possible) from non-difference, so also it does not see that (distinction) in a non-Ātman, since it has not changed its nature. [1678]

न चैकबुद्धिबाधेन द्वयादिधीरुपजायते ।
तत्कारणत्वात्तद्बुद्धेर्मृत्स्नेव घटजन्मनः ॥१६७९॥

Nor also does by the stultification of some knowledge (or, awareness) arise a knowledge (or, awareness) or more knowledges (or, awareness) (*dvyādidhī*) such as a second etc.; in the same way as there originates (the awareness of) a pitcher from softened clay, that being its (material) cause. [1679]

द्वित्रयादिबुद्धिरेकस्मिन्मिथ्यातद्रूपवस्तुनः ।
समूहस्योभयत्वेऽपि स्मृतेरप्यप्रमाणतः ॥१६८०॥

The second etc. knowledge (or, awareness(es)) in respect of (just) one object/thing would be (only) false, since that (or these) is not (or, are not) in conformity with the nature of that object/thing; also in case them together as an ensemble (of knowledges) would they be unauthoritative (i.e. invalid) means of knowing, being a memory (of those knowledges) also. [1680]

न चेत्समूहो वस्तुवस्ति एकैकत्वात्समूहिनाम् ।
सत्यत्वेऽपि तथैकत्वान्नानेकत्वं तथापि च ॥१६८१॥

If an ensemble of things cannot be a thing, while they belong to that one ensemble, then also, even if (they are all) real,

on account of there being the only one (ensemble), there are not many (different) things. [1681]

Verse 1682 is the concluding remark on the notion of distinction and non-distinction.

अद्वैतविषयैवेयं द्वौ त्रयश्चेति या मतिः ।
एकत्वात्समुदायस्य न प्रमातो भिदां प्रति ॥१६८२॥

Whatever be the awareness of two and three (and more) objects (i.e. things), it is not correct knowledge about/pertaining to distinction since there is but one (or, non-different/unique). [1682]

In verses 1683-1686, Sureśvara establishes as non-authoritative the distinctions brought forth to one.

यदि प्रत्यक्षगम्योऽर्थो व्यावृत्तेस्तत्पृथक्त्वतः ।
न प्रत्यक्षाभिसंबन्धः कुम्भप्रत्यक्षतो भवेत् ॥१६८३॥

If an object is directly perceptible on account of its distinction (from other things) it does not become related to the direct perception (of it), (as, for example,) on account of its being directly perceived as a pitcher. [1683]

प्रत्यक्षगम्यधर्मश्चेद्व्यावृत्तिर्भवतोच्यते ।
धर्मिप्रतीतिरेव स्यात्सापि चेहैककर्मिका ॥१६८४॥

If you say that (any) distinct property/characteristic (of a thing) is directly perceptible, then that would be only the apprehension/grasping a thing having the same as its property (or, properties) and also (in that grasping, there would be only) one object (grasped). [1684]

धर्मिबुद्धेर्न धर्मेषु बुद्धिभेदः प्रजायते ।
देशकालाद्यभिन्नत्वादेकात्मत्वाच्च संविदः ॥१६८५॥

From the grasping of (some) object(s), having (certain) property or proerties, there would not arise any distinct grasping (i.e. awareness); since the knowledge/awareness (of the object(s) and the properties) belongs to (or, has) but one (particular) time and place (of grasping the same), and that would be (only) one uniform awareness. [1685]

सत्तत्त्वं सर्वभावानां तत्र तावन्न भेदधीः ।
भेदधीविषयो यश्च तस्मात्सद्धीर्निवर्तते ॥१६८६॥

(So long as) the nature of all positive entities (continues to be existing), there would not arise any knowledge/awareness of (any) distinction; and the knowledge of an existent object keeps/is from (lit. turns from) the object of the knowledge of distinction. [1686]

Verses 1687-1692 affirm that the world of distinct objects has only the existent Ātman as its essential nature; therefore, there are not in existence any distinct objects.

सतैव सर्ववस्तुनि बिभ्रत्यात्मानमात्मना ।
कल्पितत्वादनेकत्वाद्वज्जुसर्पद्विचन्द्रवत् ॥१६८७॥

It is only the existent (Ātman) itself that covers/pervades all the objects; only because there is the nature (of the objects) of being imagined and of having multiplicity, like the serpent in a rope or two moons (in the place of one). [1687]

This refers to the well-known examples of *adhyāsa* cited by Śaṅkara in BSB (introductory).

प्रकृत्यर्थातिरेकेण प्रत्ययार्थो न गम्यते ।
सत्तेत्यत्र ततः स्वार्थस्तद्धितोऽत्र भवन्भवेत् ॥१६८८॥

(In language), the meaning of a suffix (in a word) is not

conveyed (or, understood) as distinct/separated from the crude form of the word; from that there follows its own meaning and therefrom would be derived its secondary form (of the same, if any). [1688]

सति व्यभिचरत्येव तदन्यद्वस्तु मोहजम् ।
सर्पादिवस्तुवत्तस्मात्सत्सत्यमितरन्मृषा ॥१६८९॥

Only when the existent is (i.e. seems to be) varying (from its true nature), then is there (perceived) another thing (which is) produced by delusion. Therefore (or, thus), the existent is truth and (any) other thing/object is false, like the objects serpent etc. (in a rope etc.). [1689]

व्युत्थिता हि सतो भेदाः प्रत्यक्षागमलिङ्गतः ।
अभावात्मकतां प्राप्ता गम्यन्ते नेश्वरैरपि ॥१६९०॥

Indeed (*hi*) the distinct objects have arisen from the existent, on account of (one's adopting) perception, verbal testimony and inference (lit. mark or sign) (as the means of knowing), being in their nature negative entities, are not grasped even by capable persons (*īśvara*). [1690]

सदेकत्वमशेषेषु वस्तुष्वव्यभिचारि हि ।
व्यभिचारि ततोऽन्यद्वस्तुवतोऽद्वैतमेव सत् ॥१६९१॥

The oneness (or, singleness) of the existent alone is, indeed, invariable (in nature) while all the external objects are variable (in nature). Therefore, anything else, viz. the absence of duality alone is the existent. [1691]

व्युत्थाय न सतो यस्माद्वस्तु संभावनामपि ।
अभावमपि नाप्नोति कास्था भूत्यै विनात्मना ॥१६९२॥

Since any thing, which has not originated from the existent, would not at all be even any (positive) and/or any negative

entity, what idea could be there of the origination (of objects) unless, there exists, the Ātman (as its supposed cause)? [1692]

Verses 1693-1696 affirm that the objects can be imagined only while the existent has been established as reality.

सत्सिद्धिमेव संभाव्य सिद्धाः स्मेत्यभिमन्वते ।
सर्वे भावाः स्रजा यद्वद्भोगी सिद्धायतेऽन्यतः ॥१६९३॥

Having well (*sam*) understood only the existent as established, the Siddhas think, 'We exist'. All entities/things (lit. those which become born) get established from the other (viz. the existent reality) in the way as a serpent (becomes an object of one's knowing only) through (knowing) a wreath of flowers. [1693]

प्रत्यक्षेणापि नाभावः क्वचिज्जगति मीयते ।
तस्य सद्बस्तुमेयत्वादभावस्याप्यसंभवात् ॥१६९४॥

Also, nowhere in the world is any negative entity grasped by means of direct perception, because that negative entity also cannot become a knowable on account of only the existent reality being the (one/single) knowable. [1694]

कामं घटाद्यभावोऽयं प्रत्यक्षादवसीयताम् ।
प्रत्यक्षाभावसंसिद्धौ किं प्रमाणमितीर्यताम् ॥१६९५॥

Granted that this absence of a pitcher etc. is grasped by means of direct perception; then, let it be told as to what could be the means for establishing the absence of direct perception. [1695]

कार्यरूपाभिधाभेदादतीतानागतेष्विव ।
ऐकात्म्यं सर्वभावानां भिन्ननामादिमत्स्वतः ॥१६९६॥

Owing to differences in effects, their forms and their names, as in the case of what has been of the past, what is of the

present and what will be there in future, there is but oneness of all those things/objects, though, by itself, it has different names.

[1696]

Verses 1697-1701 give blame to the view that a *dharma* and the *dharmin* are distinct (i.e. separately existing).

अथ ब्रवीषि भेदोऽत्र स्याद्द्वयोर्धर्मधर्मिणोः ।
व्यावृत्तेर्धर्मधर्मित्वं न तयोरुष्णशीतवत् ॥१६९७॥

Now, if you (were to) say, 'There is here a difference/distinction between the two, viz. a *dharma* and the *dharmin*', (then, it is to be observed) 'There is no relation of the two as a *dharma* and the *dharmin* owing to the mutual exclusion of (as having two different properties) as in the case of hot and cold. [1697]

न भावयोरसंभित्तेर्धर्मधर्मित्वमिष्यते ।
नितरामभावयोर्न स्यान्न विरुद्धाविरुद्धयोः ॥१६९८॥

It is not accepted that there can exist between two existential/positive entities the relation of *dharma* and *dharmin* owing to their very being entirely non-different. And certainly (that can never exist) between two non-existential/negative entities; and also between (entities) which are opposed and non-opposed (to each other). [1698]

निर्भेदकस्य कुम्भस्य भेदः केनेति भण्यताम् ।
वस्त्वात्मनैव चेत्तर्हि मत्पक्षः साध्यते त्वया ॥१६९९॥

Let it be told as to what causes a difference of a pitcher which does not distinguish itself (from the real thing)? If it be said that, owing to its having the nature of the (real) thing itself, (it becomes distinct from that), then it is (only) my view that is acceptable to you.¹ [1699]

¹ Namely, the distinction is just false. Read SP: *vasturūpena*

bheda pratiyogino vastutvād advayaṃ dharmimātraṃ vastu syān na ca dharmābhāve tasmīn dharmitvam.

वस्तुस्वरूपमुज्झित्वा नान्यत्र व्यापृतिर्मितेः ।
अस्ति यस्मादतोऽद्वैतं वस्तु वस्तुनि सर्वदा ॥१७००॥

Since there cannot be any function in relation to (the process of) knowing after/when the nature of a thing (to be known) is given up, therefore, there is always some non-dual (i.e. non-different) thing, in relation to the thing (viz. the Ātman).

[1700]

व्यावृत्तिरनुवृत्तिर्वा सर्वस्यैवास्य वस्तुनः ।
अद्वैतपक्षो भवता मदीयोऽयं प्रसाध्यते ॥१७०१॥

Be it that there is difference or non-difference of this one thing (i.e. the Ātman) from every other thing, (then, in any case,) you have established this (i.e. thus) just my view. [1701]

The thought in this verse is: There is no need of any refutation in the case that there is non-difference of the Ātman from another thing. And, if the diverse nature of them were accepted, there is acceptance of the other thing, viz. that they derived (only) from the Ātman, through (of course) ignorance.

Verses 1702-1704 affirm that non-duality is understood through the knowledge that it is distinct from any other.

व्यावृत्तोऽयमिति ज्ञानं किं कुम्भे किं ततोऽन्यतः ।
अव्यावृत्तस्वरूपत्वात्कुम्भे तावन्न धीरियम् ॥१७०२॥

Does this knowledge/awareness, viz. that this one (i.e. the Ātman) is distinct, occur when there is (a thing like) a pitcher or from elsewhere (i.e. in the presence of any other thing)? To state first (*tāvat*), this knowledge cannot occur in (the presence of) a pitcher because of its nature of not being

distinguished (from it).

[1702]

There is no need of an argument in relation to what is not an existential entity. In the case of a pitcher, however, it is experienced that the occurrence of knowing it on the part of one is only on account of its having the nature of the (real) thing, of its being non-distinct (from that real thing).

नाप्यकुम्भव्युदासेन कुम्भस्य स्याद्विशेषणम् ।
न ह्यम्भस्थेन शैत्येन शिखिनः स्याद्विशेषणम् ॥१७०३॥

Also, there cannot be any specification of a pitcher by setting it aside (i.e. stating that it is different) from a non-pitcher, indeed there could not be specification of fire by coolness which abides in (i.e. is a property of) water.

[1703]

अस्यायमिति षष्ठ्यर्थः प्रत्यक्षादवगम्यते ।
घटाभावः पटे किं न कुतो वास्य घटेऽस्तित्ता ॥१७०४॥

In the statement *asyāyam*, the meaning of the genitive (form) is understood by direct perception. (The question that arises therefore is:) 'Why is not the absence of a pitcher (noticed) in a piece of cloth or (rather), whence is there the presence of this (piece of cloth) in a pitcher?'

[1704]

In verses 1705 and 1706 is stated a negative entity, because of its non-existence, cannot be a property (or, qualifier) of an existent (say, a pitcher).

भावाभावौ सतो न स्तः सत्त्वादेवासतः कुतः ।
नानयोर्धर्मधर्मित्वं विरोधादितरेतरम् ॥१७०५॥

Birth and death cannot occur in the case of what is (ever) existent; then, how (could they occur) in the case of what is (ever) non-existent? As such, there cannot be the relation of *dharma* and *dharmin* between them, owing to their mutual

opposition.

[1705]

सर्वे भावाः स्वयं सन्तो व्यावृत्तिः किंसमाश्रया ।
निराकृता स्वयं सद्भिर्यथा वियति कृष्णिमा ॥१७०६॥

All existential entities being (ever) existent, in what would be based their difference? (And) that difference (thus) disproved by those existents, would be like the dark appearance of the sky.

[1706]

This verse affirms that there is only one existent and the world is but apparently existing.

नभोवत्सदिदं सर्वं तत्र यत्तत्सदात्मना ।
साध्यत्वं नान्यथा दृष्टमसतो यदि वा सतः ॥१७०७॥

All this existent is like the sky; therefore, all that which is sought to be proved of the existent or non-existent (world), could not be seen otherwise as of what has the nature of the (ever) existent or it there were any non-existent.

[1707]

Verses 1708-1710 establish non-duality in relation to the negative entities.

वस्त्वन्तराच्चेद्व्यावृत्तिरिष्यते ह्यन्यवस्तुनः ।
वस्तुत्वात्सास्त्वभावस्य वस्तु नो चेत्कुतो भिदा ॥१७०८॥

If difference of one thing from another is accepted (lit. wished); then, on account of their being the (ever) existent thing, that could be of what is not the (ever) existent. Where is there difference for us of that which is not an existential entity?

[1708]

घटो भावात्मनाप्नोति त्वत्साध्यं चेदशेषतः ।
घटीभूतमिदं सर्वं द्वैतं ते किंप्रमं मतम् ॥१७०९॥

If a pitcher, being of the nature of an existential entity, can, in its wholeness attain (i.e. have) the nature of what you seek to establish, then on what is dependent your knowledge of duality, viz. all this is but the pitcher? [1709]

The argument is: in the absence of any dependable means, the opponent's opinion becomes untenable.

बोधकं यत्प्रमेयस्य तत्प्रमाणमिहेष्यते ।
न च प्रमाणनास्तित्वमीदृक्तस्मान्न युज्यते ॥१७१०॥

They accept that as the means of knowing (the objects to be known) if (i.e. which) is informative of what is to be known. Therefore, the absence of the means (such as you have posited in your argument above) is not reasonable. [1710]

Verses 1711-1716 affirm the absence of the means of knowing as also of the object of it.

मेयाभावः प्रमाणानां यद्यभावेन गम्यते ।
प्रमाणानामभावस्य गमकः को भविष्यति ॥१७११॥

If the absence of the object of knowing is conveyed by the absence of any means of knowing, then what would be the conveyor of the absence of the means (themselves)? [1711]

एकप्रत्ययनिर्ग्राह्यमेकं वस्तिवति भण्यते ।
प्रत्यभिज्ञाबलाद्वापि नाभावेऽस्त्युभयं हि तत् ॥१७१२॥

Or alternatively, owing to the support (lit. strength) of recognition, when it is said that the (real) thing is (just) one and it is knowable through (just) one experience, then (it is) not (so) in the case of a non-existent—(for) that (thing) would not be both. [1712]

दर्शनस्पर्शनाभ्यां स्याद्यथैकार्थग्रहस्तथा ।

प्रत्यक्षाभावमानाभ्यां नानुभूतिरिहास्ति नः ॥१७१३॥

In this matter (of knowing the Ātman), there is not for us an experience by the two means, viz. direct perception and the absence of cognition, as there could be (secured) the grasping of a thing by seeing and touching (it). [1713]

न प्रमाणं प्रमेयं वा तदभावविशेषणम् ।

तदा द्वयोरसंसिद्धेर्विरोधाच्चाप्यसंगतिः ॥१७१४॥

Neither the means (of knowing) nor the object (of knowing) is qualified by its non-existence; for, the two would then be non-established and that, through their mutual opposition, they would not have any connection (with knowing). [1714]

यद्यसन्नपि धर्मः स्यान्नैपुण्याद्भवतः क्वचित् ।

नभो मूर्तं घटोऽमूर्तो विश्रब्धैः किं न साध्यते ॥१७१५॥

If a non-existent could be a *dharma* (of some *dharmin*) somewhere, then why is it not proved by the learned (*viśrabdha*) that the sky is perceptible and a pitcher, imperceptible? [1715]

Read in this context SP: *asamakālayor api viśeṣaṇaviśeṣyatve rvam api susādhyam syād ity arthah.*

न भावयोरभिन्नत्वाद्धर्मधर्मित्वमिष्यते ।

नितरामभावयोर्न स्याद्दूरतो भावाभावयोः ॥१७१६॥

(Further) two different things (as identical with the Ātman) being non-different, there would not obtain (or, not be acceptable) the relation of *dharma* and *dharmin*; (and) that (relation) would not at all be possible of two non-existents as also of one existent and the other non-existent. [1716]

verses 1717-1720 refute (the notion of) distinction/differences.

नात्मना वस्तुनो भेदो भेदस्यान्यव्यपाश्रयात् ।

अन्यदीयोऽपि नान्यस्य भेदः स्यात्कल्पनां विना ॥१७१७॥

(Nor) is there difference of a thing from the Ātman while the difference is based on another (thing); nor also could there be the difference of the other with yet another, unless there is merely a notion (of the same).¹ [1717]

¹That is, unless it is imaginary (*kalpita*).

स्वतोऽभिन्नस्वभावत्वान्न भेदोऽन्योऽन्यसंश्रयः ।

उभयोरप्यसंभेदः कथं भिन्द्याद्विरोधिनम् ॥१७१८॥

(Again) not being different from itself, that difference (viz. a discrete object) there would not be (any) difference (since the other is dependent on (their being) the other. How then could the want of combination (i.e. connection) of the two distinguish what is opposed (to them in nature)? [1718]

विशेषणप्रभेदेऽपि विशेष्योऽर्थो न भिद्यते ।

शुक्लकृष्णादिभेदेऽपि गोपिण्डो न हि भिद्यते ॥१७१९॥

When (again) the qualifiers are different, the qualified does not become different (in connection with each); for, even when there is difference of colour as white and black in a cow's body, the body does not become different (i.e. two different bodies). [1719]

विशेषणं विशेष्याच्चेद्विशेष्यान्तरवत्पृथक् ।

भिन्नत्वात्संगतिर्न स्याद्विशेषणविशेष्ययोः ॥१७२०॥

(Also) if a qualifier would be distinct from what is qualified, just like another qualified object (is distinct); then there would not be any connection between the qualifier and the qualified.

[1720]

verses 1721-1725 state about the grasping of *viśeṣaṇa* and *viśeṣa* arising from various acts.

नैकधीगम्यता च स्याज्ज्ञानस्यायुगपज्जनेः ।
युगपन्न हि विज्ञानं जायते घटमेषयोः ॥१७२१॥

Nor also could there be (in the case of the two) the state of being known at (just) one (moment of) knowing, (even) while they come into being simultaneously; for, indeed, there does not occur a simultaneous specific knowledge of a pitcher and a lamb.

[1721]

प्रागेवानात्मसंबन्धादुत्पत्तावेव लब्धतः ।
प्रत्यग्वस्तुप्रमेयस्य तावतैव कृतार्थतः ॥१७२२॥
प्रमाणस्य ततोऽन्यस्मिन्न तन्मानत्वमर्हति ।
विरोधिव्यभिचारित्वात्तदन्यस्य च वस्तुनः ॥१७२३॥

Owing to the connection with the non-Ātman (which obtains) even already (*prāgeva*) and owing to its becoming manifest¹ (i.e. to its appearance in a person's dealings) as the object to be known, (viz. the inner self) and thereby being useful,²

[1722]

the means of knowing³ cannot attain the status of a (proper) means of knowing with respect to the other (viz. the inner self or the Ātman), since, that (known thing) which is different from the (real) thing (i.e. the Ātman) has the nature of being opposed to it and of having a variable (i.e. non-constant-impermanent) existence.⁴

[1723]

¹ Sureśvara appears to use the word *labdhataḥ* as equal in use to *labdhatvataḥ*.

² Similarly, *kṛtārthataḥ* is the same as *kṛtārthatvataḥ*.

³ This refers to *pramāṇa* in worldly dealings.

⁴ That is, being what is only imaginary or false, it does not last at all times.

सर्वं मिथोऽनपेक्षं सत्स्वात्ममात्रविवक्षया ।
प्रत्यग्रूपात्परं रूपं न वस्तुत्प्रेक्ष्यते मितेः ॥१७२४॥

All objects (of worldly life), which are independent of one another, are but the (ever) existent (Ātman); that they appear to be in existence has to convey only (the existence of) the Ātman. (Thus) from (what is properly called) knowing (*miti*) does not become known from any other thing than the inner self. [1724]

यद्वस्तु स्वात्मनैवास्ति तत्परार्थं न बोधवत् ।
पारार्थ्येनैव सद्यच्च तत्परस्माद्विरुद्धं सत् ॥१७२५॥

That thing, which is (said to be) in existence on its own account,¹ exists only for (serving) the purpose of another; it does not consist in knowledge: Being for the sake of another and, at the same time, the (constantly) existent, the thing is not the (real) existent—it is far away from the highest (Ātman). [1725]

¹This indicates the false nature of it.

In verses 1726 and 1727 is affirmed that all that is accepted as the knower etc. is but the Ātman.

असाधारणरूपत्वात्प्रत्यक्चिन्मात्रवस्तुनः ।
तत्तत्त्वानुविधाय्येव प्रमात्रादिर्भवन्भवेत् ॥१७२६॥

Because the inner self, which is only the sentient thing, has an uncommon form, the knower etc. (in all the worldly dealings), while existing, would merely be presenting the truth in that (*viz.* the inner self). [1726]

The final remark in SP is meaningful, *viz.* *ātmanātratā jagato yuktā.*

द्रष्टव्याद्यनुसारिण्या प्रत्यङ्मोहप्रसूतितः ।

दृष्ट्या विरुद्धदिक्स्थस्य प्रतीचो दर्शनं कुतः ॥१७२७॥

The (power of) seeing,¹ which merely follows the nature of an object of seeing and has its origin in delusion about the inner self—how can it have the sight of the inner self which exists in exactly the opposite direction?² [1727]

¹This refers to the worldly seeing, that is a product of ignorance.

²That is, which does not fall within the purview of worldly seeing.

In verses 1728-1733, it is stated that *Ātmajñāna* is not like the knowledge of (worldly) objects.

श्रुतिमानार्पितं चैतन्नावज्ञेयं विपरिचिता ।

पराञ्चीति तथा शास्त्रं न दृष्टेरिति च स्फुटम् ॥१७२८॥

विदिताविदिताभ्यां नो व्युत्थाप्य ब्रह्म चाब्रवीत् ।

नातो वस्त्वन्तरं ज्ञेयं तदन्यस्य निषेधतः ॥१७२९॥

And, therefore, this (real thing), which is presented by the means called the Śruti, should not be disregarded by a wise person. So also the scriptural passage *parāñci khāni ...*¹ and also the clear (words) *na dr̥ṣṭeḥ....*² [1728]

So the Śruti has taken us away from all the known and unknown objects (of the world)³ and declared to us by rejecting the existence of every (other) object⁴ that there is no other thing to be known. [1729]

¹Cf. *Kāthopaniṣad* 4.1.

²BU 3.4.2.

³Cf. *Kenopaniṣad* 1.4.

⁴Cf. *neti neti* (BU 2.3.6; 3.9.26; 4.4.22; 4.5.15).

मनुते मनसा यत्र येनाहुस्तन्मनो मतम् ।

ब्रह्म विद्धि तदेव त्वं न त्विदं यदुपासते ॥१७३०॥
 यतो वाचो निवर्तन्ते नेति नेतीति चापरम् ।
 इति स्पष्टं वचो मानं कुतो हेतोरुपेक्ष्यते ॥१७३१॥

(Also as “that) which does not consider with *manas*,” “that on account of which is the *manas* known (as existing);”¹ “know that alone as the Brahman” and (*tu*) “not that which they (generally) meditate on”.² [1730]

“(That) from which all speech recedes”³ and further, “not this, not this, ...”—all this statement⁴ is the clear means of knowing (the Brahman); (then), for what reason is it neglected? [1731]

¹Cf. *Kenopaniṣad* 1.6.

²Cf. *Kenopaniṣad* 1.9.

³Cf. *Taittirīyopaniṣad* 2.4 and 9.

⁴This is for statements— *samūha ekavacanam*.

द्रष्टुः प्रतीचि यत्साक्षात्प्रत्यग्दृष्ट्यावसीयते ।
 दृष्ट्यादिजन्मनाशादिसाक्ष्यभेदात्मकं स्वतः ॥१७३२॥

That, which is directly perceived by a seer's (power of) seeing in the inner self, is, by its very nature, of the nature of the non-differentiated witness of the origin and perishing etc. of the (power of) seeing etc. [1732]

SP points out that this verse intends to reject the view of the Mādhyamika Buddhists who would understand from *neti neti* etc. that there is only *śūnya*.

तदेतदिति मानेन तत्त्वमस्यादिना तथा ।
 ब्रह्मेति बोध्यते साक्षात्तत्त्वमोहवस्तिवर्त्मना ॥१७३३॥

With the authoritative means in the statement *tad etat ...*¹ and also by *tat tvam asi*² is the Brahman made known directly and by a way of (effecting) the destruction of ignorance. [1733]

¹Cf. BU 1.4.7; CU 3.18.2.

²CU 6.8.7ff.

Verses 1736-1740 state that the Brahman is known to be the inner self, a non-object of any act of seeing.

ब्रह्मात्मात्मानमेवावेदहं ब्रह्मेति च श्रुतेः ।
प्रत्यग्दृष्टयैव तद्ब्रह्म दृश्यते न पराङ्मया ॥१७३४॥

In the Śruti passages: "the Brahman is the Ātman,"¹ it knew the Ātman (as) "I am the Brahman,"² is the Brahman seen with the knowledge (*dr̥ṣṭi*) that it is the inner self (but/and) not with the notion that it is outside (one's body). [1734]

¹Cf. BU 4.4.25.

²Cf. BU 1.4.10.

घटोऽत्रास्तीति वाक्येऽस्मिन्को न्वर्थः संप्रतीयते ।
मेयोऽनधिगतस्तावत्स्वानुभूत्यैकसिद्धिकः ॥१७३५॥

What indeed is the meaning understood from the sentence, "There is a pitcher here"? The object to be known is the one which is established only by one's own experience¹ (in the worldly sense). [1735]

¹That is, as only an object of one's experience—not the knower himself as the Ātman.

मात्रादिजन्मनः प्राक्च नानुभूत्यतिरेकतः ।
द्रष्टृदर्शनदृश्यादिवस्त्वन्यदवसीयते ॥१७३६॥

And, even before the origin of some knowledge etc., it does not exist merely as different from experience; it is (therefore) concluded that the (real) thing (i.e. the Ātman) is other than the things, viz. the seer, its seeing and the object of its seeing.

[1736]

मातृमानप्रमेयादेरन्योन्यव्यभिचारतः ।

अनन्यानुभवात्प्रत्यक्संविदव्यभिचारिणी ॥१७३७॥

The things, viz. the knower, the means of (its) knowing and the object to be known (by it), have only variable appearances; as against this, the knower (*saṁvid*), which is (non-distinct from) the inner self, is always present owing to its being an experience of no other thing. [1737]

संविदो व्यतिरेकेण वस्तु यद्यत्प्रसाध्यते ।

रज्जुसर्पादिवत्तत्तन्नैति संभावनामपि ॥१७३८॥

Whatever thing is established as existing apart from the knower (*saṁvid*) would not become thinkable like the serpent (which appears) in a rope etc. [1738]

संविद्देशादिभेदेन वस्तु चेत्साध्यतेऽन्यतः ।

घटो नास्तीति चान्यद्वा संगतिर्नानयोर्मितेः ॥१७३९॥

If the (real) thing is established to be different from the knower (*saṁvid*) in respect of the place (of its occurrence) etc., then there cannot be (established) through the process of knowing any connection between these two, (as through knowing) this is not a pitcher or not any other (object). [1739]

This is in support of the illustration of a serpent in the place of a rope which is stated in the preceding verse.

उपलब्धोऽस्ति सन्कुम्भो लम्बोष्ठो देशकालवान् ।

पूर्वपूर्वातिरेकेण नोत्तरोऽर्थोऽनुभूयते ॥१७४०॥

An existing pitcher is obtained (or, seen) to have a wide brink, a place (to occupy) and a time (of/for its existence), but every latter of these particulars of it does not become known gradually (i.e. one after another). [1740]

In verses 1741-1744, it is stated that the knower (*saṁvid*) is the basis/support of all notions.

कर्त्रादिव्यापृतेः पूर्वं संवित्संवित्तिमात्रतः ।
अविभागादनाख्येयं तदुद्धृत्या फलायते ॥१७४१॥

Since knowledge (*saṁvitti*) remains only in the form of the knowing (one) (*saṁvid*), before (even) the operation/function of the agent etc., it is indescribable as it has no differentiation (in it) and (it) comes to be the result when there arises that (operation of the agent etc.). [1741]

अक्रियेऽपि यथा व्योम्नि ह्युद्धृतिस्थितिहानिभिः ।
जगन्नर्त्ति मय्येवं कार्यकारणवस्त्वदम् ॥१७४२॥

As the world dances (i.e. appears) in the sky (the void) again and again having its origination, sustenance and perishing, so (does) this thing comprising effect(s) and cause(s) (dances) in me.¹ [1742]

¹Sureśvara uses a form of the first personal pronoun for the Ātman; thus *mayi* is for *asmin* or *ātmani*, i.e. in the/this Ātman.

नञ्घटार्थावपह्नुत्य संवित्सद्रूपमात्रया ।
अवगत्यात्मना सत्त्वमवाक्यार्थत्वमश्नुते ॥१७४३॥

Having concealed the (meaning of the negative particle) *nañ* and (the object viz.) a pitcher, the knower attains the nature of the existent, (though) that is not the meaning of the sentence, by merely being of (i.e. assuming) the form of the existent, that is, by transforming itself as knowledge (on the part of it). [1743]

दिग्विभागोऽविभागेऽपि व्योम्नि यद्वत्प्रकल्पितः ।

प्रध्वस्ताशेषभेदेऽपि मयि भिन्नधियस्तथा ॥१७४४॥

As, even in the absence of (any) division, (the division into quarters there is imagined to be existing in the sky), so (are) various (lit. different) notions (imagined) in me¹ (who am one) with all of the differences (consisting in discrete objects) completely (*pra*) destroyed. [1744]

¹Refer to note 1 on verse 1742 above.

In verses 1745 and 1746, there is an illustration for showing that a living being, (who knows the nature of the Brahman) knows the world in its full extent.

स्वप्नेभबुद्धिर्नष्टेऽपि स्वप्न आभाति जागरे ।
यथैवं मोहजं द्वैतं नष्टे मोहेऽपि सांप्रतम् ॥१७४५॥

As the awareness of an elephant (seen) in the dream state appears (i.e. continues to be) in the waking state, even though the dream state has come to an end; so does this (awareness of) duality, born (i.e. produced) out of delusion (appears to be of) now, i.e. even when delusion has ended. [1745]

आगमादन्यतो मानाद्विन्नाभिन्नत्वमात्मनः ।
यथोक्तेन प्रकारेण न मनागपि गम्यते ॥१७४६॥

(Thus) not even a little of distinct (i.e. discrete) objects and (yet) non-different from the Ātman is understood with the help of Veda (*āgama*) or any other means of knowing, as (lit. in the manner) stated above. [1746]

In verses 1747 and 1748 is stated a doubt that the scriptures convey the idea of all things as being distinct while they are non-distinct also.

मानान्तराच्च यत्प्राप्तं मानत्वं तत्र च श्रुतेः ।

न कथं चन संभाव्यमनुवादत्वकारणात् ॥१७४७॥

And, in respect of what is already known from other means of knowing, the Śruti has in no way (*na katham cana*) to be honoured as an authoritative means of knowing, on account of its being (only) a restatement (of what is already known).

[1747]

प्रमान्तरानधिगते मानानां मानतेष्यते ।

अग्निर्हिमस्य भेषजमिति चातोऽन्यथा भवेत् ॥१७४८॥

(For, here) (some) means of knowing is accepted as authoritative in the case of what is/are not known from any other (type/kind of) knowledge. Otherwise, (the statement:) 'fire is a remedy against cold'¹ would become (an unauthoritative means of knowing).

[1748]

¹Cf. *Taittiyīya Brāhmaṇa* 3.9.5.4.

Verses 1749-1750 point to the unauthoritativeness of the Śruti in respect of what is different (and at the same time) non-different.

प्रमान्तरविरुद्धं च मातुं नोत्सहते श्रुतिः ।

स्वगोचरेश्वरं मानं न मानान्तरगोचरे ॥१७४९॥

Further, the Śruti does not proceed to understand (i.e. mention) what is opposed to the other (kind of) right knowledge; (for) whatever (means of knowing) is supreme (or, independent) in respect of its own object (of knowing) is not (so) in respect of what is the object of another means of knowing.

[1749]

श्रोत्रादिकरणानीव नातो गोचरसंकरः ।

भिन्नाभिन्नप्रसिद्धयर्थं न चेयं श्रुतिरिष्यते ।

यद्वै तदिति वचस इतोऽन्यार्थपरत्वतः ॥१७५०॥

There is not here a mixture of objects as (it is not there in respect of) the organs (in the body), viz. ears etc. Further, it is not accepted that the Śruti (lit. this) is for securing (or, establishing) what is different and (yet) non-different (both)—(this is to be understood) from the words (of the Śruti) *yad vai tat* as referring to another subject matter. [1750]

Verses 1751-1754 affirm that the Śruti does not purport to point out the existence of dr̥ṣṭi etc.

दृष्ट्यादिभेदसिद्धयर्थं नेदं वचनमिष्यते ।
भेदस्यातोऽन्यतः प्राप्तेर्न श्रुत्या तत्र यत्यते ॥१७५१॥

The statement of the Śruti is not accepted (lit. desired to be) for establishing the differences among *dr̥ṣṭi* '(the power of) seeing' etc.; since (this) difference is learnt (lit. obtained) from elsewhere (i.e. other means of knowing), (therefore) there is no effort made in that regard by the Śruti. [1751]

किंतु चैतन्यमप्यस्य कामकर्मादिवद्भवेत् ।
न स्वतोऽदर्शनात्प्राज्ञ इत्याशङ्क्यैतदीरितम् ॥१७५२॥

But there is a statement made (by the Śruti) keeping in view the (apprehension of) a doubt (on the part of some person), viz. 'The sentience in this (individual) also would be similar to (his) desire, activity etc., for the reason that it is not noticed in (the state of) *Prājña*'. [1752]

स्वप्नप्रबोधयोर्यद्वदृष्टिरस्यात्मनः स्वतः ।
मात्रादिविक्रियाग्रामसाक्षिणी साविनश्वरी ॥१७५३॥
प्राज्ञेऽपीयं तथैवास्ते कटस्थैकात्म्यलक्षणा ।
भावाभावौ त्वविद्यादेर्विशेषः केवलस्त्वह ॥१७५४॥

As in the dream and the waking states, (the power of) seeing in the (lit. this) *Ātman* is, by its nature, never-perishing (and) the witness of the entire mass/group of modifications such

as the knower,

[1753]

so in the (state of the) Prājña also, that (power of) seeing continues to be there, in the same way (as before), viz. having the nature of being immutable and having (just) singleness. Yet the only difference here is in respect of the presence and the absence (both) of ignorance.

[1754]

Verses 1755-1758 affirm the continuous presence of the witness, even if desire etc. have perished.

कामाद्यशेषोपाधीनां निवृत्तौ न निवर्तते ।

तन्निवृत्त्येकसाक्षित्वात्कामाद्यस्तित्वसाक्षिवत् ॥१७५५॥

That (sentience) does not withdraw itself when all of the limiting adjuncts such as desire recede, on account of its being the (only) one witness of their receding and as possessing the ability of witnessing the existence¹ of desire etc. [1755]

¹That is, if and when they appear to exist.

भावाभावार्थसाक्षित्वाद्भावाभावात्मिकैव सा ।

गृह्यतेऽविद्यया मूढैर्मणिः शुद्धो यथाश्रयैः ॥१७५६॥

That (power of) seeing which, on account of its being the witness of the existential and non-existential entities, is taken (by the deluded) as that which has the nature of the existential and non-existential entities, in the same way as a pure jewel (is taken) by the foolish as (having the nature of) their bases/supports. [1756]

सत्यं ज्ञानमनन्तं च विज्ञानघनमित्यपि ।

प्रज्ञानं ब्रह्म चेत्येवं ज्ञानमात्रात्मतात्मनः ॥१७५७॥

There is in the Ātman the nature of being only knowledge as (it is declared in the Śruti statements) *satyaṃ jñānam anantam*,¹ and also *vijñānaghanam*,² and further *prajñānam*

brahma.³

[1757]

¹Cf. *Taittirīyopaniṣad* 2.1.1.

²Cf. BU 2.4.12.

³Cf. *Aitareyopaniṣad* 3.3.

दृष्टान्तश्च न नो नास्ति मण्यादेरिह संभवात् ।
मणेर्नीलादिवद्भेदो दृष्ट्यादिप्रत्यगात्मनः ॥१७५८॥

Further, there is not an example in favour of our opponent's view as there is for us as of a jewel etc., owing to the possible existence of the same, here (i.e. in our opinion); for the difference/distinction such as blue etc. in respect of the jewel etc. is owing to the (power of) seeing etc. of the inner self.

[1758]

Verses 1759-1765 affirm the absence of any example to support the view of difference in non-difference.

प्रतिज्ञाहेतुदृष्टान्ता भिन्नाभिन्नत्ववादिनः ।
मिथो भिन्ना न सन्तीह भिन्नाभिन्नत्वमात्रतः ॥१७५९॥

In the theory of the disputant who postulates difference in non-difference, the proposition, the reason and the example are not mutually distinct, since they are here (i.e. in his theory) merely different and (yet) non-different.

[1759]

दृष्टान्तमात्रनास्तित्वं दोषोऽस्मास्विह चोद्यते ।
दृष्टान्तोऽस्त्येव नः स्पष्टस्त्वन्मुखेनैव तद्ग्रहात् ॥१७६०॥

What is hypothesised as an objection against us that there is not any single example does not really hold (lit. exist); but, (it has to be told) that there certainly is an example, since you have yourself voiced it.

[1760]

This is elucidated in the next verse.

भिन्नाभिन्नत्ववादेऽस्मिन्यो भिन्नो भवतोच्यते ।

स एव नोऽस्तु दृष्टान्तो नातोऽन्यः प्रार्थ्यते मया ॥१७६१॥

Let that, which you have stated in your ¹ theory of difference in non-difference as distinct, be our example, (for) no other example is desired by me. ¹ [1761]

¹Sureśvara uses here 'you' and 'me'—direct references to the two disputants.

अवश्यमेव भिन्नार्थौ भिन्नाभिन्नरवाविमौ ।

भवतैवाभ्युपेतव्यौ भिन्नाभिन्नत्वसिद्धये ॥१७६२॥

Certainly of necessity (*avaśyan eva*), you have to employ *these* two words *bhinna* and *abhinna*, which have different meanings, in order to establish the nature of (reality which is both) different and yet non-different. [1762]

ऐकार्थ्यमेव चेदिष्टं भिन्नाभिन्नाभिधानयोः ।

तवैव न स्याद्दृष्टान्तः सर्वस्यैकस्वरूपतः ॥१७६३॥

If it is desired (by you) that there be unity of meaning in the two expressions viz. *bhinna* and *abhinna*, then there is not any example for you yourself, because of only one nature of all. [1763]

भिन्नाभिन्नत्ववचसा न चैकार्थोऽपि भण्यते ।

भिन्नार्थप्रतिषेधत्वादभिन्नवचसस्तव ॥१७६४॥

Again, there is not referred to (stated) just one single thing by the word *bhinnābhinna*, for your word referring to *abhinna* thing (*vastu*) would have the power of rejecting a *bhinna* thing. [1764]

गोभिधानाभिधेयार्थाद्यथेहाश्वगिरोच्यते ।

भिन्नोऽर्थो भेदशब्दार्थान्न तथाभेदशब्दतः ॥१७६५॥

As by the word *aśva* is mentioned an object which is to be mentioned here (i.e. in worldly dealings) by the name *go*; so also a distinct object cannot be (mentioned) by (a word referring to) a distinct (object) and also (at the same time) by the word referring to some non-distinct object. [1765]

Verses 1766-1769 point out yet another fault in regard to the above.

सर्वात्मकत्वसंप्राप्तावसाधारणवस्तुनः ।
सर्वात्मत्वनिषेधार्थं प्रमाभावस्त्वयाश्रितः ॥१७६६॥

In order to understand (or, grasp) fully (what is) being of the nature of all things in the case of the (real) thing (viz. the Ātman) which is uncommon and (also) for rejecting (its) being of the nature of all, you (i.e. the opponent) have resorted to the absence of right/proper knowledge. [1766]

भिन्नाभिन्नत्ववाचेह तत्कृतं खातपरितम् ।
सर्वैः सर्वस्य चाभेदाद्व्यवहारोऽपि नश्यति ॥१७६७॥

And owing to (its) nature of being (both) different and (yet) non-different (what you have done is merely) filling a ditch (with useless matter); so also, on account of the non-difference of all from all, the (worldly) dealing would come to a halt (lit. would perish). [1767]

एकैकं भेदतो वस्तु निःसंसर्गं परस्परम् ।
एकमेव त्वभेदे स्यादसामान्यविशेषवत् ॥१७६८॥

All (lit. each one of the) things would have no connection mutually and just one thing would possess (both) generality and particularity (in case when there is accepted its) non-difference. [1768]

दृष्ट्यादिवचसां लोके प्रवृत्तेर्ज्ञान एव च ।
दर्शनाज्ज्ञप्तिमात्रं स्यादर्थस्तेषां प्रसिद्धितः ॥१७६९॥

Since the words *dr̥ṣṭi* etc. are seen among the people to be operating towards (acquiring) knowledge, therefore, from the word *darśana* the meaning (that would yield) would be only knowing—as is known (by all). [1769]

sses 1770-1774 point out that the words *dr̥ṣṭi* etc. are expressive of *jñāna*.

पञ्च श्रोत्रादिभिः साक्षाज्जानामीति समीक्ष्यते ।
शब्दादीनिह लोकेऽतो दृष्ट्यादेर्ज्ञानवाच्यता ॥१७७०॥

is known (lit. observed/seen) that one thinks, 'I know directly the words etc., by means of the five, viz. by ears etc.'; therefore, is that, in the world, the words *dr̥ṣṭi* etc. have the capacity to be expressive (merely) of knowing. [1770]

येन रूपं रसं गन्धं शब्दान्स्पर्शाश्च मैथुनान् ।
एतेनैव विजानातीत्यपि च श्रुतिशासनम् ॥१७७१॥

o also is the instruction in the Śruti: *yena rūpaṃ rasaṃ gandham śabdān sparsāṃś ca maithunān, etenaiva vijānāti*.¹ [1771]

Cf. *Kāthopaniṣad* 4.3.

लावकः पाचको वेति कारकस्य सतो यतः ।
संभेदोऽयं क्रियाभिः स्यान्नातोऽकारकतान्वितः ॥१७७२॥

nce the words *lāvaka* 'one who cuts' and (*vā*) *pācaka* 'what causes digestion' are used in the case of some existing *kāraka*; therefore, this mixture by different actions would (also) not be connected with what is not a *kāraka*. [1772]

गच्छतः पठतो भोक्तृन्नानाकर्मकृतो रविः ।
यथा प्रकाशयत्येकरूप एव तथा धियः ॥१७७३॥

As the sun, being only of one uniform nature for one who is walking, for one who is reciting (one's texts) and for the enjoyers (of pleasure) who are (thus) doing various activities; so also (does the witness see various) awarenesses (of people, being the same in nature). [1773]

दृष्ट्यादिभिन्नचेष्टास्ता भिन्नदेशादिलक्षणाः ।
एकरूपं परं ज्योतिरेकं सद्बोधते धियः ॥१७७४॥

Those different activities such as seeing, which are characterized by (their occurring in) different places does the existent, viz. the one single light, of uniformly one nature (lit. form) see (various) awarenesses (of people). [1774]

Verses 1775-1777 point out that the introductory words kinjyotiḥ ... refer to the Ātman as different from dr̥ṣṭi etc.

किंज्योतिरित्यपक्रम्य यत्नेन महतादरात् ।
अर्थोऽयमेव निर्णीतस्तद्विरुद्धं किमुच्यते ॥१७७५॥

(Now) by having carefully and very respectfully¹ begun (with the word) kinjyotiḥ (is decided, i.e. finally established) this very thought (lit. meaning); why is there stated then what is opposed to it? [1775]

¹The word 'carefully' refers to the detailed way of establishing the Siddhānta and 'very respectfully' to the use of illustrations.

मोहोत्थोपाधिसंबन्धादभिन्नोऽपि स्वतो दृशिः ।
द्रष्टा श्रोतेति नानात्वं याति यद्वदलक्तकम् ॥१७७६॥

Being the witness, in its own right, (the Ātman) becomes

manifold, viz. seer, listener etc., through its connection with limiting adjuncts (which have) arisen from delusion, just as (a jewel becomes red by the use of) *alaktaka* (paint). [1776]

रक्तादिभेदतो भेदः प्रकाशस्य प्रकाश्यतः ।
यथैवमात्मनो भेदो ज्योतिष्ट्वाद्वास्यभेदतः ॥१७७७॥

As different shades of light (appear) on account of the differences of red etc. which are (objects to be) illuminated, so do occur the distinctions in/of the Ātman on account of the differences in (the objects which are) illuminated, because of the Ātman's being the light. [1777]

Verses 1778-1779 state that the refutation of the difference in non-difference in respect of gross objects follows only smoothly.

निरंशेषु न चाप्येवं सभागेष्विव वस्तुषु ।
भिन्नाभिन्नात्मता शक्या कर्तुं साक्षादपीश्वरैः ॥१७७८॥

Also, it is not possible even for the most intelligent ones (lit. gods) themselves to posit the nature of being different and (yet) non-different in respect of those things which do not have (i.e. are not, or cannot be divided into) parts. [1778]

न चापीह निरंशेषु भिन्नाभिन्नत्वकल्पने ।
दृष्टान्तः कश्चिदप्यस्ति जगत्यसिंश्चराचरे ॥१७७९॥

Further, there is not in this world, consisting of movable and immovable things, any example for positing (*kalpame*) the nature of being different and (yet) non-different in the case those things which do not have (i.e. are not, or cannot be divided into) parts. [1779]

Verses 1780-1786 are a refutation of the view that the power of seeing undergoes various modifications such as form.

दृगादिशक्तिभेदानां चक्षुरूपादिभेदतः ।

विकारकल्पनैतेन न्यायेनात्मन्यपाकृता ॥१७८०॥

By this reason (*nyāya*) is (thus) rejected disproved (lit. set aside) the notion of differentiation in the Ātman by this positing of modifications (in it) through (seeing) such differences (i.e. different things) as have the form of the eye etc., which are the different powers of seeing etc. [1780]

कार्यलिङ्गाद्धि शक्तीनामस्तित्वं कारणत्वतः ।

यतोऽवगम्यते नातोऽकारके शक्तिरात्मनि ॥१७८१॥

Since the presence of these (different) powers is understood indeed from their characteristics, viz. the effects, on account of their being the cause(s) of them, therefore, there is not (any such) power in the non-*kāraka* Ātman. [1781]

शक्तिशक्तिमतोरैक्यं तयोर्भेदान्न युक्तितः ।

प्रतिपत्तुं क्वचिच्छक्यं प्रकृतिप्रत्ययार्थयोः ॥१७८२॥

It is nowhere possible to posit the oneness (or, identity) of powers and the powerful; (further) the meanings of *prakṛti* 'base-word' and the *pratyaya* 'suffix' is (only) owing to (seeing) differences in them, but not owing to (any valid/powerful) reason. [1782]

प्रकृत्यर्थेऽथवायं स्यान्मतुष्यद्वा ततोऽन्यतः ।

पक्षासिद्धिर्हि पूर्वस्मिन्भेदान्नैक्यं तथोत्तरे ॥१७८३॥

Let this suffix -*matup* be in the sense of the base-word or in a sense other than that, there is still absence of proof for the view (you have held) in respect of the former as also in respect of the latter. [1783]

आत्माविद्यैव नः शक्तिः सर्वशक्यस्य सर्जने ।

नातोऽन्यथा शक्तिवादः प्रमाणेनावसीयते ॥१७८४॥

For us (i.e. in our view), it is in the ignorance about (the nature of) the Ātman that there is power existing for the creation of everything; therefore, any other view about the power (of creating others) cannot be conclusively proved by any means of knowing. [1784]

अशक्तं शक्तिमच्छक्त्या शक्तिः शक्तिमता तथा ।
अशक्तैति कथं योगमन्योन्यं हेत्वसंभवात् ॥१७८५॥

(The notion that) what has power is powerless through the power of the powerful and also, in the same way, the power also is powerless on account of the powerful—how is this connection with each other possible, when there is no cause (for effecting that)? [1785]

शक्तयः सन्ति भूयस्यस्तयोरपि मतं यदि ।
तत्रापि तुल्यचोद्यत्वादनवस्था प्रसज्यते ॥१७८६॥

If it is held that there are many powers of the two; then, in that case also, there would be the same reason (for disproving the said connection) and (thus) there would result infinite regress. [1786]

This verse affirms that the Ātman itself is the power.

तस्मादज्ञात आत्मैव शक्तिरित्यभिधीयते ।
आकाशादेस्ततो जन्म यस्माच्छ्रुत्याभिधीयते ॥१७८७॥

Therefore, the (earlier) unknown Ātman itself is called that power (of creating everything), since the origin of ether etc. is stated by the Śruti as from that.¹ [1787]

¹Cf. *Taittirīyopaniṣad* 2.1.

1789-1794, BU 4.3.32: *salila eko draṣṭā ...* and in 1795-1799 is begun the discussion of BU 4.3.33.

नन्वेवं चेत्स्वभावोऽस्य निर्विभागैकदृष्टिता ।
अथ स्वभावसंत्यागे को हेतुरिति भण्यताम् ॥१७८८॥
विशेषज्ञानमेवास्य स्वभावो वाभ्युपेयते ।
सुषुप्ते तत्परित्यजः कस्मादित्यभिधीयते ॥१७८९॥

(A question is asked:) 'Well, if such is the nature of this (Ātman); viz. being the (power of) seeing of what does not have division (into discrete objects); let then be it told as to how there is its abandoning its own nature'. [1788]

'Or, if it is accepted that this one has the nature of being only (some) particular knowledge, then why is it said that there is giving up of the same in the deep sleep state"—this is stated (now/hereafter).' [1789]

This introduces discussion on *yatra vā anyat* There are two difficulties asked in these two verses.

Verses 1790-1794 discuss the thought in BU 4.3.32.

जाग्रत्स्वप्नप्रपञ्चेऽस्मिन्नात्माविद्यैकहेतुके ।
अनन्योऽपि स्वतो यत्र मोहादन्य इवेक्ष्यते ॥१७९०॥
तत्रान्यः कारको द्रष्टा तथान्येनैव चक्षुषा ।
दृश्यमन्यदविद्योत्थं पश्येत्स्वप्ने यथा तथा ॥१७९१॥
विशेषदर्शने यस्मादविद्यैवास्य कारणम् ।
अतस्तस्यां निवृत्तायां कृत्स्नो भेदो निवर्तते ॥१७९२॥
छान्दोग्योपनिषद्वाक्यं तथा च सति युक्तमतम् ।
यत्र नान्यदिति तथा चात्मैवेत्युपसंहृतेः ॥१७९३॥
मैत्रेयीब्राह्मणे चैतद्व्याख्यातं वाक्यमादरात् ।
यतो भूयो न तद्व्याख्या क्रियतेऽत्र ततोऽधुना ॥१७९४॥

In the states of waking and dream, which have ignorance alone

as their cause, the Ātman appears through delusion to be another as it were, though it is not any other. [1790]

There (i.e. in those two states) there is another *kāraka* (i.e. an agent of some activity) and yet another seer who would see other object(s) of knowing that arise from ignorance—as in the dream state, so also in the waking state. [1791]

Since, only ignorance is the cause for its seeing duality, therefore, when it has receded (i.e. is destroyed) the variety (of discrete objects), in its entirety, recedes. [1792]

When that is (accepted to be) so, the sentence in the CU becomes supported by reason. So also (is supported by reason) the sentence *yatra nānyat ...*¹ and the concluding sentence *ātmaiva*.² [1793]

And since this sentence³ is (already) respectfully⁴ explained in the Maitreyī Brāhmaṇa, therefore, there is not any explanation given of it again. [1794]

¹Cf. CU 7.24.1.

²Cf. BU 1.4.17.

³Cf. BU 2.4.14.

⁴For this, see the introductory note to verses 1775-1777.

Verses 1795-1843 discuss the thought in BU 4.3.33.

यद्वै तदित्युपक्रम्य व्याख्यातं वस्तु विस्तरात् ।
सलिलादिगिरा तस्य क्रियतेऽत्रोपसंहतिः ॥१७९५॥

The (real thing) was described at length after having begun here (i.e. in what follows), (its description) with the words *yad vai tat*; now, there is offered (lit. made) the description/explanation, in the words beginning with *salila* etc. by way of stating the conclusion (of the same). [1795]

अविद्यैव यतो हेतुः कार्यकारणतां प्रति ।

सम्यग्ज्ञानादतस्तस्यां ध्वस्तायामात्ममात्रता ॥१७९६॥

Since ignorance alone is the cause of the relation (of things) as the cause and its effect(s), therefore, when it is removed (lit. destroyed) by right knowledge (i.e. the knowledge of the real nature of the Brahman), (there remains in existence) only the Ātman. [1796]

नाविद्यामनुपादाय प्रतीचोऽनात्मसंगतिः ।

यतो विध्वंसने तस्या नात्मनोऽन्योऽवशिष्यते ॥१७९७॥

Since the inner self (in the body) cannot (i.e. does not) have (any) connection with the non-Ātman (objects), unless it has taken recourse to ignorance; (therefore) when there has occurred the destruction of that (ignorance), there does not remain anything other than the Ātman. [1797]

स्वतोऽवबोधमात्रत्वात्कुतोऽविद्यादिसंप्लुतिः ।

तस्मात्सलिलवच्छुद्धः कार्यकारणहानतः ॥१७९८॥

(A question is asked:) 'Since (the Ātman) is itself of the nature only of knowledge, how/why will there be removal (lit. washing away) of ignorance?' Therefore, (in answer it is pointed out:) '(The Ātman) is pure like water owing to (the fact that) there is removal (lit. loss) of (the relation of) cause and its effect(s)'. [1798]

This is the meaning of the words *salila*....

अन्तरेणापि संबन्धं कार्यकारणवस्तुनः ।

स्वतोऽनेकात्मकं तत्स्यादित्याशङ्क्यैक उच्यते ॥१७९९॥

Having the (someone's possible) doubt in view, viz. that (real) thing (i.e. the Ātman) would, of itself, even without (having) any connection with such things as consist in (being) cause and its effect, become manifold (or, lit. come to be possessed of the nature of variety of things); has the Śruti stated the word *ekah*. [1799]

Verses 1800-1806 bring out the significance of the word *ekaḥ*.

न कपित्थादिवत्तत्त्वं स्वतोऽनेकस्वभावकम् ।

उक्त्वा सलिलवत्तस्मादेक इत्यब्रवीच्छ्रुतिः ॥१८००॥

The nature of reality (lit. that) is not, like (that of) a wood-apple,¹ which is made up of various constituent elements; therefore, the Śruti, after describing (lit. stating) it as 'like water',² mentioned it as (being just) one. [1800]

¹In *kapitthavat*, the suffix *-vat* is used according to Pāṇini 5.1.116: *tatra tasyeva*.

²In *salilavat*, the suffix *-vat* is only *ivārthe*.

सजातीयनिषेधो वा ह्येकशब्देन भण्यते ।

सलिलोक्त्या विजातीयसंबन्धो हि निवारितः ॥१८०१॥

Or, the negation of any (other) object of the same kind/species is conveyed (lit. expressed) by the word *eka* and any connection with any (such) object of another kind/species is likewise negated (lit. set aside) by the mention of *salila*. [1801]

NKL (ms. p.700) is worth noting: *salilaikapadayor arthāntaram āha ... ekapadam ātmabhedanirāsārtham* (this last phrase *eka* ... occurs in SP also).

एकशब्दो न संख्यार्थः संख्येयासंभवादिह ।

अद्वितीयार्थतैवातो द्वितीयार्थनिषेधतः ॥१८०२॥

Here,¹ the word *eka* does not convey (lit. have) the sense of a number (i.e. the number 'one'), because there is not (here)² any possibility (lit. presence) of what can be counted (in numbers). Therefore, from the rejection (or, negation) of any other (lit. second) object (is to be understood) the sense of (the Ātman's) being without any second (i.e. being non-dual).

[1802]

NKL (ms. p.700) states by way of introducing this verse: *ekaśabdasya saṁkhyāguṇavācivād guṇaguṇisambadhād advaita-hānir atrāha* SP adds, in the end: *na hi tasminn ekatvaṁ guṇo nirguṇatvaśruteḥ*. Cf. Śvetāśvataropaniṣad 6.11: *sākṣī cetā kevalo nirguṇaś ca*)

¹That is, in this sentence.

²That is, in this context.

सदेवेत्यादिना चास्य तथा सत्यविरुद्धता ॥१८०३॥

That being so, there is no opposition (of the popularly accepted sense of the word *eka*) on account of the statement about its (being just one/alone) as stated in the Śruti statement *sad eva*¹ [1803]

Read NKL (ms. p.700): *ekaśabdasya niṣedhārthatve tasya saṁkhyāvācivaprasiddhivirodho 'trāha sad iti*. This is more apt than SP: *ekaśabdasya vṛddhavyavahāre saṁkhyāvācivaprasiddher nādvitīyārthātety āśaṅkya śrutyantaravirodhān maivam ityāha sad iti*.

¹Refer to CU 6.2.1.

प्रत्यङ्मात्रावसायित्वं प्रत्यग्द्रष्टेर्यतस्ततः ।
अकारकस्वभावत्वादद्रष्टेत्यभिधीयते ॥१८०४॥

Since seeing/realising the inner self is just the culmination (of knowledge) in realising that there is the inner self alone (as the existent); it is therefore, called the non-seer owing to its having the nature of a non-agent (of any activity). [1804]

This is the meaning of *adraṣṭā*.

यत्र हि द्वैतमित्युक्तेर्यत्र त्वस्येति चेरणात् ।
स्वतः पूर्णात्मकं ज्योतिरद्रष्टेत्यभिधीयते ॥१८०५॥

Since there is a Śruti statement, viz. *yatra hi dvaitam ...* and also by the statement/sentence *yatra tv asya*; (the Ātman which is) by its (very) nature only full/complete (by itself), the light is called *adraṣṭā*. [1805]

This verse justifies the reading of BU 4.3.32 as *salila eko 'draṣṭā*. That is explained by NKL (ms. p.700) only cryptically thus: *draṣṭeti padacchedaḥ kiṃ na syād atrāha yatreti*. But it is Ānandagiri's comment on BUB (p.599) which is clearer and more useful; read: *adraṣṭā draṣṭeti vā chedaḥ eko 'dvaita ity abhyasas tātparyalingam* It should be noted, nevertheless, that BUB is silent on this. Yet cf. BU 3.7.23: *adrṣṭo draṣṭā* and also *Maitrāyanyupaniṣad* 6.11: *amantāśrotāsprāṣṭādraṣṭāvaktāghrā-tārasayitā* and also (in the same place) *draṣṭā bhavati*. In the same way, i.e. both *draṣṭā* and *adraṣṭā* in CU 7.9.1)!

यस्मादेवमतोऽद्वैतोऽविद्यातत्कार्यलङ्घनात् ।
न ह्यविद्यादिविरहे द्वैतधीरुपपद्यते ॥१८०६॥

Since this is so, therefore, it is non-associated with duality through its having overcome ignorance and its effect(s). Indeed, in the absence (lit. separation) of ignorance etc.,¹ (the acceptance of) the notion of duality cannot be reasonable. [1806]

This is the meaning of *advaita* 'non-duality (of the Ātman)', which is further clarified in the following three verses.

¹This refers to its effects and the consequent activity (or activities) of an individual.

Verses 1807-1809 offer the etymological explanation of the word *advaita* (in the preceding verse).

द्विधेतं द्वीतमित्याहुस्तद्भावो द्वैतमुच्यते ।
तन्निषेधेन चाद्वैतं प्रत्यग्वस्त्वभिधीयते ॥१८०७॥

That which has proceeded (i.e. appeared) in two ways is (what is to be called) *dvīta* and (therefore) the nature of it is described as *dvaita* 'duality'. (And) by rejecting (or, negating) that (the existence/happening of that in the case of the Ātman) the (real) thing, viz. the inner self is mentioned (to be) *advaita* 'not having (i.e. not associated with) duality'. [1807]

SP and NKL (ms. p.700) state this to be *advaita-padasyāvayavaśo 'rtha*. Yet SP refers to the impossibility of deciding any one of the *nañarthas*.

nañarthāḥ ṣaḍ uktāḥ—

sādrśyaṃ tadabhāvaś ca tadanyatvaṃ tadalpata /
aprāśastyaṃ virodhaś ca

The meanings conveyed by *nañ* with a noun are six: similarity, absence, smallness in quantity/measure, unwelcome nature (of the thing mentioned by the constituent of the *nañ* compound) and opposition to the meaning of it.

None of these six are to be understood in the case of *advaita*. Yet SP refers to only three of the *nañarthas*! Possibly, there is no occasion/need for understanding *sādrśya*, *alpatā* and *aprāśastya*, in relation to *advaita*. Therefore, he refers only to the other three as can be possibly thought of. But SP points out the difficulty in positing any one of these.

द्विधा त्रिधा वा बहुधा कारणं सद्भवेदिह ।

तस्यात्मनि निषिद्धत्वादात्माद्वैतो भवेत्ततः ॥१८०८॥

(If) it is (there),¹ the cause is (lit. should be) here (i.e. in the worldly way) understood as twofold or threefold or manifold;² therefore, since (even) that (i.e. any one of them) is rejected (or negated) in the case of the Ātman, it is (lit. should be taken as) not having (any association with) duality.

[1808]

¹This is by *sat kāraṇaṃ bhaved iha*.

²These may be *samavāyi*, *asamavāyi* (*guṇa* or *karman*) and

nimitta which can be *sādhāraṇa* (eightfold) and *asādhāraṇa* (manifold owing to *kāryabheda*s). Cf. *Nyāyakośa*, p.226.

भेदसंसर्गहानार्थमेव यत्नामपि श्रुतिम् ।

अनादृत्यान्यथा प्राहुरहो विद्या महीयसी ॥१८०९॥

Having disregarded the Śruti which has thus made an effort to reject (or, deny) the association (of the Ātman) with variety (of other extreme objects), learned men¹ have explained (the Śruti sentence) otherwise—what a great amount of (their) learning!

[1809]

¹This refers to those who hold the theory of *bhedābheda* or of *samasta* and *asamasta* forms in respect of the Brahman. Obviously, Bhartṛprapañca is principally meant. And also there is consequently scoffing at them (ridicule of them).

Verses 1810-1816 refute the difference in non-difference in respect of dr̥ṣṭi and others.

मिथो विभागसंसिद्धिर्धर्माणां नात्मसंश्रयात् ।

धर्मधर्म्यभिसंबन्धो दृश्यत्वाद्द्रष्टृपेक्षया ॥१८१०॥

There cannot be made any distinction (among properties, lit. between (any) two of the properties) because of their having a basis in the Ātman.¹ (And) since the relation of a property (or, of properties) to that which is possessed of the same, is what can be seen, it is owing to its dependence on the seer.²

[1810]

¹There is real difficulty of distinguishing a property (or, properties) from the Ātman which is *said* to be possessed of the same and, it is known, the Ātman does not have (i.e. is not possessed of) any property.

²This argument leads to the idea of *infinite regress* in respect of the seer. Read SP for clarification of this, thus: *draṣṭṛapekṣayā*

drśyatvād eva rūpaghaṭādiṣu dharmadharmisambandho dr̥ṣṭo na cātmadharmāṇām tad drśyatvam ātmano 'pi tatprasaṅgān na ca svenaiva svasya drśyatvaṁ na ca draṣṭrantaram ato dr̥ṣṭyādīnām nātmadharmateti bhāvaḥ.

द्रष्टा सलिलवच्छुद्धो निःसङ्गैकाद्वयस्तथा ।

श्रुत्युक्तोऽतो विरुद्धोऽर्थो निर्हीकैरिह वर्ण्यते ॥१८११॥

The seer is, like water, pure and also non-attached (to anything else) and non-dual—it is described/mentioned in the Śrutis; therefore, any sense which is opposed (to that sense of the Śrutis) is, (one has to observe,) presented (or understood) in this matter by (only) the shameless. [1811]

तमोऽंशत्वं यथा भानोः सतश्चाप्यसदंशता ।

वियतो मूर्ततैवं स्याद्विन्नाभिन्नत्वमात्मनः ॥१८१२॥

(Any statement) about the Ātman as having differences (i.e. being discrete objects) and not having differences (in it) would be like stating that darkness is a part of the existent sun, though that (viz. darkness) is not existent as a part (of the same) or that the sky (which is formless) has a form. [1812]

अत ऊर्ध्वं विमोक्षायेत्युक्तं प्राग्यत्पुनः पुनः ।

तद्विमुक्तेः समाप्तत्वादेश इत्यभ्यधान्मुनिः ॥१८१३॥

Since it has been said earlier, again and again, viz. *ata ūrdhvaṁ vimokṣāya* ... (BU 4.3.14-16), therefore, the sage has (now) said, 'eṣa ...,'¹ for liberation has been (already) obtained (now).

[1813]

¹BU 4.3.32 itself and also 4.4.23.

प्रत्यग्द्रष्टव्यवहितेः प्रात्यक्ष्यादात्मवस्तुनः ।

एष इत्यात्मनिर्देशो यत्साक्षादिति च श्रुतिः ॥१८१४॥

The word *eṣa* is (used) with reference to the Ātman, because of the individual's (power of) seeing not being covered/concealed and also because of the (real) thing, i.e. the Ātman, being directly perceptible. So also is there a Śruti statement *yat sākṣāt*¹, [1814]

¹Cf. BU 3.4.1.

अव्यावृत्ताननुगतं निःसामान्यविशेषतः ।
ब्रह्मेति मुख्यवृत्त्येह वस्तु श्रुत्याभिधीयते ॥१८१५॥

The (real) thing is expressed by the Śruti here (in this sentence) by the word *brahma* in its primary sense,¹ it is neither distinguished from nor similar to (any other thing), owing to its not having in any way (*nis*) generality (or, general nature) and particularity (or, particular nature). [1815]

SP sets aside that, in the word *brahmaloka*, the constituent *brahma(n)* does not signify the god Brahmadeva who has his seat in a lotus.

¹Literally with its primary function.

तथा लोक्यतेर्धातोर्दर्शनार्थत्वहेतुतः ।
प्रकृतत्वात्तथा दृष्टेलोकिनं लोक उच्यते ॥१८१६॥

So also the word *loka* is stated (lit. uttered by the Śruti), for the reason that the meaning of the verbal root *lok* 'to see' is in view and since that (meaning) is what is intended (by that expression); (therefore) it is (the power of) seeing (which is) called *loka*. [1816]

This sets aside the commonly accepted view about the meaning of the word *loka*, '(some) region' (which is the support) for enjoyment (or experiences, of pleasure and pain).

Verses 1817-1827 explain why the word *brahmaloka* is a Karma-

dhārāya compound and not ṣaṣṭhitat-puruṣa.

कर्मधारय एवातः समासोऽत्रोपपद्यते ।

न तु षष्ठीसमासोऽत्र विभागस्याप्रसिद्धितः ॥१८१७॥

Therefore, to understand here (in the word *brahmaloka*) Karmadhāraya compound is reasonable, and (*tu*) not a genitive (Tatpuruṣa) compound, because any division (of the Brahman) is not known. [1817]

The first constituent of a genitive Tatpuruṣa compound is (usually) connected with the subsequent by the genitive suffix which shows the latter to belong to the former. Therefore, since the Brahman cannot have anything else belonging to it, the word *brahman* cannot be a constituent of 'any' genitive Tatpuruṣa compound.

श्रुतं चैकविभक्तित्वं युक्तं नाश्रुतकल्पना ।

कल्पनाहेत्वसद्भावे निराकाङ्क्षे तथा श्रुते ॥१८१८॥

षष्ठ्यादिकल्पनासाधवी तस्मादत्रेति भण्यते ।

It is proper to hold (in the word *brahmaloka*) heard (to have its two components to be) having the same case and not (to entertain) the notion of what is not heard. Since there is absence of any cause of (some/an) imagining and (*tathā*) what is heard is independent of (or, does not expect) anything else, [1818]

therefore, it is stated (by us) that here (i.e. in the compound word *brahmaloka*) it is not proper (to accept) the thought of the genitive suffix etc. [1819ab]

सामानाधिकरण्यं च विशेषणविशेष्यता ॥१८१९॥

लक्ष्यलक्षणसंबन्धो ब्रह्मलोकाभिधानयोः ।

ब्रह्मेति चात्मयाथात्म्यं लक्ष्यते नाभिधीयते ॥१८२०॥

तथा लोकगिरा ब्रह्मतत्त्वमात्मोपलक्ष्यते ।

मुख्यमैकार्थ्यमेवं स्याद्ब्रह्मलोकपदार्थयोः ॥१८२१॥

(And it is proper to hold the components of the word to be) in the relation of a substantive and its adjective, [1819cd] and, further, the relation of what is to be qualified and what qualifies (it) obtains between the (two) nouns *brahman* and *loka*; so also the real nature of the (individual) Ātman, as it is, is but (being) the Brahman is (thereby) indicated and not expressed. [1820]

In the same way (*tathā*) as of popular speech is indicated the (individual) Ātman to be (having) the nature of the Brahman. Thus (would be (understood) oneness of the meanings (signified by the two) words, *brahman* and *loka*. [1821]

न हि लोकातिरेकेण ब्रह्मत्वमुपपद्यते ।

ब्रह्मणो व्यतिरेकेण प्रत्यक्ता नान्यतस्तथा ॥१८२२॥

It is, indeed, not reasonable (i.e. it does not at all stand to reason) that the existence (lit. nature) of the Brahman is beside (what is signified by the word) *loka*. So also, the nature of the inner self is not beside (i.e. other than that of) the Brahman. [1822]

अनयोरैक्यसंमोहात्पारोक्ष्यद्वयकल्पने ।

संसारोऽयमतो मोहसमुच्छिन्नौ विमुक्तता ॥१८२३॥

In holding the notion of these two, (the worldly being's self and the Ātman) as not being directly perceptible, on account of the complete delusion in respect of the oneness of the two (viz. *brahman* and *loka*), leads to (being in) this transmigratory existence. Therefore, when there is removal (lit. destruction) of (that) delusion, (there results) the state of liberation. [1823]

अतोऽशेषमहानर्थहेतोर्मोहस्य हानये ।

एष इत्यादिवाक्योक्तिः सम्यग्दर्शनजन्मने ॥१८२४॥

Therefore, for overcoming (lit. abandoning) the delusion (i.e. ignorance), which is the cause of the greatly undesired (i.e. transmigration), there is stated the (Vedāntic) sentence *eṣa* ... in order that it gives rise to (one's having/acquiring) right knowledge (as the means to liberation). [1824]

इतिशब्दो यथोक्तार्थपरामर्शनकर्मणे ।

ऐतिह्यार्थस्तथा हेति सम्राडित्यभिमन्त्रणम् ॥१८२५॥

The word *iti* is to serve the function, viz. to refer to (or, to signify) the matter stated (earlier). The words *tathā hi* serve the purport of signifying what has (already) occurred. The word *saṃrāt* (in the vocative) is just a call. [1825]

These are the meanings of the different words in the sentence *saṃrāt*

इत्युक्तेन प्रकारेण मुमुक्षुं जनकं मुनिः ।

अन्वशात्सकलानर्थहेत्वविद्यापनुत्तये ॥१८२६॥

In this manner, which is stated (herebefore), the sage imparted instruction to Janaka, who was desirous of (acquiring) liberation, so that there should be removal of ignorance (on the part of the latter) which causes all the undesired (sorrows etc., i.e. effects of transmigration). [1826]

व्युत्थायाख्यायिकातो नः श्रुतिरेवेदमब्रवीत् ।

अन्वशात्स कथं धीमान्राजानमिति चेच्छृणु ॥१८२७॥

Having risen above (i.e. abandoned) the narrative, the Śruti has said this to us; '(If a question is asked here:) 'How¹ did the wise (sage) instruct the king?', (the answer is:) 'Well, then, listen'. [1827]

¹Or, what? That is, what is the meaning/purpose of the statement *eṣa brahmalokaḥ*

Verses 1828-1833 clarify the meaning of *eṣāsyā paramāgatiḥ*.

विज्ञानपुरुषस्यास्य या यथोक्ता पुरोक्तिभिः ।
नैष्ठिकी गतिरेषास्य गत्यन्तरसमाप्तिः ॥१८२८॥

What has been declared earlier (by the wise) as the final goal for this person, who is given to specific particular knowledge,¹ is this one for this individual, after the other (intermediate) goals (have been reached). [1828]

¹SP refers to those final goals which have been mentioned in sentences referring to statements about Aticchanda etc., cf. U 4.21.

इतोऽन्या गतयः सर्वाः क्षयिसाधनसंश्रयात् ।
क्षयिण्योऽतो हि परमा गतिरेषैव नापरा ॥१८२९॥

All goals other than this are only transitory (or, beset with an end) on account of their dependence on (or, basis in) transitory (i.e. temporary) means (i.e. those beset with limitations on them). Therefore, indeed only this is the final goal (for him), there is no other (goal for him to seek). [1829]

अविद्यामात्रहेतुत्वात्कामकर्मादिसाधनाः ।
गतयोऽपरमाः सर्वा माया स्वप्नगतिर्यथा ॥१८३०॥

(These other) goals are not the final ones, because they have for their cause ignorance alone and have as means (for achieving them) desire(s), activity etc.—they are all but a magic show (*māyā*) just as is movement (or any goal) in the dream state. [1830]

संपच्च परमैषैव मोहोत्थास्त्वन्यसंपदः ।

उत्कर्षातिशयः संपद्विभूतिश्चेति भण्यते ॥१८३१॥

Only this one is the highest bliss (or, pleasure), since other joys (or, pleasures) are rooted in (i.e. arising from) delusion. (And, therefore) the excellence in (an individual's) progress (or, rising to an eminent state/status) is described as excellence in bliss. [1831]

एषोऽस्य परमो लोको लोकास्त्वन्ये क्षयिष्णवः ।
क्षयिष्णुसाधनोत्पत्तेर्न त्वेषोऽसाधनाश्रयात् ॥१८३२॥

This is for this (individual) the highest goal (*loka*) and/but the other goals are liable to perish, since they are obtained by temporary (or destructible) means. This one is not, nevertheless, (liable to perish), since it does not depend on any means (that is temporary). [1832]

ब्रह्मैव सन्स्वतो यस्माद्ब्रह्माप्येत्यवबोधतः ।
तदविद्यानिरासेन मुक्तिर्नातोऽन्यसाधनात् ॥१८३३॥

Being by his nature the Brahman itself, the individual merges into the Brahman by his acquiring the knowledge (about the nature of it). His liberation results from (or, is caused by) the removal of ignorance (and) not from/by any other means. [1833]

Verses 1834-1843 emphasise that the word loka used here refers to the Brahman alone.

लोकशब्दस्य मुख्योऽर्थ आत्मैवेह यतस्ततः ।
कर्मादिहेतुसाध्येषु गौणी लोकार्थता भवेत् ॥१८३४॥

Since the principal/primary meaning of the word *loka* is (thus) the very (immutable) Ātman, therefore, in the case of (other *lokas* 'regions or stages'), which are reached by means (lit. the causes) viz. activity etc., there would be the sense of (the

word) *loka* in the secondary/metaphorical sense.

[1834]

न कर्मणा कनीयस्ता वृद्धिर्वा नान्तरात्मनः ।
इति बाहुमिवोद्धृत्य वेदान्तैर्घोषणा कृता ॥१८३५॥

There is not acquired any lower status through action (i.e. ritual), nor is there (from it) any excellence (or, reaching to higher status); this does not happen to the inner Ātman—thus a (loud) proclamation has been made by the Vedānta text, as if by raising the (right) arm.

[1835]

This verse refers to rise in the worldly status.

आनन्दः परमोऽस्यैष सुखोत्कर्षसमाप्तिः ।
सर्वानन्दातिशायित्वात्तथा चैवं प्रवक्ष्यते ॥१८३६॥

This is the highest bliss for this (individual), owing to (his) having acquired the excellence of happiness and on account of its excelling all (other) happiness which will be said¹ thus.

[1836]

¹This has in view *sa yo manusyāṇām* ... (BU 4.3.33).

विषयस्पर्शजानन्दाः साधनानुविधानतः ।
आद्यन्तवत्त्वस्वाभाव्याद्दुःखहेतव एव ते ॥१८३७॥

(On the other hand,) the joys which originate from (lit. are produced by) contact/connection with (external) objects, since they have conformity with (or, similarity in nature to) the means of deriving them) and are of the nature of having a beginning and (also) an end—they are only the causes of misery. [1837]

कूटस्थात्मस्वभावत्वात्सर्वसाधननिस्पृहः ।
सर्वानन्दातिवर्तित्वादानन्दः परमो मतः ॥१८३८॥

As against them, the joy/bliss) which, being the (very) nature

of the immutable Ātman, does not depend on (lit. not expect) every (lit. all) the (known) means (of achieving joy/pleasure) and thus has the nature of excelling (lit. being above) all (other) joys, is considered (or, known) as the highest. [1838]

आनन्दः परमोऽस्यैष इत्युक्तार्थप्रसिद्धये ।
एतस्यैवेति वचसा समर्थो हेतुरुच्यते ॥१८३९॥

In order to prove/establish what is so far (or, earlier) said, viz. 'This is the highest joy/bliss for this (individual),' there is then stated the proper (lit. strong) reason, which justifies it, in the statement *etasyaiva*¹ [1839]

¹This is fully explained in the next verse.

एतस्यैव यथोक्तस्य सर्वानन्दातिवर्तिनः ।
उपजीवन्ति भूतानि ब्रह्मानन्दस्य विप्लुषम् ॥१८४०॥

All beings enjoy (lit. live on) the surge (lit. drop) of the joy of (knowing the nature of) the Brahman,¹ which has been (thus) described (lit. stated), (and the one) which surpasses all (other) joys. [1840]

¹Or, alternatively, of becoming one with the Brahman.

एष एवंविधो यस्मादानन्दः परमस्ततः ।
आनन्दानतिशेतेऽन्यान्सर्वानस्यैव कृत्स्नतः ॥१८४१॥

Since this (joy) is of this nature, therefore, it is the highest and it excels all other joys, on account of the fullness-/completeness of this one (viz. individual).¹ [1841]

¹That is to say, 'because the individual has become whole or full/complete (*pūrṇa*) on attaining the nature of the Brahman'.

कृत्स्नोऽपि चैष आनन्दस्तदविद्यैकहेतुजः ।

बुद्ध्याद्युपाध्यवच्छेदान्मात्रेति व्यपदिश्यते ॥१८४२॥

And the whole of this (i.e. worldly) joy is but the product of (or, is produced by) mere ignorance about (the nature of) that (reality, viz. the inner self) and it is described as (derived) by the knower as only caused by the limitation(s) on it of the limiting adjuncts such as the intellect. [1842]

तन्मात्रावर्त्मनैवैनं बुबोधयिषुरादरात् ।
लवणाब्धिं यथा तद्वल्लवणावयवैरिह ॥१८४३॥

(Therefore, like a person who informs another) about the salty sea by (introducing to the latter the information about) its parts, i.e. the salt (etc. in it), (this sage) who was desirous of enlightening this one (i.e. king Janaka about the Brahman), with respect (or, carefully) by way of (mentioning as consisting of) the parts (viz. the agent etc.) of it (i.e. Brahman). [1843]

Now, in verses 1844-1896 follows the discussion on BU 4.3.34.

उत्तरोत्तरवृद्ध्यात आनन्दान्मानुषादधि ।
परानन्दावबोधार्थं प्रवृत्तैषा परा श्रुतिः ॥१८४४॥

Therefore has the subsequent Śruti proceeded for enlightening in respect of the highest joy/bliss, (by pointing out) the higher and the higher of every subsequent (of the joys of) human beings. [1844]

Verses 1845-1849 discuss in general the nature of human joys.

मनुष्याणां स यः कश्चित्संसिद्धोऽवयवैर्दृढैः ।
समग्राशेषचार्वङ्गो राद्धो भोगक्षमः पुमान् ॥१८४५॥

Whosoever amongst men is fully developed with his firm limbs and has all his person become handsome, is the man prepared/fully fit (*rāddha*) and capable for enjoyment(s). [1845]

कृत्स्नसाधनसंपन्नः समृद्धोऽत्राभिधीयते ।
 बाह्यैराध्यात्मिकैरेवं साधनैरन्वितः पुमान् ॥१८४६॥
 तथाधिपतिरन्येषां नृणामेवेह यो भवेत् ।
 स्वतन्त्रोऽधिपतिर्ज्ञेयो मनुष्यैर्न विहन्यते ॥१८४७॥

In these words (here *atra*) is meant (lit. mentioned) (a man) who is possessed of all means (of enjoyments); similarly, a man who is possessed of the external and internal means (of enjoyment of various joys), [1846]
 so also, who is the lord of other men (i.e. the best of them), as it were (that is to say:) he should be understood as an independent master (of them) and that he is not obstructed (lit. harmed) by (other) men. [1847]

This is the explanation of *anyeṣām*

मानुष्यकेण भोगेन संपन्नानां नृणामिह ।
 संपन्नोऽतिशयेनातः संपन्नतम उच्यते ॥१८४८॥

Therefore, he who is rich (or enriched) by his enjoyment of the enriched joys of human beings, is (known as) the best enriched among the (joy-)enriched (men). [1848]

This is significance of *sarvaih*

सर्वैर्मानुष्यकैर्भोगैः संपन्नो न तु दैविकैः ।
 आनन्द एष परमो मनुष्याणामिहोच्यते ॥१८४९॥

(He is) one, who is enriched by all joys of human beings, but not by the divine (joys). And this joy is (mentioned in this Śruti) as the highest among the joys of men. [1849]

This is the purport of the adjective *mānuṣyakaih*

Verses 1850-1853 discuss the joy of Pitṛs.

शतकृत्वो मनुष्याणामानन्दो गुणितस्तु यः ।
पितॄणामेक आनन्दस्तेन तुल्यप्रमाणतः ॥१८५०॥

That joy of human beings, which is multiplied a hundredfold, becomes one joy of the Pitṛs, (compared to it) in respect of measure. [1850]

This is the meaning of *atha*

यत्सुखं साधनाधीनं दुःखमेव तदुच्यते ।
अनन्यसाधनं तस्मात्स्वात्मस्थं परमं सुखम् ॥१८५१॥

Whatever happiness is dependent on its means (for its deriving) is to be called (i.e. to be understood as) but misery. Therefore, that happiness/joy which does not have (i.e. depend on) any means (for its deriving) and which rests on one's self is the highest happiness/joy. [1851]

तस्मादात्मपरिज्ञानात्कार्यज्ञेयसमाप्तिः ।
निरस्तातिशयानन्दो भवतीत्यस्य निर्णयः ॥१८५२॥

Therefore, (i.e. for that reason), the decision in this respect is: There occurs that joy, which has surpassed (or, is above) all excellent (of known joys), the one arises from a complete/full (*pari*-) knowledge (about the nature) of the Ātman and which has surpassed every other (joy to be produced or to be known). [1852]

तारतम्यादुपायानां शुद्धिस्तरतमा धियः ।
शुद्धेस्तरतमत्वाच्च सुखं तरतमं भवेत् ॥१८५३॥

Since there is gradation among the means (of deriving joy/pleasure), therefore, there is stated the purification¹ in respect of knowledge with (the use of adjectives ending with the suffixes) *-tarap* and *-tamap*.² So also, because there is

gradation in respect of (that) purification, happiness (resulting therefrom) would also be expressed in (words having the suffixes) *-tarap* and *-tamap*. [1853]

¹This refers to the effect in one's understanding of the various joys.

²These Pāṇinian suffixes signify the higher and the highest (of measures).

Verses 1854-1858 state the gradation in respect of pleasure/happiness.

यावद्यावन्मलो व्येति बुद्धेर्धर्मादिसंचयात् ।
तावत्तावद्धियः स्वास्थ्यं तावत्तावत्सुखोन्नतिः ॥१८५४॥

To the extent, to which impurity of (one's) intellect disappears (i.e. is removed), by having collected (more and more of) merit—i.e. to that extent results the good (and better) state of (one's) intellect and also to that extent is there (higher and higher) rise in happiness. [1854]

This is further exposition of the *dhūtāratamya* mentioned in the preceding verse.

यावद्यावद्धनीभावो बुद्धेः पापादिसंगतेः ।
तावत्तावद्धियोऽस्वास्थ्यं दुःखोद्धूतिस्तथा तथा ॥१८५५॥

To the extent to which there is the obscurity (lit. thickening) of (one's) intellect on account of its association (or, connection) with sins etc., to that extent is the want in the (good) state of (one's) intellect and accordingly (i.e. in the same measure) is there the experience (of more and more) of misery. [1855]

पितृलोको जितो यैः स्यात्पितृयज्ञादिकर्माभिः ।
जितलोकास्त उच्यन्ते पितरो दिव्यभोगिनः ॥१८५६॥

They are called the Pitṛs, also the enjoyers of divine joys—they who have won the *loka* of Pitṛs by means of the performances of rituals like Pitṛyajña;¹ also (they are called) *jitalokas* 'winners of the worlds'. [1856]

This explains the Śruti passage referring to *jitalokas*.

¹This refers to the Śrāddhas.

य एष दक्षिणः पन्थाः पितृलोकः स उच्यते ।

मनुष्यानन्दतः सोऽयं गुणितः स्याच्छताधिकः ॥१८५७॥

This one, i.e. the goal, on the way to the south, is called the Pitṛloka. This one has, in comparison with the joys of human beings, (a joy) that is multiplied a hundred times more.

[1857]

This is to explain the Pitṛloka and its joy.

उत्तरेष्वपि वाक्येषु यथोक्तमुपपादयेत् ।

शताधिकोऽयमानन्दः पूर्वस्मादुत्तरः क्रमात् ॥१८५८॥

In the (case of) the subsequent sentences (of Śruti) also, (an interpreter) should expound what is (earlier) stated; viz. this joy is greater by hundred, thus each subsequent joy in the order is greater than its preceding.

[1858]

Verses 1859-1865 discuss the nature of the joys of gods.

नक्षत्रलोकशब्देन ये पूर्वं प्रतिपादिताः ।

देवलोकगिरा तेऽत्र भण्यन्ते सूक्ष्ममूर्तयः ॥१८५९॥

Those, who were mentioned earlier by the word *nakṣatraloka*, are (themselves) mentioned here by the word *deva*, (only with this change that they are) having subtle forms/bodies. [1859]

In this verse, Sureśvara refers to the Mādhyandina recension

of BU: *ye śataṃ gandharvaloka ānandāḥ sa eko devaloka ānandāḥ* and explains the meaning of *devaloka*.

सर्गस्य जननादादौ देवत्वं ये प्रपेदिरे ।

आजानदेवास्तेऽत्र स्युः पूर्वेभ्यः सूक्ष्ममूर्तयः ॥१८६०॥

They are to be (i.e. should be) understood here as Ājānadevas, who have attained godhead, at the time of the birth of creation; they are, in comparison with those mentioned before (viz. devas), more subtle in their forms/bodies. [1860]

व्यापीनि तेषां सूक्ष्माणि शरीराणि महात्मनाम् ।

पूर्वानन्देभ्य एतेषामानन्दोऽतो महान्मतः ॥१८६१॥

The bodies of those great ones (lit. great Ātmans) are subtle, pervasive and, therefore, the joy of these is considered/accepted as greater¹ than (all) the joys (mentioned) earlier. [1861]

¹ Actually there should have been used the comparative form *mahattaram* instead of the positive form *mahān*.

नानाद्वन्द्वोपघातार्थहेतूनां बहुलत्वतः ।

आजानदेवानन्दोऽतः पूर्वेभ्यः स्याच्छताधिकः ॥१८६२॥

Because the causes for destroying various pairs¹ (in the sorrows, lit. calamities that befall) have multiplicity, therefore, the joy of Ājānadeva(-loka) is greater by a hundred than (all) the earlier (mentioned human joys). [1862]

¹ These refer to the various causes of *sukha* and *duḥkha*. Cf. *Gītā* 15.5: *dvāṇdvair vimuktāḥ sukhaduḥkhasaṃjñaiḥ*

श्रोत्रियोऽधीतवेदः स्याज्ज्ञातवेदार्थ एव यः ।

कृत्स्नचोदितकारित्वात्सर्वपापविवर्जितः ॥१८६३॥

A Śrotriya is one who has studied (lit. recited) the Veda text

and also (if he) has understood the meaning of the Veda.¹ He is devoid of (i.e. has separated himself from) all (kinds of) sins/blemishes by being a performer of all (activities) enjoined (by the Śruti).² [1863]

¹SP has clarified Sureśvara's idea of a Śrotriya thus: *artha-māntam adhyayanam ekaśākhāviṣayaṃ yasya*.

²This is the significance of the word *avijina*.

आजानदेवावधिककामानुपहताशयः ।

ततः परेषु भोगेषु जाततृष्णश्च यः पुमान् ॥१८६४॥

(This refers to) a human being whose thought is unaffected by any desire (for joy which is) greater than (that of) Ājānadeva(-loka)— and, thus, that human being, who has become thirsty (i.e. has a longing) for (even greater) joy(s). [1864]

This is to indicate the absence of any other and greater joy.

आजानदेवानन्देन समं तस्य च यत्सुखम् ।

अस्याकामहतत्वेन सुखोत्कृष्टिरिहोच्यते ॥१८६५॥

Whatever be the happiness of him as equal to the joy of Ājānadeva(-loka) is stated here as the (great) excellence of happiness, because of this person's becoming of a mind which is unaffected by desire(s). [1865]

verses 1866-1873 explain the nature of the cause for gradation of joys.

श्रोत्रियावृजिनत्वे द्वे तुल्ये एवाविरिञ्चितः ।

अकामहतताहेतोर्वृद्धौ ह्लादो विवर्धते ॥१८६६॥

The nature of being a Śrotriya and that of one free from (every) sin¹ are equal of each other till (i.e. up to) when

he becomes one with Viriñci;² for his rising to a higher status (*vrddhau*) and acquiring bliss only increases (or keeps on increasing) owing to (or, because of) his being unaffected by (any) desire(s) whatever. [1866]

¹*śrotriāvrjīnatva* should be read for *śrotriyatvāvrjīnatve*.

²This is for Hiranyagarbha.

पुर्वपुर्वोपभोगेभ्यो यादद्यावन्निवर्तते ।
कामौ विवर्धते पुंसस्तावत्तावत्सुखं हृदि ॥१८६७॥

Desire of a human being keeps on increasing as long as he keeps on turning away from every earlier enjoyment; so also does there continue for him pleasure during that while. [1867]

The argument is: One after another, enjoyments keep on luring him and he has ever-increasing pursuit of them.

कामैकक्षयतन्त्रैव यस्मात्पुंसः सुखोन्नतिः ।
अकामहततैवातः पूर्वाभ्यां साधनं परम् ॥१८६८॥

Since the increase in happiness for a man is only dependent on the decrease (or, loss of) one's desire (leading to the pursuit of another desire), therefore, being unaffected by desire alone is such a means to happiness as is the best (lit. the highest).

[1868]

साधनत्वं समानं स्यान्नयाणामिह यद्यपि ।
कामक्षयप्रकर्षोऽत्र ह्युत्कृष्टाह्लादसाधनम् ॥१८६९॥

Even if the nature of the means¹ is (just) the same for all of the three (*varṇas*), there is in this respect (*atra*)² the greater measure (*prakarṣa*) of the loss of desire the (best) means of the best of joys. [1869]

¹This is *akāmahatatā* mentioned in just a little before, i.e.

in verse 1866.

²Cf. SP: *atrety adhikṛtapuruṣoktiḥ*, this refers to various desires of the different persons in different castes, Brāhmaṇa, Kṣatriya and Vaiśya.

समुच्चयविवक्षात्र न मनागपि युज्यते ।
कर्तृत्वादिसमुच्छेदिज्ञानस्येहाश्रितत्वतः ॥१८७०॥

There is not here even a little of an intention to speak about combination (of knowledge and action) to be entertained; since, here (in the pursuit of the knowledge of the Brahman) only (that) knowledge which destroys (the notions of) agency etc. is the support (or basis, of the ensuing matchless joy). [1870]

समुच्चयनिवृत्त्यर्थं न्यायश्चापि पुरोदितः ।
नातः समुच्चयाशेह कर्तव्या सूक्ष्मदर्शिभिः ॥१८७१॥

The argument/reason (*nyāya*) for the rejection of (any of the) combinations is also mentioned (i.e. pointed out) earlier;¹ therefore, those who see (this matter of, i.e. in relation to liberation)² should carefully keep from entertaining any hope for (the support of any of the) combinations. [1871]

¹For example, in the SV.

²Cf. SP: *iheti mukter ukṭiḥ*.

साधनत्वं यतस्तुल्यं श्रोत्रियावृजिनत्वयोः ।
अवरेष्वपि भोगेषु न चोत्तमसुखं ततः ॥१८७२॥

(Then) since being a Śrotriya and being free from (any) sin have similarity in respect of being the means to (the highest) happiness, therefore, there does not lie in (other) lower means the highest happiness.¹ [1872]

¹Hereby is averted even the combination of these means (SP).

अकामहततैवात्र तारतम्यात्मकत्वतः ।
भेदादुत्तमसौख्यस्य साधनं चोत्तमा भवेत् ॥१८७३॥

Thus, with the idea of gradation (among various means) in view, the state of one's being unaffected by any desire here (*atra*)¹ understood as the best, the means of the best happiness owing to variety² (in joys). [1873]

¹Cf. note 2 on verse 1869 above.

²That is, various measures.

Verses 1874-1879 point to śrotriyatvāvrjnatve as supported by the Taittirīya's scriptures.

युवा साधुयुवेत्येवं तैत्तिरीयश्रुतीरणात् ।
अधरेष्वपि वाक्येषु श्रोत्रियादि विवक्षितम् ॥१८७४॥

On the basis of the statement in the Taittirīya Śruti: *yuvā sādhu-yuvā* ...,¹ this, viz. Śrotriya etc., is intended to be stated in subsequent sentences also. [1874]

¹SP clarifies: *sādhu-yuvā* as *avrjina* and *adhyāyaka* (which follows that word in the Taittirīya) as Śrotriya; cf. *Taittirīyopaniṣad* 2.8, in the same context (i.e. of joys).

विराट्प्रजापतिर्ज्ञेयस्त्रैलोक्यात्मकदेहभृत् ।
हिरण्यगर्भो ब्रह्मात्र तथा ब्रह्मगिरोच्यते ॥१८७५॥

Prajāpati (mentioned here) is to be taken for Virāj, the one that supports the body in the form(s) of the three worlds; in the word *brahman* is mentioned Hiranyagarbha, the Brahman. [1875]

This answers the doubt if *prajāpatiloka* and *brahmaloka* convey the same meaning.

अतः परमनन्तत्वाद्गणितं विनिवर्तते ।

यत एवमतः प्राहाथैष एवेति नः श्रुतिः ॥१८७६॥

Since (this) calculation now, after this (i.e. the statement about gradation in joys), recedes (i.e. is given up), therefore, the Śruti has stated for/to us *athaiṣa eva* [1876]

This begins the explanation of *athaiṣa*

अनेनातिशयवता ह्यस्मद्गोचरवर्तिना ।

अपास्तातिशयानन्दं सुखेनेहानुमीयते ॥१८७७॥

By (i.e. From) this happiness, which has (such) excellence and which is within our experience, is understood (lit. inferred) here¹ (the highest truth, the Ātman) which has surpassed¹ (even the most) excellent joy. [1877]

CP clarifies *iha* as *anumānabhūmi*. This *anumāna* is explained by the statement of the related *vyāpti* in the next verse.

¹ Literally, given up or set aside.

एवस्तातिशयनिष्ठत्वाल्लोके सातिशयात्मनः ।

यतोऽतोऽतिशयवता गम्यतेऽनतिशयं सुखम् ॥१८७८॥

Since, in the world, what is most excellent in nature rests on (i.e. has a basis in) what has destroyed (all other) excellences, therefore, (here) is understood an unsurpassed happiness by (the qualifier) *atiśayavat* 'possessing (the highest excellence)' (of the state of the Ātman). [1878]

CP and NKL (ms. p.704) state it thus: *sukhotkarṣatāratamyam cid viśrāntam taratamabhāvatvāt paiṇāmatāratamyavat*.

यत्रैतानि समस्तानि निष्ठां यान्ति परात्मनि ।

परमोऽसाविहानन्दः सर्वानन्दातिलङ्घनात् ॥१८७९॥

Here (among all graded joys), there is, in this highest Ātman, the highest joy wherein all (happinesses) reach their acme, because it has surpassed all of (those) joys. [1879]

Verses 1880-1885 state in the inference about the most excellent joy in the Brahman from the greater excellence of measure of joy.

एषोऽस्येति प्रतिज्ञात आनन्दः सोऽनुमानतः ।
निष्ठां प्रतीचि गमितः उत्तरोत्तरवृद्धितः ॥१८८०॥

That joy, which is stated in *eṣo 'sya ...*, is brought to its acme by inference (which is invoked) by the rise (of every joy) in every later one (of the joys). [1880]

अविज्ञातपरानन्दान्प्रत्येषानुमितिर्मता ।
साक्षाज्ज्ञातात्मतत्त्वानां प्रत्यक्षतममेव तत् ॥१८८१॥

This inference is taken to be referring to the highest of joys coming from what was not known (before, viz. the Ātman within); this is the most directly perceptible (happening) in the case of those who have a direct perception of the truth of the Ātman. [1881]

SP cites in support: *uktaṁ hi— sa eṣa paramānando vitṛṣṇaśrotriyapratyakṣo 'dhigata iti* (possibly a remark of Bhartr̥prapañca).

अकामहतधीगम्य आनन्दः प्रत्यगात्मनि ।
यः स एव यथोक्तेभ्यः परमः स्यादनन्ततः ॥१८८२॥

That joy, which is to be experienced in (the knowledge of) the inner self by those who are unaffected by desire(s), is alone the highest, (as compared to those resulting) from them which are stated (so far). [1882]

तथा च भगवान्व्यासः सर्ववेदार्थतत्त्ववित् ।
स्वयं प्राहेममेवार्थं कामानर्थजिहासया ॥१८८३॥

So has the revered Vyāsa, the knower of the meaning of the entire Veda, said, on his own, this very thought in order that the undesired resulting from desire(s) be abandoned (by his listeners). [1883]

The next two verses are Vyāsa's verses.

यच्च कामसुखं लोके यच्च दिव्यं महत्सुखम् ।
तृष्णाक्षयसुखस्यैते नार्हतः षोडशीं कलाम् ॥१८८४॥

Whatever be the happiness from (the fulfilment of) desires and so also whatever be the great joy of divine nature, they do not (i.e. cannot) deserve (to become, or to be equal of even) a sixteenth part of the pleasure (resulting) from the loss (or, overcoming/destruction) of hankering. [1884]

This is *Mahābhārata* 12.168.36.

यतो यतो निवर्तते ततस्ततो विमुच्यते ।
निवर्तनाद्धि सर्वतो न वेत्ति दुःखमण्वपि ॥१८८५॥

A person is freed from every one (of the desires) from whichever he desists (or, moves away). (Indeed) by desisting (or, moving away) from all (of the desires) it is that he does not experience even a very small misery, or unhappiness. [1885]

This is *Mahābhārata* 5.36.14.

verses 1886-1894 conclude the thoughts on *etasyaivānandasya trām*.

सलिलादिगिरा योऽर्थः प्रत्यज्ञायि पुराखिलः ।
ब्रह्मलोकान्तवाक्येन तस्य स्यादुपसंहतिः ॥१८८६॥

What thought was earlier enunciated in its entirety by the statement (of the Śruti) that began with (the words) *salila* has its conclusion in (i.e. has been concluded by) the statement ending with the sentence about Brahmaloka. [1886]

प्रश्नार्थेऽस्मिन्समाप्तेऽपि पूर्ववत्तं मुनिं नृपः ।
अन्वयुङ्क्तात ऊर्ध्वं त्वं मुक्तये ब्रूहि यत्परम् ॥१८८७॥

Even if this matter under question was thus completed (i.e. completely explained), the king demanded of the sage, (even) as before, 'Now, after this, you should say what is a greater (means) for (achieving) liberation'. [1887]

याज्ञवल्क्योऽपि राज्ञैवं पृष्टः सन्पूर्ववत्तदा ।
अबिभेदन्यतो हेतोर्न त्वसामर्थ्यकारणात् ॥१८८८॥

Yājñavalkya, on his part (*api*), when thus asked by the king as before, felt fear¹—(but), for some other reason and not owing to his inability (to answer). [1888]

¹The editor of the AnSS edition reports that, while he read in the verse the verbal form *abibhet*, he has ignored the reading *abibhyat* which occurred in the three manuscripts consulted and which is a grammatical error. NKL ms. does not offer any help with regards to this.

सर्वज्ञत्वान्मुनेर्नाभूत्प्रश्नार्थाज्ञानतो भयम् ।
कारणं त्वन्यदेवातो यतः श्रुतिरभाषत ॥१८८९॥

Because of the sage's omniscience, therefore, (it is to be remembered that) he did not feel fear (which would arise) from ignorance about the thought (about which the king) questioned—there was altogether (*tu ... eva*) a different reason from that (viz. fear etc.), as the Śruti has declared (subsequently). [1889]

अविवक्ष्मयं राजा कामप्रश्नबलाश्रयात् ।
 किंज्योतिरित्येवमादिमप्राक्षीन्मां पुनः पुनः ॥१८९०॥
 अप्रत्याख्येयो ह्यर्थश्च सत्यस्यावश्यरक्षणात् ।
 स्वयंज्योतिष्ट्वनिर्णीतिः कृतातोऽनवशेषतः ॥१८९१॥

(The Śruti had this in view:) 'May the king not ask me, who am not now wishing to say (i.e. answer), the (same) questions such as *kinjyotir* ..., again and again, emboldened by (or, lit. gathering strength from) being told to ask (whatever was) his desire (to ask). [1890]

Indeed, the matter (which the king asked) is not to be overlooked (or, lit. discarded), since the truth has invariably to be maintained. Therefore, there is (already) given a decision, viz. (The Ātman has) the nature of being self-illuminating, without leaving anything to be said'. [1891]

Before giving the answer which is stated as coming from the ruti, Sureśvara provides some introductory to it in verse 1890ff.

निर्णीतेऽप्यथ मां राजा पुनः पुनरपृच्छत ।
 अत ऊर्ध्वमिति गिरा निरुणद्धयैव मां नृपः ॥१८९२॥

'When (thus the matter has been fully) decided, the king has asked me again and again, viz. the king does again hold me by the words *ata*¹ *ūrdhvam*' [1892]

In verses 1892-1893, there is the statement as to why the sage felt fear.

¹Sureśvara uses *ataḥ* in the place and sense of *atha*. Read P: *athaśabdo 'taḥparyāyo niruṇaddhīty asmāt pūrvam sam-
 adhyate*.

कामप्रश्नाङ्कुशेनैव मां वशीकृत्य मद्गतम् ।
 समादित्सति निःशेषं ज्ञानं राजातिपण्डितः ॥१८९३॥

‘The king, (who is) so highly learned, wishes to draw (lit. take) out of me the entire knowledge which I possess (lit. which obtains in myself), after winning me over by the goad (in the form) of the question(s) (to be asked) at will (or, to the full extent of his desire).’ [1893]

इत्येष भयहेतुः स्याद्याज्ञवल्क्यस्य नान्यतः ।
भयहेतोरविद्यायाः सर्वज्ञत्वादसंभवात् ॥१८९४॥

Thus, this is the reason for the fear of Yājñavalkya; (there is) not (any other fear) from elsewhere. This is (to be so understood), since there is no possibility of existence of the cause of (any possible) fear (in him), viz. ignorance, owing to (or, because of) his omniscience. [1894]

Verses 1895-1896 point out that the sage’s fear was justified by the thought about not revealing the lore of the Brahman, so suddenly.

असकृन्निर्णयोऽकारि पृष्टे वस्तुन्यशेषतः ।
अरौत्सीन्मां तथाप्येष सर्वस्वादित्सया नृपः ॥१८९५॥
मेधावी पण्डितोऽतोऽयं ब्रह्मस्वादानकारणात् ।
न बिभेति यतस्तस्माद्धेतव्यं जनकाद्भयम् ॥१८९६॥

Not once (i.e. several times) was the decision given in respect of the full matter (which was put) under question. And, yet, this king has held me (by further questioning) with a desire to draw (lit. take) out of me all my belonging (viz. knowledge); [1895]

therefore, this king who is intelligent and (highly) learned, for the purpose of taking (out) all my wealth, (in the form of) the knowledge of the Brahman. Since (thus) he does not entertain any fear, therefore, I should be very much afraid of Janaka. [1896]

These verses reiterate what was in the mind of the sage. SP

concludes the comment on this verse thus: *yogye 'pi pātre muktiphalam jñānam sahasā nopadeṣṭavyam iti vākyārthaḥ*.

Verses 1897-1909 discuss the thought in BU 4.3.35. Yet, in verses 1897-1901, it is explained as to how the sentence *sa vā eṣa* ... is expressive of some objection, and in verses 1902-1909, of transmigration from one world to another.

ननु प्रश्ना यथोक्ताश्चेन्निर्णीतार्थाः परोक्तिभिः ।
अनिर्णीतं किमुद्दिश्य नृपोऽप्राक्षीन्मुनिं पुनः ॥१८९७॥

(A question is asked:) 'Indeed, if the questions have already, mentioned in earlier statements (and) the matters/thoughts in them (or, relevant matters/thoughts) decided (fully); with what undecided (matter) in view, did the king ask the sage again?'

[1897]

SP points to what is already stated; the questions beginning with *kimjyotiḥ* ... and the answers *ādityajyotiḥ*

स्वप्नबुद्धान्तसंचार आत्मनो यः पुरोदितः ।
दृष्टान्तत्वेन राज्ञासौ सर्वोऽपीह विवक्षितः ॥१८९८॥

What was already told, viz. the movements/activities of the (individual) Ātman in the dream and the waking states, by way of illustrations—all of it is here intended by the king (for asking).

[1898]

तस्य दाष्टीन्तिको योऽर्थो यावत्साक्षान्न कथ्यते ।
मुमुक्षति न तावत्तं राजा प्रश्नार्थशेषतः ॥१८९९॥
दृष्टान्तस्य सुषुप्तेश्च नार्थं दाष्टीन्तिकं जगौ ।
ब्रह्मास्मीत्यागमाद्बोधः सुषुप्तोदाहृतेर्मतः ।
दाष्टीन्तिकोऽर्थः प्राज्ञस्य दृष्टान्तस्यावशेषतः ॥१९००॥

(So) till when the matter for which illustrations are given (*dārṣṭāntika*) is not directly expressed/stated (in the sage's

replies), the king did (lit. does) not wish to give up (asking questions),¹ for the reason that there was yet some remainder in (the answer to) question(s); [1899]

for, (the sage) did not mention (lit. sing) the *dārṣṭāntika* for the illustration of the deep sleep state; viz. the consequent knowledge arising from the illustration of the deep sleep state as (*aham*) *brahmāsmi*— which is the *dārṣṭāntika* matter for the illustration of Prājña (form of the Ātman) and, also (therefore), as its remainder (to be said or explained). [1900]

These two verses explain the meaning of *athākāmayamānaḥ*

....

¹Or, he would not leave the sage.

उक्ते दाष्टान्तिकेऽर्थेऽस्मिन्प्रश्नार्थस्य समाप्तिः ।
सर्वमुक्तं भवेद्यस्मादतः सोऽर्थोऽधुनोच्यते ॥१९०१॥

Since there is completion of the matter under question when the *dārṣṭāntika* has been pointed out; therefore, now is stated that matter whereby everything should have become stated (lit. said). [1901]

असङ्गो मत्स्यवत्प्रत्यङ्गामकर्मादिभिः क्रमात् ।
समेति स्वप्नबुद्धान्तौ यथायं स्ववशस्तथा ॥१९०२॥
सहेतुरस्य संसारः परलोकेहलोकयोः ।
सविस्तरः स वक्तव्य इत्यर्थेयं परा श्रुतिः ॥१९०३॥

As (this inner self), being under the control of its own becomes inclined towards within (*pratyani*)¹ united with the dream and the waking states, one after another, together with its desire and activity etc., like a great fish (with both the banks of a river/stream); so, [1902]
is the transmigration of this (one) between/in this and the other *lokas*— it has to be narrated in details; therefore, the subsequent Śruti is for the purpose of stating the same. [1903]

बन्धो बन्धनहेतुश्च मोक्षस्तद्धेतुरेव च ।
सविस्तरः प्रवक्तव्यस्तदुक्त्यर्थो परा श्रुतिः ॥१९०४॥

Bondage and the cause of bondage as also liberation and the cause of it have to be told in details; for stating the same (therefore) has proceeded the subsequent Śruti. [1904]

जाग्रत्स्थानात्ततः पूर्वं स्वप्नमात्मा प्रवेशितः ।
जाग्रद्भूमिं स नेतव्यो दाष्टान्तिकविवक्षया ॥१९०५॥

Then, according to what is intended by the *dārṣṭāntika*, the Ātman is first introduced from the waking state (moving) to the dream state, it is (later) to be taken to the waking state again. [1905]

This is the purport of the sentence *sa vā eṣaḥ*

आनन्दनिर्णयान्तं तु संप्रसादवचो यदा ।
तदा निगमनार्थं तत्प्रतिज्ञातार्थगोचरम् ॥१९०६॥
अलुप्तदृष्टिरात्मायं यथोक्तं स्वप्नबोधयोः ।
प्राज्ञेऽपि च तथैवायं यद्वै तदितिवाक्यतः ॥१९०७॥

As the statement about the deep sleep state has at its end the explanation of (the nature of) joy, so also for concluding the same to (the state) which is the subject matter of the proposition, [1906]

namely, this Ātman has its (power of) seeing never lost, as this is stated in the dream and the waking states; so also is this one even in Prājña state (to be understood) from the sentence *tad vai* [1907]

The argument in the above is briefly thus: As in the two states of dream and waking, in the deep sleep state also the Ātman does not lose its power of seeing.

अतिकारकहेतुश्च यथात्मायं सुषुप्तगः ।

कूटस्थदृष्टिमात्रत्वात्तथा स्वप्नप्रबोधयोः ॥१९०८॥

As, owing to its having only the immutable (power of) seeing, this Ātman is in the deep sleep state above (every) cause of activity, so it is in the dream and the waking states also.

[1908]

इत्येवं पूर्वसिद्धेऽर्थे निगमार्थं पुनर्वचः ।

स वा इत्यादिकं ज्ञेयं न तु नाशादिशङ्कया ॥१९०९॥

Thus, it is to be known that there is once again the statement *sa vā* ... for concluding what has been earlier argued (lit. proved) and (*tu*) not owing to a doubt about the perishing (of it).¹

[1909]

¹NKL (ms. p.706) states this neatly thus: *supto mṛtavan naṣṭo deśāntaram gato veti śaikānirāsārtham kiṃ na syād ity āha na tv iti.*

Verses 1910-1925 discuss the thought of BU 4.3.36; there is yet the beginning of the description of transmigration in verses 1910-1920.

इत आरभ्य संसार आत्मनो वर्ण्यतेऽधुना ।

स्वप्नाद्बोधाप्तिवच्चास्माल्लोकाल्लोकान्तरं गतः ॥१९१०॥

इत्यर्थप्रतिपत्त्यर्थं दृष्टान्तोऽत्राभिधीयते ।

सुखावबोधसिद्धयर्थं श्रोतुरर्थे विवक्षिते ॥१९११॥

Now, beginning with this (or, from this verse) is presented the description of the Ātman's transmigration.¹ (Thus: The Ātman) has moved from this world to another as in (getting or moving) from the dream state to the waking state (and vice versa)—

[1910]

to explain/convey this happening (*artha*), there is here stated the illustration, so that there is secured (thereby) an easy understanding of the listener in respect of the matter intended

for conveying.

[1911]

¹This explains *tad yathānah* ... (BU 4.3.34).

नानार्थसाधनैर्मार्गे यथानः सुसमाहितम् ।
 शब्दान्नानाविधान्कुर्वद्गुरुभारप्रपीडनात् ॥१९१२॥
 व्रजेच्छाकटिकेनेह देशान्तरमधिष्ठितम् ।
 अनसस्तद्गताच्चार्थाद्विलक्षणवपुर्भृता ॥१९१३॥
 स्वार्थेनाधिष्ठितं गच्छेत्पथि शाकटिकेन तत् ।
 दृष्टान्तार्थेन संबन्ध एवमेवेति भण्यते ॥१९१४॥
 भुक्तदेहादिदं लिङ्गमुत्क्रान्तं भोगसंक्षयात् ।
 याति देहान्तरं तद्वत्कर्मविद्यादिसंभृतम् ॥१९१५॥

As a cart, well-laden with various means (for producing happiness for, or for serving various purposes of, men) and producing different kinds of sounds owing to the damage caused by heavy weight [1912]

would move/go to another place (lit. region), driven (lit. occupied) by the cart driver, i.e. by a cart driver bearing/having a body quite different in nature from the cart (itself) and the (burden/weight of) things (on it), [1913]

laden with things of its own (it) would move on the way—only thus is the connection of the *dr̥ṣṭānta* 'illustration' (with the *dār̥ṣṭāntika* in hand); only thus it is said: [1914]

this subtle body moves on to another region (or, *loka*), departed upwards as it has from the body (earlier) enjoyed, because there is (now) the loss/perishing of (its) enjoyment (of experiences) and (at this time) laden with (the effects of) activity, (specific) knowledge etc. in the same way (as the cart). [1915]

वियुक्तं देवताभिः सत्कर्मसंभारसंभृतम् ।
 अनौवल्लिलङ्गमेत्येतत्प्रत्यगात्मार्थसिद्धये ॥१९१६॥

(The above is to mean:) Separated from the deities,¹ laden

with the burden of good activities, like the cart, the subtle body moves on for securing (its end), viz. merging (only) into the inner self. [1916]

¹This is said for emphasising *karmavidyādisambhṛtam* in the preceding verse.

शरीरवचसा चात्र लिङ्गमेवाभिधीयते ।

शरीरदेशसंस्थत्वान्न तु प्रत्यङ्ङसंहतेः ॥१९१७॥

Further, (it should be noted) here it is only the subtle body meant by the word *śarīra*, because it had (earlier) a support in the whole of the body and not because of its remaining apart from (lit. of its not being joint with) the inner self.

[1917]

SP points out the purpose of this verse thus: *ātmaikādaśa ityūdvā ātmaśabdasya linge 'pi prayogāt tad evātra gatiyogyaṁ vivaksitam ity arthaḥ*.

प्राज्ञेनाधिष्ठितं गच्छेद्रथिना स्वार्थरूपिणा ।

प्रत्यग्धिपः समारोहमन्वात्मारूढवद्यतः ॥१९१८॥

प्राज्ञेनेहात्मना तस्मादन्वारूढोऽभिधीयते ।

भानुनेवोदपात्रादेरारोहो नात्मनः स्वतः ॥१९१९॥

(The subtle body) would move on (the way), occupied by Prājña who has assumed the form of the things etc. on it, viz. who is the master of that chariot,¹ for it is occupied by the Ātman even like (i.e. with) the (higher and higher) rise of the knowledge about (the nature of) the inner self;

[1918]

the Ātman (which is associated with the subtle body) is mentioned here as occupied by Prājña; for there cannot be any rising (higher) by/of the Ātman as (it cannot be there in the case where) a pot filled water has (in it the occupying of it, the rise) by the sun.¹

[1919]

¹This refers to the reflection of the sun in a pot filled with water and the popular way of calling it as the occupying of it by the sun.

प्राक्चोक्तमात्मनैवायं ज्योतिषेत्यादिकं वचः ।
आत्मानं रथिनं विद्धीत्यपि श्रुत्यन्तरे वचः ॥१९२०॥

And already a statement has been made: *ātmanaivāyaṃ jyotiṣā* ...; ¹ so also is there in another Śruti the statement *ātmānaṃ rathinaṃ viddhi*.² [1920]

¹BU 4.3.6.

²This is *Kāthopaniṣad* 3.3.

Verses 1921-1930 specify the movement (gamana) as caused by vairāgya. But, in verse 1926, there begins the exposition on the thought content of by 4.3.37; it runs up to verse 1971.

मर्मकृन्तनसंभूतवेदनार्दितमानसम् ।
हिविककालक्षणं शब्दं मृतिकाल'उपस्थिते ॥१९२१॥
उत्सर्जयति लिङ्गं तदिति प्रत्यक्षगोचरः ।
तदिदं भण्यते श्रुत्या पुंसां वैराग्यजन्मने ॥१९२२॥

It is the direct object of everyone's experience that the subtle body¹ moves on (i.e. departs from a body), leaving it when the time of death has come, (producing) strenuous breathing sound and when a person's *manas* is afflicted by the painful feeling caused by the tearing vitals—this is (so) stated in order that there is produced (lit. rise of) aversion (for world life) in human beings. [1921-1922]

¹This is the Ātman associated with the subtle body. Or, SP states: *tallīgam iti sābhāsaprāṇoktaḥ*

मर्मसूतकृत्यमानेषु मुच्यमानेषु संधिषु ।

मुमूर्षतोऽत्र यद्दुःखं स्मर्यतां तन्मुमुक्षुभिः ॥१९२३॥

Let it those who wish to achieve liberation remember the misery/pain experienced by a person, who is about to die, when his vitals are being torn and his joints (in the body) are becoming loose (lit. are leaving their normal built). [1923]

कस्मिन्काल इदं जन्तोः किंनिमित्तं च जायते ।
इत्यस्य प्रतिपत्त्यर्थं परो ग्रन्थोऽवतार्यते ॥१९२४॥

(Now) follows the subsequent portion of the Śruti in order that a person comes to understand when (lit. at what period of time in the life) this¹ comes to a person (that was-born) and why it is caused. [1924]

¹The word 'this' refers to what is stated in the preceding verse, viz. *duḥkha*.

उदानवायौ प्रबले यत्रैतत्स्यान्मुमूर्षतः ।
ऊर्ध्वोच्छ्वासी पुमांस्तत्र यथोक्तं जायते मृतौ ॥१९२५॥

When this would occur in the case of a person, who is about to die, while/when the Udāna wind has become stronger and then the person would have his breath going upwards¹—what is (thus) stated happens at (the time of) death. [1925]

This is in answer to the first question in the preceding verse.

¹That is, when he is breathing his last.

Now follows the discussion on BU 4.3.36.

पिण्डोऽणुत्वं यदाभ्येति जरयाभ्यर्दितस्तदा ।
उपतापान्वितो वा सन्यथोक्तं प्रतिपद्यते ॥१९२६॥

When the body (lit. lump of a person) becomes thin,¹ as it is affected by old age, or (in other words) a person becomes

afflicted by heat, then he comes to have (or to suffer) the condition as stated. [1926]

This answers the second question in verse 1924 above. Also, it explains *sa yatrāyam* ... in the Śruti. And this is further explained in the next few verses.

¹This is explained by BUB as 'assuming the state of a subtle body'.

अणिमानमणोर्भावं कार्श्यं देहो यदैत्ययम् ।
जरया रोगहेतोर्वा ऊर्ध्वोच्छ्वासी तदा भवेत् ॥१९२७॥

When this body (of a person) becomes emaciated (or, thin), i.e. it comes to have the nature of an atom, viz. (extreme) thinness, (either) by old age or by the (person's) disease, then he would be breathing his last. [1927]

जरया रोगतो वास्य जायते विषमाग्निता ।
सम्यक्पक्वितस्ततोऽन्नस्य मन्दाग्नेर्नोपजायते ॥१९२८॥
रसादिधातुभिर्देहस्ततोऽनुपचयादयम् ।
अबलः सन्पतत्येष जीर्णमन्दिरवत्क्षितौ ॥१९२९॥

On account of old age or disease, there comes to this (dying person) uneven (condition of) fire/heat ¹ (within him) and there does not result proper digestion of food by (that) weakened heat. [1928]

So also, in the absence of the collection of (digestion-)juices and essences, ² the person, becoming weak, falls down, like a dilapidated temple, on the ground. [1929]

¹That is, impaired digestion.

²That is, constituent elements in the body.

अथैवं कृशतापन्ने देहेऽन्तरुपजायते ।
या वृत्तिः सोच्यते साक्षाद्दृष्टान्तोक्त्या प्रयत्नतः ॥१९३०॥

Or, (to explain this otherwise:) then, the condition, which occurs in the (person's) thinned body, is stated with an illustration, with an effort (so as to make it) directly perceptible. [1930]

This points to the purport of *tad yathāmram*

Verses 1931-1934 explain the thought in *tad yathāmram vodum-baram*

आम्रं यथा रसादाढ्ये स्वस्माद्धृन्तात्प्रमुच्यते ।
तथेहान्नरसग्लानौ लिङ्गं देहात्प्रमुच्यते ॥१९३१॥

As a mango fruit becomes loose from its stem, when its juice has become thinned (i.e. has lessened); so also does the subtle body become separated from this person's (gross/visible) body, when the digestive juices of the food (that is eaten) have become less. [1931]

वृन्ते निबध्यते येन रसेनापरिपाकतः ।
स रसो बन्धनं ज्ञेयो वृन्तं वा बन्धनं मतम् ॥१९३२॥

That juice (in the fruit), whereby the fruit is held at (lit. kept firmly tied to) the stem, up to its purification, is known as its bond (to the tree); or the stem is understood as its bond. [1932]

SP clarifies thus: *karanavyutpattyā raso vādhikarāṇavyutpattyā vṛntam vā bandhanam.*

वृन्तेनामस्य संबन्धो रसस्यापरिपाकतः ।
बाल्ये दृढो यथा तद्वन्नैवं पक्वरसस्य सः ॥१९३३॥

The connection of the mango fruit with the stem is firm in its early state of development (lit. its young state) and (continues to be so) till it has completely purified; (but it) does not remain so when the juice has fully ripened. [1933]

क्लैद्यमापद्यमानोऽथ पाककाल उपस्थिते ।
रस आम्रं धारयितुं नैवेहोत्सहतेऽबलः ॥१९३४॥

When it is time of purification, the juice in the fruit, becoming/remaining (only) moist, becomes weak and is unable to hold it here (i.e. to the stem). [1934]

Verses 1935-1939 point out the significance of more than one illustration.

गुरुत्वाद्धन्धनाद्धृन्ताद्रसाद्वाथ प्रमुच्यते ॥१९३५॥

The fruit is then separated from the stem, viz. the bond, on account of its becoming heavy or its purified juice. [1935]

नानाहेतुकपातस्य फलस्य प्रतिपत्तये ।
दृष्टान्तानामिहोक्तिः स्याद्भूयसां भिन्नरूपिणाम् ॥१९३६॥

There is here the statement of many example of various types in order that one understands the fall of a fruit having various factors as the cause(s) of its fall. [1936]

वृन्तादेवाम्रपातोऽत्र वृन्तेनोदुम्बरं सह ।
पतत्यश्वत्थपातस्तु पाकेऽप्यन्यनिमित्ततः ॥१९३७॥

Here (i.e. among these falls) the fall of a mango fruit is from its stem, whereas an Udumbara fruit falls off together with its stem. But the fall of an Aśvattha fruit is on account of some other cause(s). [1937]

बहुप्रकारसिद्धयर्थं वाशब्दव्याहृतिस्त्वह ।
बहुहेतुर्मृतिर्यस्मात्प्राणिनां जगतीक्ष्यते ॥१९३८॥

Here the utterance of the particle *vā*¹ is for establishing various kinds (of falls)—this is so done for the purpose of showing

that (in the *dārṣṭāntika*) death of beings in the world has for it many causes.² [1938]

¹The particle does not show here, as on other occasion, the idea of an alternative.

²SP adds finally: *tasmāt tatra na vivaditavyam*.

यथायमुक्तो दृष्टान्तः पुरुषोऽप्येवमेव हि ।
लिङ्गात्मा पुरुषो ज्ञेयस्तस्यैवेहाङ्गसंगतेः ॥१९३९॥

As this example (of the mango fruit) is (thus) stated, so also does a human being (become separated from his body). Here (in the text) one has to understand by the word *puruṣa* the Ātman in the subtle body, because of its non-connection (i.e. non-presence) here (in this body). [1939]

Verses 1940-1943 lead to one's understanding *anigebhyaḥ* to have as its sense the limbs such as ears.

श्रोत्रत्वगादिनाड्यश्च प्रोच्यन्तेऽत्राङ्गसंज्ञया ।
तेषु व्युह्यैव लिङ्गात्मा यतोऽलं स्यात्स्वकर्मणे ॥१९४०॥

Ears, skin etc. and veins are meant here by (the use of) the word *aniga* 'limb'; since, being bound with/in them, does the Ātman in the subtle body become capable of (accomplishing) its activity. [1940]

अङ्गस्य कृष्णसारस्य चक्षुषः करणस्य च ।
आश्रयाश्रयिसंबन्धे हेतुरन्नरसो भवेत् ॥१९४१॥

A juice of the (digested) food would become the cause for the connection (of the Ātman in the subtle body) with the limbs, viz. the black pupil of the eye (*kr̥ṣṇasāra*) and (every other) organ (of activity). [1941]

अन्नं दामेति चाप्युक्तं रसादिपरिणामतः ।

बाह्याद्देहात्तथैवान्तर्लिङ्गं स्वाप्नं प्रपद्यते ।

यथान्यायप्रतिन्यायौ यथा तत्रोदितौ पुरा ॥१९४९॥

देहाद्देहान्तरप्राप्तौ तथैवेति विनिर्दिशेत् ।

प्रतियोनि यथास्थानमित्यत्रापि तथैव तत् ॥१९५०॥

In the same way (*tathaiva*), the subtle form of the Ātman comes to the inner body of the dream state from the external body (of the waking state). As the words *yathānyāya* and *pratinyāya* have been stated there earlier, [1949]

so also should one mention (them) in connection with the movement from one body to another—i.e. *pratiyoni* in the sense of *yathāsthāna*. [1950]

Read SP: *sa vā esa etasmin samprasāde ratvetyādau dr̥ṣṭānte* *ratinyāyaśabdo yathānyāyaśabdas ca vyākhyeyavyākhyānatayā* *thoktau tathaiivātrāpi tau vācyāv ity arthaḥ. pratiyoniśabdārtham* *a ... yathā pūrvam pratiyoniśabdo yathāsthānam ityarthe* *ākhyātas tathaiivātrāpi dār̥ṣṭāntike tadvyākhyā draṣṭavyety arthaḥ.*

श्रुतकर्मानुरूपेण चक्षुराद्यनुरूपतः ।

प्रतियोनि यथास्थानमाद्रवत्येष जन्मने ॥१९५१॥

In conformity with (one's acquired) knowledge and acts (in this life), and also with the eye etc., does (the Ātman in the subtle body) move on for a birth¹ in *pratiyoni*, i.e. *yathāsthāna*, manner. [1951]

In the earlier verses were pointed out the meanings of the words *pratinyāya* and *pratiyoni* in the Śruti statement. This verse explains the meaning of the whole of the Śruti statement.

¹This is the meaning of *prāṇāya* in the text; it is explained in the next verse.

Verses 1952-1958 explain the word *maraṇa* 'death' as suggestive of *punarjanma* 'rebirth'.

देहान्तरगृहीत्यर्थं प्राणिनां मरणं यतः ।

प्राणायैति ततो वक्ति जन्मन्यसति नो मृतिः ॥१९५२॥

Since, in the case of living beings, there is death for assuming another body (later); therefore does the Śruti state *prāṇāya*; there is no death if there is not (another) birth. [1952]

This has reference to the accepted notion of transmigration of beings who have not sought liberation: Cf. *jātasya hi dhruvo mṛtyuḥ dhruvaṁ janma mṛtasya ca* (Gītā 2.27).

प्राणव्यूहाय चैवायमाद्रवत्यन्यदेहतः ।

स्थानेष्वव्यूढकरणो नालं स्यात्कर्मणे यतः ॥१९५३॥

And this one (viz. the Ātman with the subtle body) moves from another (i.e. earlier) body for (assuming another) shape of *prāṇas*, since it would not be able for (performing) any action, unless it has its organs placed in their places (in the body to be taken up later). [1953]

प्राणव्यूहस्य संसिद्धिः कथमस्येति शङ्क्यते ।

शरीरग्रहणाशक्तेरव्यूढकरणत्वतः ॥१९५४॥

न च देहान्तरं कृत्वा राज्ञो भृत्या इवासते ।

यतः कर्मसहायोऽयमेकाक्येवेह गच्छति ॥१९५५॥

(Now, or, in this connection) it is doubted, 'How does it occur in the case of this one (i.e. Ātman in a transmigratory body), to give arrangement/shape to *prāṇas*?' '(This is said as an answer:) because, being without properly placed/shaped organs, it would not be able to have a body (which is necessary for performing actions)'. [1954]

There cannot be for a king (any) servants, unless they have occupied other bodies;¹ since he would go all alone here (i.e. in death), aided only by his *karman*.² [1955]

¹That is: unless they exist as possessed of different bodies, or, unless they exist apart from the king.

²That is to say: the servants continue to exist even after the king's death and have thus a separate existence.

इत्यस्य परिहारार्थं दृष्टान्तोऽत्राभिधीयते ।
कृत्स्नं जगत्स्वभोगार्थं पुंसोपात्तं स्वकर्मणा ॥१९५६॥

For answering away this (doubt), there is an example given here (i.e. the Śruti). A person has secured the whole of the world for his own enjoyment,¹ through his own *karman*. [1956]

This precludes the need of the king's having some servants to accompany him at death.

¹Read SP: *atrāpi śrutir uktā. yat tu nāsyā bhrtyasthāniyāḥ antīti.*

तत्कर्मफलभोगार्थं कृत्वा देहं प्रतीक्षते ।
शुभं वा यदि वा पापं श्रुतकर्मानुरूपतः ॥१९५७॥

(That *jagat*) waits for his (other) body for his enjoyment of the results of his *karman*, be that auspicious or ill, in accordance with his knowledge and performance (of ritual) acts. [1957]

This argument of Sureśvara is properly based on the statement: *dbhāvitāḥ prapadyante tasmāt tat tasya rocate* in *Kūrma Purāṇa* 7.8 (12.7); *Mārkaṇḍeya Purāṇa* 48.40 and *Brahmāṇḍa Purāṇa* 4.32.

कर्मोपात्तानि भूतानि तत्प्रयुक्तानि देहिनः ।
कृत्वा देहान्तरं योग्यं तस्थू राज्ञोऽग्रगा इव ॥१९५८॥

The various elements which are acquired by a person (and) employed by him, assume a different body that is suitable (for his next body) and wait (for him to be born with that),

like the harbingers of a king (wait for him).

[1958]

Verses 1959-1966 show the connection of tat yathā ... with the matter under discussion.

तत्रैतस्मिन्यथोक्तेऽर्थे दृष्टान्तोऽप्यभिधीयते ।
विवक्षितार्थविज्ञानप्रसिद्धिः स्यात्कथं न्विति ॥१९५९॥

As to what is stated (earlier), in this regard, there is stated an example also; that is: with the idea as to how there could be established the particular knowledge of the intended matter.

[1959]

This is given in the next verse.

यथा राजानमायान्तं सद्गपानादिसाधनैः ।
बुद्ध्वा क्लृप्तैः प्रतीक्षन्त उग्राः सूतादयो जनाः ॥१९६०॥

(This is like) the persons of mixed castes, viz. the charioteer and others, keep waiting for a king, on having known that he is coming, with various means such as a good abode (for him), drinks and others (well) kept (ready for his welcome).

[1960]

उग्रे कर्मणि ये राज्ञा नियक्ताः पापकारिषु ।
उग्रास्तेऽत्राभिधीयन्ते जातितो वाभिधा भवेत् ॥१९६१॥

Those persons are described as *ugras* (lit. cruel) who are appointed by the king in the violent act against sinning persons. Or this name could refer to (those people) of mixed castes¹ by their births.

[1961]

¹ A child born of a *kṣatriya* man and a *sūdra* woman is called *ugra*. He is ferocious in his manners and takes delight in cruelty. Refer to *Manusmṛti* 10.9.

एन एनः प्रति तथा नियुक्ता ये नराधिपैः ।
प्रत्येनसोऽत्र ते ज्ञेया भिन्नास्ते स्वाधिकारतः ॥१९६२॥

They should be known here (i.e. in this context) as *pratyenas* who are appointed by kings in connection with this or that sin; or (perhaps) those who have swerved from their own duties. [1962]

रथवाहाश्च सताः स्य रथवाहनकोविदाः ।
ग्रामण्यो ग्रामनैतारः सैनाधिपतयो मताः ॥१९६३॥

Sūtas are those who drive chariots, viz. those who are well conversant with (the act of) driving the chariots. Grāmaṇīs are known to be the leaders of clans, i.e. leaders of armies. [1963]

ते यथा कर्मणोपात्ता राज्ञः प्रागेव चागमात् ।
अन्नपानगृहाद्यर्थान्कृत्वा राजप्रतीक्षिणः ।
राजाय नः समायातीत्यासते यत्नमास्थिताः ॥१९६४॥

As they are employed by king, because of tradition (or, because of his own knowledge about them)—they keep on waiting for the king, having kept ready (for his welcome) food, drinks, good abode (for him), etc. and are making (every) effort (for his comfort) on knowing 'Here is the king coming'. [1964]

यथैवं सर्वभूतानि भोक्त्रा कर्मादिकारणैः ।
अर्जितान्युचितं देहं भोक्तुर्भोगक्षमं तथा ॥१९६५॥
कृत्वा तत्प्राप्तितः पूर्वं यथा सुतादयो नृपम् ।
प्रतीक्षन्ते प्रयत्नेन ब्रह्मैतीत्यभिकाङ्क्षया ॥१९६६॥

As this is (known, so) are all the elements earned (i.e. mastered) by an enjoyer through the means of activity etc., and also a body fit for enjoyment by the enjoyer. [1965]
When (the enjoyer) would have effected that first, do the charioteer etc. (in the example above) keep on waiting for

the king, (do the activities of a person in his earlier life), with (ever ready) effort (on their part to welcome him properly), wait (for him) to be with the wish that he attains to the Brahman.

[1966]

Verses 1967-1971 explain why the word brahman here refers to the individual self (i.e. the inner self).

विज्ञानात्मन्युपक्रान्ते ब्रह्मेति यदिहोच्यते ।
स्वतो ब्रह्मत्वतस्तस्य संसारित्वमविद्यया ॥१९६७॥

What is mentioned here as the Brahman, (when a person) having thus attained (i.e. clearly understood the nature of) the particular Brahman (i.e. the inner self), he has become the Brahman by himself (i.e. attained oneness with it)—but (the continued) nature of him as that of a transmigratory being is only through ignorance.

[1967]

This explains the meaningfulness of the word *brahman* in *idam brahmāyati*.

कथं नाम मतिस्तस्य ब्रह्मास्मीति भवेदिह ।
श्रुतिस्तत्तत्त्वबोधार्थं ब्रह्मेत्याह ततो नरम् ॥१९६८॥

In order to explain as to how that human being would come to entertain the thought 'I am the Brahman,' that is, for his getting to know the truth, has the Śruti used the word *brahman* as referring to him.

[1968]

This is an alternative way of understanding the significance of the word *brahman*.

अनुवादो न तु विधिरेवंविदमितीर्यते ॥१९६९॥
सर्वान्प्रत्यविशिष्टत्वादेवंविदमितीरणम् ।
नानुवादः फलोक्तिर्वा यथाव्याख्यातवेदिनः ॥१९७०॥

In what is stated, there is a restatement, but not an injunction, viz. *evamvidam* ..., [1969]
 since it pertains to all (human) beings, without being any particular attribute (or, qualification) of some one in particular, or, rather, the statement *evamvidam* ... is not a restatement; or, it is the statement about the consequence/result (of knowing ...), with reference to one who knows the meaning/significance of verbs (i.e. one who understands that as an injunction). [1970]

करणानुग्रहीतृणि भूतानि च मुमूर्षतः ।
 कृत्वा देहं प्रतीक्षन्ते नृपस्येव गृहं नराः ॥१९७१॥

Also, the elements in the body of a person, who is about to die, his organs, and which have favoured (him earlier), assume another form/body (for him) and wait for him, just as men, belonging to him, (wait for him) after making a suitable abode (etc.) for him. [1971]

This is the meaning of *sarvāṇi bhūtāni pratikalpayanti*.

Now follows the discussion on BU 4.3.38; also these verses 1972-1975 state another alternative for the above.

एवं जिगमिषुं देवमनुगच्छन्ति के तु तम् ।
 गच्छन्तः कस्य गत्या वा स्वातन्त्र्येणात्मनोऽथवा ॥१९७२॥

(Here arise some questions:) 'Who are they that follow him? who is about to go?, with what (kind of) movement are they going?, on their own or through (the movement) of the Ātman?' [1972]

इत्यर्थमपि दृष्टान्तः पूर्ववद्वर्ण्यते पुनः ।
 इतः प्रवसतो देहाद्देहिनः कर्मसंक्षयात् ॥१९७३॥
 यथेह प्रयियासन्तमुग्रसूतादयो जनाः ।
 राजानमभिसंयान्ति प्राणास्तद्वन्मृतौ नरम् ॥१९७४॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

4.4

Śārīraka Brāhmaṇa

Verses 1-62 discuss BU 4.4.1, with an introductory remark on the relation between 4.3 and 4.4.

यत् उत्क्रान्तिरुक्तेयं विशिष्टफलसंगतेः ।
सर्वेषामविशिष्टातः स यत्रेत्युच्यतेऽधुना ॥१॥

Now that (lit. since, *yataḥ*) thus far (*iyam*) is discussed (lit. stated) the departure (of the Ātman, i.e. Jīva), owing to its association with (some) specific result(s) (of action) and as non-distinguished (in the case) of all (the Jīvas),¹ therefore is now (re-)stated *sa yatra* [1]

Read SP: *adhunā mokṣasyaiva susuptidārṣṭāntikasya śiṣṭatvāt tasmīn vaktavye punaḥ saṁsāroktir ayuktā punarukter ity āśāṅkya brāhmaṇāntaram avatārayati*. Also NKL (ms. p.710): *jāgrat-svapnasaṁcārākhyadrṣṭāntasyehalokaparalokasaṁcārah saṁsāro dārṣṭāntikaḥ svapnadrṣṭāntasya mokṣo dārṣṭāntikaḥ. tatra saṁsāra-rūpadārṣṭāntikasya varṇitatvāt ... ucyate*.

¹Cf. *evamvidam sarvāṇi bhūtāni pratikalpante* (BU 4.3.37 above).

करणानां समुत्क्रान्तिर्गमनं च तयोः समम् ।
प्रागुक्तं तत्र यन्नोक्तं तदेवेहोच्यतेऽधुना ॥२॥

It is already stated¹ that the departure of (all) the organs and that (lit. the movement (out of the body)) of the two² is similar (or, the same, i.e. together); here is now stated only that which was not stated (earlier).³ [2]

¹Cf. *tad yathā rājānam prayiyāsantam ...* (BU 4.3.38 above).

²This refers to Jīva and Prāṇa (i.e. *mukhya prāṇa*).

³That is, *tejomātrādānādi* 'taking up particles of light etc.', referring to the powers of other organs.

संसारस्याधिकारोऽयमा श्लोकोदाहृतेर्मतः ।

स यत्रेत्यत आरभ्य पुंसः संसारवर्णनम् ॥३॥

It is accepted that this topic of transmigration (of Jīva) (continues) up to the mention of the verse (later in Kaṇḍikā 6);¹ therefore, beginning with *sa yatra ...*, (there occurs) the description of the transmigration of an individual being.² [3]

This verse sets aside the idea that the whole of BU 4.4 pertains to transmigration.

¹Cf. *tad eṣa śloko bhavati. tad eva saktah saha karmaṇā ...* before *atho 'kāmayamāno yo 'kāmaḥ ...* in BU 2.6. This is to convey that, after there is description of the transmigration of the Jīva, there will follow discussion on liberation.

²*pum* refers to an individual Jīva which is subjected to transmigration.

पुंसः संसरणं पूर्वं सूत्रितं यत्समासतः ।

विस्तरस्तस्य वक्तव्य इत्यर्था वा परा श्रुतिः ॥४॥

Or, (possibly,) there is now to be described in full extent what was earlier told in brief, viz. the transmigration of an individual being and therefore (now begins) the subsequent (part of the) Śruti to convey that sense. [4]

It seems that, in the first two verses of this Brāhmaṇa (i.e. 4.4), Sureśvara has explained the connection between 4.3 and 4.4 in two ways—this is his own view. In this verse, he follows the thought of BUB—cf. *bhāṣyād bahir eva sambandhoktyā punaruktiṃ samādhāya bhāṣyoktasambandham anusṛtya tāṃ samādhatte* (SP). Read BUB: ... *savistaram saṃsaranam varṇa-*

yitavyam ity ārabhyate.

तत्संप्रमोक्षणं कस्मिन्पुंसः कालेऽभिजायते ।
कथं वेत्यादिकोऽत्रार्थो विस्तरेणोपवर्ण्यते ॥५॥

At what time does that detachment of the individual being occur (from the organs) and in what manner (or, how), etc.¹ is the matter that is described here in full extent. [5]

¹The word 'etc.' refers to the other body, other activities etc. of the newly acquired organs of the individual and the other means; cf. SP: *ādipadena dehāntaropādānopakaraṇārambhādi grhyate.*

प्रकृतात्मपरामर्शः सशब्देन विवक्ष्यते ।
संसारानर्थसंबन्धविज्ञानाय तमस्विनः ॥६॥

The word *saḥ* 'that' intends to convey the reference to the Ātman¹ which is the topic of the discussion, in order that there follows a complete understanding (*viññāna*)² of the relationship with the undesired transmigration of (the self) overpowered by (lit. having) darkness. [6]

The verse refers to BU 4.3.35: *anaḥ susamāhitam*

¹This is an individual self, i.e. really ignorant (*ajñā*).

²Namely, complete knowledge.

य आत्मा प्रस्तुतोऽविद्वान्स यदेदं शरीरकम् ।
कार्श्यं प्राप्य पूर्वोक्तैर्जरारोगादिहेतुभिः ॥७॥

The Ātman which is mentioned as the subject matter of the discussion is the non-knowing self (*avidvat*); and that brings this insignificant body (*śarīraka*) to a reduced size by the earlier stated causes, viz. old age, disease etc. [7]

This explains the meaning of *abalyam ny etya*

SP adds *yadā sammoham iva yāti tadainam vāgādayaḥ samāyantīti sambandhaḥ*. Therefore, we have to understand that as the remainder of the sentence and then the organs *vāc* etc. fall in stupour, as it were.

यदि वा स्वयमेवैत्य देहाभेदत्वहेतुतः ।
दौर्बल्यमेवं संप्राप्य संमोहमिव यात्यथ ॥८॥

Or (it could be understood in another way:) (that Ātman) itself, because of its non-distinction¹ from the body, thus attains to weakness and then² falls in a stupour, as it were. [8]

This is another explanation of the sentence *abalyam ...* and clarifies the meaning of *kārśyam prāpayya* in the preceding verse.

¹This is the result of the absence of *adhigati* 'I am Brahman', i.e. ignorance.

²This refers to *atha* in the sense of *nairantarya* 'immediately following'.

मर्छादाविव संमोहमिहाप्यात्मा निगच्छति ।
बौधमात्रैकयाथात्म्यान्नायं संमोहभाग्यतः ।
संमूढबुद्धिसाक्षित्वात्संमूढ इव भात्यतः ॥९॥

In this (moment) also, this Ātman becomes unconscious, as in stupour, and, since this one, owing to its having the real nature of being one who is the knowing only, it does not fall in a stupour and looks like¹ one in stupour on account of its being the witness of the intellect which is overpowered by ignorance (*sammoha*). [9]

We should note the use of *sammoha* in two different senses; (i) physical stupour, referring to individual being, (ii) being ignorant, referring to the intellect.

¹This is to justify the use of the word *iva* in the Śruti sentence.

संमोहहेतुकं कार्यं संमोहात्मकमिष्यते ।
अकार्यकारणं प्रत्यग्ज्योतिः संमुह्यते कुतः ॥१०॥

It is accepted that an effect which has ignorance for its cause is also of the nature of ignorance. How can the inner light (*pratyagjyotiḥ*), which is neither an effect nor a cause, fall in stupour? [10]

The first line refers to the oneness in the nature(s) of cause and effect and the second line to what is neither a cause nor an effect and, therefore, does not have ignorance (lit. stupour) associated with it. What appears as transmigration of the self is really not transmigration at all.

कार्यसंमोहसंबन्धो यतो नास्य स्वतस्ततः ।
मोहोत्थदेहबुद्ध्यादिसंगतेरिवगीरियम् ॥११॥

Since this one does not have by/in its own nature any connection with a reduced size and/or a stupour, therefore, there is the use of the word *iva* (in the Śruti sentence), owing to the association (of the Ātman) with a body, the intellect etc., which have arisen from ignorance. [11]

Refer to note on verse 9.

Verses 12-14 state another meaning of the word sammoha.

उत्क्रान्तिकाले प्राणानां स्वस्थानादाढ्यहेतुका ।
स्वगोचरेष्वशक्तिर्या संमोहोऽसाविहात्मनः ॥१२॥

What is in the case of organs,¹ at the moment of their departure (from the worldly body), viz. incapacity with reference to their objects, which has resulted from their unstability in their support (lit. abode, i.e. body),² is here the stupour, which is taken as that of the Ātman. [12]

This explains the significance of the word *sammoha* which has been so far mentioned in these verses. This refers to the basic ignorance.

¹See verse 16 below for *prāṇas* as organs.

²Refer to verse 18 below.

दाहच्छेदादयो यद्वददाह्याच्छेद्यतन्विनः ।
परोपाधिनिमित्ताः स्युर्दुर्बलत्वादयस्तथा ॥१३॥

As burning and/or cutting etc. in the case of the embodied Ātman, which is in reality what cannot be burnt and what cannot be cut, are having a cause in the delimiting adjuncts of the highest self, so also are weakness etc. (said to be of the Ātman). [13]

Refer to *Gītā* 2.24. *sammoha* really belongs to the body with which the inner self identifies itself through ignorance.

बाह्या तावदियं वृत्तिर्व्याख्याता प्रत्यगात्मनः ।
कार्श्यसंमोहरूपा या प्रसिद्धा जगतीदृशी ॥१४॥

Thus far is explained the external modification (lit. functioning) of the inner self, which has been known in this world to be thus having the nature of being reduced in size and falling in stupour. [14]

This is a brief statement of what is earlier discussed with a view to introducing the Śruti *athainam*

In verses 15-18, is explained the same (i.e. the word sammoha) as the internal functioning.

मरिष्यतोऽस्य या वृत्तिरान्तरी साधुनोच्यते ।
हृत्सन्नन्युपसंहारो यथा स्यादिन्द्रियात्मनाम् ॥१५॥

That which is the internal modification (lit. functioning) of

this one, who is about to die,¹ is now stated. And so also (is stated) the withdrawal of those which are of the nature of organs in the abode, viz. the heart. [15]

The word *vṛtti* conveys at just one time both external and internal modifications which can be taken as the functioning.

¹This refers to the inner self identified with the body.

अथैनमुच्चिक्रमिषु विज्ञानात्मानमीश्वरम् ।
प्राणा वागादयः सर्वे तं समायन्ति कृत्स्नतः ॥१६॥

Then, when this specifically knowing Ātman (*viññānātman*),¹ the lord, is about to depart (from the body); the organs, viz. *vāc* etc. merge into it in their entirety.² [16]

This verse explains the different words in the sentence *athainam*

....

¹This qualification of the *viññānātman* has in view its capacity to control the activities of the organs.

²This adverb, viz. *kṛtsnataḥ*, seeks to distinguish the cessation of the (existence of) organs and their activities in the final sense and not as in sleep.

अभीति चाभिमुख्येऽर्थे सं तु सामस्त्य इष्यते ।
अवध्यर्थे तथाङ्त्र यन्तीत्यस्य विशेषणम् ॥१७॥

The preposition *abhi* has the sense of 'being prone towards', and (*tu*) the preposition *sam* is accepted in the sense of wholeness/fullness; and so also the preposition *āni* (= *ā*) is in the sense of the limit—(all these) are modifiers of the verb *yanti*. [17]

This is the grammatical explanation of the form *abhisamāyanti*. Thus, Sureśvara sees the significance in each of the prepositions which was normally noticeable in early Vedic language.

स्वाश्रयेभ्यो गियासन्ति करणानि हृदीश्वरम् ।
यदैषां स्थानसंबन्धविमोक्षः स्यात्तदैव तु ॥१८॥

When the organs seek to go from their own abodes to the lord in the heart—only then is the release (i.e. separation)¹ of these from their abodes. [18]

¹The Upaniṣad has the intention of comparing the departure of the organs from the body into the lord in the heart with the release or getting loose of the horses of a chariot at the final destination.

SP points out the cessation of the activities of the organs as not temporary like that in a dream, sleep etc.; the same is the final one, as at the time of death, for, otherwise, there would not be proper understanding of death.

In verses 19-21 is mentioned the departure of the organs.

कथं तमभिसंयान्तीत्युक्ते श्रुत्याभिधीयते ।
आत्मानमभिसंयान्ति वागादीनि यथा स्फुटम् ॥१९॥

If (or, when) it is asked as to how they (i.e. the organs) move into that (*viññānātman*), the Śruti clearly states that *vāc* etc. move into the Ātman. [19]

This clarifies the Śruti sentence *sa etā ...* together with a question that could be asked.

Sureśvara has dropped the preposition *ā* which was used in the original, perhaps for the sake of metre.

स आत्मा प्रकृतस्त्वेताश्चक्षुःश्रोत्रादिलक्षणाः ।
तेजोमात्रा यथादेशं समये मृत्तिकर्मणः ॥२०॥

By the word *sa* (in the sentence of the Śruti) is introduced the Ātman¹ and (*tu*) (the Ātman takes)² these portions³ of lustre etc. which are known (or characterized) as the eye,

the ear etc. from their respective regions at the time of death.

[20]

¹This refers to the *avidvān ātman* as mentioned in verse 7 above.

²This refers to the use of the word *samabhyādādānaḥ* with reference to the *Ātman* which conveys the sense of *ādhyā mṛtikāle gacchati*.

³This is to convey the idea of various organs which are the modifications (*vikāras*) of lustre etc. This is the meaning of *mātrā* in this verse; for this explanation see verse 24 below.

उद्धृताकूतविज्ञानो मृतिं प्रति यदा तदा ।
आकूतानुविधायीनि जायन्ते करणान्यथ ॥२१॥

When (this *vijñānātman*) has a specific awareness of the intention with reference to death, then the organs also become prone to activities in accordance with its intention. [21]

This verse brings out the significance of the word *īśvara* for the individual self (verses 16 and 18 above) and the relation of the organs to it as being the followers of the same.

Verses 22-24 explain the meaning of *ādāna* as specific awareness of the form.

स्वाकूतानुविधायित्वं यत्तदा करणात्मनाम् ।
अभ्याददान इति तत्कर्तृत्वं स्यादिहात्मनः ॥२२॥

When following of the intention of the individual self¹ is mentioned by what have the nature of the organs; then there would be the nature of the agent of their activities in the case of the individual self—this is conveyed by the word *abhyādādānaḥ*. [22]

¹This is the meaning of the word *sva* in the verse, i.e. the

non-knowing individual self which is about to die.

एतत्कर्तृत्वमापेक्ष्य श्रुत्यैवमभिधीयते ।
अभ्याददान इति तु तेजोमात्राः स्वदेशतः ॥२३॥

Having this capacity of the individual self's being the agent, the Śruti thus employs the word *abhyādadānaḥ* (and has for its object) the portions of lustre etc. from their respective regions. [23]

Sureśvara has in mind the words *dhyāyatīva* (BU 4.3.7) and, therefore, the capacity of the individual self as the agent is to be understood only metaphorically.

मीयन्ते विषया याभिर्मात्रास्ताश्चक्षुरादयः ।
तेजोविकृतिहेतुत्वात्तेजोमात्राश्च ताः स्मृताः ॥२४॥

The organs (i.e. those *mātras*), viz. the eye etc., are those by which (various) objects become known; and because they are modifications of lustre (etc.) they are known as portions of lustre (etc.).¹ [24]

¹This explains the meaning of *tejomātrāḥ*. This is but the result of ignorance and, therefore, there is reference to modifications like lustre etc. Refer to *Gītā* 2.14 and Śaṅkara's explanation of the word *mātrā* there.

सत्त्वं तेजोऽत्र विज्ञेयं तदेव करणात्मना ।
प्रविभक्तं हि तच्छब्दस्पर्शाद्यर्थावभासनात् ॥२५॥

Here (i.e. in this context) lustre is to be understood as *Sattva* which has differentiated (itself) in the form of (various) organs owing to its revealing such objects as sound, touch etc. [25]

Sureśvara brings out the sense of the word *tejas*, viz. *sattva* as mentioned by the Sāṃkhyas. Cf. *sattvaṃ laghuprakāśakam*

in Sāṃkhyakārikā 13.

पित्ताख्यं वा भवेत्तेजस्तदंशाश्चक्षुरादयः ।
इत्येवमायुर्वेदज्ञाः करणानि प्रचक्षते ॥२६॥

Or, *tejas* can be what is called *pitta* 'bile' and its portions are the eye etc.—thus do the knowers of *Āyurveda* explain (the nature of) the organs. [26]

SP supports this saying: *uktaṃ hi— agnir eva śarīre pittāntaragataḥ kupitākupitāni śubhāśubhāni karotīti* and also *anyo 'pyāha*

*āmāśayāśrayam pittaṃ rañjakam rasarañjanāt /
buddhimedhābhīmānādyair abhipretārthasāadhanāt //
sādhakam hr̥dgatam pittaṃ rūpālocanataḥ smṛtam /
dr̥ksthām ālocakam tvaksthām bhr̥ājakam bhr̥ājanāt tvacaḥ //*
(*Aṣṭāṅgahr̥daya* 1.12.13-14).

For further clarification, read SP with profit.

Sureśvara's siddhānta in this regard is stated in verses 27-28.

यदा पञ्चावतिष्ठन्ते ज्ञानानि मनसा सह ।
इति प्रकाशरूपत्वं करणानां श्रुतिर्जगौ ॥२७॥

The Śruti has declared (lit. sung) the nature of the organs being only the light in the passage *yadā pañcāvatiṣṭhante jñānāni manasā saha* [27]

Sureśvara has taken the support of *Kāthopaniṣad* 6.3.1 and *Maitrāyaṇyupaniṣad* 6.30.

भौतिकस्तु प्रकाशोऽयं भौतिकार्थप्रकाशनात् ।
प्रदीपवन्न भूतेभ्यो जात्यन्तरमतो भवेत् ॥२८॥

And (*tu*) this light is the product of the elements, since it reveals (to view) the objects which (also) are the products

अस्य लोकस्य चेत्युक्तं शुक्रमित्यादि चापरम् ।
सर्वेष्वेषु प्रदेशेषु भूतमात्राग्रहः श्रुतौ ॥३३॥

Also, there is another statement in the Śruti: *asya lokasya* ... (BU 2.1.17) and yet (*ca*) another statement: *śukram* ... (BU 4.3.11). In all these regions (i.e. states) there is in the Śruti the understanding of portions (i.e. the organs) of the elements.

[33]

भूतेभ्यो नापरं वस्तु यस्मादात्मन ईक्ष्यते ॥३४॥
अतो विवेको भूतानां यः परोऽतीव शुद्धितः ।
तेजोमात्रादिवचसा स एवात्राभिधीयते ॥३५॥

Since there is not noticeable (*na īkṣyate*)¹ any object of the Ātman other than the elements; [34]
therefore, there is distinctly the manifestation (*viveka*) of the elements which is beyond (visible organs) and extremely pure in nature—and that alone is expressed here by the word *tejo-mātrā*.² [35]

¹According to the variant reading, 'accepted' (*iṣyate*).

²This refers to *tejomātrāḥ samabhyādādānaḥ*

Verses 36-72 refute the notion of the organs being the modifications of the Ātman.

इन्द्रियाणीन्द्रियार्थाश्च न विकारः परात्मनः ।
अतो न जायत इति तद्विकारनिषेधतः ॥३६॥

The organs and the objects of the organs are not modifications¹ of the highest self; (this is understood) from the rejection of the modification(s) of the same (*paramātmān*) in the Śruti *ataḥ* ...,² *na jāyate*³ [36]

¹*vikārah* is singular for *vikārāḥ* (plural) — *jātāv ekavacanam*.

²BU 3.4.2; 3.6.1; 3.7.23.

³Kaṭhcopaniṣad 2.18; cp. also Gītā 2.20.

जन्मादिविक्रियाषट्कं साक्षात् परमात्मनः ।
अपूर्वानपराद्युक्तेनेति नेत्यादिवाक्यतः ॥३७॥

The group of the six modifications, beginning with birth, cannot be directly (understood as) of the Ātman, (as this is clear from) the statement (about it) as *apūrvam anaparam ...*¹ (and also from) the sentence *neti neti*² [37]

¹BU 2.5.19: *tad etad brahmāpūrvam anaparam anantaram abāhyam ...*; and BU (Mādhyandina) 3.8.8: *apūrvam anaparam ... abāhyam*.

²BU 2.3.6; 3.9.23; 4.4.22; 4.5.15.~

न च वेदान्तसिद्धान्ते परमात्मातिरेकतः ।
इष्टं विकारवद्वस्तु यथा कापिलशासने ॥३८॥

And, in the doctrine of Vedānta, there is not accepted anything that undergoes modifications and is beside the highest Ātman, as there it is in the doctrine of Kapila.¹ [38]

¹The verse refers to the Sāṃkhya doctrine which accepts *īśvara* and various modifications as distinct objects of reality.

स्वतः कटस्थतत्त्वस्य तदसंबोधतस्ततः ।
जन्मादिविक्रियाषट्कसंगतिः स्यात्परात्मनः ॥३९॥

(It follows) that there is acceptance (or, postulation) of the group of six modifications beginning with birth in association with the highest Ātman as (coming) from the absence of knowledge of that which in itself has the nature of immutable reality. [39]

SP cites Śvetāśvataropaniṣad 4.10 to support this argument *māyām tu prakṛtim*

आत्मकारणवादोऽयमेवं सत्युपपद्यते ।
न तु विध्वस्तनिःशेषजन्मनाशादिकारणे ॥४०॥

This being accepted thus, this doctrine of the Ātman as the (supposed) cause (of the organs etc.)¹ becomes reasonable; but indeed not when there is (the mere statement about it) as being the cause of all the removal of (the notions of) birth, destruction etc. [40]

The first line states the reason when and why knowledge of *ātmakāraṇavāda* is necessary for liberation. The mere mention of the nature of the Ātman is not sufficient.

¹Cf. verse 29 above.

तेजोऽतो भौतिकं सर्वमन्यत्र परमात्मनः ।
स्वयंज्योतिःप्रसङ्गेन तदुक्तं प्रागपि श्रुतौ ॥४१॥

There is, therefore, everywhere else than in the highest Ātman, all elemental lustre. And that has been stated earlier also in the Śruti in the context of the self-shining (Ātman).¹ [41]

¹This refers to contents of Jyotis Brāhmaṇa.

आदित्यादीनि तेजांसि तथाध्यात्माधिभूतयोः ।
भौतिकान्येव तानीति प्रत्यङ् तेभ्यो विलक्षणः ॥४२॥

So also, the lustres such as the sun etc. which pertain to the bodies and the elements, are but the products of the elements and the inner self is (altogether of another form) distinct from theirs. [42]

ता एतास्तेजसो मात्राः समस्ताश्चाभिमुख्यतः ।
सामस्त्येनाददानः संहृत्सन्नन्युपसर्पति ॥४३॥

The Ātman, taking up in their entirety all these portions of

lustre and being their master,¹ enters into the abode of the heart. [43]

This is the meaning of *sa ...* and *hr̥dayam*

अभ्याददान एवायमन्ववक्रामतीश्वरः ।
न त्वाक्रम्य समादत्ते कथं तदिति भण्यते ॥४४॥

(Thus) this lord, taking up (these portions of lustre), enters into (the subtle form); but it does not step on the same and takes them (i.e. the portions of lustre)—how that is explained (in the following verses).¹ [44]

¹This verse explains the relation of the form *abhyādadānaḥ*, with the addition of the suffix *-śānac* to the verb in the sentence. This indicates the simultaneity of the two actions, as clarified in the second line and also in the following verses again.

विशेषज्ञानलाभोऽस्य लिङ्गात्मानुविधानतः ।
यतस्तदपकर्षेण विज्ञानात्मोपसंहतिः ॥४५॥
तद्व्याप्तौ चापि संव्याप्तिरापादतलमस्तकम् ।
स्वतस्तु व्याप्तिसंहाररहितत्वात्परात्मनः ॥४६॥

Since, for this one (Ātman), there is acquisition of specific knowledge by entering into what has the nature of the subtle form, there is the inclusion of the specifically knowing Ātman by this entering; [45]

and by pervading that (subtle form), there is complete pervasion from head to foot (of the subtle form)—for the highest Ātman is, by its very nature, without any activity of pervading and collecting (various properties etc.). [46]

SP makes a relevant observation: *liṅgasāṅkocavikāśāv eva tadupādher ātmanas tāv iti*.

सैन्धवादिरसव्याप्ते पीयमाने यथोदके ।

पानं सलवणस्यैवं लिङ्गात्मानुविधायिता ॥४७॥

As the water which is pervaded by the taste of salt etc. being drunk, there is drinking of salty (water), there is similarly the action of the Ātman of entering into the subtle form.

[47]

This gives an example of the entry of the Ātman into the subtle form as similar to the taste of salt which is entering into the water that is being drunk.

सोऽभ्यादानस्य कर्तात्र लिङ्गं योऽस्मीति मन्यते ।
आक्रामद्धृदयं लिङ्गमन्ववक्रामतीव सः ॥४८॥

That Ātman, which is the agent of activities of taking up (those forms), is here the one who thinks, 'I am this subtle form (*linga*)'; and the one, entering into the subtle form, i.e. the heart, is mentioned as one entering into it, as it were. [48]

This is once again to stress the real absence of any action on the part of the Ātman.

तथा हृदयशब्देन तत्स्था धीरभिधीयते ।
एवेत्यवधृतिश्चात्र स्वप्नप्राज्ञनिवृत्तये ॥४९॥

So also, the word *hṛdaya* is expressive of the intellect which resides in it.¹ And the specification with the use of the word *eva* here results in the warding off of the self, in both the dream and the deep sleep states. [49]

¹This refers to the intellect as having its abode in the heart, as mentioned earlier in BU 4.1.35 which begins with the discussion about transmigration of an individual.

विशेषकार्यवाहिभ्यः स्रोतोभ्यः स्वप्नभूमिगः ।
विशेषाननुसृप्यात्मा यात्वा हृदयमाश्रयम् ॥५०॥

पुरीतत्प्रमुखं देहं वृत्त्या सामान्यरूपया ।
तप्तलोहादिवद्व्याप्य शेते प्राणात्मतां गतः ॥५१॥

The individual, resting in the abode of the dream state, flows out from the organs (*srotas*) which bear particular effects (of activity etc. due to ignorance) unto some particular (objects) and then proceeds¹ to its (own) support, i.e. the heart,² [50] (and) that into the body having *purītat* (*nāḍī*) as prominent (among *nāḍīs*), in its general form³ and having become the nature of *prāṇas* (i.e. winds) remains there, occupying it, as (heat) resides in a hot piece of iron. [51]

¹*yātvā* is for *yāti*.

²This stands for the intellect.

³This is in the form of impressions. Cf. BU 4.3.

इह त्वेवेति निःशेषा लिङ्गस्यास्योपसंहतिः ।
विशेषेभ्योऽविशेषेभ्यो युक्तं प्रत्यवसर्पणम् ॥५२॥

In this (world) here, there is complete withdrawal (of the organs) in the subtle form; (for) it is reasonable (to understand) the going back (i.e. withdrawal) from all particulars (and) non-particulars.¹ [52]

¹This indicates withdrawal in the subtle form of particular (i.e. individual) effects of ignorance and the Ātman which is not an effect.

Verses 53-55 conclude the thought in hrdayam anvavakrāmati.

अवदध्रेऽत एवेति मा भूत्स्वप्नादिवतिस्थितिः ।
सामान्यं वा विशेषो वा न यतोऽत्रावशिष्यते ।
कार्त्स्न्येन हृदय एव पिण्डीभावं व्रजत्यतः ॥५३॥

Therefore, the Śruti has made specification,¹ by the use of the word *eva*, to convey that (after death) there should not

be a state like dream etc.² and, whatever it be, general or particular in nature, it does not remain here (i.e. in the body); (since,) from this (body), it becomes wholly as a lump in the heart. [53]

This is the sense of the Śruti statement *hrdayam*

¹Sureśvara uses the Ātmanepada form significantly, i.e. to indicate that this situation is not for the service of any other body.

²This refers to deep sleep state.

विधिराकर्षणे तावत्तेजोमात्राश्रयो गतः ।
अथासंवेदनविधिर्मूर्षोरुच्यते यथा ॥५४॥

So far is mentioned the manner in which there is withdrawal (*ākarṣaṇa*)¹ in relation (*āśraya*) to the portions of lustre. And then there is stated here the manner of non-knowing on the part of the individual who is about to die. [54]

The first line refers to the gist of the entire sentence *sa yatra* ... and the second line explains how, at the time of death, the individual self ceases to have the knowledge of word etc. (which is being discussed later).

¹This is for *apakarṣa* in verse 48 above.

साधारणात्मनो योऽंशो भोक्तृकर्मवशीकृतः ।
अध्यात्मं चक्षुषि रवेश्चक्षुर्व्यापारसिद्धिकृत् ॥५५॥

Whatever portion of the sun, which is of general nature, is (located) in the eye with respect to the body. It is controlled by the activity of the enjoyer and accomplishes/effects operation of the eye. [55]

This is to explain the meaning of the word *cākṣuṣa* in *sa cākṣuṣaḥ*.

Verses 56-61 explain the withdrawal of the portions of divinities (in the organs) which have favoured them.

कर्मोपभोगसिद्धयर्थं परिच्छिन्नः स्वचक्षुषा ।
चाक्षुषोऽतः स विज्ञेयः सामान्यात्मापि भास्करः ॥५६॥

Therefore, though the sun is of general nature (i.e. the pervader), that (portion of lustre) is to be known as *cākṣuṣa* 'what belongs to the eye', which is limited by that individual self's eye for effecting the enjoyment (of the result) of its activity. [56]

Sureśvara points to *Aitareyopaniṣad* 1.3.4: *ādityaś cakṣur bhūtvākṣiṇī prāviśat* (cp. *Jaiminīyopaniṣad* 8.11.12) for explaining the significance of the word *cākṣuṣa*.

स एष पुरुषो यत्र तत्प्रयोक्तृक्रियाक्षये ।
क्षेत्रज्ञार्थात्पराडेव पर्यावर्तत आत्मनि ॥५७॥

When (*yatra*) there is cessation of the activity of the impeller (i.e. the force) of that (i.e. the eye), it is this Puruṣa who resides in the Ātman, away from the objects¹ for the knower of the field. [57]

The verse explains the meaning of *arūpajño bhavati*.

¹This refers to *rūpa*.

निरनुग्रहतैवास्य पर्यावर्तनमुच्यते ॥५८॥
हल्लिङ्गप्रसृतो योऽंश उपभोगार्थमक्षिणि ।
सोऽस्य कर्मक्षयादक्षः पराडावर्तते हृदि ॥५९॥

By the word *paryāvartana* is expressed the character of this one¹ as not being a favouring (deity of an organ). [58]
Whatever portion (of the lustre), which has been in the eye, for (an individual's) experience or enjoyment and has proceeded to the subtle form, viz. heart,² and (this is to mean:) it, owing

to the cessation of the activity of this one, has turned away from the eye³ to the heart. [59]

Verse 58 explains the word *parāvartate* in the preceding verse. Verse 59 explains in detail the process called *parāvartana*.

¹This means, not being associated with the objects.

²This stands for the intellect in the subtle form.

³This refers to the abode in the body of lustre.

चाक्षुषे पुरुषे तस्मिन्नावृत्ते कर्मणः क्षयात् ।
देवता देवतामेति लिङ्गैक्यं करणं तथा ॥६०॥

When, after the cessation of the activity (of the eye), that Puruṣa (i.e. the individual self), residing in the eye, has returned,¹ (the superintending) deity also becomes the deity (of general nature) and the organ also becomes one with *liṅga* 'the subtle form' (i.e. heart, i.e. the intellect). [60]

¹The word *āvṛtta* stands for *parāvṛtta*; 'to the heart' is to be supplied.

अथैवं सत्यरूपज्ञो देवताकरणच्युतेः ।
आत्मैवमुक्तानुक्तेषु योज्यं प्राणेष्वशेषतः ॥६१॥

When this is so,¹ the individual self itself is thus the non-knower of the form of the object(s)² on account of (its) being deviated from deity and organ. This process has to be understood³ in the case of all the *prāṇas* 'organs' whether mentioned or non-mentioned. [61]

This refers to the mention of *cakṣus*, which has to be taken as indicative of other organs and their superintending deities.

¹*atha* here stands for *tadā*.

²This is ceasing to favour the activity of knowing (*anugrahakanivṛtti*).

³Literally, it means 'has to be used', or 'connected with (an

organ)'.

Verses 62-66 argue the non-noticing of any activity in an insentient (object/organ) from which the sentient (deity) has withdrawn itself.

चेतनावदधिष्ठानात्करणादेर्जडात्मनः ।
 प्रवृत्तिर्नियता दृष्टा लोकेऽतो न विपर्यये ॥६२॥

It is seen in the world that there is an activity of organs etc., which are (lit. is) insentient in nature, (only) as controlled by the support of what has sentience, and this is not (noticed) where there is the opposite of it.¹ [62]

Cp. the argument with BSB 2.2.2 (p.492-493): *na hi mṛdādayo vā svayam acetanāḥ ... dṛśyante*; and also SP points a statement in BU 3.4.1 *yaḥ prāṇena prāṇiti*

¹And, when not supported by any sentient individual.

Now follows the discussion on BU 4.4.2 in verses 63-125.

अरूपज्ञत्वहेतुः क इत्याशङ्क्योत्तरं वचः ।
 लोकप्रसिद्धिमाचष्ट एकीत्यादि मुमूर्षति ॥६३॥

The subsequent statement of the Śruti (has proceeded), having in view the objection, viz. 'what would be the cause of (the individual self's) not-knowing the form?' It states what is popularly known in the case of a dying person, in the words *ekī(bhavati ...)*. [63]

SP states the *lokaprasiddhi*. as: *devatākaraṇacyutir evārūpa-jñātvahetuḥ*.

एकीभवति सावित्रः सवित्रांशस्तथैव च ।
 लिङ्गांशश्चाक्षुषो व्यूढो लिङ्गैक्यं प्रतिपद्यते ॥६४॥

The portion of Savitr (i.e. Āditya), one residing in the eye

becomes one with Savitr and so also the portion of the subtle form which is limited by¹ Āditya (i.e. superintended over by the sun) becomes one with the subtle form. [64]

¹vyūḍha stands for *avacchinna* 'limited by'.

स्वांशिभ्यामेकतापत्तौ देवतालिङ्गभागयोः ।
अथारूपज्ञतामेति यः प्राग्रूपादिवेद्यभूत् ॥६५॥

Thus, when the deity and the portion of the deity have become one with the subtle form, that one who was formerly a knower of forms etc. becomes a non-knower of forms. [65]

अथैनं पार्श्वगाः प्राहुर्बन्धवोऽस्य ममर्षतः ।
वाक्यमेकीभवतीति निराशास्तस्य जीविते ॥६६॥

Then, at this time, the relations around this dying individual say this sentence:¹ *ekībhavati*, having become hopeless about (the continuity of) his life. [66]

¹That is, 'he is now a non-knower of form'.

Verses 67-70 point to the absence of any indication of the order in the cessation of the activities of the organs—though that of the eye is mentioned.

करणे देवता यस्मिन्पूर्वं मुञ्चत्यनुग्रहम् ।
तस्यैव प्रथमं वृत्तिनिरोध उपजायते ॥६७॥

There occurs the cessation of the activity of that organ first, in the case of which the deity gives up its favouring (or superintending over) it first. [67]

In this verse is not mentioned any specific order of the cessation of activities of various organs. The reference is only to what is experienced in this order or another of the cessation

of activities of the organs.

कस्मिंश्चित्करणे वृत्तिनिरोधः पूर्वमीक्ष्यते ।
अयौगपद्येनोत्क्रान्तौ तल्लिङ्गं देवतात्मनाम् ॥६८॥

(This is so said,) because the cessation of activity is seen first in any one of the organs. With respect to the non-simultaneous departure of what has the nature of the deity (of the organ), that (viz. cessation of activity) is an indication.¹ [68]

¹The word *linga* here does not refer to the subtle form of organ/deity, but it conveys the sense of or an indication of departure of the same. The singular means the plural (i.e. all the organs in general).

यदालोचनमात्रं स्याद्रूपादौ चक्षुरादिभिः ।
प्रविवेकता तु रूपादेः सम्यङ्नैव पुमान्भवेत् ॥६९॥
तदोत्क्रान्तां विजानीयान्मनसो देवतामितः ।
केवलालोचनाल्लिङ्गात्तथा बुद्धेश्च देवताम् ॥७०॥

When a person stops becoming a proper seer (lit. discriminator) of form etc., when there is merely noticing by the eye etc. in the case of form etc.; [69]
then should one know that the deity of *manas* has departed from this (his body); and so also (should one know) the deity of the intellect only from indication, viz. (mere) seeing. [70]

Verses 71-72 explain the intended meaning of *ekībhavati*.

एवं तद्देवतोत्क्रान्तावेकीभावेन संगतेः ।
मनुते नो न जानातीत्येवमाहुस्तथा जनाः ॥७१॥

Thus, when the deities of those (organs) have departed, i.e. when they have been understood as associated together (*ekībhāvena*), the people say, *no manute* 'he does not know'.¹

[71]

¹Cp. BU 4.3.28.

उक्तं विमोक्षणं तावत्करणानां स्वदेशतः ।
असंविज्ञानता चोक्ता हृदये चोपसंहतिः ॥७२॥

Thus is stated in the beginning (*tāvat*) the release of the organs from their abodes (in the body) and so also is explained the state of having no knowledge whatever and the withdrawal (of the organs and the sentience) in the heart. [72]

In verses 73-76 are stated some thoughts on the Ātman's movements from region to region.

अथोपसंहताशेषकरणस्यात्मनो यथा ।
लोकान्तरोपसंक्रान्तिस्तथैतदभिधीयते ॥७३॥

Now is being stated as to how there is a departure to other worlds of this individual self which has withdrawn (itself) from all of the organs. [73]

This refers to the shining (or effulgence) at the opening of the heart for another world.

तस्यैतस्य यथोक्तस्य कृत्स्नप्राणोपसंहतेः ।
नाड्यग्रं हृदयस्याथ प्रकर्षेण प्रकाशते ॥७४॥

Now, when there is withdrawing from all the *prāṇas* of this Ātman, as has been stated earlier, the tip of the vein of the heart begins to shine exceedingly. [74]

The verse is a fuller explanation of the word *atha* in the preceding verse.

सर्वेषु संहतेष्वेवं करणेषु सवायुषु ।
बुद्धेः प्रद्योततेऽथाग्रं हृदयस्य यियासतः ॥७५॥

Then, when all the organs together with (all the five types of) winds, are withdrawn,¹ then the tip of the intellect² which is the heart of (the Ātman) that is about to move out of the body, begins to shine. [75]

¹That is to say: have been abandoned by the individual self.

²The words 'of the intellect' is the paraphrase/explanation of 'of the heart'.

स एष कर्मजो बुद्धेः प्रकाशो जायते मृतौ ।
स्वकर्मनिर्मितं लोकं येनात्मायं प्रपश्यति ॥७६॥

This then is the effulgence of the intellect, produced from the activity (of the individual being);¹ this becomes visible (lit. born) at the time of death; (this is so said) since this individual self sees well the (other) world which is produced by the activity (or activities) of itself. [76]

¹This is the explanation of the word *pradyota* which occurs in verse 80 below.

Verses 77-82 describe how 'ego' of the next body comes into being.

कर्मणैवास्य विज्ञानं तादात्म्यमुपनीयते ।
पश्चादापन्नतद्भावो देहमेतं विमुञ्चति ॥७७॥

By the very activity of this one (i.e. the individual self) specific knowledge (of it) is turned into (lit. brought to the stage of) oneness with (the specific knowledge of the individual self).¹ And then later (the individual self) having obtained the nature (*bhāva*) of that² gives up this (present) body. [77]

SP clarifies that the awareness of a dying individual of what it is going to be in the next birth is identified with the individual

self itself (*tādātmya*).

¹SP points to the awareness of this specific knowledge on the part of the individual, since six months before its death—this is the individual's awareness 'I am going to be so and so' and that is called *pradyota*.

²This is related to verses 96 and 102 (= *Gītā* 8.6) below.

भाविलोकात्मिका यास्य प्रत्यक्चैतन्यबिम्बिता ।
वासनैवात्मनः प्रोक्ता प्रद्योतवचसा स्फुटम् ॥७८॥

That desire, which is said to have been reflected in the sentience of that individual self and has the nature of the ensuing world or form, is itself stated clearly by the word *pradyota*. [78]

मात्रोपादानरूपेण स्वेन भासा पुराब्रवीत् ।
स्वेनैव ज्योतिषा स्वप्ने यथा तद्वदिहापि तत् ॥७९॥

As the Śruti has stated earlier (that there is awareness of the individual self of) its own semblance, owing to its assuming in the dreaming state the various portions of lustre (or various organs) by its own light, so is it to be understood here also.¹

[79]

The verse refers to BU 4.3.

¹In BU 4.3, reference is to the dream state and here in this verse to conditions at death.

प्रद्योतेन यथोक्तेन प्रद्योतितपथा कृत-
कर्मकार्योऽथ हृदयान्निष्क्रामति यथासुखम् ॥८०॥

Then (at the time of death) this one (i.e. the individual self) moves out of the heart happily or unhappily (*yathāsukham*),¹ after it has accomplished all its activities and intended results in the way which is illuminated (or shown) by the effulgent light mentioned earlier. [80]

This refers to verse 79 above.

¹This can be dissolved as *yathā* and *sukham* or *yathā* and *asukham* (SP).

साधवेवातः प्रयत्नेन कर्म कार्यं विपरिचिता ।
पश्यता प्राणिनामेवं कर्ममूलामिमां गतिम् ॥८१॥

The wise one should do well his activities with every effort, on knowing 'such is the movement of the living beings (after death) as rooted in the activities (of themselves)'. [81]

आत्मा स्वकर्मणोपात्तं प्रद्योतेन यथोचितम् ।
लोकं पश्यन्स्वहृदयान्निष्क्रामति यथायथम् ॥८२॥

Then, the individual self (Ātman), seeing, with the help of (this) *pradyota*, the (next) world which is suitable to what is achieved through its (own) activities, moves out of its own heart accordingly. [82]

Verses 83-86 state what controls the movement of the individual self.

चक्षुष्टो वाथ मूधर्नो वा यं यं लोकं प्रपत्स्यते ।
तद्द्वारेणैव निष्क्रामन्न क्वचित्प्रतिहन्यते ॥८३॥

Or, it moves out from (or through) the eye, or from (or through) the head to whichever world it is to go; that is going out through that way, it is nowhere obstructed. [83]

This verse clarifies the word *yathāyatham* in the preceding verse (SP).

आदित्यलोकसंप्राप्तौ चक्षुष्टोऽयं निगच्छति ।
ब्रह्मलोकपरिप्राप्तौ मूधर्न आत्मा निगच्छति ॥८४॥

This (individual self) goes out from (or through) the eye in

order to reach the world of the sun and it moves out from (or through) the head, when it is to reach the world of the Brahman. [84]

In the preceding verse, two alternatives *cakṣuṣṭaḥ* or *mūrdhnaḥ* were stated; the reason for this is given in this verse.

कर्मश्रुतानुरोधेन ह्यन्येभ्यो वा यथायथम् ।
हृदयसृतनाडीभिरित आत्मा निगच्छति ॥८५॥

The individual self moves out of this body (*itah*) through veins that have proceeded from the heart, or from other (organs) accordingly and following the activity (accomplished by it) and/or the knowledge (acquired by it). [85]

लिङ्गं च सर्वतो गच्छन्न क्वचित्प्रतिहन्यते ।
अतिसूक्ष्मस्वभावत्वादपि लोहसमुद्रगम् ॥८६॥

This (individual self) going out from all these (organs) to the subtle form is not anywhere obstructed, owing to its having extremely subtle nature or form, even if it (viz. the subtle form) belonged to the ocean or iron.¹ [86]

¹The meaning of the word *lohasamudraga* which qualifies *linga* is not clear. One could see the variant reading *loham samudgatam*, but that would not be very useful. However, SP states: *abhedyād api lohādeḥ samudgacchet tenātpṛatihatam lingam!*

उत्क्रामन्तं तमात्मानं यथोक्तेनेह वर्त्मना ।
प्राणोऽनूत्क्रामति ततः प्राणं प्राणास्तथा परे ॥८७॥

Prāṇa 'the principal wind' follows it, i.e. that individual self which is departing (from the body) in the way that is stated¹ here; and then the other *prāṇas* 'organs' follow that Prāṇa.

[87]

This is the explanation of the Śruti *tam utkrāmantam*

¹Cf. *yathoktena hrdayāgrapradyotāprakāśitena pathā* (SP).

In verses 88-93 are stated the objection on the basis of śrutakrama and its answer.

नन्वात्मप्राणवागादेरन्योन्यव्यतिमिश्रणात् ।
देशकालाद्यसंभेदात्क्रमेणोत्क्रमणं कथम् ॥८८॥

(An objection is raised:) 'But indeed how can there be the departure of these, i.e. of the individual self, Prāṇa, and the organs like *vāc* etc., for the reason that they are mixed with one another and also that there is the mixture of time, place etc.?' [88]

नैष दोषो यतो नेह क्रमकालो विवक्ष्यते ।
प्रयोजकप्रयोज्यत्वं यतोऽमीषां विवक्षितम् ॥८९॥

(The answer is:) 'There is not a fault in this, since it is not intended here to state the sequence in point of time; but it is intended to state the relation of these as what are to be incited (to depart) and what incite (the others to depart)'. [89]

इहोच्चिक्रमिषा यास्य विज्ञानात्मैकसंश्रया ।
प्राणोत्क्रान्तेः प्रयोक्त्री सा वागाद्युत्क्रमणस्य च ॥९०॥

In this context (*iha*), that which is the desire of this (individual self) for departure, resulting from (lit. resting in) the nature of the specific knowledge on the part of it, is what causes the departure of Prāṇa and that is, in consequence, (the cause of) the departure of *vāc* etc. [90]

The verse explains the thought of the preceding verse.

मुख्यप्राणस्य योत्क्रान्तिः प्रयोक्त्री सैव नापरा ।
विज्ञानात्मैकनीडाया भावनायाः प्रधानता ॥९१॥

That departure of the principal Prāṇa itself is the cause (of the departure of *vāc* etc.) and not any other (can be the cause); there is here the principal role of the impression which is resting in what is of the nature of the specific knowledge of the individual self, viz. that which is of (i.e. identified with) the intellect. [91]

The second line of the verse is for introducing the Śruti statement *savijñānah*

सा हि देहान्तरप्राप्तावात्मनो मार्गदर्शिनी ।
तया प्रयुक्तः प्राणोऽयं प्राणानादाय चैतरान् ॥९२॥

Indeed, that is the one which leads the way of the individual self for reaching (or attaining to) another body; and, therefore, impelled by that one, this Prāṇa moves out taking with it the other organs. [92]

This verse explains how *bhāvanā* becomes the leading or principal force in the departure of Prāṇa etc.

आत्मनानन्यभूतः सञ्जलपात्रार्कवद्वहिः ।
निष्क्रामति यथाकर्म सविज्ञानो भवत्यथ ॥९३॥

(The individual self) not becoming different from itself, departs from the body like the sun moving out of a pot filled with water,¹ according to its activity and (at that time) becoming possessed of that specific knowledge. [93]

¹The simile points to the fact that the reflection of the sun going away from a pot of water does not mean the real movement of the sun. In this same way, we have to understand the individual

self which seems to move out of body, as not really (so doing) or different from sentience, i.e. the Ātman.

Verses 94-106 explain the intention of the Mādhyandina reading *saṁjñāno bhavati*.

ननूपसंहृताशेषकरणत्वादधीः पुमान् ।
तदाकूतानुगुण्यं स्यात्प्राणादेः कथमुच्यते ॥९४॥

(An objection is raised:) 'But indeed since this Puruṣa (i.e. the individual self), who has withdrawn itself from all the organs is, therefore, without any knowledge, how could there be stated in the case of *prāṇa* etc. their becoming subordinate to the intention (or desire) of that (Puruṣa)?' [94]

In verses 94-99 Sureśvara has taken up the statement of the Mādhyandina recension of BU: *saṁjñānam evānvavakrāmati ... sa eṣa jñāḥ saṁjñāno bhavati* as the basis of the objection.

प्रत्यभिज्ञात्मकं ज्ञानं संज्ञानमिति भण्यते ।
पूर्वं यद्धृदयस्याग्रद्योतनेन प्रकाशितम् ॥९५॥
भाविनोऽर्थस्य विज्ञानं प्रत्यभिज्ञानमुच्यते ।
स तथोद्धूतविज्ञान आत्मा देहान्निगच्छति ॥९६॥

(The answer is given:) 'Knowledge, which is of the nature of specific awareness, is stated by the word *saṁjñāna*, as the one which is revealed by the illumination at the opening of the heart, as stated earlier. [95]

Specific knowledge of what is going to result in future is stated (here) as *pratyabhijñāna* 'specific awareness'. Then that individual self moves out of the body, in which that specific knowledge has been produced in that way'. [96]

हृदयाग्रप्रकाशेन निष्क्रान्तस्यापि देहतः ।
निःसंबोधस्य गमनं कथं देहान्तरं प्रति ॥९७॥

(An objection is raised:) 'How can there be the movement to another body (of the individual self) which is without any knowledge even as it has gone out of one body through the force of the illumination at the opening of the heart?' [97]

इत्यस्य परिहाराय स इत्यादि परं वचः ।
स एष ज्ञः परो देवः सविज्ञानो भवत्यथ ॥९८॥

Therefore, in order to answer away this objection, there is the subsequent statement of the Śruti, beginning with *sa*, viz. *sa eṣa jñāḥ paro devaḥ* 'this is the knower, the highest divine being,' and he becomes possessed of that specific knowledge. [98]

संहृताशेषकरणो भावनाकर्महेतुतः ।
सविज्ञानो यथा स्वप्ने तथोत्क्रान्तावपीष्यते ॥९९॥

(The individual self) which has withdrawn itself from all the organs becomes possessed of the specific knowledge for the reason that there is the activity proceeding from desire; as this (happens) in the dream state, so is it accepted (to happen) also in (the movement of this final) departure. [99]

विशेषज्ञानसंबन्धः कर्मणैवास्य हेतुना ।
न तु स्वातन्त्र्यतो लभ्यः स्वातन्त्र्यासंभवादिह ॥१००॥

The relation of this one (i.e. the individual self) to the specific knowledge here (i.e. on death) is only for one reason, viz. (the cessation of) its own activity; that (relation) cannot be effected (lit. obtained by it) independently, since there is no possibility of any independence on the part of it. [100]

कृतकृत्यो भवेत्सर्वो विशेषज्ञानसंगतिः ।
स्वातन्त्र्येणेह चेत्तलभ्या न तु लभ्या तथाह च ॥१०१॥
यं यं वापि स्मरन्भावं त्यजत्यन्ते कलेवरम् ।
तं तमेवैति कौन्तेय सदा तद्भावभावितः ॥१०२॥

Every person (i.e. individual self) who has done all the duties to be performed comes to have association with (that kind of) specific knowledge; if that (association ...) is (to be obtained by it) independently; but it is not to be so obtained—and (the Lord) said: [101]

“A person who, at the time of death, leaves the body, remembering whatever states he has been in, comes to attain that, O son of Kuntī. (It is even so) becoming what he had always cherished as his desire.” [102]

Verse 102 is *Gītā* 8.6.

NKL (ms. p.716) states *pāṭhadvaye 'pi vākyārtham upasaṁharati evam iti. atha karmavaśād iti yāvat.*

एवमात्मा सविज्ञानो गन्तव्यं यत्पुरजितम् ।
तदात्मभावविज्ञानस्तदेवातो निगच्छति ॥१०३॥

Thus, the individual self, being possessed of the specific knowledge and having the specific knowledge in the form of itself, that moves out from this body unto that goal (i.e. region to be attained to), which is secured (by it) earlier (through activities). [103]

NKL (ms. p.716): *yasmāt karmamūlā gatis tasmān mṛtikāle śubhadehe viṣayajñānārtham puṇyam eva vivekibhiḥ anupeyam ity āha ata iti.*

यत एवमतः पुंभिः स्वातन्त्र्यार्थं प्रयत्नतः ।
योगादिसाधनाभ्यासः कर्तव्यः पुण्यसंचयः ॥१०४॥

Since this is so, therefore, men (i.e. the individual selves) have to make an effort to accumulate (i.e. make a collection of) merit and to take to repeated practice¹ of *yoga* etc.;² in order that (they secure) independence.³ [104]

¹Alternatively, *sādhana* can stand for (the pursuit of) the

means to liberation.

²This 'etc.' indicates various *upāsanās*.

³Cf. verse 100 above. SP puts it thus: *mṛtikāle kāla-vaśyavyāvṛttyartham*.

सर्वशास्त्रसमारम्भस्तदर्थोऽयं महानिह ।
वाङ्मनःकायसाध्यानामुपायानां प्रबुद्धये ॥१०५॥

In this regard,¹ it is greatly important to take to the study of all Śāstric texts, and also for conveying various means (of achieving independence) such as those which can be accomplished by means of speech, *manas* and body. [105]

¹That is, *svātantryārtham* mentioned in the preceding verse.

तथानर्थपरिप्राप्तावुपायानां निषेधनम् ।
एतावानेव शास्त्रार्थः कर्त्रधीनः सुखाप्तये ॥१०६॥

Similarly, (there is in the Śāstric texts) the rejection of (the pursuing or adopting of) the means for securing what are undesirable (effects). Only this (lit. this much) is the meaning of the Śāstric texts; it (viz. the teaching of the means of that) is related to (or dependent on) the person who practises (i.e. adopts the means) in order to acquire happiness. [106]

SP sums up the thought thus: *svātantryārthaṃ dharmo 'nuṣṭheyo 'dharmaś ca tyājyaḥ*.

In verses 107-111, there is explained the intention in *taṃ vijñānakarmaṇī*.

मात्रालक्षणमादानं कृत्वा स्वप्नस्य सर्जनम् ।
यथेह न तथा किञ्चिदुपादानं समीक्ष्यते ॥१०७॥

As the dream state is effected (for an individual self) after it has taken up (the organs etc.) characterized as the portions

(of lustres etc.), there is not noticed here (at the time of death) any adopting of any organs (by the individual self).

[107]

अथैवं देवतात्यक्ते लिङ्गे देहाद्वहिर्गते ।

लोकान्तरगतौ हेतुर्लोकारम्भे च भण्यताम् ॥१०८॥

When, as the subtle form, which is bereft of the (various) deities (of the organs), has thus gone out of the body,¹ the question is asked as to what is the cause for the movement unto another world, or for the activities in (the newly acquired) world.

[108]

The verse explains the purpose of some of the following verses.

¹This means *dehāntaragatyārambha*.

आत्मनः परलोकाय यत्स्याद्गमनकारणम् ।

भुङ्क्ते गत्वा च यत्तत्र देहारम्भे च कारणम् ॥१०९॥

लिङ्गानस इतो देहादेहमन्यं निगच्छतः ।

संभारः कोऽस्य गत्यर्थो देहारम्भे च कथ्यताम् ॥११०॥

Let it be said (as to) what would be the reason for the individual self's moving towards the other world and what it experiences on reaching there and what is the cause of the activities of that body

[109]

(that is) for this (individual self) which has a vehicle in (the form of) the subtle body, while it is going from this body to another, and what are its belongings (*sambhāra*) for the journey (lit. movement—*gatyartha*) and activities in (the other) body.

[110]

Verses 108-110 have raised some questions which are answered in the verses to follow, i.e. 111-116.

इतो जिगमिषुं विद्याकर्मणी ये पुरार्जिते ।

तं समन्वारभेते ते या चाभूत्पूर्ववासना ॥१११॥

(In answer it is to be pointed out:) 'When that (individual self) is about to go from this world (to another world),¹ knowledge and activities which were secured by it earlier, follow it and also what was the impression (effected on the intellect of it) earlier'. [111]

The verse conveys in brief the thought that the knowledge and activity of the previous life become the cause of the next world.

¹That is, from this body to a future body.

The meaning of the word vidyā is stated in verses 112-114.

विज्ञानं संशयज्ञानं मिथ्याज्ञानमथापि वा ।
प्रमाणतोऽप्रमाणाद्वा सर्वं विद्येति भण्यते ॥११२॥

Specific knowledge, knowledge which is (beset with) some doubt, or even false knowledge, which is obtained through the use of valid means or invalid means; all is understood (lit. expressed) by the word *vidyā*. [112]

SP puts it succinctly as *jñānamātram atra vidyety arthaḥ*.

संसारकारणध्वंसि यत्तु ज्ञानं परात्मगम् ।
तदत्र न परिग्राह्यं सर्वापत्कारणापनुत् ॥११३॥

But/And (*tu*) that knowledge pertaining to the highest Ātman which destroys the cause of transmigration and removes all the causes of misery, has not to be understood here (i.e. by the word *vidyā*). [113]

This specific knowledge does not have in view (*brahma*)*vidyā*. On the contrary, it has a reference to the destruction of the transmigratory existence, i.e. movement from one body to another.

संसारकारणं तस्मादात्माज्ञानाविरोधि यत् ।
अप्राप्तपरमार्थार्थं ज्ञानमात्रं जिघृक्षितम् ॥११४॥

Therefore, the cause of transmigration is only that knowledge which is not opposed to the ignorance about the (highest) Ātman,¹ (and) that which cannot have secured the highest reality—that is here intended to be expressed (or, understood).

[114]

¹ AnSS edition notes a variant reading *tasmād ātmajñānavirodhi* ..., but the reading also would yield the same sense (as stated above); therefore, we have ignored it.

Verses 115-121 explain what is *karman*.

वाङ्मनःकायसाध्यं च शास्त्रतो यदि वान्यतः ।
दृष्टादृष्टार्थरूपं यत्तच्च कर्मेति गृह्यते ॥११५॥

It is understood (here) that action is what can be accomplished through (the use of) speech, *manas*, bodily organs, and which is learnt from scripture or some other sources (of knowledge) and which has for/as its purpose what is seen or unseen. [115]

अन्वारभेते गच्छन्तं यथोक्ते ज्ञानकर्मणी ।
गच्छन्तं पुरुषं यस्मादन्वेते स्वस्वभावतः ।
गच्छतोऽतौऽनुशब्दोऽत्र पश्चादर्थे प्रयुज्यते ॥११६॥

These knowledge and action, as are stated, follow the departing individual self, since these two, by their own nature, follow the one in the moment of its moving out. Therefore, the word/preposition *anu* here (in the word *anvārabhete*) is used in the sense of following the movement of going. [116]

This is merely an explanation of *taṃ samanvārabhete*. Sureśvara takes *anvārabhete* for *gacchantam anu* and *ārabhete*,

i.e. he takes the word *anu* as a preposition governing the accusative form *gacchantam* (as a *karmapravacanīyam*).

गमनादिविधौ पुंसः साधनत्वं निगच्छतः ॥११७॥
 कर्मणः क्रियमाणस्य संस्कारो यो हृदि श्रितः ।
 तत्फलस्य च भुक्तस्य पूर्वप्रज्ञेति सोच्यते ॥११८॥

Knowledge acquired earlier (by the individual self) in its act of going out unto (another body) is (in other words) the impression of the act which is being performed and which is becoming (a means) for transmigration, and also of the result of which is enjoyed. That (impression) has found a support in the heart. [117-118]

See the next two verses and also verses 95-96 above.

पूर्वोपचितसंस्कारहेतुभ्यः साभिजायते ॥११९॥
 षण्मासशेषप्रोद्धूता वासना यास्य देहिनः ।
 मरिष्यतोऽन्यदेहार्थं पूर्वप्रज्ञेति तां विदुः ॥१२०॥

That ('(specific) awareness acquired before') is produced from the causes in the form of the impressions acquired (by the intellect of a transmigratory being) in the previous life; [119] and the desire which is produced in the person who is going to die as a remainder of (the preceding) six months for moving unto another body is known as '(specific) awareness acquired before', [120]

समर्था सैव ते यस्मादुद्धोद्धं ज्ञानकर्मणी ।
 नरस्यातः प्रधानत्वात्पृथक्तस्या ग्रहः कृतः ॥१२१॥

Only that is capable of conveying the knowledge and action of a man (i.e. a transmigratory being who is about to die) which are mentioned separately from 'specific awareness acquired before', since it is more prominent (than the two). [121]

In the Upaniṣadic sentence knowledge and action are mentioned together in a compound and 'specific awareness acquired before' is also mentioned separately and for this reason, Sureśvara has mentioned them here and the same thought is explained in the next verse.

Verses 122-125 state the reason as to why vidyākarmaṇī is expressed in a compound whereas there is a separate mention of pūrvaprajñā.

समासेनैव निर्दिष्टे कारणत्वाविशेषतः ।
 अन्योन्यकारणत्वाच्च श्रुत्येह ज्ञानकर्मणी ॥१२२॥
 पूर्वप्रज्ञात उद्भूतिर्विद्यायाः कर्मणो यतः ।
 ताभ्यां च भावनोद्भूतिर्निर्देशोऽतो यथोदितः ॥१२३॥

Here, knowledge and action are mentioned by the Śruti in a compound only, because both of them do not have a cause which is distinct (in the case of each), and because each is the cause of the other. [122]

Since the rise of knowledge and (also) action is from the 'specific awareness acquired before'; therefore, there is, as said before, the rise of the two from impression (*bhāvanā*).¹ [123]

¹This is for *pūrvaprajñā*.

कर्मणो भुज्यमानस्य परिशेषो हि भावना ।
 मूलं च जायमानस्य प्रधानं तेन भण्यते ॥१२४॥

The remainder (of the result) of an action, which is enjoyed, is *bhāvanā* 'impression' (and), since it is the root cause of what is being born, it is described as prominent. [124]

परिच्छेत्री विनिर्मात्री विद्या लोकान्तरस्य हि ।
 विकर्तृ कर्म वोढुरी च पूर्वप्रज्ञेह पूर्वयोः ॥१२५॥

Indeed, knowledge is the delimiter and the creator of the other world (i.e. birth), and it is the 'specific awareness acquired before' which is the performer of modifying action for the first two.¹ [125]

¹This refers to knowledge and action.

Now follows the discussion on BU 4.3.3 in verses 126-136.

नानाविकल्पसद्भावात्संदेहो गमनं प्रति ।
पक्षीव वृक्षात्किं तावत्परिच्छिन्नो व्रजत्ययम् ॥१२६॥

Since there are various notions (among thinkers) about the movement (of the individual self from one body to another), there may arise a doubt: (i) Does this one, being delimited, move (to another body) like a bird from one tree to another?¹ [126]

SP points out the holders of these views; they are: (i) Digambara Jainas, (ii) Devatāvādins, (iii) Sāṃkhyas, (iv) Vaiśeṣikas, and (v) Vedāntins.

¹This simile is adduced by Digambara Jainas.

Verses 127-136 are explanation of BU 4.4.3.

आतिवाहिकदेहेन किं वा देहान्तरं प्रति ।
गतिर्विकाशसंकोचौ भिन्नकुम्भस्थदीपवत् ।
मतं वा किं मनोमात्रं देहादेहान्तरं व्रजेत् ॥१२७॥

(ii) Does it move to another body with the help of some another body as its carrier?¹ (iii) Or, is the movement of this one but the expansion or contraction like (the light) of one lamp (put) in different pitchers?² (iv) Or, is it considered to be only *manas* which goes from one body to another?³ [127]

¹SP states *devatā yena dehena viśiṣṭau jīvam paralokam nayati so 'yam ātivāhiko dehaḥ*.

²SP states this as Sāṃkhya view.

³This is, as SP points out, the view of Vaiśeṣika.

किं वा सर्वगतानां स्यात्करणानामिहात्मनि ।
श्रुतकर्मानुरोधेन वृत्तिहान्युद्भवौ क्वचित् ॥१२८॥

(v) Or, could it be that there is here¹ the origination and destruction at some time,² of all the organs belonging to all transmigratory beings in the (highest) Ātman in accordance with knowledge and action? [128]

¹This refers to what is held by the Siddhāntin.

²This refers to the time of death in the case of some transmigratory beings and the moment of liberation of some others.

इति भूरिविकल्पायां भूमौ सिद्धान्त उच्यते ।
अनन्ताः सर्व एवैते वाङ्मनःप्राणलक्षणाः ॥१२९॥

Thus, there being various notions in this context, i.e. *bhūmi* (the moment of transmigration of a being from one life to another), the Siddhānta is to be stated now. Indeed, all these beings, which are characterized by speech, *manas* and *prāṇas* are innumerable. [129]

In verses 130-136 is stated the final opinion as given by the Śruti.

प्राणिकर्मानुरोधेन प्लुष्यादिपरिमाणता ।
इति श्रुत्युक्तितस्तेषां प्रतिप्राणि यथामति ।
यथाकर्म गतिः स्थानं परिच्छेदोऽथ विस्तृतिः ॥१३०॥

(Now) in accordance with the action of (different) living beings,

there is their being possessed of magnitude, such as (that of) a gnat—this is from the statement (of this) in the Śruti.¹ Here is the mention of their states (viz. goals)² in accordance with their thoughts at the end of (the earlier) life, in accordance with their actions as also (*atha*) their delimitations and their expanse. [130]

¹Cf. BU 1.3.22; BUBV 1.3.205.

²The singular form in the original is indicative of the plural form (*jātāv ekavacanam*).

स्वातन्त्र्यं पारतन्त्र्यं वाणिमाद्यैश्वर्यमेव वा ।
करणानामिदं सर्वं ज्ञानकर्मादिहेतुकम् ॥१३१॥

Be it dependence or independence (of them), or (having) the characteristics of being minute etc., or being the lord of these organs, it is all but caused by *jñāna*¹ and action etc.² [131]

Regarding movement to the state of animals etc. and attainment of *aiśvarya*, some commonly known injunction is given.

¹That is, *vidyā*.

²This refers to various modifications of three *guṇas* of various *Jīvas*.

अस्मदादेर्यथा तद्वद्विद्याकर्मानुरोधतः ।
अनात्मनोऽपि चानन्त्यं न स्वतः सिद्धमात्मवत् ॥१३२॥

As in our case, so also in the case of non-Ātman,¹ there is infiniteness (in number) in accordance with its knowledge¹ and action. But it is not existent, in its own right, like the (highest) Ātman. [132]

¹This distinguishes living beings from those bodies which have no life in them (i.e. things).

इतीमं पक्षमाश्रित्य श्रुत्या दृष्टान्त उच्यते ॥१३३॥

तृणाग्रस्था जलूकेह प्राप्य तस्मात्तृणान्तरम् ।
संहरत्यात्मनात्मानं पूर्वस्मात्तत्र सा क्रमात् ॥१३४॥

Having resorted to this view (of Vedānta) has the Śruti expressed an example: [133]

The case is like that of a leech, which is sitting on the tip of some blade of grass, contracts itself (= *ātmanā* equal to *svāyavas*) and, from that earlier (body), gradually moves unto another blade of grass in its new body (*ātmānam*). [134]

यथैवमेवमात्मेदं शरीरं कर्मणः क्षयात् ।
निहत्याचेष्टमापाद्य स्वात्मलिङ्गोपसंहृतेः ॥१३५॥
गमयित्वा तथाविद्यां जाड्यं निःसंज्ञतामिदम् ।
अतोऽन्यमाक्रमं देहं प्राप्य भावनयाञ्जितः ।
पूर्वदेहस्थमात्मानं संहरत्यात्मनात्मनि ॥१३६॥

As it happens in this way, so also does this one individual self strike down the body, owing to the loss of its action. Through the withdrawal of the characteristic signs of its own body (that is, from the organs, into the subtle body) it attains inactive (state) and by bringing about the loss of knowledge, inactivity and lifelessness and then attaining to another state, i.e. body, and being tainted with *bhāvanā*, it enters into another body, taking itself away from the earlier body. [135-136]

This explains the *dārṣṭāntika* 'exemplified' of the *drṣṭānta* 'example' in verse 133.

Now follows the discussion on the example in BU 4.4.4 in verses 137-146.

जलूकावद्गतिरियमात्मनः प्रतिपादिता ।

This is (thus) presented as an exposition on the individual self's movement to another state as that of a gnat. [137ab]

तत्र देहान्तरारम्भ उपादानं किमात्मनः ॥१३७॥
 उपमृद्योपमृद्यास्य नित्योपात्तं किमिष्यते ।
 पुनः पुनरपूर्वं वा देहारम्भाय कल्पते ॥१३८॥

(A question is asked:) 'There, in that coming into another body, what is the material¹ for this individual self?' [137cd]
 (The question continues:) 'What is accepted (as the material cause) (by that individual self) ever for creating another body, i.e. by repeatedly crushing it again and again? and whether it is some new (material cause)?' [138]

SP, while explaining the verse 137cd, gives some more details: whether or not there is any material cause which the individual self has as the means and, if there is none, there would not be produced another body, which is a positive entity, and, if there is any material means, that requires to be stated.

Under verse 138 also, SP supplies yet more details involving this explanation which can be useful for a clearer understanding of the thought.

¹This is material cause.

इति दृष्टान्तवचसा निर्णयोऽस्योपवर्ण्यते ॥१३९॥
 पेशस्कारी यथा मात्रामुपादायेह पेशसः ।
 विमृद्य रचनां पूर्वां कुरुते रचनान्तरम् ॥१४०॥
 नवान्नवतरं रूपं कल्याणतरमेव च ।
 कल्याणादिति दृष्टान्तो यथा तद्वदिहापि च ॥१४१॥

This (i.e. the number of questions above) is decided with the statement of an example: [139]

A goldsmith takes from gold a little piece and, after crushing the earlier shape of it, creates another shape, [140]
 thus creating a newer and newer and more and more beautiful form of it than which it had earlier—this is the example. As it is there,¹ so it is here² also. [141]

On verse 140 SP states: *nityopāttam eva bhūtapāṇcakam*

ārambhakam ity asyārthasya dr̥ṣṭāntena nirṇayo na ca māyā-vādavirodhaḥ pratyakcāitanyāśritamāyāvivartabhūtapāñcakapari-ṇāmo jagad iti sthiter iti bhāvaḥ. See verse 149 below which is the basis of this explanation.

¹In the action of the goldsmith.

²In the case of the creation of a new body.

आपेक्ष्य नवमादानं तत्कार्यं नवमुच्यते ।
श्रुत्या नवतरं रूपं कल्याणतरमेव च ॥१४२॥

With this in view, viz. the (individual's or the organs') taking up (of their materials),¹ the effect (i.e. product) of them is described by the Śruti as new; and (every) newer form is (indeed) more blissful. [142]

¹This refers to the five elements, as stated in just the next verse.

नित्योपात्तानि भूतानि करणानि च देहिनः ।
द्वे वाव ब्रह्मणो रूपे इति पूर्वमवादिषम् ॥१४३॥

And thus are the various elements always taken (as the material for creating another body), and the various organs of a living being. And I have already stated¹ that there are indeed two forms of the Brahman. [143]

¹Cf. BU 2.3.1. This explains the subtle form of the five elements as also the gross form of the same which are related to the two forms of the Brahman.

Here also SP gives a detailed note which can be read with profit.

उपमृद्योपमृद्यैषां रचनां प्राक्तनीं पुनः ।
यथाकर्म यथाज्ञानं कुरुते रचनान्तरम् ॥१४४॥

(This means:) In repeatedly crushing earlier shape, the

individual self creates another shape, in accordance with the action and in accordance with the knowledge (of the earlier life). [144]

पित्रादियोग्यं पित्र्यादि ह्युत्तमाधममध्यमम् ॥१४५॥
 पित्र्यादिलोकेष्वात्मायं यथाकर्म यथाश्रुतम् ।
 तनुते देहजातानि भूरिरूपाण्यविद्यया ॥१४६॥

This individual self creates (lit. extends the net of) various bodies which have different forms owing to its ignorance thus: viz. those of the fathers etc. which are suitable for the forefathers etc., varying as the best, less and lowest in the worlds of the manes, in accordance with the action and knowledge (*śruta*) (of the earlier life). [145-146]

Now follows, in verses 147-234, the discussion on BU 4.4.5.

न तु चैतन्यवत्साक्षात्संसारोऽस्य स्वतो मतः ।
 इत्यर्थप्रतिपत्त्यर्थमाजगामोत्तरं वचः ॥१४७॥

But/And (*tu*) this transmigration of this individual self is not held to be, in its own right, directly perceptible, as is sentience; (then) in order to expand this (particular) thought, there now follows every later statement (of the *Śruti*). [147]

Verses 148-152 explain the two forms of the *Ātman*, viz. the real and the other which is imagined.

यच्चास्य वास्तवं रूपं यच्चाविद्योत्थमात्मनः ।
 स वा इत्यादिना तस्य निर्णयः क्रियतेऽधुना ।
 तन्निर्णयादशेषोऽर्थोऽनिर्णीतः स्यात्कथं न्विति ॥१४८॥

Now there is a decision made in the *Śruti* statement *sa vai* ... as regards: the real form (or nature) of this individual self and that which has arisen from ignorance, but, the words *katham nu* indicate the question: How is the whole thought

not decided by the decision of that? ¹

[148]

¹This refers to what is mentioned earlier in as regards

संसारी यो यथोक्तेन ग्रन्थेन प्रतिपादितः ।
तद्गृहीत्यै सशब्दोऽयं तत्स्मृत्यर्थं तथा च वै ॥१४९॥

The word *saḥ* in this sentence is for including ¹ in the discussion (the individual self) which is described as a transmigratory being in the statement already made; and so also the word *vai* is used for reminding one of the thought of that.

[149]

¹This is for 'referring to'.

अनात्मभूत एतस्मिन्कार्यकारणलक्षणे ।
संसारे प्रथते योऽर्थ आत्मनानन्यमानगः ॥१५०॥

This individual self reveals itself (i.e. appears) in this transmigratory existence which is the non-Ātman by nature characterized by effects and their causes, ¹ it is not to be grasped by any other means, (other than the Śruti).

[150]

¹Cp. BUBV 4.3.1154, and also verses 153 and 155 below, but SP explains *kāryakāraṇa* as *avidyā* and *tatkārya*.

यत्साक्षिकौ यथोक्तस्य भावाभावौ प्रसिध्यतः ।
संसारवस्तुनः सोऽयमात्मेत्यत्राभिधीयते ॥१५१॥
व्यभिचारौ न यस्यास्ति सर्वेषु व्यभिचारिषु ।
तदवष्टम्भतः सिद्धेर्व्यभिचारस्य सर्वदा ॥१५२॥

That one, on whose being the witness, are established existence and non-existence of the already mentioned things ¹ of the transmigratory world is stated (in the words) 'This one is the Ātman'

[151]

and it does not change even while all (the transmigratory

things) are changing because their changeableness becomes established ever through their dependence on that (Ātman). [152]

¹-*vastu* is for -*vastūni*— viewed severally.

Verses 153-161 pertain to the propriety in referring to the individual self as 'this'.

प्रत्यक्तयास्य साक्षात्त्वादक्रियाकारकत्वतः ।
अनन्यबोधमानत्वादयमित्युच्यते ततः ॥१५३॥

Therefore, this one is mentioned as *ayam* because it is inside (every other being or thing), directly perceptible, and is not of the nature of any instrument of activity and because it has only the knowledge (from the Śruti) as the means of knowing (it). [153]

This explains why the Ātman is referred to by the demonstrative pronoun *idam* which yields the form *ayam*, i.e. directly perceptible, not beyond the ken of the means of perception.

निःशेषानात्मतद्वेतुनिराकरणवर्त्मना ।
आत्मत्वमात्मनः सिध्येन्नान्यशेषमनात्मवत् ॥१५४॥

The nature of the individual self of being the Ātman gets established by way of the removal of (the notion/acceptance of) the entire non-Ātman (things) and their cause(s); it is not dependent on any other thing as is every non-Ātman. [154]

The verse points to the real non-delimited character of the individual self.

असाधारणसिद्धयैव सिद्धिः स्यादात्मवस्तुनः ।
यतोऽत आत्मवस्त्वेव कार्यकारणवज्जगत् ॥१५५॥

Since the thing called the Ātman would get established only by the uncommon (means of) establishing (it);¹ therefore, the thing called the Ātman is itself this world which is made up of (what are called) effects and causes. [155]

This is to emphasise the nature of the transmigratory world as the result of *adhyāsa*.

¹That is, by the Śruti.

न हीदमात्मनः स्थानं ततोऽन्यत्रापि वाश्नुते ।
आत्मनोऽव्यतिरेकेण यतोऽनात्मा प्रसिध्यति ॥१५६॥

This (world) does not come to have any abode (or support, or place) for itself elsewhere than in the Ātman; since the non-Ātman (which is identified with the world) gets established as being non-different from the Ātman, i.e. not without it. [156]

This supports the nature of the transmigratory world as the result of *adhyāsa*.

आत्मा त्वनात्मप्रत्यक्त्वाद्व्यतिरेकं न सोऽर्हति ।
स्रज्जीव सर्पदण्डादेः स्रग्विद्योत्थवस्तुनः ।
स्रक्तत्त्वव्यतिरेकेण सिद्धिर्नान्यत्र कुत्रचित् ॥१५७॥

And (*tu*) that Ātman cannot be (mentioned as) being distinct (from the non-Ātman), because of its being within the inner part of it. (This is) as there cannot be established in a garland the existence of a serpent or a stick etc. which is a thing arising out of non-cognition of the garland, as it cannot be elsewhere (than in that garland etc.¹) as apart from being the real thing, viz. garland. [157]

¹This word 'etc.' is demanded by *ādi* in *sarpadaṇḍādeḥ*.

न चाभावसाध्येतदभावस्यापि भाववत् ।

प्रत्यङ्मात्रैकयाथात्म्यादश्रुतत्वान्न चार्थतः ॥१५८॥

Also the non-existence of this (world) does not end in non-existence just like the existence of the same, because its true nature is being one with the inner sentience alone; because it is not so heard (or, known) and not because (there exists) another object. [158]

SP supports the last statement by citing the Śruti, *neti neti*.

अनद्य निखिलं विश्वं तत्तत्त्वप्रतिपत्तये ।
आत्मैवेति श्रुतं यस्मान्नातोऽन्यत्किंचिदिष्यते ॥१५९॥

(This is so, also) because it is heard *ātmaiva* ... after there was the statement made about the entire world with a view to the exposition of the nature of that Ātman; therefore, there is nothing else than that which is accepted. [159]

The reference in this verse to the Śruti passage is for setting aside every possible notion of the existence of anything other than the Ātman.

प्रत्याख्याय न चात्मानमनात्मा व्यतिरिच्यते ।
व्यतिरेकस्वभावत्वान्नापि चात्मनि सिध्यति ॥१६०॥

Further, the non-Ātman does not have any distinct existence apart from (or beside) being the Ātman; similarly, it does not get established, while there exists only the Ātman, owing to its having a nature distinct from that of the Ātman. [160]

The thought in this verse is: The world, being insentient, cannot exist while there exists only the sentient Ātman; so also for the same reason, it cannot come from any non-sentient thing.

प्रत्याचष्टे श्रुतिरतः सर्वं नेतीति चात्मनि ।
सर्वमात्मेति च तथा व्यतिरेकं निषेधति ॥१६१॥

Therefore, the Śruti denies the existence (of) all, (while there exists only) the Ātman, by the words *neti*; also, (the Śruti) denies (the existence of any object) distinct (from it) by the words *sarvam ātmā* [161]

Verses 162-166 explain the meaning of the word brahman in the Mantra.

अपूर्वानपरानन्तराबाह्यं ब्रह्मलक्षणम् ।
उक्तात्मवस्तुस्वाभाव्यादात्मा ब्रह्मेत्यतो वचः ॥१६२॥

The definition of the Brahman is (stated as what is) *apūrva*, *anapara*, *anantara* and *abāhya*;¹ therefore, because of having that nature of the real thing, the Ātman as stated, the Ātman (i.e. the individual self) is described as the Brahman. [162]

¹Cf. BU 3.8.8; *apūrva* 'having nothing prior to it', *anapara* 'having nothing posterior to it', *anantara* 'having nothing inside it', and *abāhya* 'having nothing outside it'.

प्रत्यक्त्वं ब्रह्मणस्तत्त्वं ब्रह्मत्वं चात्मनस्तथा ।
परोक्षद्वयहानेन ह्यात्मा ब्रह्मेति बोध्यते ॥१६३॥

The true nature of the Brahman is being within (every living being); similarly, (that of) the Ātman (individual self) is being of the nature of the Brahman itself—thus, by the rejection of (being) imperceptible and duality, the Ātman (individual self) is made known to be the Brahman. [163]

The first line points to the direct perception of the Brahman as the individual self and also the non-existence of anything else than the Ātman—this is *parokṣa-dvaya-hāna*.

अव्यावृत्ताननुगतो ब्रह्मशब्दार्थ इष्यते ।
नात्मनोऽन्यत्र लभ्योऽसौ नाप्यात्मा ब्रह्मणोऽन्यतः ॥१६४॥

It is accepted that the thing signified by the word *brahman* is what is not distinguished from another and what is not similar to any other thing; and that cannot be perceived (lit. obtained) elsewhere than the Ātman and the Ātman also is not found elsewhere than (i.e. apart from) the Brahman. [164]

आत्मनोऽपि परोक्षत्वं ब्रह्मणोऽविद्यया यथा ।
आत्मनः सद्वितीयत्वं ब्रह्मणोऽपि तथा मम ॥१६५॥

As there is non-perceptibility of the Ātman (within an individual being) owing to its non-knowing of the Brahman (through ignorance), so also is my self i.e. the Ātman (in me¹) accompanied by a second (i.e. the objective world) and the Brahman also is likewise. [165]

¹This sudden reference to me (i.e. myself) indicates an individual's awareness of a distinct existence.

अतोऽविद्यासमुच्छित्तौ यथावस्त्ववबोधतः ।
आत्मा ब्रह्मैव सन्नेष ब्रह्माप्येति स्वतोऽद्वयम् ॥१६६॥

Therefore, when there is the destruction of ignorance that results from knowing of the real thing as the Ātman (of an individual) being one with the Brahman, (that individual) attains (the nature of) the Brahman, which is in its own right without any second. [166]

Verses 167-169 explain the words vijñānamaya, manomaya etc.

यथोक्तबोधविरहादस्यानर्थपरंपरा ।
विज्ञानाद्यभिसंबन्धो यथा तदधुनोच्यते ॥१६७॥

Owing to the absence of that knowledge which is mentioned (earlier) there is, for this individual self, a series of (causes of the) undesired results and also the association with the

specific knowledge etc.—how that is explained now. [167]

This begins the exposition of the supposed transmigratory state of the Ātman which is mentioned in *viññānamaya*.

आत्मा ब्रह्मैव सन्नेष धर्मैर्यावद्विरन्वितः ।
अज्ञानात्संसारत्यत्र वर्ण्यते तत्समासतः ॥१६८॥

This Ātman of an individual, being just one with the Brahman, keeps on transmigrating owing to (its association with) ignorance, being possessed of whatever properties (seen or assumed by it)—that is described here in brief. [168]

This is an explanation of BUB *yasya*

यतोऽविद्यान्वयेऽशेषसंसारानर्थसंगतिः ।
तद्धवस्तावात्मनस्तस्मात्पुरुषार्थः समाप्यते ॥१६९॥

Since, while there is a connection (adaption or applicability of an individual self) with ignorance, there is connection (*sangati*) with the entire mass of the undesired (results of) the transmigratory world; therefore, the (highest) end of human life is obtained for that Ātman (i.e. the individual self) when that ignorance is destroyed. [169]

Verses 170-174 point out: the subsequent portion of the Upaniṣad is for conveying that all the undesired effect is produced from ignorance.

अविद्यामात्रहेतूत्था ह्यात्मनोऽनर्थसंगतिः ।
इत्यस्य प्रतिपत्त्यर्थं परो ग्रन्थोऽवतार्यते ॥१७०॥

Indeed the connection of the Ātman (of an individual being) with the undesired (results) arises only from ignorance. Therefore, to convey this thought, there is now introduced the subsequent (portion of) the Śruti. [170]

यद्यविद्यैकहेतु स्यात्संसारित्वं तदात्मनः ।
विद्यार्थोऽयं समारम्भो युज्यते नान्यथा सति ॥१७१॥

This beginning of the Śāstra is for acquiring the knowledge of the true nature of the Ātman; this is understandable only if the Ātman (within an individual being) is (taken as) transmigratory owing to mere ignorance, not otherwise. [171]

प्राणात्मत्वाभिमानो सन्यतः प्राणः प्रसयते ।
प्राणप्राणोऽपि सन्मोहात्प्राणनादि प्रपद्यते ॥१७२॥

Since Prāṇa is produced (or impelled) while it identifies itself as being of the nature of Prāṇa, then, even though being the vitality or power of *prāṇas*, on account of delusion or ignorance it comes to have (the activities of) breathing etc. [172]

This is the explanation here of the word *prāṇamaya*, even if it is mentioned in the text later after *vijñānamaya* etc.—this is setting aside the *pāṭhakrama* in the Śruti. SP supports the argument in this verse by citing *Muṇḍakopaniṣad* 2.1.3; *Praśnopaniṣad* 6.4 and BU 4.4.18. There is notable a play on the word *prāṇa*.

ततो बुद्धिसमुत्पत्तौ विज्ञानोऽस्मीतिभावतः ।
विज्ञानमयतामेति स्रक्सर्पमयतामिव ॥१७३॥

Then, at the time of the creation of the intellect, it becomes mostly of the nature of specific knowledge (*vijñāna*), owing to its having the impression, 'I am *vijñāna* (= *buddhi*),' as a garland comes to have mostly the nature of a serpent.¹ [173]

¹Here the suffix *-mayat* is in the sense of *prācurya* 'mostly consisting of'.

मनसो ग्रहणं चात्र बुद्धिवृत्त्युपलक्षणम् ।
असुबुद्धी यतो हेतु सर्वेषामिन्द्रियात्मनाम् ॥१७४॥

And, here, the mention of the word *manas* is indicative of the modification (*vṛtti*) of the intellect; (this is so,) since Prāṇa and the intellect are the cause (i.e. origin) of all of them which have the nature of the organs. [174]

कर्मेन्द्रियाणां सार्थानां प्राणः कारणमुच्यते ।
स एव बुद्ध्यतिशयः श्रोत्रादेरपि कारणम् ॥१७५॥

It is said that Prāṇa is the cause (i.e. origin) of the various organs of action together with the objects of them; and that itself, when dominated by the intellect, becomes the cause of the ear etc. [175]

Prāṇa itself becomes the intellect and then that becomes modified as the ear and its objects etc.

SP refers to some Ātharvaṇa Śruti *ātma hi ... sṛjati* (not traced) as the support for the argument in the verse.

Verses 176-182 state that the cause of transmigration is the ignorance about the Ātman.

स्वाभ्यस्तभावनातोऽस्य श्रुतकर्मनुरोधतः ।
प्राणो बुद्धिर्मनश्चक्षुःश्रोत्राद्यज्ञस्य जायते ॥१७६॥

Prāṇa, the intellect, *manas*, eye, ear etc. are produced (lit. become born) of this ignorant individual self on account of its own accumulated conceptions/apprehensions in accordance with its (worldly) knowledge (*śruta*) and action. [176]

A product of the organs in a (new) body is owing to the knowledge and action of the self in its previous life—that is, it is the material cause of the same.

प्रायार्थे च मयिज्ञेयो विकारादेर्निषेधनात् ।
अविज्ञातात्मतत्त्वस्य विकारो वास्त्वदोषतः ॥१७७॥

The suffix *-mayat* is to be understood in the sense of *prāya* 'mostly consisting in', since there is a denial of modification etc.;¹ or let it be understood, without involving any fault, as the modification of the Ātman whose nature has not been known. [177]

In the case of the Ātman, there cannot be any modification—it is clear. But, in the case of the Ātman affected by ignorance, modification can be accepted. SP supports the argument in this verse by citing the rejection in *Muṇḍakopaniṣad* 2.2 and *Kāthopaniṣad* 2.1.10.

¹This refers (very possibly) to the six modifications (*bhāva-vikāras*) and also to their consequent effect.

सर्पादयो यथा रज्ज्वा विकाराः स्युरबोधतः ।
अज्ञानादात्मनस्तद्वत्तेजोबन्नादिविक्रिया ॥१७८॥

As there can be the modifications such as a serpent etc. (understood) of a rope, owing to the ignorance (of its real nature), similarly there can be the modification(s) into fire, water, food etc. of the Ātman, owing to the ignorance about it. [178]

न हि वेदान्तसिद्धान्ते ह्यज्ञातात्मातिरेकतः ।
सांख्यानामिव सिद्धान्ते लभ्यते कारणान्तरम् ॥१७९॥

Indeed, in the doctrine of Vedānta there is not noticed any cause other than the unknown Ātman as there is (or, are) noticed some other cause (or causes) (than Prakṛti) in (the doctrine of) Sāṃkhyas.¹ [179]

The word *hi* 'indeed' in the verse points to the support of the Śruti, the Smṛti and the reason for the Vedānta doctrine

to be in contrast with that which has the support of Sage Kapila for Sāṃkhyas. Cp. the *smṛti-adhikaraṇa* of BS.

¹This refers to *mahat*, *pradhāna* etc. which are the causes of every subsequent modification.

प्राणादिमयतां यात्वा तद्वृत्तीनामबोधतः ।
आत्माकर्त्तापि कर्तृत्वमेति तासां समुद्भवे ॥१८०॥

The individual self, though a non-agent (of any action) comes to have agentship (of the same), when they (i.e. various actions) appear, on account of the non-knowing (*abodhataḥ*) of its having become mostly as Prāṇa-etc. and as (performing) their functions. [180]

In verses 172-175 references are made to the Ātman becoming its modifications Prāṇa etc.; this is not a real happening—it is this that this verse points to. SP adds: *uktaṃ hi—*

kāraṇam puruṣas tasmāt kāraṇajñair udāhṛtaḥ /
na cet kāraṇam ātmā syāt khādayaḥ syur ahetukāḥ //
(not traced).

चक्षुषश्चक्षुरप्येवं यथा चक्षुर्मयस्तथा ।
श्रोत्रादिमयताप्यस्य व्याख्येया प्रत्यगात्मनः ॥१८१॥

Thus, (the Ātman) is the eye (i.e. the eye-sight or power) of the eye (the organ). As it is of the nature of the eye, so also its being of the nature of the ear etc. is to be explained in the case of the inner self. [181]

This explains the meaning of *cakṣurmaya* and *śrotrādimaya*

....

स विज्ञानमनःप्राणचक्षुःश्रोत्रादि मोहजम् ।
मन्वानोऽविद्ययात्मैति तन्मयत्वं न तु स्वतः ॥१८२॥

That individual self considers itself through its ignorance, (to

be possessed of) the specific knowledge (of itself as) being *manas*, *Prāṇa*, eye, ear etc., which are the products of ignorance, but this (does) not belong to it, by its own nature.

[182]

This is to point to the effect of ignorance (*bhrānti*) on the part of the individual self. SP supports this argument by citing *uktam hi—avyaktam ātmā kṣetrajñāḥ śāśvato vibhur avyayaḥ iti* (not traced).

In verses 183-185, it is stated that *Ātman* which has the nature of *Virāj*, consists mostly of the five elements.

समासव्यासतस्तद्वत्पञ्च भूतान्यविद्यया ।
अशब्दादिमयोऽप्यात्मा तन्मयत्वं निगच्छति ॥१८३॥

The *Ātman*, though not consisting of word etc.,¹ becomes through ignorance (as it were) what consists mostly of them, i.e. the five elements, in their totality or in each one of them individually.²

[183]

¹SP supports this by citing *Kāthopaniṣad* 4.3.15.

²SP clarifies this thus: *avidyayā pṛthivyādibhūtāni virāḍātmanā sūtrātmanā ca sāmastyena vaiastyena ca pratyekam abhimanyamāno bhūtamayatvam āpnotīty arthaḥ*.

लिङ्गदेहाविमावेवं पञ्चभूतमयावुभौ ।
प्रधानगुणवृत्त्योक्तौ सूक्ष्मस्थूलविभागतः ॥१८४॥

Thus, both of these two, i.e. the subtle form¹ and the gross one,² are made up of five elements, one of them being the principal in relation to the subsequent as its subordinate and also as divided into the subtle and the gross (forms).

[184]

¹This is mentioned in the BU sentence *vijñānamayaḥ ... before pṛthivīmayaḥ*.

²This is mentioned in the subsequent part of sentence, i.e. *prthivīmayaḥ ... kāmamayaḥ*.

उक्तयोरात्मनोरन्तर्यद्रूपं भावनामयम् ।
कामादिमयतोक्त्येह तदिदानीं विभाव्यते ॥१८५॥

Now is explained here what are the forms of the two *ātman*s,¹ mentioned in the statement of its becoming inside (the body) (and) mostly of the nature of desire etc., which is product of *bhāvanā*. [185]

¹This stands for 'bodies'.

Verses 186-187 explain the intention of kāmamaya.

कामं क्रोधं तथा धर्मं तद्विरुद्धं च मोहतः ।
संभावयन्प्रतीच्यात्मा तन्मयत्वं निगच्छति ॥१८६॥

The Ātman, imagining desire, anger and also merit and its opposite to be existent in the inner self attains the nature of them through its ignorance. [186]

प्रवृत्तय इहेक्ष्यन्ते वाङ्मनःकायसाधनाः ।
यावत्यो भावनाः पुंसामपि तावत्य एव तु ॥१८७॥

Impressions of individual beings are known to be as many as there are noticed their activities having *vāc*, *manas* and body as their instruments. [187]

Verses 188-194 are explanation of idammaya and adomaya.

इत्येवमादयोऽनेके कोशाः स्युर्भावनामयाः ।
असंख्येया बहुत्वात्ते संक्षेपोऽतौऽत्र भण्यते ॥१८८॥

These and many others are the sheaths¹ (of the Ātman), consisting of *bhāvanās* since they are many, rather uncountable;

there is here the mention of them in brief.

[188]

¹This refers to the entire mass of the worldly causes and effects.

इदमित्येव यत्साक्षात्किञ्चित्कर्मोपलक्ष्यते ।
परोक्षं भावनारूपं तेनादोमयतेष्यते ॥१८९॥

By the word *idam* is conveyed (*upalakṣyate*)¹ some action which is directly perceptible; therefore, the form of impression(s), which is beyond perception (*parokṣa*), is considered to have the nature of what can be (signified by the word) *adomaya*.

[189]

¹In the case of the directly perceptible thing, 'conveying' means directly referring to it and in the case of the other, that word means 'indicated (suggested) by that'.

इदमयेन लिङ्गेन संबन्धोऽदोमयात्मनः ।
प्रत्यक्ष आत्मनि यथा तथान्यत्रापि लिङ्ग्यते ॥१९०॥

This thing which is of the nature of *adomaya* has its connection with that which is of the nature of *idamunaya*;¹ as this is understood in the case of the directly perceptible body, so is it inferred elsewhere² also.

[190]

¹This means: whatever regarding the body etc. of the directly perceptible thing is mentioned can be mentioned of what are signified by the word *adomaya*.

²That is, when not directly perceptible.

धूमाग्नयोरिव संबन्धस्तयोर्दृष्ट इहात्मनि ।
अकामप्रमुखैर्योगैस्तथा कामादियोगतः ॥१९१॥
धर्माधर्ममयो भूत्वा पमान्सर्वमयो भवेत् ।
धर्माधर्मेकहेतुत्वात्सर्वस्य जगतस्ततः ॥१९२॥

The relation between the two (viz. *idammaya* and *adomaya*) is seen (as obtaining) here in the Ātman¹ as (is that obtaining) between smoke and fire, because of their connections with the absence of desire as the principal (among them) and, in the same way, with desire etc. [191]

Having (first) become possessed of² merit and demerit, this man (i.e. the transmigratory being) then becomes possessed of all, since all (that exists in/belongs to this) world is effected (or, caused) only by merit and demerit.³ [192]

¹That is, with reference to the two subtle and gross bodies which the Ātman is said to be possessed of.

²Literally, mostly consisting of.

³Alternatively, has only merit and demerit as its cause.

अदोमयत्त्वं लिङ्गं स्याल्लिङ्गेनेदंमयात्मना ।

भावनाकर्मविद्यानामेवमुक्तेन वर्त्मना ।

भूरिभेदान्न शक्यन्ते वक्तुं रूपाण्यशेषतः ॥१९३॥

By the subtle body, which has the nature of *idammaya*, there can be (indicated) the subtle form as having the nature of *adomaya*.¹ Thus, since there is much variety in respect of the impressions, actions and knowledges, in the way stated so far, it is not possible to state (i.e. enumerate) the forms in their entirety. [193]

This is the meaning of the sentence *tad yad etad*.

This refers to the impressions on the intellect.

¹Here Sureśvara uses the word *liṅga* in two senses: (i) *liṅgam*—subtle form of the Ātman which is suggested. Thus the word *liṅga* stands for what is *liṅgin* 'having some characteristic' for its inference, and (ii) *liṅgena* which is mentioned in *idammaya* is a characteristic for inference of the subtle form. Cf. the first line of verse 190 above.

किं कारणं पुमान्यस्माद्यथाकारी भवत्ययम् ।
यथाचारी च लोकेऽस्मिंस्तथारूपो भवत्यसौ ॥१९४॥

(A question is asked:) 'What could be the reason for which this individual self becomes *yathākārin* 'doing as told' and also *yathācārin* 'behaving as seen in this world'?—that is, why does he become so?' [194]

In verses 195-197 the two karaṇa and caraṇa are distinguished.

करणं नियतं चैव ततोऽन्यच्चरणं तथा ।
करणं कर्मशक्तिर्वा चरणं प्रत्ययात्मकम् ॥१९५॥

karaṇa is what is laid down (for one by scripture etc.) and (that which is) other than that is *caraṇa*. Or, *karaṇa* refers to the eligibility or capacity (of a person) for doing (some action) and *caraṇa* is of the nature of what is experienced (in the case of) a person's behaviour (or doing at his will). [195]

साधुकारी पुमान्यः स्यात्साधुरेव भवत्यसौ ।
पितृगन्धर्वदेवादौ साधुसाधनसंपदा ॥१९६॥

An individual being is called a good man, if he does what is good;¹ then, he (becomes born among) *pitrs*, *gandharvas*, *devas* etc., owing to his being possessed of the means for good (states of various lives).² [196]

¹This refers to *dharma* and *dharmakaraṇa*.

²Being born as a god is also the stage of transmigration of a being—this is particularly noticeable in Jaina writings in numerous details.

पापकारी च पापश्च स्थाण्वादावभिजायते ।
कामक्रोधादिभूयिष्ठः पुमानुग्रेण कर्मणा ॥१९७॥

A sinful man, who does sinful actions, becomes born among immovables (like trees) etc., having his nature predominantly consisting of desire, anger, etc.—on account of his fearful act(s). [197]

Verses 198-208 state the exposition of BUB on the suffix conveying tendency of an individual (*tāccīlya*).

साध्वादि भूयोऽभ्यासात्स्यात्ताच्छील्यप्रत्ययश्रुतेः ।
फलमित्यतिशङ्क्याह पुण्य इत्यादिकं वचः ॥१९८॥

The Śruti has made a statement *punyaḥ* ..., (as is clear) from the repeated use of (the words) *sādhu* etc. and also the hearing of the suffix conveying the idea of *tāccīlya*, (having to convey) the result. [198]

नैवाभ्यासव्यपेक्षास्ति पुण्यपापफलाप्तये ।
सकृदप्यनुतिष्ठन्ना प्राप्नोत्येव फलं तयोः ॥१९९॥

In respect of obtaining the result of merit or sin, there is not any relation to the expectation of repetitive performance; doing either of the two, even once, a person acquires the result of the two. [199]

फलातिशीतिरभ्यासाज्जायते पुण्यपापयोः ।
तत्फलस्य तु या प्राप्तिः सा सकृत्करणादपि ॥२००॥

From the repetitive performance of merit or sin there arises excellence in respect of the result; so far as the obtaining of the result is concerned, that occurs even by a single performance (of the same). [200]

कामक्रोधादिपूर्वैव कर्तृता पुण्यपापयोः ।
पुंसः सर्वमयत्वस्य हेतुः संसारकारणम् ॥२०१॥

(Thus) agentship of an individual self in respect of merit and

sin is necessarily (*eva*) preceded by desire, anger etc. That would be the cause of its being made up of all and also the cause of transmigration. [201]

This is the purport of BU sentence *yathākārī* ... before *atho khalv āhuh*.

धर्माधर्मात्मकं कर्म संसारानर्थकारणम् ।
एतद्विषयमेवैतद्वेदशास्त्रमधीयते ॥२०२॥

Action consisting in *dharma* and *adharma* is the cause of undesired transmigration. Thereby the Vedic scriptures having the (same) subject matter (regarding rituals) are studied (by them). [202]

कर्मैव वेदशास्त्रेऽस्मिन्प्रधानं निश्चितं यतः ।
पुंसोऽभ्युदयदुःखाप्तौ कार्यं वर्ज्यं च तत्ततः ॥२०३॥

Since, in this Vedic scripture, it is action alone which is decided to be (of) principal importance; therefore, the action relating to that (*tat = vedaśāstravihita*) is to be avoided with respect to (acquiring) worldly prosperity (and averting) the experience of misery. [203]

This is clarified in the next verse.

कर्म साधवेव कर्तव्यमिच्छताभ्युदयं चिरम् ।
पापं तु सर्वदा हेयं दुःखेभ्यस्त्रस्यता भृशम् ॥२०४॥

Only good action has to be performed by one who desires worldly prosperity (to last) for long and (*tu*) sinful action has ever to be avoided (lit. abandoned) by one who very much fears miseries. [204]

संसारानर्थनिष्पत्तौ सर्वेषामविशिष्टता ।
आरम्भकाणां विज्ञानप्रमुखाणामिहात्मनः ॥२०५॥

यद्यप्येवं तथापीह धर्माधर्मात्मकं बुधाः ।
 कर्म प्रधानमिच्छन्ति यतः कर्म प्रयोजकम् ॥२०६॥
 प्रयोज्यमितरत्सर्वं विज्ञानादि यदीरितम् ।
 प्रयोजकं प्रयोज्याच्च प्रधानमिति निश्चितम् ॥२०७॥
 पुण्य इत्यादिवचसा कर्मप्राधान्यवाञ्छया ।
 कर्मोपसंहृतं श्रुत्या यथोक्तेनैव हेतुना ॥२०८॥

In respect of the occurrence (lit. coming into being) of the transmigratory existence, which is the undesired, all actions which begin to produce a result, there it is *viññāna* 'specific knowledge' etc.¹ that are not peculiar to an individual self. [205]

Even if this is so, wise ones have considered (lit. desired) action consisting of *dharma* and *adharma* as the principal one, since action is productive (lit. inciter) of (a result); [206] everything else is what is to be produced (lit. incited), viz. that which is described as specific knowledge etc.; and (that action) is productive; therefore, it is decided that what produces (an action) is more prominent than what one has to produce, [207]

by the statement *punyaḥ* ..., which asserts predominance of activity, has the Śruti completed the statement of (or, briefly stated) that activity, together with (that of) the reason, as is already stated.² [208]

The second line of verse 207 reaffirms what is stated in 205-207ab.

¹This refers to *buddhi*, *bhāvanā*, *karma*.

²*yathokta* stands for *prayojakatva*.

Verses 209-213 state the decision in *atho khalu*.

कर्म प्रधानमित्येवं साक्षाच्छ्रुत्योपसंहृतम् ।
 पूर्वपक्षेऽथ सिद्धान्तः खल्वाहुरिति भण्यते ॥२०९॥

Thus has the Śruti directly (or, expressedly) stated that action is the principal one—this is by way of (the statement of) the *prima facie* view and the answer to it (i.e. the Siddhānta) is then stated in the words *atho khalv āhuḥ*. [209]

अथो खल्वत्र पूर्वोक्ते प्राहुरुच्चैर्विपरिचतः ।
 न कर्ममय एवायं पुमान्सर्वमयः कुतः ॥२१०॥
 यतः काममयो भत्वा प्राप सर्वमयात्मताम् ।
 प्रयोजकप्रयोज्यत्वे ज्ञानादीनां प्रयोजकम् ॥२११॥
 कर्मैवावधृतं यद्वत्कर्मान्तानां प्रयोजकः ।
 काम एवेति तत्स्पष्टं स यथेति विभाव्यते ॥२१२॥

In the sentence, which is earlier stated in the word *atho khalu* ..., the wise ones have (already) intensely stated that 'this individual being is not made up of (only) action', 'Then why is it called *sarvamaya*?' [210]

Since this one, having first become full of desire, has later become of the nature of one full of all (activity etc.); therefore, the state of being what produces and what is to be produced become productive of knowledge etc. [211]

As it is only action that is specified, so also it is desire that is productive of all as ending in action—this is very clear, as it is noticed in (the use of) the word *yathā* [212]

प्रयोजकत्वे कर्मादेः कामप्राधान्यमीरितम् ।
 प्रयोजकानां निष्ठात्वे न तु कामो विवक्षितः ॥२१३॥

In the case of action etc., being productive (of others), there is conveyed the notion of desire as the principal one, but desire is not intended to be firmly rooted in what are productive (of transmigration etc.). [213]

Verses 214-217 state adhyāsa as the cause of all desire.

यथावस्त्वपरिज्ञानं कामस्यापि प्रयोजकम् ।
 आप्ताशेषसुखापास्तदुःखत्वादात्मवस्तुनः ॥२१४॥

नानवाप्तं सुखं किञ्चिन्नानपास्तं तथा सुखम् ।
यो वै भूमेति वचनाद्योऽशनायेति चात्मनि ॥२१५॥

In the case of desire also, absence of complete knowledge (*prajñāna*) of the thing (i.e. reality) is productive of it, because the thing, i.e. the Ātman has the nature of what has obtained every kind of happiness and thrown away every kind of misery.

[214]

There is not any happiness which is not obtained (by the Ātman) and so also there is not any happiness which is not thrown away (by it)—this is on the basis of the Śruti statement *yo vai bhūmā ...*¹ and also *yo 'śanāyā ...*² in respect of the Ātman.

[215]

¹CU 8.3.1. ~

²BU 3.5.1.

स्वत एवंविधं वस्तु यतोऽतस्तदबोधतः ।
कामद्वेषादिसंभूतिर्मिथ्याज्ञानत्वकारणात् ॥२१६॥

Since the thing (i.e. reality) is, in its own right, of this nature; therefore, owing to the ignorance about it, i.e. for the reason of its being false knowledge, there is the rise of desire, hatred etc.

[216]

अज्ञातं वस्तु चोद्दिश्य तत्तत्त्वप्रतिपत्तये ।
प्रमाणानां प्रवृत्तिः स्यादन्यथा नोपपद्यते ॥२१७॥

In order to know the truth about a thing which was unknown earlier means of right knowledge begins their activity, not otherwise.

[217]

This verse states the purpose of what are called *pramāṇas*. This is to lead to that the Śruti is the means of knowing the nature of the Ātman which was unknown earlier.

Verses 218-220 state that ignorance is the cause of any worldly activity of an/the individual self.

प्रयोजकत्वेऽविद्येयं यदि नामेह न श्रुता ।
मितिप्रवृत्तिहेतुत्वात्तथाप्यत्राश्रितैव सा ॥२१८॥

Even if indeed, this ignorance has not been heard¹ getting to know other things (in respect of) its being productive (of desire etc.), this is yet positively taken as the basis here (i.e. in respect of them), because of its being the cause of any so-called knowing activity. [218]

सर्वेषामपि मानानां प्रमाणं परमं श्रुतिः ।
सर्वमेयातिवर्त्यात्मयाथात्म्यप्रतिबोधतः ॥२१९॥

Among all the means of knowing, the highest (lit. final) is the Śruti, on account of its giving rise to the knowledge of the true nature of the Ātman which is beyond all objects to be known (by any other means). [219]

तस्मादज्ञात आत्मैव कामादेः स्यात्प्रयोजकः ।
यतोऽबोधस्य विध्वस्तौ पुंसः स्यात्कृतकृत्यता ॥२२०॥

Since the Ātman, which has been not known (before as thus), is productive of desire etc.; for when the destruction of the absence of knowledge is achieved this consists in, for an individual being, the state of accomplishment of what has to be achieved. [220]

Verses 221-225 explain the words sa yathākāmaḥ.

वाङ्मनःकायसाध्यायाः प्रवृत्तेः काममूलता ।
यथा तत्प्रतिपत्त्यर्थं स यथेत्युत्तरा श्रुतिः ॥२२१॥

The subsequent Śruti begins with the words *sa yathākāmaḥ* for giving rise to the knowledge that every activity, which is

to be accomplished by means of *vāc*, *manas* and body, has its root in desire. [221]

सर्वस्य जगतो हेतू पुण्यापुण्ये समीरिते ।
यद्यपीह परो हेतुः काम एव तयोरपि ॥२२२॥

Even if merit and demerit have been mentioned here to be the two causes of the entire world, the ultimate (*para*) cause of the same, viz. the two, is desire alone. [222]

अकामस्य क्रिया काचिद्दृश्यते नेह कस्यचित् ।
यद्यद्वि कुरुते जन्तुस्तत्तत्कामस्य चेष्टितम् ॥२२३॥

There is not noticed any activity in the case of one who is without any desire; (for, it is said:) whatever a being does is the doing of desire. [223]

This was earlier referred to in BUBV 1.4.1816 and 2.1.578; cp. *Manusmṛti* 2.4.

निष्फलं कर्म सर्वं स्यान्न चेत्कामपुरःसरम् ।
अपराधलघुत्वं च दृष्टं पुंसोऽप्यकामतः ॥२२४॥

Every activity would be fruitless, were it not prompted by desire; (for,) in the case of a person, there is noticed (or recorded) mitigation of an offense, if (he has done an act) without a desire. [224]

SP states for the gist of the fault as stated in *Dharmaśāstra* thus:

caṇḍālānnaṃ pramādena yadi bhūñjīta yo dvijaḥ /
tataś cāndrāyaṇaṃ kuryān māsaṃ ekaṃ vrataṃ caret //
(*Parāśarasmiṛti* 11.1); *Kūrmapurāṇa* 2.34 conveys the same.

कामप्रयुक्तो हि नरः संचिनोति शुभाशुभे ।
आत्मैवेदमिति गिरा श्रुत्यैतत्प्रागपौरितम् ॥२२५॥

Indeed, a person, prompted by desire, collects (or acquires) the auspicious and inauspicious (results)—this has been already stated by the Śruti in the words *ātmaivedam agra āsīd eka eva, so 'kāmayata*.¹ [225]

¹BU 1.4.17.

The meaning of kāma is explained in verses 226-234.

कामो गर्धोऽभिलाषश्च तृष्णेत्येकार्थवाचकाः ।
आसङ्गपूर्वकः कामो नासङ्गविरहादसौ ॥२२६॥

Desire, greed, longing and thirst are (all words) expressive of (but) one meaning, viz. that desire is preceded by some attachment (to objects); that, i.e. desire, cannot be without any attachment. [226]

ध्यायतो विषयान्पुंसः सङ्गस्तेषूपजायते ।
सङ्गात्संजायते काम इति सर्वज्ञशास्त्रतः ॥२२७॥

In the case of a man, who is thinking about the objects (of desire), there arises his attachment to them; from that attachment arises (further) desire—this is learnt from the preaching¹ by the all-knower.² [227]

¹*Gītā* 2.62.

²Sureśvara uses the word *sarvajña* for Kṛṣṇa, not for Buddha.

पुंसो या विषयादित्सा स काम इति भण्यते ।
तद्गुणस्मरणाभ्यासादिच्छा पुंसोऽभिवर्धते ॥२२८॥

The desire of a person for taking up an object, is called *kāma* and the desire of a person goes on increasing owing to the repeated memory of the excellence (of that object). [228]

कामिताद्विषयान्नान्यस्तदा तस्येह रोचते ।
निराकर्तुं न च ततः शक्यते येन केनचित् ॥२२९॥

Then (i.e. in that state) a person does not like any other (object) than the desired object and it is not possible that the person is warded off from that (i.e. from pursuing that) by anyone (or anything). [229]

इत्येवं वर्धमानः सन्क्रतुत्वं प्रतिपद्यते ।
यदनन्तरमेवेहा स कामः क्रतुरुच्यते ॥२३०॥

Thus, (ever) increasing, it comes to be (an individual's) thought (*kratu*), because that desire, viz. longing, comes to be called *kratu* only after that being there. [230]

क्रतुना यादृशेनायं यत्क्रतुः स्यात्पुमानिह ।
कुरुते तादृशं कर्म वाङ्मनःकायसाधनैः ॥२३१॥

Having that kind of thought, i.e. by that kind of thought, this individual being in this world (being possessed, i.e. overcome) does that kind of activity by means of *vāc*, *manas* and body. [231]

यत्कर्म कुरुते चायं शुभं वा यदि वाशुभम् ।
संपद्यतेऽथ तत्साक्षादात्मत्वेन पुमानयम् ॥२३२॥

Whatever action, be it auspicious or inauspicious, this individual self performs, the person becomes that itself, because of its attaining the nature of the same. [232]

अपूर्वमिति चेदं स्याददृष्टमिति चोच्यते ।
पुण्यापुण्यमय इति प्राक्चैतदुपवर्णितम् ॥२३३॥

And this would be called *apūṛva* or it is also called *adr̥ṣṭa*—which has already been described as consisting of merit and demerit. [233]

पुमान्काममय एव कर्मादेः स्यात्प्रयोजकः ।
यथा तदुक्तं श्रुत्येह मन्त्रोऽप्यत्र निगद्यते ॥२३४॥

An individual being, only full of desire, would be the cause (*prayojaka*) of inciting (i.e. performing) of action etc. As that is said here in the Śruti, so also by the Mantra.¹ [234]

¹This refers to what follows as a Mantra at BU 4.4.6.

Verses 235-254 are the discussion on BU 4.4.6: In verses 235-237, Sureśvara states the explanation of the Mantra tad eva ... and later verses 238-252 follow BUB.

तदेवैति पुमानस्य सक्तं यत्र मनो भवेत् ।
आत्मा सक्त इदं लिङ्गं कर्मणा सह तत्सदा ॥२३५॥

In the verse *tad eva*, (it is stated that) the individual self goes to where his *manas* has always clung to; the Ātman has clung to this subtle body together with its actions. [235]

This means, according to SP, that sentience thus becomes affected by desire and activity and therefore becomes transmigratory.

सूक्ष्मो देहोऽत्र लिङ्गं स्याल्लिङ्गनात्प्रत्यगात्मनः ।
स्वात्मचैतन्यबिम्बेन निःसङ्गः सक्त आत्मना ॥२३६॥

Here, the subtle form of the body is an indication (*linga*) of the individual self owing to its function of indicating (*lingana*); (for,) the Ātman, which is (by its nature) without any attachment, becomes attached to the reflection of its own sentience (in the subtle body). [236]

उदपात्रार्कगतिवदगतेर्गतिरात्मनः ।
ध्यायतीवेति च तथा निषिद्धैव स्वतो गतिः ॥२३७॥

This movement of the Ātman is understood (really) from non-movement in the same way as the (supposed) movement of the sun from a waterful pot. So is it that the movement of the Ātman, by itself,¹ is denied (lit. rejected) (by the Śruti) in the words *dhyāyatīva*.² [237]

¹Cp. the preceding verse. This is to stress the idea of *adhyāsa* to be the basis of the self's movement.

²Cf. BU 4.3.7.

Verses 238-253 explain the meaning of BUB sentence *tad eva*

तदेवैतीति यदि वा गन्तव्यमभिधीयते ।
कामप्रधानता चैवं प्रकृतार्थानुरोधिनी ॥२३८॥

Or perhaps by the words *tad evaiti* is mentioned the goal of the self's movement and thus there follows the self's having desire as its prominent impelling force and that is in accordance with the matter in hand. [238]

Read SP: *pūrvavyākhyānād asya sāksāt prakṛtopayogitvena yuktataratvam* is understood from the second line.

कामादयो यतो धर्माः स्वान्तस्यैवेह कीर्तिताः ।
तदात्ममानिनोऽतः स्युरात्मनस्ते न तु स्वतः ॥२३९॥

Since here are mentioned the properties of *manas* of the self, viz. desire etc.; therefore, they are to be often understood also of the Ātman which has identified itself with them, and not because of its own nature (*svataḥ*).¹ [239]

¹Once again, there is a stress on *adhyāsa* of the self on a body.

लिङ्गासक्तिवशादात्मा सक्त इत्यभिधीयते ।

सक्तः सन्कर्मणा सार्धमेत्यात्मा कर्मणः फलम् ॥२४०॥

Individual self is said as clung (to the subtle body) under the influence of its attachment to the subtle body; and (saying that) the self has clung to (the subtle body) together with its action, is but the result of action (in the earlier transmigratory existence). [240]

मनोभिष्वङ्गवशगः कर्मणैति यतः सह ।

कामस्यातः प्रधानत्वं तत्प्रयुक्तात्मसंसृतेः ॥२४१॥

Since it moves (out from a body) together with its own action, having been under the influence of its identification with *manas*; that indicates the prominence (*pradhānatva*) of desire, which is (or, has resulted) from the self's transmigration caused by it. [241]

लिङ्गं मनःप्रधानत्वलिङ्गं मन इहोच्यते ।

यदि वा लिङ्गयते तेन मनो लिङ्गमिहात्मनः ॥२४२॥

In this context, *manas* is called *linga*, on account of *manas* being the prominent¹ (among the seventeen constituents of) the subtle body or because the self is indicated, i.e. is realised² by *manas*— thus *manas* is mentioned here as an indication of the self?³ [242]

¹Here Sureśvara uses the word *linga* in the sense of conglomeration of seventeen Sāṃkhya principles. Cf. verse 48 above, and SP on it: *saptadaśakalingātmany ahamabhimānī sah*.

²BUB (p.628): *lingyate 'vagamyate 'vagacchati yena tallingam*.

³This is the word of BUB *atha vā*

निश्चयेन तदासक्तं यस्मिन्विषय आत्मना ।

विषयं कर्मणा सार्धं तमेवैतीति संगतिः ॥२४३॥

The mind goes, together with (its) action, to that object, to which it has clung together with the self by its resolve (*niścaya*)— this is the connection. [243]

इति कामप्रधानत्वसिद्धान्तस्योपसंहतिः ।

Thus¹ is the conclusion of (the statement) of the doctrine of Vedānta about the prominence of desire (in transmigration). [244ab]

¹This is with reference to the word *iti* in the Mantra (BU 4.4.6) under discussion.

कर्मणोऽन्तं फलं प्राप्य भुक्त्वा निरवशेषतः ॥२४४॥
 कस्य कर्मण इत्युक्ते यत्किंचेहेति तद्वचः ॥२४५॥
 फलभोगावसानेऽथ किमसौ प्रतिपद्यते ।
 तस्माल्लोकादिमं लोकं पुनरैति स कर्मणे ॥२४६॥

(That is to say:) 'Having attained to the end, i.e. the result of action, and having enjoyed it in its fullness, [244cd] (result) of which action, if it is asked the answer is whatever is here (in this world). (Also) that (self) goes to this (another) *loka* 'transmigratory existence' from that (earlier) world—(this is an answer to what is asked, lit. said) what does it become after the exhaustion (*avaśāna*) of the enjoyment of the result?' [245-246]

Verse 245 refers to action by the word *kin ca* and verse 246 explains the words *tasmād* ... in BUB, preceded by the question implied.

अस्मै लोकाय देहाय देहयोगश्च कर्मणे ।
 इत्येवमपरिश्रान्तो बभ्रमीति पुनः पुनः ॥२४७॥

(It goes) unto this world, i.e. the body (*deha*) and the connection with the body is (for performance of) action; thus

does (this transmigratory being) repeatedly keep on wandering without getting tired. [247]

This explanation is offered after dividing *asmai lokāya* and *karmanē* in the sentence.

The idea of this verse is amplified in the next verse.

अनिर्ज्ञातात्मतत्त्वः सन्कामबन्धनबन्धनः ।
घटीयन्त्रवदश्रान्तो बभ्रमीत्यनिशं नरः ॥२४८॥

A human being ever keeps on moving without getting tired, just like a wheel for drawing water, without having known the (true) nature of the Ātman and bound by a rope in the form of desire. [248]

इतीत्युक्तपरामर्शे न्विति खेदानुकम्पयोः ।
एवमज्ञः कामवशाद्भूयो योनीः प्रपद्यते ॥२४९॥

(Now the word) *iti* (in the BU passage) is used for referring to (*parāmarśa*) what was stated (earlier) and (the word) *nu* is used in the sense of sorrow and pity. Thus, (remaining) ignorant, (the individual self) moves to (i.e. is born in) various species under the influence of desire. [249]

What is meant by sorrow and pity is explained in the next verse.

अस्माल्लोकादमुं लोकममुष्मादिममेव च ।
अज्ञः कामाङ्कुशाकृष्टो जायते म्रियतेऽसकृत् ॥२५०॥

The ignorant self, dragged/impelled by the goad in the form of desire becomes born many times and (also) dies, moving from this world to that and from that to this (world). [250]

Reference to two different worlds for a transmigratory being evokes the sense of sorrow and feeling of compassion.

इति कामप्रधानस्य संसारानर्थसंगतिम् ।
उक्त्वा तदुपसंहारमितीतिवचसाकरोत् ॥२५१॥

Having thus described the association with the undesired transmigration (of the individual self), overpowered by desire (*kāmapradhāna*), the Śruti made the concluding remark pertaining to that (description of the self's association) by using the word *iti*. [251]

This explains the connection between the two words *uktvā iti* with *atra*.

एवं कामयमानोऽयं स्वप्नबुद्धान्तवन्नरः ।
संसरत्यप्रबुद्धः सन्परलोकेहलोकगः ॥२५२॥

Thus entertaining desires, this person transmigrates, remaining unknowing and thus moving from the other world to this world, as a person moves from the state of dream to the state of waking (and *vice versa*). [252]

अथ तस्यावदत्पूर्वं योषिदालिङ्गने यथा ।
सौषुप्तं स्थानमाप्तस्य रूपं कामादिवर्जितम् ॥२५३॥

Now, the Śruti has stated earlier about the form of that self which is without desire etc., when it has come to the state of deep sleep, as similar to the state at the time of (a man's) embracing a woman.¹ [253]

¹This refers to BU 4.3.21. The point of similarity is here 'not being aware of anything else than happiness'.

तद्वा अस्यैतदित्येवं प्राक्श्रुत्या प्रतिपादितम् ।
मोक्षो दाष्टीन्तिकस्तस्य दृष्टान्तस्येह वर्ण्यते ॥२५४॥

The Śruti has already explained earlier the nature of this state

in the words *tad vā asyaitad* Now here is described liberation, which is the matter to be exemplified by this example. [254]

The second line connects the BUB explanation *yasmāt* ... with what has been stated earlier in verses 252-253.

In verses 255-263 there is explanation of the BUB passage yasmāt

अथशब्दोऽत्र हेत्वर्थ उक्तस्य तदपेक्षतः ।
काम्येव हि यतोऽजस्रं संसरत्यविचक्षणः ॥२५५॥

Here the word *atha* is to express the sense of the cause on which it depends, or what is already stated: since (this self) is merely full of desire and therefore it continuously undergoes transmigration, being ignorant (lit. non-discriminator) (of its true nature). [255]

From here starts the discussion in BU on the state of liberation of an individual self. This has a reference to what is said earlier about the portion of BU in the beginning with BU 4.4.

तद्भावभाविहेतुत्वादतोऽकामो विमुच्यते ।
नरोऽकामयमानः स्यात्कामहेतोर्निराकृतेः ॥२५६॥

From this (bodily state), a human being, who is (now) without any desire, is released on account of his (earlier body) being the cause of what he is going to be, on account of the existence of that (i.e. earlier desire). It would be without any desire, since the cause of desires has been removed.¹ [256]

¹The state of being without any desire, at the time of liberation, is distinguished from the state of desirelessness in the deep sleep state—for, there in that state, the causes of desires have not been destroyed/removed.

स्वत एवाखिलसुखप्राप्ततत्त्वे स्व आत्मनि ।
निरस्ताशेषदुःखे च मोहात्तत्र विपर्ययः ॥२५७॥

And (yet) there is (i.e. can be) the reversal (of desirelessness) owing to the ignorance on the part of the Ātman itself, when in its own nature, it has obtained the nature of being full of all bliss and also become one that has thrown away the entire (mass of) miseries. [257]

This verse explains why the desireless Ātman proceeds to manifest itself in the worldly relation of beings and objects.

अप्राप्तं दुःखवन्मोहान्मन्वानः सुखमुत्तमम् ।
सुखं मे स्यादिति सदा नरः कामयतेऽबुधः ॥२५८॥

Considering misery as excellent happiness which has not (really) come to it, a non-knowing (man), i.e. the individual self desires, 'let there be happiness for me'. [258]

This is another expression of the same sense of *viparyaya* in the preceding verse.

तथा परिहृताशेषदुःखहेतुः स्वतोऽपि सन् ।
मा भूद्दुःखं ममेत्येवं जाड्यात्कामयतेऽनिशम् ॥२५९॥

In that way, the individual self (or, being), though by its very nature, the cause of (the state wherein) all miseries have been removed ever thinks, 'let there no misery befall me', on account of the ignorance (*jādyā*). [259]

कृत्स्नानन्दस्य चानाप्तिरवाप्तिरसुखस्य च ।
नात्मवस्त्वनुरोधेन तदबोधात्तदश्नुते ॥२६०॥

Further, non-obtainment of the entire bliss and also obtainment of all miseries does a human being experience not considering

in accordance with the (real) thing, viz. the Ātman, (but) on account of not knowing (the true nature) of it. [260]

This explains the state of a human being as a product of ignorance.

वस्तुतन्त्रा भवेद्विद्या कर्तृतन्त्रैव च क्रिया ।
अतः कामयमानत्वं कर्तृतन्त्रमबोधतः ॥२६१॥

Any specific knowledge would depend on the (real) thing, viz. the Ātman; the activity (of a human being) depends on it as the agent; therefore, the state (of an individual) of having a desire depends on its being the agent through ignorance. [261]

कारकाण्युपमृदनाति विद्या बीजमिवोषरम् ।
तत्कारणोपमर्दित्वाज्जन्मनैव न कारकम् ॥२६२॥

Knowledge¹ destroys various means of activity in the same way as a barren land destroys the seed (of any crop); there does not exist any means of activity, since (that knowledge) is, by its very rise (lit. birth), capable of destroying the cause of that, i.e. ignorance. [262]

¹This refers to the knowledge of the Brahman and not *pūrvavidyā* which had been under reference earlier.

यत एवमतो विद्वान्कामहेतूपमर्दनात् ।
स्यादकामयमानोऽत्र न त्वविद्वान्कथं चन ॥२६३॥

Since this is so, therefore, a knower (of the nature of the Ātman), by destroying the cause, i.e. desires, becomes devoid of them, and here (in acquiring liberation) a non-knowing person is not eligible in any way. [263]

Verses 264-270 state that desirelessness consists in the absence

of ignorance.

कतोऽकामयमानः स्यादित्येवमभिचोदिते ।
यौऽकाम इति वचनं पूर्वप्रत्युक्तिरुच्यते ॥२६४॥

If one asked 'Why is that individual self not having any desires?', there is an answer to the question in the statement *yo 'kāmaḥ*. [264]

कामा यस्य न विद्यन्ते दृष्टानुश्रविका बहिः ।
सोऽकाम इति संभाव्यः कृत्स्नकर्मनिराकृतेः ॥२६५॥

It is to be understood that one (individual self) is without any desire when in its case there are not seen the desires (for activity in response to the statement in) the Śruti (lit. seen text) and the hearing (of the tradition or Smṛti),¹ since there is complete abandoning of all activities. [265]

¹The word *dr̥ṣṭānuśravika* reminds one of *Sāṃkhyakārikā* 2.

क्रियमाणो यथा कामः कृत्वादीनि प्रसूयते ।
तथा संत्यज्यमानोऽपि नैष्कर्म्येणावर्तिष्ठते ॥२६६॥

As desire, being pursued (or accomplished) gives rise to (*prasūyate*) thought etc., so also, being abandoned, it comes to remain in the state of liberation (lit. state of being devoid of any activity).¹ [266]

¹Sureśvara uses the word *naiṣkarmya* principally in the sense of abandonment of activity, thereby indicating the state of liberation, which is the subject matter of his work *Naiṣkarmyasiddhi*. So also, *prasūyate* is not understood passively; cf. its paraphrase in SP as *ādhatte*.

अकामोऽपि क इत्येवं पृष्टे निष्कामं उच्यते ॥२६७॥
प्रयोजकात्मकाः कामा निष्क्रान्ता यस्य बुद्धितः ।

अतिग्रहाः स निष्कामो विद्वद्विरभिधीयते ॥२६८॥

If one were to ask 'And who is this one devoid of desires?', it is stated (in answer), *niṣkāma* 'the one who has discarded desires'. [267]

That one is described by the wise as 'one who has discarded desires', i.e. from whose intellect have gone away desires which have the nature of being the promoters (of activities), and also the sense organs.¹ [268]

¹This refers to BU 3.2.

बाह्यानामान्तराणां च कार्यकारणता मिथः ।
प्रत्यगज्ञानहेतुः स्यात्तदुच्छित्तौ न सा ततः ॥२६९॥

Further, (the desires) which are (noticeable) outside the body, and which are inside the same (i.e. are imperceptible), have the relation of being causes and effects mutually; they become the cause of ignorance about (the nature of) the inner self; but that¹ does not remain there when that, i.e. the cause (*pratyagajñānahetu*), is destroyed. [269]

¹This refers to *kāryakāraṇatā*.

तदुच्छित्तावतः प्रत्यग्याथात्म्यज्ञानमुच्यते ।
आप्तकामादिवचसा यथावस्त्ववबोधिना ॥२७०॥

Therefore, when that (*kāryakāraṇatā*) is destroyed, there arises (it is said) the knowledge of the true nature of the inner self by the statement about *āptakāma*¹ which brings about the cognition of the (real) thing as it is. [270]

¹BU 4.4.6; 4.3.21.

Verses 271-281 are the statement as to why the knower of the nature of *Ātman* comes to have attained all desires. Among

these, verses 271-272 state first that the knower has virtually obtained liberation.

आप्ताः सर्वे स्वतोऽप्यस्य कामा ये बाह्यसाधनाः ।
फलतोऽवाप्तकामोऽसौ परानन्दस्वभावतः ॥२७१॥

For this one (i.e. the knower), all these desires, which have external means (for their fulfilment), are themselves obtained; therefore, this one (the individual self) becomes the one, who has obtained all his desires, owing to its being of the nature of the highest delight. [271]

मानुषानन्दमारभ्य ह्युत्तरोत्तरवृद्धितः ।
सहस्रदशमांशोक्त्या परानन्दो निरूपितः ॥२७२॥

(The experience of) the highest delight is described (in the Śruti statement) as beginning from human delight, which goes on increasing one after another, as conveyed by the statement about its being thousandfold, tenfold etc.¹ [272]

¹Refer to *Taittirīyopaniṣad* 2.8.

Verses 273-282 point out that desirelessness leads to attainment of liberation.

कामिकामप्रभेदस्य प्रसक्ताविदमुच्यते ।
श्रुत्यात्मकाम इत्येवमात्मैवामी न ते पृथक् ॥२७३॥

In the context of the difference between desire and those who have desires, it is said that they are indeed only the Ātman i.e. not different from it as stated by the Śruti, by the word *ātmakāma*. [273]

आत्मैव सर्वमित्येवं बुद्धावस्याप्तकामता ॥२७४॥
अबाह्याभ्यन्तरः कृत्स्नः प्रज्ञानघनमात्रभाक् ।
इत्येवं यस्य वेदान्तवाक्योत्थं ज्ञानमात्मनि ॥२७५॥

ध्वस्ताशेषतमस्कत्वात्सम्यग्ज्ञानप्रसूतिः ।

वद तस्य कुतो हेतोः कामादेः स्यात्समुत्थितिः ॥२७६॥

In the case of cognition, the state of this one in having obtained all the desires is stated in the words *ātmaiva sarvam*.¹ [274]

So also, knowledge arises, in the case of this individual self, from the Vedānta sentences as *abāhyābhyantaraḥ kṛtsnaḥ prajñānaghanamātrabhāk*, [275]

and since that (individual) is one who has the entire ignorance of him destroyed and (in whom) there has been the rise of right (or, exact) knowledge,² then one would say, 'Tell me this, owing to which cause does there arise in this one desire etc.' [276]

¹CU 7.25.1.

²Add: of the nature of the Ātman.

यत्र वा अन्यदित्येवं सत्येवाज्ञान आह हि ।

ज्ञातृज्ञेयादिकं भेदं तमोध्वस्तौ न सोऽस्त्यतः ॥२७७॥

Such being the case, (the answer is:) 'The Śruti has indeed stated ignorance in (the words, viz.) *yatra vā anyat*¹ Also it has stated with reference to the distinctions of the knower, the object of knowing etc. And, therefore, when ignorance is removed, that (distinction) does not remain any more (or, thereafter)'. [277]

¹BU 4.3.31.

यत्र त्वस्येत्यतः प्राह ध्वस्तात्मतमसि श्रुतिः ।

तत्केन कमितीत्यादि साक्षेपं वचनं स्वयम् ॥२७८॥

Therefore, has the Śruti itself stated, in respect of the one who has destroyed darkness on the part of itself, *yatra tv asya* ...¹ and together with (or followed by) *tat kena kam*² [278]

¹BU 4.5.15.

²BU 2.4.14; 4.5.14.

ऐकात्म्यमात्रकूटस्थप्रबोधावसितेः कुतः ।
मातृमानक्रियामैयव्यवहारस्य संभवः ॥२७९॥

How could there be any existence possible of the dealings¹ in terms of knower, means of knowing, activity of knowing, and object of knowing after the final attainment of the knowledge of the immutable (self) revealing merely the singleness of the Ātman? [279]

¹The singular in the original is taken in plural sense.

अविजानन्हि विज्ञेयं कामं कामयते कथम् ।
ज्ञात्वैव विषयाँल्लोके सर्वः कामयते यतः ॥२८०॥

How indeed would the individual self have a desire when it is not knowing (any object of) desire to be known? (This is asked.) Indeed (*hi*), every person in the world desires various objects only after knowing about them. [280]

इत्येवमात्मकामत्वादाप्तकामोऽत्र यो भवेत् ॥२८१॥
आप्तकामतया तद्वन्निष्कामत्वं समश्नुते ।
निष्कामत्वेन चाकामः स आत्मज्ञो विमुच्यते ॥२८२॥

Thus, having obtained (the fulfilment of) the desires of its own (*ātmakāma*), the one, who has here become one of desires fulfilled (*āptakāma*), [281]
attains the state of desirelessness (*niṣkāmatva*) through having all the desires fulfilled; therefore, being one without any desire, for all of its desires have disappeared, and thus a knower of the Ātman, he is liberated. [282]

Verses 283-290 state that the purport of the subsequent portion

of the Śruti is: there is liberation of the desireless.

संसारानर्थबीजस्य प्रध्वंसादात्मबोधतः ।
तस्मादात्मनि विज्ञाते कामहेतोरसंभवात् ॥२८३॥
कामकर्माद्यसद्भावात्पूर्ण आत्मावतिष्ठते ।
न तस्येत्युत्तरोक्त्यायं यथोक्तोऽर्थः समर्थ्यते ॥२८४॥

After there has been achieved the destruction of the seed of (all) the undesired in the transmigratory world through knowing (about the nature) of the Ātman, there would not be any possible existence of the cause of desire, as/when the Ātman has become known through that (knowledge). [283]
There remains (only) the Ātman in/with its fullness owing to the non-existence of desire, activity etc.; this sense which is (just) stated is supported/justified by the later statement *na tasya* [284]

अपास्तानर्थहेतुत्वं यदुक्तं प्रत्यगात्मनः ।
योऽकाम इत्यादिगिरा यो वेदात्मानमागमात् ॥२८५॥
जिघृक्षत्यायसं तप्तं शास्त्राचार्यात्मनिश्चयात् ।
तस्योत्क्रामन्ति न प्राणा आसते नापि तत्र ते ॥२८६॥

By the words *yo 'kāmaḥ* whatever is said regarding the one, the individual self who has known the Ātman from the tradition (of the scriptures) to be the cause of the removal (lit. throwing away) of all the undesired. [285]
and wishes to hold a heated piece of iron¹ by the decision of scriptures/preceptors, that one's life-breaths do not depart (from that one's body), nor also do they (continue to) remain in that (body). [286]

¹This refers to CU 7.1.1. This pertains to the earlier practice of the Vedic people for testing truthfulness in the speech of a person. If he spoke the truth, a hot piece of iron would not cause any burn to his hand.

स्थित्युत्क्रान्त्योर्हि यो हेतुरात्माविद्यादिलक्षणः ।
 दृवस्तत्वात्तस्य सर्वस्य प्रत्यग्याथात्म्यदर्शनात् ॥२८७॥

Indeed, that which is the cause of the existence (in a body) and departure (from it, in the case of a transmigratory being), noticed as ignorance about the Ātman; that being destroyed, in its fullness, there results the awareness (lit. sight) of the true nature of the Ātman (and there is liberation of that being).

[287]

Verses 288-290 have amplified the thought expressed in verse 287.

यत एवमतः प्राणाः सम्यग्ज्ञानस्य जन्मनि ।
 नोत्क्रामन्ति न तिष्ठन्ति न च नश्यन्त्यहेतुतः ॥२८८॥

Since this is so, when there has arisen (in him) proper knowledge of the Ātman the life-breaths of that person do not either depart from his body nor do they remain there (in it)—(then the life-breaths) do not get destroyed, since there is not any (real) cause (of the same).

[288]

रज्जुसर्पो यथा लोकेऽज्ञातरज्जुसतत्त्वकः ।
 नोत्क्रामति न चाप्यास्ते न च नश्यति रज्जुतः ॥२८९॥

This is as it is in the world: like the serpent, which is (really) a rope, with its true nature of being a rope not known, it does not either disappear (lit. go out) nor does it continue to remain, nor does it get destroyed on account of the (real) rope.

[289]

स्थित्युत्क्रान्तिविनाशानां रज्जुस्तत्त्वं यतस्ततः ।
 रज्जुज्ञानसमुत्पत्तौ रज्ज्वा नान्योऽवशिष्यते ॥२९०॥

Since the rope is the truth (underlying) the (temporary/-assumed) sustenance, the departure and the destruction (of

the imagined serpent); therefore, there remains nothing else than the rope, when there has arisen the knowledge of the rope. [290]

Verses 291-295 explain the meaning of *samavanīyante* as *adhi-
sthānamātratayā tiṣṭhanti*.

अविद्यातज्जनिर्मुक्तं वस्त्वत्रैवेति भण्यते ।

(By this) it is said that the (real) thing (i.e. the Ātman) which is freed from ignorance and its effect(s), remains only here (i.e. in this very body). [291ab]

समित्यैकात्म्यमात्रेण प्राणानां स्थितिरुच्यते ॥२९१॥
अवनीयन्त इत्युक्त्या नाशादिभ्योऽन्यतोगतिः ।
प्रत्यङ्मात्रैकनिष्ठत्वात् भावाभावयोः स्थितिः ॥२९२॥

In the statement of the Śruti,¹ the preposition *sam* conveys the sustenance of *prāṇas* only as being one with the single Ātman; [291cd]
by saying *avanīyante*, there is reference to (their) movement away from destruction etc.—thereby it is pointed out that there does not exist any positive and negative entity owing to the fact that those *prāṇas* have remained supported in the inner self. [292]

SP states *prāṇānām ātmamātratayā sthitiḥ avanayanam*.

¹The Mādhyandina recension of BU says: *atraiva samavanīyante*, but not the Kāṇva recension of the same.

तादात्म्यमेव सर्वस्य कार्यकारणवस्तुनः ।
उत्क्रान्त्यादेश्च कृत्स्नस्य सर्वमात्मैतिशास्त्रतः ॥२९३॥

The oneness (with that Ātman) of everything known as effect and/or cause; and, is (referred to) because of the departure etc.¹ of the entire (mass of things) and (also) (this is) on

the basis of the scriptural text *sarvam ātmā*.²

[293]

¹This refers to *nirgama* and *dehāntaraprāpti*.

²BU 2.4.6; 4.5.7.

इति वस्तु स्वतो बुद्धमज्ञानं चानुभूतितः ॥२९४॥
प्रत्यग्याथात्म्यमात्रत्वात्तन्मोहाद्यप्यशेषतः ।
निवर्तते निवृत्तं चेत्येतदप्यनुभूतितः ॥२९५॥

Thus (the real) thing is, in its own right, what is known and there is (only) ignorance (of the worldly objects)—this is on the basis of experience (of us all). [294]

Ignorance about that (Ātman) etc.,¹ in its fullness, on account of its having its real nature to be the inner self, disappears (i.e. gets destroyed); and that it has disappeared is also (understood/known) through experience (of everyone). [295]

¹This refers to the effects of ignorance.

यत एवमतो वस्तु मुक्तमेव विमुच्यते ।
कठवल्लीषु चाप्युक्तं विमुक्तश्च विमुच्यते ॥२९६॥

Since this is so, therefore the (real) thing which is already free (from everything else) is said to be freed from it; in the sections of the *Kāthopaniṣad* also it is said; *vimuktaś ca vimucyate*.¹ [296]

¹*Kāthopaniṣad* 5.5.1.

इहापि सपरीवारं श्रुतिन्यायोपपत्तिमत् ।
श्रुतिस्तदेव चाचष्टे वस्तु ब्रह्मैव सन्निति ॥२९७॥

Here, in this context also, it is reasonable to understand from the example of the Śruti (that there is the release of the (real) thing, viz. the inner self) together with it accompanying (world of objects); for the Śruti has said just about that, viz. the

(real) thing in the words: *brahmaiva san*¹

[297]

¹*brahmaiva san brahmāpyeti* (BU 4.4.6).

There follows in verses 298-303 the conclusion of the Upaniṣadic statement *brahma vā idam*

ब्रह्म वा इदमित्येवं सूत्रितं वस्तु यत्पुरा ।
स्पष्टं व्याख्याय तच्छ्रुत्या ह्युपसंहियतेऽधुना ॥२९८॥

That (real) thing, which was earlier stated in a brief statement: *brahma vā idam*,¹ has been thus explained by the Śruti clearly thus and then it is now concluded.

[298]

¹This refers to BU 1.4.10-11 and 1.6.1 and in passing *brahma te bravāṇi ...* (BU 2.1.1).

योऽयं संसारभूमिष्ठो व्याख्यातोऽज्ञाततत्त्वकः ।
कार्यकारणरूपोऽयं मोहवृत्तानुरोधतः ॥२९९॥

This one (individual self), who is in the state of transmigration and has the nature of the Ātman not known (to it), is (so far) explained as the one having the form of effects and causes, in accordance with the procedure (or, modifications) of ignorance.

[299]

यतो ब्रह्मैव सन्नेष प्रथते मोहतोऽन्यथा ।
ब्रह्मैवैतीह सन्ब्रह्म तस्मान्मोहनिराकृतौ ॥३००॥

Since, being the Brahman itself (though), it becomes known (in the transmigratory world as the individual self), owing to its ignorance, but (otherwise) it is only the Brahman, therefore it is here said to become the Brahman itself after (its) ignorance about that has been removed.

[300]

This is the purport of verses 297-299.

नान्यदज्ञानतोऽस्तित्वं द्वितीयस्यात्मनो यथा ।
निवृत्तिस्तद्वदेवास्य नावगत्यात्मनोऽपरा ॥३०१॥

As there is no existence of a second (apart) from the Ātman except one from ignorance (about it), therefore, the return (of it) from worldly existence (i.e. becoming one with the Ātman) is (also) not different from (merely) knowing (about itself as being) one with the Ātman. [301]

यस्मादेतत्स्वतो बुद्धं स्वतः शुद्धमतोऽद्वयम् ।
प्रमात्रादेस्तदज्ञाननिवृत्तौ विनिवृत्तितः ॥३०२॥

Since this one (i.e. the Ātman) is, by its nature what is known (i.e. knowledge), by its own nature (only) pure, therefore it is without a second, and that (becomes known) after the ignorance about it as knower etc. has been destroyed, there is discontinuation of the individual self (apart from the Ātman). [302]

मुक्तं चातः स्वतस्तत्त्वं मुक्तमित्युपचर्यते ।
तदविद्यादिविध्वंसात्रिर्वः शपथयाम्यहम् ॥३०३॥

For this reason, the true thing, though, by its own nature, free, is stated metaphorically as being released, and that on account of destruction of ignorance about it—this do I state to you on oath three times. [303]

Verses 304-307 state that the knower of the Brahman does not have to perform any activity.

योऽक्रियाकारकं साक्षादक्रियाकारकात्मकः ।
आत्मानमात्मनैवात्मा साक्षाद्वेत्ति सुषुप्तवत् ॥३०४॥
निरस्ताशेषसंभेदं दृष्टिमात्रं निरञ्जनम् ।
वितमस्कं स आत्मज्ञस्ततोऽन्ये मूढचेतसः ॥३०५॥

That person is the knower of the self, who directly experiences himself by himself¹ as one not (being related to) any activity or its means, not of the nature of either action or its means to be like the one who is in deep sleep, i.e. merely the untainted seer with all distinct objects for him disappearing and who is thus free from ignorance; and others are of dull intellect. [304-305]

¹It means not through help of any other person.

न तस्य जीवतः कश्चिद्विशेषोऽस्ति मृतस्य वा ।
यतः सर्वविशेषाणामविद्यैवास्ति कारणम् ॥३०६॥

There is not any difference in him when he is alive or when he is dead; since the cause of all the differences is merely ignorance. [306]

अविचारितसंसिद्धिप्रत्यङ्मोहादिलक्षण-
व्यवधानमात्राभावेन ब्रह्माप्येतीति शब्दघटे ॥३०७॥

The statement *brahmāpyeti* is made with a view to referring to only the absence of any hindrance characterized by ignorance about the individual self etc., which is (already) established ever without any (deliberate) consideration. [307]

Verses 308-312 affirm that liberation is not effected by any activity.

इतोऽन्यथा चेन्मोक्षः स्यादारम्भोऽनर्थकः श्रुतेः ।
मुक्तेश्च कर्महेतुत्वादनित्यत्वं प्रसज्यते ॥३०८॥

If liberation were otherwise (in nature), then the activity¹ of the Śruti would be meaningless; and liberation would then be understood as having action as its cause (and then) would be non-eternal.² [308]

¹This refers to the Śruti statement enjoining it.

²This is based on the accepted doctrine: whatever is produced by action perishes.

एष नित्यो महिमेति श्रुतिवाक्यं विहन्यते ।
स्वाभाविकात्स्वभावाच्च नित्यो नान्योऽस्ति कश्चन ॥३०९॥

And, the statement in the Śruti *eṣa nityo mahimā*¹ would then be contradicted and (further) the nature and the natural property of the Ātman (also would be opposed); also, there is not any thing else (than that as) eternal.² [309]

¹BU 4.4.23.

²This refers to *ato 'nyad ārtam*.

आत्मस्वभावो मोक्षश्चेद्वियच्छिद्रत्ववत्सदा ।
अग्न्युष्णवच्चाशक्योऽतः कर्मोत्थ इति भाषितुम् ॥३१०॥

If liberation is (thus) ever the (very) nature of the Ātman like a hole in the sky (which is not, or cannot be, ever there), then it would be impossible to state that it (i.e. liberation) has arisen from any action like heat in fire.¹ [310]

¹One can never make a hole in the sky and also one cannot be said to produce heat in fire, since not having a hole and having heat in the case of the two respectively is merely natural. This supports the argument in the preceding verse.

ज्वलनव्यापृतेरग्नेः प्रकाशौष्ण्यादि चेत्फलम् ।
नोपलब्ध्यन्तरायार्थध्वंसाभिव्यक्त्यपेक्षतः ॥३११॥

If it is held that light, heat etc. of fire were the result of the burning activity of fire, (then we should be required to say that) it is not so, because they depend only on the revelation of (that fire) on (or, after) the destruction of the obstacle for finding it. [311]

ज्वलनव्यापृतेर्वहेः प्रकाशौण्यादिजन्मनः ।
न त्वग्न्यपेक्षयौण्यादेरभिव्यक्तस्वभावतः ॥३१२॥

(This is so) as light, heat etc. are (held to be) produced from fire, which has burning as its activity, but (*tu*) heat etc. have the nature of being revealed (together with fire) and, therefore, (they are) not dependent on fire (i.e. its activity of burning).

[312]

Verses 313-316 state that the Ātman is, by nature, luminous and does not thus expect any revealer (of itself).

नाभिव्यञ्जकसंसाध्या घटादेरिव चात्मनः ।
अभिव्यक्तिः स्वतोभास्वद्वोधमात्रैकरूपतः ॥३१३॥

Also, the revelation of the Ātman is not to be obtained like a pitcher¹ through (the help of) any manifestor, because it is of only one form, that is bright knowledge by its own nature.

[313]

¹It becomes visible to the eye through the light of a lamp; it cannot reveal itself.

अग्नेरन्यस्य पुंसोऽग्निज्वलनादिनिमित्ततः ।
उष्णप्रकाशयोर्व्यक्त्यवधानस्य संभवात् ॥३१४॥

And the hindrance is possible in the case of (the appearance of) heat and light of fire, for it (*viz.* the fire) is revealed through (some) incidental activity of a person enkindling it.

[314]

अप्यभिव्यक्तिरूपेऽस्मिन्मोक्षे नैवास्ति कार्यता ।
प्रदीपादेरभिव्यक्त्यं नैव कार्यं घटादिकम् ॥३१५॥

Further, even though liberation (of an individual self) is of

a sort of revelation (of the Ātman itself), it is not of the nature of an effect; it is indeed not like a pitcher etc., an effect to be manifested through (the help of) a lamp etc.

[315]

अभिव्यक्तिश्च नैवास्ति सौण्ययाद्यात्मकवस्तुनः ।
तदन्तरायासद्भावाद्वास्तवी न तु मोहजा ॥३१६॥

And there is not at all any manifestation of the thing, fire which has the nature of being possessed of heat etc.; because there is really no existence (of any) hindrance to it (i.e. its manifestation), it is a matter of fact (in worldly sense), being not a product of ignorance.

[316]

ज्वालानुग्रहतो वह्नेस्तत्प्रकाशादिदर्शनात् ।
भ्रमोऽयमग्निव्यापारादुष्णादेर्जन्मकल्पना ॥३१७॥

This notion of the production of heat etc. as resulting from the activity of fire is false cognition (or error), because light etc. of fire become seen (only) through the help (lit. favour) of the flames of fire.

[317]

न चेदग्नेः प्रकाशादिस्वभावोऽभ्युपगम्यते ।
यत्स्यात्स्वाभाविकं यस्य तदुदाहरणं भवेत् ॥३१८॥

If one did not accept light etc. to be the nature of fire, then there would be (adduced by us) as an example which would be a natural property of a thing.

[318]

The first line of the verse opens the discussion whether a thing can have its natural property and in the second line it makes a point that there can be some natural property of a thing as it is understood in light and heat as natural property of fire. But, if for argument's sake, one did not regard them as natural properties, then Vedāntin would like to point out such natural property of fire as can be suitable example for

liberation as natural to the Ātman. The next verse refers to the non-existence of such a property in a thing.

न च स्वाभाविको धर्मः कस्यचिन्नास्ति वस्तुनः ।
स्वयं तु भवतो यस्माद्वस्तुनोऽन्येन संगतिः ॥३१९॥

It is not that a thing does not have a natural property of its own, for it is only thereby that it is connected with another thing while it is in existence in reality. [319]

निगडध्वंसवन्नापि पुंसो मोक्ष इहात्मनः ।
निवृत्तिमात्रं बन्धस्य कथंचिदुपपद्यते ॥३२०॥

Moreover, here (i.e. in Vedānta), liberation of the individual self is not like the destruction of fetters of someone (bound), i.e. consisting in mere removal of bondage—that cannot stand to reason in any way. [320]

एकमेवाद्वितीयं सद्द्वितीयं तदबोधतः ।
न च बद्धस्ततोऽन्योऽस्ति यस्य नश्यति बन्धनम् ॥३२१॥

And that, existent (the Ātman, here, the individual self) is not (really) fettered because that one single self, which is without a second, is taken to be having some second owing to the ignorance about it(self),¹ therefore, that whose fetter is destroyed (lit. perishes) is a thing other than that (Ātman). [321]

¹CU 6.2.1.

प्रतीचो व्यतिरेकेण तथैवाव्यतिरेकतः ।
वस्त्वन्तरस्य सद्भावमभावं च प्रयत्नतः ॥३२२॥
निराकार्षं सुयुक्त्युक्त्या मोक्षोऽतोऽज्ञाननिहनुतिः ।
सर्पाद्यभाववद्रज्जुमोहमात्रनिवृत्तितः ॥३२३॥

I have (already) refuted with a detailed thought (*prayatnataḥ*);¹

with good and plausible reasons that there does not exist any positive and negative entity apart from individual self: not also as not apart from it; this, therefore, liberation is (merely) the removal (lit. concealment) of the absence of knowledge—it results from the mere removal of ignorance as in the case of a rope which is (actually) not accompanied by a serpent etc.² [322-323]

This verse is based on BU 1.4.7

¹SP explains this by the word *vicāraparinispīdanam*.

²Other examples of *adhyāsa* and basis for the same are implied by this word.

Verses 324-329 refer to a view on mokṣa (most probably of the Kashmirian thinker Bhāsarvajña or some of his predecessors) together with some codakas 'questioners' doubts' and verses 330-336 give the refutation of the same.

ये तु व्याचक्षते मोक्षे नित्यानन्दैकगोचरा ।
ज्ञानाभिव्यक्तिरित्येवं स्वसिद्धान्तसमाश्रयात् ॥३२४॥
तैरभिव्यक्तिशब्दार्थो वक्तव्यः कीदृशिष्यते ।

(Those) who state, by resorting to their own view,¹ that, in the state of liberation, there is manifestation/revelation of knowledge, which has only one object (for it), viz. eternal bliss, [324]

have to explain as to what sort of meaning is understood of the word *abhiv्यakti* 'manifestation'.² [325ab]

It is mentioned by the MRI edition that there is here a reference to the view of Bhāsarvajña (who could have belonged to the ninth century). It is not certain whether he was a predecessor or contemporary of Sureśvara. The view under reference should better be understood as a view of some Vaiśeṣika who held a view similar to that of Bhāsarvajña, which

can be summarised in his words thus: (*tat*) *siddham nityasaṃvedyamānena sukhena viśiṣṭāntikī duḥkhanivṛtīḥ puruṣasya mokṣa (iti)*; (quoted from *Nyāyasāra* of Bhāsarvajña, ed. with translation and notes in Marathi by Raḍḍiśāstri, Pune, 1922, p. 167).

¹This suggests that the view under reference does not have any authoritative basis, viz. the Śruti or good reasoning.

²This indicates the fact that the meaning of *abhivyakti* 'manifestation' cannot be production (*utpatti*).

प्रसिद्ध एव चेदर्थो विज्ञानालम्बनाप्तिता ॥३२५॥

विज्ञानालम्बनप्राप्तिः किं सतो वाथवासतः ।

अभिव्यक्तिः सतश्चेत्स्याद्यस्य मुक्तस्य तत्सुखम् ॥३२६॥

स्वरूपमेव तस्येति विशेषणमनर्थकम् ।

If the meaning (of that word) is just which is well-known, viz. getting to know (lit. obtaining) it by some specific means of knowing (*viññānālabhāna*), [325cd]

(the question arises:) 'Is that getting to know (lit. obtaining) by some specific means of knowing manifestation/revelation through (or, by) some existent or non-existent (means)?' If it is held to be through (or, by) some existent (means), then that happiness, which would come to/for the liberated being [326]

(is) the very nature of it (and, therefore) the specification *tasya* (to/for it) would be redundant (lit. meaningless).¹ [327ab]

¹Cp. *Nyāyasāra* (*ibid.*, p. 162): *sukhasaṃvedanayor nityatvān muktasaṃsāriṇo 'viśeṣaprasaṅga iti cen na ..., duḥkhādeḥ saṃsārāvasthāyāṃ sambhavāt tannāśe ca muktāvasthāyāṃ bhavati sukhasaṃvedanayor (saṃvedana=jñāna) sambandha ity ato nāviśeṣaḥ*.

मुक्तौ तद्व्यज्यते ज्ञानं सुखं चेति यदीरितम् ॥३२७॥

स्वात्मभूतं हि यद्यस्य नैव तद्व्यवधीयते ।

आत्मनस्तत्स्वभावत्वात्सर्वदेति विनिश्चयः ॥३२८॥

अमुक्तावथवा मुक्तौ विशेषोऽस्ति न कश्चन ।

And as to what has been stated: 'There, it is in liberation that there become manifest (or, revealed) knowledge and happiness,'¹ [327cd]

indeed (*hi*), that² which has been one's own nature cannot be obscured, because the Ātman has always that (i.e. bliss) as (part of) its own nature; this is the decision.³ [328]

There is not any difference whatsoever whether or not it is the state of liberation. [329ab]

¹This argument implies the non-existence of any means of knowing manifestation, if it were accepted as known (*prasiddha*).

²This refers to the thing to which that knowledge and happiness belong.

³That is, knowledge and happiness cannot ever be obscured in the case of the Ātman, for it has both of them as a part of its nature.

प्रत्यगात्मस्वभावत्वात्सुखविज्ञानयोरतः ॥३२९॥

मुक्तौ तद्व्यज्यत इति विशेषवचनं मृषा ।

स्वसिद्धान्तविरोधोऽपि तदभिव्यक्तिवादिनः ॥३३०॥

सत्कार्यवादिनो यस्मादभिव्यक्तः प्रशस्यते ।

व्यज्यते सर्वमेवेदं सत्त्वात्सर्वस्य वस्तुनः ॥३३१॥

Therefore, happiness and knowledge being the nature of the inner self, [329cd]

the statement of the specification that 'it becomes manifested (or, revealed) in liberation', is false. Further, there would occur self-contradiction in the doctrine of the one who postulates the manifestation of the same; since it is proposed (lit. praised) by one, i.e. the holder of the view that the effect is (but what has been) already existent, and from that there is manifestation/revelation,¹ [330-331ab]

(that is to say:) all this world is (but) manifested/revealed from the (real) thing, because of its (continuous) existence

(for ever).

[331cd]

This refers to the manifestation of happiness and knowledge (*sukha-vijñāna*).

This refers to the acceptance of *satkāryavāda* by the thinker under reference, and, if he were to be taken to hold *asatkāryavāda* (or *ārambhavāda*), there is here an argument against that opinion which is stated in the following verse.

¹The refutation of the view under reference begins actually here.

आरम्भवादे त्विच्छादेः कार्यत्वादसदात्मता ।
असत्तत्त्वाप्यभिव्यक्तिर्न युक्ता खरशृङ्गवत् ॥३३२॥

In the view regarding the beginning, the desire etc. are considered as having the nature of non-existence on account of (their) being the effect.¹ Now, it is argued that there could not be any modification/revealing of them as non-existing! This is like the horn of a *khara*!

[332]

¹This implies the existence of desire to create something and/but desire is said to be an effect of something else.

व्यङ्ग्यव्यञ्जकसंबन्धः प्रदीपघटयोरिव ।
उभयोः सिद्धयोर्योगान्नेष्टा कारणकार्यता ॥३३३॥

Because this relation of the manifestor and the manifested is taken to be of two already existent but different things, as of a lamp and a pitcher, therefore, it is not desirable to accept the relation of cause and effect between liberation and some cause of it.

[333]

This implies a twofold question: whether or not there is real manifestation of happiness and knowledge. In the next two verses, the two aspects of them are discussed severally.

सखविज्ञानयोश्चापि किमभेदोऽथवा भिदा ।
नैक्येऽभिव्यक्तिशब्दार्थः कदाचिदपि लभ्यते ॥३३४॥

Further, one has to ascertain if there is non-difference or difference between happiness and knowledge; if there is non-difference, there cannot ever be obtained any meaning (i.e. meaningfulness) of the word 'manifestation'. [334]

अथ भेदस्तयोरिष्टो व्यवधानं प्रसज्यते ।
तद्वेदाभेदतासिद्धौ न च मानमिहास्ति वः ॥३३५॥

If (on the contrary) it is accepted that there is difference between the two, then there would contingently follow (the existence of) what separates (or differentiates) the two. Thus, there is not, for you¹ any authoritative means of ascertaining if the two are different or non-different, in proving/holding them, here.² [335]

¹Sureśvara refers to the holder of the other view as present before him, as it were, and therefore directly addresses him.

²That is, in relation to this, either the Ātman or liberation.

भेदग्राहि न नो मानमितोऽन्यत्रापि विद्यते ।
मेयमात्रावसायित्वात्सर्वमानस्य सर्वदा ॥३३६॥

There does not exist for (all of) us, be it in this (context) or elsewhere, any means of knowing which grasps the difference (between happiness and knowledge), because all the authoritative means of knowing are ever to result into (knowing) merely the objects of their knowing.¹ [336]

¹A valid means by its nature secures the exact nature of the thing to be known, but since there is not here either difference or non-difference between happiness and knowledge as certain, that cannot be accepted by a valid means of knowledge.

In verses 337-348 there is a discussion on the nature of a valid means of knowing, as giving rise to distinct properties of the things to be known.

स्वमेयव्यतिरेकेण मेयान्तरसमाश्रयः ।

न व्यावृत्त्यनुवृत्त्यादिव्यापारोऽस्ति मितेः क्वचित् ॥३३७॥

There is not anywhere in any situation of knowing (*miti*) the function of distinguishing one object from another or showing one as similar (to another) which is related to an object of knowing and another which is apart from the object of its knowing.

[337]

अभिव्यक्तिः सुखस्यास्तु कामं ज्ञानेन संगतेः ।

ज्ञानव्यक्तौ तु किं मानं यतोऽभिव्यक्तिर्वागियम् ॥३३८॥

Granted that there is manifestation of happiness owing to its close (*-sam*) association with knowledge; but (the question) would be as to what can be the means for manifesting that knowledge, since there is the Śruti statement about the manifestation (*abhivvyakti*) (of happiness).

[338]

प्रमाणानां प्रमाणत्वं न स्वरूपप्रमेयता ।

न च मानान्तरादिष्टं तयोस्तुल्यस्वभावतः ॥३३९॥

Valid means of knowing have the nature of being valid only by referring to the objects of their knowing, in their own forms, and it is not accepted that some other means of similar nature can reveal the difference between their objects of knowing.

[339]

अभिव्यक्तिर्मताथापि कादाचित्की न सर्वदा ।

तदन्तरायसद्भावादव्यक्तिः स्यात्सदा ध्रुवम् ॥३४०॥

If again manifestation (of happiness and knowledge) is held

to be occasional (at some time) and not on all times, then there would always be certain non-manifestation (of the object of knowing) on account of the existence of some obstruction to it. [340]

अन्तरायनिवृत्तौ च व्यपेक्षा वः प्रसज्यते ।
साधनान्तरविषया तज्ज्ञानव्यतिरेकतः ॥३४१॥

And, further, with reference to the removal of that obstruction, there would be necessary for you to expect yet another means as apart from the knowledge of the same. [341]

उपलब्ध्येकनीडत्वे व्यवधानस्य कल्पना ।
न चोपपद्यते मानात्तयोरेकात्मकत्वतः ॥३४२॥

Moreover, this notion of the existence of some obstruction does not stand to reason, if there is accepted oneness of cognizing the two (i.e. happiness and knowledge) together, because each of them has the nature of being a means of knowing but one object. [342]

एवं च सत्यभिव्यक्तिः सर्वदा सुखबोधयोः ।
अभिव्यक्तिर्न चेदेवं नाभिव्यक्तिः सदा तदा ॥३४३॥

This being so, there would ever be manifestation of happiness and knowledge (together); if manifestation were not like this (i.e. not occurring simultaneously with knowledge) then there is never any manifestation. [343]

इतोऽन्यथा कल्पनायां न प्रमाणं समीक्ष्यते ॥३४४॥
नाप्येकाश्रयिणां लोके धर्माणां क्वचिदीक्ष्यते ।
मानमेयत्वसंबन्धो मिथोयोग्यत्वतस्तथा ॥३४५॥

For holding a notion other than this, there is not seen any other valid means of knowing (the same), [344]
for there is not seen anywhere, in this world, in the case

of properties which have but one support/basis as that between a means of knowing and its object so as to be suitable to one another. [345]

सुखादिव्यक्तितः पूर्वं यस्य संसारिता मता ।
सौन्दर्य एव सदाव्यक्तनित्यज्ञानसुखात्मनः ।
शीतोष्णयोरिव तयोर्वैलक्षण्यात्परस्परम् ॥३४६॥

The one, in respect of whom it is held (by you, my opponents) the nature of a transmigratory being before there appeared (in that one) happiness etc.¹ It is certainly quite different (from the Ātman), which is of the nature of eternal knowledge and happiness and is ever unmanifest; (this is so) on account of their mutual difference in characteristics as in the case of what is cool and what is hot. [346]

¹This refers to knowledge.

परात्मभेदकलृप्तौ च संत्यागो वः प्रसज्यते ।
यतो वैदिकपक्षस्य नातः कल्प्यात्मनो भिदा ॥३४७॥

And there occurs a contingency (in your opinion) of abandoning (Vedic authority), when (you accept) distinction between the highest Ātman and individual self, since any such differentiation/difference cannot ever be considered in the doctrine of one who follows the Vedic¹ text. [347]

¹This refers to Vedāntic texts. Refer to *Śvetāśvataropaniṣad* 6.11: *eko devaḥ sarvabhūteṣu ...*; CU 6.2.1: *ekam evādvitīyam*

आत्मधीमानमात्रत्वात्प्रत्यगात्मैकवस्तुनः ।
प्रमाणासंभवश्च स्यादात्मभेदप्रकल्पने ॥३४८॥

In respect of the acceptance of the two the Ātman¹ and the individual self as different (which you postulate), there

is impossibility of any valid means of (so) knowing only one reality, i.e. the self as dependent only on the knowledge of the Ātman as the means of knowing it. [348]

¹This refers to the highest Ātman and the individual self.

Verses 349-358 state that, in the view of the Vedānta, there is no differentiation in the case of the Ātman, because that is (so-called) bondage and (the state of) liberation.

नन्विदानीं यथा तद्वन्मुक्तौ चेदविशेषता ।
नातियत्नो भवेन्नृणां शास्त्रवैयर्थ्यमेव च ॥३४९॥

(An objection is raised:) 'Indeed, as (argued by you) there does not exist any non-difference (in the Ātman) in the state of liberation and in the way (you have stated), but then there would not be on the part of men a great effort¹ (to get to know the nature of the Ātman) and there will only be meaninglessness/futility of the scripture'.² [349]

¹Sureśvara uses this word in the sense of effort to acquire the *śamadamādisādhanasampat*. (SP explained *śāstrīyaśamādir atiyatnaḥ*.)

²This refers to *mokṣaśāstra*.

नात्माविद्याहानमात्रकारित्वादागमात्मनः ।
तदर्थं यत्नसाफल्यं शास्त्रारम्भोऽपि चार्थवान् ॥३५०॥

(The answer is given:) 'This is not so, because usefulness of the scripture is in that it is for liberation, for bringing about the destruction of ignorance about the Ātman, and thus the activity of (*mokṣa*)*śāstra* is meaningful'.¹ [350]

¹SP supports the argument of this verse by citing Bharṭṛ-prapañca: *yathāhuḥ— avidyākālpitābhedanivṛttiparatvāc chāstrasya (iti)*.

मुक्तामक्तत्वरूपोऽयं न विशेषोऽस्ति वस्तुनि ।
तदविद्यैव निःशेषविशेषाणां प्रसूतिकृत् ॥३५१॥

There does not exist in the (real) thing this difference of what is liberated and what is non-liberated; therefore, only ignorance is the cause (lit. origination) of the entire differences (in respect of products etc.). [351]

अशेषानर्थहेतुं तामविद्यां शास्त्रजा मतिः ।
यतो निहन्ति तेन स्यात्साफल्यं यत्नशास्त्रयोः ॥३५२॥

Since knowledge which results from the study of (*mokṣa*)śāstra destroys fully that ignorance which is the cause of all the undesired effects; therefore, there would be meaningfulness/usefulness of *yatna* and *mokṣaśāstra*. [352]

अथाविद्यावतोऽविद्याहान्यहानिकृतो भवेत् ।
विशेष आत्मनः कश्चिदिति चेन्नैवमिष्यते ॥३५३॥
अविद्यामात्रहेतुत्थगोचरत्वसमाश्रयात् ।
रज्जुखण्डाद्यविद्योत्थसर्पादिविनिवृत्तिवत् ॥३५४॥

(An objection:) 'Now, if one were to say: there does occur some difference in respect of the Ātman which is effected by ignorance that is caused by the destruction and non-destruction of ignorance'; then (the answer is given:) 'No, it is not so accepted, [353]
because this is based on objects which have originated only from ignorance—this would be like the removal (of the knowledge) of a serpent etc. which has arisen from the ignorance about a piece of a rope etc.'¹ [354]

¹We have followed the reading of AnSS edition *rajjukhaṇḍādya* ... and ignored the variant reading *rajjūṣarādya* Yet it appears that the variant might have been intended here in view of the use of *ādi* in the word *-sarpādi*. However, looking to Sureśvara's

casual (or indifferent) use of *ādi* in a number of verses, we have ignored that better looking variant. NKL (ms.) does not show any indication of the v.l.

आत्मनो मोहकर्तृत्वमकर्तृत्वं यदीष्यते ।
विशेष इति नैवं स्याद्व्यायतीवेति वारणात् ॥३५५॥

(An objection is raised:) 'If it is held that the individual self is the agent of creating ignorance and the absence of it (i.e. both) and the difference in it'; (the answer is:) 'It is not so, because there is warding away of it in the (Śruti) statement *dhyāyatīva*'.¹ [355]

¹BU 4.3.7.

अजो न जायते नेति ध्यायतीवेति चागमैः ।
निषेधः क्रियतेऽशेषविकारादेरिहात्मनः ॥३५६॥

Further, there is the rejection of every modification here¹ in respect of the Ātman (as) by the traditional texts of the non-born (Ātman) in *na jāyate*,² *neti*³ and *dhyāyatīva*.⁴ [356]

¹This means: in respect of *mokṣasāstra*.

²*Kāthopaniṣad* 2.1.18.

³BU 3.9.26, 4.3.3, 4.4.22 and 4.5.15.

⁴BU 4.3.7.

विषयत्वोपपत्तेश्च प्रत्यङ्मोहतदुत्थयोः ।
नाविद्यावान्भवेदात्मा नापि तत्कार्यवांस्ततः ॥३५७॥

Moreover, because ignorance about the inner self and what arises from it are known by reason to be the object(s) (of some knowing), the Ātman would not be affected by ignorance, nor can it be possessed of the effect(s) of the same. [357]

While translating this verse, we have ignored the note of AnSS

editor regarding variant reading *-kāryavānataḥ*. NKL (ms.) does not give any indication of that v.l.

ग्राहकग्रहणग्राह्यभावाभावप्रसिद्धता ।
यथात्मसाक्षिका तद्वन्न वेद्मीत्यात्मसाक्षिकम् ॥३५८॥

As it is known that the distinction of what grasps, the act of grasping and the object of grasping, these objects, positive and/or negative entities, is witnessed/known by the Ātman; so also the cognition 'I do not know' has the Ātman as its witness/knower. [358]

Verses 359-381 state that ignorance does not have a support in the Ātman.

अज्ञातत्वान्यथाज्ञातसिद्धेरात्मैकसाक्षितः ।
अज्ञानमन्यथाज्ञानमतो नास्त्यात्मसाक्षिणः ॥३५९॥

Since being unknown or being known otherwise becomes established only on account of the witness, the Ātman; therefore, ignorance or wrong knowledge (lit. knowledge other than what the thing is) cannot exist there wherein there is the Ātman as the witness. [359]

न हि यो यत्र साक्षीह स तत्राज्ञ इतीर्यते ।
असामान्येन तत्सिद्धेः साक्षिसाक्ष्यपदार्थयोः ॥३६०॥

Here (in the worldly dealings) the one, who is the witness in respect of something, is not called ignorant in respect of that (thing); because the meanings of the two words *sākṣin* and *sākṣya* become established as not belonging to one thing in common. [360]

तस्मिन्साक्षी च मृदश्चेत्यतीवैतद्विरुध्यते ।
मिथो वाक्यमतो नैदृग्वक्तव्यं मानिना ततः ॥३६१॥
न जाने मुग्ध एवाहं भवदुक्तं मनागपि ।

इति चेद्वीक्षसे तर्हि मूढमज्ञं च कुम्भवत् ॥३६२॥

(Therefore) a witness in respect of that thing is also the one deluded in respect of that same thing—this statement is altogether (*atīva*) self-contradictory; such a sentence as this should not be uttered (by you), holding (as valid) means of knowing, [361]

as in your statement, 'I do not know and I am deluded'; if you see thus, then (you see) yourself as both deluded and ignorant just as there would be an (ignorant) pitcher. [362]

त्वं त्वज्ञो मूढ एवेति भव कामं यथेच्छसि ।
मूढाज्ञयोस्तु यः साक्षी नासौ मुग्धोऽज्ञ एव वा ॥३६३॥

Well, be you a deluded one or an ignorant person, as you have wished; but the one, who witnesses both the deluded and the ignorant one, is indeed neither deluded nor ignorant. [363]

This explains BUB *bhavatvajño* ... (BUB p.637)

लोकेऽपि यस्य यः साक्षी सम्यग्दर्श्येव तस्य सः ।
यथा लोके तथेहापि साक्षी सम्यक्प्रपश्यति ॥३६४॥

In the world also, one who witnesses something is a person who well sees that thing; as this is so in the world, so also is it here:¹ the witness well sees (the object of its seeing). [364]

¹This refers to *mokṣasāstra*.

महाभूतादिधृत्यन्तं क्षेत्रमेवेति चाब्रवीत् ।
साक्षात्स्वयंभूर्वेदात्मा संसारानर्थशान्तये ॥३६५॥

Further, the self-born, the Ātman of the nature of the Veda himself has said for the removal of the undesired (elements) in transmigratory existence: from the statement *mahābhuṭa* up

dhṛti being the field.¹

[365]

¹This refers to *Gītā* 13.5-6. Read SP on this verse with profit.

यथा प्रकाशयत्येकः कृत्स्नं लोकमिमं रविः ।
क्षेत्रं क्षेत्री तथा कृत्स्नं प्रकाशयति भारत ॥३६६॥

(So also there is a verse in agreement with this verse:) "As this sun alone illumines this entire world, so does the possessor of the entire field illumine the entire field, O son of Bharata".

[366]

This is *Gītā* 13.33 and referred to in 4.3.87ab, 291cd, 345ab, 1773cd.

ज्योतिषामपि तज्ज्योतिः स्वयंज्योतिःश्रुतेस्तथा ।
न तत्र सूर्यो भातीति नान्योऽतोऽस्तीति च श्रुतेः ॥३६७॥

So it is known from (what is said in) the Śruti in *jyotiṣām api taj jyotiḥ*,¹ *svayaṃ jyotiḥ*,² and also from *na tatra sūryo bhāti*,³ *nānyo 'to 'sti*.⁴

[367]

¹'It is the light of lights'; cp. BU 4.4.16.

²BU 4.3.9, 14: 'the light itself'.

³*Muṇḍakopaniṣad* 2.2.11; *Kāthopaniṣad* 5.15; *Śvetāśvataropaniṣad* 6.14: 'the sun does not shine there'.

⁴BU 3.7.23: 'therefore, there is no one (other)'.

यत एवमतो नास्ति विशेषोऽत्र मनागपि ।
बन्धमोक्षादिरूपोऽयमात्मनीति विनिश्चयः ॥३६८॥

Since this is so, therefore, there is not here in respect of the Ātman even a little difference which has the nature of bondage and liberation etc.¹—this is the decision.

[368]

¹Perhaps *sukhaduḥkha*, *punya-pāpa* are meant.

ये त्वतः कल्पयन्तीममन्यथैव महाधियः ।
अर्थवादं च बन्धादिशास्त्रं व्याचक्षते तथा ॥३६९॥

But those people of great intellect, who think of this Ātman to be otherwise, explain the scriptural text as referring to bondage etc. and as an Arthavāda¹ in that way. [369]

This refers to the other view as not based on the Śruti proper. Cf. also SP which refers to *Taittirīyopaniṣad* 2.7.

¹It is an explanatory statement praising the purport of a precept or an injunction.

इत्युक्तावंसकृत्पूर्वं परिहारोऽपि वर्णितः ॥३७०॥
एवं परिहृतेऽप्याहुर्यथेच्छं दषणं परे ।
विद्वद्भिस्त उपेक्ष्याः स्युर्बालौन्मत्तसमा जनाः ॥३७१॥

In respect of this statement (of theirs) there has been many times earlier presented a refutation. [370]

Yet, in respect of their refuted thought, the others have, at their (sweet) will, mentioned that there is the fault (in our view); but those are to be ignored by the wise; they are indeed like children or mad men. [371]

The second line of verse 371 is based on *ta utsahante khe 'pi* (BUB p.637).

Verses 372-544 are the exposition of BU 4.4.7.

ब्रह्माप्येतीत्यतो वाक्यमुपचारसमाश्रयात् ।
तदविद्योत्थदेहादिसंतत्युच्छेदहेतुतः ॥३७२॥

Therefore, (the Śruti) statement *brahmāpyeti* is to be understood by resorting to a metaphor, because there is a reason in the destruction of the continuity of the body etc. which arises from ignorance about that (the Brahman). [372]

अविद्याध्वस्तिमापेक्ष्य सम्यग्धीजन्ममात्रतः ।
आत्मा ब्रह्मैव सन्साक्षाद्ब्रह्माप्येतीति भण्यते ॥३७३॥

What is said here is: The Ātman, itself being the Brahman, is said to be going/entering into it, on account of the mere rise of proper understanding (about the nature of it), consequent to the destruction of ignorance. [373]

Hereafter follows the exposition of BU 4.4.7.

इत्येतत्सर्ववेदान्तसर्वस्वं ब्राह्मणोदितम् ।
अर्थस्य ब्राह्मणोक्तस्य द्रढिम्नेऽतः परा श्रुतिः ॥३७४॥

This is then, the whole of all the Vedānta texts, which is expressed in this Brāhmaṇa. Therefore, the subsequent Śruti statement is for confirming the thought that is conveyed by the Brāhmaṇa. [374]

This is to state the purport in general of the Śruti sentence *tad* ... (BU 4.4.7).

यथा काममये तद्वन्मन्त्रं श्लोकमुदाहरत् ।
ब्रह्मास्मीति परिज्ञानात्प्रत्यगज्ञानहानतः ॥३७५॥
यदा सर्वेऽखिलाः कामाः काम्यैश्च विषयैः सह ।
प्रमुच्यन्ते विनश्यन्ति तेषामज्ञानहेतुतः ।
कार्याणां कारणे वृत्तिर्नान्यत्र जगतीक्ष्यते ॥३७६॥

As (in the case of the Ātman), consisting in desire in a similar way, here also the Śruti has cited a Mantra *brahmāsmi*, because there is the removal of ignorance about the individual self by knowing that thoroughly. [375]

When all of the desires, together with their objects to be wished for, are abandoned, they perish, because they have ignorance (about the individual self) as their cause; it is noticed in this world that the effects exist (*vṛtti*) in their cause, not

elsewhere.

[376]

यदा कामाः प्रमुच्यन्त इत्युक्त्यैव कृतार्थता ।
विशेषणं सर्व इति किमर्थमभिधीयते ॥३७७॥

(An objection is raised:) 'When the purpose is served by the very statement, "when the desires are abandoned," then why is stated in addition the attributive (*viśeṣaṇa*) word *sarva* 'all'?'

[377]

जाग्रत्स्वप्नक्षये कामाः प्रमुच्यन्तेऽखिला नृणाम् ।
संस्कारमात्रशेषास्ते सुषुप्ते यान्ति संक्षयम् ।
यतस्तदवरोधार्थं तस्मात्सर्वविशेषणम् ॥३७८॥
कामहेतौ हि विध्वस्ते न कश्चिदवशिष्यते ।
संस्कारो वाथवाप्यन्यः सर्वस्याज्ञानमूलतः ॥३७९॥

(The answer is given:) 'Since, at the end of the states of waking and dream, all of the desires of human beings get abandoned; remaining in the form of impressions they get gradually exhausted in the state of deep sleep; therefore, the attributive word *sarva*, is used for precluding (lit. stopping) even that.

[378]

Indeed, when the cause of the desires is destroyed (or removed), there does not remain either an impression or even the other (i.e. desire itself) as all (of it)¹ has its root in ignorance'.

[379]

In the state of liberation, there do not exist even impressions of worldly desires.

¹This refers to desire.

हृदि श्रिता इति वचः कामधर्म्यब्रवीन्मनः ।
कामः संकल्प इत्येवं तथा च प्राक्श्रुतीरणम् ॥३८०॥

The statement in the Śruti *hṛdi śritāḥ* expresses the sense of *manas* which has desire as its property/characteristic; so

also, there is already the statement in the Śruti: *kāmāḥ saṅkalpāḥ*¹ [380]

¹BU 1.5.3

इदं च हेतुवचनं प्रतिज्ञातस्य वस्तुनः ।
हृदि श्रिता यतः कामाः प्रमुच्यन्तेऽखिलास्ततः ॥३८१॥

And the statement of the cause of the thing which is enunciated as *hṛdi śritāḥ* (is made) because all the desires are then¹ abandoned. [381]

In this context, read SP: *kāmāḥ pramucyanta iti pratijñāta-vastuno hṛdi śritā iti hetuvākyam ity anum eva vibhāgam prakathayati.*

¹It means attaining the state of liberation.

Verses 382-389 point out that *tattvajñāna* leads to the removal of ignorance which, in its turn, destroys desires etc.

अविद्याया यतः कार्यमध्यात्मादिविशेषणम् ।
त्रयं वा इदमित्युक्तं वाङ्मनःप्राणभेदवत् ॥३८२॥

It is mentioned as *trayam vā idam*, since the effect of ignorance which is about the distinct notions of *vāc*, *manas* and *prāṇa*,¹ and which are attributive in relation to what is related to the body etc.² [382]

¹Cf. BU 1.5.

²Actually BU 1.6.1 mentions *nāma*, *rūpa*, *karma* as the three.

अतोऽविद्यासमुच्छिन्नौ तद्वेतूनामशेषतः ।
कामानामपि नाशः स्याद्ग्रहातिग्रहरूपिणाम् ॥३८३॥

Therefore, when there is destruction of ignorance, there is entirely the destruction of all of the desires which are having

that (ignorance) as their cause, and which have the forms of *graha*¹ and *atigraha*.² [383]

¹This refers to the organs (lit. that which perceives).

²This refers to the objects of sense organs and invites *ādhibhautika*, *ādhidāivika* also; cf. SP: *trividham vāgādikam jagadāvidyam iti*.

निःशेषजनिमद्वेतुः काम एवावधारितः ।
श्रिता अतिग्रहाः कामा इन्द्रियाणां प्रवर्तकाः ।
हृदि श्रिता इति वचस्तेषामवरुरुत्सया ॥३८४॥

It is specifically pointed out (*avadhārita*) that desire is the cause of all of those that are born (and) desires, viz. *atigrahas*, which have resorted (to *grahas*) are the inciters/impellers of (various) bodily organs; and the reference to them is made in the words *hṛdi śritāḥ* with a desire to emphasise them.

[384]

Refer to BU 1.5.2: *dhiyā dhiyā janayate karmabhiḥ*.

वेदव्यासोऽपि च मुनिर्जगादेमं यथोदितम् ।
श्रुत्यर्थमुररीकृत्य लोकानुग्रहकाम्यया ॥३८५॥
विषया विनिवर्तन्ते निराहारस्य देहिनः ।
रसवर्जं रसोऽप्यस्य परं दृष्ट्वा निवर्तते ॥३८६॥
एवं बुद्धेः परं बुद्ध्वा संस्तभ्यात्मानमात्मना ।
जहि शत्रुं महाबाहो कामरूपं दुरासदम् ॥३८७॥

The sage Vedavyāsa also has spoken of this, as stated (here), as the meaning of the Śruti, after having accepted it with a desire to do favour to the people in general: [385]

"In the case of a person, who has abstained from food, the objects (of desire) keep themselves away (from him and yet) without hankering for them; but/and (that, viz. the hankering)

keeps itself away from him, after he has seen the highest Ātman." [386]

"Thus having known the one beyond the intellect and having steadied yourself¹ by yourself, kill, O (warrior) of large arms, (your) enemy, viz. the one who has the form of desire which is difficult to contain." [387]

Verse 386 is *Gītā* 2.59 and verse 387, *Gītā* 3.43.

¹This is addressed directly to Arjuna.

हेत्वर्थे चाथशब्दोऽयं हेत्वर्थप्रकृतत्वतः ।
यस्मादज्ञानतो मर्त्योऽतोऽमृतोऽज्ञानहानतः ॥३८८॥

Further, this word *atha* is to convey the reason, because it has been used in the sense of a reason of the matter in hand; (this is so), since (a human being) is mortal owing to his ignorance and he becomes immortal by abandoning (or the destruction of) ignorance. [388]

This verse explains the meaning of the second line in the Mantra quoted in the Śruti; cf. verse 384.

प्रत्यग्याथात्म्यविज्ञानं यदत्रेत्यभिधीयते ।
सम्यग्ज्ञानसमुत्पत्तावत्रैव ब्रह्म सोऽश्नुते ॥३८९॥

In the words *yad atra*, there is reference made to the specific knowledge of the true nature of the inner self; and when that proper knowledge has arisen, that individual being attains the Brahman in this very (inner self). [389]

The verse explains the meaning of the word *atra*.

Verses 390-412 speak regarding the knowledge about the nature of the Ātman, in its own right, which is the means to the end of bondage in the case of the individual self. However verses 391-412 present the view of *Bhakti-prapaṇca* on the Mantra cited

in the Śruti.

ब्रह्मज्ञानोदये यस्माज्जन्मबन्धो व्यपेयते ।
मृतिरात्ममतिस्तस्य हेतुहेतूपमर्दनात् ॥३९०॥

Since, at the rise of the knowledge of Brahman, the bondage of being born (in the case of an individual) ceases to continue (lit. goes away); therefore, the death of that individual consists in its having the knowledge of the Ātman: that is, by the destruction of the cause of the cause.¹ [390]

¹This refers to the cause, i.e. ignorance of the desire which, in its turn, is the cause of the cycle of birth(s).

यथोक्तादन्यथैवेमं व्याख्यानाद्यत्नतो बुधाः ।
श्लोकं व्याचक्षतेऽयुक्त्या हुतभुग्वरसंश्रयात् ॥३९१॥

The wise ones, (however,) explain this Mantra easily in an unreasonable way (*ayuktyā*) which is other than what is stated as an explanation (of it) before; this, (he does) by taking recourse to the boon of fire. [391]

Sureśvara scoffs at Bhartṛprapañca by referring to him in this verse in the plural, with the sense of mockery, and refers to the alleged boon of fire received by him.

यथैव पूर्वं संसारः काममूलोऽनुवर्णितः ।
श्लोकेन तद्वन्मोक्षोऽपि निष्कामस्योपवर्ण्यते ॥३९२॥

As, in the earlier portion, it is described that the transmigratory existence is rooted in desire, so also, in this Mantra, it is stated that there is liberation for (a transmigratory being) who is without desire. [392]

SP cites *uktam ca— yathā pūrvasmin kāmair bandha iti ślokenodbhāvitam evam evehāpi nişkāmo 'pi mucyata iti*

ślokenodvibhāvayaṣatīti.

प्राज्ञादात्मन एतस्मात्प्रमुच्यन्तेऽखिला यदा ।
कामास्ते कतम इति तद्विशेषणमुच्यते ॥३९३॥
हृदि येऽस्य श्रिताः कामाः प्रमुच्यन्ते त एव तु ।
आत्माश्रितास्तु ये त्वस्य प्रमुच्यन्ते न ते सदा ॥३९४॥

When it is said that all (of desires) become abandoned in the case of this individual self, who is now possessed of excellent knowledge (*prājñā*);¹ then (the question is asked:) 'Which are those desires?' and then (in answer) it is stated as attributes of them, [393]

'those desires which have taken their abode in the heart'—it is these that are abandoned; whereas those desires, which have resorted to the self, do not ever get abandoned. [394]

Verse 394 refers to the intellect, while the Ātman has also desires associated with it, in contrast with those resorting to the intellect.

¹This refers to the grammatical explanation of it, viz. *prājñāḥ eva prājñāḥ*.

हृदयं नाम विज्ञानं मांसपेशी च भण्यते ।
रूढ्या वृत्तिर्मांसखण्डे तात्स्थ्याद्विज्ञानवाचकम् ॥३९५॥

'Heart' is called the organ of (acquiring) knowledge, (though, in reality) it is a lump of flesh; yet, by usage, the meaning (of that word is restricted) to a lump of flesh; it is expressive of specific knowledge, because that gets an abode in it (*tātsthya*). [395]

कामाः पुनरिहोच्यन्ते य उक्ता वासनात्मकाः ।
माहारजनमित्यादिवाक्येनात्मविशुद्धये ॥३९६॥

And, here,¹ desires which are (earlier) explained and have the nature of impressions are meant in the sentence, which

begins with the word *māhārajanam*;² this is for clarifying (the meaning of) the Ātman. [396]

¹This refers to BU 4.4.7.

²BU 2.3.6. SP quotes: *yathāhuḥ— kāmāḥ punar māhārajanādirūpā iti*.

प्राज्ञस्याभ्यन्तरं रूपं तन्माहारजनादिकम् ।
हृदयाश्रयिणस्ते तु बाह्याः स्युर्बाह्यसंश्रयात् ॥३९७॥

The inner form of a person of excellent knowledge is expressed (in the words) beginning with *māhārajana*¹ (the usually known desires) and they have their abode in the heart, while they are external, since they are related to external (object(s)). [397]

This verse explains the forms of desires which are mentioned as impressions.

It seems that Bhartṛprapañca divides the desires, inside the human body, into two classes: (i) desires which resorted to the lump of flesh called heart; they are in contrast with (ii) those desires which resort to the Ātman. The former are described here by the word *bāhya*.

¹SP cites: *tad uktam— tad ye māhārajanādilakṣaṇāḥ kāmaviśeṣāḥ te bāhye hr̥daye śritā iti*.

हृदयाश्रयिकामेभ्य आत्मसंश्रयिणां यतः ।
प्रसूतिरिह कामानामतोऽनेकसमाश्रयात् ॥३९८॥
हृदयाश्रयणं तेषां विशेषणमिहोच्यते ।
आत्माश्रयाणां कामानां विनिवृत्तिः फलं हि तत् ॥३९९॥

Since, in the case of those desires which resort to the Ātman, their origin is in the desires which have their abode in the heart, therefore here (i.e. in the individual self) there is one attributive explanation used of them in 'resorting to the heart' on account of their relation to many objects; but, in the case of those desires which resort to the Ātman, the result is their

cessation.

[398-399]

SP quotes: *yathāhuh- tato hi teṣām prasūtir bhavatīti.*

The Ātman here refers to Jīva, i.e. one having transmigratory nature; so is the case with verses 404 and 406.

मनोद्वारोपसंक्रान्ता भावना यात्मनि स्थिता ।
देहिनो जन्मबीजं सा तदुच्छेदाद्विमुच्यते ॥४००॥

That impression, which has entered through the doorway of *manas* and has (at the end) resorted to the Ātman, is the seed of the embodied self's being born again; and when that (impression) is destroyed one attains liberation. [400]

बीजस्थस्याङ्कुरस्येह जन्माश्रित्य यथैव गाम् ।
आश्रयादेव जन्मैवं कामानां हृदयाश्रयात् ॥४०१॥

As here (i.e. in this world) there is the appearance/birth of a sprout, which was already residing in the seed, (only) after resorting to the earth, similarly there is the rise/birth of the desires (only) from having a resort (inside the transmigratory body) through their resorting to the heart. [401]

SP invites attention to another explanation of the word *āśrayāt* as *hrdayāśrayāt*; also it cites: *uktaṃ hi- yathā bījagatasyāṅkurasya pṛthivīm āśritya prasūtir evaṃ prājñāśritānām hrdayaṃ yonir iti.*

हृदयेन च संबन्धाद्दृश्यन्ते येन तेऽखिलाः ।
अतो विशेषकार्येण विशेष्यन्ते हृदैव ते ॥४०२॥

Since all of them are perceived/understood on account of their connection with the heart, they are thus distinguished by the distinguishing effect (of *kāma-vyakti*), viz. the heart. [402]

हृदि श्रिता यदा कामाः प्रमुच्यन्तेऽस्य देहिनः ।
अथ मर्त्योऽमृतः प्राज्ञो भवतीत्येष निश्चयः ॥४०३॥

When the desires of an embodied (self), which have resorted to his heart, are abandoned, then does the mortal one become immortal (and) excellent knower—this is the decision. [403]

In earlier verses was explained the meaning of the first half of the Mantra in BU and this verse has explained the meaning of the second half of it.

विद्याकर्मसमूहेन येनायं परमात्मनः ।
संसारित्वं परिच्छिद्य प्रापितः स यदाखिलः ।
प्रमुच्यतेऽथ तद्वानाच्छुद्धो ब्रह्म समश्नुते ॥४०४॥

When that combination of knowledge and action (first) cut off that individual self from (the state of being) the highest Ātman and was (later) brought to the state of a transmigratory being, (that being) is wholly removed (lit. released); then, thereby, being purified after the removal (lit. abandoning) of that,¹ it attains to (the state of) the Brahman. [404]

¹This refers to *vidyākarmasamuccaya*.

आत्मकामोक्तिमानाच्च प्रागप्येतद्विनिश्चितम् ।
आत्मैव कामा अस्येति न भिन्ना हार्दकामवत् ॥४०५॥

Earlier also, this has been decided on the basis of the authoritative statement about the Ātman's desire(s) in the statement that desires themselves are the Ātman of this individual self and they are not different (from it), as they do in the form of desires of the heart. [405]

तत्र ये त्वात्मनोऽभिन्नास्तेभ्योऽनन्यत्वकारणात् ।
प्रमुक्तिरात्मनो नास्ति तैरसंसर्गतः सदा ॥४०६॥

There (i.e. between the two types of desires), from those which are non-different from the Ātman, owing to their not being

other thing than the Ātman, there cannot be the release of the Ātman, since there has ever been a non-contact (of it) with them. [406]

संसर्गः प्रविवेको वा भिन्नयोर्वस्तुनोर्यतः ।
नाभिन्नयोरतो मुक्त आत्मस्थानामभेदतः ॥४०७॥

Since a contact or distinction (can be thought of) of two distinct things and, not of two non-distinct things; therefore (*atah*), in the case of the Jīva who is liberated (contact or distinction cannot be considered) on account of the non-distinction (of the desires) which are (accepted as) residing in the Jīva itself. [407]

मिथ्यादर्शनजा ये तु माहारजनपूर्वकाः ।
अन्यत्वेऽवस्थिता बन्धहेतुत्वेन च सर्वदा ॥४०८॥
संसर्गप्रविवेकौ स्तो यतस्तैरात्मनः सदा ।
तानेवोद्दिश्य तेनेदं विशेषणमिहेरितम् ॥४०९॥

But/And (*tu*) (the desires which are mentioned) as those (which are stated) with *māhārajana* in the beginning and (which are said to be) produced from (a being's) wrong cognition (lit. seeing), have always remained in the state of being different (from the Ātman) and as the cause of bondage; [408]
since they are in contact with and separate from the Ātman, they would always be there, and with reference to them only is here (in the Mantra) stated this attributive adjunct (viz. *kalpita* and *āgantuka* together). [409]

हृदयाश्रयिणो येऽस्य न त्वात्मैकसमाश्रयाः ।
कामास्तेऽस्य प्रमुच्यन्त इत्येतत्प्रागपीरितम् ।
तदा तीर्णो भवत्येष शोकान् हृदयसंश्रितान् ॥४१०॥

And those desires, which resort to the heart and are not having a resort in the Ātman (this being), are abandoned; and this has been stated earlier also: "Then this one has crossed over

the sorrows which have resorted to the heart'.

[410]

This refers to the earlier statement about this in BU 4.3.22.

शोकाभिधानास्तत्रापि कामा एवोदिताः पुरा ।
न्यायस्तत्राप्ययं कृत्स्नः संभवत्येव निर्णये ॥४११॥

There also, those desires have been earlier described (lit. called) by the word (or, name) *śoka*; even there this whole manner of interpretation (*nyāya*) does become imperative/relevant (*sambhavaty eva*) to the reference to the decision.

[411]

Read SP: *atra hr̥dītiviśeṣaṇasambandhī yo nyāyaḥ sa sarvo 'pi tīrṇavākye hr̥dayasyetiviśeṣaṇārthavattvanirṇaye draṣṭavya iti yojanā.*

इति श्रीमन्महाभर्तृप्रपञ्चस्य महीयसः ।
व्याख्यामधीयते धीरा न्यायागमबहिष्कृताम् ॥४१२॥

Thus do the wise ones learn (i.e. understand) the explanation of the great scholar Bhartṛprapañca, i.e. the one which is rejected by the traditionally known Vedānta and logic (*nyāya*).

[412]

Sureśvara's mocking words are specifically to be noted.

Verses 413-424 are in refutation of the view of Bhartṛprapañca.

सर्वात्मभावं विद्यायाः फलमुक्त्वा च नः श्रुतिः ।
अथ योऽन्यामिति गिरा प्राहाविद्यां तथा फलम् ॥४१३॥

After the Śruti has stated the result of the lore of the Brahman, i.e. all is but (one with) the Ātman, it has once again stated for us (the nature of) ignorance and its results, by the words *atha yo 'nyām*.

[413]

This refers to BU 1.4.10.

कार्यकारणरूपेण यदेतद्वेददर्शनम् ।
अविद्याया इदं कार्यमन्योऽसाविति भण्यते ॥४१४॥

This, viz. which is the cognition of the differences (consisting in worldly objects) in the form of effects and causes, is but the result of ignorance; and that (Ātman) is (quite) different (from the transmigratory world)—so is this stated— [414]

आ समाप्तेस्तृतीयस्य प्रत्यगज्ञानहेतुकम् ।
ब्रह्म वा इत्युपक्रम्य मोहकार्यं विवक्षितम् ॥४१५॥

up to the end of the third Adhyāya;¹ it is intended to state the effect of delusion, which has ignorance about the inner self as its cause—(this) with the words *brahma vā*² in the beginning. [415]

¹This refers to the end of BU 1.4.

²BU 1.4.10.

अस्यामविद्याधिकृतौ सप्तान्नाविष्कृताविह ।
फलात्मकानामन्नानां प्रसङ्ग इदमीरितम् ॥४१६॥

This is (already) stated, with reference to (or, in the topic about) ignorance (about the nature of the self), i.e. in the exposition on seven types of food in connection with the foods being the nature of the results (of desires and actions). [416]

This refers to BU 1.4.5.

अव्याकृतस्य तत्त्वस्य नामरूपक्रियात्मभिः ।
व्याकृतियोदिता पूर्वं तदज्ञानविजृम्भितम् ॥४१७॥

This modification, which was earlier stated of the highest truth unmodified by means of what have the nature of *nāma*, *rūpa*

and *karman* was (but) full (vi-) expression of ignorance. [417]

This has reference to BU 1.4.7.

नामरूपादिभेदेन वर्णादिप्रविभागतः ।
कार्यमेतदविद्यायाः श्रुत्या व्याख्यायतेऽखिलम् ॥४१८॥

It has been explained in the Śruti that on account of the division into Varna etc., all these results of ignorance have been explained with reference to name, form etc.¹ [418]

¹This refers to *karman* also.

Verses 419-501 refer to Kaṇāda and Jaimini for refutation.

कणभुजैमिनीयैर्य आत्मधर्मा इतीरिताः ।
नात्मनोऽनात्मनस्ते तु काम इत्यादिनोदिताः ॥४१९॥

Those (properties), which are mentioned by Kaṇāda and Jaimini's followers as properties of the Ātman, are (in reality) not of the Ātman; but they are of the non-Ātman—but/and (tu) this is (already) expressed (in the verse) *kāmaḥ*¹ [419]

Read the introductory to this verse in NKL (ms. pp.735-736):
*evam śrutipaurvāparyapratisaṁdhānena kāmāder anātmadharma-
tvam pratīpādyā tasyādharmatvadarśanaṁ sarvavedavirodhād anā-
daraṇīyaṁ ity āha (kaṇabhug ...) iti.*

¹Cf. 4.4.226 and particularly, the words *āsaṅgapūrvakaḥ kāmāḥ* have to be noted.

यावत्किञ्चिज्जगत्यस्मिन्नूपं मेयत्वमागतम् ।
सर्वं तन्मन एवेति श्रुत्या साक्षात्स्फुटीकृतम् ॥४२०॥

Whatever form in the world has become the object of knowing, is all but *manas* only—so is this clearly stated in the Śruti. [420]

Cf. *etaddhi sarvāṇi nāmāni bibharti* (BU 1.6.1-3).

प्रकाशोऽपि च यः कश्चिदभिव्यञ्जक इष्यते ।
अभिव्यङ्ग्याभिसंबन्धः स च वागित्यथावदत् ॥४२१॥

Also whatever is light, that is described as the revealer (of forms etc.) and the relation of what is to be revealed and what, the revealer, is all but *vāc*— so has it said. [421]

Cf. BU 1.6.1-3.

क्रियात्मकं च यत्किञ्चिन्मानतो जगतीक्ष्यते ।
तत्सर्वं प्राण एवेति संजहार श्रुतिः स्वयम् ॥४२२॥

Whatever is of the nature of activity, perceived in this world with help of means of knowing, is that all but *Prāṇa* only/alone—so has the Śruti itself concluded. [422]

Cf. BU 1.6.1-3.

निश्चितं यच्च संदिग्धं तथाविज्ञातमेव च ।
वाङ्मनःप्राणरूपाणि तानि हीति श्रुतिर्जगौ ॥४२३॥

Indeed has the Śruti declared (lit. sung) that whatever is ascertained, doubtful, and unknown is but the forms of *vāc*, *manas* and *prāṇa*. [423]

¹Refer to BU 1.5.8: *vijñātam vijijñāsyam avijñātam eta eva*.

यतोऽविद्यात्मकान्येव रूपाण्येतान्यतो दृशेः ।
नात्मनः स्युः समस्तानि कार्यकारणबाह्यतः ॥४२४॥

Since these forms are only of the nature of ignorance which is different from the seer itself, therefore all of them cannot

be of the Ātman, due to their being beyond effect(s) and cause(s). [424]

In verses 425-427 it is stated that hṛdaya alone is the support of all forms and names etc. and not the Ātman.

तथा दिग्भेदभिन्नानां नामरूपक्रियात्मनाम् ।
उक्तं हृदय एवेति नीडं नात्मा परो मतः ॥४२५॥

So also is it said that, with respect to those (things) of the nature of *nāma*, *rūpa* and *kriyā*, which are different in point of their areas; the heart is the abode of them; but not the highest Ātman. [425]

This verse refers to BU 3.9.22-24.

समान उपसंहृत्य जगत्कारणरूपके ।
कारणस्याप्यपह्नुत्यै नेतीत्यात्मानमब्रवीत् ॥४२६॥

Having explained (the Ātman) as the merging point of the entire world made up of causes by the words *samāne*, the Śruti has declared *neti* with the view to rejecting (lit. concealing) the (final) cause also. [426]

This refers to BU 3.9.26, the Śruti stating the origin of the varied universe and finally rejecting the idea of origin also.

कार्यकारणयोरेवं निषेधात्रेतिवाक्यतः ।
आत्माश्रयत्वं कामानां निष्प्रमाणकमुच्यते ॥४२७॥

Thus, from the statement in the Śruti *neti*: (i.e.) by rejection of both cause(s) and effect(s), it is brought out that the desires, being described as having a support in the Ātman, have not any authoritative basis (for holding their existence as true). [427]

In verses 428-429 is refuted the idea that desires arise in the Ātman, having a resort as they do in the intellect.

हृदयोत्पाद्यता नापि कामानामिह कीर्त्यते ।
हृदि श्रिता इति ह्युक्तेर्न श्रुता कारणात्मता ॥४२८॥

Also, it is stated here (in the Śāstra) that the desires are not produced from/by the heart; from the statement *hr̥di śritāḥ* (it is not to be understood) as (the heart's) being their cause. [428]

नेति नेतीति चोक्तोऽर्थो जनकं प्रति यः पुरा ।
किंज्योतिरित्युपक्रम्य स एवार्थः प्रपञ्च्यते ॥४२९॥

Also, what is conveyed earlier¹ to Janaka by the words *neti neti* is itself fully explained in the words beginning with *kiṃ jyotiḥ*.² [429]

¹It was introduced in BU 4.2 and further explained in BU 4.3.

²BU 4.3.20-23.

Verses 430-436 state the reasons indicative of the absence of desires in the Ātman.

क्रियाकारककर्मभ्यो व्युत्थाप्यात्मानमेकलम् ।
पुमासनादिलिङ्गेन रवीन्दूदाहृतेस्तथा ॥४३०॥

After having separated, i.e. distinguished, the single Ātman as above activity, means of activity and action by pointing out the characteristics of the Ātman such as sitting¹ etc. and also by citing of the examples of the sun and the moon (Śruti rejects desires etc.) [430]

¹This signifies activity in general.

व्यतिरिक्तस्य तस्यैवमुक्ताध्यात्मादिभेदतः ।
स्वयंज्योतिर्विशुद्ध्यर्थं स वा इत्यादिका श्रुतिः ॥४३१॥

The Śruti, beginning with the words *sa vā ...*, is for amplifying the thought of the self illuminating which is thus distinguished from the various distinctions such as *adhyātma*¹ etc. which are (already) stated. [431]

Cf. BU 4.3.15.

¹This also refers to *ādhidaivika* and *ādhibhautika*.

स्वतोऽसंदूषितः प्रत्यङ्कामकर्मादिभिर्मलैः ।
अनन्वागतवचनात्तथासङ्गश्रुतेरपि ॥४३२॥

The inner self,¹ itself being unaffected by impurities such as desire and action, (is described) by the Śruti also by the word *ananvāgata* and the statement of being non-attached. [432]

¹The text reads *pratyankāma-* but it should have read *pratyak-kāma-* because *pratyani*, derived from a verb root *prati-anic* is the nominative form of *pratyak* (adjective) in adverbial sense 'turned within'; this is not at all relevant!

आत्मशुद्धेर्विवक्षेह न त्वशुद्धेः कथं चन ॥४३३॥
विशेषणस्य श्रवणाद्धृदीत्यात्मनि चेन्मतम् ।
सव्येनाक्षणा न पश्यामि यथा सामर्थ्यतस्तथा ॥४३४॥

Here, the intention is to state the purity of the Ātman but not that of its impurity. [433]

But, (if it is said:) 'It is held that, on hearing the attributive word *hr̥di* in relation to the Ātman as they understand in the statement, 'I do not see with the left eye', so also from the tenor of the expression'. [434]

नोक्तोत्तरत्वात्साधवेतद्ववतेहाभिधीयते ।
प्रतिज्ञातार्थसिद्धयर्थहेत्वर्थं तद्विशेषणम् ॥४३५॥

(The reply is:) 'This is not (to be so said), because there has been already an answer given to it; therefore, you should say that 'it is right' in respect of this Mantra (*iha*). That attribute is (stated) for the purpose of establishing the matter which is enunciated.'

[435]

That is to establish *kāmāḥ na ātmāśrayāḥ*.

सर्वेषामपि कामानामाश्रयो हृदयं यतः ।
तद्वेत्त्वतिक्रमादात्मा सर्वशोकातिगस्ततः ॥४३६॥

Since, heart is the abode/support of all the desires, therefore, by overcoming the cause of them, has the Ātman been (described as) one that has overcome all sorrows.

[436]

Verses 437-439 affirm that *kāmā hr̥di* does not set aside *anabhivyakta* 'appearance of desire' and its cessation.

अनाश्रितविभागार्थमथवास्तु विशेषणम् ।
तेषु यत्नविधेयत्वात्सफलं स्याद्विशेषणम् ॥४३७॥

Or, let the specifying phrase (*hr̥di śritāḥ*) be for the sake of distinguishing what is (really) not supported; since (only) in the case of them, where an effort has been made (for their removal), that specifying phrase would be meaningful (or, having a result).

[437]

नाश्रयापेक्षयैतत्स्याद्धृदीतीह विशेषणम् ॥४३८॥
न हि हृद्व्यतिरेकेण कामानामाश्रयान्तरम् ।
श्रुतौ स्मृतौ वा न्यायाद्वा दृश्यतेऽपि प्रमान्तरात् ॥४३९॥

Here, the specifying phrase *hr̥di* ... is not used with the expectation of the abode in view.

[438]

Indeed, there is not for desires any support other than the heart—this is known (lit. seen) from the Śruti, the Smṛti, logical reasoning, or any other type of knowledge.¹

[439]

¹This may refer to the *upamāna*.

In verses 440-441 kāma is related to karman.

प्रवृत्तिः कामशब्दस्य भूयःस्वर्थेषु दृश्यते ।
कर्मादिषु जगत्सिंस्तानपेक्ष्यात् उच्यते ।
हृदि श्रिता इति वचो नाश्रयान्तरवीक्षया ॥४४०॥

In this world, the word *kāma* is known to have the capacity to express many meanings, action etc.,¹ therefore, keeping them in view, has the Śruti stated *hṛdi śritāḥ* and not with any other abode in view. [440]

¹SP explains these meanings thus: *kāmyata iti vā kāmyate 'neneti vā kāmanam iti vā kāmāśabdasyānekārthatvam*.

अतिच्छन्दा इति वचः कामाधारत्व आत्मनः ।
विरुध्यते प्रमाणं सन्न चान्यार्थत्वमिष्यते ॥४४१॥

In holding the Ātman as the abode of desires, there would result opposition to the statement in the Śruti *aticchandāḥ* ... (BU 4.3.21); that being an authoritative statement, it is not accepted that the word has some other meaning to convey. [441]

Verses 442-453 state the absence of any means to show the Ātman as the abode of desire(s).

आत्मनः कामनीडत्वे न च मानान्तरं क्वचित् ।

And (also) there is not anywhere an authoritative means of knowing that the Ātman is the abode of desires. [442ab]

सर्वकामादिवचनं प्रमाणमिति चेन्मतम् ॥४४२॥

तत्रातिच्छन्दवचसा विरोधात्रास्य मानता ॥४४३॥
 वस्तुनोऽप्यनृतन्त्रत्वात्षोडशिग्रहणादिवत् ।
 विकल्पोऽप्यत्र नैवास्ति न हि वस्तु विकल्पते ॥४४४॥

If it is held that the statement about *sarvakāma*¹ ... is the authoritative means (of knowing that, viz. *ātmanah kāmānīdatva*), [442cd]

that is not so, because there is opposition to this statement by the statement of *aticchandāḥ*² [443]

Further, there is no opinion here in respect of the real thing, since it does not depend on (the activity of) a human being like taking up the *ṣoḍaśī* cup (in ritual); indeed the (real) thing cannot entertain any option here.³ [444]

Verses 442cd-443 show Vedāntas' acceptance of only one teaching to be the purport of Vedāntas.

The acceptance of *vikalpa* is related to ritual actions, such as *ṣoḍaśīgrahana*, but this is not accepted in the case of the statement about the nature of the (real) thing. SP supports this thus: *uktaṃ hi*—

evam eṣo 'ṣṭadoṣo 'pi yadvrīhiyavavākyayoḥ /
vikalpa āśritas tatra gatiḥ anyā na vidyate // (iti)

¹CU 3.14.1-2.

²BU 4.3.21.

³In respect of the two sentences of *sarvakāmaḥ* ... and *aticchandāḥ*

सर्वं हि खल्विदं ब्रह्मेत्येवं तत्रापि च श्रुतिः ।
 प्रतिज्ञायाह युक्तिं च तज्जलानिति सादरात् ॥४४५॥

Because, in the context of (the statement) *sarvaṃ khalv idam brahma*,¹ has the Śruti stated regardfully (*sādarāt*) the reason for what is enunciated in the words *tajjalān* [445]

¹CU 3.14.1.

अक्रियाकारकफलं यतो ब्रह्माद्वयं ततः ।
त्यक्ताशेषक्रियैस्तस्मात्तदुपास्यं सदात्मना ॥४४६॥

Since the Brahman, not being related to activity, its means and its results is without any duality; therefore, individual selves who have discarded all other activities ever have that Brahman to be the object of worship,¹ as the inner self. [446]

¹SP states *sadā dheyam* as paraphrase of *upāsyam*.

इत्येतज्जगतो वृत्तं ब्रह्मैवाकार्यकारणम् ।
अव्यावृत्ताननुगतं प्रत्यङ्मात्रसतत्त्वकम् ॥४४७॥

(Thus) this is all that is related to the world, and the Brahman is but what is devoid of effects and causes, neither distinguished from nor similar to any other (object) and has the nature of being only the inner self. [447]

Thus, in this verse, Sureśvara concludes the thought that has been explained in verses 442cd-446.

उक्तवैवं वस्तुनो वृत्तं तद्याथात्म्याप्रबोधजम् ।
कर्त्रादिकारकापेक्षं क्रियावृत्तमभाषत ॥४४८॥

Having thus stated what is related to the (real) thing, the Śruti has stated what is related to its activity which is produced from ignorance about its true nature and depends on various factors related to activity such as the agent. [448]

The verse introduces the thought in CU 3.14.1 *atha khalu*

....

ब्रह्मात्मानमुपासीत ब्रह्मतत्त्वाविचक्षणः ।
कुर्वीत स क्रतुं कर्ता ह्यकार्यत्वेऽपि वस्तुनः ॥४४९॥
मनोमयादिविषयः क्रतुः पुंसो विधीयते ।
स हि तस्मिन्न्यतः शक्तो लोकाग्न्यादिविधौ यथा ॥४५०॥

A person, who has not been cognizant (*avicakṣaṇaḥ*) of the Brahman, should worship the Brahman which is the Ātman; he should entertain a thought about the (real) thing though it is not of the nature of what is to be produced; [449] the thought of the man¹ is here stated to have for its object what is made up of *manas*² etc., since he is capable (of any activity) related to that such as, for example, enkindling of the usual fire etc. [450]

¹This refers to *avicakṣaṇa*.

²SP states: *manomayatvādiguṇake parasminn ātmani sopādhike dhyānaṃ vidhīyate sarvatra prasiddhopadeśād ity nyāyāt*.

अतः कर्त्रादितन्त्रत्वात्सर्वकामादिवस्तुनः ।
अतिच्छन्दोक्तिबाधः स्याद्वस्तुतन्त्रत्वहेतुतः ॥४५१॥

Therefore, all such things as desires etc. depend on (the activity of) an agent etc.; there would be stultification of the same by the statement *aticchandāḥ* ... since the reason is this (latter) as dependent on (the meaning of the real) thing. [451]

SP explains the purport of this verse: *vastunaḥ sarvakāmādirūpasya kriyātmakatvena kārakatantratvāt tadarthavākyasya na vastuparatvam aticchandavākyasya tu tatparatvād anyato balīyaśtvād atulyatvam atas tadbādhaḥ sarvakāmādiśruter ity arthaḥ*.

विकल्पोऽत्र न युक्तः स्यादेवमुक्तेन वर्त्मना ॥४५२॥

Here (the acceptance of) an option is not reasonable as shown in the above way. [452]

Verses 453-465 state the significance of *akāmatva* in the case of the Ātman.

असत्यकामनुत्तर्या कामोक्तिर्यापि चाष्टमी ।

सत्यास्त इम इत्यादि स्तुतिर्वा स्याद्विधित्सते ॥४५३॥

And, also, that reference to desire stated in the eighth Adhyāya (*prapāṭhaka*) which is related to the removal of the desires for the unreal (things/objects) is (just) a praise as in *satyās ta ime* with respect to what is sought to be prescribed. [453]

This verse refers to CU 8.1.1 which is like an injunction and CU 8.3.1 which is like an Arthavāda (*stuti*). There is stress on the unreal aspect of desires.

सन्त्यात्मनि न चेत्कामास्तदेवं फलवद्वचः ।
अतिच्छन्दा इति शुभं कामशोकनिषेधकृत् ॥४५४॥

If there are not any desires in the Ātman, then the statement related to the result (*phalavat*) i.e. *aticchandāḥ* ... would be auspicious, in that it would purport to reject desires and the (consequent) sorrows. [454]

निषिध्यन्ते न चेत्कामा यथोक्ताः प्रत्यगात्मनि ।
अथ काममयत्वेऽस्य संसारोऽपि न वार्यते ॥४५५॥
मतं नालं प्ररोहाय ये कामाः प्रत्यगात्मनि ।
किमर्था तर्हि तत्रैषां कल्प्यते भवता स्थितिः ॥४५६॥
न कश्चिदुपयोगोऽत्र कामानां विद्यते स्थितौ ।
अजागलस्तनस्येव प्रमाणाद्वन्धमोक्षयोः ॥४५७॥

(An objection is raised:) 'If it is held that desires, which have been mentioned, are rejected (as existing) in the individual self, then it would be full of desires and its transmigration also would not be rejected (lit. warded off). Then, in the case of those desires, which you have stated are obtaining in the inner self, they are not for producing any result, why then have you entertained their existence in that Ātman?'

[455-456]

'The existence of desires here (in the Ātman) is not at all

useful in respect of the removal of bondage and (securing) liberation; the authoritative means of knowing this is then like an udder on the neck of goat.' [457]

These arguments are based on the Śruti statement *sa yathā kāmō bhavati* which should lead to the absence of liberation.

प्रमाणलब्धसद्भावो निष्फलोऽपि न वार्यते ।
प्रतीचि कामसंबन्धो न तथेति निषिध्यते ॥४५८॥

(The answer is made:) 'If there is existence (of a thing) known from an authoritative means of knowing, it is not rejected even if it is useless; therefore, the relation of desires to the inner self is rejected by the words *na tathā*'. [458]

कामादीनामनर्थानां प्रतीचि शतशः श्रुतौ ।
निषेधकानि वाक्यानि सन्त्यपि स्मृतिशासने ॥४५९॥

There are in the Śruti hundreds of sentences¹ which reject (the existence of) the useless things such as desire; so are they there in the teachings of the Smṛti² as well. [459]

¹For example, refer to *asthūlam avikāryam* ... (BU 3.8.2).

²For example, *Gītā* 2.25: *avikāryaḥ*

कामक्लृप्तिरतो नेह प्रत्यगात्मनि युज्यते ।
प्रमाणासंभवात्तस्मात्सा न कल्प्या विपरिचिता ॥४६०॥

Therefore, it is not reasonable to entertain the notion (of the existence) of desires in relation to the Ātman; that notion should not be entertained by the wise owing to the impossibility or non-existence of an authoritative means (of conveying that).

[460]

प्रमाणवन्त्यदृष्टानि कल्प्यानि सुबहून्यपि ।
अदृष्टशतभागोऽपि न कल्प्यो निष्प्रमाणकः ॥४६१॥

In respect of the Śruti, one has to imagine very many things (*subahūni*) even if they are not seen, but as having (the Śruti) as the authoritative means (of knowing them); one should not entertain (any notion), even a hundredth portion of it, unseen, which does not have any authoritative means (of knowing it).

[461]

NKL (ms. p.739): introduces this verse thus: *nirmūlakalpanā nātra kāryety atra bhātṭasaṁvādam āha pramāṇavanti ātmani kāmasambandho na kalpyate pratyakṣaśrutiviruddhatvād atrāha na ceti.*

न चात्मकाम इत्यत्र कामाधारत्व आत्मनः ।
मानान्तरप्रसिद्धत्वात्प्रामाण्यं लभ्यते श्रुतेः ॥४६२॥

In the statement *ātmakāma*, there is not noticed any authoritative statement of the Śruti which points to the Ātman's being the basis of desires (even if) that (i.e. the absence of desires) is (already) known by some other authoritative means.

[462]

This is based on BU 4.3.21 and 4.4.6.

न चोपास्योऽयमप्यर्थः सर्वकामादिवच्छ्रुतेः ।
ऐकात्म्यवस्तुयाथात्म्यप्रकाशनपरत्वात् ॥४६३॥

Also, this thing (i.e. *kāma*) is not an object of worship (as it is clear) from the Śruti *sarvakāmaḥ* ..., because the purport (of the Śruti statement) is to reveal the true nature of the real thing, i.e. its being single.

[463]

This is based on CU 3.14.2.

कणभुङ्गन्यायसिद्धा चेत्कामाद्याश्रयतात्मनः ।
श्रुतेस्तदनपेक्षत्वान्नापेक्ष्यं कणभुङ्गमतम् ॥४६४॥

If it is held that the Ātman can be the basis of desire etc., as established in the Nyāya system of Kaṇāda, then (it is to be pointed out:) that view of Kaṇāda is not to be respected (*nāpekṣyam*), because it is not sanctioned (lit. or supported) by the Śruti.¹ [464]

In the system of Kaṇāda, *kāma*, *icchā*, *prayatna* etc. are said to be the properties (*dharmas*) of the Ātman—that is the basis of the argument in this verse.

¹SP states: desires etc. are the properties of *manas* and not of the Ātman which is *nirguṇa* as stated in the Śruti. Therefore, *upekṣyam tanmatam*.

तन्निषेधश्रुतेश्चापि नापेक्ष्यं तद्विरोधतः ।
सौगताद्युक्तवत्तस्मान्न कामाश्रयतात्मनः ॥४६५॥

Further, on account of the Śruti's rejection of that,¹ also, that (i.e. the opinion of Kaṇāda)² is not to be respected (*nāpekṣyam*), for the reason of its (being in) opposition to it (i.e. Śruti), like the teaching of Sugata (to be ignored, for the same reason). Therefore, there cannot be in the Ātman (the quality of) being the abode of desire. [465]

¹This refers to *ātmanah kāmāśrayatā*.

²This is already under reference in the preceding verse.

In verses 466-470, there is affirmation of the complete absence of any authoritative means to show the Ātman to be the support of desires.

न च कामाश्रयत्वेऽन्यत्प्रमाणं किञ्चिदीक्ष्यते ।
मानमेयातिवर्तित्वात्स्वतः सिद्धेश्च वस्तुनः ॥४६६॥

Moreover, there is not seen (i.e. known) any other¹ valid means of knowing in the case of *kāma* as having an abode

in the Ātman; and also because the (real) thing is established, in its own right, with the nature of being beyond all the activity of knowing and the objects of knowing. [466]

¹This implies that the opponents of Vedānta might hold the sentence *sa vā ayam ātmā ... dharmamayo 'dharmaṃmayah sarvaṃmayah* (BU 4.4.5) as an authoritative means for knowing the Ātman as the abode of desires.

मातृमानप्रमेयार्थश्चागमापायिनः सदा ।
वीक्षते योऽविलुप्ताक्षः स आत्मानन्यमानगः ॥४६७॥

And the one, whose sight is never lost and who does not accept any other means of knowing, sees those objects (other than the Ātman) as knower, means of knowing and object(s) of knowing, which ever keep on coming into existence and perishing. [467]

यः स्वतो नागमापायी तद्विरुद्धेषु सर्वदा ।
तत्रैवात्मेति धीरेषा नागमापायिवस्तुषु ॥४६८॥

The one, who is, on its own, not coming into existence and perishing, is to be known as the Ātman; with respect to it, one should not entertain this notion which is the opposite of it (i.e. the one being), as they keep on coming into existence and perishing. [468]

कामिनं दुःखिनं मूढं योऽविलुप्ताक्ष ईक्षते ।
नासौ कामोऽथवा कामी तत्संबन्धोऽथवा स्वयम् ॥४६९॥

The one, who has never lost the sight, and who sees a person full of desires and sorrows (and) deluded (or ignorant), is itself not desire, nor one who has desires, nor is in any way related to that (i.e. desire). [469]

एवं दुःखादिषु ज्ञेयमुक्तं प्रत्यक्षसंश्रयात् ।

इच्छादेशिचतधर्मत्वात्कर्मस्थत्वं सुनिश्चितम् ॥४७०॥

Thus, it is well-established that one should know the existence of sorrows etc. as resulting from (lit. abiding in) activity, because it is so seen directly that the desires are the properties of *citta*.¹ [470]

¹This refers to the intellect which is associated with the inner self. Cf. BUBV 4.3.922.

This verse states that the one who is the support of manas, the abode of desires, cannot be their support.

इच्छादिधर्मवत्साक्षाद्यः सदा वीक्षते मनः ।
तस्येच्छाद्यभिसंबन्धः केन मानेन गम्यते ॥४७१॥

The one who ever sees *manas* to have the properties of desire etc.—how can it have relation to desires etc.? by what authoritative means can this be known? [471]

SP explains the thought in the saying: *auṣnyadhīr jale bhrāntir icchādidhīr apy ātmani tādrśī ced aviruddhetī bhāvaḥ*:

Verses 472-481 state that desires etc. are not the properties of the Ātman—this is known by pramāṇa.

प्रत्यग्वस्तु पराबुद्धिगम्यैरिच्छादिभिः कथम् ।
विरुद्धत्वाद्विशेष्यं स्यात्तमसा दिनकृद्यथा ॥४७२॥

(A question is asked:) 'How can the (real) thing, i.e. the inner self, which is apart (lit. away) from body and objects, be characterized by desires etc. which are known (only) through the intellect, on account of its being opposed (to them), just as the maker of the day (=the sun cannot be characterized) by darkness?' [472]

एकबुद्ध्यधिगम्यत्वं विशेषणविशेष्ययोः ।
नीलोत्पलादिवद्दृष्टं न तद्दृष्टं विरुद्धयोः ॥४७३॥

'Being known in only one cognition (of a thing) is seen in the case of the qualifier and the qualified as in (the case of) a blue lotus and that (relation) is not seen in what is opposed (to them in character). [473]

नापि चात्मातिरेकेण ग्राहकोऽन्योऽवसीयते ।
ग्राहकस्थश्च कामादिः स कथं ग्राह्यतां व्रजेत् ॥४७४॥

Also, it is not ascertained that anyone else than the Ātman is one who grasps or knows; therefore, how can desire etc. which are held to be existing in the one who grasps be considered as an object to be grasped? [474]

This sets aside the notion that desire etc. cannot be the one who grasps an object or even a part of the one.

चक्षुर्दृष्टेन चक्षुस्थं कृष्णत्वाद्येति दृश्यताम् ।
प्रमातृस्थं न कामादि तद्वदेयात्प्रमेयताम् ॥४७५॥

The blackness etc. existing in the eye does not become an object of sight for the seeing eye; similarly, desire etc. which exist in the knower (i.e. the Ātman) would not become the object of its knowing. [475]

This confirms by example what is stated in the preceding verse.

आत्मत्वावगमाद्वापि जडस्यैवेह वस्तुनः ।
कामकाम्यादि तस्यास्तु दृष्टिमात्रात्मनो न तु ॥४७६॥

Or, let desire and the object of desire belong to that insentient thing which can here be taken to be the Ātman; but it cannot be the object of the Ātman which is merely the seer. [476]

This presupposes the opponent's hypothesis about the abode of desire to be either an insentient Ātman or merely a non-insentient (*ajada*) Ātman.

अचेतनैकनीडत्वं मयापीह प्रसाध्यते ॥४७७॥
स्वेन भासेति च स्वप्ने सर्वकामादिवर्जितम् ।
स्वेनैव ज्योतिषेत्युक्तं स्वयंज्योतिष्ट्वसिद्धये ॥४७८॥

In this case also, I can establish that (desires etc.) have only the non-sentient as the basis. [477]

It is said in the Śruti *svena bhāsā* ... in relation to the dream of (the inner self) being devoid of all desires etc.; also it is established in the words *svena jyotiṣā* ..., that the Ātman is by nature a self-shining light. [478]

This is based on BU 4.3.9.

स्वयंज्योतिष्ट्वसिद्धिश्च श्रुतिन्यायपुरःसरा ।
कामाद्याश्रयतोक्त्यार्थात्सा त्वया बाधिता भवेत् ॥४७९॥

And that establishing (of the Ātman) as a self-shining light,¹ preceded by reasoning and the Śruti² would be opposed by you by your statement (about the Ātman) as being the abode of desire etc. [479]

This refers to Sureśvara's mention of the opponent/object 'directly'—as 'you', 'in you' etc.

SP reads a concluding remark on the verse: *sā hi śrautī naiyāyikī vātmanah svaprakāśatvaprasiddhas tvayā kāmādīnām ātmāśrayatvoktyā bādhitā syāt svāśrayavṛttiviśeṣād eva tadāśrayasyātmāno vaiśeṣikādivad dr̥ṣṭisambhavād ity arthaḥ*.

¹Cf. BU 4.3.14.

²Cf. SP: *śruteḥ nyāyācca*.

तथैवात्मनि दृष्टे च सर्वं दृष्टं भवेदिति ।
कामादेरात्मनोऽन्यत्वे तच्चापि स्यात्प्रबाधितम् ॥४८०॥

And, yet further, that (statement in the Śruti), viz. *ātmani dr̥ṣṭe sarvaṃ dr̥ṣṭam bhavet*, would also be opposed; if desire etc. are held to be different object(s) (as existing apart) from the Ātman. [480]

The basis of this argument is CU 6.1.3ff.

सर्ववेदान्तबाधश्च कामाद्याश्रयता यदि ।
आत्मनोऽभ्युपगम्येत तेषां तत्प्रतिषेधतः ॥४८१॥

If it is accepted that the Ātman is the abode of desire etc., there would result stultification of all the Vedānta (texts), because rejection of that (viz. desire etc.) is the purport of them. [481]

Verses 482-488 are concluding remarks of Sureśvara about the rejection of the view of the Tārkikas.

ऐकात्म्यस्यागमार्थत्वाच्छ्रुतेश्चान्यानपेक्षतः ।
यतोऽतस्तार्किकोक्तीस्ता नैवापेक्षामहे वयम् ॥४८२॥

Since only the non-duality of the Ātman is the thought conveyed by the traditional scripture and they do not depend on any other means of knowing; therefore, we do not favour (lit. regard) the statements of the Tārkikas. [482]

SP makes this point clear, at length.

हृद्याश्रितत्वं कामानां नन्वत्रोक्तं विशेषणम् ।
संभवे व्यभिचारे च तच्च स्यात्फलवत्सति ॥४८३॥

(An objection is raised:) 'But indeed here is specifically stated about desires of their being supported by (or, having abode in) the heart; and that would be meaningful only if they were taken as being produced (there) and as different (or, apart)

from (it)'. [483]

हृद्यनाश्रितकामानां संभवादिष्टमेव तत् ।
आत्माश्रयातिरेकेण तच्चावोचं पुराप्यहम् ॥४८४॥

(The answer is given:) 'In case there is possibility of desires not being supported by (or, not having an abode in) the heart, then that is desirable (or, acceptable) to me, since I have earlier also said that they are apart from their support/abode, i.e. the heart'. [484]

This refers to verses 437-439 above.

मूर्तं मर्त्यं स्थितं सच्च पृथिव्यप्तेजसामिदम् ।
न विशेषणमित्यस्मादमूर्तत्वादिकल्पनम् ॥४८५॥

(Since) *mūrta*, *martya*, *sthita* and *sat* are not the specifiers (or, attributes) of earth, water and fire; therefore, there is here the notion (about them) being *amūrta* etc. [485]

This refers to BUBV 2.3.27-34.

चलनात्मा मरुन्नित्यं दाहकोऽग्निरितीरिते ।
विशेषणश्रवात्क्लृप्तिनैतयोस्तद्विरुद्धयोः ॥४८६॥

Since it is said that wind (*marut*) is always of the nature of movement and fire has the capacity for burning; therefore, on hearing (those) specifiers of these two, there cannot be (any specification) of what can be opposed to them. [486]

SP observes: *itaś ca viśeṣaṇaṁ vyāvartakam iti niyantum aśakyam*.

वास्येऽर्थे वासनाः सर्वाः सजातीये च ता यतः ।
निःसङ्गे भिन्नजातीये ताः कुतः प्रत्यगात्मनि ॥४८७॥

Since all the impressions (*vāsanās*) are always to be noticeable in an object which should bear those (impressions) and which belong to the same type (lit. species); (therefore, how could) those (impressions be found) in the inner self which is of different species and has no attachment whatever? [487]

प्रत्यगात्मातिरेकेण प्राज्ञोऽन्यश्चेद्विवक्ष्यते ।
नेति नेतीति तस्योक्तान्निषेधात्नेह संभवः ॥४८८॥

If it is intended to state that a wise one (*prājña*,¹ who has known the nature of the *Ātman*) is different from the inner self, then such possibility is not acceptable here (in the discussion of scriptures), since it has been stated (to have the characteristic) in the words *neti neti*. [488]

¹Though this can refer to the *Ātman* in the sleep state, there is literal translation given.

In verses 489-498, it is argued that desires do not exist in the Ātman; this, on the basis of the Śruti's statement tad vā asya

निःशेषकामकर्मादेर्व्युत्थाप्यात्मानमब्रवीत् ।
तद्वा अस्यैतदित्युक्त्या नातः कामादयोऽत्र ते ॥४८९॥

The Śruti¹ has stated. (the nature of) the *Ātman*, after having raised it above (i.e. after distinguishing it from) the entire mass of desires, action etc.; therefore, those desires etc. are not there (as revealed) by the statement *tad vā asyaitat*¹ [489]

¹BU 4.3.21.

तद्वा अस्यैतदित्यादेः प्राज्ञस्यान्तरूपतः ।
वासनाकामकर्मादेः कुतोऽस्यान्तरूपता ॥४९०॥

From the statements such as *tad vā asyaitat ...* it becomes known that the wise one has the nature of being inside the human body; therefore, how could impressions, desires, actions etc. belong to its inner nature? [490]

SP clarifies this thus: *prājñasya kāmakarmādinirmuktaṃ rūpam antaraṅgam ity aṅgīkāraṇa na kāmādes tadantaraṅgarūpatetyarthaḥ*.

पीतरक्तादिभी रूपैः कर्मकार्यैः प्रयुज्यते ।
निर्देष्टुं शक्यते तस्मादनिर्देश्योऽपि सन्नसौ ॥४९१॥

Being indescribable also, it has been mentioned to have the forms that are yellow, red etc., viz. those which are the effects of activity;¹ therefore, this (*vāsanā*) is thus² mentioned. [491]

¹This refers to the explanation given by Bhartṛprapañca of the process (*prakriyā*) in relation to BU 2.3.

²BUBV 2.3.158-163; SP explains *nirdeṣṭuṃ śakyate* by saying *karmakāryavāsanātmakarūpasambandhe kāryam*.

भावनैव विजृम्भन्ती स्थूलत्वमुपगच्छति ।
अव्याकृतादिभावेन खवायवादित्यसंज्ञितम् ॥४९२॥

It is only impression (*bhāvanā*),¹ which spreading itself, attains grossness; thus assuming various forms of what was unmanifest, viz. it becomes known as sky, wind, the sun etc. [492]

SP clarifies this: *prakṛtīvikṛtibhāvena vijṛmbhamāṇā bhāvanā bhūtabhautikātmakaṃ sthāulyam āpnotīti yāvat*.

¹Sureśvara understands *bhāvanā* as a synonym of *vāsanā*.

मूर्तामूर्तादिभावाच्च क्षीयमाणा हि सैव तु ।
निर्गुणं सन्तमात्मानं रञ्जयित्वावतिष्ठते ॥४९३॥

And, having become *mūrtāmūrta* etc.,¹ the same (gradually) perishing² continues to stay after it has tainted the Ātman

which is by nature devoid of any properties.

[493]

This is to refer to the existence of *bhāvanā* in association (as it were) with the non-attached Ātman.

¹This refers to *martya*, *sthiti*

²This means *sūkṣmatvam upagacchantī*.

भावना बहुरूपासौ बहुरूपत्वमात्मनः ।
करोत्यनामरूपस्य मणोरास्तरणं यथा ॥४९४॥

That impression, which has various forms, causes multiplicity of forms in the case of the Ātman which is (in reality) without any name and form, as a covering (lit. wrapper causes various appearances) of a jewel (*maṇi*). [494]

This explains the thought in the preceding verse.

Verses 495-500 bring out the self-contradiction in the statement by Bhartṛprapañca.

इत्यादि भवतैवोक्तं वासनोक्तिप्रसङ्गतः ।
इहोक्तेस्तद्विरुद्धत्वात्परस्परविरुद्धता ॥४९५॥

This and such other ¹ statements, which you have made in relation to (*prasaṅgataḥ*) the statement about impressions, point to a mutual contradiction between the statements here (and) that (which you made earlier) on account of their being (mutually) opposed. [495]

This refers to Bhartṛprapañca's positing of three *rāśis*; cf. BUBV 2.3.112-113.

¹SP states: *atra mantrē kāmādīnām ātmāśrayatvaṃ svato 'stīti bhavadvākyasya pūrvoktenātmāny aupādhikakāmasambandhavādi svavākyena viruddhatvān mitho viruddhatvāt svavyākhyānasyā-tmano na kāmādyāśrayatety arthaḥ*.

कर्मराशिगिरात्मापि यदि तत्र विवक्षितः ।
निषेधात्तस्य नेतीति शून्यतैव प्रसज्यते ॥४९६॥

If, by the statement of (or, words about) *karmarāśi*, it is intended, by you, to refer to the Ātman also, then there would result mere void, owing to the fact that it (i.e. *karmarāśi*) has been rejected/denied in the words *neti* [496]

This refers to BU 2.3, and reference to *śrutivirodha* in relation to mutual contradiction in the theory of Bhartṛprapañca under verse 496.

परमार्थात्मनोऽथान्यः कश्चिदात्मेति भण्यते ।
अस्तु कामं स कामादेराश्रयो न निवार्यते ॥४९७॥

(An objection is raised:) 'It may be stated that (this) Ātman¹ is different from the highest Ātman'; (then the answer is:) 'Well, be it so, yet that also cannot be warded off as being the support of desires etc.' [497]

The Ātman is understood by the opponent as having unreal nature (*aparamārtha*) and then it could not be described as the abode of desires etc.

¹It refers to the abode of desires.

शक्त्यात्मनाप्यवस्थानं कारणात्मनि युज्यते ।
तस्य शक्त्यभिसंबन्धान्न त्वकारण आत्मनि ॥४९८॥

Also, in the case of this Ātman, which is taken as the cause (of this complex world) it has been there in the form of one having a capacity to create (*śaktyātmanā*); then, there can be close association of that capacity (with desires etc.) But (this is) not (so), in the case of the Ātman which is not the cause (as said before).¹ [498]

¹This refers to *sūkṣma* form of this postulated Ātman which

is *paramātmān*.

न च कारणमात्रत्वं रूपमिष्टं परात्मनः ।
अनिर्मोक्षप्रसक्तित्वाच्छ्रुत्यनारम्भसक्तितः ॥४९९॥

Moreover, it is not accepted that the highest Ātman has the form which consists merely in being the cause (of the universe), because (if it were so accepted) there would result the contingency of the absence (or impossibility) of liberation and also of the absence of the activity of the Śruti (for conveying the nature of the Ātman). [499]

स्थलादीनां च सर्वेषां प्रतीचि प्रतिषेधतः ।
विशेषणानां संबन्धो नातः स्यात्प्रत्यगात्मनः ॥५००॥

Owing to the rejection/denial of all attributes such as *sthūla*, there is not any relation of the inner self to the specifiers. [500]

Verses 501-502 are the concluding remark in refutation of Bhartṛprapañca.

आत्माश्रयत्वं कामानां न युक्त्या नापि शास्त्रतः ।
अपव्याख्यानतस्तेषां कामा आत्माश्रया इति ॥५०१॥
एवं समवनीतेषु प्राणेष्व्वात्मनि तद्विदः ।
पूर्ववद्देहसंबन्धः किमिवेह न जायते ॥५०२॥

That desires have an abode in the Ātman cannot (be postulated on the strength) of reasoning or scripture; therefore, the statement 'Desires have an abode in the Ātman' is an incorrect explanation. [501]

When the *prāṇas* have been thus brought down (i.e. have merged) into the Ātman, there does not any more remain here¹ any relation to a body, (as before) in the case of the one who has known that (Ātman). [502]

¹On this SP writes: *viduṣo vidyayātmanamātratvena prāṇeṣu bādhiteṣv api dehe ced asau vartate pūrvavad asya tadyogaḥ syāt tato vidyāvaiyarthyam iti codyārthaḥ.*

Verses 503-509 explain the BU sentence *tadyathāhinirivayanī*.

सर्पनिर्मोकवत्कृत्स्नमात्माविद्यैकहेतुजम् ।
यथावस्तुधिया हित्वा निर्ममो निरहंकृतः ॥५०३॥

All (of the things) produced merely by/from ignorance about the nature of the Ātman are, in their entirety, like the slough of a serpent; because the Ātman, having abandoned (the ignorance), has become without (any feeling of) having a sense of its belonging(s) and without ego, on account of (i.e. on having attained) the knowledge (*dhī*) of the real thing as it is. [503]

This refers to the statement of the one liberated, while apparently continuing in the body of this life.

वर्तमानोऽपि देहादौ लोकदृष्टिव्यपेक्षया ।
नात्मात्मीयत्वबुद्ध्यासौ देहादीन्समुदीक्षते ॥५०४॥

Continuing in the body etc. though, in the eyes of the people (of the world), the Ātman does not look upon body etc. with an impression that (some) belonging of itself. [504]

षष्ठ्यर्थहेतुविध्वंसाद्यथावस्त्ववबोधतः ।
अव्यावृत्ताननुगतं पूर्णं वस्त्ववतिष्ठते ॥५०५॥

Owing to the destruction of the cause which is expressed by the sense of genitive case¹ and also by (having) the knowledge of the (real) thing as it is, (the individual self) stays as undifferentiated as and dissimilar to (any other thing), and the (real) thing in its fullness. [505]

¹This refers to *ātmīyatvabuddhi* mentioned in verse 504 and also *mameti buddhi* in verse 510 below.

अहिनिल्वयनीवाचा सर्पनिर्मोक उच्यते ।
मृता सत्यहिना न्यस्ता वल्मीकान्तर्बिलाश्रये ॥५०६॥

By the word *ahinirivayani* is expressed the slough of a serpent and that being discarded by a serpent becomes dead and (remains) ¹ in its abode, viz. in the hollow of an ant-hill. ²

[506]

¹This is expressed in the word *satī*.

²This refers to the popular notion that a serpent resides in a big hillock/mound made by ants from particles of earth.

अहिदेहवियोगोऽत्र मृतशब्देन भण्यते ।
वल्मीकाश्रयणं तस्याः प्रत्यस्तेत्यभिधीयते ॥५०७॥

In this sentence, the word dead (*mṛta*) expresses the separation (of the slough) from the body of the serpent; and the word *pratyastā* expresses its being supported ¹ in an ant-hill. [507]

¹Actually, *āśrayaṇa* refers to a support but the slough cannot take a support in the way it lies therein.

अहिनर्मोकविषयो व्यापारस्तावदीरितः ।
निर्ममाहंकृतित्वं तु सर्पदृष्टान्तसंश्रयम् ॥५०८॥

Thus (or, to begin with *-tāvat*) the happening (lit. activity) in relation to the slough of a serpent is explained, and (the Ātman's) ¹ not having the sense of any of its belonging (lit. having no feeling like 'This is mine') and not having the ego has a place (only) in the example of the serpent. [508]

¹This refers to a man who has been liberated in his life, as said in verse 505 above.

बिले त्यक्तेऽहिना यद्वत्स्वनिर्मोके न पूर्ववत् ।
 निर्गच्छन्प्रविशन्सर्पो निर्मोकमनुरुध्यते ॥५०९॥
 नाहं ममेति वा बुद्धिस्तत्राहेरुपजायते ।
 तत्रैव वर्तमानस्य यथैवं प्रत्यगात्मनः ॥५१०॥
 संबन्धहेतोरुच्छित्तेरात्मसंबन्धवर्जितम् ।
 शेते शरीरं सूक्ष्मं च स्थूलं चैकात्म्यधीहनुतम् ॥५११॥

When a serpent has left its slough in an ant-hill it does not appear to go out of and enter into it as before and thus remains unconnected with the slough, [509]

that is to say, there does not arise on the part of the serpent in respect of it (viz. the slough) any feeling as 'I am this, this is mine'; similarly, in the case of the inner self which continues to be there in the body of that life, [510]

there remains its body, be it gross or subtle, covered (lit. concealed)¹ by the knowledge of its oneness with the Ātman, owing to the destruction of the cause of its relation (to the body) and also (because it is) devoid of any relation to the body (*ātmasambandhavarjita*). [511]

¹Cp. verses 519 and 520 below, for this use of the word *nihnute*.

अहिनिर्मोकदृष्टान्तदाष्टान्तिकमितीरितम् ।
 दाष्टान्तिकोऽर्थः सर्पस्य दृष्टान्तस्याथ उच्यते ॥५१२॥

Thus, there has been the statement made about the example of the slough of a serpent and what is (thereby) exemplified. Now is explained (or, described in full) the nature of what is exemplified in connection with the example of a serpent. [512]

In the verse, the words *atha ucyate* occur together without a Saṃdhi; the use of Sureśvara's avoiding Saṃdhi is to be

explained by SP as the reference to the sentence in the discussion (viz. the *pratīka* of it).

अहिनिर्मोकयोरत्र संगतिः पूर्ववन्मिथः ।
निषिध्यते प्रयत्नेन स्थितिर्नात्र विवक्षिता ॥५१३॥

Here (in this example) the mutual association of the serpent and its slough is denied as before, with a special effort¹ and mere existence (of the two in two different places) is not intended here. [513]

¹This consists in the use of the different attributive sentences in relation to the slough of a serpent. In relation to this, SP adds the following: *evam dārṣṭāntike 'pi mīthyābhimānākhyasambandhanīṣedho vivakṣito bhedenā sthitis tv avivakṣiteti śeṣaḥ*.

In verses 514-519 there is explanation of *athāyam aśarīro 'mṛtaḥ*.

प्रधानवादः प्राप्नोति यदि देहात्मनोः पृथक् ।
विवक्ष्यते स्थितिरिह न्यषेधि बहुशः स च ॥५१४॥

(An objection might be raised:) 'If this¹ existence of the body and the Ātman as two distinct things is intended, then that leads to (the acceptance) of the theory of the Sāṃkhyas (*pradhānavāda*).²' (The answer is: 'No, this is not so) that is many times rejected (by the Śruti)'. [514]

¹That is, in the statement of a person who has attained the knowledge of the Ātman and, therefore, liberation in this very life (*vidyāvasthā*).

²According to the Sāṃkhya *pradhāna*, i.e. *avyakta prakṛti* is the cause of universe.

हेत्वर्थे त्वथशब्दोऽयं हेतुवतेः प्रकृतत्वतः ।
सकारणस्य देहस्य त्यागो हेतुर्विवक्षितः ॥५१५॥

This word *atha* is for conveying the sense of reason, because the statement of reason is what is to be stated as a matter of course; (hereby) is intended to express (a person) abandoning the notion of having this body together with its cause, i.e. ignorance. [515]

स्रगज्ञानमनादाय नाहियोगः स्रजो यथा ।
प्रतीचो देहसंबन्धो नात्माज्ञानादृते तथा ॥५१६॥

As there cannot be (entertained) the notion of a serpent in the place of a wreath, unless one accepted ignorance about (the true nature of) the wreath; so also, there cannot be (accepted) the connection of the inner self with the body without ignorance. [516]

प्रत्यग्ज्ञानशिखिध्वस्ते मिथ्याज्ञाने सहेतुके ।
नेतिनेतिस्वरूपत्वादशरीरो भवेत्ततः ॥५१७॥

Then, after the false knowledge, together with its cause (i.e. ignorance), is burnt (lit. destroyed) by the fire in the form of knowledge (about the nature) of the inner self, there would be the bodiless Ātman (known/established) to have the form (i.e. to be describable) in the words *neti neti*. [517]

This explains the meaning of the word *atha* by way of repetition and *aśārīra* as an attribute of the Ātman.

स्वतोऽदिग्देशकालादेः प्रत्यक्चिन्मात्रवस्तुनः ।
देशादिमच्छरीरेण न संबन्धस्तमो विना ॥५१८॥

There cannot be any connection of the (real) thing (which consists only in) the inner self that is not delimited by direction, region, time etc. with a body which is possessed of region etc., (unless that has known the limitation on it by its own nature), that there exists darkness, viz. ignorance. [518]

कल्पितेनाभिसंबन्धो न ह्यकल्पितवस्तुनः ।
अज्ञानकालेऽप्यस्तीह किमुताज्ञाननिहनुतौ ॥५१९॥

Indeed, there cannot be any connection of a really existing thing with what is (merely) imagined even in the state of ignorance; what then to say (that it is not) here in (i.e. this context of) concealment of the ignorance. [519]

Verses 520-522 discuss the Mādhyandina reading *anasthiko 'śarīraḥ prājña ātmā ... brahmaiva loke eva samrāt*.

अनस्थिकगिरा स्थूलदेहस्येह निवारणम् ।
तथाशरीरशब्देन सूक्ष्मो देहो निषिध्यते ॥५२०॥

In (or, By) the word *anasthika* (of the Mādhyandina recension), there is here (in this statement) rejection of the gross body; so, also, in (or, by) the word *aśarīra*, there is the rejection of the subtle body. [520]

In the Kāṇva recension the word *anasthika* is not read.

सूक्ष्मदेहनिषेधोक्त्या स्थूलस्यापि निषेधतः ।
तन्निषेधाय यत्नोऽतः काण्वश्रुत्या न भण्यते ॥५२१॥

(With reference to this Sureśvara says:) By the statement of the rejection of the subtle body, therefore, there follows (or, is easily understood) the rejection of even the gross body; there is not stated in the Śruti of Kāṇvas any specific expression for the rejection (of the same). [521]

यद्वाशरीरशब्देन तच्छ्रुतौ लिङ्गनिहनुतिः ।
स्थूलस्यामृत इत्युक्त्या निषिद्धत्वात् निहनुतिः ॥५२२॥

Or perhaps. in (or, by) the word *aśarīra* in that recension there is conveyed the rejection (lit. concealment) of the subtle form, since being denied there is not the rejection of the

gross body by (the use of) the word *amṛta*.

[522]

This is some justification offered regarding the meaning conveyed in verse 520 above.

SP states in this context the Mādhyandina recension *viśeṣaṇadvayārtho 'mṛtaśrutau piṇḍīkr̥tyocyate*. Also it states the reason for the Kāṇva recension which does not state any rejection thus, according to the rule, *yaś cārthād artho na sa codanārthaḥ*.

Verses 523-525 explain the *śruti prāṇo brahmaiva*.

साक्षिणः प्राणशब्देन विशेष्यस्याभिधेयते ।
ब्रह्मैवेति तु शब्देन तद्विशेषणमुच्यते ॥५२३॥

By the use of the word *prāṇa*,¹ it is accepted that the one, who is to be qualified is the witness. And, in the expression (lit. words, *śabda*) *brahmaiva*, there is stated the predicative expression about that (i.e. the witness).

[523]

By *viśeṣaṇa-viśeṣya* one should not understand grammatical substantive and its adjective. There is reference only to the accepted practice of predicating something of any other thing(s).

¹This refers to the individual self in verse 526 below.

साक्षिणः सद्वितीयत्वं ब्रह्मणश्च परोक्षताम् ।
तद्वेतुप्रतिषेधेन वाक्यमेतन्निषेधति ॥५२४॥

This sentence rejects the notion of the witness as being with a second and of the Brahman as being beyond perception, i.e. through the rejection of the causes of the same.

[524]

In the statement *prāṇo brahmaiva*, we find that the words *prāṇa* and *brahman* are put in the same case (*samānādhikaraṇa*); therefore, there is explanation necessary of the same, as given in this verse.

नामोपक्रममाशान्तं प्राणकारणसंश्रयम् ।
प्राणो ब्रह्मेति वचसा तदात्मनि निषिध्यते ॥५२५॥

By the expression (i.e. statement) *prāṇo brahmaiva* is denied in the context of the Ātman the resorting to *prāṇa* as its cause, which begins with (the mention of) the name and ends in that of the quarters. [525]

Verses 526 and 527 explain the significance of *teja eva*.

ब्रह्मात्मनोश्च संसर्गो मा प्रापत्कृष्णसर्पवत् ।
इत्यर्थं तेज एवेति श्रुतिः संसर्गवारिणी ॥५२६॥

In order that there should not occur (the idea of) any connection between the Brahman and the Ātman (the individual self),¹ as between (the property) dark colour and a serpent, there is the statement in the Śruti *teja eva*, and which averts (such) connection. [526]

SP refers to *tasya bhāsā ... sarvam idaṃ vibhāti* (Kāthopaniṣad 5.15; Muṇḍakopaniṣad 2.2.11; Śvetāśvataropaniṣad 6.14). This serves to avoid the notion of any relation between *prāṇa* and *brahman* as an attribute and a substantive. The addition of *teja eva* is helpful in understanding *prāṇa* as *tejas* and therefore it is not only an attribute of the Brahman.

¹This is what is earlier referred to as *prāṇa* in verse 523.

व्यावर्त्यभेदादाभाति भेदो ब्रह्मात्मशब्दयोः ।
वस्तुतस्त्वेक एवात्मामानित्वादिर्यथा तथा ॥५२७॥

There (is accepted) a difference (of signification) in the expressions *brahman* and *ātman* on account of (the effort of the speaker for) achieving distinction (between the two); however, in reality, there is only one single Ātman (and the Brahman does not exist apart from it), as it is mentioned by the use of the expression *amānitva* etc. [527]

Verses 528-530 bring out the import of the twofold use of the word *eva*.

ब्रह्मैव तेज एवेति ह्युभयत्रावधारणम् ।
संसर्गप्रतिषेधार्थं मा भूत्रीलोत्पलादिवत् ॥५२८॥

In the words *brahmaiva* and *teja eva*, there is, at both places, the specification for the purpose of averting the idea of any contact (between them), lest it might occur/arise as (it does) in the word *nīlotpala*. [528]

सर्वानर्थैकबीजस्य प्रत्यगज्ञानरूपिणः ।
कार्योऽत्र वचसा बाधः केवलो नान्य इष्यते ॥५२९॥
यस्मादेतत्स्वतो बुद्धमतः शुद्धमसंगतेः ।
मुक्तं चातः स्वतो वस्तु किमन्यत्कार्यमिष्यते ॥५३०॥

Here by the statement of the Śruti, there is expected (the idea of) only the stultification of the seed of all the undesired (effects) which is of the form of ignorance regarding the inner self and no other (stultification) is kept in view.¹ [529]
Since this is so, (it is accepted) that (the real) thing is, by its own nature, awakened and, therefore, pure owing to its being non-attached and (thus) ever liberated—what other effect is then sought to be achieved? [530]

¹The statement of the purport of the following sentence *atha* ...; viz. BU 4.4.7.

Verses 531-536 state that the knower (of the Brahman) has acquired all that is to be achieved.

कृतं चिकीर्षितं सर्वं बुद्धं यच्च बुभुत्सितम् ।
आप्तं बोधात्तथाप्तव्यं वर्जनीयं च वर्जितम् ॥५३१॥

(In the state of liberation) there is accomplished all that is

sought to be accomplished (by an individual), also known whatever is sought to be known, and obtained, through knowledge, all that is to be obtained, and avoided whatever is to be avoided. [531]

कामप्रश्नः समाप्तोऽतो निराकाङ्क्षोऽभवन्नृपः ।
सोऽहं सहस्रमित्याह तस्मादेव च कारणात् ॥५३२॥

Thus, there is here the conclusion in respect of the question about desires; therefore, the king (now) became one without any (more) expectation. Then (i.e. for that reason) only, he said, 'May I (offer you) a thousand?' [532]

ननु प्रश्नः समाप्तश्चेन्नादात्सर्वं स किं नृपः ।
सहस्रमेव तु प्रादादेकदेशोक्तिवत्कथम् ॥५३३॥
मतं विद्यारसाकृष्टो विद्यां भूयोऽपि चेन्नृपः ।
शुश्रूषति तदर्थं च सहस्रं मुनये ददौ ॥५३४॥
शुश्रूषालिङ्गमेतत्स्यान्न त्वियं गुरुदक्षिणा ॥५३५॥
सर्वस्वं चेदहं दद्यामिहैव च तदा मुनिः ।
निवृत्तकामं मां मत्वा विद्यां भूयो न वक्ष्यति ॥५३६॥

(A doubt arises:) 'Indeed if the question about desires is thus concluded, why did the king not give (away) all? Instead he gave only a thousand! Why only a part of the promised present?' [533]

'If it is held that the king, being overwhelmed by his thirst (or, longing) for acquiring the lore (of the Brahman), wished to hear about it yet again; and, therefore, he gave away to the sage thousand, and [534]

this would be the indication of his desire to hear but (was) not this the fee to be given to the preceptor?' [535]

(His thought would be:) If I were to give all of my belongings; then the sage would think that I have stopped having any more desire (and) would not instruct me again. [536]

Verses 537-541 state a hypothesised explanation of the king's small gift and its rejection.

इत्येतस्माद्भयाद्राजा श्लोकशुश्रूषयेरितः ।
प्रादात्सहस्रमेवास्मै शुश्रूषालिङ्गवित्तये ॥५३७॥

'With this apprehension in mind, the king, prompted by a desire to hear (more about) the *śloka*, gave only a thousand (cows) for conveying (that to the sage), so that he knew the desire (on his own part) for hearing (more).' [537]

इति चेन्नैतदेवं स्याच्छ्रुतेः प्रामाण्यकारणात् ।
श्रुतौ न युक्ता व्याजोक्तिरप्रमाणनरोक्तिवत् ॥५३८॥

(The answer is:) 'If this is so held, it would not be so, since the Śruti is always authoritative; in respect of the Śruti, it is not reasonable to hold (that it would make) some statement under certain pretext which would be like the statement of a human being which is not as much authoritative (as the Śruti)'. [538]

The Śruti is held to make a direct statement and not any indicative statement which may be made by a human being.

संभवाच्चार्थशेषस्य सर्वसंन्यासरूपिणः ।
प्राग्यथोक्तात्मविज्ञानसाधनस्येह चाश्रवात् ॥५३९॥

'Moreover, there is the possibility of yet more of the thought to be conveyed in respect of what is about total renunciation, since there is not heard here (in this Śruti) (any mention of) the means to achieving the specific knowledge (*vijñāna*) of the Ātman as it was stated before.' [539]

यत एवमतोऽयुक्ता पुनरुक्तार्थकल्पना ।
गतौ सत्यामनृज्वीयं नापि विद्यास्तुतिर्मता ॥५४०॥

‘Since this is so, it is unreasonable (to hold) the notion of repetition of the matter (*artha*); so also this praise of the lore of the Brahman should not be considered as not following in smooth course (*anrjvī*), when there has been a way (of explaining the situation mentioned in the Śruti).’ [540]

This refers to BU 3.5.1 for *śama* etc. in relation to this praise. Read SP (which explains the meaning thus): *na tāvat saṃnyāso vidyāstutir viditvā vyutthāyeti samānakartṛkatvanirdeśāt—uktaṃ caitat pañcame nāpi śamādi vidyāstutis tatrāpi vidher vakṣya-mānatvād iti.*

ननु यद्यर्थशेषोऽस्ति कस्माद्ब्रूते न पूर्ववत् ।
विमोक्षायैव मे ब्रूहीत्यदोषोऽयं कुतो यतः ॥५४१॥
विमोक्षायैह नैवालमन्यदात्मावबोधतः ।
मुक्तस्य च मुमुक्षोश्च सर्वत्यागव्यपेक्षतः ॥५४२॥

(Yet another objection:) ‘But indeed if something yet remained to be said, why does not the Śruti state it (even) as before? Tell me, “this is for liberation,” for that would be faultless; why (this way)?’ (The answer:) ‘Since [541] anything else than the knowledge of (the nature of) the Ātman is not sufficient for attaining liberation and because, in the case of both the liberated and the one seeking liberation, there is need of abandoning everything’. [542]

In this context, read SP: *muktena mumukṣuṇā ca saṃnyāso ’pekṣyate tasya muktisāadhanatve na sa muktena mumukṣuṇe-vāpekṣyeta sādhyābhāvād ity arthaḥ.*

It is to be noted incidentally that in verse 542 onwards, there is reference to the subsequent Śruti which, as BUB states, is for prescribing Saṃnyāsa for both the *mumukṣu* and the *mukta*.

स्वरूपसाधनत्वाभ्यां त्यागस्यैवान्तरङ्गतः ।
नापूर्ववद्विधेयत्वं न च त्यागाद्विमुक्तता ॥५४३॥

For the reason that renunciation is only a part (of liberation) owing to its being the nature of and means to it, that should not be considered as what is to be prescribed like (any means of attaining) *apūrvā*; so also, liberation does not result from renunciation.¹ [543]

This last argument is to answer away the objector's stand on the basis of another Śruti statement.

¹*tyāgenaike amṛtatvam ānaśuḥ (Taittirīya Āraṇyaka 10.10.3).*
Also cf. SV 215: *tyāga eva hi sarveṣāṃ mokṣasādhanaṃ uttamam.*

प्रागात्मज्ञानसंभूतेः संन्यासो ज्ञानसाधनम् ।
उत्पन्नात्मधियः पश्चाज्ज्ञानमेव हि तत्तथा ॥५४४॥

Indeed (*hi*), before the rise of the knowledge of (the nature of) the Ātman, renunciation is a means to (that) knowledge and, in the case of one in whom the knowledge of the Ātman, has arisen, only knowledge is that (means to renunciation). [544]

Read SP in this context: *sarvakarmatyāgātmakam pārvirājyaṃ tad ity ucyate vividiṣāsaṃnyāsasya dhīhetutvavad itarasya phalātmam tathāśabdārthah.*

In verses 545-560, there is the exposition of BU 4.4.8.

उक्तब्रह्मविदो मोक्ष इत्यर्थे ब्राह्मणोदिते ।
श्लोका अपि भवन्त्यत्र ब्राह्मणोक्तविनिश्चितौ ॥५४५॥

After it is pointed out that the Brāhmaṇa text has stated about liberation in the case of the knower of the Brahman, as said, there are, in this respect, verses also for ascertaining what was said by the Brāhmaṇa text. [545]

अणुस्थूलादिनिःशेषविकल्पातिक्रमादयम् ।
अणुरात्मैकयाथात्म्यज्ञानं पन्थाः पुरातनः ॥५४६॥

Securing the knowledge of the true nature of this Ātman as atomic in size, after its having transgressed various concepts such as atomic in size, gross etc. in their entirety (and) this then is (the way known as) the path (to liberation) since the days of yore. [546]

अनन्तात्मैकमेयत्वाद्विततश्चातिविस्तृतः ।
अनुत्पन्नागमोत्थत्वात्पुराणश्चेति शब्दघटे ॥५४७॥

And it is said to be extensive, i.e. to have spread to a very wide extent, on account of its having the only object of knowing, what is infinite; and is stated in the word *purāṇa*, because of its not being produced and also of having its rise in traditional scripture (alone). [547]

Verses 548-560 refer to the reading in the Mādhyandina recension vitara for vitata of the Kāṇva recension (so it is pointed out in BUB).

तरन्त्यनेन विस्पष्टं संसारानर्थसागरम् ।
यतोऽतो वितरः पन्थाः प्रत्यग्बोधोऽभिधीयते ॥५४८॥

Since they cross over the ocean of the undesired transmigration with certainty (*vispaṣṭam*) by this one (i.e. the knowledge about the Ātman); therefore, here is mentioned the knowledge about the inner self as *vitara*, the path (for crossing over misery). [548]

मां मुक्त्वासंभवो यस्माद्ब्रह्मार्थस्यात उच्यते ।
मां स्पृष्टो मामनुप्राप्त एष पन्था यथोदितः ॥५४९॥

Since setting aside *mām* 'me' there is no possibility of the existence of the (real) thing, the Brahman; therefore, there is the statement made *mām sprṣṭaḥ*, in the sense of *mām anuprāptaḥ*; this is the path as told. [549]

SP has taken care to draw attention to the Saṃdhi of *muktvā* and *asambhavaḥ* in *muktvāsambhavaḥ*.

शास्त्राचार्योक्तितः पश्चादनुवित्तो मयैव च ।
ज्ञेयाज्ज्ञाता परो नास्ति प्रत्यग्ज्ञाने यतस्ततः ॥५५०॥

Since (it is first) known from the statement, i.e. teaching of the preceptor and of the scriptures and later known accordingly (*anuvittah*) by me (through *manana* etc.), (therefore) the knower is not beyond the object of knowing after there has resulted the knowledge of the inner self. [550]

Read SP: *brahmajñeyam brahmanvijñātā tayoḥ abhedād avadhāraṇam ity arthaḥ*.

प्रागप्यवोचं बहुश इममर्थं यथोदितम् ।
श्रुतितो न्यायतः स्पष्टं नात्मनोऽन्योऽस्ति वेदिता ॥५५१॥

Even earlier have I many times spoken about this very thing, as stated here; (this matter has been made) clear from the Śruti (-statements) and on the basis of reasoning,¹ that there is not any other knower than the Ātman. [551]

Cf. BU 3.7.23.

¹Cf. SP: *nyāyataḥ pratīco 'nyasya ghaṭavan na draṣṭṛtetyāder ity arthaḥ*.

तेनानेन पथा धीराः प्रत्यग्ध्वान्तच्छिदा सदा ।
ब्रह्मापियन्ति निर्द्वन्द्वा आप्तमेव तमोहनुतेः ॥५५२॥

By this way, which destroys the darkness about the inner self, the wise ones, having risen above duality (*nirdvandva*), ever attain to the Brahman, which is already obtained, by the removal (lit. concealment) of darkness (i.e. ignorance). [552]

आत्मैव ब्रह्म चात्मापि ब्रह्मैव स्याद्यतः स्वतः ।
तद्याथात्म्यापरिज्ञानात्तद्विपर्ययधीरियम् ॥५५३॥

Since the individual self is the Brahman and so also the Brahman itself is the individual self; therefore, there arises, on its own, this knowledge; the reversal of the two, viz. (the knowing that) the Brahman and the individual self (are distinct) arises from the absence of the complete (*pari*) knowledge of the true nature of the two (i.e. their oneness). [553]

This verse points to the purpose of *āptam eva* in the preceding verse.

निःशेषमिथ्याविज्ञानहेत्वविद्याविनाशकृत् ।
नान्योऽस्ति ब्रह्मसंबोधाच्छ्रुतिस्तेनेत्यतोऽवदत् ॥५५४॥

There cannot be anything else than the knowledge about the Brahman that effects the destruction of ignorance which is the cause of the false specific knowledge in its entirety; therefore has the Śruti stated this, viz. *tena*. [554]

स्वर्गोऽयमेव प्राग्वतः स्वर्गकामवचस्यपि ।
कर्मभिस्तदसिद्धेर्हि वेदान्तज्ञानसिद्धितः ॥५५५॥

Earlier (also), while making a statement about one desirous of heaven, it is pointed out (by the Śruti). 'This itself is heaven'; and since that cannot be attained (or secured) through (the performance of ritual) actions, (it is obtained) by securing the knowledge from the Vedānta text(s). [555]

Cf. BU 4.3.22; here is distinguished liberation as heaven from the commonly known heaven in the Vedic part of rituals.

परमानन्द एवातः स्वर्गशब्देन भण्यते ।
मोक्षप्रकरणान्नित्यः क्रियोत्थोऽतो न गृह्यते ॥५५६॥

For this reason only is understood (or, is expressed) by the word *svarga*, the highest delight. Therefore, since the topic is that of liberation, the eternal (*svarga*) is not taken to be one which has originated by (the performance of ritual) act. [556]

In BU 4.3.22, the reference is to the highest delight in liberation, though mentioned by the word *svarga*, since the topic (*prakaraṇa*) is that of liberation and any ritualistic idea is not to be entertained.

इत उक्तात्मसंबोधमोहोच्छित्तेरनन्तरम् ।
स्वत एव यतो मुक्ता मुच्यन्तेऽतस्तमोहनुते ॥५५७॥

Thus, after the destruction of delusion through the knowledge of the Ātman, which has been stated as from this (i.e. the Vedānta text), the liberated ones have attained liberation automatically by the removal of darkness. [557]

The verse explains the words *itah*

देहपातव्यपेक्षा स्याद्यत्र कारणसंगतिः ।
सर्वकारणविध्वस्तौ नान्यद्बोधादपेक्ष्यते ॥५५८॥

Where (however is understood) association with the cause (i.e. ignorance), there is dependence on the fall of the body; (but) when there is destruction of the cause in its entirety (*sarva*), nothing else than the knowledge of the Ātman is required (lit. expected). [558]

मुक्तौ तमोतिरेकेण नान्तरायोऽन्य इष्यते ।
यतोऽतोऽज्ञानविध्वस्तौ मुक्तः सत्रा विमुच्यते ॥५५९॥

Since it is not accepted that, in respect of liberation, there is any hindrance other than darkness (i.e. ignorance); therefore, after there is destruction of ignorance, a person becomes

liberated, that is, he attains liberation.

[559]

ब्रह्मैव सन्निति तथा प्रागपीदं श्रुतीरितम् ।
देहपातव्यपेक्षातो न स्यादूर्ध्वश्रुतेरिह ॥५६०॥

Even earlier there has been made this (very) statement in the Śruti, *brahmaiva san* ...; therefore, because of the statement *ūrdhvam* in this Śruti, there is not here¹ the need of (i.e. dependence on) the fall of the body. [560]

¹That is, for the attainment of liberation.

Verses 561-597 are the explanation of BU 4.4.9.

मोक्षमार्गे यथोक्तेऽस्मिन्नविद्योपप्लुताशयाः ।
दर्शनानि विचित्राणि कल्पयन्ति यथारुचि ॥५६१॥

In the context of (lit. in respect of) the way to liberation which is already stated, those who have been affected in mind by ignorance entertain various theories (or, notions), and (describe the same) according to their liking. [561]

शुक्लं ब्रह्मातिसंशुद्धमिति केचिद्विनिश्चिताः ।
शरदि व्योमवन्नीलमित्याहुरपरे जनाः ॥५६२॥
पिङ्गलं तत्परं ब्रह्म वह्निज्वालेव शाश्वतम् ।
वैदूर्यवच्च हरितं केचिदाहुर्विपरिचतः ॥५६३॥
अपरे लोहितं प्राहुर्जपाकुसुमसंनिभम् ।
यथा रूपे तथा ज्ञेया शब्दादिष्वपि कल्पना ॥५६४॥

Some (of them) have decided that the Brahman is bright and extremely pure; others have said that (it is) blue like the sky during autumn. [562]

And some wise ones have said that the highest Brahman is eternally tawny like a flame of fire, while some (others among them) have described it to be green (blue?) like the jewel *vaidūrya* 'the cat's eye gem'. [563]

(Yet) others have described it to be red and similar in colour to *japā* flower. Thus, about the colour (of the Brahman), so there has to be understood, in respect of sound (referring to the Brahman), (a similar variety of) notion. [564]

Verse 562 has a reference to CU 8.6.1; this is also a reference to the various veins in the human body through which there is the journey of the consciousness to attain the Brahman.

Verse 563 refers to BU 4.2.3.

Verse 564 refers to BU 4.3.20.

अविद्यापटसंवीतचेतसामागमादृते ।
कामापहतबुद्धीनामेवमाद्या विकल्पनाः ॥५६५॥

These and such ones are the various notions of those whose intellects have been overwhelmed by desires and whose minds (*cetas*) were wrapped by the band of ignorance, (that is when there is) the absence of traditional learning (*āgama*). [565]

एकमेवैकरूपं सद्वस्त्वज्ञातं निरञ्जनम् ।
जात्यन्धगजदृष्टयेव कोटिशः कल्प्यते मृषा ॥५६६॥

Thus, the existent only reality, which is untainted, of only one form and is falsely conceived in numerous (lit. krores of) ways, as it happens in the case of the born-blind men's seeing an elephant.¹ [566]

SP gives ingenuous reasons for the different attributes assigned to the Brahman.

¹This is a reference to the known story of some blind men seeing an elephant and entertaining various notions about its form. Possibly, this is based on the then known Jaina story (or, folklore?).

अस्थूलाशब्दनेतीति सर्वमात्रादिनिहनुतेः ।
कुतोऽकारणकार्येऽस्मिञ्शुक्लादेः संभवः परे ॥५६७॥

How can there be the possibility (of any colour) such as white in respect of the highest (Brahman), which is not (associated with) cause(s) and effect(s), since there has been the rejection (or, denial) of all the means of knowing etc.,¹ as expressed in the words *asthūla, aśabda, neti* (etc.). [567]

¹This refers to the agent etc., i.e. *mātr, māna* and *meya*.

यस्तु वेदोदितोपायक्षपिताशेषकल्मषः ।
ब्रह्मणैवानुवित्तोऽयं तेन पन्था गुरुवित्ततः ॥५६८॥

This path has been experienced (lit. known) through faith in (lit. devotion to) the preceptor, by a person himself, i.e. a Brāhmaṇa,¹ (he) who has wiped away (lit. destroyed) the entire (mass of) sin by (various) means prescribed in the Vedas. [568]

¹Cf. SP: *brahmaśabdena brāhmaṇo gṛhyate*; here, *brāhmaṇa* is *anuvittah*, i.e. *brahmavittam asya iti brahmavittah*.

अव्यावृत्ताननुगतब्रह्मरूपातिरेकतः ।
न रूपमात्मनोऽस्त्यन्यच्छ्रुतिन्यायानुभूतितः ॥५६९॥
यतोऽतो ब्रह्मणैवायं पन्था ज्ञातः प्रमाणतः ॥५७०॥
ब्रह्मणैवेति च ज्ञेया इत्थंभूतार्थलक्षणा ।
तृतीयेयं न कर्त्रादौ प्रतीचि तदसंभवात् ॥५७१॥

Since there is not any form of the Ātman (i.e. individual self) other than (or beside) the form of the Brahman, which is neither distinguished from nor similar to (any other thing); (this is known) from the Śruti, reasoning and experience; [569] therefore, this path (to liberation) is known through the Brahman itself, as known from the authoritative means, [570] the word *brahmaṇā*¹ there should be understood (as instrumental form) in the sense of the characteristic of what the thing (i.e. the person) has become; this instrumental case

is not to be understood (lit. used) to convey the sense of an agent etc.,² (for) that (use) is not³ possible in the case of the inner self. [571]

¹SP points out that in verses 570 and 571 *brahmaṇaiva* are not to be considered as the words from the Śruti; the Samdhi *brāhmaṇā* and *eva* is for the sake of metre, used by Sureśvara himself. The specification by *eva* is not intended by the Śruti.

²This refers to the means of knowing (*karāṇa*).

³That is, it is *akāraka* 'not related to any activity'. This is clarified in the next verse. Read yet SP: *hastena śareṇa rāmeṇetivat kartrādaḥ kiṃ na syād ata āha neti*.

क्रियाकारकभेदोऽयं प्रत्यगज्ञानहेतुजः ।
यतोऽतो न तृतीयेयं कर्त्रादाविह युज्यते ॥५७२॥

Since this distinction of action and its means is the effect of the cause, viz. ignorance about the inner self; therefore, this instrumental case is not used to convey the sense of the agent etc. [572]

ब्रह्मात्मनोरभिन्नत्वं वस्तुतो यद्यपीक्ष्यते ।
अनन्तानर्थसंप्राप्तिस्तथापि तदबोधतः ॥५७३॥

Even if there is really accepted non-distinction of the Brahman and the individual self, still there is occurrence (*samprāpti*) of infinite variety of the undesired things,¹ owing to ignorance about that (non-distinction). [573]

¹This refers to transmigratory existence of different lives.

तथा च यदि नाम स्याद्यथोक्तज्ञानपूर्वकम् ।
पराक्सर्वार्थविज्ञानं वस्तुवृत्तानुरोधतः ॥५७४॥

Further, if indeed that were so, as preceded by the knowledge (of it) which is stated; then there could have been, in

accordance with the nature of the things, specific knowledge of all external objects. [574]

तथाप्यब्रह्मवित्तेन न कैवल्यं पथैति तत् ।
तेनैति ब्रह्मवित्तस्मान्नान्यः पन्था इति श्रुतेः ॥५७५॥

Even thereby¹ a person would not be a knower of the Brahman;² one does not attain to that Brahman (lit. the state of singleness) by that (knowledge). A knower of the Brahman goes by that path (as told in the Upaniṣad)—there is no other way (to attain to the Brahman)—so it is learnt/known from the Śruti. [575]

¹This reference is to *parāksarvārthavijñānam* in verse 574 above.

²Cf. note 1 on verse 568 above.

Sureśvara explains in verses 576-578 the meaning of the word brahmavit.

ब्रह्मवित्त्वे च को हेतुरित्याशङ्क्याह नः श्रुतिः ।
पुण्यकृतैजसश्चेति भवेद्ब्रह्मविदुत्तमः ॥५७६॥

Having entertained a doubt as to what could be the cause of being a knower of the Brahman,¹ the Śruti has stated the words *punyaḥkṛt taijasaś ca* the knower of the Brahman would thus become excellent, i.e. liberated. [576]

¹Cf. note 1 on the verse 568 above.

पुण्यकृज्जायते यस्माच्छुद्धधीरिह मानवः ।
शुद्धसत्त्वोऽथ तद्ब्रह्म साक्षादात्मनि पश्यति ॥५७७॥

Since (in this context of the attainment of liberation) a human being, who has done meritorious deeds, becomes pure in the intellect; therefore, being pure in his being, he then verily

sees in his inner self that Brahman.

[577]

तेजःशब्देन संशुद्धं सत्त्वमेवाभिधीयते ।
तस्मिन्भवस्तैजसः स्यात्प्रत्यक्प्रवणधीर्नरः ॥५७८॥

By the word *tejas* is expressed only the extremely pure being; (therefore), one produced from that (*tejas*) would be *Taijasa*,¹ i.e. 'a person who has turned (or, is inclined) towards understanding the inner self'.

[578]

¹Cf. verse 581 below.

ज्ञानमुत्पद्यते पुंसां क्षयात्पापस्य कर्मणः ।
यथादर्शितलप्रख्ये पश्यत्यात्मानमात्मनि ॥५७९॥

There arises knowledge on the part of human beings after there is complete removal of their sinful activity, so that a human being sees the Ātman, in his inner self, in the way as (one sees oneself) in the clean surface (*prakhya*) of a mirror.

[579]

गामैर्होमैर्जातकर्मचूडामौञ्जीनिबन्धनैः ।
महायज्ञैश्च यज्ञैश्च ब्राह्मीयं क्रियते तनुः ।
योगिनः कर्म कुर्वन्ति सङ्गं त्यक्त्वात्मशुद्धये ॥५८०॥

"By making offerings in relation to a body of the foetus, the performance of Jātakarman, Cūḍākarma and Upanayana,¹ and by sacrifices big and small, this body (of a human being) is turned into that of (i.e. fit to be) the Brahman."² (Also), "The yogins perform activities after giving up attachment (of every kind), in order to purify themselves."³

[580]

¹*Manusmṛti* 2.27ab.

²*Manusmṛti* 2.28cd.

³*Gītā* 5.11cd.

Verses 581-582 state another meaning of punyakṛt.

योगी वा तैजसोऽत्र स्यात्प्रत्यग्दृष्टौ समर्थतः ।
विषयाकृष्टधीर्यस्मात्र क्षमः प्रत्यगीक्षणे ॥५८१॥

It is only Yogins or a Taijasa¹ who would have the capability for seeing (the true nature of) the inner self, since a person who has his intellect attracted towards the (external) objects is not capable of seeing the inner self. [581]

¹Cf. verse 578 above.

सर्वभूतस्थमात्मानं सर्वभूतानि चात्मनि ।
ईक्षते योगयुक्तात्मा सर्वत्र समदर्शनः ॥५८२॥

“A person, who has devoted himself to Yoga, sees the Ātman residing in all beings and also all the beings in his inner self; (thus), having one and the same attitude towards (i.e. outlook on) all everywhere.” [582]

This is a verse from *Gītā* 6.29.

Verses 583 and 584 adduce the supporting Śrutis for a Taijasa of purified citta.

इत्येवं स्मृतयः सन्ति श्रुतयश्च सहस्रशः ॥
कर्मभिः शुद्धसत्त्वस्य सम्यग्ज्ञानस्य जन्मनि ॥५८३॥

There are thus various Smṛti texts and also the Śruti statements, in thousands, (pertaining to) the rise of the proper knowledge in the case of a person who has purified his being through the performance of actions. [583]

In this verse, Sureśvara states the general purport of the Smṛtis and the Śrutis. There is a stress on *cittaśuddhi* through (Vedic) rituals.

यस्मिन्विशुद्ध इत्येवं सत्त्वशुद्धौ ध्रुवा स्मृतिः ।
तमेतमिति च स्पष्टं श्रौतानि च वचांसि नः ॥५८४॥

In the words *yasmin viśuddhe* (*Muṇḍakopaniṣad* 3.1.9), and so also in *sattvaśuddhau dhruvā smṛtiḥ* (CU 7.26.2) and further in *tam etam* (BU 4.4.22), there are, for us, clear statements from the Śruti.¹

[584]

The verse justifies reference to the Śruti texts in the preceding verse.

¹SP observes on this: this use of *ca* is to commence the statement *yena kena cana yajeta* with what are actually stated above.

This verse states the result for puṇyakṛt and taijasa.

प्रसिद्धमहिमानौ वा पुण्यकृद्योगिनाविह ।
ब्रह्मवित्स्तूयते ताभ्यां ब्रह्मविद्याप्रवृत्तये ॥५८५॥

In this world,¹ those who perform meritorious deeds and the Yogins have their greatness known (to all); and the knower/-experiencer of the Brahman is praised by them in order that they enter on (securing) the lore of the Brahman.

[585]

This is the gist of BU 4.4.9. Read SP: *yo brahmanavittam gacchati sa eva puṇyakṛt taijasaśceti brahmanavidas tābhyāṃ stutiḥ sā ca mumukṣūnām brahmanavidyoddeśena śravaṇādipravṛttāvupakarotīty arthaḥ.*

¹SP: *iheti jantumātroktiḥ.*

In verses 586-603 is presented the view of jñānakarīnasa-muccyavādins and its refutation.

इह केचिन्महात्मानः प्रत्यङ्मोहच्छिदा सह ।
पुण्यकृत्तैजसत्वाभ्यां ज्ञानेनाहुः समुच्चयम् ॥५८६॥

In this context, some great scholars¹ have posited (the theory of) the combination of being a performer of meritorious deeds and having a purified intellect by (the aquisition of) the knowledge about the Brahman which destroys ignorance about the inner self. [586]

Verses 586-589 explain the BU sentence *tena ...* according to those who hold the theory of *jñānakarmasamuuccaya*.

¹This is possibly the reference to Bhartṛprapañca or his followers.

पुण्यकृत्पुण्यकर्मा यो योगी तैजस उच्यते ॥५८७॥

By *punyaḥkṛt* is understood a Yogin who has done meritorious deeds and is (also) a Taijasa. [587]

This explains the *samuuccaya* understood by them, who are mentioned in the preceding verse.

ब्रह्मज्ञानैकनिष्ठः सन्पुण्यकृतैजसश्च सन् ।
शास्त्रोपदिष्टमैकात्म्यं शक्तो योगेन वीक्षितुम् ॥५८८॥

Being devoted only to (the acquisition of) knowledge about the Brahman and a performer of meritorious deeds and also (being a) Taijasa; he is able to see through (or, by means of) Yoga¹ the non-duality of the Ātman which is taught in the scripture. [588]

¹SP explains: *yogaḥ sādhanānām melanam*— see the next verse.

परस्परं व्यपाश्रित्य यथोक्तं साधनत्रयम् ।
एकार्थसिद्धयेऽलं स्यान्नान्यथेदं त्रिदण्डवत् ॥५८९॥

These three means together (to the acquisition of the knowledge) as stated (before) become effective, after having

depended on one another; otherwise, this triad would not be sufficient for acquiring the one object/end; like three pieces of straw.¹ [589]

¹The thatched wall of a hut (*kudyādi*) built up of straws, say three in number; but if these straws are taken singly they cannot be effective in building a hut. if only they are together, they are suitable for building a hut; in the same way, the three means, mentioned above, have to operate together—this is the idea of *jñānakarmasamuccaya* theorists.

Verses 590 and 591 are a brief refutation of jñānakarmasamuccaya.

समुच्चयोऽयमस्माभिर्यथाभाणि तथा यदि ।
व्याख्यायते न दोषः स्यात्तत्र मानस्य संभवात् ॥५९०॥

If this combination (of the three means) is explained in the way as we have said earlier, then there would not be any fault in it, for that can possibly be an/the authoritative means for securing liberation. [590]

इतोऽन्यथा चेद्व्याख्यानं क्रियते बुद्धिलाघवात् ।
दुर्निवारेह साप्नोति योक्ता दोषपरंपरा ॥५९१॥

If, however, another sort of explanation is offered, through weakness of intellect;¹ there occurs unavoidably a chain of undesired results which has been stated before. [591]

¹The original word *buddhilāghava* is significantly used with two senses, (i) strength of the intellect and (ii) weakness of the intellect—the first is only mockingly hinted at. Cf. SV 357ab: *vijñānakarmaṇos tredhā*.

अपुण्यपुण्योपरमे यं पुनर्भवनिर्भयाः ।
शान्ताः संन्यासिनो यान्ति तस्मै मोक्षात्मने नमः ॥५९२॥

“Salutation to Him, who is of the nature of liberation, the one whom they attain to; those who, after merit and demerit have ceased (to function/to produce results), have become free from fear of rebirths, the tranquil ones and the Saṁnyāsins.”

[592]

This is *Mahābhārata* 12.47.37.

त्यज धर्ममधर्मं च उभे सत्यानृते त्यज ।
उभे सत्यानृते त्यक्त्वा येन त्यजसि तं त्यज ॥५९३॥

“Give up both merit and demerit, both truth and untruth; having abandoned truth and untruth, abandon (even) that through (the help of which) you abandon the two.”

[593]

This is *Mahābhārata* 12.316.40.

निराशिषमनारम्भं निर्नमस्कारमस्तुतिम् ।
अक्षीणं क्षीणकर्माणं तं देवा ब्राह्मणं विदुः ॥५९४॥

“Deities have called (i.e. accepted) him a Brāhmaṇa, who does not have any hankering, who does not enter upon any activity, who does not come with salutation and praise, the unexhausted and he who has exhausted (i.e. got over) all the activities.”

[594]

This is *Mahābhārata* 12.255.33.

नैतादृशं ब्राह्मणस्यास्ति वित्तं
यथैकता समता सत्यता च ।
शीलं स्थितिर्दण्डनिधानमार्जवं
ततस्ततश्चोपरमः क्रियाभ्यः ॥५९५॥

“A Brāhmaṇa does not have any (other) wealth which is like his one-mindedness, equanimity, and truthfulness; (also)

exemplary conduct, demeanour, the discharge of the right to punish (or, non-violence?), and straightforwardness—from all of them (there is for him) the cessation of all activity (and its effects).” [595]

This is *Mahābhārata* 12.169.35.

अर्थस्य मूलं निकृतिः क्षमा च
कामस्य रूपं च वयो वपुश्च ।
धर्मस्य यागादि दया दमश्च
मोक्षस्य सर्वोपरमः क्रियाभ्यः ॥५९६॥

“The origin/source of wealth is insult and forgiveness and the nature of desire is beauty and form; that of Dharma is performance of sacrifice, compassion and control over senses; so also that of liberation is total keeping away (or abstinence) from (ritual) activities.” [596]

Verse 596 is reported to be a composition of Vyāsa as in the text. But no definite text is traceable.

इत्येवं स्मृतिशास्त्राणि सर्वत्यागपुरःसरम् ।
ज्ञानजन्माभिदधति तथा श्रुतिवचांसि च ॥५९७॥

This and such other various scriptures in the form of the Smṛtis speak about the rise of knowledge (about the Brahman) as preceded by renunciation of everything; so also are there the statements in the Śruti.¹ [597]

¹For example, BU 1.5.16: *na karmanā ...* (SP).

Verses 598-605 are explanation of BU 4.4.10.

ऐकात्म्यदर्शनादुक्ताद्यदन्यद्दर्शनान्तरम् ।
अन्धं तम इति श्रुत्या तदिहापोद्यतेऽखिलम् ॥५९८॥

Whatever be the view adopted by some person(s), other than what is already stated, viz. knowing (lit. seeing) the non-duality of the Ātman is, the whole of it, rejected by the Śruti in the statement *andhaṃ tamaḥ* (BU 4.4.10). [598]

तमोमोहादिभेदेन तमोऽनेकस्वलक्षणम् ।
यतोऽतोऽन्धं तम इति विशिनष्टि श्रुतिस्तमः ॥५९९॥

Since *tamas* 'darkness/ignorance' has various characteristics of its own, varying as want of knowing, delusion etc.;¹ therefore the Śruti specifies darkness as *andhaṃ tamaḥ* 'blinding darkness'. [599]

¹This refers to *mahāmoha*, *tāmisra*, *andhas* as varieties of darkness.

अन्धं मूढं तमो यान्ति येऽविद्यां समुपासते ॥
विरक्ता अपि संसारान्नैकात्म्यं ये विदुर्नराः ॥६००॥

Those, who devote themselves to what is really ignorance,¹ reach *andha tamas* where *andha* means delusion—(this refers to) even those men, who, though indifferent to or detached from the transmigratory world,² have not known the non-duality of the Ātman. [600]

¹This refers to those who continue to perform some meditations which also are some kinds of rituals.

²In connection with this, SP states *aviraktāḥ kevalakarminas tāmasaṃ dehaṃ gṛhṇanti viraktā daharādiparā rājasam iti bhedaḥ*.

संभतिवचसापीयमविद्यैवाभिधीयते ।
अविद्यातो हि संभूतिः सर्वस्य जगतो यतः ॥६०१॥

In (or By) the word *saṃbhūti* (of the Mādhyandina recension)¹ also, this very ignorance is meant (or, expressed); since (*hi*) the origin of the entire world is (only) from ignorance. [601]

¹*andhaṃ tamah praviśanti ye saṃbhūtim* where *avidyā* of Kāṇva is replaced by *saṃbhūti*.

ततो भूयस्तमो यान्ति ये विद्यायां रता जनाः ।
अणिमादावविद्योत्थे पराविचत्तया रताः ॥६०२॥

From that (i.e. the world) do they go to darkness again—they, i.e. the people, who are devoted to *vidyā* 'worldly knowledge'¹; (indeed) they are interested in such (*siddhis*) as² *aṇimā* 'minuteness' etc. which have arisen from ignorance, with their mind turned outwards (away from) reality. [602]

¹Cf. verse 603 and 604 below.

²For instance, *laghimā*, *mahimā*, ... *aiśvarya*.

ग्राह्यग्राहकभेदेन याविद्यामात्रकारणा ।
विद्येति सेह विज्ञेया नैकात्म्यप्रसमीक्षणम् ॥६०३॥

Here (in this context) *vidyā* is to be known as having a cause merely in *avidyā*, characterized together with distinctions such as *grāhya* and *grāhaka*; implying as this means not mindful of the non-duality (of the Ātman). [603]

This calls for an explanation of a term *vidyā* in verses 604-605.

कर्मार्थद्योतिका वेह विद्यात्राप्यभिधीयते ।
तस्यामभिरता ये स्युर्वेदान्तार्थानपेक्षिणः ॥६०४॥
विशन्त्यज्ञास्तु ते सन्तस्ततो भूयः परं तमः ।
मिथ्याज्ञानाधिकत्वेन भूयस्त्वं तमसो भवेत् ॥६०५॥

Even here also that *vidyā* is intended (lit. expressed) which is the conveyor (lit. revealer) of the objects of activity; those who are devoted to it are (persons) who do not pay heed to the meaning of the Vedānta texts; [604]
being ignorant, however, they enter once again from that (*vidyā*)

into great/pitch darkness (*param tamah*); the greatness of the darkness is owing to the excessive measure of false knowledge. [605]

In verses 603-605 Sureśvara glosses on the word *vidyā* as *naikātmyaprasamīkṣaṇam*, *karmārthadyotikā(vidyā)* and *mithyā-jñānādhikā*. It appears in the last line of verse 605 that Sureśvara strikes at the Mīmāṃsakas who hold ritual to be more important than Īśvara himself.

Verses 606-608 are the explanation of BU 4.4.11.

यदि ते तत्तमो यान्ति को दोष इति चोदिते ।
अनन्दा इति वाक्येन तद्दोषोऽथाभिधीयते ॥६०६॥

(If it is expected:) 'What fault is seen in that they go to darkness?'—this being argued, the answer is: 'The fault in that is expressed in the sentence *anandāḥ*' [606]

अनानन्दाभिधा लोकास्तीव्रदोषसमन्विताः ॥६०७॥

Those worlds, which are beset with (lit. accompanied by) severe difficulties/faults are called by the name *anānanda*.¹ [607]

¹This is the paraphrase of *ananda*, for the sake of metre.

तांस्ते प्रेत्याभिगच्छन्ति येऽविद्वांसोऽबुधो जनाः ।
अविद्वांसो न सामान्यात्किंतु येऽत्राबुधो जनाः ॥६०८॥

Having died, they go to those worlds; those who have not known (the nature of the Ātman) and are therefore unwise;¹ they are not to be taken as non-knowers (about the Ātman)—not in a general way—but that they are persons who are (entirely) ignorant² (about the same). [608]

¹This is almost a quotation from BU 4.4.11; *abudhaḥ* = *abudhāḥ*

from the root-noun *budh*.

²This means 'unaware of'.

Verses 609-615 explain BU 4.4.12.

आत्मानं चेद्विजानीयात्सर्वधीवृत्तिसाक्षिणम् ।
अशनायाद्यतिक्रान्तं कथंचित्सत्त्वशुद्धितः ॥६०९॥
कथं तमभिजानीयादित्युक्त इदमुच्यते ।
पुरुषः परमात्मायमयमस्मीतिवाक्यतः ।
किमिच्छन्कस्य वार्थाय शरीरं संज्वरेत्तदा ॥६१०॥

'If a person would know the Ātman as the witness of all the modifications of the intellect, and as one which has transgressed hunger etc., somehow through purification of himself (or his intellect), [609] how should one know that person?' If this is asked, the following is said (in answer): 'This individual being (*puruṣa*) is the highest Ātman, as understood from the sentence *ayam asmi*'.¹ Then (i.e. in that modification)² how would the body feel torment, with the want of which thing and for the sake of what thing?' [610]

¹This is quoted from BU 4.4.12. Also SP adds there the well-known Mahāvākya *tat tvam asi*.

²This refers to the second half of BU 4.4.12.

सर्वेच्छानां समाप्तत्वादात्मकामप्रबोधतः ।
आक्षिप्यतेऽत इच्छेह किमिच्छन्नितिवाक्यतः ॥६११॥

Since all the desires have been obtained through knowing about the (real) desire the Ātman, there is, therefore, in the sentence *kim icchan* ... snapped aside (i.e. rejected) desire (in its entirety). [611]

प्रत्यगात्मातिरेकेण यस्माच्चान्यत्र पश्यति ।
कस्य कामाय वा चातोऽप्यनात्माक्षिप्यतेऽखिलः ॥६१२॥

Since (this person)¹ does not see anything else than the individual (or, lit. inner) self, there is the question asked in the words *kasya kāmāya vā ca*, with reference to all (of) the non-Ātman. [612]

¹This refers to one who has obtained the knowledge of the Brahman.

शरीरज्वरमन्वेष संज्वरेद्ब्रह्म सन्कथम् ।
निःसङ्गस्य हि संबन्धो देहेनास्य न कश्चन ॥६१३॥

How would he, being the Brahman itself, feel torment after the torment of the body? Indeed, in the case of the person, who is non-attached (to the body), there is not any connection of him with the body. [613]

नातो देहादिदुःखेन दुःखित्वं प्रत्यगात्मनः ।
निःशेषदुःखसंबन्धहेतूच्छित्तेः प्रबोधतः ॥६१४॥

Therefore, in the case of the individual self, there is no feeling of sorrow on account of the torment of the body; for (already) there is complete destruction of every connection with misery (or sorrow) on account of the knowledge of the Ātman. [614]

भयोऽसह्यमहादुःखनीडदेहप्रवेशन-
हेत्वविद्यासमुच्छित्तेर्देहं चानुविशेत्कुतः ॥६१५॥

How would he again enter into a body since there is destruction of ignorance which is the cause of (his) entry into the body, i.e. the abode of extremely unbearable misery? [615]

This is based on the reading of the Mādhyandina recension *śarīram anusaṅcaret* for *anusañjvaret* of the Kāṇva recension

Verses 616-623 explain BU 4.4.13.

शास्त्राचार्यप्रसादात् क्षपिताशेषपाप्मनः ।
वित्तो बुद्ध्यादिसाक्षीशः प्रतिबुद्धस्तथैकलः ॥६१६॥

However, through the favour of the preceptor and the scripture(s), the person has his entire sin destroyed; therefore, being an experiencer of the Brahman, he becomes the witness of the intellect etc.¹ and also alone (that is separated from the body) and enlightened (*pratibuddha*). [616]

This is the meaning of the Mantra beginning with *yasya* and connected with *sa hi sarvasya kartā*.

¹This refers to various organs.

अत्रात्तेजोभिरत्यर्थं देहः संदिह्यते यतः ।
संदेहस्तेन देहोऽयं संदेघश्छान्दसत्त्वतः ॥६१७॥

Since this body is fattened¹ excessively by food, i.e. various types of lustres; therefore, this body is described as *saṁdeha*. In the text of the Upaniṣad, the reading *saṁdegha* is to be regarded as a Vedic peculiarity.² [617]

¹The word is *saṁdihiyate* is paraphrased by SP as *samyag upacīyate*.

²It seems Sureśvara has accepted that the reading in BU 4.4.13 is *saṁdegha*, as reported by Limaye, under BU 4.4.13, as a reading in some mss. of the Mādhyandina recension. There are however two other readings, viz. *saṁdehye* and *saṁdehe* read by the mss.

आध्यात्मिकाधिभूताधिदैविकार्थातिसंकरात् ।
गुणप्रधानभावेन गहनोऽयं ततो मतः ॥६१८॥

Owing to a complete intermixture of objects that pertain to the body, to the elements, and to the divine world, there is connection among them as the principal and its subor-

dinates—and, therefore, this (worldly body) is very complex (i.e. very difficult to grasp). [618]

संदेहे गहनेऽत्रात्मा प्रविष्टो जलसूर्यवत् ।
विविच्य येन विज्ञातः स स्याद्विश्वकृदीश्वरः ॥६१९॥

In this very complex *saṁdeha* (for *saṁdehya* in the text of BU) this Ātman has entered, as the sun (enters) into waters, by whom having discriminated/deliberated, it was known specifically it would become the creator of all, the Lord. [619]

This verse explains the meaning of *praviṣṭa* and *sa viśvakṛt*.

प्रत्यग्याथात्म्यसंबोधात्सर्वं तेन कृतं भवेत् ।
निःशेषपुरुषार्थाप्तेर्न कार्यं शिष्यते परम् ॥६२०॥

By knowing the nature of the inner self, it would have done all (that has to be done); (for) after obtaining all the ends of human life, there would not remain for it anything else to be done (or accomplished). [620]

स हि सर्वस्य कर्तेति तस्मादेवाभिधीयते ।
कृतकृत्यत्वतो हेतोर्लोकोऽयं तस्य लोकिनः ॥६२१॥

Therefore, it is said *sa hi sarvasya kartā ...*; therefore, for the reason of his being one who has accomplished all the tasks to be performed, there is for him, the world, it belongs to the master of this world. [621]

Verses 622-623 explain *sa viśvakṛt*.

निःशेषजनिमत्कार्यहेतोर्वा ज्ञाततत्त्विनः ।
विश्वकृत्त्वं भवेदेवं हीतिहेतुपरिग्रहात् ॥६२२॥

Or (rather), being the performer of all the tasks of the life (lit. birth), i.e. by being the knower of the tasks of life, he

would have the nature of the performer of everything (*viśvakṛt*); (the word) *hi* (in the text) is for the sake of conveying the cause (of his being *viśvakṛt*). [622]

तस्य साक्षादयं लोको योऽहं ब्रह्मेतिबोधितः ।
भेदाशङ्कापनुत्त्यर्थं स उ लोक इतीर्यते ॥६२३॥

The words *sa u loka* are used in the statement for averting any doubt about his distinction (from the world); since this world is for him directly perceptible, as he is awakened (to the knowledge) *aham brahma*. [623]

We have followed the text *aham brahmetibodhitah* which could be read as *aham brahmetibodhatah*.

Verses 624-629 explain BU 4.4.14.

इहैव कृतकृत्यत्वात्सन्तः स्याम परं यदि ।
ब्रह्म प्रत्यक्तया विद्मः कथंचित्कल्मषक्षयात् ॥६२४॥

(It may be asked:) 'If we would have accomplished what is to be accomplished and become the highest (Brahman) in this very (transmigratory existence), then, somehow, we would understand it being its inner self, owing to the wearing away/destruction of all the sin'. [624]

This is to explain the sentence *ihaiva* ... pointing to the result of knowing the non-distinction between the Ātman and the non-Ātman.

न चेदथ परं विद्मः शास्त्राचार्यानुसारतः ।
अवेदिनं तदा बालं विनष्टिर्महती व्रजेत् ॥६२५॥

'If, on that knowing (*atha*), we do not know the highest (Brahman) by following the preceptor and the scripture(s), then to this non-knower of the Vedas,¹ the ignorant one,²

there would come great loss (i.e. destruction).'

[625]

This explains *na ca*

¹That is, one who has not been able to distinguish between the Ātman and the non-Ātman.

²The word in the original BU text is *avedi*, which is paraphrased by SP *vedanahīnaḥ*.

विनष्टिं महतीं चेयाद्योऽवेद्यात्माविचक्षणः ॥६२६॥

विनष्टिर्महती चेह विनाशादिप्रसतितः ।

आत्माविद्यैव निर्दिष्टा सामानाधिकरण्यतः ॥६२७॥

And a person, who has not known the Veda and has therefore been unable to distinguish between the Ātman and the individual self, would come to great loss. [626]

And here (in this situation), great loss (would result) into the effect, viz. perishing etc., (for, in these words) there is mention made of ignorance about the Ātman by the use of the same case-relation between the two words. [627]

In the first line the words *avedī*, *avicakṣaṇa* repeat the thought expressed by the words *avedin* and *bāla* in the preceding verse.

उक्तार्थस्य प्रकाशार्थमुत्तरार्धेन भण्यते ।

ये तद्विदुरिति श्रुत्या स्पष्टार्थप्रतिपत्तये ॥६२८॥

In order to express this thought, which is (just) mentioned, there is stated by the Śruti in the latter half (of the sentence) *ye tad viduḥ*, in order that one understood the thought very clearly. [628]

Read SP for details: *ye tad vidur iti śrutirūpeṇottarārdhena pūrvārdhārtha eva prapañcārtham ucyate prapañcanam caktārthasya spaṣṭatāpratipattiyartham iti yojanā tatra prathamapādārthas trtīyapādena prapañcyate dvitīyapādārthas caturthapādeneti vibhāgaḥ*.

ब्रह्मैव सन्तो विज्ञानात्प्रागतो ब्रह्मबोधतः ।
भवामो ब्रह्म नानासं दशमो दशमं यथा ॥६२९॥

Therefore, being the Brahman itself before knowing the Brahman, i.e. even before acquiring the specific knowledge (about it from the sentence), we become the Brahman which has not been obtained, just like a person (in a group of ten persons knows himself) as the tenth one. [629]

Verses 630-634 are explanation of BU 4.4.15.

ब्रह्मास्मीति यदैवैतमात्मानं देवमञ्जसा ।
अनुपश्यति साक्षात्तमीश्वरं भूतभव्ययोः ॥६३०॥
ईश्वरप्रत्यगात्माप्तेस्तदा तद्देदनाशतः ।
ईशितव्यत्वसंक्रान्तेर्न ततो विजुगुप्सते ॥६३१॥

When (the individual being) sees this inner self, the shining one, the divine (being) as 'I am Brahman', in a clear (or, smooth) way, then does he directly perceive the Lord of both of what was and what will be. [630]

Then, because of the removal (lit. destruction) of the distinction between the two, that is through knowing (lit. obtaining) the nature of the Lord as the inner self, and by turning into the one having the nature of what is to be controlled, the individual self does not (anymore) wish to conceal itself from (lit. censure) it.¹ [631]

The word *añjasā* 'in a smooth way' is paraphrased as *sākṣāt* 'directly' in the second line.

¹Cf. *guptim icchati* in just the next verse; also *nindati* in verse 634 below.

गुप्तिमिच्छति सर्वोऽपि यत ईशाद्व्यातुरः ।
अयं तु तदभिन्नत्वान्न ततो गुप्तिमिच्छति ॥६३२॥

(This is so said) since everyone wishes to conceal (himself) from the Lord, being overpowered by fear; but this one (i.e. the individual self), owing to the non-difference from that (i.e. the Lord), does not wish to remain concealed from him. [632]

This means that, on knowing the non-distinction between himself and the Brahman, the individual self does not entertain any fear any more. Cf. *abhayaṃ vai janaka prāpto 'si* (BU 4.2.4).

यतो वाचो निवर्तन्ते अप्राप्य मनसा सह ।
आनन्दं ब्रह्मणो विद्वान् बिभेतीति शास्त्रगीः ॥६३३॥

Such is the statement in the scripture: 'An individual self, knowing the bliss in the form of the Brahman, does not feel fear'—'(That Brahman) from which all speech, together with *manas*, withdraws (itself), not having obtained it.' [633]

This is *Taittirīyopaniṣad* 2.4 and 2.9; this is adduced as the scriptural support for the thought in the preceding verse.

न वा निन्दति निःशेषद्वैतहेतुविनाशतः ।
ऐकात्म्यदर्शनाद्विद्वान्यत्र त्वस्येतिशास्त्रतः ॥६३४॥

On the basis of the scriptural text *yatra tv asya* (BU 4.5.15) it is clear that (the individual self), now the knower, does not (any more) censure himself because of the complete removal (lit. destruction) of the cause of all duality and because of the (direct) perception of its non-duality (or, non-difference from it). [634]

Verses 635-639 are the explanation of BU 4.4.16.

निःशेषविक्रियाहेतुकालातिक्रमहेतुतः ।
जन्मादिविक्रियाषट्कसंगतिस्तस्य नेष्यते ॥६३५॥

The association with the group of six modifications, viz. birth

etc.,¹ is not accepted in the case of that (the Ātman), since that overcomes (lit. transgresses) the causes and periods of time (as well) of all the modifications. [635]

¹This refers to the six *bhāvavikāras* recorded in *Nirukta* 1.2.

अर्वाग्यस्मादयं कालो विकुर्वञ्जनिमज्जगत् ।
संवत्सरः स्वावयवैरहोभिः परिवर्तते ।
ज्योतिषामपि तज्ज्योतिरायुर्देवा उपासते ॥६३६॥

This time (which is down) below whom (i.e. the Brahman), (named) as the year, keeps on rotating together with its own parts, viz. days, modifying the world that has an origin—the divine ones wait on (or, are devoted to) that light of luminaries as the very life,. [636]

कौटस्थ्यादमृतं ज्योतिर्मृत्युभूम्यतिलङ्घनात् ।
कालस्य जरणादात्मा श्रुतौ कालंजरो मतः ॥६३७॥

Owing to its immutability, the immortal light, i.e. the Ātman, (mentioned) as *kālāṇjara* is known in the Śruti on account of its transgressing the region of death and its reducing *kāla* (to nothingness). [637]

Cf. *Śvetāśvataropaniṣad*: *upāc dyuh* (5.5) and *jñāh vidyah* (6.16); also SP states *uktam hi*—

kālah pacati bhūtāni sarvāṇy eva satātmanā /
(*Maitrāyaṇyupaniṣad* 6.15ab);

and

kālah pakvo yam anveti yas tam veda sa vedavit //
kālah sa pacyate yatra na kālas tatra vai prabhuḥ /
kālasyaiva ca mṛtyoś ca jaṇigamasthāvarasya ca //
iśate bhagavān ekaḥ satyam etad bravīmi te /
(not traced);

and also cites from *Mahābhārata* 12.238.9:

āhatya sarvasaṅkalpān sattve cittam niveśayet /

sattve cittam samāveśya tataḥ kālañjaro bhavet //

भावाभावात्मकस्यास्य कार्यकारणवस्तुनः ।
परमात्मा स्वतः सिद्धेरायुरस्य परार्थतः ॥६३८॥

The highest Ātman, because of its existence in its own right (or on account of itself), is in reality the very life of this thing (lit. world) consisting of effect(s) and cause(s), which is of the nature of positive and negative entities. [638]

गन्धर्वाः पितरो देवा रक्षोभिश्च सहासुराः ।
यस्मिन्पञ्चजनाः पञ्च वियदन्ताः प्रतिष्ठिताः ॥६३९॥

That is the Ātman (in whom) are supported (alternatively, abiding) five tribes, viz. Gandharvas, Pitṛs, Gods, demons and Asuras;¹ or they are the five (elements ending with) sky.² [639]

¹The distinction is made between *rākṣasa*(s) and *asuras* in keeping with the Vedic practice.

²They are *pr̥thivī*, *ap*, *tejas*, *vāyu*, *ākāśa*.

Verses 640-642 are the explanation of BU 4.4.17.

पञ्च प्राणादयो वा स्युरन्नान्तास्तच्छ्रुतत्वतः ।
अत्राभावे विवक्ष्यन्ते काण्वानां ज्योतिषा सह ।
तमेव कारणात्मानं विद्वान्मन्येऽमृतोऽमृतम् ॥६४०॥

The five would as well be the five *prāṇas* mentioned with food in the end, for they are so heard; in the absence of the mention of the food, the five are intended by the followers of the Kāṇva recension (as four which are specifically stated in the text) together with light (*jyotis* as the fifth); that one, do I, the immortal knower, understand as the immortal Ātman which is the cause (of all). [640]

This is specifically so mentioned in BU 4.4.17 of the Mādhyandina recension.

In this verse, Sureśvara has stated two interpretations of *pañca jana* (i) according to the Mādhyandina tradition and (ii) according to the Kāṇva tradition, but, in this latter, there is no reading of *anna* which is replaced by the word *jyotiṣāṃ jyotiḥ* as the fifth one, from BU 4.4.16. Cf. BS 1.4.12.

कार्यकारणयोस्तत्त्वं यस्मादात्मैव निर्द्वयः ।
मन्य आत्मानमेवातः कार्यकारणवज्जगत् ॥६४१॥

Since the reality (truth) of effect(s) and cause(s) is only the Ātman, which is without duality; therefore, do I consider only the Ātman itself as this world which consists in effect(s) and cause(s). [641]

The verse explains the idea of the word *kāraṇātman* in the preceding verse.

प्रध्वस्तभेदहेतुत्वात्कारणादेरसंभवात् ।
अमृतोऽमृतमित्याह स्वयं विद्वानिति श्रुतिः ॥६४२॥

And the Śruti itself has declared that this (individual self) knows the immortal (i.e. the Ātman) and itself (thereby) becomes immortal, because there is destruction of the cause of distinction and because there does not any more remain any cause as possible. [642]

Verses 643-647 are the explanation of BU 4.4.18.

यतः प्राणादिभावोऽयं प्राणादीनां तमेव ये ।
निचिक्युस्ते विदुः साक्षादग्र्यं ब्रह्म सनातनम् ॥६४३॥

Since those who perceive with respect to the *prāṇas* that there is this becoming (of the Brahman) as *prāṇas* etc.; therefore, they have directly known only that one, the Brahman, which

is the foremost (among all the *prāṇas*) and which has been in existence all the time. [643]

This explains the same thought as in *prāṇasya prāṇam* ... in BU 4.4.18 itself.

निरपेक्षात्मनैवेह सर्वस्यात्मवतो यतः ।
प्राणादेरात्मवत्ता स्यात्प्राणस्य प्राणमित्यतः ॥६४४॥

Since the state of being sentient belongs to all vital breaths possessed of sentience, by nature without having any expectancy, therefore, (that) *Prāṇa* is the life of the *prāṇas* (i.e. organs). [644]

अनात्मा हि स्वतोऽसिध्यन्स्वतःसिद्धमपेक्षते ।
आत्मनस्तु स्वतः सिद्धेर्नापेक्षानात्मसंश्रयात् ॥६४५॥

Indeed (*hi*) the non-Ātman, which cannot exist in its own right, does expect (i.e. depends on the Ātman), that exists in its own right; but since the Ātman has been existent, in its own right, it does not have a resort in any non-Ātman. [645]

अन्यतः संगतिः सेयमविचारितसिद्धिका ।
अविद्योत्सङ्गसंस्थैव तत्त्वज्ञानाद्विनश्यति ॥६४६॥

This is then the association of the Ātman with another, being established (even) without (any deliberate) consideration (*avicāritasiddhika*), resting only on the lap of ignorance; it gets destroyed through knowledge of reality.¹ [646]

This refers to *prāṇādeḥ ātmavattvam*.

¹This is the result of knowing the relation between the Ātman and the non-Ātman.

अकार्याकारणात्मैव कार्यकारणवस्तुनः ।

तत्त्वमुक्तं पृथिव्यादेर्नभोन्तस्याक्षरं परम् ॥६४७॥

Thus is stated the true nature of this (world) consisting of effect(s), and cause(s), as the Ātman having the nature of non-cause and non-effect; that is, of all, which begins with (the mention of) earth and ends with sky; namely, in reality, the highest imperishable self. [647]

Verses 648-672 are the explanation of BU 4.4.19.

तस्यास्य दर्शनोपायः कः स्यादित्यभिचोदिते ।
मनसैवेत्यतः प्राह श्रुतिर्ब्रह्मावबोधने ॥६४८॥

Now one might ask: 'What can be the means of the sight of this one, which is (so far described)? The Śruti states (in answer), 'With *manas* only (there can be the seeing)'; in order that one should well (*ava*) know the Brahman. [648]

अवदधे यतश्चेयं मनसैवेति च श्रुतिः ।
मनोतिरेकतोऽपेक्षा नैवातः साधनान्तरे ॥६४९॥

Also, since this Śruti again¹ emphasised (or specified this (Brahman as what can become known) only with (i.e. by means of) *manas*, therefore, there is no need (lit. expectancy) of any other means than the *manas* (for knowing it). [649]

¹This refers to *Kāthopanīṣad* 4.11: *manasaivedam āptavyam*; this is understood by force of the second *ca* in this verse.

आत्मानात्मपदार्थेषु विज्ञानोत्पत्तिसाधनम् ।
मनः साधारणं दृष्टं सर्वज्ञानैकहेतुतः ॥६५०॥

In respect of the objects, such as the Ātman and the non-Ātman, it is known that *manas* is the common means that brings about the rise of the specific knowledge (*vijñāna*) about them; for the reason that it is the only cause that gives

rise to all types of knowledge.

[650]

Here the oneness of *manas* and the intellect is the basis of this thought; this reminds us of the two inseparable (yet distinguishable) aspects of the inner organs (*antaḥkāraṇa*) of human beings. Therefore, instead of the intellect, *manas* is mentioned as what grasps; as it is said: it takes the shape of the object grasped (and not the intellect, as is usually mentioned).

प्रत्यक्चिदाकृतिस्तत्र सर्वदा धर्मधर्मिणोः ।
हेत्वन्तरानपेक्षत्वादात्मत्वात्संनिधेः सदा ॥६५१॥
आत्माकृतिरतो नित्या तद्धेतोः संभवात्सदा ।
अज्ञानादेश्च चिद्रूपं तद्याथात्म्यान् वार्यते ॥६५२॥

In that respect (*tatra*), there would always be the shape of the sentience within, since there has always been the proximity of the Ātman and what grasps and what is grasped (*dharma-dharmin*)¹ as there is no other cause of the expected/-necessary proximity. [651]

Therefore, the shape of the Ātman (which *manas* comes to have) is ever abiding (*nitya*), on account of there being the possibility of the ever existent cause of it² and such form of ignorance etc., as the shape of the sentience cannot be overruled (lit. averted); because of its being the true nature of the same (i.e. *manas*). [652]

This verse presupposes the question: *manodhīnā ced ātmasiddhir ātmano jādatvaṃ syād atrāḥa ... pratyag iti* (NKL ms. p.751); and then NKL (ms. p.751) explains verse 651 thus: *buddhitaddharmayoḥ svarūpalābhamātreṇa cidābhāsavyāptatvāt buddhyādisādhakatvād ātmano na jādyam ity arthaḥ*. Then it introduces verse 652: *na kevalam buddhyādeḥ svarūpatvena tatra sadātanaś cidābhāsaḥ kiṃ tu sarvatrety āha—ātmeti*.

On these two verses SP states *āmaprasādād eva sarvasya sattā sphūrtiś cetyātmano na jādyam taddarśane manasaḥ sādhanatvoktis tu sadā tadākārasya tasya śravaṇādisaṃskārāpekṣayā*

kādācitkatadrūpapariṇāmadhāritvād iti vārtikayos tātpariyārthaḥ.

¹*dharmīn* is the intellect which grasps and *dharma* is knowledge, which is grasped.

²This is the ever existing proximity of the Ātman and *manas*.

धर्माधर्माद्यपेक्षत्वादन्यत्वाच्चान्यवस्तुनः ।

शब्दाद्याकारता तस्मात्कादाचित्की धियो भवेत् ॥६५३॥

Therefore, on account of its (i.e. of *manas*) dependence on *dharmādharmā* and its being different from other thing (i.e. Ātman), the state of having the shape of a sound etc. on the part of the intellect ¹ is only occasional. [653]

¹SP explains *dhī* as *manas*.

In verses 654-658 there is a discussion that every object taking the shape of the Ātman can lead to ignorance about the knowledge of it.

यद्यपीमौ जगत्यस्मिन्नात्मज्ञानपुरःसरौ ।

शब्दाद्यनात्मविज्ञानभावाभावौ स्वभावतः ॥६५४॥

तथाप्यनुभवादेव प्रत्यक्तत्त्वानभिज्ञता ।

अनात्मबोधवत्सिद्धाविद्यातः प्रत्यगात्मनि ॥६५५॥

Even if, in this world, the positive and negative forms of specific knowledge of the non-Ātmans, e.g. sound etc. are by nature preceded by the knowledge of the Ātman; [654]
there is yet ignorance (about the Ātman) owing to its being inside (the body)—as understood from experience; therefore, this absence of knowledge in respect of the inner self is established as having been beset with knowledge about the non-Ātman. [655]

उत्पन्नस्यापि चोत्पत्तिः कृपाकाशादिवत्ततः ।

प्रत्यग्याथात्म्यबोधस्य व्युत्पत्तेर्गुरुशास्त्रतः ॥६५६॥

And, this rise of knowledge about the true nature of the inner self, though (thus) produced (by the proximity of the Ātman and *manas*) from learning (imparted to an individual) by a preceptor and scriptures, is just like (the origination of) the sky which is (delimited by) a well—it is the origination of what is (already) originated. [656]

प्रसादादनु शास्त्रादेर्मनसैवेत्यतः श्रुतिः ।
द्रष्टव्यमात्मनस्तत्त्वमित्याहास्मद्वितैषिणी ॥६५७॥

Therefore, the Śruti, which desires good for us, has said that, after clear understanding (*prasādād anu*)¹ of the scripture, one should experience (lit. see) the true nature of the Ātman with the help of *manas*. [657]

This is a kind of the concluding remark about the meaning of the sentence *manasā*

¹However SP states *anuśabdo draṣṭavyam ity anena sambadhyate*.

दृश्यं चेन्मनसैवैतद्द्रष्टृत्वादिप्रभेदतः ।
पुनः प्रसक्तं नानात्वं मैवं यस्मान्निषिध्यते ॥६५८॥

If it is said that there is again contingency of accepting variety (of distinct objects) owing to this distinguishing of the faculty of seeing etc., when it is observed (in the Śruti) that the Ātman is to be seen with the help of *manas*; then the answer is: 'Let this not be said, since (that variety) is rejected'. [658]

A doubt in this verse is at the basis of the BU statement *neha*

Verses 659-661 explain the Śruti *neha nānāsti*

नेह प्रमाणतो मेयं यस्मान्नानास्ति किं चन ।
अज्ञातं यदि वा ज्ञातं वस्तु नानात्वभाङ्गं हि ॥६५९॥

नानात्वबुद्धये नालममितोऽर्थो यतस्ततः ।
 अज्ञातः संशयज्ञातो मिथ्याज्ञातो न भित्तये ॥६६०॥
 सम्यग्ज्ञातोऽपि नैवार्थो द्वैतबोधकृदिष्यते ।
 द्वैतकारणबाधेन सम्यग्ज्ञातत्वसिद्धितः ॥६६१॥

Here (i.e. in Vedānta) there is not any object to be known by any means of knowing, since there is nothing which has a variety in it; be it unknown or known; the (real) thing does not have any variety in it. [659]

Since the immanent (lit. unlimited) thing is not such as to give rise to the cognition of variety; there is, therefore, not any distinct part in it (which is) not known, doubtfully known, or falsely known. [660]

And even if that (real) thing were well-known, it is not regarded as causing the cognition of duality by its effecting removal of the cause of duality and by establishing the nature of itself as what is well-known. [661]

In verses 662 and 663, there is reasoning presented for the absence of variety (in knowledge).

मेयव्याप्तिश्च मानानां नान्यव्यावृत्तिवर्त्मना ।
 व्यावर्त्येष्वापि तत्सक्तेर्न चापि लभतेऽवधिम् ॥६६२॥
 मेयेनैव समाप्तत्वात्ततोऽन्या व्यापृतिर्न च ।
 नातो वस्त्वन्तरव्याप्तिं व्यावृत्तिं वाश्नुते प्रमा ॥६६३॥

Grasping (lit. pervading) the object(s) to be known by any/all means of knowing is not (to be understood) by way of excluding other (things), since that¹ would contingently follow in the case also of those which are to be excluded and, thus, it (i.e. a means of knowing) would not have any scope. [662]

Since in only its object of grasping is (the function of a means of knowing) completed, there is no other function (of it) whatever; therefore, right knowledge does not involve grasping of any other object of knowing or even excluding (the same).

[663]

¹ Namely, *anyavyāvṛtti*.

This verse states that any means of knowing cannot be related to exclusion, distinguishing or any non-existent distinction.

व्यावृत्तेश्चाप्यवस्तुत्वात् सद्बस्तूपलम्भनैः ।
प्रमाणैरपि संबन्धः प्रत्यक्षप्रमुखैः क्वचित् ॥६६४॥

Also, even the means of knowing, such as direct perception and others, which are for grasping existent things, do not anywhere have any connection with exclusion, on account of its being a non-existent thing. [664]

Sureśvara in verses 665-667 refutes the idea of the sixth pramāṇa i.e. negation or non-apprehension as the means of effecting exclusion.

अभावमात्रबोधित्वान्नाभावादपि भेदधीः ।
भावाभाववभावेन प्रत्यक्षेणेव नेक्षते ॥६६५॥

Since negation (the sixth means of knowing) can give cognition of only non-existence, it also cannot give cognition of distinction. As by perception, so by negation (i.e. non-apprehension) existence and non-existence both cannot be apprehended. [665]

योऽपि प्रत्यक्षतोऽभावं वादी कश्चित्समीक्षते ।
तावन्मात्रावसायित्वाद्द्वैतं नासावपीक्षते ॥६६६॥

And whichever disputant might see here a negative entity (or the absence of a thing) by means of direct perception, even he does not (really) see duality (i.e. the existence of another thing), since that (direct perception) would have accomplished (i.e. got exhausted after achieving) its purpose.¹ [666]

¹ Cp. *anyā vyāptir na* in verse 663 above.

प्रत्यक्षस्यानुवृत्तिं च व्यावृत्तिं तद्विदां च सः ।
प्रत्यक्षेणैव संपश्येत्कथमित्यभिधीयताम् ॥६६७॥

Now, let it be told as to how that (person)¹ will see only by direct perception the continuity of what is directly perceptible and also the exclusion of those that are different from it. [667]

¹This refers to the *vādī* 'disputant' in the preceding verse.

Verses 668-678 affirm the absence of any means of knowing which grasps variety.

यतो मानं न हीहास्ति नानात्वप्रतिपत्तये ।
खकाण्यवदतस्तत्स्यादविचारितसिद्धिकम् ॥६६८॥

Since here (in respect of the (real) thing) there is not any means of knowing, which can simultaneously result in the awareness of a variety among things; it is established, (even) without (any deliberate) consideration, just like darkness associated with the sky. [668]

अज्ञातवस्तुहेत्वेव यस्मान्नाना ततोऽवदत् ।
मृत्योः स मृत्युमाप्नोति योऽत्र नानेव पश्यति ॥६६९॥

Since variety of things is caused merely by unknown things; therefore has (the Śruti) stated *mṛtyoḥ sa mṛtyum āpnoti yo 'tra nāneva paśyati* 'One who sees variety here goes from death to death'. [669]

This is for BU 4.4.19; it is noted in *Kāthopaniṣad* 4.10 also.

मृत्युर्हिरण्यगर्भः स्यात्स्वकार्यप्रलयत्वतः ।
तस्यापि मृत्युर्विज्ञेयो यत आविरभूदसौ ॥६७०॥

Mrtyu 'death' should be understood as Hiranyagarbha, since it is associated with (or accompanied by) complete merger (dissolution) of its own effect(s); therefore, death should be known of itself (i.e. that death) also, since it has appeared (as a modification). [670]

Whatever is related as a cause to some effect is perishable—this is the basic idea in this verse.

मिथ्यादर्शनदोषित्वान्मिथ्यादर्शनकारणम् ।
मृत्योर्मृत्युमसावेति यो नानेवेह वीक्षते ॥६७१॥

He, who sees here¹ (what is) like variety, keeps on moving from death to death, which has for its cause false knowledge because of its having the fault of wrong (or false) viewing (of reality). [671]

¹This is to mean 'while there exists only the Brahman'.

पूर्वं ज्ञानसमुत्पत्तेर्नानैवेति ह्यभून्मतिः ।
ज्ञानोत्पत्तौ तु तद्वाधान्नानैवेति प्रयुज्यते ॥६७२॥

(That person) had a thought that there exists variety (of things) in this world, before there was the rise (in him) of knowledge (about the Ātman) and, when the knowledge has arisen, there is the removal of that (ignorance or wrong viewing) and therefore (in the Śruti) are used the words *nāneva*.¹ [672]

¹This explains the force of *iva* after *nānā*.

Verses 673-703 are the explanation of BU 4.4.20.

वस्तुवृत्तं यतोऽद्वैतं नानात्वं मोहहेतुजम् ।
एकधैवात आत्मायं द्रष्टव्यः श्रुतिवर्त्मगैः ॥६७३॥

Since the existence (*vr̥tta*) of the (real) thing is that of non-duality, therefore the variety (of things) is a product of delusion and, as a result, this Ātman has to be seen as only of one form, (as explained) by them who follow the path of the Śruti. [673]

This is the meaning of the sentence *ekadhā*

एकेनैव प्रकारेण भास्वच्चिन्मात्ररूपिणा ।
शास्त्रैकमानतो ब्रह्म द्रष्टव्यं प्रत्यगात्मना ॥६७४॥

(This means that) the Brahman is to be seen by the individual self with the help of only one authoritative means, i.e. the scriptures only, in one way, i.e. as having the form of mere bright sentence.¹ [674]

¹Here the instrumental case in *bhāsvaccinmātrarūpiṇā* is in accordance with the Sūtra *ittham bhūtalakṣane* (SP *itthambhāve*) *tr̥tīyā*.

समस्तव्यस्ततादृष्टिरेकधैवेतिवाक्यतः ।
मिथ्येति गम्यते श्रौतान्मृत्योरिति च निन्दनात् ॥६७५॥

It is understood from the sentence *ekadhaiva* ... that whatever has the view of totality and of particularity is false; for, there is censure (of duality) in the Śruti (in the words) *mṛtyoh* [675]

This refers to verses 669-671 above. Read SP: *vākyasya śrautārtham uktvādhikārtham āha* as introductory to this verse.

एतदप्रमयं ब्रह्म मृत्युहेतोर्निषेधनात् ।
मृत्युर्वै तम इत्युक्तं तच्च बोधान्निराकृतम् ॥६७६॥

This Brahman is ever obtaining (lit. never failing) as understood from the censure of the cause of death; as stated in *mṛtyur*

vai tamaḥ (BU 1.3.28); and (death) is removed (lit. discarded) by the knowledge (arising) from the Śruti.¹ [676]

AnSS reads a variant *-aprameyam* for *-apramaya* (only in one ms.); this word is used for the sake of metre.

¹Read NKL (ms. p.753): *vākyottharthajñānam ajñānanivartakātvena mānaṃ na tu vastubodhakatvenety abhipretyāprameyatvam ucyata ity āha etad iti* (as introductory to this verse).

एकधैव यतस्तत्त्वं सर्वस्य जगतस्ततः ।
क्रियाकारकसंभेदधीर्मृषेत्यवधार्यताम् ॥६७७॥

Since the true nature of the whole world is, then (*tataḥ*, or, from that statement), only (in being) the Ātman of just one form; therefore, the awareness of distinctions such as activity and the means of activity is to be firmly considered as false.

[677]

यत्र हि द्वैतमित्येवं यत्र त्वस्येति च श्रुतिः ।
नानात्वदृष्टेर्मिथ्यात्वं स्वयमेवावदत्पुरा ॥६७८॥

Further, the Śruti *yatra hi dvaitam ...* and also the other, *yatra tv asya* have themselves¹ declared already the falsity of viewing the variety of things (in the universe).

[678]

The two parts of the Śruti stated are from BU 2.4.14 and 4.5.15.

¹This is for *svayam*; it could be alternatively translated into 'itself' as well—thus referring to but one text.

Verses 679-684 pertain to the discussion on the internal contradiction involved in *ekadhā draṣṭavyaḥ*.

एकधा चेत्परं ब्रह्म द्रष्टव्यं कथमुच्यते ।
द्रष्टादिभेदसद्भावे द्रष्टव्यत्वप्रसिद्धितः ॥६७९॥
अप्रमेयं कथं वस्तु प्रमाणेन प्रमीयते ।

मीयते चेत्प्रमाणेन नाप्रमेयं तदिष्यते ॥६८०॥

(An objection is raised:) 'If the highest Brahman has to be seen as only of one form,¹ how then is it said that the Brahman is to be seen?'² ('This is so,' the awareness has arisen), 'because the nature of things to be seen can be established only when there is existence of duality consisting of *draṣṭṛ* etc.' [679]

(This means to say:) 'How can a thing, that cannot be known (or, be said to be the knower) with the help of some means of knowing; if it becomes known by some means, it is (not to be) accepted as an object not to be known.' [680]

Regarding verse 679: a general rule stated in the second line is for justifying the question raised in the first line.

¹That is, non-dual.

²In the absence of duality, there cannot be the seeing of the Brahman by someone else.

नैष दोषः पुरोक्तत्वात्परिहारस्य चाञ्जसा ।
भूयोऽपि परिहारोक्तौ भवेत् पिष्टस्य पेषणम् ॥६८१॥

(The answer is given:) 'This is not a fault, because the refutation (of this argument) has been already stated clearly as such, (and) in stating the refutation (of that question) once again would be (the same) as grinding what is already ground'. [681]

प्रमात्रादेरुपादानमैकात्म्यप्रतिबन्धकम् ।
यतोऽतस्तत्प्रबोधेऽस्मिन्न प्रमात्राद्यपेक्षते ॥६८२॥

Here, accepting (the notions of) the knower etc. is to be precluded in respect of this awareness (lit. knowing) of the non-duality of the Ātman and, this (duality), i.e. of the knower etc. is not expected (or required) in the knowing of that (i.e. non-dual Ātman). [682]

The verse has a verb *apekṣate* which should have been *apekṣyate* instead, but Sureśvara has often used such active and passive forms (for each other) in the entire BUBV.

मेयस्य मानसंबन्धे प्रमेय इति गीरियम् ।
 प्रमाफलं त्वप्रमेयं यतो नातो विरुद्धता ॥६८३॥
 अज्ञातवस्तुना योगो मानस्येह यतस्ततः ।
 ज्ञातस्य चाप्रमेयत्वात्रापेक्षा मानसंगतौ ॥६८४॥

(The use of) the word *prameya* is (possible) only when there is connection of what has to be known with what knows it (i.e. the means of knowing); but, since the result (here), consisting in the right knowledge, is what is not to be known, therefore there is no contradiction (involved in the statement of the Śruti). [683]

Since here (i.e. in this context),¹ there is the connection of knowing with the (real) thing, which has not been known, therefore, there has not been any dependence (noticeable) in the association of the means of knowing with the object (to be known); (this is) owing to the non-knowability of what has been already known. [684]

¹This refers to *pramāṇabhūmi*, or *vyavahārabhūmi*.

Verses 685-691 argue that being subjected to the function of knowing is merely imagined (kalpita) and, as a result, there cannot really be any result to be achieved. This leads to the idea that the Brahman is aprameya.

फलात्मनैव तन्मानं न तु मात्रादिरूपतः ।
 अभिव्यनक्ति नो ज्ञातं नातोऽस्य स्यात्प्रमेयता ॥६८५॥

That can be a means of knowing (in any context) which leads only to what is of the nature of result, and not by its having the forms such as the knower.¹ Further, it (i.e. that means

of knowing) reveals to us what is (already) known (and) therefore this (Ātman) does not have the nature of what is to be known (with the help of some means). [685]

Read NKL (ms. p.753): *svaprabhe pravṛttam mānaṃ svaprabhātmanaiva bodhayati na viśayatayety arthaḥ.*

¹This refers to *māna*, *meya*

तरावेव च्छिदा यद्वद्वैधीभावे तु नेष्यते ।
प्रमेयत्वं तथाज्ञाते न तु ज्ञाते फलात्मता ॥६८६॥

It is not accepted that (some non-duality) becomes divided (into duality), as in the case of a tree (such a division into two) is accepted/effected by (act of) cutting it; therefore, in respect of the so-called unknown, there can be (only) its nature as what has to be known—however, in respect of what has been already known, there is not (accepted) the peculiarity of being the result. [686]

Read NKL (ms. p.753) the introductory to this verse: *mānakṣptasya mānāviśayatvaṃ dr̥ṣṭāntena sādhayati tarāv iti.*

आगमोऽपीममात्मानं तत्तमोऽवस्तिवर्त्मना ।
अवबोधयतीत्येवं भण्यते दृष्टितत्त्वतः ॥६८७॥

Traditional scripture also makes known to us this Ātman by way of removing (lit. destroying) the darkness (i.e. ignorance) about it; that is why (*draṣṭavyam*) is stated with the notion of seeing one as the true nature of the Ātman. [687]

Read SP: *na hi vṛttivyāpyatvād r̥te pratīcaḥ sanvidvyāpyatvaṃ kalpyaṃ tadātmavād ity arthaḥ.*

स्वतःसिद्धाद्यतः सिद्धिरज्ञातादपि चात्मनः ।
सिद्धयसिद्धयोः प्रमात्रादेस्तत्सिद्धौ किमपेक्षते ॥६८८॥

And, since this establishing of the unknown Ātman, which has already existed in its own right becomes established; therefore, what can be expected¹ for establishing it, viz. the knower etc., when establishing and non-establishing are concerned? [688]

¹See note on verse 682 above.

ज्ञानव्याप्तिर्हि शब्दादौ स्यादेकप्रकृतित्वतः ।
अकार्यकारणे व्याप्तिः कथं स्यात्प्रत्यगात्मनि ॥६८९॥

Indeed, grasping (lit. pervading) some knowledge could be (understood/accepted) in respect of sound etc. owing to their having only one nature;¹ how then could there be (such) a grasping (lit. pervading) in respect of the inner self which is not (of the nature of) cause(s) and effect(s)?² [689]

¹This refers to sound etc. produced by the activity of organs and the intellect.

²Because of the non-duality of the Ātman, there can be no case of things having just one (or, uniform) nature.

शब्दप्रवृत्तिहेतूनां प्रत्यगात्मन्यसंभवात् ।
नाभिधानाभिधेयत्वसंगत्यातः प्रबोध्यते ॥६९०॥

Therefore, it is conveyed to us that, owing to the impossibility (the existence) of cause(s) of the function of words etc., in the case of the individual self, there is not (any) association of it (i.e. the inner self) with names and what are named. [690]

प्रत्यगज्ञानहेतूत्थो यत्रानात्मा प्रसिध्यति ।
ज्ञातृज्ञेयप्रभेदः स्यात्तत्र प्रत्यगनात्मनोः ॥६९१॥

Where, (however), the non-Ātman gets established, arisen as it has from ignorance about the inner self, there could (or,

can) be distinction of knower, object of knowing in respect of the inner self and the non-Ātman. [691]

This refers to the Śruti statement *yatra hi dvaitam iva ...* (BU 2.4.14).

In verses 692 and 693, it is stated that, in respect of the Ātman (in Vedānta), there cannot be the triad mātr, māna and meya—the Ātman being the meya.

यत्र त्वात्मैव मेयः स्यात्तत्र मेयातिरेकतः ।
 कः प्रमाता प्रमाणं वा यमेवेति तथा श्रुतिः ॥६९२॥
 मानापेक्षयेव यो भावः स एवामानतो न सन् ।
 मानानपेक्षसिद्धिस्तु कस्मान्मानमपेक्षते ॥६९३॥

But, where the Ātman alone is to be the object of knowing, whence could there be, beside that object of knowledge, a knower or a means of knowing, because there is the statement to this effect, viz. *yam eva* [692]

Whatever be the thing, which has the need of an authoritative means (of proving its existence), it is not (an external entity), because there has been the absence of any authoritative means of knowing it.¹ However, how there can be the existence of what is (in existence) without any dependence on a certain means (of proving its existence)—how would that expect some means? [693]

Verse 692 refers to *Kāthopanṣad* 2.20 and *Muṇḍakopaniṣad* 3.2.3.

Regarding verse 693, SP clarifies the idea thus: *svaprakāśasya na mānāpekṣā*.

¹This refers to the absence of *śrutiprāmānya*.

Verses 694-698 seek to establish the Ātman as aprameya.

मातृमानप्रमेयाणां प्रत्यक्त्वादात्मवस्तुनः ।

नातः प्रमेयता तस्य स्वतश्चावगमात्मनः ॥६९४॥

Since the (real) thing, i.e. the Ātman is the inner self, there is not here (the need of supposing) a knower, means of knowing and object to be known; therefore, the Ātman being itself by nature self-revealing it is not made an object of knowing.

[694]

प्रमातृफलयोर्भित्तेर्नेह चोद्यस्य संभवः ।
क्रिययोर्हि प्रभेदे तत्किं पूर्वमिति चोद्यते ॥६९५॥

There is no scope here for any doubt (or, objection) which can proceed from the (accepted) distinction between (the act of) knowing and its result; for, only when there is distinction between two activities,¹ a doubt can be raised as to what precedes it.

[695]

¹These means: *pramā* is *pramāprāpti*, that is one action and *phala* is for *phalaprāpti* which is the second action.

अपीतकरणग्रामः पुमान्यद्वत्सुषुप्तगः ।
शब्दान्निद्रामपास्याथ यथावस्त्ववबोध्यते ॥६९६॥

'As a person who has been in deep sleep and has the entire group of his organs merged within (the inner self), comes out of (lit. gives up) his sleep on account of a call aloud (*śabda*) (by someone), so also (should it be known) that the individual self is awakened as to the nature of the (real) thing (by word etc.).'

[696]

अगृहीत्वैव संबन्धमभिधानाभिधेययोः ।
हित्वा निद्रां प्रबुध्यन्ते यथेहापि तथात्मनि ॥६९७॥

As men are awakened after giving up sleep even without apprehending the connection between words and what they signify, so is the case here in the context of the Ātman. [697]

In the verse there is stress on *abhidhānābhidheyasambandhāgrahaṇa* 'non-grasping of the association of names and those that are named'.

शब्दशक्तेरचिन्त्यत्वादात्मत्वाद्वोधरूपिणः ।
तत्साक्ष्यत्वाच्च निद्राया विद्यस्तं मोहहानतः ॥६९८॥

Owing to the impossibility of ascertaining (lit. thinking about) the capacity of words (for signifying the Ātman), and also because of the nature of the Ātman that has the form (only) of knowledge and also being the object to be seen in that (i.e. sleep), we know that (i.e. the Ātman) after giving up the ignorance about it. [698]

In this context, SP states: *uktam hi— codanā hi bhūtam bhavantam ityādi*.

Verses 699-703 explain *virajāḥ para ākāśāt*

धर्माधर्मौ रजो ज्ञेयं रजोवत्तन्मलत्वतः ।
तदकर्तृत्वतो ब्रह्म विरजोऽकारणत्वतः ॥६९९॥

By *rajas* are to be understood *dharma* and *adharma*, (the Brahman is to be understood as) possessed of *rajas*, i.e. possessed of the impurity, connected with it; therefore, on account of not being the agent of (effecting) them, the Brahman is to be understood as devoid of *rajas* (i.e. impurity), since it is not the cause (of them). [699]

असम्यग्ज्ञानयाथात्म्यो जनिमत्प्रकृतित्वतः ।
आत्मैवाकाशशब्देन श्रुत्येह प्रतिपाद्यते ॥७००॥

In the Śruti is stated here, i.e. in the word *ākāśa*,¹ the Ātman itself, because it is the origin of all that has birth, its true nature not being well-known. [700]

This describes the nature of *ākāśa* which is merely stated as the Ātman.

¹SP has pointed out that the instrumental forms *śrutyā* and *ākāśaśabdena* are *samānādhikaraṇa*.

जनिमत्कारणादात्मा योऽस्थूलादिविशेषणः ।
आकाशात्स परो ज्ञेयस्तस्यापूर्वादिरूपतः ॥७०१॥

The Ātman, which is the cause of what has birth, described with qualifications such as *asthūla*, has to be known as beyond (that) *ākāśa* as having the forms of being *apūrva* etc. [701]

This verse explain the significance of the word *para*.

यस्मादेवमतोऽजोऽसावकार्याकारणत्वतः ।
अजत्वादेव निःशेषविकाराणामपाक्रिया ॥७०२॥

Since this is so, the one is unborn, on account of its being neither cause(s) nor effect(s); and, therefore, there is rejection of the entire group of modifications (in the case of the Ātman).¹ [702]

¹That is, only on account of its being unborn.

अव्यावृत्ताननुगतेर्महानात्मेति भण्यते ।
कौटस्थ्याच्च ध्रुवो ज्ञेयो विकारोच्छ्रित्यसंभवात् ॥७०३॥

Since it is neither differentiated from nor is similar to (anything else); therefore, the Ātman is mentioned as the great one. And, owing to its immutability, it is to be known as permanent; for, there is no possibility of the destruction of (any of) modification (which are not related to it). [703]

Verses 704-972 are the explanation on BU 4.4.21. In this portion there are other incidental points discussed (they are so shown

in their proper places).

प्रत्यक्तया श्रुतेर्वाक्यात्तमेवोक्तविशेषणम् ।
 अन्वयव्यतिरेकाभ्यां विज्ञायात्मानमादितः ॥७०४॥
 ब्रुभत्सोच्छेदिनीं प्रज्ञां सर्वाज्ञाननिरासतः ।
 सर्वज्ञेयसमाप्तेश्च कुर्याद्वाक्यार्थबोधतः ॥७०५॥

On the basis of (i.e. from) the sentence of the Śruti, one should have first known that Ātman, whose attributes have been stated (by the Śruti as shown earlier) and, by the method of Anvaya and Vyatireka, [704] should one have obtained the object of knowing (as existence) in all (of the Ātman) by the complete removal of (the entire)¹ ignorance, i.e. by the excellent knowledge, that destroys completely the desire to get to know (the Ātman), after understanding the meaning of the Śruti-sentence. [705]

This is the total meaning of the BU statement *vijñāya prajñāṃ kurvīta*. Verse 704 explains the word *vijñāya* and verse 705, *prajñāṃ kurvīta*.

¹This indicates that the effects of ignorance also are included.

Verses 706-740 state the view of *Bhārṭṛprapañca* on this sentence: *vijñāya prajñāṃ kurvīta*.

इह व्याचक्षते केचिदुक्ताद्व्याख्यानतोऽन्यथा ।

Here (i.e. in this context) some offer an explanation in a way different from what is stated (by us). [706ab]

This is merely introductory to the view of *Bhārṭṛprapañca*.

कृतायाः करणं कीदृक्प्रज्ञाया इति चोदिते ॥७०६॥
 उच्यते वचसा बुद्धौ वस्तुमात्रं समर्प्यते ।
 विज्ञातस्य सतत्त्वस्य तादात्म्यप्रतिपादनम् ॥७०७॥

भावनाज्ञानसंतानैः प्रज्ञाकरणमुच्यते ।

(Now), when it is asked: 'How can there be accomplishing of (that) excellent knowledge which is (already) obtained?', [706cd]

(it is said in answer:) 'By the statement in the Śruti is presented to the intellect merely the thought about the (real) thing; then, as it has become known in its real nature, there is exposition of the becoming (of the individual self) one (with the Ātman), [707]

by means of the continued impression (of the same) and the (specific) knowledge—this is known/called as *prajñāprakaraṇa* 'the topic of *prajñā*.' [708ab]

अस्मिन्काले तु सा प्रज्ञा निष्ठां नीता कृता भवेत् ॥७०८॥

At this point (or, juncture), that knowledge (*prajñā*) is/would be completely achieved (or, taken to its goal). [708cd]

This explains the process of knowing the Brahman, on having understood the meaning of the words in the Śruti. For this, read SP: *śabdena kṛtā prajñā sāksātkāra-kāle niṣṭhām nītā saphalā syād atah śābdajñānavatāpi sāksātkāro 'pekṣyata iti.*

इत्येतदुररीकृत्य विज्ञायेत्युक्तमादरात् ।

प्रमाणवृत्तमुक्तवैतन्मनसैवेतिवाक्यतः ॥७०९॥

Having held this thought in mind, the Śruti has carefully stated (the word) *viññāya* ...— (this becomes known) after the Śruti has stated the functioning of the means of knowing from the words *manasaiva* [709]

मात्राद्यप्रविभक्तं सदद्वैतं ब्रह्म शाश्वतम् ।

द्रष्टव्यं तत्कथं साक्षान्मातृमानाद्यसंभवात् ॥७१०॥

(Now) it is asked, 'That Brahman, which is not divided into

knower etc., is the existent, having no duality in it, the eternal one—how can (it be said that) it is to be seen (*draṣṭavya*), since there is no possibility of any direct agent, the means of knowing etc., (which are) connected with it?' [710]

द्रष्टव्यं मनसैवैतन्नान्या गतिरिहेष्यते ।
कथं तदिति चेदत्र मानव्यापार उच्यते ॥७११॥

(The answer is:) 'This has to be known with the help of only one means, that is: by *manas*; there is no other way (*gati*) accepted (or understood) in this respect'.¹ If again it is asked, 'How can that be?'; then, for answering this (*atra*), this is stated, as the functioning of the means of knowing. [711]

¹This is for *iha* which means the seeing or knowing of the Brahman.

Verses 712-721 explain the *mānavyāpāra* understood by *Bhartr-prapañca* and mentioned in the preceding verse.

तत्त्वमस्यादिवाक्योक्तौ शब्दमात्रावलोकनम् ।
श्रोत्रेण क्रियते तस्य शब्दस्यालोचितस्य तु ॥७१२॥
स्वरवर्णपदोक्त्यानुपूर्वी या प्रविभागभाक् ।
प्रविभक्तक्रमवती मनसा तस्य कल्प्यते ॥७१३॥

First, there is merely grasping (lit. seeing) the words in the statements, viz. the sentences *tat tvam asi* etc. with the help of the sense of hearing, and, after that word is understood, (or, well-thought over), [712]

there is stated the division (i.e. cut into parts), the sequential (order) of the meanings, conveyed by the vowels, syllables, words etc. which the Śruti has, viz. which gets divided (into parts) with the help of *manas*. [713]

स्वेनार्थेनाभिसंबन्धः सिद्धशब्दस्य यः सदा ।
दृश्यते मनसैवासौ नातोऽन्येनेह केनचित् ॥७१४॥

Whichever relation exists in the senses of the individual (parts of) the (well-)formed word to its own meaning is grasped (lit. seen) by only *manas* and, therefore, not by anyone else as it is understood here.¹ [714]

¹This refers to the moment of understanding the meaning of the Śruti sentence (*vyutpattikāla*).

तत्रार्थप्रत्ययो योऽसौ प्रमातुर्मानसो भवेत् ।
अविशिष्टः स बाह्येन मेयेनार्थेन संगतेः ॥७१५॥

Whatever be the acceptance (lit. cognition) of the meaning (in, i.e. from, the sentence) that would be the modification of the *manas* of the knower;¹ that (object/meaning) signified is not modified (lit. characterized) by any external object to be known, since it² is associated with the (already existing) object. [715]

This explains the process of understanding the meaning of the words in common parlance of the world—naturally of the words of the Śruti also.

¹This is 'one who reads and understands the Śruti texts'.

²This refers to the grasping of the meaning that is stated earlier.

प्रत्ययश्च यथारूपो मानसोऽस्योपजायते ।
प्राज्ञ आत्मापि तादात्म्यात्तन्मयत्वं निगच्छति ॥७१६॥

And also grasping (of the object) in conformity with its form arises in the *manas* of this (individual self); then, this individual self, which is (now) the excellent knower (*prājña*) becomes one with that, through realising its own oneness with that (Ātman). [716]

मनोबुद्ध्योरभेदेन व्यवहारश्रुताविह ।

तत्रैवं सति योऽप्यस्य देवताविषयो भवेत् ॥७१७॥
 यथा श्रुतौ मनस्येव प्रत्ययः सोऽवतिष्ठते ।
 तन्मयत्वं तथैवैतिक्रमेणैव स मानवः ॥७१८॥
 द्वैतैकत्वं श्रुताच्छब्दात्पश्यतीह यदा ह्यसौ ।
 हैरण्यगर्भमात्मेति बौद्धं ज्ञानं तदा भवेत् ॥७१९॥

Here (is stated), in this statement of the functionings of *manas* and the intellect, as being non-distinct. This being so, whatever be this one's (i.e. the individual self's) thought regarding the deity—

[717]

as stated in the Śruti—so does that very thought become fixed (lit. gets a firm place) in *manas* itself of the individual. In the same way, that human being (achieves) oneness with that in this same order (as stated before).¹

[718]

When that person sees (i.e. understands) from the word 'heard' here (in this statement of the Śruti), the oneness in the duality, there would then be in his intellect the awareness that his own self is what is connected with Hiranyagarbha.

[719]

¹All along, there was mention made only of *manas*, but the association between *manas* and the intellect has to be understood—this is stated in the verse.

स खलुत्पन्नविज्ञानस्तन्मयः संस्तथा व्रजेत् ।
 तस्मिन्नैव स विज्ञान आत्मरूपे स्थितो भवेत् ॥७२०॥
 बौद्धेऽथ स यदा तत्त्वं परं समनुपश्यति ।
 तदा विविच्य रूपाणि क्रमशो यो धियः शुभम् ।
 वीक्षते केवलं शुद्धं तत्त्वं ब्रह्म सनातनम् ॥७२१॥

That person, in whom there has arisen the specific knowledge thus (about his own self), becoming one with that (i.e. Sūtra), attains to that (i.e. the status of the Sūtra); and, in that status of the Sūtra itself, he is possessed of specific knowledge¹ and becomes steady in the form of the Ātman.

[720]

When later, the person sees the highest reality in the knowledge of the intellect, then, having distinguished the (various) forms

of the same (i.e. the intellect) one after another, he sees only the auspicious, non-dual (lit. single), pure reality, viz. the ever-obtaining Brahman. [721]

In these verses there is description of the inner being's attaining to the status of the Sūtra.

¹Here the word *viññāna* can be taken as in apposition either to *saḥ* (i.e. *saḥ* and *viññānaḥ*) or to *ātmarūpe* (i.e. as *viññāne ātmajñāne*). We have taken (sa) *viññānaḥ*; this can be explained as *viññānam asya asti iti viññānaḥ*. The word *viññāna* is to be understood as 'one who is possessed of specific knowledge'.

In verses 722 and 723 there is stated *kramamukti*.

तन्मनोऽथ परे तत्त्वे लब्धलक्ष्यं स्व आत्मनि ।

रूपाणि विलिखत्साक्षान्निर्वाणं संप्रलीयते ॥७२२॥

परं तत्त्वं प्रदृश्यैवं मनस्यद्वैततां गते ।

विज्ञानं केवलं शुद्धं स्वात्मन्येवावतिष्ठते ॥७२३॥

Its (i.e. that being's) *manas* has stuck (lit. obtained) its own target¹ in the highest reality (which really is) the individual self itself thus determining exactly (*vilikhat*) the various forms (of the intellect), merges (finally) into (the Brahman viz.) its own extinction (*nirvāṇa*).² [722]

Having thus seen the highest reality when *manas* has attained the status of oneness (with the Ātman), there remains the pure knowledge alone,³ only by/in itself, in the Ātman. [723]

This refers to liberation of an individual self in the accepted sequence of its knowing the oneness of the Ātman (*kramamukti*).

¹This refers to *praṇavo dhanuḥ śaraḥ ...* (Muṇḍakopaniṣad 2.2.4).

²This word here has not any philosophical import; it refers only to extinction.

³It is *viññāna = ātmajñāna*.

In verses 724-728, there are statements about *manas* in the state of liberation.

दाह्यं दग्ध्वा यथा वह्निर्दाह्यनाशमनु स्वयम् ।
नश्यतीदं मनस्तद्वद्वैतमद्वैतरूपताम् ।
आपाद्य विषयं सम्यक्स्वयमेव प्रलीयते ॥७२४॥

As fire, after having burnt whatever had to be burnt, itself gets extinguished this *manas* also, which is associated with duality, (in the form of) its activity, having obtained the form of the non-dual Ātman, perishes (i.e. merges into the Ātman).

[724]

मनस्यस्मिन्निलीने तु यत्सुखं स्वात्मसाक्षिकम् ।
योगावस्थां परामेतामाहुर्योगविदो जनाः ॥७२५॥

And this state of that happiness (which is experienced by an individual) after the merger of his *manas* into it,¹ witnessed by one's own Ātman have the knowers of Yoga called the highest state of Yoga.²

[725]

¹In this context, SP cites *sarvavṛttinirodhe tv asaṃprajñātasamādhir iti (Jīvanmuktiviveka*, ed. S. Subramanya Śāstri and T.R. Śrīnivāsa Ayyaṅgar, Theosophical Publishing House, 1935, p.94, line 9).

²This refers to the *jīvanmuktāvasthā* of the knower of the Brahman.

भूमौ यथाहितं लोहं भूमित्वमुपगच्छति ।
मनोऽक्षरे धृतं तद्वदक्षरत्वं निगच्छति ॥७२६॥

As iron-ore (*loha*)¹ placed in the earth, attains the nature of the earth, in the same way does *manas*, which is fixed on the imperishable,² attain the status of the imperishable.

[726]

¹Regarding *loha* we note that it refers to any ore taken from the earth; not necessarily copper or iron (which is usually so understood).

²This is for the *akṣara* Ātman.

एतच्च दृष्टं लोकेऽपि यैर्भावैः संप्रयुज्यते ।
मनस्तन्मयतामेति तद्भावेनानुरञ्जितम् ॥७२७॥

And this is seen in the world¹ also, i.e. that *manas* becomes one with them, viz. those persons or things with whom or which it gets firmly connected, becoming tainted with the nature of the same. [727]

This is the support of some worldly matter of common experience for the truth conveyed in a Vedāntic discussion.

¹This stands for all worldly dealings.

एवमस्मिन्परे तत्त्वे भाव्यमाने मुमुक्षुणा ।
तद्भावमचिरेणैति स्थैर्यं चात्रैव गच्छति ॥७२८॥

Thus, when the highest reality is being pondered over by one who is seeking liberation, that one soon becomes (one with) it and here¹ itself obtains permanence (lit. steadiness). [728]

This is to confirm what is stated in the note on the preceding verse.

¹This refers to the state of liberation which obtains even while the individual is alive.

In verses 729-740, it is stated that the end (i.e. merger) of *manas*, is for a seeker of liberation.

मनोविनाशमन्वेष विज्ञानात्मा विलीयते ।
यथा संकल्पितश्चार्थ उभयोर्ज्ञानयोगयोः ॥७२९॥

And, after the merger (lit. destruction) of *manas*, the individual self, which is possessed of specific knowledge (*viññānātman*), merges (into the highest Ātman)—so this has been conceived as the truth (resulting from) the two, knowledge and Yoga.¹

[729]

¹This is to convey the sense of activity.

एतदेवमभिप्रेत्य तदुक्तं नेह किं चन ।
नानास्तीत्येवमेकत्वमस्मिन्शास्त्रेऽभिधीयते ॥७३०॥

Thus, having all of this in mind, the Śruti has stated *neha nānāsti kiṃ cana*— thus there is stated in the scripture, the nature of non-duality (lit. the singleness of the Ātman). [730]

मुक्तिप्रवेशोपायोऽयं यथोक्तेनेह वर्त्मना ।
उक्तो मनस एकस्मिन्प्रत्ययो मानसो यतः ॥७३१॥

This one is stated here in this way (as stated above), the means of entering (*manas*) into the state of liberation, since it is already said that the awareness of oneness of self belongs in reality to *manas*.¹ [731]

¹SP paraphrases this as *atyantadr̥dhapratyayah*. Also, *yataḥ*— cf. *prathamārthe yataḥśabdah*.

एकत्वधीव्यवस्थापि मानस्येवेति गम्यताम् ।
वृत्तिः सा त्वपरिक्षीणा मनोवृत्तिरियं भवेत् ।
तावद्यावदमी सर्वे विशेषाः स्युः क्षयं गताः ॥७३२॥

Let it be understood that this manner related to the knowing of the oneness of the Ātman belongs only to *manas* and that is a modification of *manas* which is its continued functioning; up to that time when all these distinct objects have perished.

[732]

स्वात्मन्येवाथ संशुद्धं ज्ञानमद्वैतरूपकम् ।
अवस्थितं भवेत्साक्षादेवं कृत्वेदमुच्यते ॥७३३॥

(Only) then, there comes to abide in the individual self knowledge, which is extremely pure and has the form of non-duality. Having directly experienced thus is expressed in the word *kṛtvā*. [733]

मनसानुप्रविश्येदं क्रमेणैकात्म्यमुत्तमम् ।
यत्नादप्रमयं तत्त्वं द्रष्टव्यं तद्विपरिचिता ॥७३४॥
कौटस्थ्याद्ध्रुवमक्षय्यं प्रत्यगात्मन्यवस्थितम् ॥७३५॥

After having entered into the highest (or, all-excelling) singleness (or, non-duality), by means of *manas* the knower¹ should in course of time (or, gradually) see with efforts the (usually/otherwise) unknowable truth, [734]
(which is) permanent (and) undecaying owing to its immutability, and the one having an (all time) abode in the inner self. [735]

This verse refers to the gradual process of one's liberation.
¹The one who has attained the status of Sūtra.

विरजः शुद्ध इत्यर्थ आकाशात्परतः स्थितः ।
अजो न जायते यस्मान्महान्सर्वमहत्तरः ॥७३६॥

virajah means 'one who is pure' (i.e. the Ātman) and then it has stood beyond *ākāśa*, since it does not become born (again) and, it is Mahat, because it is greater than all. [736]

This explains the meaning of *dhruvaṃ virajah*.

तमेवंविधमात्मानं ज्ञात्वा कुर्यान्मतिं दृढाम् ।
भावनाज्ञानसंतानसंरुढामविचालिनीम् ॥७३७॥
द्वैताभिधायकाऽशब्दान्ध्यानकाले न चिन्तयेत् ।
वाचं ते ग्लापयन्त्येतां येयमेकत्ववाचिनी ॥७३८॥

Having known that Ātman, who has been of this nature, a person should have a firm awareness (or faith), which does not get shaken and which has taken firm root (*saṃrūḍha*) in the continuous stream of impression and knowledge. [737]
 During the time of meditation or devotion to the worship of the Brahman, a person should not think of (or, remember) any words which express duality, (for) they render futile (lit. weaken)¹ this speech which is (as said just before) expressive of non-duality (lit. the singleness of the Ātman). [738]

¹The usual form should be *glapayanti*; but Sureśvara has used *glāpayanti*.

ग्लानौ तस्यास्तदर्थेऽस्य मनोऽस्मिन्नाधिवर्तते ॥७३९॥
 तस्मात्तु चिन्तयेदेतान्किन्तु यैकत्ववाचिनी ।
 वाक्पूर्वं चिन्तयित्वा तां तदर्थे धारयेन्मनः ॥७४०॥

(Since) *manas* of this individual does not remain fixed in this (Ātman) when that speech is weakened; [739]
 therefore, he should not think of these but having first thought over the speech which is expressive of non-duality (lit. the singleness) of the Ātman, he should steady his *manas* with reference to that speech. [740]

श्रीमद्भर्तृप्रपञ्चस्य श्लोकव्याख्येयमीरिता ॥७४१॥
 मनसैवेत्युपक्रम्य

Thus is stated the explanation of the *śloka*, which is given by the revered (Śrī) Bhartṛprapañca, [741]
 after having begun it with the words *manasaiva*. [742a]

सा त्विदानीं विचार्यते ।
 न्याय्यान्यायेति वा यत्नाद्युक्तिभिः प्रविभागशः ॥७४२॥

And (*tu*) it is now put under consideration, to see whether or not it is in conformity with reason, carefully taking different

arguments in its different parts and (adducing) reasons (for the same). [742b-d]

मनसैवानुद्घष्टव्यमिति यद्ववतेरितम् ।
सत्यमेतन्मनो मुक्त्वा न तस्यास्त्यन्यतो गतिः ॥७४३॥

As to what you have said, viz. (that reality) is to be seen with the help of *manas* only, it is true (i.e. that is right), because there is not now any way other than *manas* for knowing that. [743]

Cf. verse 711 above.

तत्त्वस्माभिर्यथाभाणि मनसैवेति दर्शनम् ।
मनसा शक्यते द्रष्टुं तत्तथैव प्रमान्वयात् ॥७४४॥

The truth is (conceived by you in the same way) as is stated by us; (so also) the seeing (of the reality) is only by *manas*. (This is so, since) it is possible to see reality with *manas* (only), as it becomes an object of right knowledge, only in that way (*tathaiva*): [744]

This is in agreement with the explanation of Bhartṛprapañca stated in verses 712 and 713.

प्रमाणव्यापृतिर्योपि भवतेहोपवर्णिता ।
सापि कामं भवत्वेव न दोषस्तत्र भण्यते ॥७४५॥
शब्दप्रधानं विज्ञानं प्रमातृव्यापृतौ पुरा ।
जायतेऽनन्तरं शब्दः स्वव्यापारक्रमादथ ।
ज्ञानप्रधानतामेति स्वार्थसंकेतवर्त्मना ॥७४६॥

Also, as to the functioning of means of knowing which you have described here (in this context), let that also be accepted. There is not any fault to be stated as occurring therein. [745]
First, there arises in respect of the functioning of the knower (i.e. hearer) the specific knowledge, where understanding of

(words) is prominent and, after that, each word, gradually doing its own function, (viz. conveying its own sense) becomes subordinate to knowledge¹ by way of (bringing out) its conventional meaning. [746]

Cf. verses 714 and 715.

¹Or, alternatively—comes to have knowledge as its principal (sense to convey).

वर्णस्वरादिक्रमवद्वाक्यरूपानुरञ्जितम् ।
अज्ञातार्थाधिगतौ तु ज्ञानं मानमितीर्यते ॥७४७॥

And (thus) knowledge which is tainted in accordance with the form (i.e. meaning) of sentence containing the order of letters, vowels etc. and leading gradually up to the understanding of the thing which was not known, is considered as a valid means of knowing (the meaning). [747]

शब्दाभिन्नं पुरा ज्ञानं शब्दरूपानुरञ्जितम् ॥७४८॥
स्वप्नमेये प्रमाणं तदिति यद्वदिहोदितम् ।
प्रमेयेऽपि तथैवैतत्पूर्वं मेयप्रधानकम् ॥७४९॥

As you have said here in this context, so it is, viz. first, knowledge becomes one with (lit. non-distinct from) every word, gets tainted (or, marked) in accordance with (or, by) the form of the words and then becomes a valid means of knowing its object; so also, in respect of the object of knowing (as what you have said), there is the object of knowing more prominent. [748-749]

Cf. verse 715 above.

मेयव्यापारतः पश्चात्प्राप्तज्ञानानुरञ्जनात् ।
गुणत्वं व्रजति ज्ञाने प्रमेयोऽर्थः प्रमातरि ॥७५०॥

Since there is after the functioning (of the means of knowing)

in relation to the object of knowing, knowledge becomes tainted with (or, marked by) whatever is known (lit. obtained through the means of knowing); the object which had to be known becomes, in this knowledge, subordinate (i.e. subservient) to the knower. [750]

Cf. verses 715 and 716.

अमितार्थानुगं ज्ञानं प्रमेयार्थानुरञ्जितम् ।
पूर्वोक्तेन प्रमाणेन संगतेर्मेय उच्यते ॥७५१॥

Knowledge, which follows that object of knowing that was not known earlier, and is tainted (or, marked) in accordance with the object of knowing if it is associated with the means of knowing, which is already stated, is called the object of knowing. [751]

मेयमानाभिसंबन्धो यथेह प्रतिपादितः ।
एवमेवैष विज्ञेयो मेयमानान्तरेष्वपि ॥७५२॥

Such is the relation between the object of knowing and the means of knowing it—as has been described (by you) here (i.e. in this context); this (relation) is to be accepted (only) in this way, in the case of the other objects of knowing also. [752]

मेयमानाभिसंबन्धान्मानमेयार्थसंकरात् ।
नश्यद्विशेषणत्वं तन्मानं याति फलात्मनि ॥७५३॥

Owing to the close association of the object of knowing and the means of knowing (it), and the intermingling of the two, viz. that which is to be known and the means of knowing, that means of knowing, being lost (on account of the momentariness), becomes a distinguishing attribute at the (time of) result. [753]

तावन्मात्रप्रधानत्वात्प्रमाणफलमुच्यते ।
इत्येष मानव्यापारो यथावदनुवर्णितः ॥७५४॥

Only that being the prominent (end of the knowing activity), it is described as the result (obtained) by a valid means of knowing—this is the function of knowing—as you have correctly (*yathāvat*) described. [754]

So far, Sureśvara has restated the acceptable part of explanation given by Bhartṛprapañca. There will now follow his argument against him.

व्यापारः कर्तृतन्त्रः स्यात्तनुवाग्बुद्धिसाधनः ।
पुंसस्तत्र स्वतन्त्रत्वाद्विद्याच्छास्त्रं प्रवर्तकम् ॥७५५॥

In this context (*tatra*), the activity (on the part of an individual), having a body, speech and the intellect as the means (of accomplishing that activity), depends on the agent of the activity; because of that individual's independence, the scripture is only the impeller (of the individual's activity). [755]

वस्तुतन्त्रं तु संघत्र विज्ञानं जायते बलात् ।
तत्रापुरुषतन्त्रत्वान्न कश्चिद्विधिरिष्यते ॥७५६॥

Where, however, there arises, with (all its) force, the specific knowledge depending on (the nature of) the (real) thing, there is not accepted any injunction, since that (i.e. knowledge depending only on the object) does not depend on an individual's activity. [756]

व्यापारः कर्तृतन्त्रो हि तमेतमितिशास्त्रतः ।
नित्यो ध्यानादिरूपो वा स स्याद्बुद्धिविशुद्धये ॥७५७॥

Indeed, from (the statement in) scripture, viz. *tam etam* ... (it is clear that) there is an activity which involves dependence on the agent; that is always of the nature of meditation (or

worship); and that would be (only) for purification of the intellect. [757]

तमोरजोभ्यां मुक्ता धीर्यदा स्यादुक्तसाधनात् ।
शमादिमान्यथातत्त्वमथात्मानं समीक्षते ॥७५८॥

When the intellect would become free from *tamas* and *rajas* (i.e. from total ignorance), with the help of the means stated (before), then an individual practising *śama*, *dama* etc. sees the Ātman as it is. [758]

तस्मिन्दृष्टेऽथ सर्वस्य तावन्मात्रैकतत्त्वतः ।
सर्वाज्ञानसमुच्छित्तेः सर्वज्ञानोदयस्तथा ॥७५९॥

On that (Ātman) being seen, then, all of the things come to be/turn only into one truth in them, viz. being one with that, owing to the destruction of all ignorance, and also there is the knowledge (of the Ātman as) all. [759]

AnSS edition reads the variant *sarvajñānodayāt tathā* for *-dayas tathā*. We believe, that reading should have been better as it would be in tune with the tenor of the verse.

निःशेषपुरुषार्थाप्तिः सर्वदुःखौघनिहनुतिः ।
यतोऽत आत्मनि ज्ञाते कृतकृत्यत्वहेतुतः ॥७६०॥
वाङ्मनःकायसाध्याया व्यापृतेः स्यादसंभवः ।
फलावधित्वात्सर्वेषामुपायानां जगत्यपि ॥७६१॥

Since there is the achieving of the entire group of the ends of human life, the removal (lit. concealment) of the flow of all miseries and, therefore, the obtainment of having achieved all that is to be achieved, on knowing the Ātman; [760] there is impossibility of any activity which can be accomplished with speech, *manas* and body— as, in the world also, all means of achievement (continue to function) only up to the end (lit. obtaining the results). [761]

प्रमेयमयतां कामं प्रमातैव ब्रजत्वयम् ।
तस्यैव परिणामित्वात्प्रमेयेन च संगतेः ॥७६२॥

Be it granted that this knower itself comes to be what is to be known; since that alone has (numerous) modifications¹ and there is association of it with what is to be known. [762]

¹These are falsely attributed to it.

षड्भावविक्रियाभावादसङ्गाच्चाप्यनात्मना ।
विज्ञानादिमयत्वं स्यान्न स्वतः प्रत्यगात्मनः ॥७६३॥

The non-Ātman could come to have the nature of being made up of specific knowledge (*viññāna*) etc., owing to its having the six forms of modifications (lit. becoming or things)¹ and the non-attachment of the inner self, by its own nature. [763]

¹Or alternatively this could be 'owing to the absence of the six modifications of beings or things' and this should refer to the inner self. And this alternative appears to be more likely, since the word *asaṅgāt*, which immediately follows, goes with the inner self.

एवंभूतोऽपि चाज्ञातः कार्यकारणरूपताम् ।
ब्रजत्येष यथा रज्जुरज्ञाता सर्परूपताम् ॥७६४॥

Even if the individual self is so, being unknown (before), it attains the forms of cause(s) and effect(s) in the same way as a rope, which, while unknown, comes to assure the nature of a serpent. [764]

मनआदेरशेषस्य प्रत्यगज्ञानहेतुतः ।
हेतुध्वस्तौ भवेद्ध्वस्तिरकार्याकारणेऽक्षरे ॥७६५॥

Since *manas* etc., all of them, have the cause (for their

existence) in ignorance about the inner self; therefore, after the destruction of that cause, there would be their merger (lit. destruction) in the imperishable which is neither an effect nor a cause. [765]

तत्त्वबोधात् न नाशः स्याद्व्यतिरेकान्वयौ न च ।
प्रत्यङ्मात्रैक्याथात्म्यादविद्यादेरिहात्मनि ॥७६६॥

There would not really be the destruction (of ignorance) unless there arises the awareness of reality; so also there would not be possible the method of Anvaya and Vyatireka,¹ since on account of only the non-duality of the inner self being the real nature of the Ātman, there has been (existence) of (only) ignorance (imagined) in the Ātman. [766]

¹ Literally, no dissimilarity with and similarity to (anything else).

In verses 767-769 it is stated that there would be rebirth contingent, if manas is not overcome with the stultification of its functioning.

विनाशः क्रियते यत्र व्यतिरेकोऽथवान्वयः ।
कार्यकारणसंबन्धान्मुक्तिस्तत्र सुदुर्लभा ॥७६७॥

(This argument is made on the ground that) where there is destruction effected (or) where that notion of distinction or similarity is involved, there would be extremely difficult (to think of) liberation for those¹ which have among them the relation of cause(s) and effect(s). [767]

¹ This refers to *vināśa*, *vyatireka*, *anvaya*.

ध्यानादिसंस्कृतं चेतो यदि मुक्तौ प्रणश्यति ।
सभावनं सहेत्वेवं ध्यानं सर्वमपार्थकम् ॥७६८॥

If *manas*, which is purified by meditation etc., (is accepted

to) perish in (i.e. after attaining) the state of liberation, every kind of meditation would thus be futile (lit. meaningless), together with the impressions (created thereby), the cause (viz. those impressions which are basis of it). [768]

अथ मुक्तौ तदन्वेति कारणेन सहान्वियात् ।
अज्ञाने सति संसारो वद केन निवार्यते ॥७६९॥

If, on the contrary, it is accepted as continuing to occur (in existence) in the state of liberation also, as in connection with the cause (i.e. the Ātman), then, ignorance remaining there, tell me what could set aside transmigratory existence.¹ [769]

¹That is, what is said to be liberation would really be the absence of it.

Verses 770-774 point out that iron(-ore) etc. are but the earth.

लोहादेः कारणं भूमिर्भूमिष्ठं भूमितामितम् ।
विरोधिहेतुसंपर्काल्लोहाद्येति न वायुताम् ॥७७०॥

The origin of iron(-ore) etc. is the earth (and therefore) being put into the earth, that could become possessed of the nature of the earth; (as against this) iron(-ore) etc., when in connection with the origin of what is opposed to it in nature, it could not become possessed of the nature of the wind. [770]

Iron(-ore) etc. is not the product/effect of wind and, therefore, it would never become one with the latter. This example is to support the thought of the preceding verse by two examples resting on Anvaya and Vyatireka of cause(s) and effect(s).

स्वकारणस्थं नित्यं च कार्यं सर्वमिदं मतम् ।
न चैति कारणत्वं तत्तस्मादुक्तमपेशलम् ॥७७१॥

It is accepted that all this, i.e. which is effect, ever abides

in its own cause and therefore it cannot be said to have come to be possessed of the nature of the cause; and, therefore, what is said (earlier) is not reasonable. [771]

Read SP: *sarvam apīdaṃ kāryaṃ sadā svakāraṇe brahmaṇi tadātmanā sthitam iti pariṇāmanavādinām matam atas tat kāryaṃ kadācit kāraṇatvam etīty ayuktaṃ tathā ca brahmaṇaḥ kāraṇatvaṃ vastuto na siddhyed ity arthaḥ*. Thus, this verse refutes the view of the Sāṃkhyaś:

कुलालाद्युत्थसंस्कारविनाशादेव तत्स्वयम् ।
कार्यं कारणतामेति न तु तत्कारणस्थितेः ॥७७२॥
आरभ्यं यत्र कार्यं स्यात्तत्रैव व्यापृतिर्ध्रुवम् ।

That effect, i.e. a pitcher, comes to have the nature of its own cause, i.e. clay, when there is the removal (lit. destruction) of the modifications (*saṃskāras*) which have arisen from (the activity of) the potter etc.; but not because it has always remained in (the same form as of) the cause. [772]
(Again,) where an effect has to be begun,¹ only there would necessarily occur someone's activity. [773ab]

This explains the basis of the thought in the preceding verse.
¹Cf. verse 768 above.

तमित्यस्याः श्रुतेर्ज्ञेया भावनाज्ञानकर्मणाम् ॥७७३॥

This activity (*bhāvanā*) (i.e. meditation etc.) is to be known only in relation to the activities originating in ignorance—(this is to be known) from the Śruti statement *tam etaṃ (vedānuvacanena)*.¹ [773cd]

¹BU 4.4.22.

ब्रह्मैव सन्स्वतो यत्र ब्रह्माप्येति तमोहनुतेः ।
नामीषां व्यापृतिस्तत्र ह्युत्पत्त्यादिविरोधतः ॥७७४॥

When a person, himself being the Brahman, comes to be the Brahman by the removal (lit. concealment) of ignorance, there is not any activity of these (viz. meditation etc.) because there has (already) been an opposition to origination etc. [774]

Verses 775-783 deny that the repetition in the process of knowing would bring about oneness of the Brahman.

प्रत्यगज्ञानविध्वंसिज्ञानाभ्यासोऽपि नेष्यते ।
सकृदात्मप्रसूत्यैव बोधस्याज्ञानहानतः ॥७७५॥

It is not also accepted that there is repetition (of acquiring) the knowledge which removes (lit. destroys) ignorance about the inner self; since there is the removal of ignorance effected by that knowledge which has its own rise only once. [775]

न ह्यावृत्तिव्यपेक्षं सन्मानं जगति किं चन ।
स्वप्रमेये तमो हन्ति स्वसाध्ये साधनं यथा ॥७७६॥

Indeed, there is not any means of knowing in the world, which, depending on repeated use of it, is an authoritative means of knowing; (for), it removes ignorance in respect of the object to be known by it (just) like a means towards its own effect to be achieved (would become useful). [776]

भावनाजं फलं यत्स्याद्यच्च स्यात्कर्मणः फलम् ।
न तत्स्थासिन्वति मन्तव्यं पण्यस्त्रीगमनं यथा ॥७७७॥

It is to be known that a result is produced by some activity and that which is the result of an activity is not permanent, in the same way as (an individual's) union with (lit. going to) a courtesan. [777]

The example here indicates an activity without any scripture-sanctioned purpose.

संसार्यस्मीति चेद्धवस्ता कोटिकल्पोपबृंहिता ।

स्वलपीयोऽभ्यासजा स्थास्न्वी भावनेत्यत्र का प्रमा ॥७७८॥

(An objection is raised:) 'If there has been a firm faith, which has been produced by (even) a little of repetition (of meditation etc.) and which is strengthened in numerous (lit. crores of) Kalpas (in the form), 'I am a transmigratory being', and if it is destroyed, then what right knowledge could be (permanent)?' [778]

तस्मात्र साधिवदं सर्वं भावनासंचयार्थिभिः ।

ध्यानादि यदुपन्यस्तं निःशेषानर्थमुक्तये ॥७७९॥

वाक्येनावेदितं कृत्स्नं यदि साक्षात्प्रबोध्यते ।

वस्तु बुद्धौ वद ध्यानव्यापारात्किमपेक्षते ॥७८०॥

'Therefore, this (i.e. what is stated earlier) is not well-said.' (An answer is given:) 'What is presented here, viz. meditation etc., by those who have the purpose of strengthening the faith, is only for the sake of release from all of the undesired effects'.

[779]

(An objection is raised:) 'If the entire reality which is made known by the Śruti sentence, is known directly in (a person's) intellect, then tell me what is expected from the activity of meditation?' [780]

निःशेषानर्थसंप्राप्तिकैवल्यानाप्तिकृत्तमः ।

तच्चैज्ज्ञानादपद्धवस्तं समाप्तं यच्चिकीर्षितम् ॥७८१॥

'If, darkness, which causes the non-obtainment of separating (the sentient individual) from the entire mass of the undesired, (affecting that individual), is destroyed by knowledge, then (it has to be accepted that the individual) has (already) obtained what is desired by him to achieve. [781]

कृतं चिकीर्षितं सर्वं बुद्धं यच्च बुभुत्सितम् ।

सम्यग्ज्ञानोदयात्सर्वं वर्जितं यज्जिहासितम् ॥७८२॥

All that was sought to be achieved is accomplished and all that was sought to be known has become known, through the rise of the proper knowledge (and) all, which is sought to be abandoned, is abandoned. [782]

तथेप्सितं च संप्राप्तमित्येवं कृतकृत्यता ।
प्रत्यग्याथात्म्यसंमोहद्वंसमात्रात्प्रबोधतः ॥७८३॥

And, therefore, all that was sought to be achieved is obtained; thus, there arises the state of a person's having done what had to be done, through the knowledge which merely destroys the delusion (or, ignorance) about the true knowledge of the inner self. [783]

Verses 784-788 convey the significance of the injunction prajñām kurvīta.

समर्पितं चेच्छब्देन बुद्धौ वस्तु यथोदितम् ।
प्रज्ञां कुर्वीतेति विधिः किमर्थ इति भण्यताम् ॥७८४॥

(An objection is raised:) 'If, as you have said, "the (real) thing is known by the (Vedic) statement in a person's intellect," then tell me for what purpose is there the injunction *prajñām kurvīta*?' [784]

न चेत्समर्पितं साक्षाद्वस्तु श्रुत्या यथोदितम् ।
अप्रामाण्यं श्रुतेः प्रापत्स्वार्थस्याप्रतिपादनात् ॥७८५॥

(The answer is given:) 'If the (real) thing were not directly said (i.e. conveyed) to an individual by the Śruti, there would then follow unauthoritativeness of the Śruti by its not conveying its own meaning (i.e. the subject-matter)'. [785]

स्वप्रमेये प्रमाणं सत्प्रवृत्तं स्वात्मलाभतः ।

अज्ञानाद्यनिरासेन नास्ति लोके प्रबोधकम् ॥७८६॥

A means of knowing which begins to function after it has come to the attainment of one's self is said to be good with respect to the object of its knowing; it (i.e. any means of knowing) is not informative (about any thing) in this world by the removal of ignorance etc. (about the same). [786]

अज्ञानमिथ्यासंशीतिव्यतिरेकेण नापरम् ।
प्रत्यर्थि मेयविषये मानस्येहास्ति किं चन ॥७८७॥

In our worldly dealing (*iha*) with respect of the means of knowing, there is nothing which is opposed to the object to be known, viz. what is other than ignorance, falsity and doubt. [787]

अज्ञानादित्रयं बाध्यं मेययाथात्म्यसंश्रयात् ।
मानं बाधकमेवात्र बाध्येन न हि हन्यते ॥७८८॥

The three beginning with ignorance¹ can be stultified by an individual's understanding (lit. resorting to) the true knowledge of the object of knowing. Here it is only a means of knowing² which is the stultifier and it is not stultified by what is (known as) to be stultified (lit. struck down).³ [788]

¹Cf. the preceding verse—the two beside ignorance are falsity and doubt.

²It intends to refer to the Śruti which is the best stultifier.

³The second half of the verse states the rule about *bādhya-bādhaka* relation among the means of knowing.

Verses 789-795 speak about the result of knowledge, removing the ignorance about the nature of the Ātman.

बाध्यस्य बाधनादेव प्रमाणस्य प्रमाणता ।
स्वमेयतत्त्वसंबन्धलब्धरूपस्य सर्वदा ॥७८९॥

It is ever (known) that an authoritative means of knowing becomes authoritative only through stultifying what is to be stultified, that *pramāṇa* has come to have its nature (viz. authoritativeness) as a result of the connection with the true nature of the object of its knowing. [789]

नादग्ध्वाभ्याहितं दाह्यमग्नेरग्नित्वमिष्यते ।
यथा बाध्यमबाधित्वा नैवं बाधकता मितेः ॥७९०॥

As the nature of fire in the case of fire is not accepted if it has not burnt what is to be burnt; so also, right knowledge cannot (be said to) have the nature of being a stultifier if it has not stultified what is to be stultified. [790]

न च प्रामाणिकं ज्ञानमुत्पत्त्यादौ नियज्यते ।
स्वमेयव्यक्तितस्तस्य न कार्यान्तरमिष्यते ॥७९१॥

And further, knowledge which has resulted through the operation of a certain (proper) means of knowing cannot be (or, is not) employed in the production (of the object of its knowing) etc.;¹ it is not expected to have any function other than revealing its own object of knowing. [791]

¹SP clarifies this saying: *pramāṇajñānasyotpattyādiphalatvam aprāmāṇikam iti bhāvah.*

न च मानान्तरैर्मैये मानस्येष्टा विरोधिता ।
असाधारणमेयत्वान्मानानां चक्षुरादिवत् ॥७९२॥

Further, in respect of the object of knowing (which becomes known by means of knowing) it is not accepted that other authoritative means of knowing are opposed to that means of knowing (by which the object of knowing has become known), since all the means of knowing have for the objects of knowing an uncommon¹ object of knowing, as for instance,

eye etc.²

[792]

¹Those means of knowing alone are peculiar to them, not others.

²This refers to anything else than an eye which cannot be taken as the means of seeing.

मानान्तरैर्विरोधश्चेन्मानस्याभ्युपगम्यते ।

तदुच्छितौ न हेतुः स्याद्विरोधस्य प्रमाश्रयात् ॥७९३॥

If it is accepted that there is an opposition of other means of knowing to an authoritative means (knowing its object of knowing), then there would not be any cause for its removal, the opposition having a basis in right cognition (of the object of knowing).

[793]

It may be noted that Sureśvara often makes such general remarks about *pramāṇas*, while his intention is a reference to the matter in hand. Read the introductory to this verse (in SP): *astu vā tattvamasyādivākyasyādhyakṣādibhir virodhas tathāpi sa prātibhāsiko vā vāstavo veti vikalpyādyam anigīkṛtya dvitīye doṣam āha—mānāntarair iti.*

न च सामान्यतो ज्ञानं ल्यबन्तेनाभिधीयते ।

प्रत्यग्वस्तु यतः सिद्धमसामान्यविशेषवत् ॥७९४॥

Also, knowledge about the generally accepted (object of knowing) is not expressed (in some sentence) by an absolute form of a verbal root (*lyabanta*) in it; since (the knowledge of) the (real) thing inside a (human) body (i.e. the inner self) which is self-established does not have its general and particular (aspects/parts).

[794]

सामान्येनेक्षमाणस्य विशेषेण च वस्त्वदम् ।

अपवादः पुरा तस्य न पश्यन्तीति वर्णितः ॥७९५॥

This (real) thing (i.e. the inner self) is being seen¹ earlier in its general nature and (now) in its particular form—thus (this sentence, viz. *viññāya* ...) is stated as an *apavāda* (i.e. for conveying an exception), i.e. to convey the sense: it was not then seen (in its full/proper form). [795]

¹Possibly, *īkṣamāṇasya* is for *īkṣyamāṇasya*. Therefore, even *paśyanti* (that comes later) is to be taken as *drṣṭam*.

Verses 796-802 refute Maṇḍanamiśra's view on this sentence.

अन्ये तु पण्डितमन्याः संप्रदायानुसारतः ।
विज्ञायेति वचः श्रौतमिदं व्याचक्षतेऽन्यथा ॥७९६॥

And yet others, who look upon themselves as Paṇḍitas 'learned or wise', explain this Śruti statement, viz. *viññāya* ..., in (yet) another way, in accordance with their tradition.¹ [796]

It should be noted that SP identifies this portion as pertaining to the view of Maṇḍanamiśra—a great Mīmāṃsaka—earlier identified as Sureśvara himself?

¹This refers to the Mīmāṃsaka Maṇḍanamiśra's explanation of the Śruti sentence; it runs up to verse 810.

तत्त्वमस्यादिवाक्योत्थविज्ञानेन यथोदितम् ।
विज्ञाय वस्त्वसंसर्गि प्रज्ञां कुर्वीत यत्नतः ॥७९७॥

Having well (or, fully) known the (real) thing, the unattached (or, unrelated to any thing, i.e. reality) which is described (in the Śruti) in sentences such as *tat tvam asi*, with the help of the specific knowledge that arises from statements that a person comes to possess—let him with (repeated) effort¹ secure clearer form of that knowledge. [797]

¹Read SP: *yatnata ity āvṛttiḥ sūcyate*; cf. *nididhyāsītavyaḥ* in BU 2.4.5 (=4.5.6).

नन्वत्रापि कृतैवासौ ल्यबन्तेनाभिधीयते ।
प्रज्ञातः करणं तस्या भूयः कस्माद्विधीयते ॥७९८॥

(A doubt is asked:) 'But, indeed, even here (in this theory) that specific knowledge which has been obtained already, is expressed with an expressed absolute form; therefore, why is it that it is again laid down for acquisition?' [798]

This verse conveys an argument similar to that made in verses referring to the view of Bhartṛprapañca.

मैवं पदार्थसंसर्गरूपस्यैवातथात्मके ।
ऐकात्म्ये वाक्यहेतूत्थबोधस्योद्भूतिकारणात् ॥७९९॥
ब्रह्मासंसर्गि तद्यस्मादसामान्यविशेषवत् ।
संसर्गरूपं वाक्योत्थं ज्ञानं नीलोत्पलादिवत् ॥८००॥

(The answer is:) 'May you not think so. Since the singleness of the Ātman has been understood from the knowledge that has come from the statement in the Śruti which is the source (lit. cause) of it, which is of the nature of the connection together among the meanings of (different) words (in them) and also which is not of the nature of that (*ātman*), [799] i.e. the Brahman, unrelated (to anything else); and since that does not have any common or particular character.¹ (As against this) the knowledge that has come from the sentences is of the nature of the interrelation (of a verse and the word-meanings) as in the case of (words like) blue and lotus.' [800]

¹The knowledge of the Brahman consists in the non-relation of various objects and their attributes conveyed by the words in common parlance; therefore, the knowledge of it is not like our usual knowledge in common life. This is clearly stated in just the next verse.

स्वभावतोऽखिलं वाक्यं संसर्गात्मकमेव हि ।
परोक्षवृत्त्या च तथा वस्तु बोधयति स्वतः ॥८०१॥

Indeed, all sentences¹ which are of the nature of the interrelation (of words and their senses) are by their nature conveyors of knowledge, and convey some things¹ which are not directly perceptible.² [801]

¹The singular form in the original is indicative of the plural sense.

²For example, the sentences convey such things as *svarga* which are not directly perceptible.

Verses 802-810 state by way of a doubt that the sentence-meaning (comprising the meanings of the words in the same) is prajñā that leads to the realisation of the Brahman.

स्वस्वभावं न चोल्लङ्घ्य स्वभावान्तरसंश्रयात् ।
ब्रह्मासंसर्गि साक्षाच्च शब्दः शक्नोति बोधितुम् ॥८०२॥

Therefore, words (in the scripture) cannot convey the directly perceptible and unattached¹ Brahman by transgressing their own nature and by resorting to another nature. [802]

This refers to the knowledge acquired after understanding the meanings of different words (though, a word in the singular is actually stated!) in the sentences. Naturally, therefore, they relate to some indirectly perceptible object as heaven etc. and thus they do not convey the knowledge of the Brahman which is directly perceptible.

¹Or, unrelated to anything else.

अलब्धब्रह्मयाथात्म्यं ज्ञानं वाक्योद्भवं यतः ।
तस्मात्प्रज्ञां प्रकुर्वीत साक्षाद्ब्रह्मैकगोचराम् ॥८०३॥

Since knowledge, which has arisen from the (scriptural)

sentences, does not convey the nature of the Brahman as it is; therefore, let a person make an effort to acquire the knowledge which has to convey directly only one object, i.e. the Brahman. [803]

अपास्ताशेषसंसर्गं यया ब्रह्माधिगम्यते ॥८०४॥
केनेति च व्यपेक्षायां विज्ञानेनेति गम्यते ।
ल्यबन्तोक्तेन सांनिध्यात् ततोऽन्यदपेक्ष्यते ॥८०५॥

And with this (specific knowledge arising from the sentences) is known the Brahman which is without (lit. has cast off) all relations (to anything external)—this is in answer to the question 'By/With what ...?', and, therefore, with a statement of a form ending with the suffix *-lyap* being nearby, nothing else than that¹ is expected. [804-805]

¹This refers to *prajñā*.

योग्यं संनिहितं चेदं साकाङ्क्षं च समीक्ष्यते ।
विज्ञानं यल्ल्यबन्तोक्तं तदेवात्र तु साधनम् ॥८०६॥

Further, this knowledge (arising from a sentence) expects that there is in the nearness (the statement of what is) suitable—that knowledge expressed in the form ending with the suffix *-lyap* is here the means of knowing the (Brahman later). [806]

तस्माद्वाक्योत्थविज्ञानसाधनाभ्यासतोऽनिशम् ।
प्रज्ञां कुर्यादसंसर्गिब्रह्मयाथात्म्यबोधिनीम् ॥८०७॥

Therefore, (a person) should acquire the knowledge which brings about the awareness of the real nature of the unattached Brahman, by a continuous repetition of the means of specific knowledge which arises from the (Śruti) sentences (containing mutually related words and meanings). [807]

अपेताशेषसंसर्गं तयैव ब्रह्म गम्यते ।

यतोऽशेषतमोहन्त्री प्रज्ञा सैवात इष्यते ॥८०८॥

Since that knowledge, by which becomes known the Brahman which is without all connections (among words and meanings) and which thus destroys delusion completely, is desired (as a result). [808]

साक्षाद्दर्शनसिद्धयर्थमन्यत्रापि विधीयते ।
निदिध्यासनवाक्येन साधनं ध्यानलक्षणम् ॥८०९॥

Elsewhere¹ also by a sentence regarding *nididhyāsana* is there prescribed a certain means of accomplishing the direct knowledge (of the Brahman), characterized as meditation. [809]

¹BU 2.4.5 (=4.5.6).

इत्येवमादिवाक्यानि गम्भीरन्यायवेदिनः ।
केचिद्व्याचक्षते यत्नादत्र प्रतिविधीयते ॥८१०॥

This and such other sentences¹ do some serious thinkers explain with effort, in this respect—that is now stated (the following) in refutation. [810]

¹This refers to ĀU 8.7.1, as SP points out.

In verses 811-814, the view of Maṇḍanamiśra (stated in verses 797-810) is refuted.

मानान्तरापरिज्ञाते प्रमेयार्थे प्रमां स्फुटाम् ।
मेयाज्ञातत्वबाधेन कुर्वन्मानमितीर्यते ॥८११॥

That is called a means of knowing, which causes a clear and right understanding about the object to be known, when it has not been known with the help of any other means, and in such a way that it removes (lit. stultifies) the unknownness in respect of what is to be known. [811]

On this, SP writes the clarification of the different attributes of a means of knowing thus: *tat saṁvādavisamvādābhyām phala-bhāvena cābhāsatvaṁ nirasitum viśeṣaṇāni*.

ब्रह्मानधिगतं चेदं वाक्यादन्यैः प्रमान्तरैः ।
तद्यथा बोधयेद्वाक्यं तत्तथैवेति गृह्यताम् ॥८१२॥

Therefore, that Brahman should be taken to be such as was not known before from any (other) sentence and by other ways of knowing and so also as this sentence (from the Śruti) conveys. [812]

प्रमाणादेव यत्प्राप्तं कथं तदतिशङ्क्यते ।
ब्रह्म संसर्गरूपं वा यदि वातोऽन्यथा श्रुतेः ॥८१३॥

How can that be doubted, i.e. that which is known from an authoritative means? Therefore, the Brahman, whether having a form that is connected with (any other objects), or, that is otherwise than what should be taken from the Śruti. [813]

प्रमाणतोऽपि संप्राप्तं यदि वस्त्वतिशङ्क्यते ।
तदा शङ्कानिवृत्त्यर्थं मानादन्यत्किमिष्यताम् ॥८१४॥

If the (real) thing is doubted, even if it is learnt (lit. obtained) from an authoritative means of knowing (i.e. the Śruti); then, what else than the authoritative means should one accept or desire for the removal of the doubt (about the nature of it)? [814]

Verses 815-832 state the prima facie view that there is a sequence among the means of knowing the Brahman.

न चापि स्वप्नमेयेऽस्ति मानानां बोधहेतुतः ।
तारतम्यं यथा कार्ये कारकाणामसंभवात् ॥८१५॥

Further, there is not any gradation in the case of the various means of knowing for (knowing) their own object, since they are the causes of understanding (the same), in the same way as (there is gradation) not possible in the case of the *kāraṇas* 'factors of producing' some effect that is to be produced. [815]

SP and NKL (ms. p.762, 'having the same purport) explain this thus: *cakṣuṣo dūrastham vṛkṣādy apekṣya vastv iti vā dravyam iti vā sāmānyenādaḥ bodhamādāya punaḥ samīpagamanādy-apekṣayā vṛkṣo 'yam iti tattvajñānahetutvavat prathamam śabd-asyāpi svabhāvam anusṛtya saṃsrṣṭāparokṣatayā brahma bodha-yatas tadabhyāsasacivasyāsaṃsrṣṭāparokṣabodhitā.*

न च प्रमान्तरैः साक्षादज्ञाते ब्रह्मवस्तुनि ।
अथवावस्त्विति ज्ञानं वक्तुं शक्यं विपरिचिता ॥८१६॥

And it is not possible for (even) a learned man to state that the knowledge in respect of the (real) thing, i.e. the Brahman, which was not directly known by any other way (or means) of knowing, is not in conformity with the (real) thing as it is. [816]

This is to stress that the knowledge about the Brahman given by the Vedic sentence cannot be false.

अपि मानान्तराज्ज्ञाते तद्विरुद्धस्वभावके ।
न चैवं युज्यते वक्तुं द्वयोरपि मितित्वतः ॥८१७॥

Also, it is not reasonable to say that, in respect of what is known by other way of knowing and also in respect of what is in nature opposed to that (i.e. the (real) thing, the Brahman), as (not authoritative), since both of them are of the nature of proper knowledge (from those means of knowing).¹ [817]

¹SP states the reason for it thus: *mānāntaravat tan-mānatvasyāpi durvāratvād ity arthaḥ.*

प्रमान्तरेण चेज्ज्ञातं ब्रह्मासंसर्गरूपकम् ।
कृतत्वात्तर्हि प्रज्ञाया निष्फलोऽयं पुनर्विधिः ॥८१८॥

Therefore, if the Brahman becomes known by any other way of knowing, the Brahman of the nature of what is not connected with (any other objects or other means of knowing)—then, since (the knowledge) has been already acquired, this injunction, which stipulates *prajñā* 'meditation', becomes unnecessary (lit. fruitless). [818]

प्रज्ञायाश्च समाप्तत्वादविद्याया निराकृतेः ।
पुरुषार्थस्य चाप्तत्वात्किमर्थं विधिशासनम् ॥८१९॥

Since (the effect of *prajñā*) 'meditation' is obtained, the ignorance is removed and the end of human endeavour has been obtained, what then is the purpose of the instruction of Vedic injunction? [819]

वाक्यमानोद्भवं ज्ञानमयथावस्त्वतीर्यते ।
यथावस्त्वप्रमोत्थं च चित्रं सर्वज्ञचेष्टितम् ॥८२०॥

It is said, that the knowledge which arises from the authoritative means of knowing, i.e. Vedic sentence, is not in accordance with the nature of the (real) thing, as it is, and that the knowledge which arises from the constant study¹ and is in conformity with the (real) thing is excellent or distinguished—all this is the doing of an omniscient person!² [820]

¹Cf. SP: *apramābhyāsaḥ*. It is called *apramā* (lit. unauthoritative or incorrect knowledge), perhaps because the stage of perfect knowledge is not yet attained. It is a stage of repeated exercise, therefore unauthoritative.

²Sureśvara uses the word *sarvajñā* which may not be necessarily taken for the Buddha; he seems to be scoffing at such a person.

न च मिथ्याधियोऽभ्यासात्सम्यग्ज्ञानसमुद्भवः ।
तथा सत्यप्रयत्नेन मुक्तिः स्यात्सर्वदेहिनाम् ॥८२१॥

Further, there cannot arise the right knowledge from repeating the false learning; (for) in case that is so, there would be liberation of all the embodied beings without any effort (to secure it). [821]

संसारमिथ्याविज्ञानमभ्यस्यन्त्येव सर्वदा ।
प्राणिनो न च सम्यग्धीस्तेषां ब्रह्मणि जायते ॥८२२॥

Human beings ever repeatedly pursue the knowledge, which is (in reality) false, about the transmigratory world and there does not arise in them the proper knowledge in respect of the Brahman. [822]

सम्यग्ज्ञानप्रसूतेश्च विघातायैव जायते ।
मिथ्याज्ञानाभ्यासहेतुः संस्कारो न तु जन्मने ॥८२३॥

The impression, created (on a person's mind) by the repeated pursuit of false knowledge becomes the cause only for destruction and the rise of right knowledge which is certainly not for (giving rise to subsequent/further) birth(-cycle). [823]

तथा च प्राह भगवान्व्यासः सत्यवतीसुतः ।
पूर्वमर्थान्तरे न्यस्ता कालान्तरगता मतिः ॥८२४॥

So has the revered Vyāsa, the son of Satyavatī, said: 'A certain thought, which was earlier fixed on some other matter becomes a firm thought in later time (i.e. in births) also'. [824]

As in the case of verse 569, this verse is also not traced, though it is reported to be the composition of Vyāsa.

तेनान्यं सन्तमप्यर्थं द्वेषात् प्रतिपद्यते ।
परीक्ष्य यो न गृह्णाति गृह्णाति च विपर्ययात् ॥८२५॥

As a result (*tena*), (a person) does not accept even any other truth (i.e. meaning conveyed by Vedic sentences etc.), owing to a dislike (lit. hatred) for the same; he who does not accept (some knowledge), after properly ascertaining (lit. examining) it, accepts it as being otherwise. [825]

दृढपर्वश्रुतत्वाच्च प्रमादाच्चापि लौकिकात् ।
चतुर्भिः कारणैरेतैर्याथातथ्यं न विन्दति ॥८२६॥

A person does not know the reality (or otherwise of matters learnt) on account of these four reasons: because they have been learnt before and have become firm, and because of their (unusual) worldly faults etc.¹ [826]

¹The word etc. stands for sleep, signifying ignorance (or inactivity), and laziness. Whether they are among the four is to be ascertained! Or, could there be *dr̥ḍhaśruta*, *pūrvaśruta*, *pramāda* and *laukika*(-*prasiddhi*)?

नातो मिथ्याधियोऽभ्यासः सम्यग्ज्ञानस्य जन्मने ॥८२७॥
अपि मिथ्याधियोऽभ्यासः सम्यग्ज्ञानस्य जन्मने ।
स्यादेव चेच्छ्रुतेर्मात्त्वान्न मितेर्व्यञ्जकत्वतः ॥८२८॥

Therefore, repeated pursuit of what (may) be false learning, is not the cause of right knowledge. [827]

If again it is said that repeated pursuit of false knowledge is for the rise of right knowledge, since it is heard (from some other teacher and therefore is right knowledge), that is not a correct way of understanding (at all), because the right way of knowing is only indicative (of the matter to be known from the Śruti). [828]

This sets aside some stand taken on the basis of some Smṛti texts which also are heard (*śruta*). But see *smṛtyadhikaraṇa* of BS.

कार्योत्पत्तौ स्वतन्त्रत्वं कारणस्यैव निश्चितम् ।
मानस्य व्यञ्जकत्वात् मेयतत्त्वानुरोधिता ॥८२९॥

In respect of only a cause (of some effect) it is decided that it has freedom with reference to the production of its effect; however, in respect of the (proper) means of knowing, because it is indicative, (it is) that it has to be in conformity with the object to be known (i.e. the Brahman). [829]

This is only to affirm that repeated pursuit of false knowledge cannot produce the knowledge of the Brahman.

अपि चाभ्यस्यमानस्य दाढ्यं दृष्टं जगत्पि ।
तदभ्यासवशादेवमत्राप्यध्यवसीयताम् ॥८३०॥

Further, it is known that in this world, there is firmness also of what is repeatedly pursued; therefore, here (i.e. in the matter of the pursuit of knowledge of the Brahman) also, there would be determined (the firmness of false knowledge) under the influence of its being a repeated pursuit. [830]

भवद्व्याख्यात एवार्थो न चास्य वचसो ध्रुवम् ।
व्याख्येयः सोऽपरेणापि राज्ञामाज्ञां विना क्वचित् ॥८३१॥

Also, certainly it is not that the meaning of this (Vedic) sentence has to be explained by some other person, in the same way as done by you, unless (perhaps) in some place where there is an order of a king (to do so). [831]

भवद्व्याख्यानतोऽस्माभिरुक्ता दोषपरंपरा ।
सा यथा प्रसजेन्नेह व्याख्येयं तत्तथा वचः ॥८३२॥

Therefore, here¹ the sentence has to be explained in such a way that there does not forcefully (or, contingently) follow a series of faults, which I have mentioned in respect of your

explanation² (of it).

[832]

¹This means: in respect of the explanation of a Vedic sentence.

²Both SP and NKL (ms. p.764) state that the suffix *-tasil* (in actual form *-tas*) is in the sense of the locative (not ablative).

From verse 832, Sureśvara begins to offer his own explanation of the sentence vijñāya

सर्वमानाविरोधेन वाक्यार्थो गम्यते यथा ।
गुणवृत्त्यान्यथा वा तद्व्याख्येयं सुविपरिचिता ॥८३३॥

Therefore, a careful (*su-*) wise person should explain the meaning of the sentence either in a way that is not opposed to all the (right) means of knowing, or in another, metaphorical way (which would be suitable to reason). [833]

Sureśvara states in verses 834 and 835 that vijñāna consists in knowing the meaning of the words in a sentence, whereas prajñā has a basis in one's experience.

वाक्यमाहात्म्यसंभूतं शाब्दं विज्ञानमुच्यते ।
मेययाथात्म्यतो जाता प्रज्ञेतीहाभिधीयते ॥८३४॥

What has come out of (or, is understood from) the strength of the sentence is called *vijñāna* which is pertaining to the words (i.e. the Veda) and here (i.e. in respect of the Vedic sentence) that is called *prajñā* which has come from (the knowing of) the real nature of the object to be known (i.e. the Brahman). [834]

शाब्दविज्ञानमानेन प्रज्ञामैकात्म्यलक्षणाम् ।
ब्रह्मास्मीति प्रकुर्वीत बुभुत्सोच्छेदिनीं दृढाम् ॥८३५॥

(As a result) one should (acquire) *prajñā* which is characterized by (the knowledge of) the singleness of the Ātman,

by means of *vijñāna*, acquired from (understanding the meanings of) the words, 'I am the Brahman' so that it is firm and also is capable of destroying any desire to get to know any other matter.¹ [835]

¹This indicates the removal of any further desire to get to know some other related matters.

(i) Verses 836-841 present other explanations of the same sentence.

विज्ञायेति ल्यबन्तेन प्रमाणव्याप्तिरुच्यते ।
मेयस्य तेन माव्याप्तिः प्रज्ञामित्यभिधीयते ॥८३६॥

In/By the absolutive form *vijñāya*, which ends with the suffix *-lyap*, there is stated the limit of the means of knowing in respect of the object to be known, (whereas) in/by the word *prajñām* is expressed the wide sphere (*vyāpti*) of right knowledge. [836]

प्रमाणव्यापृतेर्यस्मान्मेयस्य व्यापृतेस्तथा ।
प्रज्ञाफलं जायतेऽथ यदपूर्वादिलक्षणम् ॥८३७॥

Then follows (lit. is produced) the result of *prajñā*, which is characterized as *apūrva* etc.,¹ from the function of the means of knowing (*śabda* 'Veda') and the existence (lit. function) of the object to be known (i.e. the Brahman). [837]

¹That has reference to *apūrva*, *bāhya* ... (BU 3.8.8; 2.5.19).

प्रमात्रादिविभागेन मानं मेयं समश्नुते ।
मेयेनाप्तौ तु तद्धवस्तिर्मेययाथात्म्यमात्रतः ॥८३८॥

A means of knowing (i.e. the Vedic sentence) grasps (lit. reaches) the object to be known (i.e. the Brahman) by dividing the matter into such division as knower etc. And (*tu*) after

there is pervasion (of the matter together) with the objects to be known, there is destruction of them merely on account of the true nature of the object to be known (i.e. the Brahman, as it is). [838]

This explains how there is removal of the notions of the division into knower etc. by the mere existence of the object of knowing, viz. *mevavyāpti* or *mevavyāprti* mentioned in the preceding verse.

सकारणस्य मात्रादेः प्रत्यग्दृष्ट्यतिरेकतः ।
तत्त्वं नान्यद्यतस्तस्मात्तन्मात्रेणैव तद्धतिः ॥८३९॥

Since there does not exist any reality in the case of the knower (*mātr*) etc., which have a cause (ignorance) for their existence, in addition to (or beside) the seeing by the inner self; therefore, there is the destruction of the same (i.e. *mātrādi*) effected only by the mere existence of that (i.e. seeing the same by the inner self). [839]

निद्रान्धः सन्यथा स्वप्ने ह्यग्निव्याघ्रादिसंगतेः ।
निद्रास्वप्नप्रहाणेन बोधमात्रार्थभागभवेत् ॥८४०॥
प्रत्यगज्ञानसंभतनानात्वोत्थप्रबोधतः ।
प्रध्वंसादात्ममोहस्य तथैकात्म्यं समश्नुते ॥८४१॥

Since a person, being overpowered (lit. blinded) by sleep, has an association in his dream with fire, a tiger etc.;¹ so also, by the removal of sleep and dream, he comes to have only knowledge of the desired object. [840]

So also does he attain oneness with the Ātman on account of the knowledge of variety that had occurred as a result of ignorance about (the nature of) the inner self and (subsequently) that destruction of the delusion of the Ātman. [841]

¹This refers to other destructive forces or things.

(ii) Verses 842-844 present yet another meaning of the same sentence.

शास्त्राचार्यमतिर्वात्र विज्ञायेत्यभिधीयते ।
प्रज्ञेत्यादिकया वाचा ह्यात्मप्रत्यय उच्यते ॥८४२॥

Or, it is that the word *vijñāya* refers to the thought (acquired from) the scripture(s) and/or the preceptor(s) and by the word *prajñā* is mentioned one's awareness (or, experience) of the Ātman. [842]

शास्त्राचार्यव्यपेक्षत्वात्परतन्त्रैव तन्मतिः ।
अनन्यापेक्षतो ज्ञेया प्रत्यग्बुद्धेः स्वतन्त्रता ॥८४३॥

(In the case of this man, he has) his (earlier) knowledge, dependent on the scripture(s) and/or the preceptor(s), i.e. it is *paratantra* 'guided by another'. As against this, his knowledge of the inner self, not being dependent on another, has *svatantratā* 'independence'. [843]

आत्मप्रत्यय आत्मैको द्वितीयः पुनरात्मनः ।
अनात्मप्रत्ययः सोऽहमुत्पत्त्यैवास्मि केवलः ॥८४४॥

His knowledge (or, awareness) of the inner self is just (the existence) by itself, while the knowledge (or awareness) of the non-Ātman is different (i.e. apart) from itself and that arises by mere awareness 'That I (am)' and/or 'I am all by myself'. [844]

(iii) Verses 845-855 present yet another explanation.

यदि वोक्तात्मयाथात्म्यबोधेनैवाद्वयात्मिकाम् ।
ब्रह्मप्रज्ञां प्रकुर्वीत विशेषणसमाश्रयात् ॥८४५॥

Or, perhaps, it is said (i.e. meant): A person should acquire the knowledge of the Brahman (*prajñāṃ kṛ*) which is of the

nature of (the awareness of) non-duality through the correct knowledge (which he has acquired) about the true nature of the Ātman, stated in (or given by) what is stated,¹ i.e. by resorting to (the understanding the meanings of) the attributes (of the Brahman).² [845]

¹This refers to *śāstra*, *ācārya* mentioned earlier in 842 and 843.

²This refers to BU 4.4.20: *aja ātmā mahān ...*; though it might appear paradoxical.

अव्यावृत्ताननुगतब्रह्मार्थोऽनात्मनोऽन्यतः ।
लभ्यतेऽत्र यतस्तस्मात्तमेवेत्यभिधीयते ॥८४६॥

Since here (i.e. in this explanation or by the way stated) there is obtained by a person the real nature of the Brahman as not distinguished from or not similar (to any other) as contrary to non-Ātman; therefore the Śruti said: *tam eva*¹ [846]

¹BU 4.4.21.

अव्यावृत्ताननुगतब्रह्मार्थात्रापि चान्यतः ।
प्रत्यक्ता लभ्यते साक्षान्महानात्मेत्यतोऽत्र गीः ॥८४७॥

The true nature of the inner self is directly obtained from the awareness of the Brahman, which is neither distinguished from nor is similar (to any other), and not from any other knowledge; therefore there is a statement *mahān ātmā* here.¹

[847]

¹This refers to *Muṇḍakopaniṣad* 2.2.10.

व्यावर्त्यार्थातिरेकेण नात्मब्रह्मपदार्थयोः ।
स्वरूपेऽस्ति भिदा काचिदमानित्वादिवस्तुवत् ॥८४८॥

There is no difference between the natures of the inner self

and the Brahman beside the matter which is to be set aside as, for example, *amānitva* 'absence of being proved' etc. [848]

Absence of being proved can only be distinguished from being proved, but apart from that distinction in words there does it not really exist as a positive entity. This is established in the next verse.

विरुध्यतेऽक्रियारूपं मानित्वादिक्रियात्मकैः ।
अमानित्वादिकं वस्तु यथेहापि तथेष्ट्यताम् ॥८४९॥

As, here is the thing such as absence of pride etc. (taken to be in opposition to pride etc.), so also should it be accepted as opposed (to other external things) which are of the nature of activities, proceeding from being proud etc., (though) it is not of the nature of any activity. [849]

SP usefully points out the break-up of the Samdhi as *virudhyate* and *akriyārūpam*.

प्रत्यग्वस्त्वद्वयमपि तदबोधोपघाततः ।
स्रग्निवाह्यादिरूपेण प्रथते भेदवन्मृषा ॥८५०॥

The (real) thing, i.e. the inner self, though non-dual, appears here falsely as possessed of (or, associated with) variety (of objects), on account of the advent (lit. affectation) caused by ignorance about itself, as a rope etc. (appear) in the form of a serpent etc. [850]

तथैवात्मापि तद्ब्रह्म तदविद्यैकहेतुतः ।
परोक्षमिव तद्भाति तिमिरोद्भूतचन्द्रवत् ॥८५१॥

In the same way, the Ātman also, which is (as already described or known) the Brahman, appears to become visible from non-direct (i.e. not directly perceptible) on account of the

only reason, viz. ignorance about (the nature of) it, just like the moon which appears to come out of darkness. [851]

The illustration in the verse speaks of the appearance of the moon which was obscured by darkness. This suggests that the Brahman was not directly perceived first, but it became perceptible later. The word *timira* 'darkness' suggests ignorance. Despite all this, the illustration has to be taken as somewhat unusual.

सद्वितीयपरोक्षत्वे यतोऽज्ञानैकहेतुके ।
न वस्तु स्पृशतस्तस्मात्प्रमाणोत्थप्रबोधतः ॥८५२॥

Since, being with another (i.e. a second) and not directly perceptible have only ignorance as their cause (i.e. origin); therefore, they do not affect (lit. touch) the (real) thing, on account of the knowledge which arises from the authoritative means (i.e. Śruti). [852]

यथावस्त्वभिसंबन्धान्निवर्तेते सहेतुके ।
अकारकात्मबोधस्य जन्मनैव तमोहनुतिः ॥८५३॥

(Those two)¹ which have for them a cause (i.e. an origin) recede (i.e. become destroyed), as they come to be connected with the (real) thing, as it is; the concealment (i.e. destruction) of ignorance is caused by the very rise of the knowledge about the Ātman as a non-*kāraka* '(what is) not connected with any activity'. [853]

¹These are mentioned in just the preceding verse.

नान्वयव्यतिरेकाभ्यां नाप्यभावेन तद्धतिः ।
आत्मब्रह्मपदार्थैकरूपेणैव हनुतिर्यतः ॥८५४॥

The destruction of that (ignorance) can be neither by Anvaya and Vyatireka, nor by the absence (of itself), since the

concealment (i.e. destruction/removal) of it is (caused) only by (understanding) only one meaning of the (two) words *ātman* 'the inner self' and *brahman*. [854]

नान्यदज्ञानतोऽस्तित्वं द्वितीयस्यात्मनो यथा ।
निवृत्तिरप्यविद्याया नावगत्यात्मनोऽपरा ॥८५५॥

As a thing other than the Ātman cannot have existence unless without ignorance (about the Ātman); so also, there cannot be the cessation of ignorance as distinct from knowing of the Ātman. [855]

(iv) Verses 856-860 present yet another explanation of the sentence.

पदार्थप्रतिबोधो वा वाक्यार्थज्ञानजन्मने ।
विज्ञायेत्युच्यते श्रुत्या पुंसस्तत्र स्वतन्त्रतः ॥८५६॥

Or, it is the knowledge of the meanings of the (two) words (signifying the two things, the Ātman and the Brahman) which is necessary for the rise of the knowledge of the meaning of the sentence—which is expressed (by its connection with the verbal form), *vijñāya*; because a person is, in respect of that (i.e. in understanding those meanings), (fully) independent. [856]

Sureśvara's intention is like this: The knowledge of the Brahman is *vastutantra*, not dependent on any human effort. But the knowledge of the words in the sentences of the Śruti requires human effort, i.e. it is *puruṣatantra*. This is clarified in the next verse.

अन्वयव्यतिरेकाभ्यां वाक्यनीडपदार्थयोः ।
पुमानलं विवेकाय न तु वाक्यार्थवित्तये ॥८५७॥

A person is able to distinguish between the meanings of the

(two) words in the nest (in the form) of the sentence by adopting Anvaya and Vyatireka (method with reference to them), but certainly not for getting to know the meaning of the sentence. [857]

Thus Sureśvara distinguishes between the two meanings of the *vi-jñāya* and *prajñā* (in other words, of two verbal roots, *pra-jñā* and *vi-jñā*).

नानुत्पन्ने विधिः पुंसोऽशक्यत्वाद्वास्तुतन्त्रतः ।
उत्पन्नेऽपि कृतार्थत्वात् स्याद्वाक्यार्थबोधने ॥८५८॥

There cannot be any injunction for a person, when (the knowledge of the meaning) has not occurred, because it is just not possible since it does depend on the (real) thing (*vastutantra*) itself; so also, even when it has occurred (to him), it (i.e. an injunction) cannot be there, since, on knowing the meaning of the Vedic sentence, the person should have achieved the desired end. [858]

The sentence *vi-jñāya prajñām kurvīta* has the appearance of an injunction and Sureśvara very clearly rejects here the idea of its being one. This is clarified further in the next verse.

अन्वयव्यतिरेकाभ्यां लौकिकत्वात्पदार्थयोः ।
शक्तस्तद्विषयं ज्ञानं कर्तुं वाक्यार्थवित्तये ॥८५९॥

A person is able to get the knowledge of the meanings of the (two) words (in the sentence) by the method of Anvaya and Vyatireka, since they belong to (his usual) world (i.e. the world of commonly spoken language) and that would result in his knowing the meaning of the sentence. [859]

SP brings out the purport of the verse thus: *vivekasya kriyātvād yāgādāv iva puṁsaḥ svātantryāt tatra yukto vidhir ity arthaḥ*.

आत्मा द्रष्टव्य इत्यादावयमेव विधीयते ।
पदार्थविषयः पुंसो व्यापारो योऽनुमात्मकः ॥८६०॥

(Thus) in sentences such as *ātmā vā are draṣṭavyaḥ*, this very injunction, which has the meaning of the words as its subject, i.e. an activity of man, of the nature of some inference, is laid down. [860]

(v) Verses 861-865 refer to yet one more explanation of the sentence.

वाक्यार्थप्रतिबोधस्य पदार्थाज्ञानमेव तु ।
अन्तरायो यतस्तस्मात्पदार्थाज्ञानचोदना ॥८६१॥

Since, for (acquiring) the knowledge of the meaning of a sentence there is only one difficulty, viz. ignorance about the meanings of the words; therefore, there is an injunction for (acquiring) the meanings of the words. [861]

ज्ञात्वात्मानं तमेवेति तन्मोहोत्थादनात्मनः ॥८६२॥

(The injunction is fruitful after a person) having known the Ātman in the words *tam eva ...* (distinguishes it) from the non-Ātman, which is his coming forth due to delusion (in respect of the nature of the Ātman). [862]

अनात्मार्थप्रधानोऽयं यावदात्मा समीक्ष्यते ।
ब्रह्मास्मीति न तावद्धीर्जायते सान्तरायतः ॥८६३॥

For this person the thing called the non-Ātman is more important (*pradhāna*), till when the Ātman is seen (by him); (for) that knowledge, 'I am the Brahman', does not arise in him owing to the hindrance (caused by ignorance). [863]

अनात्मनो यदात्मानं प्रत्यगज्ञानकल्पितात् ।
विविनक्त्यनुमानेन तदा वाक्यार्थधीर्भवेत् ॥८६४॥

When a person distinguishes the Ātman from the non-Ātman, (the notion of which is) produced by ignorance about (the nature of) the inner self; there arises (in him) then the knowledge of the meaning of the sentence with the help of inference. [864]

SP states: *anumānena* means *anvayādinā tadanusāriśrutyā ca*.

आत्मन्येव यदात्मानं व्यत्थाप्यानात्मनो नरः ।
विजानाति तदा सर्वमात्मैवेति प्रपश्यति ॥८६५॥

When a person raises himself above (the notion of) the non-Ātman and sees the Ātman in himself, he sees that all, that is (existing(!) around him) is but the Ātman (*sarvam ātmaiva*). [865]

(vi) Verses 866-871 offer one more explanation.

अथवा पुरुषार्थत्वात्प्रज्ञायाः करणं नृणाम् ।
स्वतः प्राप्तमनूद्येह तमेवेति नियम्यते ॥८६६॥

Or, since *prajñā* is for men an act to be accomplished on account of its being the final goal, which is self-accomplished; therefore, (the Śruti) has repeated that (performance of the activity) and then restricts the same by the words *tam eva* [866]

This verse is an illustration of what is called *anakoluthon* (in Greek), which is: one part of the sentence is in the active and the other (which was also expected to be in the active) is put in the passive. Actually, the sentence should have been ... *anūdyā, iha tam eveti (naraṃ) niyamayati*. This is clarified in just the next verse.

प्रज्ञां कुर्वीत यदिह तत्तमेव यथोदितम् ।

तां प्रकुर्वीत विज्ञाय स्वात्मानं न त्वनात्मनः ॥८६७॥

What is stated here, i.e. in *prajñāṃ kurvīta*, is what is mentioned as *tam eva* (This means:) 'Having known (the nature of) one's own self, one should meditate (on only that) and/but not on (any) non-Ātman.' [867]

तत्त्वमात्मैव सर्वस्य कार्यकारणवस्तुनः ।
यस्मादात्मानमेवातः प्रज्ञां विज्ञाय कुर्विति ॥८६८॥

'Since the true nature of all the things, which stands in relation of cause(s) and effect(s), is but the Ātman; therefore, having known that Ātman, (now) take to meditation'—thus¹ (is the restriction). [868]

¹SP states that the word *iti* has the force of a restrictive injunction (*niyama*). To explain: if one notion has any optional meanings, then *niyama* restricts that one to one of those meanings.

तदन्यविषयज्ञाने न किञ्चिद्वेति तत्त्वतः ।
न च कृत्स्नतमोहानिः सर्वज्ञानोदयो न च ॥८६९॥

When there is knowledge of the objects other than that (i.e. the Ātman), a person does not know anything as reality; and there is not the removal (lit. destruction) of the entire ignorance and, further, there has not arisen the knowledge of all. [869]

This verse states why one should have known the nature of non-Ātman as understood in the other view.

प्रत्यगात्मनि तु ज्ञाते श्रुत्युक्तेनैव वर्त्मना ।
नानुत्पन्नं क्वचिज्ज्ञानं नेहाध्वस्तं तमोऽप्यतः ॥८७०॥

Therefore, when (the nature of) the inner self becomes known (to a person) in the way¹ stated by the Śruti, it is not that there does not arise (in that person) any time (*kva cit*) the

knowledge (of the Brahman), and not that the person's ignorance has not been destroyed (thereby). [870]

¹This refers to *ātmā vā are draṣṭavyaḥ*

विज्ञायेह तमेवातः प्रज्ञां कुर्वीत सद्द्विजः ।
अज्ञानादि तथा कृत्स्नमात्मनोऽन्यत्र वेदने ।
सर्वमात्मानमेवेति श्रुतेरपि वचस्तथा ॥८७१॥

Therefore, having known (the nature of) that (Ātman) alone should one, a seeker of the Brahman (*saddvija*), take to meditation. Further, (*tathā*) in anything else than in the knowledge of the Ātman, there is all ignorance and the statement of the Śruti also is *sarvam ātmānam eva*¹ [871]

¹Cf. *sarvam ātmānam paśyati* (BU 4.4.23) and *ātmānam eva lokam upāsīta* (BU 1.4.15).

(vii) This verse is still another explanation.

निष्कर्मिका वा प्रज्ञेह विहितेत्यथ भण्यते ।
कर्म तस्यास्तमेवेति विज्ञायेत्यनुवादतः ॥८७२॥

Now, if it is said: 'Here is described (some) meditation which is not connected with (lit. is without) any activity,' then it is to be stated (for the removal of the doubt): 'By the repeated statement of *viññāya* ... is conveyed the activity of it, viz. *tam eva*'. [872]

(viii) Verses 873-879 state one more explanation.

प्रज्ञा वा परमात्मेह प्रज्ञानमितिवाक्यतः ।
विज्ञायेह तमात्मानं प्रज्ञां कुर्वीत सद्द्विजः ॥८७३॥

Or, here the word *prajñā* means the highest Ātman—this is on the basis of the Śruti statement *prajñānam (brahma)* ...;¹

(thus) here (is stated:) 'Having known that Ātman should a seeker of the Brahman take to meditation.' [873]

¹*Aitareyopaniṣad* 3.3; *Maitrāyaṇyupaniṣad* 5.6.31.

इमं देहस्थमात्मानं विज्ञायोक्तेन वर्त्मना ।
परां प्रज्ञां प्रकुर्वीतेत्येष शास्त्रस्य संग्रहः ॥८७४॥

'Having known this Ātman, which abides in the body in the way stated (in the Śruti), (a seeker of the Brahman) should take to the highest meditation¹'—this is, in brief, the statement (of the thought) of the scripture. [874]

¹This means: knowing the proper meaning of the sentence of Vedānta. This marks Sureśvara's concluding remark on various views.

तत्रैवं संभवत्यर्थे सर्वमानाविरोधिनि ।
वाक्यार्थः कल्प्यते कस्माद्विरुद्धो यः प्रमान्तरैः ॥८७५॥

When this can be the meaning (of the statement *viññāya prajñāṃ kurvīta*), which is not opposed to any one of the means of knowing, why is another thought about it (i.e. meaning) imagined on the basis of other ways of knowing? [875]

In verses 876-890, there is stated the view of Mīmāṃsakas, who belong to the Vedāntins' fold in some way (svayūthya).

असंतोषादतोऽन्येऽत्र भूरिदोषप्रदर्शिनः ।
व्याख्यानादन्यथा चक्रुर्व्याख्यां वेदार्थनिश्चिताः ॥८७६॥

In respect of this (i.e. this Vedic sentence), there are others, who find many faults (regarding the above interpretation), and, out of dissatisfaction, they, who have decided the meaning of the Veda (very methodically, or firmly), offer some

interpretation other than the one given (by me) above.¹ [876]

¹Cf. verses 832-835 above.

वेदान्तवाक्यजं ज्ञानं यथावस्त्वेव मोहनुत् ।
प्रामाण्याद्वेदवचसस्तज्जं मिथ्या भवेत्कथम् ॥८७७॥

(They say:) 'The knowledge, which arises from the sentences of Vedānta, is only in accordance with the (real) thing, it removes delusion (on the part of one). How can that be false, i.e. that which is produced from that, viz. the statement of the Veda being only authoritative?' [877]

वाक्यश्रवणकाले तत्सर्वाज्ञानतमोपनुत् ।
जायते यद्यपि ज्ञानं कृत्स्नैकात्म्यसमाश्रयम् ॥८७८॥
जन्मानन्तरमेवैतदनादितमसाखिलम् ।
तथापि बाध्यते ज्ञानमविद्याकार्यदर्शनात् ॥८७९॥

(That is to say:) Even if there arises knowledge (of the Brahman) which rests on (the notion of) only oneness of the Ātman in all and which removes/destroys the entire ignorance consisting in the absence of knowledge (about the nature of the Ātman), when one hears the Vedic sentences, [878] all of that knowledge (of the Vedic sentences) is stultified immediately, at the end of this life, by the beginningless ignorance, because of that person's seeing the effects of ignorance (again in the next life). [879]

This is clarified in the next verse.

In verses 880-896 is described twofold ignorance about the Ātman and, on that account, there is the introduction of prajñā.

अविद्याहेतुरागादीन्सम्यग्ज्ञानादनन्तरम् ।
यतो वीक्षामहे तस्माज्ज्ञानस्याज्ञानबाधनम् ॥८८०॥

Since we see that soon (or, immediately) after the right knowledge has occurred in this life, there do come to exist attachments (to the external objects) etc., which are caused (in the next life) by ignorance; therefore is this the stultification of ignorance¹ by the knowledge (of the Brahman). [880]

¹We have to understand *ajñānabādhana*m as a *sāpekṣa samāsa* (i.e. compound presupposing something) related to *jñānasya*. The second line of the verse could be translated alternatively as: Therefore (or, in other words), this is not the stultification of ignorance by the knowledge of the Brahman. But, this does not seem to be intended.

नैसर्ग्यागन्तुकी चेति ह्यविद्या द्विविधा स्मृता ।
आगन्तुकी स्याद्विषये नैसर्गिक्यात्मनीष्यते ॥८८१॥

Ignorance is known to be of two kinds, viz. natural and adventitious. Adventitious ignorance would abide in the object, whereas natural ignorance is accepted as abiding in one's own self. [881]

तत्रागन्तु यदज्ञानं तत्सकृज्ज्ञानजन्मना ।
अपैति नासि शबरो राजासीत्युक्तितो यथा ॥८८२॥
नैसर्गिकी तु याविद्या सा सकृज्ज्ञानजन्मना ।
ध्वस्तापि पुनरेवैति तज्जरागादिदर्शनात् ॥८८३॥

There (i.e. between the two), that ignorance, which is adventitious, recedes (i.e. gets destroyed) at the rise of the knowledge of the Brahman (even) only once, as (there is the removal of ignorance on the part of one) by the statement (addressed to a person:) 'You are not a forester; you are a king'. [882]

As against this, that which is natural ignorance, is once destroyed by the rise of the knowledge of the Brahman and does come to exist again, as it is noticed from (a person's having) attachment (to external things) etc. which are produced

by that (ignorance).

[883]

There is herein understood a story of a prince, who was, owing to some mishap, brought up among foresters and considered himself a forester till when he was told by another person (who knew him in his true nature), 'You are a king (i.e. prince), not a forester' and, thus, he realised his true status in life.

यस्मादेवंस्वभावैषाविद्या नैसर्गिकी ततः ।

विज्ञायापि परं तत्त्वं कुर्यात्प्रज्ञां पुनः पुनः ॥८८४॥

Since this ignorance is of this nature and only natural (in the case of one); therefore, one should take to meditation again and again, even after having known the highest reality.

[884]

तावत्प्रज्ञां प्रकुर्वीत यावद्धवस्ता निरन्वया ।

आत्माविद्या यथोक्तात्मविद्याभ्यासेन यत्नतः ॥८८५॥

A person should take to meditation by repeated pursuit of the knowledge of the Ātman, as described, with every effort¹ till the ignorance (on one's part) about (the nature of) the Ātman is completely removed, so that there does not remain even a little of it.

[885]

¹According to SP, this is for over a long period of time and continuous.

श्लोकांश्च गौडपादादेर्यथोक्तार्थस्य साक्षिणः ।

अधीयतेऽत्र यत्नेन संप्रदायविदः स्वयम् ॥८८६॥

In this context, men, who are knowers of the tradition of Vedānta, and who are knowers, lit. seers, of what is stated above, themselves recite/study the verses of Gauḍapāda and others¹ respectfully, or with effort.²

[886]

¹This refers to Vyāsa whose verses are quoted in verses 889-890 below.

²It is seeking instruction from a preceptor and other knowers of the Vedānta tradition.

तत्त्वमाध्यात्मिकं दृष्ट्वा तत्त्वं दृष्ट्वा तु बाह्यतः ।
तत्त्वीभूतस्तदारामस्तत्त्वादप्रच्युतो भवेत् ॥८८७॥

Having seen the truth about what abides in the body and also the truth of what exists outside, a person, who has thus become the very truth itself and is having that as the resting place, would not have (ever) fallen from it. [887]

This is *Gauḍapāḍakārikā* 2.38.

यदा न लीयते चित्तं न च विक्षिप्यते पुनः ।
अनिङ्गनमनाभासं निष्पन्नं ब्रह्म तत्तदा ॥८८८॥

When the intellect does not merge (into the Ātman) and does not again get distracted, then (that means:) there (the individual) attains the Brahman, which does not act or which does not have any semblance of any object. [888]

This (also) is *Gauḍapāḍakārikā* 3.46.

मन एव मनुष्याणां कारणं बन्धमोक्षयोः ।
बन्धाय विषयासक्तं मुक्त्यै निर्विषयं यदा ॥८८९॥

It is only *manas* which is for men the cause of bondage and/or liberation; when attached to external objects, it is for causing bondage, whereas not having any external objects (i.e. connection with them) it effects liberation. [889]

This is *Viṣṇupurāṇa* 6.7.28 and the first line is *Mahābhārata* 13.295*(1)ab; the asterisk shows that it is not accepted in the critical text of the *Mahābhārata*.

तावदेव निरोद्धव्यं हृदि यावत्क्षयं गतम् ।
इदं ज्ञानं च ध्यानं च शेषोऽन्यो ग्रन्थविस्तरः ॥८९०॥

(*manas*) is to be checked or confined in the heart till it has merged into (lit. lost into the *Ātman*)—this is both knowledge and meditation, and all other (things said/written) are but an appendage of a book/composition. [890]

This is *Yogavārtika* attributed by SP to Vyāsa.

Verses 891-898 refute the preceding view.

इति व्याचक्षते केचिद्विज्ञायेति वचः स्फुटम् ।
महामीमांसका धीरा अत्र प्रतिविधीयते ॥८९१॥

Thus do some wise men, i.e. great Mīmāṃsakas, explain clearly the statement *vijñāya* In this respect, (the following) is stated in opposition. [891]

यदासाधारणाविद्या प्रत्यगात्मैकगोचरा ।
अज्ञानाद्यात्मिका सिद्धा द्वैविध्यं स्यात्तदा कुतः ॥८९२॥

When (it is said that) ignorance is unique (lit. uncommon) and (that it) has only the inner self as the object to affect and (then it is) established that it is only of the nature of ignorance about (the nature of) the *Ātman*; whence could then be there a twofold character of the same? [892]

If ignorance means ignorance of just one inner self (which is but single), then it can be only one—there could not be the scope for any acceptance of twofold ignorance.

अज्ञात एव सर्वत्र मानानां मेय उच्यते ।
आत्मैव ज्ञेय एष्टव्यो ध्रुवमैकात्म्यवादिना ॥८९३॥
अज्ञातोऽर्थोऽन्यतो यस्मान्नैवैकात्म्यात्प्रसिध्यति ॥८९४॥

Everywhere, what is not known is the object of knowing for various means of knowing (i.e. it is what has not been known before). (Therefore) it is only the Ātman which is to be known and to be sought by one and certainly by such a person, who holds the singleness of the Ātman; [893]
since an object, that is not known by any other means, gets established only by knowing the singleness of the Ātman. [894]

न चानधिगतत्वस्य प्रसिद्धिः स्यात्प्रमाणतः ।
अतिशीतेरसद्भावान्न च बाधोऽस्य माश्रयात् ॥८९५॥

Also, there cannot be any establishing of (the Ātman), which has not been known by any (generally accepted) means of knowing, owing to the non-existence of any excellence; so also there cannot be the stultification of this one by resorting to any knowledge (obtained by the other accepted means of knowing). [895]

The force is to indicate that the Śruti alone is the *pramāṇa*—it is not among the commonly accepted *pramāṇas*.

न चाप्यनात्मना सिद्धिरज्ञातस्येह वस्तुनः ।
तस्याप्यविद्यारूपत्वाज्जडोऽनात्मेति हीष्यते ॥८९६॥

And there cannot be any establishing of the (real) thing (i.e. the Ātman) which is not known by means of any non-Ātman; for, in the case of that also, its nature is that of ignorance and that the non-Ātman is accepted as insentient. [896]

This is to assert that the commonly accepted *pramāṇas* are rooted in (or, connected with) the non-Ātman (objects).

अतो मात्राद्यभावेऽपि योऽज्ञातत्वस्य सिद्धये ।
अलमर्थः स एवात्र मेयोऽज्ञात इहेष्यते ॥८९७॥

Therefore, even in the absence of the means etc., (that

knowable) which is capable of for establishment of (its) not being known, it is only accepted/understood here¹ that it is unknown and it is sought to be known. [897]

¹SP explains *atra* 'here' as the sleep state or, the dream state also (read: *svāpāder iheti mahābhuṃmer uktiḥ*).

बोधमात्रातिरेकेण नान्योऽर्थोऽज्ञानसिद्धिकृत् ।
अज्ञानादित्रयं तस्मात्स्वतोबोधैकसंश्रयम् ॥८९८॥

There is not anything else than mere knowledge which really causes rise of ignorance; therefore, the triad,¹ viz. ignorance etc. is dependent on the knowledge itself. [898]

¹This refers to false knowledge and doubt also. See verse 788 above.

संभाव्यते जगद्यस्मिन्बोधमात्रपुरःसरम् ॥८९९॥

It is possible that (the triad)¹ exists in this world as preceded (i.e. caused) by knowledge only. [899]

¹By triad may be understood *ajñānāditraya*.

अज्ञायमानो मात्रादिर्न यस्मादनुभूयते ।
अज्ञातचितिवत्तस्मादज्ञातोऽनुभवः स्मृतः ॥९००॥

Since, (the triad) beginning with the knower, when being unknown, is not experienced, therefore, experience is understood as the unknown just like sentience which has been unknown. [900]

अज्ञातायां यथा शुक्तौ रजताद्यर्थनिश्चितिः ।
अनात्मनिश्चितिस्तद्वदज्ञातेऽनुभवात्मनि ॥९०१॥

When a mother-of-pearl (etc.)¹ is unknown there is ascertain-

ment regarding the things such as silver etc; so when the nature of the experience (of the Brahman) is not known there is determination regarding the non-Ātman. [901]

¹Sureśvara mentions only a mother-of-pearl; though some more objects should have been mentioned, in view of *rajatādi*. This is his usual way of writing.

ज्ञानात्पृथगसंसिद्धे रजतादेरमेयता ।
शुक्तेरिव त्वविज्ञातज्ञातत्वस्य ततोऽन्यतः ॥९०२॥

When silver etc. are not established without/part from (any certain) knowledge they are (considered as) not being the object of knowledge, as there is unknownness in the case of the mother-of-pearl, which is other than that (i.e. silver etc.) and whose true nature (lit. perception) is not known. [902]

This verse is marked by the most usual cryptic expression of Sureśvara. It needs to be explained in fuller details as in SP, or, in just the next verse.

यतो न लभते मेयं शुक्तौ रजतधीरतः ।
न रूप्यधीः प्रमाणं स्यात्प्रमेयासंभवादिह ॥९०३॥

since there does not (really) exist an object of knowing; therefore, there is cognition of silver in a mother-of-pearl (and) the cognition of silver would not be valid,¹ owing to the absence of (a real) object there.² [903]

¹The word 'not valid' means 'not properly conveyed by a means of knowing' (here direct perception).

²This is worldly dealing.

यथा न रजते मानं शुक्तावपि तथैव सा ।
तदप्रबोधताबाधात्तस्याश्चाशुक्तिकात्मनः ॥९०४॥

As (in the example of the preceding verse) there is no valid means of knowing in case of silver, so also there is that (i.e. invalidity) in respect of a mother-of-pearl as well; because that (i.e. valid means) is stultified by its not conveying (the proper) knowledge about it (i.e. silver), and it (i.e. silver) is (in fact) of the nature of (or, similar to that of) a mother-of-pearl. [904]

यथैवं सर्वमानानि प्रत्यङ्मानातिरेकतः ।

अनात्ममेयभाञ्ज्येव विज्ञेयानीति निश्चितिः ॥९०५॥

As this is so; therefore it is certain that all the means of knowing beside the inner self are to be understood as referring only to the object(s) of knowing other than the Ātman. [905]

प्रत्यक्संवित्त्वविज्ञाता तथैवेहानुभूयते ।

अपि प्राङ्मानसंव्याप्तेर्यावद्व्युत्पाद्यते न ना ॥९०६॥

And, the experience (or, awareness) of the inner self is not (properly) grasped, it is experienced here (i.e. in worldly life), in the same way (i.e. as in the example above); (this is so) till a person is not enlightened before the pervasion (of the inner self) by (i.e. its connection with) a means of knowing (viz. the Śruti). [906]

The AnSS edition notes variant reading *tayā* in place of *tathā* (i.e. *tayaiva* ... in the place of *tathaiva* ...) and that indicates (perhaps better) the experience of the inner self as apart from external objects, owing to that ignorance which was posited by the opponent.

वास्तव्येव तु संसिद्धिरनुभूतेर्यतस्ततः ।

नाज्ञातत्वस्य बाधः स्याच्छ्रुतिकाबाधसिद्धिवत् ॥९०७॥

Since the experience related to the real thing is an established fact (*samsiddhi*); therefore, there is no stultification of the

nature of (the inner self as) being unknown, in the same way as the occurrence of stultification (of silver)¹ by a mother-of-pearl. [907]

¹Or, alternatively, of its own being unknown as/in the case of a mother-of-pearl.

मानेनानभिसंबन्धात्रेयं षष्ठेन्द्रियार्थवत् ।
 अनुभूतेः सुषुप्त्यादेर्न चाप्यनुभवत्वतः ।
 निरपेक्षा प्रमाणाप्तौ मानाप्तकरबिल्ववत् ॥९०८॥

This (unknownness of the inner self) is because of its non-connection with the means of knowing, i.e. the Śruti. It is not like what is the object of the sixth sense, i.e. what is imaginary.¹ And also, owing to being experienced in the case of the experience in the deep sleep state etc., it is not independent of requiring some proof (of its existence) like that of a Bilva fruit on the palm which is known by a means of knowing (viz. direct perception). [908]

¹That is, conceived only by *manas*.

प्रमाणव्यापृतेः पूर्वमेवं मेयोऽत्र लभ्यते ॥९०९॥
 नैवं वेदान्तसिद्धान्तादन्यसिद्धान्तशासने ।
 मेयसिद्धिर्यतस्तस्मात् मानं तत्र विद्यते ॥९१०॥

Thus, the object to be known here, (i.e. the Ātman) is (in our view, according to the opponent) already known (lit. has ever obtained) even before the operation of any means of knowing. [909]

(The Siddhāntin's answer is:) 'No, this is not so, because establishing the object of knowing is not there in the teaching of any other school other than that of Vedānta; therefore there does not exist a proof for it'. [910]

Up to verse 909, there was expressed a doubt (*codaka*) of

an opponent. Verses 910ff. are an answer to the doubt.

इह त्वज्ञात आत्मैव मिथ्याज्ञातस्तथैव च ।
 तस्य प्रमाणसंबन्धात्सर्वाज्ञानप्रहाणतः ॥९११॥
 तत्त्वमस्यादिवाक्येभ्यः सर्वज्ञानप्रसूतितः ।
 सर्वाज्ञानापनुत्तेश्च ज्ञेयकार्यसमाप्तिः ॥९१२॥
 प्राप्यस्य सर्वस्यावाप्तेस्तथा हेयस्य हानतः ।
 सम्यग्धिगः सकृत्सूतेः किं कार्यमवशिष्यते ॥९१३॥

But, in this (view of Mīmāṃsakas) that the Ātman itself is not known and also (if known) it is falsely known, for (in this state) that (Ātman) has a connection with a means of knowing and thus thereby through the destruction of all ignorance, [911]

because of the rise of all knowledge from sentences such as *tat tvam asi*, because of the removal of all ignorance through obtaining (i.e. knowing) the effect of what is to be known (i.e. ignorance); [912]

because of the complete obtaining of what is to be obtained and, so also, by the abandoning of what is to be abandoned and (consequently) the rise once (and for all time) of right knowledge; (tell me) what (other effect) remains to be brought about. [913]

SP adds in the end: *sakṛtsūter uktaśeṣaphalasiddher iti śeṣaḥ*.

अविद्या पूर्ववच्चेत्स्यात्सम्यग्ज्ञातेऽपि वस्तुनि ।
 भूयोऽपि सा मृतेरुर्ध्वं नेष्यतीत्यत्र का प्रमा ॥९१४॥

If, in your view, ignorance continues to be there as before, even when the (real) thing has become well-understood; then, what proof could there be that it will not come again after death? [914]

In this verse a word *neṣyati* seems to be a misprint for *naiṣyati*. SP and NKL do not help in this regard.

The thrust of the argument is that the rebirth in the case of even the liberated cannot be avoided, if the opponent's view were held.

अविद्याविद्ययोर्यस्माद्बाधकसंगतिम् ।
मुक्त्वान्यो नास्ति संबन्धो दाह्यदाहकयोरिव ॥९१५॥
बाध्याविद्या कथं विद्यां बाधिकां बाधते वद ।
दाहकस्य न दाहोऽस्ति वह्नेर्दाह्येन वस्तुना ॥९१६॥

Since between ignorance and knowledge there is no connection other than that of stultified and stultifier, like the connection existing between what is to be burnt and what burns; [915] (therefore), tell me, how can ignorance, which is to be stultified, stultify knowledge which is the stultifier? (Indeed) there cannot be the burning of what burns, viz. the fire, by a thing to be burnt (i.e. fuel). [916]

विद्यमानाप्यविद्येयं विद्यां चेन्नावधीत्पुरा ।
ध्वस्ता बाधिष्यतेऽविद्या विद्यामित्यत्र का प्रमा ॥९१७॥

If this ignorance, while existing, has not been able to destroy knowledge earlier, how then could that right knowledge (or, understanding) be stultified by that ignorance, which has been already destroyed? What could be the right knowledge there, in that case? [917]

अविद्यया चेद्विध्वस्ता विद्येयं कात्स्नर्यतस्तदा ।
मुषितात्मपरिज्ञानः प्रज्ञां कुर्यात्कथं जडः ॥९१८॥

If this knowledge becomes destroyed in its fullness by ignorance, then how can a foolish person, who has the knowledge of his own self taken away (lit. stolen) from him, take to meditation? [918]

This is a blame given to the argument which began with the word *yasmād evaṃsvabhāvaiṣā* ... (verse 884 above).

किं च हेतुमतो जन्म सर्वत्र स्यात्पुनः पुनः ।
सर्वहेतोस्त्वविद्याया ध्वस्तायाः स्यात्कुतो भवः ॥९१९॥

(Moreover), there would be everywhere the birth of what has a cause, viz. origin, again and again; therefore, from what (origin) could there be the birth of ignorance, which is (posited as) the cause of all, and which is (once) destroyed? [919]

Verses 920-922 state that ignorance could not be born of the Brahman, lest it might be permanent.

ब्रह्मणश्चेद्भवस्तस्या अनिमोक्षः प्रसज्यते ।
स्थास्नुत्वाद्ब्रह्मणो नित्यं किरणानां रवेरिव ॥९२०॥

If it were said that (there would be) the birth of it (i.e. ignorance) from the Brahman, then there would forcefully (contingently) result the absence of liberation because of the perennial nature of the Brahman;¹ (this is so) as in the case of the rays of sun.² [920]

¹This implies the continuous (or, ever) rise (or, appearance) of ignorance.

²The illustration points to the ever existing nature of the sun and therefore also of its rays; consequently, the continuity of ignorance has to be understood as a contingency.

अनादेर्नाप्यनुच्छिन्तिः सर्वत्रोच्छिन्तिदर्शनात् ।
अनाद्यज्ञातमेयेषु ह्यज्ञानस्य प्रहाणतः ॥९२१॥

(If it is argued that) 'There would be non-destruction of what has no beginning (viz. of ignorance)'; (the answer is: 'This is not so) because it is noticed that everywhere there is destruction in the case of the beginningless and (also) unknown objects of knowing, indeed through the destruction of ignorance'. [921]

अनाद्यज्ञानवन्मेयमूरीकृत्येह सर्वतः ।
उच्छिन्दन्ति प्रमाणानि ह्यज्ञातत्वं प्रमेयगम् ॥९२२॥

Here (in worldly dealings) everywhere, authoritative means of knowing destroy the unknownness characterizing objects to be known, after having first accepted/understood the objects as characterized by beginningless ignorance (i.e. unknownness). [922]

Here there is stated a general rule as to when and how the means of knowing (of the unknown object of knowing) stultify ignorance.

In verses 923 and 924 it is pointed out that the destruction of ignorance does not mean the merger of effects into cause.

न च कारणसंसर्गो नाशोऽज्ञानस्य भण्यते ।
उरगादेः स्रजीवास्य ब्रह्मणोऽकारणत्वतः ॥९२३॥

It is also not said that the destruction of ignorance consists (merely) in the merger (of it) into its cause, as in the case of (the merger of) the serpent etc. in a garland of flowers; because the Brahman has the nature of not being the cause (of it). [923]

अज्ञातज्ञापनं मुक्त्वा न चेहास्त्यपरो विधिः ।
तावतैव कृतार्थत्वान्न कार्यमवशिष्यते ॥९२४॥

Here (in Vedānta), there is no other injunction for acquiring the knowledge of what is not known; because, only being that much (instruction), there could have been accomplished what is intended to achieve; therefore, there remains nothing to be done. [924]

Sureśvara offers in verses 925-935 his comments on the views of the followers of (i) Prabhākara, (ii) Kumārila Bhaṭṭa, (iii)

the Sāṃkhyas, (iv) the Vedāntins in general, (v) the Vaiśeṣikas and (vi) the Lokāyatas, with regard to the supposed injunction in *viññāya prajñāṃ kurvīta*.

आत्मैव कारणं यस्य सर्वज्ञानस्य कार्यतः ।

आत्मान्वितेः स्वतः सिद्धेर्न कार्या तस्य चात्मधीः ॥९२५॥

(i) In the case of him, who has understood the Ātman alone as the cause of the effect, viz. the knowledge of all; there is continuity of the Ātman understood and thus the knowledge of the Ātman, established by itself, does not have to be obtained (lit. effected by following the injunction). [925]

This is in refutation of an opinion of a Prābhākara: 'Here the Ātman itself is the basis of knowledge and thus there is a continuous existence of the same and there is thereby suggested the unnecessariness of following injunction which is implied.'

अंशाशिसंगतेरात्माप्यहंबुद्ध्यानुभूयते ।

तस्यापि नित्यसंबन्धात् विधेयात्मधीरियम् ॥९२६॥

(ii) In the case also of him in whose opinion there is experienced (the existence of) the Ātman in the form of the notion of *aham* through the connection of parts and whole (made up of them), there is not to be prescribed an injunction for acquiring the knowledge of the Ātman, because that connection is eternal. [926]

In the opinion of the followers of Kumārila Bhaṭṭa, things to be known and their knowledge stand in their relation of parts and whole (made up of them together); by this connection with the never missing existence of the Ātman and, therefore, on account of the ever continued experience of the same, any injunction for getting to know it becomes only redundant.

आत्मानात्मपरिज्ञाने यस्य साधारणं मतम् ।

करणं बुद्धिरेवेह न तं प्रत्यपि चोदना ॥९२७॥

(iii) Also for him, who considers the intellect itself as the common means of fully knowing the self and the non-self,¹ here, there is no necessity of an injunction. [927]

¹We have used the self and the non-self and precluded the use of the words the Ātman and the non-Ātman, because, in this view of the Sāṅkhyas, there is reference to a number of Puruṣas and a variety of effects of Prakṛti and, since there is continuous existence of the intellect, which is product (or, modification) of ever existing Prakṛti along with Puruṣas, there is therefore not any additional effort required to get to know the same by the injunction, as implied.

बुद्ध्यादेर्विषयान्तस्य प्रतीचोऽन्यस्य वस्तुनः ।
आत्मात्मीयत्वतस्तस्माच्चित्स्वभावमिदं जगत् ॥९२८॥

(iv) As being one's own nature, the Ātman is (connected) with the inner self and other things beginning with the intellect up to the objects of sense-organs, therefore, this world is of the nature of sentience. [928]

In verses 928-932, Sureśvara refers to the general view of Vedāntins who would dispense with any injunction in respect of getting to know the Brahman. This view shows a lot of similarity with Sureśvara's own view.

चित्स्वभावं सदा तत्स्यादन्यहेत्वनपेक्षणात् ।
धर्माधर्माद्यपेक्षत्वादनात्माकारतां प्रति ॥९२९॥

That (world) would ever be having the nature of sentience because of its independence of any other cause for it in respect of its own nature of being the non-Ātman, dependent as it is on merit and demerit. [929]

SP states as the support for this argument, the thoughts contained in BSB on 1.1.2-1.4.23 and 2.1.14-20 of BS.

वियत्संपूर्णतां नर्ते घटो नानाविधैर्युतिम् ।
द्रव्यैर्याद्वियोगं वा संविदते तथा धियः ॥९३०॥
शब्दाद्याकारतां यान्ति संशयाद्यात्मतां तथा ।
प्रत्यक्चिच्छतपूर्णतां मुक्त्वा शून्यतां न च ताः सदा ॥९३१॥

A pitcher does not become united with or separated from various kinds of things, unless it is full of Ākāśa; so also, without the intellect the knowledges or consciousness (of men) [930]

can not come to have the shape of words etc. and also of the uncertainty etc.; setting aside (the fact that) they are full with (i.e. pervaded by) consciousness of the inner self; therefore, there would always remain mere void (i.e. non-existing in reality). [931]

यतोऽतो नात्मधीः कार्यं नापि तत्संततिस्तथा ।
स्वभावादेव तत्सिद्धेः सर्वप्राणभूतामपि ॥९३२॥

Since (this is so); therefore, (Vedāntins) do not have to make effort to get knowledge of the Brahman and also to secure the continuity of the same; for that has been already established in the case of all living beings, by their own nature (as existents). [932]

सर्वेषामपि भिन्नानां तथाभेदत्वहेतुतः ।
न कार्यैवात्मधीः पुंभिः कृतत्वादेव हेतुतः ॥९३३॥

In the same way, the various discrete things are in reality having the nature of non-distinction (from the Ātman) and, therefore, human beings do not have (to make any effort) to effect the knowledge of the Ātman—because that is already effected (or has already occurred to them). [933]

आत्माधाराणि यस्यापि ज्ञानादीनीह वादिनः ।
तस्यापि नात्मधीः कार्या नित्यप्राप्तत्वकारणात् ॥९३४॥

(v) In the case of that theorist also, in whose opinion all types of knowledges have only the Ātman as their basis, the knowledge about the Ātman has not to be effected, for the reason that it has ever been obtained already. [934]

This view of Vaiśeṣika is: 'knowledge is one of the qualities of the Ātman and thus there is, according to him, *guṇa-guṇin* relation between knowledge and the Ātman; and since that is an ever existing relation, any special injunction has, therefore, not to be made for acquiring that quality of the Ātman.

देहस्य सर्वदैवास्य जीवत्तश्चित्स्वभावतः ।
स्वभाववादिनोऽपीयं कार्या नैवात्मधीस्तथा ॥९३५॥

(vi) In the case of him also, who holds the nature of all things as the ever existing and living sentience in the form of this body; there is no necessity of effecting any knowledge (i.e. awareness) of the Ātman (i.e. the self). [935]

This has reference to the Lokāyata, who identifies the body with the Ātman and, this being so, a person does not have to take to any action for getting to know what is called the Ātman.

Verses 936-938 set aside the view of the Vaidikas who feel the need of an injunction for the acquisition of the knowledge of the Ātman. Verse 938 is the conclusion of verses 925 onwards.

नियमे परिसंख्यायां सर्वानात्मासमीक्षणात् ।
वैयर्थ्यं कर्मकाण्डस्य निर्मलत्वात्प्रसज्यते ॥९३६॥
न चापि नित्यप्राप्तत्वात्तयोरस्तीह संभवः ।
अप्राप्तांशे यतो नित्यं विधिः सर्वोऽपि चेष्ट्यते ॥९३७॥
कर्तव्यमात्मविज्ञानमित्यत्रैव निराकृतः ।

विधिः सर्वप्रकारोऽपि न त्वबुद्धार्थबोधनम् ॥९३८॥

As one notices (i.e. refers to) all that is non-Ātman in the case of the rules called *niyama* and *parisaṃkhyā*,¹ there follows contingently the meaninglessness of the entire portion of the Veda, relating to ritual activity, as there is really no basis or support for the same. [936]

Also, because (the Ātman is) what has been ever obtained; therefore, there is no possibility of the occurrence of the two (i.e. *niyama* and *parisaṃkhyā*), since every injunction is ever expected to have a reference to what has not been obtained. [937]

Thus, there is refutation stated in respect of every kind of (postulated notion of) injunction as regards the sentence mentioning the acquisition of the knowledge of the Ātman; but (there is not set aside the notion of) informing one of what is not known.² [938]

In verses 936-938 Sureśvara examines the nature of the sentence *viññāya prajñāṃ kurvīta* as an injunction.

¹*niyama* is a kind of rule defined as *pākṣika*, what is related to one of the alternative (already known) ways of performing a ritual, and *parisaṃkhyā* refers to the exclusion of what occurred to one as a way of performance (*nityaprāpta*).

The intention in this verse is to state that *viññāya* ... does not belong to any of the two kinds of injunction. What therefore might remain is the acceptance of the sentence as *apūrvavidhi*. But that can be accepted only when the sentence is taken to have reference to what is not known before (*ajñātajñāpana*) and that does not mean: 'There is not any activity to be understood by any person for acquiring the knowledge of the Ātman.' Therefore, the sentence cannot be taken as an *apūrvavidhi* also.

²This last clause sets aside the idea of a *pravartakavidhi* 'injunction which promotes an activity' in the sentence *viññāya* This has reference to verse 893 above.

कर्तव्यता न साध्यस्य विज्ञातत्वाद्विधीयते ।
दुःखत्वाच्च न यागस्य ह्युपायोऽतोऽत्र बोध्यते ॥९३९॥

There is not prescribed (here) what is to be performed in the case of what has to be obtained, owing to that (the latter) has been already known and, further, there is not prescribed here any means towards performance of any sacrifice, because that involves misery.¹ [939]

¹This refers to the so-called Karma Kāṇḍa portion of the Veda.

प्रवृत्तिरप्रवृत्तिर्वा मेयवस्त्वनुरोधिनी ।
प्रमात्र बोधिकैवातो न प्रवृत्तिः प्रमाणतः ॥९४०॥

Here, i.e. in the Veda, any activity or cessation of an activity has only to be in accordance with (the nature of) the thing to be known; therefore, the proper knowledge acquired from the same (i.e. Veda— *atra*) is merely informative. Therefore, there is not any activity (promoted) by the means of knowing (i.e. by the Veda). [940]

The basis of the argument in this verse is that, according to some Bhāvanāvādins, Veda (i.e. Vedic words) would purport to promote an activity which is good and to avert activity which is ill. But, in the case of the Ātman, any general idea, good or evil, is irrelevant and, therefore, the Veda should not be taken as promoter of any activity.

कर्त्रादिहेतूच्छित्तेऽत्र प्रवृत्तेर्नास्ति संभवः ।
सम्यग्ज्ञानसमुत्पत्तौ मेयस्याकारकत्वतः ॥९४१॥

Further, on account of the removal of the cause,¹ i.e. the agent etc.² (of an activity), there is not any possibility of any tendency to act—(this is so) because of the rise of the proper knowledge of the object of knowing as being what is not a

kāraka, 'an agent' etc.

[941]

¹This refers to ignorance.

²*kartrādi* refers to *kartr*, *karma* and *karana*.

अज्ञानध्वंसि विज्ञानं न च कारकरूपताम् ।
गृहीत्वेह तमो हन्ति द्वैधीभावेऽसिवत्क्वचित् ॥९४२॥

Here, i.e. in respect of the inner self, the particular knowledge is (merely) the destroyer of ignorance; it does not destroy (that) ignorance by assuming the form/nature of any means of activity (*kāraka*); since (a means assumes that nature) elsewhere, like a sword,¹ for there is accepted the relation based on duality.

[942]

¹A weapon for killing implies the existence of someone to be killed and, thus, a sense of duality is involved in respect of the same.

Verses 943-946 are the refutation of the view: ignorance is removed by repetition of acquiring knowledge.

प्रत्यग्बोधोऽप्रमः सिद्ध आगमापायिमातृवत् ।
प्रत्यङ्मात्रफलत्वेन साक्षित्वेन च सर्वदा ॥९४३॥

It is settled that the knowledge about (the nature of) the inner self does not come from (what is usually known as) the knowledge resulting from (or, produced by) the means of knowing in the same way as the knowledge of a knower (in the worldly doings), who is born and later dies; that (the inner self) is ever known to be the witness and also the result consists merely in the inner self itself.

[943]

अनात्मवस्तुना नात्माकारकत्वाद्विना तमः ।
संबन्धं लभते साक्षात्तथानात्मापि चात्मना ॥९४४॥

The Ātman does not come into connection with anything that is non-Ātman and ignorance (also) cannot be there unless it is associated with what has the nature of a *kāraṇa* '(a factor connected with an activity such as) an agent'; even the non-Ātman does not get connected with the Ātman. [944]

This verse clarifies that there is not any real or unreal relation (or, connection) between the witness, i.e. the inner self, and the non-Ātman.

SP rightly draws attention to the break-up of the Saṃdhi in the first half as *ātmā akāraṇatvāt*.

बुद्ध्यादिर्जडरूपत्वात्स्वमहिम्ना न सिध्यति ।
बोधात्मवत्स्वतःसिद्धप्रत्यक्सिद्धयैव सिध्यति ॥९४५॥

The intellect etc.¹ do not get established by their own strength, since they have the nature of non-sentience; they become established only through the establishment of the inner self, which is of the nature of knowledge (itself) and which is established by itself. [945]

¹The word 'etc.' implies the plural—that is maintained in the whole of the verse.

स्वार्थं प्रत्येव सर्वोऽपि परार्थोऽर्थः प्रसिध्यति ।
यथा स्वप्नविनिर्माणं सिध्येत्स्वप्नदृशं प्रति ॥९४६॥

Everything, which serves the purpose of another, gets established (only) with reference to its own object; as, for example, the creation in the dream state would be useful (lit. get established) only for the seer of the dream. [946]

In verses 947 and 948, it is asserted that Ātman is only self-established.

पृथक्त्वे वापृथक्त्वे वा नैव तस्य मृषात्मता ।

पृथक्त्वे स्वमहिम्नैव तस्य सिद्धेः परात्मवत् ॥९४७॥

(The world could be held) different or non-different (from that Ātman), (yet) that cannot at all be of nature of what is false. For, if it be held to have difference (from the Ātman); then, being established by its own greatness, it would be like the highest Ātman.¹ [947]

¹The simile purports to convey: it would be just (another?) Ātman. That is to say: there cannot be the world as non-different from the existent Ātman.

आत्मत्वादपृथक्त्वे च मानं नाशे च नेक्ष्यते ।
परमार्थमनाविश्य न मिथ्येति प्रसिध्यति ॥९४८॥

And further in/for holding it as the Ātman (and therefore) non-different (from it), there is not seen any proof (or, means of knowing it to be so) and (its having) destruction.¹ Also, it would/could not be established as not false, unless it be pervaded by the Ātman.² [948]

¹SP supports this by quoting *Gītā* 2.16: *nāsato vidyate bhāvo nābhāvo vidyate sataḥ*.

²Read SP on this: *ātmano bhinnābhinnātmanā jagan na siddhyati cet tarhi tadrāhitātmavat tad api svena svatantra rūpeṇa [sa syāt]*.

Verses 949-952 affirm: What is said to be 'imagined' (or, conceived) cannot be thought of unless it has a basis in a real support.

क्लृप्तसर्पाद्यभावोऽयं न संवत्त्वात्पृथङ्मितः ।
व्यतिरेकेण तत्सिद्धेर्नापि चात्मानमन्वियात् ॥९४९॥

This absence of serpent etc. which is imagined is not known (by an authoritative means of knowing) as different from the

reality, which is the wreath of flowers; further, by its being established ever in the absence of that, it would not resemble the Ātman. [949]

स्वार्थस्य प्रत्यगात्मत्वात्प्रत्यग्याथात्म्यतोऽपि च ।
खण्डमुण्डादिवन्मतो नानात्मा लभते भिदाम् ॥९५०॥

Also because a non-Ātman has for its own property as of the nature of the inner self from the inner self and also, because of the real nature of the inner self, it would not itself get to exist as some discrete object like *khaṇḍa*, *muṇḍa*. [950]

सर्वमात्मेत्यतो वाक्यात्प्रत्यङ्मात्रैकरूपताम् ।
तदबोधप्रहाणेन प्रतीमो जगदात्मनः ॥९५१॥

From the statement of the Śruti *sarvam ātmā* we understand the non-Ātman (lit. what is of the form of the universe) only as the inner self, through the destruction of ignorance about that (i.e. the inner self). [951]

तत्त्वप्रबोधनं मुक्त्वा कार्यकारणवस्तुनः ।
अपूर्वाद्यर्थवचसा नान्वयाद्यवबोध्यते ॥९५२॥

By the statement *apūrva* ...¹ is not known Anvaya etc. of things that are related as cause(s) and effect(s), except without (understanding) the true nature of them. [952]

Cf. *idaṃ sarvaṃ yad ayam ātmā* (BU 2.4.6; 4.5.7) quoted by SP.

¹BU 2.5.19: *tad etad brahmāpūrvam anaparam anantaram abāhyam* ...; cf. BU 3.8.8; and cf. note on verse 837 above.

Verses 953-957 conclude the discussion regarding an injunction in relation to the knowledge of the Ātman.

बोधोऽप्यकारको यस्माद्धन्त्यज्ञानमिहात्मनि ।
न चावृत्तिव्यपेक्षः सन्व्यञ्जकत्वात्तमोपनुत् ॥९५३॥

Since (acquiring) knowledge also is not produced by any *kāraka*, it destroys ignorance here in the Ātman. And, not being dependent on repeated study (of the scripture etc.), it removes ignorance through its power of revealing (the true nature of the object to be known). [953]

This is only to affirm that, in knowing the Ātman from Veda, there is no need of expecting any injunction.

एवं स्वात्मनि विज्ञाते निष्क्रियेऽकारकेऽफले ।
प्रवृत्तौ वा निवृत्तौ वा को हेतुरिति भण्यताम् ॥९५४॥

Thus, when one's own Ātman is known (by one) as having no activity, being a non-agent (*akāraka*)¹ and not having any result (lit. fruit to produce), what reason (or, cause) could there be for any inclination to or cessation from (an activity)—let this be told. [954]

¹Or better, not being connected with any activity.

प्रत्यङ्मात्रैकतां मुक्त्वा तदविद्यामृते न हि ।
विद्वान्रूपान्तरं पश्येद्यत्र हीति तथा श्रुतिः ॥९५५॥

Indeed, the knower (of the Brahman) would not see here anything else than the mere singleness of the inner self and without (even a little of) ignorance about it—to this effect (or, to say this) there is a Śruti statement, viz. *yatra hi* [955]

नातोऽविद्यासमच्छित्तौ ब्रह्मयाथात्म्यबोधतः ।
प्रतीचि भूयोऽविद्यायाः संभवोऽस्ति प्रमाणतः ॥९५६॥

Therefore, when there is the destruction of ignorance (about

the nature of the Ātman) no possibility of (there being) any ignorance with reference to (or, lit. any authoritative means of knowing) the inner self in its true nature as the Brahman. [956]

रागादिदर्शनं यच्च ज्ञानिनोऽपीह चोद्यते ।
बाधितस्यैव तत्सूतेस्तदप्युक्ते न दूषणम् ॥९५७॥

And as to what is stated as a counterargument, viz. the noticing of attachment etc. on the part of a knower (of the Brahman), (it may be pointed out that), because it has its birth which is stultified (viz. ignorance), there cannot be considered a fault in what is said (by us). [957]

Verses 958-960 state that there is no fault (or, difficulty) in the recurrence of what has been (once) stultified.

बाध्यबाधकयोर्यस्मात्संबन्धः सकृदेव तु ।
संबन्धोत्तरकाले तु तत्स्मृत्योरेव संगतिः ॥९५८॥

The connection of what is to be stultified and what stultifies it occurs only once and (*tu*) in the time subsequent (to the existence of) that connection, there is association of only memories of them. [958]

This is to state that there will not really exist any ignorance when it is once destroyed; there might remain only the memories of those discrete objects which were its products—yet, see the next verse.

न च स्मृतेः प्रमाणत्वं क्वचित्सिद्धान्त इष्यते ।
प्रमाणलक्षणाभावान्न च बाधोऽप्रमाणतः ॥९५९॥

Also (or, But) nowhere in the Siddhāntin's view is accepted memory as an authoritative means of knowing; therefore, owing to the absence of any authoritative means (regarding that),

there cannot be any stultification (of the knowledge of the nature of the Brahman) by the absence of any authoritative means of knowing. [959]

मात्रादिकारणव्यवस्थेः पराङ्मानं प्रबाधतः ।
प्रत्यक्षादिविरोधोऽपि नातश्चोद्यः कथं चन ॥९६०॥

(Thus) from the destruction of the cause(s) such as the knower etc. and also from the stultification of any external means of knowing it would not also be proper to hypothesize (or, put forth a counterargument) about the means such as direct perception. [960]

This verse rejects the expectancy of any means for acquiring prajñā.

उदकै च शमादीनि साधनानि प्रवक्ष्यति ।
उक्तप्रज्ञाप्रसिद्धयर्थं येषु स्वातन्त्र्यमिष्यते ॥९६१॥

Further, in the subsequent portions, the Śruti will state such means as śama etc. for securing/establishing what has been enunciated—(those means) with reference to which is accepted freedom (on the part of a seeker of liberation). [961]

This verse begins to explain the words in BU 4.4.21, after there has been earlier the refutation of the explanation given by Bhartṛprapañca in relation to vijñāya This continues up to verse 964 below.

नाभिध्यायेदतः शब्दाननात्मार्थावबोधिनः ।
बहून्तित्यनुवादः स्यात्तद्वहुत्वस्य सिद्धितः ॥९६२॥

Therefore, one should not meditate¹ on words which are not informative of the Ātman; the word *bahūn* (in the Śruti) is just a restatement of the multiplicity (of the objects) that is already established. [962]

¹*abhidhyāyet* is the paraphrase of *anudhyāyāt* in the original, cf. verse 969 below.

वाचो विग्लापनमिति श्रुत्या निन्दाभिधीयते ।
भूरिशब्दानुचिन्तायास्तन्निषेधप्रसिद्धये ॥९६३॥

In the phrase *vāco viglāpanam*, there is stated by the Śruti the censure of meditation on many words, in order that the rejection of that (i.e. the same) becomes (firmly) established.

[963]

प्रभूतशब्दाभिध्यानं नालं मोक्षार्थसिद्धये ।
न चेदेवं फलं तत्स्याद्वाक्तालुगलशोषणम् ॥९६४॥

Meditation on many words does not effect/result into (or bring about) the attainment of the state of liberation; if otherwise (lit. if that would not be so), it would result in drying up of speech, palate and throat.

[964]

In verses 965-969, Sureśvara takes up the refutation of the view of Bhartṛprapañca in this regard.

उक्तव्याख्यानतोऽन्यस्य व्याख्यानस्य यथोदित-
न्यायेन दूषितत्वात्तद्वृषणार्थं न यत्यते ॥९६५॥

On the strength of the explanation stated (just now), there is no effort made to give blame to the explanation which is given by another,¹ because it is refuted for the reason pointed (out earlier).²

[965]

¹This refers to those words of Bhartṛprapañca which are quoted by SP thus: *dvaitābhidhāyakāñ śabdān dhyānakāle na cintayed (iti)*.

²That refers to *mokṣārthasiddhaye nālam* in the preceding verse.

ओमित्येवं सदा ध्यायेदन्या वाचो विमुञ्चथ ।
तेऽनुवित्त्वेति च तथा त्रयीत्यागे वचः स्फुटम् ॥९६६॥

There are clear statements in the Śruti thus: *om ity evaṃ sadā dhyāyed*,¹ *anyā vāco vimuñcatha*,² *te 'nuvittvā*,³ with reference to giving up of (the study of) the Vedic triad. [966]

¹*Muṇḍakopaniṣad* 2.2.6; 'meditate on om (as the soul)'.

²*Muṇḍakopaniṣad* 2.2.5; 'dismiss other utterances or words'.

³Not traced; 'They, having found'.

हेत्वर्थ इतिशब्दोऽयं बहुशब्दजिहासया ।
मन्त्राम्नायसमाप्त्यर्थं यदि वेतिसमीरणम् ॥९६७॥

This word *iti* (is used here) for conveying the reason; viz. through the desire of giving up (the meditation on) many words; and the statement *yadi vā* ... is to cover (or completely convey) what is obtained from the Mantra and tradition.¹ [967]

¹Perhaps this refers to the Brāhmaṇa as that is mentioned specifically in the next verse.

सहेतुकावभिहितौ बन्धमोक्षौ प्रयत्नतः ।
मन्त्रोक्त्या ब्राह्मणोक्त्या च पुंसां श्रेयोभिवाञ्छिनाम् ॥९६८॥

That, bondage and liberation have for them (some) causes, is carefully (or specifically) mentioned by statements of the Mantra¹ and also of the Brāhmaṇa² in relation to persons who wish to acquire the good. [968]

¹SP refers to *saktaḥ saha karmaṇī* ... (cited in BU 4.4.6).

²SP refers to *sa yatrāyam ātmā* ... (BU 4.4.1).

नानुध्यायाद्बहुशब्दानिति कस्मादिहोच्यते ।
अल्पीयसां वा न त्यागः कस्मादित्यभिधीयताम् ॥९६९॥

(A question is asked:) 'Why is it stated here 'one should not meditate on many words?' or, 'Why is not there (stated) the giving up of fewer (words)?' Let this be told. [969]

The discussion on BU 4.4.22 begins here. Verses 970-972 state that the rise of the desire to know the Brahman leads to the pursuit of the Veda, i.e. Vedic rituals.

शब्दस्याल्पीयसोऽत्यागे तत्र तावदिहोच्यते ।
हेतुस्त्रय्यास्तु संत्यागे तमेतमिति वक्ष्यते ॥९७०॥

To begin with, then, here is stated (the reason) for not abandoning smaller word (i.e. Karma Kāṇḍa); and as for abandoning of (the recitation of) the Vedic triad, it will be stated in the Śruti itself thus: *tam etam ...* (BU 4.4.22). [970]

यदि वा भिन्नवाक्यत्वात्कर्मविज्ञानकाण्डयोः ।
वेदान्तैः कर्मकाण्डस्य परस्परविरोधतः ॥९७१॥

Or rather (this is so), because there is mutual contradiction of Vedic portion referring to rituals, i.e. Karma Kāṇḍa with that about (*vijñāna* i.e.) the Upaniṣads/Vedānta texts, since the two portions of the Veda given to the ritual activity and to knowledge are mutually opposed. [971]

हेतुतां प्रतिपद्यन्ते कर्माण्यपि विमुक्तये ।
बुद्धेः संस्कारकत्वेन यथा तदभिधीयते ॥९७२॥

(Now) is stated as to how even ritual activities become the cause of liberation by their becoming the means of purifying the intellect. [972]

Verses 973-979 discuss BUB: evaṁ tasminn ātmaviṣaye sarvo vedah ...

पूर्वो भागः समस्तोऽपि वेदान्तार्थावबुद्धये ।
 यथा भवति वेदस्य तथाथ प्रतिपाद्यते ॥९७३॥
 वेदान्तार्थं यथायातमनद्य श्रुतिरादरात् ।
 स वा इत्यादिनोक्तार्थं प्रवक्तुमुपचक्रमे ॥९७४॥

Now is stated as to how the entire earlier portion of the Veda results into (lit. becomes the cause of, or, leads to) the knowledge of the matter (stated) in the Vedānta texts;

[973]

then, having restated the teaching of the Vedānta texts, as it came (into tradition) in the words *sa vā* ... the Śruti began respectfully to state the matter, already stated.

[974]

परामर्शः सशब्देन पूर्वोक्तस्य प्रसिद्धितः ।
 वैशब्दः स्मृतये तस्य मृतिजन्मादिधर्मिणः ॥९७५॥

In the word *saḥ* is there a reference to what has been already said, (this is so) on the basis of its being known; the word *vai* is for reminding one of that person in whose case there occur the incidents of death, birth, etc.

[975]

In this verse, Sureśvara gives the meanings of the two words *saḥ* and *vai* from the statement about *vividiṣā*. Also, the word *dharma* is used in some peculiar sense, i.e. of incident, or, happening.

ध्रुवान्तमन्त्राम्नायोक्त एष इत्यभिधीयते ।
 महानज इति वचस्तद्विशेषणसिद्धये ॥९७६॥

In the word *eṣaḥ* is referred to (that person) who is stated in the Mantra ending with the traditional ending *dhruva*;¹ the statement *mahān ajah* is used for effecting (the sense of) attributes of him.

[976]

This is the explanation of *eṣa mahān ajaḥ*.

¹This refers to BU 4.4.20: *virajaḥ ... mahān dhruvaḥ*.

अन्वयव्यतिरेकार्था योऽयमित्यादिका श्रुतिः ।
विशेषणविशेष्यार्थं सर्वस्येति तथा वचः ॥९७७॥

The Śruti text which begins with (the words) *yo 'yam* is for (effecting) the Anvaya and Vyatireka (in respect of the Mantra); so also, the word *sarvasya* is for specifying (the nature of) the substantive by (its) adjectives. [977]

यदत्र किञ्चिद्वक्तव्यं तस्य प्रागेव चोक्तितः ।
सामानाधिकरण्यादेर्नेह तत्पुनरुच्यते ॥९७८॥

Since there has been earlier ¹ the statement of whatever that has to be stated here, viz. of being in the same case relation etc.; therefore, that is not stated here again. [978]

¹This refers to the discussion of *sāmānādhikaranya* etc. in Brahma Kaṇḍikā. Cf. BUBV 1.4.1416-1427.

भूयान्स साधुना नेति ज्ञानस्य फलमुच्यते ।
एष सर्वेश्वरोक्त्या च यथोक्तस्यैव संस्तुतिः ॥९७९॥

In the words *bhūyān sa sādhuṇā na* there is stated the result of (the acquisition of) knowledge and in the statement *eṣa sarveśvaraḥ* there is praise of what is already stated. [979]

Verses 980-985 state the purport of the Mahāvākya, *sa vā eṣa mahān*

एतदुक्तं भवत्यत्र योऽयमित्यादिनोदितः ।
विविक्तः कामकर्मादेः स्वयंज्योतिश्च शब्दितः ॥९८०॥
स एष ईश्वरः साक्षादिति श्रुत्या प्रदर्शितः ।
विशेषणविशेष्यत्वमीशितव्येशयोरिह ॥९८१॥

This is mentioned (or, referred to) in the words *yo 'yam ...* (Then the meaning) intended: In this context, (the person who is) shown to be aloof from desire, action etc. and also called the self-illuminating, [980]
and is mentioned (lit. shown) by/in the Śruti as *sa eṣa īśvaraḥ sākṣāt ...*; this is because there is here the relation of being the qualifier and what is qualified¹ between the one to be controlled and the other, the controller. [981]

¹Thus there is stated the division of *viśeṣaṇa* and *viśeṣya* in the Śruti statement.

यमपेक्ष्येश्वरत्वं स्यात्तत्तावत्प्रतिषेधति ।
विशेषणविरोधित्वान्महत्त्वं कुम्भगं यथा ॥९८२॥

The Śruti then (*tāvat*) rejects that with reference to which there would be the lordship (of the master); this is on the basis of the opposition between the adjectives (of the two), as, for example, between the great ether and the ether obtaining in a pitcher.¹ [982]

¹The example is elucidated in the next verse.

ईशितव्यापनतौ च तदपेक्षैकसंश्रयात् ।
ईशित्वमपि निःशेषं प्रतीचो विनिवर्तते ॥९८३॥

When the one to be controlled is set aside the lordship also in respect of the inner self would not entirely remain (as established), for that lordship is with reference to the expectancy of that (which is to be controlled). [983]

घटाकाशो महाकाश इत्युक्ते कुम्भखहनुतौ ।
आकाशमात्रताशेषो यथैवेह तथात्मनि ॥९८४॥

As, when it is said for effecting the concealment/denial of ether in a pitcher, in the statement of the ether in a pitcher,

it is described as the great ether, there is only ether that remains (in one's understanding), so also, here in the case of the Ātman alone.¹

[984]

This is elucidation of the illustration expressing *mahat*

¹Add to complete the sense; there remains only the Ātman. There remains the immanent with all its attributes given up.

विरुद्धयोरसंसर्गो यथैवमविरुद्धयोः ।

तदबोधसमुच्छित्ताववाक्यार्थोऽवशिष्यते ॥९८५॥

As there cannot be any connection between two things that are opposed in nature, so also there cannot be any connection of things which are not opposed.¹ (As) there is removal of ignorance about that (i.e. the inner self), what remains is only what is not the meaning of the sentence.²

[985]

¹*ghaṭa*, *paṭa* do not have any connection between them, since there is mutual opposition of the two; so also if *pratyaktva* and *advitīyatva* are but one (that is, they do not have any opposition between them) they do not have between them any connection also.

²By *avākyaṛtha* Sureśvara understands the inner self which cannot be the subject or object of usual sentences.

Verses 986-992 state meanings of different words in the text.

ऐदंपर्यमिदं तावत्पदार्थोऽथाधुनोच्यते ।

स वा इतिवचोऽर्थस्य व्याख्यातत्वान्न यत्यते ।

तद्व्याख्यानाय भूयोऽपि तस्य चेहानुवादतः ॥९८६॥

This is, so far, the purport of all this (that is said) in the text. Now is explained the meaning of the (different) words. (Yet) because, the meaning of the words *sa vā* has already been explained, there is not any effort made again for explaining it; therefore, the mention of that is merely a

restatement.¹

[986]

¹It is a restatement for the purpose of stating the reason for the earlier argument and, therefore, it should not be considered as repetition.

आकाशवचसा चोक्तः परोऽज्ञातो जगद्गुरुः ।
जगज्जनिस्थितिध्वंसहेतुरात्मविशेषणम् ॥९८७॥

By the word *ākāśa* is here stated the highest, the unknown and the best (lit. venerable or respectable) in the world—the specification of the nature in the case of the Ātman is in the word 'it is the cause of origin, sustenance and destruction of this world'.

[987]

क्षेत्रक्षेत्रज्ञयोरेष स्वभावः प्राक्समीरितः ।
अप्रबुद्धात्मतत्त्वः सन्कारणात्मतया स्थितः ॥९८८॥

This is thus the nature of the field and the knower of field as stated before—the Ātman, being of unknown nature, is stated there, as being the cause of the world.

[988]

सर्वमस्य वशे यस्माद्वशी सर्वस्य तेन सः ।
उदासीनस्य तस्य स्याद्वशित्वमिति चेन्मतम् ॥९८९॥
वशित्वशक्तिसंबन्धान्मैवं यस्मात्पुनर्वचः ।
सर्वस्येशान एवेति सर्वस्येष्टे सदैव सः ॥९९०॥

Since all (the world) is under the control of this one, therefore it is called the master (or, lord) of all. But, if it were held that there could not be the masterhood of all when (i.e. for) it is inactive;

[989]

(we say, this is not so) owing to its connection with the power of being a controller; therefore, do not think this way, as there are once again the statements *sarvasyeśāna eva* and *sarvasyeṣṭe sadaiva*.

[990]

कुमारनृपवत्तत्स्यादीशानत्वं परात्मनः ।
 इति चेन्नैतदेवं स्याद्यतोऽधिपतिरुच्यते ॥९९१॥
 अधिष्ठायान्तर्यामिणोऽद्वैतसिद्धिर्वा
 त्रिविधेनाधिपत्येन स जगत्पाति सर्वदा ॥९९२॥

If one were to say, 'This lordship in the case of the highest Ātman would be like that of royalty in a prince', this is not so, because that one is described as *adhipati* 'overlord'. [991]
 That lord ever protects the world, with its threefold mastery, in relation to origin, sustenance and destruction (of the same), since that one has pervaded it by its being the effect of the Ātman. [992]

Verses 993-998 state: on the basis of the *Śruti sa sādhanā*—that the overlord does not have any merit and/or demerit.

धर्माधर्मसमायोगो लोकवच्छासनात्प्रभोः ।
 प्राप्नोति चेन्न तत्प्राप्तिः स नेति वचसः श्रुतेः ॥९९३॥

If it is held that (this overlordship) comes to the Ātman because of its controlling, as in the world where there occurs the connection of merit and demerit, that (acquisition of that master or overlord) is not (real), as it is understood from the statement in the *Śruti sa neti*. [993]

स्वकर्तृफलदायित्वं स्वभावः कर्मणां मतः ।
 कर्तृस्वामित्वविरहान्नेशस्य फलसंगतिः ॥९९४॥

It is held that bringing about the result of his own (actions) to the agent is the nature of actions; (but it is not so in the case of the overlord) since there is no connection of the result (of any of its activity) owing to the absence of agency and mastery.¹ [994]

¹These two are merely attributed to the Ātman—they are not real—and this is explained in the next verse.

कौटस्थ्यात्रास्य कर्तृत्वमकार्यकारणत्वतः ।
कार्यकारणभेदेन तदविद्यैव संस्थिता ॥९९५॥

Because of its immutability, there is no agentship (of any activity) in the case of this one and also, because it is neither a cause nor an effect, it has no connection with such discrete things as cause(s) and effect(s); therefore, there is only ignorance that is established. [995]

अस्थलं नेति नेतीति न जायत इति श्रुतिः ।
अपूर्वानपरेत्याद्या तथा च सति युज्यते ॥९९६॥

(Further) the Śruti (statements): *asthūlam, neti neti, na jāyate, apūrvānapara* and others would be reasonable only if that be the state (of the Ātman or overlord as stated above). [996]

स्वस्वामित्वादिसंबन्धस्तथा नास्याद्वितीयतः ।
यत्र हि द्वैतमित्येवं तथा च श्रुतिशासनम् ॥९९७॥

In the same way, there is not in the case of this Ātman (i.e. the overlord) any connection between what is its own and also its mastery on account of its being non-dual; to this effect is there an instruction in the Śruti, viz. *yatra hi dvaitam*. [997]

जन्मादयो विकारा ये संबन्धाश्चापि ये मताः ।
अविद्योपप्लुतस्यैव ते सर्वे स्युर्न तु स्वतः ॥९९८॥

And the modifications such as birth etc. and also the relations which are held (by the opponents to be obtaining in respect of the overlord) cannot be there, on their own, since all of them belong to that Ātman which is overwhelmed by ignorance. [998]

In verses 999-1003 is stated the reason for the overlord's not having any connection with merit and/or demerit.

यत एवमतो नेशो भूयान्स्यात्साधुकर्मणा ।
कनीयान्नापि पापेन तदकर्तृत्वहेतुतः ॥९९९॥

Since this is so, the Ātman would not be the overlord by its good doing or be less than others by its ill (doings) owing to its not being the cause, i.e. because of the absence of agency (in any action). [999]

क्षेत्रज्ञस्य सतो यद्वत्पुण्यपापाभिसंगतिः ।
कर्तृत्वाद्यभिमानित्वान्नैशस्य तदसंभवात् ॥१०००॥

As there is the connection of the Ātman with good and/or evil (doings), while it is the knower of the field and on account of its having consciousness of being an agent (of actions) etc., these are not possible in the case of the overlord. [1000]

निर्हेतुत्वात्प्रतीचोऽस्य तमस्वित्वस्य सर्वदा ।
हानिवृद्धी न तस्यातो धर्माधर्मैरसंगतेः ॥१००१॥

Because this one, while it is the inner self, has been never a cause of its being possessed by ignorance; therefore, there cannot be any waxing and decrease (or, waning) on account of its non-connection with merit and demerit. [1001]

न कार्यकारणं वास्य यत्कर्तृत्वादिकारणम् ।
स्वतोऽसङ्गस्वभावत्वान्निरंशैकत्वतस्तथा ॥१००२॥

Nor is this one (i.e. the Ātman) the cause of some effect, i.e. that which is really the cause of being an agent (of some activity) etc., because of its own nature of being unattached (to anything else) and also because it is one single entity without being comprised of any parts. [1002]

स्वत एवंस्वभावोऽपि तदविद्यासमाश्रयात् ।
एष सर्वेश्वरो देव ईशितव्यव्यपेक्षया ॥१००३॥

Thus, being of this nature, in its own right, and having a relation to ignorance about itself, this one is called the overlord of all, the shining one in relation to what are to be lorded over. [1003]

In verses 1004 and 1005, Sureśvara sets aside the notion of repetition with reference to the statement in the Śruti sarvasyeśānah.

एष सर्वेश्वर इति पुनरुक्तं किमुच्यते ।
वक्ष्यमाणबुभुत्साया विषयत्वप्रसिद्धये ॥१००४॥

(A question is asked:) 'Why are the words *eṣa sarveśvaraḥ* repeated?' and the answer given is: 'It is for establishing the subject matter for a person's desire to know,¹ as will be stated'.

[1004]

¹On *bubhuṭsā* refer to verse 1021 below.

अज्ञात एष एवात्मा तावन्मात्रसतत्त्वतः ।
ईशादेर्विषयान्तस्य कल्पितत्वमतो भवेत् ॥१००५॥

This Ātman is already (*eva*) not known, because it has only that (i.e. being unknown) as its nature; therefore, there occurs falsity in respect of (all things) beginning with the overlord up to all the objects of knowing.¹ [1005]

¹When there is the knowledge of things like the overlord etc.; that is taken to be the product of ignorance and those are all only non-Ātman.

Verses 1006-1009 state that the overlord does not come to have any merit etc. by doing any favour to its devotees.

साध्वाद्यनभिसंबन्धे यदि वा हेतुरुच्यते ।

एष इत्यादिवचसा सर्वेशस्यात्मनः स्फुटः ॥१००६॥

Or rather, in the statement *eṣa ...*,¹ there is stated a clear reason why there does not obtain any connection of the overlord, i.e. the Ātman, with good etc. [1006]

¹This has reference to *sa na*

धर्माधर्मादितन्त्रोऽर्थस्तत्फलेनेह लिप्यते ।
विज्ञानात्मा न तु तथा सर्वेशत्वात्परो भवेत् ॥१००७॥
सर्वस्य कर्मणोऽप्येष कारकस्य च तत्कृतः ।
स्वतन्त्र ईश्वरो यस्मान्नातो धर्मादितन्त्रता ॥१००८॥

The specifically knowing Ātman depends on merit, demerit etc. and is thus affected by the result(s) of the same; but the lord (the highest Ātman) would not be like that, owing to its lordship of all. [1007]

Also, since it is an independent overlord of all activity (i.e. activities) and also of all the factors of that activity (viz. *kāraṅkas*); therefore, there is no dependence (in the case of it) on (i.e. not its being guided by) merit etc. [1008]

भूतानि जनिमन्त्येष यतः पालयतीश्वरः ।
भूतपालस्ततो देवः कार्याणां कारणत्वतः ॥१००९॥

Since this overlord protects all the beings, that were born, therefore, the divine one is the protector of the beings, by being the cause of all effects (or, discrete worldly objects). [1009]

This justifies why the overlord is described as the protector of beings.

कारणेन हि पाल्यन्ते कार्याणीह यतस्ततः ।
तत्कार्यत्वाच्च भूतानां भूतपालत्वमात्मनः ॥१०१०॥

Since all effects are governed by their cause(s);¹ therefore, the Ātman is the protector of (all) the beings, their being the products of the same. [1010]

¹SP refers to the idea of BS 1.1.2: *janmādy asya yataḥ*.

Verses 1011 and 1012 state the purport of the words bhūtādhipati in the Kāṇva recension and of lokapāla in the Mādhyandina.

भूताधिपतिशब्देन ब्रह्मा वात्राभिधीयते ।
इन्द्रो लोकेश्वरश्चात्र वरुणाद्यात्मना तथा ॥१०११॥
लोकपालोऽपि चाप्येष तथाकार्यस्य दर्शनात् ।
प्रशासितापि चाप्येष तदेतदभिधीयते ॥१०१२॥

Or, the word *bhūtādhipati* is mentioned here for Brahmadeva¹ and the lord of the worlds here is Indra, so also as being Varuṇa and others. [1011]

This one (i.e. Ātman) is also the protector of the worlds,² since there is noticed on its part the activity of a similar kind. Also, this one is the ruler of them—that is mentioned here (thus). [1012]

¹This has reference to God Hiranyagarbha, who, SP states, is mentioned in the well-known Hiranyagarbha-Sūkta of the Veda.

²The word *lokapāla* is read in the Mādhyandina recension of BU and, therefore, Sureśvara offered an explanation of it also.

It is stated in verses 1013 and 1014 that the overlord itself is the ruler of the different worlds, by assuming the forms of Indra and others.

लोकानां रचना यैषा क्षित्यादीनां व्यवस्थिता ।
सिद्धासंकीर्यमाणेह साप्यस्यैवानुशासनात् ॥१०१३॥

What is established as this arrangement of the worlds like

the earth etc. is also made unflittering by the dictates of this one.¹ [1013]

¹SP explains this nature of the Ātman by referring it to *ato nyad ārtam* (BU 3.4.2; 3.5.1; 3.7.23).

वर्णाश्रमादिहेतूनां व्यवस्थानामसंकरः ।
नैव सिध्येद्विना हेतुं सेतुरेष इतीक्ष्यताम् ॥१०१४॥

Since there would not be established (among the (people's) castes and stages of life etc.) the non-distinction of the order of the different causes responsible for castes and stages of life; therefore, let this one¹ be accepted (lit. seen) as the bridge. [1014]

¹Namely, the highest Ātman, existing in all individuals.

In verses 1015-1021, the bridge is described as the cause for non-mingling (or, order/arrangement) of the (earlier) said distinction.

यथोदकप्रवाहस्य सेतुर्विधरणस्तथा ।
सर्वलोकव्यवस्थानां सेतुः स परमेश्वरः ॥१०१५॥
किमर्थं सेतुरित्येवमाकाङ्क्षायां परं वचः ।
असंभेदाय लोकानामेषामित्यभिधीयते ॥१०१६॥

As a bridge is the supporter of any stream of water, so also is that overlord the bridge of all kinds of arrangements/orders among all the people. [1015]

The subsequent statement *asambhedāya lokānām* 'to keep (different) worlds apart' is made in the Śruti in answer to the expectation (or, question) as to why the bridge is made. [1016]

असंभिन्नव्यवस्थाः स्युः कथं नाम यथोदिताः ।
तस्मै तस्मै फलायालं सेतुरीशो भवेत्ततः ॥१०१७॥

(An argument is adduced in the form of a question:) 'How indeed would (people), as stated above, have the definite and arranged order?' For everyone of them, i.e. the various results, is the lord responsible (lit. capable). [1017]

एवं तावत्समासेन षष्ठाध्यायोक्तमादरात् ।
श्रुत्यानूद्याखिलं वस्तु तस्याथ प्रतिपत्तये ॥१०१८॥
उपायतां यथा सर्वो वेदोऽयं प्रतिपद्यते ।
तमेतमिति वाक्येन तदेतदभिधीयते ॥१०१९॥

Thus far, after respectfully restating in brief, all the matter in the sixth (i.e. fourth) Adhyāya, the Śruti has now stated for his (i.e. listeners') understanding, [1018] that it becomes the means (for that arrangement among them, in the words) *sarvo vedo 'yam*— this is (now) stated in the sentence *taṁ etaṁ* [1019]

एतं विविदिषन्त्युक्तं वेदानुवचनादिभिः ।
उपायैरीश्वरं साक्षादपेताशेषकल्पनम् ॥१०२०॥

The statement: *etaṁ vividiṣanti* '(Brāhmaṇas) seek to know it' and also the various means in the words *vedānuvacana* etc. are the ways of (getting to know) directly the lord, who is above the entirety of false notions. [1020]

स्वातन्त्र्येणेशविषया बुभुत्साप्यतिदुर्लभा ।
गम्यते तदुपायानां विधानाद्यत्नतः श्रुतौ ॥१०२१॥

(This is for the reason that) this desire to know about the overlord would be difficult to obtain (in any human being) through his free will (*svātantrya*); therefore, there is a special statement made about those means in the Śruti. [1021]

This verse points out that distinct sentences occur in the Karma Kāṇḍa and the Vedānta texts, after keeping in view their different

viniyogas.

विनियोगप्रयत्नाच्च कर्मविज्ञानकाण्डयोः ।
गम्यते भिन्नवाक्यत्वं नैकत्र विनियोगीः ॥१०२२॥

Further, from this attempt to specify the employment of the means in the two different portions of Veda, i.e. those which relate to (ritual) activity and to knowledge there is understood the lack of unanimity/difference. There is **not** there (in Veda) at one place any statement about the employment (of the same). [1022]

Verses 1023 and 1024 point to (i.e. speak of) the rituals as the cause for the desire to know the Ātman.

यद्बुभुत्सापि दुष्प्रापा वद तत्तत्त्वबोधनम् ।
ततोऽपि दुर्लभतरमुपायाल्लभ्यते कुतः ॥१०२३॥

Give me the information about that reality, the one which is desired to be known (and) which is very difficult to be obtained (among people)—whence is that to be obtained by (the adoption of) the means which are more difficult than that (i.e. the desire)? [1023]

बुभुत्सामात्र एवामी वेदानुवचनादयः ।
विनियुक्ता यतस्तस्मात्रैते तज्ज्ञानसिद्धये ॥१०२४॥

Since these, i.e. *vedānuvacana*¹ etc., are employed (with an intention to create) only the desire to know (the Ātman); therefore, it follows that they do not result in the knowledge of that (i.e. the Ātman). [1024]

¹In *veda* and *anuvacana* there is a separate mention of each; the former is Mantra in the Saṃhitā and the latter, the Brāhmaṇa text(s).

Verses 1025-1027 affirm that *śama* etc. are the cause of knowledge.

अत एव श्रुतिर्यत्नाच्छमादीनेव वक्ष्यति ।
उपायानात्मयाथात्म्यविज्ञानाय यमात्मकान् ॥१०२५॥

(It is) just for this reason that the Śruti will specifically state the means *śama* etc., which are of the nature of *yama* etc., as the means to the knowledge of the Ātman as it is. [1025]

SP, following BUB, refers to *yama* as *ahimsā*, *satya* etc.—so stated in the *Yogasūtra*. Possibly, this refers to the view of Bhartṛprapañca or his followers.

बुभुत्सासाधनेष्वेषु वेदानुवचनादिषु ।
अधिकारोऽविशेषेण ह्याश्रमाणां यथायुति ॥१०२६॥

In respect of these means for satisfying the desire to know (the nature of the Ātman), i.e. *veda*, *anuvacana* etc., various stages of life have eligibility without any differentiation (among them), and in accordance with (what is stated) in connection with each (*yathāyuti*).¹ [1026]

¹ AnSS edition records another reading *yathāśruti* in place of *yathāyuti*.

यथायोगं यथाश्रद्धं तद्बुभुत्साप्रसिद्धये ।
सर्वाश्रमैरमी कार्या वेदानुवचनादयः ॥१०२७॥

Persons belonging to all the stages of life should take to *vedānuvacana* etc., according to their connection with them and (also) according to their faith, in order that their desire to know that (Ātman) is fulfilled. [1027]

There follow in verses 1028-1031, the meanings of *vedānuvacana* etc.

वेदानुवचनोक्त्यात्र वेदाध्ययनमन्वहम् ।
श्रुत्येह भण्यतेऽस्मभ्यं नित्यस्वाध्यायलक्षणम् ॥१०२८॥

(Hence,) the Śruti has stated in the word *vedānuvacana* the daily study of the Veda which features as one's daily study for (all of) us. [1028]

This has reference to *Śatapatha Brāhmaṇa* 11.5.6.3; 11.5.7.2; 11.5.7.11.

ब्राह्मणग्रहणं चात्र द्विजानामुपलक्षणम् ।
अविशिष्टाधिकारित्वात्तेषामात्मावबोधने ॥१०२९॥

The mention here (in the Śruti) of a Brāhmaṇa is indicative of all the twice-borns,¹ because, with respect to getting to know the nature of the Brahman, there is not any specific qualification (of a Brāhmaṇa). [1029]

¹This refers to Brāhmaṇa, Kṣatriya and Vaiśya, all of whom have the same eligibility for acquiring the knowledge of the nature of the Brahman.

विविदिषन्तीतिगिरा संबन्धः प्रतिसाधनम् ।
साकाङ्क्षत्वादिह ज्ञेयो निराकाङ्क्षत्वसिद्धये ॥१०३०॥

The word *vividiṣanti* has connection with every means (mentioned in *vedānuvacana* etc.); here, owing to the expectancy (of the knowers for knowing the Brahman), it is to be known for effecting the state of being desireless. [1030]

वेदानुवचनोक्त्या वा कर्मकाण्डपरिग्रहः ।
व्याख्यानायाथ तस्यैव यज्ञेनेत्यादिरुच्यते ॥१०३१॥

Or, in the statement *vedānuvacana*, there is mention (lit. acceptance) of (only) that portion of the Veda which is related

to (ritual) activity, because there is (later) stated *yajñena* etc. in order to explain the idea of that very (statement). [1031]

In verses 1032-1034, Sureśvara refutes the view of Bhartrprapañca on the purport of vedānuvacana.

प्रकाशयमानमात्मानं वेदानुवचनेन तु ।
इति व्याचक्षते ये तु तेषां वेदान्तमात्रकम् ।
प्राप्तं वेदानुवचनं तदन्यस्याप्रकाशनात् ॥१०३२॥

However, for them, who explain that it is only by *vedānuvacana* that (the nature of) the Ātman is revealed, there is, in the word *vedānuvacana*, mention made of only the Vedānta texts, because the parts of the Veda other than that do not reveal that. [1032]

विरह्य न वेदान्तान्वेदेऽन्येन कथं चन ।
ग्रन्थेनाविष्कृतिः साक्षादात्मनोऽस्योपपद्यते ॥१०३३॥

(They think) that the Vedānta works, being kept apart, it is not reasonable to hold that the other works in (i.e. portions of) the Veda do not in any way directly reveal the nature of this Ātman. [1033]

तं त्वौपनिषदमिति नियमार्थे सतीष्यते ।
श्रौतं वाक्यमिदं न्याय्यं न तु सर्वोक्तिभासने ॥१०३४॥

In the words, *taṁ tv aupaniṣadam* ..., there is accepted (the study of only the Vedānta texts) for restricting (one's attention to the Upaniṣads); this statement of the Śruti is thus reasonable, but it is not to be taken with reference to (the nature of) all the statements (in the Vedānta texts as are capable of) revealing (the nature of the Ātman). [1034]

This is how they accept a kind of *niyamavidhi* in *taṁ tv*

Sureśvara states in verses 1035-1037 the faults in his own Siddhānta.

ननु सर्वस्य वेदस्य त्वत्पक्षेऽपि न सिध्यति ।
ग्रहणं यज्ञदानादिवाचकस्यैव संश्रयात् ॥१०३५॥

(A hypothetical objection is:) 'But, indeed, in your view also, this (revealing the nature of the Ātman) does not become established in respect of the entire extent of the Veda, because there is support taken in the mention which is expressive of (the performance of) sacrifice, (making) gifts etc' [1035]

मैवं विविदिषामात्रहेतोरेव परिग्रहात् ॥१०३६॥
वेदानुवचनस्येह न तु तत्त्वावबोधिः ।
त्रय्यन्तस्य ग्रहोऽत्र स्यात्साक्षाज्ज्ञाने तु तद्ग्रहः ॥१०३७॥

(The answer is made:) 'Do not think so, because that was accepted (by us) only for the desire to get to know'. [1036]
With reference to the statement *vedānuvacana*, however, showing there is not acceptance with reference to what reveals the nature of reality; the acceptance here of Vedānta, lit. the end or sequel of triad, also is reasonable, since there is acceptance of that for directly knowing (the Brahman). [1037]

अप्यभ्युपगमे नायं दोषोऽस्मान्प्रति द्वौकते ।
कृत्स्नवेदग्रहादाद्यव्याख्याने दोष एव न ॥१०३८॥

In case even that¹ is accepted, there will not come to us any fault, because there is, in our first explanation, the mention of the acceptance of the entire Veda and, therefore, there is not any fault. [1038]

¹Namely, the blame given to the Siddhāntin by Bhartṛprapañca or his follower, as stated in verse 1025.

In verses 1039-1041, Sureśvara states that the opponents consider

vedānuvacana etc. as leading to the desire to know the Brahman and finds fault with their view.

प्रकाश्यमाने मानेन बुभुत्सापि न युज्यते ।
साक्षात्त्वाद्बुभुत्सो माप्तेर्बुभुत्सा प्राक्प्रमायुतेः ॥१०३९॥

Also, when (the nature of the Ātman) is taken to be revealed by the means of knowing (i.e. by Vedānta), it is not reasonable to talk about any desire to know, since, owing to having obtained (what is to be known), i.e. the nature of the Ātman directly, that desire to know the Ātman (has to be taken) before one has acquired the right knowledge of it. [1039]

वेदानुवचनोक्त्यात्र नित्यं कर्मोपदिश्यते ।
यज्ञदानादिभिस्तस्य साहचर्येण हेतुना ॥१०४०॥

Here, i.e. in the sentence regarding *vedānuvacana*, there is mention made only of the daily duty (of the twice-born) for the reason that it has an intimate connection (*sāhacarya*) with the performance of sacrifice, making gifts etc. [1040]

सिद्धिर्विविदिषायाः स्याद्वेदानुवचनादिभिः ।
कथमित्युच्यते तेषां बुद्धिसंशुद्धिहेतुतः ॥१०४१॥

If a question is asked as to how there can be established the desire to know (the nature of the Brahman) by such (means) as *vedānuvacana*, it is stated (in answer) that it is so because they effect the purification of the intellect. [1041]

Verses 1042-1050 adduce authorities for holding the ritual performance to be a means of purification of the intellect.

इदं मेऽङ्गमनेनेति पुंसंस्कारश्रुतेस्तथा ।
यज्ञो दानं तपश्चेति स्मृतेरपि वचः स्फुटम् ॥१०४२॥

So also, from the Śruti referring to the purification of (the

intellect of) a person in the words *idam me 'ṅgam ...* (the same has to be understood). So also, there is a clear statement in a Smṛti *yajño dānaṁ tapaś ca*¹ [1042]

¹This is from *Gītā* 18.5.

यस्मिन्विशुद्ध इति च सत्त्वशुद्धौ ध्रुवा स्मृतिः ।
इत्येवमादिवाक्यानि श्रौतान्युक्तार्थसिद्धये ॥१०४३॥

So also in sentences like *yasmin viśuddhe*¹ and *sattvaśuddhau dhruvā smṛtiḥ*,² there is a statement made of the Śruti's effecting the said purpose. [1043]

¹Not traced.

²Not traced.

ज्ञानमुत्पद्यते पुंसां क्षयात्पापस्य कर्मणः ।
यथादर्शितलप्रख्ये पश्यत्यात्मानमात्मनि ॥१०४४॥

By the destruction of evil activity (which is effected by the above means), there arises, in human beings, the knowledge (of the nature of the Ātman), just as (there is) recognition of one's own self while one is looking at oneself in a clear mirror. [1044]

This is *Mahābhārata* 12.198.8.

यज्ञदानतपःकर्म न त्याज्यं कार्यमेव तत् ।
यज्ञो दानं तपश्चैव पावनानि मनीषिणाम् ॥१०४५॥
चत्वारिंशत्तथाष्टौ च संस्कारा इति च स्मृतिः ।
योगिनः कर्म कुर्वन्ति सङ्गं त्यक्त्वात्मशुद्धये ॥१०४६॥
योगयुक्तो विशुद्धात्मा विजितात्मा जितेन्द्रियः ।
सर्वभूतात्मभूतात्मा कुर्वन्नपि न लिप्यते ॥१०४७॥

"Sacrifice, charity, penances and (ritual) activity should not be given up; (each) has to be done. (Indeed) sacrifice, charity

and also penances are, for the wise ones, purifiers.”¹ [1045]

So also, there is a Smṛti (statement): “There are (in all) forty-eight *saṃskāras*.”² “Yogins do (various ritual) activities, after they have abandoned attachment (to all the desires); and (this) for the purification of their intellect.”³ [1046]

“One who is devoted to Yoga, who has purified his intellect, who has overcome his *manas* and who has subdued the sense-organs, and who is of the nature of the essence of all beings—even if this one is doing (action) is not affected by them.”⁴ [1047]

The word *ātman* means here ‘the intellect’.

¹This is *Gītā* 18.5.

²Not traced.

³This is *Gītā* 5.11.

⁴This is *Gītā* 5.6.

गार्भैर्होमैर्जातकर्मचडामौञ्जीनिबन्धनैः ।

बैजिकं गार्भिकं चैनो द्विजानामपमृज्यते ॥१०४८॥

“Sin of the twice-borns which has come from the semen¹ and/or from the state of being in the womb² is wiped off by performance of offering(s) in fire after the time of conception, at the time of birth, cutting of hair, tying of the string of Muñja grass.” [1048]

This is *Manusmṛti* 2.27.

²Seminal sin is regarded as paternal-relating to the father..

³This is regarded as maternal-relating to the mother.

स्वाध्यायेन व्रतैर्होमैस्त्रैविद्येनेज्यया सुतैः ।

महायज्ञैश्च यज्ञैश्च ब्राह्मीयं क्रियते तनुः ॥१०४९॥

“This (body of theirs) is made into a body suitable for the knowledge of the Brahman by means of the daily study of Vedic triad, by various vows, by offerings into fire, by sacrifices,

by (having) sons and by performing sacrifices, great and small.”
[1049]

This is *Manusmṛti* 2.28.

इत्येवं शतशः सन्ति यथोक्तार्थप्रसिद्धये ।
स्मृतिवाक्यानि पुंबुद्धिशुद्धिशंसीनि कर्मभिः ॥१०५०॥

This and such others, hundreds of them, are sentences from Smṛti texts which speak of the purification of human intellect by various (ritual) activities, in order that there is acquisition of the things which are stated. [1050]

This verse states that kāmīya acts are to be given up—so is the dictate of the Veda.

संसारानर्थहेतुत्वज्ञानायैव च कर्मणाम् ।
काम्यानामिह निर्देशस्तज्जिहासाप्रसिद्धये ॥१०५१॥

There is here mention made of the desired activities only for getting to know the nature of the cause of the undesirable transmigration and also for effecting a desire to know that (i.e. the Brahman). [1051]

Verses 1052 and 1053 state that even kāmīya activities give rise to the desire to know the Ātman.

यद्वा विविदिषार्थत्वं काम्यानामपि कर्मणाम् ।
तमेतमिति वाक्येन संयोगस्य पृथक्त्वतः ॥१०५२॥

Or perhaps, even the kāmīya activities have the purpose of creating (in a human being) a desire to know (the Brahman); because the connection with the Śruti statement *tam etam* ..., is separately mentioned. [1052]

This has reference to what is stated in SV 322.

देशे काले च पात्रे च दानं श्रद्धादिपूर्वकम् ।
शुद्धिकृत्स्याद्वियः पुंसो बहिर्वेद्यपि शास्त्रतः ॥१०५३॥

Making of gifts,¹ at some (appropriate) place,² at some (appropriate) time,³ to a deserving person,⁴ with faith etc.⁵ would be effecting purification of the intellect of a person, even if (any of) them is made outside the altar but according to scripture. [1053]

This refers to *Gītā* 17.20.

¹SP supports this making of gifts by citing a sentence *dāne sarvaṃ pratiṣṭhitam tasmād dānam paramam vadanti* (source not traced).

²Kurukṣetra etc.

³Time of eclipse of the sun or the moon by the force of Rāhu.

⁴*śrotriya* the knower of matters pertaining to the Ātman etc.

⁵The word etc. indicates devotion.

Verses 1054-1056 explain the meaning of the word *tapas*.

नियमाद्द्वन्द्वसंपातसहनं तप उच्यते ।
तस्यापि बुद्धिसंशुद्धिहेतुत्वं शास्त्रतो मतम् ॥१०५४॥

By the word *tapas* 'penance' is meant (lit. mentioned) what is forbearing, as a rule,¹ the occurrence of pairs of opposites² because it is known from the scriptures that it also has the capacity to cause purification of the intellect. [1054]

¹Or, with a specific intention (*saṃkalpa*).

²For example, *sukhaduḥkha*, *lobhamoha*, *rāgadveṣa*

विजिज्ञासस्व तद्ब्रह्म तपसैवेति च श्रुतिः ।
तपसा कल्मषं हन्तीत्यपि च स्मृतिशासनम् ॥१०५५॥

There is also a statement in the Śruti 'Do you desire to know that Brahman by means of austerity?' and also a teaching of a Smṛti: 'He destroys the (moral) stain by penance'.

[1055]

The first line is *Taittiyīyopaniṣad* 3.2; and the second line is not traced, but compare *Manusmṛti* 12.104, where *kilbiṣam* for *kalmaṣam*.

यद्दुस्तरं यद्दुरापं यद्दुर्गं यच्च दुष्करम् ।
सर्वं तत्तपसा साध्यं तपो हि दुरतिक्रमम् ॥१०५६॥

Whatever is difficult to get over, whatever is difficult to obtain, whatever is difficult to approach and whatever is difficult to perform— all that becomes obtainable (i.e. obtained) through penance; indeed penance is inevitable. [1056]

SP states the example of drinking of ocean by Sage Agastya—this indicates the greatness of penance.

Verses 1057-1060 state that fasting unto death is also to effect purification of the intellect.

अनाशकं चानशनं कामानशनलक्षणम् ।
रागद्वेषवियुक्तैस्तु विषयानिति चाह हि ॥१०५७॥
कामानशनबोधार्थं वेदव्यासोऽपि यत्नतः ।
मृत्यवन्तं वा सनियमं तदप्यत्यन्तशुद्धिकृत् ॥१०५८॥

Because (the lord) has said: 'The object of desires (should be overcome) by those who are free from desire and hatred¹—thus is the definition of not enjoying desires in the words *anāśaka*, *anaśana*. [1057]

Even Vyāsa, the redactor of Veda, has specifically made a statement that (not enjoying the desires) up to one's death or together with some vows effects purification in a very great measure—this is for the sake of informing others about not

enjoying desires (as significantly important).

[1058]

¹This is *Gītā* 2.64.

प्रत्यग्विविदिषामात्रहेतुत्वात् मृतेर्भयम् ।
अनेकजन्मसंसिद्धस्ततो यातीति च स्मृतेः ॥१०५९॥

So also, there is a statement in the Smṛti: 'A person, who has reached the perfection/completed (his penance), in the course of many births, attains (liberation),'¹ to convey that there is not any fear from death, because it has become merely the cause of the desire for getting to know the inner self.

[1059]

¹This is from *Gītā* 6.43.

भावितैः करणैश्चायं बहुसंसारयोनिषु ।
आसादयति शुद्धात्मा मोक्षं वै प्रथमाश्रमे ॥१०६०॥

This person who has purified his intellect obtains, (even) in the first stage of life, the liberation, with his sense-organs that are (thus) well-disposed in many transmigratory existences.[1060]

This verse states an authority for holding the view that fasting unto death (also) is a cause of liberation.

पृथूदकादितीर्थेषु तथा च मरणं स्मृतौ ।
श्रूयते मुक्तये साक्षात् भयं स्यादतो मृतेः ॥१०६१॥

So also it is heard in Smṛti¹ that death in holy places such as Pṛthūdaka results in liberation; therefore, there should be no direct fear of death.

[1061]

¹SP cites *brahmajñānena mucyante prayāgamaraṇena vā* (*Skandapurāṇa* 7(4).31.37).

Verses 1062-1070 state that one who is capable for śravaṇa etc. should not enter on fasting to death.

साक्षात् वस्तुविज्ञाने श्रुत्या यत्र नियुज्यते ।
विद्वान्परिहरेत्तत्र मृतिहेतुं प्रयत्नतः ॥१०६२॥

But when (lit. where) a person is specifically enjoined by the Śruti to get to know the (real) thing by direct perception, that learned man should avoid, with every effort, any cause of death. [1062]

Here, there is stress on the pursuit of the knowledge of the Brahman in preference to waiting for death at some holy places etc.

चतुर्णामाश्रमाणां वा वेदानुवचनादिना ।
श्रुत्येह ग्रहणं ज्ञेयं तद्बुभुत्साप्रसिद्धये ॥१०६३॥

Or, it should be understood here that, in referring to the four stages (in a man's life) there is intended (lit. mentioned) by the Śruti, which uses the words *vedānuvacana* etc. for giving rise to (or, effecting) the desire to get to know that Brahman. [1063]

This is the meaning of *grahana*; the following two verses clarify this.

ब्रह्मचर्यान्तवाक्येन ब्रह्मचारिपरिग्रहः ।
तपसा तापसस्यैव यज्ञेन गृहिणस्तथा ॥१०६४॥
श्रद्धानाशकवाक्यं तु सर्वार्थमिति गम्यते ।
एतमेव विदित्वेति पारिव्राज्यं च वक्ष्यति ॥१०६५॥

In the statement ending with (the word) *brahmacarya*,¹ there is inclusion of a celibate, so also, by the word *tapasā* there is inclusion of only an ascetic; as also (*tathā*) by the word *yajñena* that of a householder. [1064]

And yet, the sentence pertaining to *śradddhānāśaka*² is understood to refer to all of them; (for) the Śruti will say about leading the life of a mendicant: 'after having known this very Brahman ...'. [1065]

¹Reference to a celibate in this portion of BU is according to the Mādhyandina recension.

²This refers to the reading in the Mādhyandina recension, *tam etam ... dānena tapasānāśakena*.

सर्वेऽपि क्रमशस्त्वेते सेव्यमाना यथाविधि ।
यथोक्तकारिणं विप्रं नयन्ति परमां गतिम् ॥१०६६॥

All of these (stages of life), being followed in their due order, according to ordinance or precept, lead a Brāhmaṇa, who does what is stated or prescribed in the scriptures, to the highest goal. [1066]

चतुर्भिराश्रमैरेभिर्यथाशास्त्रमनुष्ठितैः ।
अत्यन्तं क्षेममाप्नोतीत्यापस्तम्बोऽप्यभाषत ॥१०६७॥

Āpastamba also has said (this): '(A person) obtains the highest well-being by leading (all) the four stages of life, performing (his duties) according to the scriptures'. [1067]

This is reference to *Āpastambadharmasūtra* 2(9).21.1-2.

यं तं विविदिषन्त्युच्चैर्यथोक्तैः साधनैः परम् ।
एतमेव विदित्वाथ मुनिः स्यात्प्राग्यथोदितः ॥१०६८॥

(Concluding himself) with (performances) which are the means, as prescribed, and (thus) wishing to know (the nature of) whom—the one (known from the Upaniṣad), does (lit. would) one become a sage as stated in (the words) *etam eva viditvātha munih*. [1068]

पाण्डित्यबाल्ययोर्निष्ठां मुनित्वं प्रागवादिषम् ।
सर्वकर्ममुक्तां यस्मान्न तत्साधारणं ततः ॥१०६९॥

I have already spoken¹ about the nature of a Muni 'sage' on his being devoted to wisdom and his strength (arising from the study of the Veda); since this is not common (in relation to) all those who give up doing actions. [1069]

¹This refers to BU 3.5.1.

योगस्य च समस्तस्य प्रत्यग्विज्ञानजन्मने ।
उपयोगो यतस्तस्मान्नात्मज्ञानोदयात्परः ॥१०७०॥

Since there is utility of the entire (practices of) Yoga for the rise of the specific knowledge about the inner self; therefore, there is no other (Yoga) than the rise of knowledge of the Ātman. [1070]

In verses 1071 and 1072, it is pointed out that only those who have renounced can be Munis 'sages, the knowers of the Brahman'.

शमादीन्येव विद्यायाः साधनानि यतस्ततः ।
कुतोऽसंन्यासिनस्तत्स्यान्मुनित्वं निष्प्रमाणकम् ॥१०७१॥

Since tranquillity (*śama*) etc. alone are the means of (acquiring) the lore (of the Brahman), therefore, how could Munihood be attributed to one who has not renounced? His attaining the status of a sage would be (understood) without any authority. [1071]

मननात्मकमेवास्य कर्म नान्यद्यतस्ततः ।
मुनित्वं न्यासिनो युक्तं मौनाच्चाप्यस्य सर्वदा ॥१०७२॥

Since, for this one (Muni), there is no activity other than what consists in meditation etc., therefore, it is reasonable

to understand the status of a sage in the case of one who has renounced and also on account of (or, through) his (observing) speechlessness.¹ [1072]

¹SP clarifies *mauna* thus: *satatam atiniyatavāgādivyāpārāvāc ca tasya munitvaṃ yuktam*.

Incidentally Sureśvara refutes in verses 1073-1078 the view of Maṇḍanamiśra on this topic.

प्रत्यग्याथात्म्यविज्ञाननिष्ठता मुनिता यतः ।
तज्ज्ञानजन्मनो नोर्ध्वं मुनिता तत्फलत्वतः ॥१०७३॥

Since Munihood (thus) means being devoted to (acquiring) specific knowledge about the inner self, as it is, therefore, there is nothing more than (effecting) the rise of the knowledge of that, for Munihood which is the result of that (activity etc. of him). [1073]

एतमेवेत्यवधृतेरस्यैवैकस्य वस्तुनः ।
तदज्ञानैकहेतुत्वात्सर्वस्यानात्मवस्तुनः ॥१०७४॥

(This is so) because, in the words *etam eva*, there is the specification of just one single thing and because all the non-Ātmans¹ have only one cause, i.e. ignorance (about the nature) of that (Ātman). [1074]

¹The plural is meant, though the singular form is used.

सामर्थ्याच्च ततोऽस्यैव प्रत्यग्याथात्म्यवेदिनः ।
मुनित्वं प्रत्यगज्ञानहेतुकर्मापवर्जनात् ॥१०७५॥

Therefore, (it follows) that there is Munihood in the case of only a knower of the inner self, as it is, on account of his strength acquired by avoiding all activities which are caused by ignorance about (the nature) of the inner self. [1075]

किं चैतमेवमात्मानं सर्वानर्थैककारणम् ।
 मोहमात्रव्यवहितमाप्नुमिच्छन्त आदरात् ॥१०७६॥
 आत्मयाथात्म्यविज्ञानसर्वाविद्योपमर्दिना ।
 सम्यग्ज्ञानप्रदीपेन प्रत्यक्प्रवणबुद्धयः ॥१०७७॥
 विरक्ताः सर्वसंसारादाग्रजाद्बुद्धिशुद्धितः ।
 उत्पन्ननिखिलानर्थतित्यक्षा दोषदर्शनात् ॥१०७८॥
 वाङ्मनःकायकर्मभ्योऽतः प्रव्रजनशीलिनः ॥१०७९॥
 एतमेवेत्यवधृतेर्न लोकत्रयकामिनाम् ।
 पारिव्राज्येऽधिकारोऽस्तीत्ययमर्थोऽवगम्यते ॥१०८०॥

Moreover, persons wishing, through respect to obtain (or, know) this very Ātman, which is the single cause of all undesirables, namely in being affected by mere delusion, (renounce)¹ [1076] with their intellect inclined towards getting to know (the actual nature of the inner self) by means of the lamp in the form of right (or proper) knowledge which destroys the entire ignorance about the specific knowledge of the real nature of the Ātman,² [1077] becoming averse to the entire transmigratory existence up to the state of being the first-born (Hiraṇyagarbha), through the purification of the intellect and such in whom there has arisen a desire to abandon all the undesired things on seeing the faults in the same [1078] and, therefore, have become inclined towards renunciation of (i.e. keeping away from all) activities of *manas*, speech and body— [1079] thus, from the specification *evam eva*, it is understood (or, learnt) that there is eligibility for renunciation in the case of (all) those who desire to secure the three worlds. [1080]

¹SP concludes this verse by adding the verb *pravarjanti* 'they renounce'; it appears for us that from 1076 up to 1080 form one complete unit of meaning, though too long!

²SP concludes this verse by adding the phrase *ātmānaṃ āptum*

icchanti 'they wish to get to know the Ātman', but that is perhaps unintended.

From verse 1081 up to verse 1088, there is given the meaning of *etam eva lokam*.

असाधारणसाध्यानि पुत्रादीनि यथा तथा ।
पुत्रादिकामत्यागोऽपि स्यादसाधारणोऽर्थवान् ॥१०८१॥
परस्परविरोधाच्च पराक्प्रत्यक्फलात्मनाम् ।
पुत्रादिसाधनानां च तत्यागस्य च वर्त्मनः ॥१०८२॥

Since (*yathā*) having a son etc. are uncommon means (of happiness), therefore, in the same way (*tathā*), abandoning of desires for a son etc. is also an uncommon significant means (to the same effect). [1081]

(This is so,) because such means as having a son etc. have mutual opposition among them and also have results that are in the form of keeping away the inner self and, therefore, giving them up is the way to that (i.e. to the knowledge about the Ātman). [1082]

पूर्वे समुद्रे यः पन्था न स गच्छति पश्चिमम् ।
एकः पन्था हि मोक्षस्येत्यपि व्यासोऽपि चावदत् ॥१०८३॥

That path which leads to the ocean in the east does not ever lead to the west—thus has even Vyāsa said, 'Indeed there is only one way to liberation'. [1083]

ekah panthā hi mokṣasya ... is *Mahābhārata* 12.266.4. SP supports this argument with SV 215.

प्रव्राजिनोऽत्र गृह्यन्ते प्रसिद्धेर्यदि वा परे ।
त्रिदण्डिनः समाख्यायास्तेष्वेवातिप्रसिद्धितः ॥१०८४॥

Here are mentioned (i.e. understood) only the wandering mendicants owing to their being the knowers, or the other

tridaṇḍins,¹ because of their becoming more known. [1084]

SP adds *pāramahamṣīm vṛttim grhṇantīti bhāvaḥ*.

¹Regarding *tridaṇḍins* cf. *Manusmṛti* 12.10:

*vāgdaṇḍo 'tha manodaṇḍaḥ kāyadaṇḍas tathaiva ca /
yasyaite nihitā buddhau tridaṇḍīti sa ucyate //*

In the case of this type of Saṃnyāsins, it is noticed that they hold in their right hand three staffs (*daṇḍas*) bound together—these indicate restraint on *manas*, speech and body. The tuft of hair on the head, the sacred thread and the normal way of wearing the lower garment are not to be given up by them. They can return to a householder's life, if and when they wish.

पराञ्चि खानीत्यादीनि श्रौतानि च वचांसि नः ।
तानि वा इति निन्दित्वा न्यासो ब्रह्मेति शासनात् ॥१०८५॥

This is from the instruction of the Śruti, i.e. Upaniṣads in the words: *parāñci khāni*¹ and also *tāni vā*,² which occurs after censuring them (i.e. *khāni*); as there is stated 'renunciation is Brahman'.³

[1085]

¹*Kāthopaniṣad* 4.1.

²CU 3.5.4.

³This is *nyāsa*, which is a word shortened for *saṃnyāsa* for metre's sake. The same is the case in the following verse.

उपायो न्यास एवातः प्रत्यग्ज्ञानस्य जन्मने ।
प्रत्यग्ज्ञानविरुद्धत्वान्मनोवाक्कायकर्मणाम् ॥१०८६॥

Therefore, the means to the rise of the knowledge (of the nature of) the inner self is only renunciation (*nyāsa*) of the activities of *manas*, speech and body; since they which are opposed to the knowledge about (the nature of) inner self.

[1086]

Read SP for some more detail on this point.

शब्दादिप्रकृतीन्येव कार्याणि करणानि च ।
प्रत्यग्ज्ञानाय नैवालमतस्तानि विरोधतः ॥१०८७॥

Since all the effects and means of producing (or achieving) them are but rooted in words etc.; therefore, they are not capable of (or, sufficient/useful for) effecting the knowledge of the inner self, on account of their opposition (to the same).

[1087]

आत्मलोकपरीप्सायां तस्मात्साधनमुत्तमम् ।
त्याग एव हि विज्ञेयं मनोवाक्कायकर्मणाम् ॥१०८८॥

Therefore, the best means of the desire of attaining to that *ātmaloka* (which is equal to *brahmaloka* as stated before) is only renunciation of the activities of *manas*, speech and body.

[1088]

It is pointed out in verses 1089-1093 that renunciation is the only means of accomplishing the knowledge of the Ātman.

प्रतिसाध्यं सतादीनि यथा लोकत्रयार्थिनाम् ।
नियतानि तथैवेह प्रत्यग्लोकाप्तिमिच्छताम् ॥१०८९॥
सर्वकर्मपरित्यागः साधनं परमं मतम् ।
असंभवे हि कर्माणि विधीयन्तेऽस्य सर्वतः ॥१०९०॥

As the means of getting a son etc., are with reference to every one of the ends to be achieved and fixed with reference to them alone who hanker for the three worlds; so here also, in the case of those who wish to attain *pratyagloka*, [1089] it is held that abandoning all activities is the best means – indeed all activities are prescribed, when there is a complete impossibility of this one (viz. renunciation). [1090]

रागाद्याकृष्टचेतस्त्वान्न चेच्छक्नोत्यशेषतः ।

कर्माणि मानवस्त्यक्तुं स करोतु यथाविधि ॥१०९१॥
 कर्माणि कर्मसंत्यागसामर्थ्यार्थं दिवानिशम् ।
 न कर्मणामनारम्भात्तथा च स्मृतिशासनम् ॥१०९२॥

If a human being is not able to abandon completely his activities, owing to his mind being attracted by attachment etc., then let him do them, day and night according to the prescription in the Śruti, with a view to acquiring the capacity for abandoning those activities. To this effect is there the instruction of the Smṛti *na karmanām*¹ [1091-1092]

¹This is *Gītā* 3.4.

आरुरुक्षोर्मुनेर्योगं कर्म कारणमुच्यते ।
 योगारूढस्य तस्यैव शमः कारणमुच्यते ॥१०९३॥

'For a Muni, who is about to begin practising Yoga, action is a means (of the same); and in the case of just the same, who is (already) established in Yoga, the means is tranquillity.' [1093]

This is *Gītā* 6.3.

Now is stated in verses 1094-1096 the purposes of abandoning all activity.

कोऽभिप्रायोऽखिलं कर्म त्यजतां साधनैः सह ।
 आत्मलोकार्थिनां पुंसामिति पृष्टेऽर्थ उच्यते ॥१०९४॥

(When it is asked:) 'What is the intention (or, purpose/desired end) of men, who are giving up their entire activity, together with their means, and are thus wishing for (attainment to) *ātmaloka*?'; there is now stated that intention— [1094]

एतद्ध स्मेति वचसा पारिव्राज्येऽभिधीयते ।

अर्थवादस्वरूपेण हेतुः श्रुत्या प्रयत्नतः ॥१०९५॥

In the words *etad dha sma ...*¹ there is statement made with reference to renouncing — (and) this is the reason stated by the Śruti, very carefully, in the form of an Arthavāda. [1095]

¹This refers to BU 4.4.22.

तदेतत्कारणं स्पष्टं पारिव्राज्येऽभिधीयते ।
ऐतिह्यार्थं च ह स्मेति वैशब्दः स्मरणाय च ॥१०९६॥

The words *tad etat* clearly state the cause for renunciation. And the words *ha sma* are used for conveying the matter of traditional instruction and the word *vai* is only for reminding (one of what is said). [1096]

In verses 1097-1100 is stated the purpose of the word prajāṃ, i.e. an indication of the desire for vitta, loka etc.

पूर्वेऽतिक्रान्तकालीना विद्वांसो ज्ञाततत्त्वकाः ।
तिसृणामेषणानां स्यात्प्रजामित्युपलक्षणम् ॥१०९७॥

The word *pūrve* means those who belonged to the times of the past and *vidvāṃsaḥ* are those who have known the truth (i.e. reality). The word *prajāṃ* is (lit. should be taken as) indicative of the three desires.¹ [1097]

¹Cf. verse 1104 note 1.

न कामयन्ते नेच्छन्ति पुत्रोत्पत्त्यादिलक्षणाः ।
एषणाः सकला एताः कस्मादित्यभिधीयते ॥१०९८॥

na kāmayate means: "They do not wish (for) Why are these desires stated here, viz. all the three desires which are for begetting a son etc.?" [1098]

एषणास्त्यजतां तेषामभिप्रायमिमं शृणु ।
एषणात्रितयस्यापि किमित्याक्षेप उच्यते ॥१०९९॥

Hear now this as the intention of them who are giving up their desires. In the use of the word *kim* is stated the question relating to the intention about/of the three desires. [1099]

प्रजया किं करिष्यामः कनीयःफलया वयम् ।
स्वतःसिद्धैकलो ह्यात्मा येषां लोको ध्रुवोऽक्षयः ॥११००॥

'What shall we do by having an offspring which yields a lower result?' (For) them, there is the eternal and never-perishing *loka*, as it is, viz. the Ātman, which is established by itself as (all) alone. [1100]

Verses 1101-1103 affirm that attainment of the knowledge of the Ātman is the best of results acquired by one.

आत्मत्वादेव चावाप्तः सर्वसाधननिःस्पृहः ।
वस्तूत्पत्त्यादिमद्यस्मात्साधनानि व्यपेक्षते ॥११०१॥

Having obtained (lit. reached) the (real) thing, which is (through ignorance) whatever has origin etc., the person, because of (himself) being the Ātman itself, becomes desireless with respect to all the means (of activity) and, therefore, ignores them all. [1101]

यच्चोत्पत्त्यादिमद्वस्तु तत्तुच्छं स्वप्नवस्तुवत् ।
आत्मज्ञाने तु निःशेषफलान्तर्भावकारणात् ॥११०२॥

Whatever thing has an origin etc. is worthless like an object (obtained or seen) in the dream state, for the reason that there is the inclusion of all of the results only (*tu*) in the knowledge of the Ātman. [1102]

नात्मलाभात्परो लाभः कृत्स्नेऽपि जगतीक्ष्यते ।

सर्वप्राप्त्यर्थसंप्राप्तेः सर्वहेयनिराकृतेः ॥११०३॥

In the whole of the world, there is not seen any gain higher than the acquisition of the Ātman, because there is, through that, the acquisition of all the objects to be gained and (also) the setting aside of all that is worth abandoning. [1103]

इति चेतसि संधाय ह्याक्षिपन्ति प्रजादिकम् ।
नृलोकादिफलं सर्वमेषणात्रयमादरात् ॥११०४॥

Having kept this in mind do they respectfully question (or, doubt) about offspring etc., viz. the results such as are of the world of men and of the entire triad¹ of desires. [1104]

¹That is, *putra*, *vitta* and *loka*.

उत्पाद्यमाप्यं संस्कार्यं विकार्यं चैषणाफलम् ।
तस्मिन्नेवंविधे कः स्यात्संतोषो विदुषामपि ॥११०५॥

The result of the desires is either that which is produced, that which is to be reached (or obtained), that which is to be purified, and that which is to be modified. And in (achieving) them (i.e. the results) which are of this nature, what satisfaction could there be for the learned? [1105]

Verses 1106-1113 state that even a person ignorant (about the nature of the Ātman) can renounce, if he is averse to worldly life.

आत्मब्रह्मानुलोम्येन ह्येषणात्याग इष्यते ।
साधनं ब्रह्मविद्येव ब्रह्मज्ञानस्य जन्मने ॥११०६॥

Abandoning of desires is accepted as a means lower in order with reference to the Ātman and the Brahman; but, it is also like the lore of the Brahman, a means for the rise of the knowledge of the Brahman. [1106]

आप्ताशेषपुमर्थस्य प्रत्यग्याथात्म्यबोधिनः ।
दग्धात्मतमसः पुंसो नैषणापेक्षितेष्ट्यते ॥११०७॥

There is not to be accepted (or, entertained) any desire by (or, in the case of) a person who has obtained all of the ends of human life, (the one). who is possessed of knowledge of nature of the inner self and has burnt his ignorance in respect of the Ātman. [1107]

सर्वभतात्मभूतस्य सर्वैकात्म्यं प्रपश्यतः ।
आप्ताशेषपुमर्थस्य त्यक्ताशेषासुखस्य च ॥११०८॥
प्राप्तस्य परमं स्वास्थ्यं वद किं स्यात्प्रजादिभिः ।
इति निश्चित्य निःसङ्गाः प्रव्रजन्त्येव सर्वतः ॥११०९॥

'Tell me what use can there be of having offspring etc. for a person who sees the complete oneness of the one and has become the nature of all, who has obtained all the ends of human life, who has abandoned sorrows/afflictions in its entirety and who has obtained the highest'—having thus decided, do those, who become unattached to the desires, wholly renounce them. [1108-1109]

धावतोऽविदुषो दृष्ट्वा मृगतृष्णोदकार्थिनः ।
ततोयतत्त्ववित्कर्षिचन्न हि धावति मूढवत् ॥१११०॥

Having seen the non-learned, who are running with a thirst for the water of mirage, no knower of knowledge, who knows the truth of that water, runs like the one that is deluded. [1110]

SP invites attention to the break-up of the Saṃdhi as *dhāvato* and *aviduṣaḥ*.

यथैवं श्रुतितोऽशेषवाङ्मनःकायसाधन-
प्रवृत्तिविषयप्रत्यग्याथात्म्यज्ञानिनामिह ॥११११॥
अविद्यापटसंवीतधिषणान्कामिनो नरान् ।

पुत्रोत्पत्त्यादिसाध्येषु प्रवृत्तान्वीक्ष्य यत्नतः ।

अस्माकं न प्रवृत्तिः स्यात्कृतार्थत्वाच्च कारणात् ॥१११२॥

As this is so, there would not be any activity on the part of us, who have, with the help of the Śruti, knowledge of the real nature of the inner self which has for the object of his entire activity with the means of speech, *manas* and body, after seeing men who are full of desires, their intellects being wrapped by the bondage of ignorance, and proceeding with every effort towards getting those objects, e.g. the birth of a son etc.?

[1111-1112]

यदज्ञानात्प्रवृत्तिर्या तज्ज्ञानात्सा कुतो भवेत् ।

तस्मात्सर्वप्रवृत्तीनां हानिः स्यादात्मबोधतः ॥१११३॥

Whence (or, How) can there be that inclination to (performing) activity, which has proceeded from whatever is the knowledge of that, through the ignorance of which (it has been there)? Therefore, (know that) there is abandoning of all activities as a result of the knowledge of the Ātman.

[1113]

In verses 1114-1117, there is justification/pleading for ignoring all results of activity, viz. production and others:

सदोत्पत्तेरनुत्पाद्योऽनाप्यश्चापि तथात्मनः ॥१११४॥

असंस्कार्योऽक्रियाङ्गत्वान्निर्गुणत्वात्तथात्मनः ।

कौटस्थ्यादविकार्योऽयं वद स्यात्कर्मणा हि किम् ॥१११५॥

Similarly, because the Ātman has ever been existent (lit. has originated — *bhūta*), it is not to be created and not also to be obtained.

[1114]

In the same way, since it is not subordinate to any activity and has no proper quality (whatsoever), it is not to be purified and, because of its immutability, this one cannot be modified. (Now) tell me what is the use of the (performance of) action?

[1115]

नोत्पत्त्यादि स्वतो यस्य स्वत एवास्ति यस्य तत् ।
न तस्य कर्मापेक्षास्ति कर्मापेक्षा ततोऽन्यतः ॥१११६॥

Since it (i.e. the Ātman) does not have origination etc., by its very nature, and which has existed also by its own nature. As such, it has no need of actions; the need (lit. expectancy) of the (performance of) action is in respect of someone other than that. [1116]

उत्पत्त्यादौ समर्थं यद्वेतुमात्रमपेक्षते ।
फलवत्कर्म तत्रैव ततोऽन्यत्राफलं भवेत् ॥१११७॥

(The performance of) action would be having a result only when it is capable of origination etc. (of others) and which expects for its rise merely some cause; elsewhere than in that, that activity would be without any result. [1117]

Verses 1118 and 1119 are an injunction for renouncing.

उक्तहेतुबलात्तस्माद्विदित्वात्मानमात्मना ।
प्रव्रजेयुः समस्ताभ्य एषणाभ्यो द्रुतं बुधा ॥१११८॥

Therefore, the wise ones should quickly proceed away from all of the desires, after having known the Ātman by themselves through the force of the cause which is already stated.¹ [1118]

¹On this, read SP: *caturvidhakriyāphalavilakṣaṇatvalakṣaṇo-ktahetu ...*; cf. verses 1114 and 1115 above.

पुत्रोत्पत्तिं समुद्दिश्य ह्येषणा दारसंग्रहः ।
पुत्रैषणेति सेहोक्ता यदि वातोऽन्यथैषणा ॥१११९॥

Indeed, taking a wife with the intention of begetting a son is an *eṣaṇā*; and that desire is here mentioned as the desire

for a son; or, (perhaps) it would be another desire as well.

[1119]

Verses 1120 and 1121 are the explanation of te ha sma putraiṣaṇā

मनुष्यलोकसंप्राप्तिं समुद्दिश्यास्य यैषणा ।
पुत्रौत्पत्त्येह तत्प्राप्तौ सात्र पुत्रैषणोच्यते ॥११२०॥

That desire of a person for attaining the world of men is here called the desire for begetting a son, because by begetting a son that (world of men) is obtained.

[1120]

This is based on BU 1.5.16.

दैवं च मानुषं वित्तं कर्मणो यत्प्रयोजकम् ।
देवतादिपरिज्ञानं दैवं पशुवादि मानुषम् ॥११२१॥

Wealth, divine and human¹ are what cause activity; divine wealth is the full knowledge about the deity etc. (of the ritual activity) and human wealth is what consists in animals etc.

[1121]

¹Cf. BUBV 1.4.1847-1849.

In verses 1122-1127 it is stated that divine wealth is not the knowledge of the Brahman—it means only knowledge about the deities of the rituals.

संसारकारणध्वंसि यत्तु ज्ञानं विमक्तिदम् ।
वित्तश्रुत्या न तद्ग्राह्यं तस्य कर्मविरोधतः ॥११२२॥

That knowledge which brings about liberation, is destructive of the cause(s) of transmigratory existence, but that should not be understood from the statement about wealth, because of its being opposed to (ritual) action.

[1122]

यस्य साधनभावः स्यात्प्रवृत्तौ सर्वकर्मणाम् ।
गर्तादेरिव वित्तत्वं तस्य ज्ञानस्य कर्मसु ॥११२३॥

That kind of knowledge is of the nature of being wealth in relation to the activities by its being the means towards inclination to all kinds of (ritual) activities, as in the case of a ditch¹ etc. [1123]

¹This stands for the place for the *āhavanīya* fire etc. as SP reports. In the place of *gartāder iva*, AnSS has a variant reading (noted and explained by SP also): *gavāder iva* and that sounds better, for it refers to cows etc. that are necessary for the performance of ritual etc. SP refers also to the existence of thorns etc. beside ditch, as deterrents of any ritual activity—this is an alternative explanation for that referring to the *āhavanīya*.

कर्महेतुविरुद्धं तु न वित्तं ज्ञानमिष्यते ॥११२४॥
कर्मप्रकरणाकाङ्क्षि ज्ञानं कर्मगुणो भवेत् ।
यद्धि प्रकरणे यस्य तत्तदङ्गं प्रचक्षते ॥११२५॥

But (*tu*) knowledge, which is opposed to the causes that promote activity, is not to be considered as wealth. [1124]
(Yet) knowledge, which has the expectation for it in the topic of (religious) activity, would become subordinate to the activity. That which occurs in the context of another becomes subordinate to it—they say. [1125]

स्वरूपलाभमात्रेण यत्त्वविद्यां निहन्ति नः ।
न तदङ्गं प्रधानं वा ज्ञानं स्यात्कर्मणः क्वचित् ॥११२६॥

But, that knowledge, which by mere coming into existence destroys our ignorance, is not subordinate to or principal (aspect) of an action anywhere. [1126]

एतद्वलेन संन्यास एषणाभ्योऽवसीयते ।

देवलोकफलं ज्ञानमेषणैवेति गम्यते ॥११२७॥

On the strength of these (arguments in the preceding verses) is the renunciation superior to desires so it is concluded. From this it follows that knowledge, which results in one's attaining to the world of gods, is only (a kind of) desire.

[1127]

This verse states that lokaiṣaṇā is intended in vittaiṣaṇā.

लोकैषणाग्रहेणैव वित्तान्तर्भावसिद्धितः ।

फलोद्देशेन या चेष्टा सैव लोकैषणा यतः ॥११२८॥

Since, by the mention of the word *lokaīṣaṇā*, there is inclusion of wealth in them (i.e. *lokas*); therefore, that (ritual) activity (which is performed) with the intention of (securing) some result, is also *lokaīṣaṇā*.

[1128]

Verses 1129 and 1130 point out vittaiṣaṇā, because of what is stated in the preceding verse, is nityakarman.

यत्तु चोदितमित्येव क्रियते कर्म निष्फलम् ।

वित्तैषणेति तां ब्रूमो जामित्वविनिवृत्तसया ॥११२९॥

And that action, which is performed only for the reason that it is enjoined (in the scriptures) and is without any result to be produced, we call *vittaiṣaṇā*,¹ with a desire to keep away from any connection (of it with activity).

[1129]

¹This refers to *nityakarman* and means to achieve it. SP: *vittaiṣabdena nityaṃ karma tatsādhanaṃ ca punaruktiparihārārthan grahyamityarthah.*

लोकोद्देशेन या चेष्टा वाङ्मनःकायसाधना ।

लोकैषणेति तामाहुरेषणार्थविदो जनाः ॥११३०॥

That activity, which has for its means speech, *manas* and body and is (performed) with a desire for *lokas*, have the knowers of the meaning of *eṣaṇā* called *lokaiṣaṇā*.¹ [1130]

¹This refers to *kāmyakarman* and means to achieve it. SP: *kāmyaṃ karma tatsādhanam cātra vivakṣitam iti na paunar-uktyamityarthaḥ*.

Verses 1131-1133 explain the word *vyutthāna*:

क्रियाकारकरूपाभ्य एषणाभ्यः प्रबोधतः ।
प्रातिलोम्येन यत्स्थानं व्युत्थानमिति तद्विदुः ॥११३१॥

Acquiring that state (by a person) through acquiring knowledge (for keeping himself away) from desires, which have the form of *kāraṇas* of activities, i.e. by being averse to them, is known as *vyutthāna*. [1131]

इत्येवमादि व्याख्येयं व्याख्यातं पूर्वमेव तु ।
कहोलब्राह्मणे नातस्तद्व्याख्यानाय यत्यते ॥११३२॥

This and other matter, that is to be explained, has been already explained in Kahola Brāhmaṇa;¹ therefore, there is no effort made here for explaining that again. [1132]

¹This is BU 3.5.

प्रव्रजेयुरतो लोकमीप्सन्तो ब्राह्मणा बुधाः ।
प्रव्रजन्तीति च विधिरर्थवादेन संगतेः ॥११३३॥

Therefore, the knowing (or, wise) Brāhmaṇas who wish for the *loka* (of the Brahman) should renounce—this, (the word) *pravrajanti* '(they) renounce' is an injunction as it is connected with Arthavāda. [1133]

The idea of the verse is to relate the statement *pravrajanti*

to the statement about the results which are stated in the form of an Arthavāda.

In verses 1134 and 1135, it is pointed out that in the case of the form pravrajanti there is an Arthavāda proper.

नार्थवादान्तरापेक्षा ह्यर्थवादस्य युज्यते ।
विधिनैवैकवाक्यत्वमर्थवादस्य युज्यते ॥११३४॥

Indeed, it is not reasonable to hold that an Arthavāda is dependent on another Arthavāda; having unanimity, i.e. the same purport as only that of an injunction is reasonable in the case of Arthavāda. [1134]

Hereby it is affirmed that the statement *pravrajanti* should not be taken as mere Arthavāda but it should be taken as an injunction and has the sense of *pravrajeyuḥ*. This is clarified in just the next verse.

अर्थवादेन लिङ्गेन तस्माद्विधिरयं स्फुटः ।
विधिषेष्टत्वमुज्झित्वा नार्थवादो यतोऽन्यतः ॥११३५॥

Therefore, by the very indication, viz. Arthavāda, is this (i.e. the statement *pravrajanti*) a clear injunction; the reason is: an Arthavāda does not consist elsewhere than in being subordinate to an injunction. [1135]

Verses 1136-1143 state that the viśiṣṭa-vidhi in viditvā vyutthāya is for leading one to Ātmaloka.

समानकर्तृकत्वोक्तेर्विभागोक्तेः फलस्य च ।
प्रव्रजन्तीत्येष विधिरर्थवादेन चान्वयात् ॥११३६॥

(Thus) this injunctive statement in *pravrajanti* gets connected with the Arthavāda on account of the statement in them about one and the same agent and also by stating the result

separately.

[1136]

विज्ञानेन विदित्वेति श्रूयतेऽस्यैककर्तृता ।
विविनक्ति फलं चापि येषामित्येवमादिना ॥११३७॥

The sameness of the agent (in these two) is clearly heard in the Śruti *viññānena viditvā*. Further, by making a statement beginning with *yeṣām* ..., Śruti distinctly states the result. [1137]

प्रव्रजन्तीति नाप्येतत्सकृच्छ्रुतमिहेष्यते ।
प्राप्तवल्लोकनृत्यर्थमर्थवादव्यपेक्षि च ।
प्रधानवदतो नैदं लोकस्तुतिपरं भवेत् ॥११३८॥

Also this word *pravrajanti* is not heard here only once,¹ this does not purport to praise *loka* as already obtained and like the principal (injunction), nor does it expect an Arthavāda for praising (or leading to) *loka*. [1138]

¹SP: *tatra tatrabhyasyate pravrajinaḥ pravrajanti vyutthāya bhikṣācaryam caranti viditvā munirbhavati*.

नाप्यनुष्ठेयरूपेण पारिव्राज्येन संस्तुतिः ।
आत्मलोकस्य युक्ता स्यान्नापि तज्ज्ञानसंस्तुतिः ॥११३९॥

There is not here any praise stated for leading a life of an ascetic as some activity to be performed; also the praise of the knowledge of that (*pārvirājya* 'renunciation') would not be reasonable with reference to *ātmaloka*. [1139]

अथानुष्ठेयमपि संस्तुत्यर्थं भवतेष्यते ।
अनुष्ठेयस्य दर्शादेः स्तुत्यर्थत्वं प्रसज्यते ॥११४०॥

(An objection:) 'If you think that what is to be performed (i.e. an action), is also stated as a thing for the sake of praise; then in the case of (sacrifices like) *darśa* etc., which have to be performed, the state of being what is (stated) for the

sake of praise would follow.

[1140]

कर्तव्यता न च ज्ञाता पारिव्राज्यस्य कुत्रचित् ।
स्तुत्यर्थत्वं यतोऽस्येह भवता परिकल्प्यते ॥११४१॥

‘And nowhere is it known that taking to the stage of a mendicant is a thing to be performed, so that you have now taken here that as the state of being what is for the purpose of praise.’

[1141]

अन्यत्रापि विधौ कल्प्य इहैवासौ समर्थ्यताम् ॥११४२॥
भूमिष्ठे मधुनि प्राप्ते को विद्वान्पर्वतं व्रजेत् ।
लब्धेऽपि प्रव्रजन्तीति विधावन्यत्र किं श्रमः ॥११४३॥

(If it is said:) ‘Elsewhere also that has to be accepted in connection with an injunction. Let that be understood so even here.’

[1142]

(The reply is:) ‘When honey is available (lit. obtained) in the field,¹ who wise would go to a mountain (to get it)?’ (Therefore), when an injunction is available in the word *pravrajanti*, why then take the trouble (to find injunction) elsewhere?

[1143]

¹In fact the well-known adage refers to a bush called Arka, not to a field, cf. SP: *arke cen madhu vindeta*.

Verses 1144 and 1145 refute the notion that renunciation is for one who is not eligible to perform a ritual.

काणकुण्ठादिविषये यत्तु कैश्चित्प्रकल्प्यते ।
पारिव्राज्यं न तद्युक्तमननुष्ठेयरूपतः ॥११४४॥

As to what some have thought, that the state of a wandering ascetic has a reference to the squint-eyed, the maimed and others, that is not proper because it does not have the nature of what is to be done (or performed).

[1144]

कर्तव्यत्वेन न ज्ञातं वृक्षाद्यारोहणं यथा ।
 संन्यासोऽपि तथैवायं नैव कार्यतया मतः ।
 प्रव्रजन्तीत्यतो नास्य स्तुतिगन्धोऽपि विद्यते ॥११४५॥

As climbing a tree is not known to be a thing to be performed, so also leading the life of an ascetic is not held to be a matter to be performed; therefore, in the use of the word *pravrajanti*, there is not even a bit of praise. [1145]

Verses 1146-1148 are an objection to there being an injunction for renouncing.

ननु चात्मप्रबोधेन विधिगोचरलङ्घिनः ।
 कृतकृत्यस्य मुक्तस्य विधिरेष कथं भवेत् ॥११४६॥

(A question is asked:) 'But, indeed, how could this be an injunction for him who has thought that his knowledge of the Ātman has transgressed (the nature of) an objection falling within the purview of any injunction, for (this one), who has accomplished whatever was to be done and is liberated? [1146]

परिहारोऽस्य चोद्यस्य कहोलब्राह्मणेऽखिलः ।
 यतोऽभाणि मया पूर्वं नेहातः पुनरुच्यते ॥११४७॥

Since the refutation of this hypothetical objection has been stated by me in full in the Kahola Brāhmaṇa (BU 3.5) earlier, therefore it is not stated here again. [1147]

ब्रह्मचर्यं समाप्येतिप्रत्यक्षश्रुतिमूलतः ।
 चतुर्णामाश्रमाणां स्यान्नोपेक्षातोऽनुमानतः ॥११४८॥

It is on the direct basis of the Śruti (that we get the knowledge of) one's having completed the state of celibacy and, on that basis, we should not show neglect for the four stages of life as thus understood by inference. [1148]

SP refers to *aikāśramyaṃ tv ācāryāḥ pratyakṣavidhānād gārhaṣṭhyasya* as a statement of Gautama (*Gautama Dharma Sūtra* 1.3.35).

Verses 1149 and 1150 state that the authority of the Śruti does not depend on (that of) any Smṛti.

न च वेदैकमूलत्वविरहात्स्यात्प्रमाणता ।
आचारस्य स्मृतेर्वापि बौद्धाद्याचारवद्ध्रुवम् ॥११४९॥

And being an authoritative means of knowledge (in the case of any statement) is not possible in the absence of any Vedic basis (for it), even if it be the practice (of the learned) or sanctioned by any Smṛti—indeed like the conduct of a Buddhist. [1149]

धर्मस्य वेदमूलत्वादवेदस्य न धर्मता ।
इत्येवं न्यायवद्वाक्यमाहुर्वेदप्रमाणकाः ॥११५०॥

Religious duty (*dharma*) has its root in the Veda; whatever is non-Vedic does not have the character of religious duty—thus have those who have held the Veda as the authority said as a dictate.¹ [1150]

SP refers to *śabdāmūlako hi dharmah* (*Sābarabhāṣya* 1.3.1).

¹Cf. the word *nyāyavat* in the original; it literally means 'what is like a rule'.

वेदशास्त्रानपेक्षत्वं स्मृतिशास्त्रस्य चेन्मतम् ।
निर्ग्रन्थिशास्त्रतुल्यत्वं स्मृतीनां वः प्रसज्यते ॥११५१॥

If it is held that the scriptures called the Smṛtis do not depend on (or, are not based on) the Vedic scriptures, then in the case of these Smṛtis there will be a similarity with the scriptures of the Nirgranthas.¹ [1151]

SP supports this argument stating *yathāhuh— yuktam śruti-virodhāt smṛtir apramāṇam iti* (not traced).

¹This is a reference to the Jainas.

नापि स्मृतिव्यपेक्षास्ति श्रुतेः स्वातन्त्र्यकारणात् ।
स्मृत्यर्थस्यानुवादोऽयं पारतन्त्र्येऽसति श्रुतेः ॥११५२॥

Further, the Śruti does not have any dependence on the Smṛti, because of its independence. Therefore, when there is not such dependence of the Śruti (on any other work), this should be taken as matter repeated from a Smṛti. [1152]

SP refers to *ataś ca pramāṇamanapekṣatvāt* (Śābarabhāṣya 1.1.5). Also, read SP: *śruter asati pāratantrye nāsti smṛtyarthā-nuvāditvam iti pūrvanāṇi anvayena yojanā*.

स्वतन्त्रयोर्मिथोऽपेक्षा नापि स्यात्परतन्त्रयोः ।
पारतन्त्र्यात्र चापेक्षा स्वतन्त्रस्य स्वतः क्वचित् ॥११५३॥

Again, independent works do not have any mutual dependence; so also that (mutual dependence) is not observed in the case of two works that are dependent (on some other or others); nowhere an independent work has, of itself, any dependence on what is not independent. [1153]

This verse states that the Śruti does not restate any matter from the Smṛti.

स्मृत्यर्थं न श्रुतिस्तस्मादनुवक्तीह कुत्रचित् ।
स्मृतिस्त्वनुवदत्येव श्रुत्यर्थं परतन्त्रतः ॥११५४॥

The Śruti does not anywhere state any matter (which is already) stated in the Smṛtis; but it is the Smṛti that restates the matter which is stated in the Śruti, because of its dependence. [1154]

SP states *uktaṃ hi— pramāṇam eṣā smṛtir vijñātaṃ tat kim*

ity anyathā bhavatīti (not traced).

Verses 1155-1161 explain *sa eṣa neti neti*.

आत्मा चेदिष्यते लोकः कर्माण्येव न किं नराः ।
तत्प्राप्त्यर्थं प्रयत्नेन कुर्वन्तीह दिवानिशम् ॥११५५॥
पारिव्राज्येन किं कार्यमिति चेदुच्यते शृणु ।
अस्यात्यन्तमसंबन्धादात्मलोकस्य कर्मभिः ॥११५६॥

If the *ātma-loka* is desired, 'why then do not men perform, with every effort, actions for getting the same, day and night?'

[1155]

If it is asked: 'What is the use of (or, to be done through) being an ascetic?'; (then the answer is:) 'Listen, that is being stated—this *ātmaloka*, has not at all any connection whatever with actions'.

[1156]

नोत्पत्त्याद्यभिसंबन्ध आत्मनोऽस्योपपद्यते ।
यतोऽतः कर्मणां कार्यं नेह संभाव्यतेऽण्वपि ॥११५७॥

Since it does not stand to reason that this *Ātman* has any connection with origination etc.; therefore, not even a little of action is to be imagined (or, understood, or done) here (in this context of this *Ātman*).

[1157]

तदसंभावनायाश्च को हेतुरिति भण्यते ।
स एष नेति नेत्यात्मा यस्मात्प्रागपि वर्णितः ॥११५८॥

If one asked, 'What is the reason for the absence of any possibility of it?', then (in answer) it is to be said, 'This is so, since, even earlier, it has been stated (in the Śruti): *sa eṣa neti nety ātmā*'.¹

[1158]

¹BU 3.9.26; 4.3.4; 4.4.22; 4.5.15.

प्रध्वस्तैकात्म्यसंमोहो नेति नेत्यात्मविद्यया ।

अगृह्याद्यात्मतां यातः स्वमहिम्नि व्यवस्थितः ॥११५९॥

A person, who has destroyed his ignorance about the nature of his inner self as its being only a single entity, through the pursuit of the lore of the Ātman which is stated in *neti neti*, becomes possessed of the nature of the Ātman, which is ungraspable etc. and becomes steady in his own greatness.

[1159]

कर्मणां चात्मविद्यायां चरितार्थत्वकारणात् ।
विद्ययापि न चेत्कार्यं कर्मभिः स्यात्कथं नु तत् ॥११६०॥

Further, how indeed could it be that,¹ since (ritual) actions have already fulfilled their purpose² here, in respect of the lore of the Ātman, that lore also does not have anything to do with actions?

[1160]

¹Read SP: *utpannāyāṃ vidyāyāṃ tatkārye cāvidyāatatkārya-dhvanise siddhe vidyāpi kāryaṃ na kiṃ cid asti cet karmakāryam ātmaloke nāstīti kim u vaktavyam ity arthaḥ.*

²This is by way of purification of a person's intellect.

एवं चतुर्भिरध्यायैर्यथाव्याख्यातवर्त्मना ।
मुमुक्षुः प्रापितः स्वास्थ्यं परमैकात्म्यलक्षणम् ॥११६१॥

Thus, in these four Adhyāyas, a seeker of liberation is brought to the state of his own, i.e. that which is characterized by (or, as) the highest Ātman, in the way as explained. [1161]

Verses 1162-1167 affirm that a knower of the Ātman does not have to do any more (of) action.

यस्मादेवमयं तस्माद्विदिते परमात्मनि ।
ज्ञेयकार्यसमाप्तत्वान्न किञ्चिदवशिष्यते ॥११६२॥

Since he¹ is so; therefore, when he has obtained all the

knowledge of the highest Ātman and secured fulfilment of the activities in relation to that (highest Ātman) which had to be known (by him), and thus there does not remain anything for him to do. [1162]

¹This has reference to *mumukṣu* in the preceding verse, but SP states we should understand *ayam* in the sense of the state of liberation!

सर्वकर्मफलानां च तथान्तर्भावसंभवात् ।
आप्ते कर्मफले नात आरम्भः कर्मणामिह ॥११६३॥

Further, because the results of all activities are possible to be included (in his getting to know the Brahman), and, thus, the result of activities is obtained; there is, therefore, no beginning (or, performance) of any other activity (now). [1163]

तथा च भगवान्व्यास इममर्थमुवाच ह ।
सर्वं कर्माखिलं पार्थ ज्ञाने परिसमाप्यते ॥११६४॥

In that same sense has the revered Vyāsa stated this: 'O son of Pṛthā, all (i.e. the entire mass of) activities, are accomplished in (acquiring) knowledge'. [1164]

This is *Gītā* 4.33.

नातो विज्ञाततत्त्वस्य कर्महेतुप्रबाधनात् ।
वाङ्मनःकायसाध्यानामारम्भः सर्वकर्मणाम् ॥११६५॥

Therefore, there is no beginning (or, performance) of all (or, the entire mass) of activities, which are to be accomplished by speech, *manas* and body for one, who has specifically known the reality by (effecting) destruction of the cause(s) of activity. [1165]

यस्त्वेषणानिवृत्तः स्यान्नेति नेत्यात्मविद्यया ॥११६६॥

नेतीत्यात्मैव संवृत्तो यतोऽतस्तं विपश्चितम् ।
उभे न व्याप्नुतोऽज्जोत्थे नेति नेत्यात्मनि स्थितम् ॥११६७॥

This (seeker of liberation) who has withdrawn himself from all desires by (securing) the lore of the Ātman (which is expressed in the words) *neti neti*, [1166]

since he has become one with the Ātman itself (described in the words) *neti*; this one, therefore, him, the knowing one, both good and ill do not overpower and has (now) become steady (i.e. remained, or, stands) in the Ātman (described in the words) *neti neti*. [1167]

In verses 1168-1172 is explained the Śruti *ubhe hy ete na tarataḥ*.

के ते उभे न तरत इत्युक्तार्थविवक्षया ।
अत इत्यादिकं तस्मादाजगामोत्तरं वचः ॥११६८॥

With the intention to state (the answer to the question) 'Which are the two that do not overpower him?', there has come as an answer the subsequent statement in the Śruti which begins with the word *ataḥ*. [1168]

अतो निमित्तादत्यर्थमहं पापमकारिषम् ।
भोक्तव्यं तन्मयेदानीं मरणात्समनन्तरम् ॥११६९॥
असह्यानन्तदुःखौघमहाभयमुपस्थितम् ।
इत्येष घोरसंकल्पो हिक्किकावशवर्तिनः ।
सर्वसामर्थ्यहीनस्य जायते तापकारणम् ॥११७०॥

ataḥ means for this reason—"I have exceedingly sinned; therefore, now, immediately after death,¹ there is to be experienced by me [1169]

very great ill that has come, or comes, in an unbearable and unending flow of miseries"—with this notion of the terrible, there occurs (all) that causes affliction (or heat) to the one, who is under the influence of final hard breathing and who has lost all his strength. [1170]

These two verses and the next are almost parenthetical.

¹This is the explanation of *idānīm*.

क्षयिष्णु पुण्यं चैतस्माद्धेतोरकरवं परा ।
इत्येते विचिकित्से द्वे सर्वस्य भवतौ मृतौ ॥११७१॥

Also, 'it is for this (very) reason that I have earlier collected (some) merit, which is (or, and that) perishable'¹—these two fearful questions occur to all human beings at the time of death.

[1171]

¹Cf. *Gītā* 9.21ab.

एते न तरतोऽज्ञोत्थे तद्धेतुवज्ज्ञानघस्मरम् ।
अशनायाद्यतिक्रान्तं ब्रह्मास्मीत्यात्मवेदिनम् ।
कथं ते व्याप्नुतोऽविद्याहेतूत्थे ब्रह्मवेदिनम् ॥११७२॥

These two, i.e. good and evil do not overpower the knower of the Ātman, who knows 'I am the Brahman' which devours ignorance that has been the cause of that (sorrow), that is beyond hunger etc. (The question then is:) 'How do they, which have arisen from the cause, i.e. ignorance, overpower the knower of the Brahman?'

[1172]

तापाय पुण्यमप्याहुः परिणामादिसंगतेः ।
क्षयातिशययोगित्वात्तथा व्यासोऽप्यभाषत ।
तस्य स्थानवरिष्ठस्य सर्वे निरयसंज्ञिताः ॥११७३॥

(This is so because) they say, 'Even merit results in affliction (or heat), owing to its association with (different) modifications etc. and its being possessed with destruction and excellence; so has also Vyāsa said, 'In the case of one, who is in the highest state, there are (all sorrows) called *niraya*.'¹

[1173]

This is the third line of *Mahābhārata* 12.191.11.

¹This is *naraka* 'hell'.

न व्याप्नुतस्ते तं कस्मात्कर्मणी साधवसाधुनी ।
इतिहेतूपदेशार्थमुभे इति परं वचः ॥११७४॥

In order to state (lit. instruct about) the cause as to why both types of actions, i.e. good and evil, do not affect (or, overpower) him, there is the subsequent statement beginning with the word *ubhe*. [1174]

उभे एते तरत्येष विद्वांस्तद्धेतुबाधनात् ।
उभे न तरतोऽतस्तमुभे न तपतश्च तम् ॥११७५॥

This knower of the Brahman overcomes both of these by (effecting) the stultification of their cause; therefore, the two do not overcome/overpower him; the two do not torment him. [1175]

कृतं फलप्रदानेन प्रत्यवायेन चाकृतम् ।
न तापयति कर्मैतन्नेति नेत्यात्मदर्शिनम् ॥११७६॥

This activity does not torment the seer of the Ātman by bringing to him the result of what he has done and by (causing) difficulties for what he has not done. [1176]

पुण्यं वा यदि वा पापं न कर्महास्ति तादृशम् ।
लोकोऽस्य मीयते येन ब्रह्मविद्याप्रकाशितः ॥११७७॥

Be it either merit or sin, an action of this kind, by which is to be measured that *loka*, which is illuminated by the lore of the Brahman is not noticed here (i.e. in one's state of liberation). [1177]

न तस्य प्रतिमा अस्ति यस्य नाम महद्यशः ।
इति मन्त्रोऽपि चानन्त्यमैकात्म्यस्यावदत्स्वयम् ॥११७८॥

There is no equal of that person (liberated), whose description

is 'great fame'--this Mantra also has itself declared the infiniteness of singleness (of the liberated one). [1178]

सर्वकर्मातिगं ब्रह्म प्रत्यङ्मात्रसतत्त्वकम् ।
मन्त्रेणाप्यात्मनो रूपं तदेतदिति वर्ण्यते ॥११७९॥

The Brahman is beyond all action and has only one nature, that of being the inner self. The Mantra also states this nature of the Ātman in the words *tad etat* [1179]

एष योऽभिहितः पूर्वं तं साक्षाद्दृष्टवानृषिः ।
तत्रैव निष्ठां यातः सन्मन्त्रमेतमुदीरयेत् ॥११८०॥

This one, which was earlier described (or, mentioned), has the sage seen directly—and has become devoted to that alone. Thus he should recite this Mantra about the existent. [1180]

In verses 1181-1184, there is the explanation of eṣa nityo mahimā.

आ ब्रह्मणोऽस्य ये सिद्धा अविद्याकर्महेतुतः ।
सर्वेऽपि महिमानोऽमी क्षणप्रध्वंसिनो मताः ॥११८१॥

All these greatenesses of him, which exist right up to Brahman (Hiranyagarbha), are established as perishing in a moment since (their) having the cause in ignorance and action. [1181]

एष एवैकलो नित्यो बाह्यसाधननिस्पृहः ।
महिमा ब्राह्मणस्योक्तो नेतीत्याद्युक्तिभिः पुरा ॥११८२॥

The greatness of the Brāhmaṇa is stated here (thus): 'This one is only, the single one, eternal, having no desire whatever for any external means of action'—with reasons which are stated earlier in *neti* etc. [1182]

अस्यैकस्य स्वतः सिद्धेर्न वृद्धिः पुण्यकर्माभिः ।
न च पापैः कनीयस्ता तस्यासाध्यत्वहेतुतः ॥११८३॥

On account of the existence of it, by its own nature there is neither any greater status (achieved) by meritorious deeds nor any lower status through sins, since it is itself not (an activity) to be accomplished. [1183]

This is the meaning of *na vardhate karmaṇā*.

वृद्धिहानी यतो दृष्टे कर्मसाध्यस्य वस्तुनः ।
कर्मानपेक्षसंसिद्धेः कथं ते भवतो वद ॥११८४॥

Since the two, i.e. greater status and lower status, are seen to have been accomplished through the performance of action; how could there be that of the real thing, as it exists, without any dependence on action? Tell me. [1184]

Verses 1185-1187 point out that the word Brāhmaṇa in the Śruti sa brāhmaṇaḥ is expressive of a knower of the Brahman, not of the caste.

स ब्राह्मण इति गिरा यः श्रुत्या प्रतिपादितः ।
ग्रहणं ब्राह्मणस्येति तस्यैवेहात्मवस्तुनः ॥११८५॥

That one, which is conveyed by the Śruti in the words *sa brāhmaṇaḥ*, has to be taken here as the Brāhmaṇa (i.e. Brahman), the reality called Ātman. [1185]

महिमा विद्यमानोऽपि तदविद्यासमुद्भव-
देहजात्यादिमानस्य वृद्धिहान्यादिसंगतेः ॥११८६॥
अविद्यमानवज्ज्ञेयो महिमाप्रतिबोधतः ।
ब्राह्मणग्रहणेनातः कृतकृत्य इहोच्यते ॥११८७॥

That greatness, though existing in the one, has to be taken as non-existing because of its association with rising higher and going lower of the ego in respect of body, caste etc. which results from the ignorance about that (i.e. Ātman).

Therefore, by the use of the word *brāhmaṇa*, here is stated the one who has accomplished what was to be accomplished, on acquiring the knowledge of greatness. [1186-1187]

Verses 1188-1190 state the explanation of padavit tvampadārthavit.

महिमैवंविधो यस्माद्ब्राह्मणस्यात आदरात् ।
पदवित्स्यान्महिम्नोऽस्य महत्तज्ज्ञानतः फलम् ॥११८८॥

Since such is the greatness of the *Brāhmaṇa*, therefore, through respect for that, a person would be the knower of his own status—(thus) the result, that comes from his knowledge, is great. [1188]

तत्त्ववित्स्यान्महिम्नोऽस्येत्येष मन्त्रो विधित्सतः ।
फलवादोऽर्थवादः स्यादस्यैव तु विधेः परः ॥११८९॥

‘May the person be the knower of the truth of this greatness’—the result of this Mantra is here intended to be enjoined and its statement is merely an *Arthavāda* that comes after the injunction.’ [1189]

महिम्नोऽस्यैव वा साक्षाद्वाक्यार्थप्रतिबुद्धये ।
अन्वयव्यतिरेकाभ्यां स्यात्पदार्थविचक्षणः ॥११९०॥

(It means to say:) (A person) should be careful in deciding the meaning/significance of the status through *Anvaya* and *Vyatireka* in order that he has directly the knowledge/awareness of the meaning of the sentence, i.e. of this very greatness. [1190]

Verses 1191-1199 affirm that the result is knowledge of the meaning of the sentence.

यतः पदार्थसंबोधान्नेति नेत्यादिलक्षणम् ।
महिमानं श्रुतेर्वेति फलं चेत्स्यात्ततोऽपि किम् ॥११९१॥

Since he knows from the Śruti this greatness through his knowledge of the meaning/significance of the thing, i.e. his status, which is characterized as *neti neti*, even then the question is: 'What would come thereafter?' [1191]

तं विदित्वेत्यतः प्राह फलं वाक्यार्थबोधतः ।
 यस्मादेवंफलं ज्ञानमेवंविद्यत्नतस्ततः ॥११९२॥
 शमादिसाधनो भूत्वा महिम्नः पदविद्वेत् ।
 इति मन्त्रोक्त एवार्थो ब्राह्मणेनापि वर्ण्यते ॥११९३॥

Therefore, the Śruti has stated, in the words *taṁ viditvā*, the result that accrues from knowing the meaning of the sentence. Since the knowledge 'has this as the result'; therefore, one, being a knower of this with every effort, [1192] should have become possessed of the means such as *śama*; knowing thus, then one should become a knower of the status—this is the meaning stated in the Mantra and is described by the Brāhmaṇa also. [1193]

धर्माधर्मासमायोगो यस्मात्प्रत्यङ्घियः फलम् ।
 एवंविदादरात्तस्मात्प्रत्यक्प्रवणधीर्नरः ॥११९४॥

Since dissociation from merit and demerit is the result of the knowledge of the nature of the Ātman; therefore, should a person be jealously inclined towards (securing the knowledge of) the inner self. [1194]

उत्पन्नात्मबुभुत्सुः सन्वेदानुवचनादिभिः ।
 विरक्त आग्रजाल्लोकान्मोक्षादर्वाक्षु भूमिषु ॥११९५॥

Being one in whom the desire for knowing the Ātman has arisen through (the study of) the Veda and the Brāhmaṇa, (one becomes) averse to the world right up to the first-born (i.e. Hiranyagarbha), at various levels up to that of liberation. [1195]

संशुद्धधिषणोऽत्यर्थं वैदिकैरेव साधनैः ।
 पराङ्मुखीकृतः शुद्ध्या तैस्तैः सांसारिकैः फलैः ॥११९६॥
 दुःखात्मकत्वात्सर्वेषां शिखिविन्यस्तहस्तवत् ॥११९७॥

This person, whose intellect is purified with (the help of) the means taught in the Veda, and on account of purity is averse to (lit. has his face turned away from) various worldly results, [1196]
 because all of them by nature involve suffering, just like a hand which is placed in fire. [1197]

इत्येवं ध्वस्तनिःशेषकल्मषः पूर्वसाधनैः ।
 उत्पन्नात्मबुभुत्सुः संस्त्यक्तसर्वपरिग्रहः ॥११९८॥

Thus, having destroyed the entire blemish on his part by the earlier mentioned means, this person should have a desire to know the Ātman arisen in him and should abandon all (his) belongings (possessed earlier). [1198]

रजस्तमोजरागादिदोषानाक्षिप्तशेषैः ।
 मुमुक्षुवस्थां संप्राप्त एवं पूर्वोक्तसाधनैः ॥११९९॥

This one, who has thus become a seeker of liberation through the means, which are already stated, he should have his devotion unaffected by the blemishes such as attachment born of *rajas* and *tamas* (*gunas*). [1199]

Verses 1200 and 1201 state the result arising from the knowledge of one's status.

मन्त्रब्राह्मणरूपिण्याथेदानीं विनियुज्यते ।
 श्रुत्याशेषतमोघातिप्रत्यग्ज्ञानस्य जन्मने ॥१२००॥

Now he is enjoined (or prepared) by the Śruti in the form

of Mantra and Brāhmaṇa, for the rise of the knowledge of the inner self which destroys the entire ignorance. [1200]

एवं पूर्वोक्तमन्त्रार्थज्ञानतत्फलवित्सुधीः ।

शमादिसाधनो विद्यादन्वयव्यतिरेकतः ।

व्युत्थाप्यानात्मनः पश्येत्प्रविश्यात्मानमात्मना ॥१२०१॥

Thus, this person, possessed of good intellect, becoming a knower of the knowledge of the significance of the Mantra stated earlier and its result/fruit, should come to have the means such as śama and should know through Anvaya and Vyatireka the Ātman; afterwards, having raised himself above the non-Ātman and having entered into the Ātman. [1201]

This verse states (as coming in this context) the meaning of the sentence tat tvam asi.

वाक्यादेव ततोऽसङ्गः सर्वमात्मेति वीक्षते ।

इत्येतद्ब्राह्मणेनेह प्रयत्नेन विधीयते ॥१२०२॥

Then, becoming unattached (to the external world), with the help of the Śruti (lit. sentence), he sees (i.e. comes to know) 'All is the Ātman'. This is thus enjoined by the Brāhmaṇa with particular care. [1202]

Verses 1203 and 1204 point out the order of the two words dānta and śānta as coming from the sequential order of their meanings.

दान्तो भूत्वा ततः शान्तस्ततश्चोपरतो भवेत् ।

अर्थक्रमो बलीयान्स्याद्यतः पाठक्रमादिह ॥१२०३॥

Then, having become subdued and then pacified, he should have drawn himself away from that (external world); this is so; since here the *arthakrama* 'meaning sequence' is more powerful than *pāṭhakrama* 'reading sequence'. [1203]

क्रियानिवृत्तिविषये प्रयोगो जगतीक्ष्यते ।
अभिधानस्य शान्तादेः प्रत्यक्षेणेह सर्वतः ॥१२०४॥

It is directly noticed everywhere in the world that the use of such words as *śānta* refer to the subject of desisting from activity. [1204]

This verse states the meaning of dānta to be one whose organs have ceased to be turned externally.

बहिष्करणचेष्टाया निवृत्तौ दान्त उच्यते ।
दान्तोऽश्वो गौर्गजो वापि प्रयोगस्तत्र वीक्ष्यते ॥१२०५॥

A person is described as *dānta* 'subdued', when tendency of moving outwards has stopped as in the case of a subdued horse, a bull or an elephant, since such use is noticed in respect of them. [1205]

In verses 1206 and 1207 is pointed out the propriety of reversing the order of the words śānta and dānta.

अन्तःकरणचेष्टाया निवृत्तौ शान्त उच्यते ।
शान्तो भिक्षुस्तपस्वीति तत्प्रयोगसमीक्षणात् ॥१२०६॥

When the activity of the internal organ (of a person) has stopped, that person is called *śānta*. This is noticed in the use of the word *śānta* in statements like *śānto bhikṣus tapasvī*. [1206]

SP supports the purpose of this verse by referring to *Gītā* 3.6: *karmendriyāni saṁyamya ya āste manasā smaran*. Also SP points out that the words *śānta* and *dānta* are used in this order in BUB also, which justifies verse 1203 above, saying that *arthakrama* is stronger than *pāthakrama*.

नन्वप्राप्तौ विधिर्युक्तः प्राप्तास्त्वेते दमादयः ।
कुतस्तत्प्राप्तिरिति चेद्यथा प्राप्तिस्तथोच्यते ॥१२०७॥

(An objection is raised:) 'But, indeed, the injunction is reasonably understood, in case the matter under reference is unobtained; but, here, these, i.e. *dama* etc., are already obtained. Therefore, if there is a question: 'Where does one get them from?', then an answer is given in the way to show how they are obtained'. [1207]

Verses 1208-1217 mention the fourfold nature of action.

प्रतिषिद्धं तथा काम्यं चापलं नित्यमेव च ।
इयदेव जगत्यस्मिन्पुंसां कर्म समीक्ष्यते ॥१२०८॥

(To indicate this:) What is prohibited, so also what is to be desired, what is rash doing and what is purely obligatory. This much of action is noticeable among human beings in the world. [1208]

निषिद्धस्य निषिद्धत्वात्कर्मकाण्डेऽपि कर्मणः ।
कुतो वेदान्तविद्यायां तस्य प्राप्तिर्मनागपि ॥१२०९॥

Since, even in Karma Kāṇḍa (of Veda) there is mention made of some forbidden action as prohibited (specifically); how then can that, even a little of it, be noticeable (or, mentioned) in the lore of Vedānta? [1209]

मुक्तेरर्वाक्ष काम्येषु मुमुक्षुत्वाद्विरक्ततः ।
काम्यकर्मापि नैवेह मुमुक्षोः संभवत्यतः ॥१२१०॥

Since one who is desirous of liberation, has in the stages earlier to liberation aversion to action motivated by desire; therefore, in the case of this person that (*kāmya* action) cannot be possible. [1210]

रजस्तमोऽतिवर्तित्वात्सत्त्वसंशुद्धिहेतुतः ।

चापलान्यपि कर्माणि नातः सन्त्यस्य कानिचित् ॥१२११॥

Therefore, because of (one's) having transcended *rajas* and *tamas* and also because of the purification of one's own being rash actions on one's part are not noticed. [1211]

न पाणिपादचपल इत्युक्तेर्वा निषेधतः ।

नातः संभाव्यते कर्म मुमुक्षोश्चापलं क्वचित् ॥१२१२॥

Also, because there is rejection (in the Smṛti statement) *na pāṇipādacapalah*,¹ there is no act of rashness possible for a person desirous of liberation. [1212]

¹*Manusmṛti* 4.177a.

नित्यस्याकरणाद्यः स्यादनर्थः करणादपि ।

नित्यस्यावाप्यतेऽसौ चेद्वद किं नित्यकर्मणा ॥१२१३॥

Whatever evil would come as a result of not performing obligatory acts would come also in case that one does these obligatory acts—if this is so, what is the use of the performance of obligatory rites? [1213]

एवं नित्यानि कर्माणि कुर्वतः शुद्धचेतसः ।

तित्यक्षा जायते पुंसो नित्येष्वपि च कर्मसु ॥१२१४॥

Thus (it is:) 'In the case of a person, who is doing his obligatory rites (i.e. acts) and has secured the purification of his mind (or, the intellect?), there arises a desire to abandon even the obligatory rites. [1214]

संसारमोक्षणायाशु नित्यं कर्म न चेदलम् ।

कोऽर्थस्तेनेह पुंसः स्यादकृतेन कृतेन वा ॥१२१५॥

If (the performance of) obligatory rites is not capable of

effecting release from transmigratory existence, then what is the use of that act to a man, whether it is not performed or performed. [1215]

इति संजातपरमवैराग्यो नित्यकर्मणः ।
स्वतस्त्यागं करोत्येव प्राप्तास्तेन शमादयः ॥१२१६॥

If this person, in whom there has arisen thus an extreme aversion to the performance of obligatory rites, of himself gives them up, then he will have acquired *śama* etc. [1216]

यमान्सेवेत सततं न नित्यं नियमान्बुधः ।
यमान्पतत्यकुर्वाणो नियमान्केवलान्भजन् ॥१२१७॥

A wise person should ever (or, continuously) take to *yamas* 'restraints' and not to *niyamas* 'observances'; not practising *yamas* (and) only taking to *niyamas*, he comes to have a fall. [1217]

For *yama* SP refers to *Yogasūtra* 2.30; and for *niyama* to *Yogasūtra* 2.32.

Verses 1218-1220 point out to an injunction related to the means (*sādhana*s), viz. *śama* etc. which are *svataḥprāpta*.

सत्यमेवं शमादीनां प्राप्तत्वान्नेष्यते विधिः ।
प्राप्तानामेव तेषां तु साधनत्वं विधीयते ।
प्रत्यग्याथात्म्यविज्ञानजन्मने श्रुतिवाक्यतः ॥१२१८॥

True, thus it is that *śama* etc. are already acquired and there is not a need of (i.e. not expected) an injunction (with regard to acquiring them); in the case of them, which are already acquired, it is stated in the Śruti that they are the means to the rise of specific knowledge about the real nature of the inner self. [1218]

यथोक्तविषये तेषां साधनत्वं न मानतः ।

यतः प्राप्तमतः श्रुत्या साधनत्वं विधीयते ॥१२१९॥

(But) since their being the means to the subject, which is already mentioned, is not known from any other source of knowing, the Śruti, therefore, prescribes their being the means (to that). [1219]

निवृत्तिमात्रं प्राप्तं वा भवेदुक्तेन वर्त्मना ।

कर्तव्यता निवृत्तेस्तु न प्राप्तेति विधीयते ॥१२२०॥

These are means just for one's withdrawing (or, cessation) from action as is known in the way you have mentioned; the necessity of cessation is, however, not known yet (*vā*)¹ and therefore they are prescribed (as the means to the desired end). [1220]

¹ Cf. SP: *vāśabdo 'vadhāraṇārthah*.

In verses 1221-1225 is stated the purport of the Śruti in respect of one's being uparata; verses 1226-1228 affirm the need for an injunction with regard to one's having uparati.

ननु दान्तशमोक्त्यैव सर्वस्यैवेह कर्मणः ।

वारितत्वादुपरतश्रुत्यान्यत्किं विधीयते ॥१२२१॥

बहिरन्तःक्रियातोऽन्या न क्रिया विद्यते यतः ।

नोत्सर्गविधिना यस्मान्नापवादस्य बाधनम् ॥१२२२॥

भूताहिंसाविधिर्यस्मान्नाग्नीषोमीयमारभित् ।

ऊर्ध्वं प्राणा उत्क्रामन्ति यूनः स्थविर आयति ॥१२२३॥

प्रत्युत्थानाभिवादाभ्यां पुनस्तान्प्रतिपद्यते ।

इत्यौत्सर्गिकमाचारं यथा ब्रह्मा प्रबाधते ॥१२२४॥

आगच्छति गुरौ तृष्णीमासीनस्तद्वदत्र च ।

औत्सर्गिकत्यागविधिं नित्यकर्मविधिर्बलात् ।

तस्य जीवनमात्रैकहेतुत्वाद्बाधते ध्रुवम् ॥१२२५॥

नित्यकर्मविधेर्यस्माच्छ्रमादिविधिना हतिः ।
न संप्राप्तेत्यतो यत्नात्प्रारब्धोपरतश्रुतिः ॥१२२६॥

(A doubt is expressed thus:) 'But, since all of the activity (i.e. the actions) is (i.e. are) set aside (or, warded off) by the statement about cessation (from all activities) insisting on (a person's being) subdued and (having acquired) *śama* 'tranquillity (of mind)', what other (action) is prescribed? [1221] Since there is no external activity (by sense-organs) other than internal activity (by internal organs), (therefore, there) cannot be (the objection) (and) since there is not the stultification of a general rule by a rule for exception: [1222]

(Again, it is not that) a person should not kill¹ the animal intended for Agni and Soma, because there is a general rule regarding non-violence in relation to all animals.' [1223ab]

(See again this:) When an elderly person approaches, the *prāṇas* of a young person move upwards (i.e. they begin to leave his body, as it were) and the young one gets them back (in the body) again by rising up (from his seat and offering) him his obeisance.² [1223cd-1224ab]

Since the Brahman priest sets aside this behaviour (prescribed) by a general rule, [1224cd]

he remains seated silent (even) when an elderly person has come. In the same way, here, [1225ab]

the rule for (the performance of) an obligatory act stultifies, through its force, the general rule regarding abandoning (activity), because it is the cause (i.e. basis) for life alone.

[1225c-f]

Since there is thus no setting aside (lit. striking down) of the general instruction regarding obligatory acts by the rule about *śama* etc., therefore, the Śruti has begun with particular care the statement about cessation (from all activities). [1226]

At the end of verse 1221, there was reference made to a mendicant not doing any activity, but the general rule about activity is 'whatever is prescribed in the scripture has to be

done' and thus there is a conflict between the exception rule (*apavāda*) and the general rule (*utsarga*). Here, the person, who has hypothesised an explanation for this opposition or this objection, has in mind two cases: one from Śrauta and the other from Smārta domain of activities, where the said conflict is accepted as not arising. In the first case, there is absence of non-conflict between the injunction regarding non-violence to all beings and another injunction where killing of an animal for Agni and Soma is prescribed. The second case is from *Manusmṛti*— rule regarding a young pupil's/celebrant's behaviour towards an elderly person and what the Brahman priest has to do in a similar situation, i.e. he does not go by the rule of Smṛti—the hypothetical answer is: each of the two cases of different acts belongs not to the same context and, therefore, there could not be any procedural conflict involved. Here also, *śānta* and *dānta* have reference to activity, while *uparata* does not have any, and, therefore, the argument is made in the beginning, that there is no conflict.

¹The word *ārabhit* is here difficult to understand. It may be taken for *ārabheta* while the reading stands for the scriptural word *ārabheta*. It seems that Sureśvara made this change in the verbal form for the sake of metre. Also the variant reading noted in AnSS edition *āranut* does not offer any help whatsoever!

²*Manusmṛti* 2.120.

इह चोपरतश्रुत्या तिष्ठत्यादिवदुच्यते ।
 कर्मकर्मैव पुंसोऽस्य ह्यनुष्ठेयतयामृतेः ॥१२२७॥
 अनुष्ठेयतया श्रुत्या निवृत्तिः सर्वकर्मणाम् ।
 यस्माद्विधीयते तस्मात्तत्यागी पतितो भवेत् ॥१२२८॥

Further, in the statement about *uparati*, one's cessation from activities is conveyed (lit. stated) as similar to the activity indicated by the verbs *tiṣṭhati* etc.¹ because (those activities) are what are to be done by him (even involuntarily) up to his death.

[1227]

Since cessation from all activities is mentioned by the Śruti

as what is to be done; therefore, one, who gives up that (i.e. doing actions) would be considered as a man fallen (from proper conduct). [1228]

¹This refers to *svapiti*.

In verse 1229, a position is taken thus: 'One does not have to give up performance of daily/obligatory duties.'

इत्यत्र चोदयित्वैके परिहारं प्रचक्षते ।
नित्यानां कर्मणां कस्मात्परित्यागो विधीयते ॥१२२९॥

Having then hypothesized an objection, some people have offered its refutation thus: (The question asked is:) 'Why is (here) prescribed the abandoning of the obligatory duties?' [1229]

Verses 1230-1233 are to answer away the hypothetical position taken (in verse 1229).

काम्यादिकर्मवत्तेषां मनोव्याक्षेपहेतुतः ।
त्यागोऽतश्चोद्यते श्रुत्यां नित्यानामपि कर्मणाम् ॥१२३०॥
भत्वा समाहित इति समाधानं विधास्यते ।
चौद्यस्यासंभवोऽस्यात्र श्रुत्यैव विहितत्वतः ॥१२३१॥
साधनत्वेन शान्त्यादेः सम्यग्ज्ञानस्य जन्मने ।
नातश्चोद्यावकाशोऽत्र शमादेर्विहितत्वतः ॥१२३२॥
साध्यसाधनसंबन्धविधाने सत्यसंभवः ।
स्वर्गादाविव यागादेर्विधानादेव कारणात् ॥१२३३॥

(The position taken is:) 'Because they are, like the performance of desired activities, the cause of the destruction of a person's mind and therefore abandoning of even those obligatory duties is prescribed by the Śruti.' [1230]

This will be answered/explained away in the words *bhūtvā samāhitah*; since there is really no place (lit. possibility) for

the hypothetical objection owing to the fact that the Śruti itself has prescribed (the same) [1231]

śānti etc. as the means for the rise of proper knowledge and there is therefore thus not any scope for that position; for, śama etc. have been already prescribed. [1232]

(Then now follows their explanation:) When there is thus a prescription (in the Śruti) about the connection with what is to be accomplished and the means for accomplishing it, there is no possibility (or scope for that position being taken) in respect of heaven etc., (they are not ignored) only for the reason that there is prescription for (the performance) of a sacrifice. [1233]

In verses 1234-1238, Sureśvara states his own view.

दोषान्तरप्रसङ्गार्थं परिहारः कृतस्ततः ।
 चोद्यपूर्वक एतस्मिन्नन्यचोद्यस्य संभवात् ॥१२३४॥
 यदि व्याक्षेपकारित्वान्नित्यं कर्म निषिध्यते ।
 बहु भिक्षाटनाद्यस्ति तत्कस्मान्न निषिध्यते ॥१२३५॥
 वेदान्तश्रवणाद्यस्ति बहु व्याक्षेपकारि च ।
 तन्नित्यकर्मवत्कस्माच्छ्रुत्येह न निषिध्यते ॥१२३६॥
 नैष दोषः प्रधानार्थसमाप्तेरेव कारणात् ।
 भिक्षाटनाद्यनुष्ठानं तादर्थ्यान्न निषिध्यते ॥१२३७॥
 प्रत्यग्याथात्म्यविज्ञानसमाप्त्यापेक्षितत्वतः ।
 वेदान्तश्रवणादीनां न त्यागोऽतोऽत्र भण्यते ॥१२३८॥

Thus there is warding off (of the faults seen in the preceding verses); in case there contingently occur some other faults they are preceded by a yet (other) objection which has a scope for another objection in this context: [1234]

'If an obligatory act is (thus) prohibited for the reason that it causes destruction (of the person's mind), then why is it that going for begging etc. are not prohibited? [1235]

And there is much (of such other doings) as hearing the

Vedānta text(s) etc. which cause destruction (of the mind). Then, why is it (also) that it is not prohibited by the Śruti like obligatory rites (as said above)? [1236]

(The answer to this is:) 'This is not a fault, since there occurs the fulfilment of what is principally stated (as what is to be performed); however, the performance of activities such as going for begging are not prohibited because of their having the same purpose as of acquiring knowledge about the Ātman'.¹ [1237]

As obtaining the specific knowledge about the real nature of inner self is what is expected; so there is not stated the giving up of hearing the Vedānta text(s) etc. [1238]

¹SP invites attention to some Smṛti statement which is not traced:

*ārūḍho naiṣṭhikaṃ dharmam yas tu pracyavate punaḥ /
prāyaścittam na paśyāmi yena śudhyet sa ātmahā //*

Verses 1239 and 1240 state one Sāṅkhya view, viz. that even a prohibited act is to be performed, on the authority of upādāna 'acceptance' by some (mīmāṃsakas).

समाप्तिं न समायाति प्रधानं यदसंभवे ।
निषिद्धमपि तत्कार्यं तत्समाप्तिप्रयुक्तितः ॥१२३९॥
प्रधानचोदनैवास्य चोदनातोऽवगम्यते ।
भिक्षाटनादिना नर्ते प्रधानं हि समाप्यते ॥१२४०॥

A prohibited act, in the absence of which the principal activity does not come to its completion (i.e. fulfilment), even that act has to be performed, since it has promoted the fulfilment of that principal activity. [1239]

Therefore, from this person's being enjoined (to cessation from all other activities), there is enjoining of him for the principal activity only; indeed, the principal activity is not fulfilled (i.e. completed) without going for begging etc.¹ [1240]

The word 'some' possibly means Mīmāṃsakas; for this see SP on verse 1241. It dwells at length on the discussion of *śeṣabhakṣa*— that should throw some light on the point. We do not enter into this.

¹SP supports this by quoting *śarīram me vicarṣaṇam* (Taittirīyopaniṣad 1.4).

शेषभक्षं न कुर्वन्ति प्रधानार्थानुरोधतः ।
साक्षाद्विहितमप्येवं तादर्थ्यात्कर्म नो मतम् ॥१२४१॥

They do not partake of the *śeṣa* 'remainder of materials for offering' owing to that it is in keeping with the principally desired object; therefore, even though it is directly prescribed it is not to be considered as an activity, as it has the same purpose as of that (principal activity). [1241]

SP states, in the context of this verse, the Mīmāṃsā procedure at length—it would be read with profit.

Verses 1241-1243 present the Siddhāntin's view: even a rite prescribed by the Śruti has to be given up, if it conflicts with the performance of the principal rite.

याः काश्चिज्जीवता शक्यास्त्यक्तुं तित्यक्षता क्रियाः ।
ताः सर्वाः संपरित्यज्य निमेषादौ व्यवस्थितः ॥१२४२॥

Whatever activities are possible for one's giving up, if one who wishes to renounce while one is alive, one should have given up all of them within a moment and should become steady in the state (of a liberated being). [1242]

उक्तविध्यर्थविषयाद्याः क्रिया विषयान्तरे ।
निषिध्यन्तेऽत्र ताः सर्वा व्याघातायैव ता यतः ॥१२४३॥

Those activities, which are on account of their being for the purpose of the injunction that is enjoined, are prohibited with

respect to another topic, for the reason that they are only for creating obstruction (to right knowledge). [1243]

Verses 1244 and 1245 clarify the nature of titikṣā.

द्वन्द्वप्रवाहसंपातसहिष्णुरभिधीयते ।
तितिक्षुवचनेनात्र दुरुक्तादेस्तथैव च ॥१२४४॥

Here, in the word *titikṣu*, and in the same way, also in the statement of censure etc., is described (a person) who is capable to bear the occurrence of the stream of pairs of opposites.¹ [1244]

¹For example, *sukhaduḥkha*, *śīta-uṣṇa*, see verse 1054 note 2 above.

स्वातन्त्र्यं येष कर्तुः स्यात्करणाकरणं प्रति ।
तान्येव तु निषिद्धानि कर्माणीह शमादिभिः ॥१२४५॥

Here are set aside (lit. prohibited) by *śama* etc. only those activities, towards the performance and/or non-performance of which an agent has liberty (or, a choice/an option). [1245]

Verses 1246-1248 state that the agent, with reference to an activity, can give up the performance of it, even if it did not allow him any option—this, after he has given up any other performance which allowed him an option.

अस्वातन्त्र्यं तु येष स्यात्कर्तुः कर्मसु सर्वदा ।
समाहितोक्त्यर्थेदानौ तन्निरोधौ विधीयते ॥१२४६॥

But, now, a prohibition is specifically prescribed by the word *samāhita* in respect of those activities with reference to which the agent does not ever have such liberty. [1246]

पिण्डीकृत्येन्द्रियग्रामं बुद्धावारोप्य निश्चलम् ।

विषयांस्तत्स्मृतींस्त्यक्त्वा तिष्ठेच्चिदनुरोधतः ॥१२४७॥

Having collected together (i.e. controlled) the group of sense-organs and fixed the same to be steady in the intellect and then having abandoned all the objects (of enjoyment) and also the memories of them, a person (or, an agent) should remain inclined towards (only) sentience. [1247]

SP states this as *asamprajñātasamādhi*, as called in the *Yogaśāstra*.

एषोऽभ्युपायः सर्वत्र वेदान्तेषु विधीयते ।
तत्त्वमस्यादिवाक्यार्थज्ञानोत्पत्त्यर्थमादरात् ॥१२४८॥

Everywhere, in the Vedānta works, there is zealously prescribed this excellent remedy for (causing/effecting) the rise of the knowledge of the meaning of the sentences such as *tat tvam asi*. [1248]

Verses 1249-1260 adduce sentences from the Vedānta texts in support of what is stated (just) before.

नाविरतो दुश्चरितान्नाशान्तो नासमाहितः ।
नाशान्तमानसो वापि प्रज्ञानेनैनमाप्नुयात् ॥१२४९॥

A person would not get (to know) this (Ātman) by his excellent knowledge (also), if he has not stopped himself from (doing) evil acts, if he is not put (his mind) in the state of satisfaction, if he is not (i.e. does not feel) satisfied, or even if he is not calm/tranquil in his mind. [1249]

Cf. *Kāthopaniṣad* 2.24.

मुक्तेर्हि बिभ्यतो देवा मोहेनापिदधुर्नरान् ।
ततस्ते कर्मसूद्युक्ताः प्रावर्तन्त दिवानिशम् ॥१२५०॥

Indeed, gods, being afraid that liberation (might be secured by men), wrapped/covered them with delusion; then, they (i.e. men), becoming prone to activity, began their activity day and night. [1250]

Cf. SV 218 where *prāvatantāvicakṣaṇāḥ* is for *prāvartanta divāniśam* of this verse. SP states this to be a citation from some Vedic text.

यतः कर्म तमोहेतुस्तस्मादेव मुमुक्षुभिः ।
ज्ञानेन भित्त्वा संमोहं सर्वानर्थैकसंश्रयम् ॥१२५१॥

Since action is the cause of ignorance; therefore, for that reason only, those, who are desirous for liberation, should have first destroyed (lit. broken) the entire delusion (*sammoha*), (which is) the support of all evil (results) by means of knowledge (by taking to renunciation).¹ [1251]

¹SP adds: *mumukṣubhir eva saṁnyāsaḥ kartavya iti śeṣaḥ*.

संन्यस्य सर्वकर्माणि प्रत्यक्प्रवणधीर्नरः ।
प्रत्यग्याथात्म्यविज्ञानमात्रमेव समाश्रयेत् ॥१२५२॥

Having renounced all actions, a person should, with his mind inclined towards (knowing the nature of) the inner self, resort only to the specific knowledge about the reality of the inner self. [1252]

तत एवैकलाद्यस्मात्संसाराद्विप्रमुच्यते ।
इत्येतदाह विस्पष्टं भाल्लविब्राह्मणं वचः ॥१२५३॥

Therefore has the Brāhmaṇa (text) of the Bhāllavis made a very clear statement: 'Only through that does one become free from transmigratory existence'. [1253]

SP elucidates this thought thus: *muktisāadhanajñānopadeśena*

saṃnyāsapūrvakaṃ śravaṇādī kāryam ity etad bhāllaviśrutyā vivakṣitam.

यदा पञ्चावतिष्ठन्ते ज्ञानानि मनसा सह ।
बुद्धिश्च न विचेष्टेत तामाहुः परमां गतिम् ॥१२५४॥

They have called that as the highest state where the five senses,¹ together with *manas*, become non-operating and the intellect also does not remain active.² [1254]

¹This is for the sense-organs (*hetuhetumator aikyam*), cf. *indriya-* in the next verse.

²Cf. *Kāthopaniṣad* 6.10 (with *viceṣṭati* for *viceṣṭate*).

तां योगमिति मन्यन्ते स्थिरामिन्द्रियधारणाम् ।
अप्रमत्तस्तदा भवति योगो हि प्रभवाप्ययौ ॥१२५५॥

That firm stopping (lit. holding the activity) of the (sense-)organs do they call Yoga. Then does one become unfaltering. Indeed, Yoga consists in origination and merger.¹ [1255]

¹Both SP and NKL (ms. p. 793) explain it thus: *śṛṣṭipralayā-nusaṃdhānarūpapratyayavṛttikaraṇaṃ yogaḥ*. Also SP states that this is *samprajñātasamādhi* of *Yogaśāstra*.

यच्छेद्वाङ्मनसौ प्राज्ञस्तद्यच्छेज्ज्ञान आत्मनि ।
ज्ञानमात्मनि महति तद्यच्छेच्छान्त आत्मनि ॥१२५६॥

A wise man should control his (power of) speech¹ and *manas*; he should control that (i.e. *manas*) in the knowing about the one, i.e. the *Ātman*;² he should control that knowing about the one in the great *Ātman*³ and he should control that (great *Ātman*) in the tranquil *Ātman*.⁴ [1256]

¹SP points out: *vāk* (nominative form) is for *vācam* (accusative

form) and *manasī* for *manasi* with the Vedic lengthening of it.

²This is with reference to the intellect within an individual which is identified with the Ātman because of its extreme nearness to it.

³This refers to Hiraṇyagarbha.

⁴This is the highest Ātman.

उत्तिष्ठत जाग्रत प्राप्य वरान्निबोधत ।
सत्येन लभ्यस्तपसा ह्येष आत्मा
सम्यग्ज्ञानेन ब्रह्मचर्येण नित्यम् ।
अन्तःशरीरे ज्योतिर्मयो हि शुभ्रो
यं पश्यन्ति यतयः क्षीणदोषाः ॥१२५७॥

'Arise, wake up, (and) having approached the excellent (O men), get to know (that Ātman)';¹ 'This Ātman is ever to be known (lit. obtained) by truth, by penance/austerity, by proper knowledge and by observing celibacy', '(This one) is within the body, consisting of light, and the bright one and him see ascetics, who have their faults gone.'² [1257]

¹*Kāthopaniṣad* 3.14.

²*Muṇḍakopaniṣad* 3.1.6.

न चक्षुषा गृह्यते नापि वाचा
नान्यैर्देवैस्तपसा कर्मणा वा ।
ज्ञानप्रसादेन विशुद्धसत्त्वस्ततस्तु
तं पश्यते निष्कलं ध्यायमानः ॥१२५८॥

It is not grasped by the eye, not by speech either, not by other gods,¹ by austerity or by (any) action. But, one realises (lit. sees)² that undivided one through the purity obtained by/from knowing (it), with one's own being purified³ and (ever) meditating (on it). [1258]

¹Here the gods, who superintend over the sense-organs, stand for the latter.

²The use of the Ātmanepada form *paśyate* is to be noted: One does not see here any outside object, but one realises oneself to be the Brahman.

³That is, cleansed of every blemish.

प्रतिशाखं तथान्यानि ज्ञानोपायप्रसिद्धये ।
तन्मूलानि तथान्यानि स्मृतिवाक्यानि कोटिशः ॥१२५९॥
सन्त्येवात्मपरिज्ञानसाधनानां प्रसिद्धये ।
अग्निरनिकेतः स्यादशर्माशरणो मुनिः ॥१२६०॥

In every school (lit. branch) of the Veda, there are, to this effect, other (sentences) having the purpose of being the means (lit. root-cause) for acquiring the knowledge (about the Brahman) and also other sentences in the Smṛtis, crores of them, based on (i.e. rooted in) them, [1259]
are indeed there to serve as the means of achieving full knowledge about the Brahman. The word *anagni* means one who does not have a home, (thus) the word *aśarmā* not having a protection (i.e. protecting roof), i.e. an ascetic (or, a Muni). [1260]

Verses 1261-1266 adduce support for this from the Smṛti texts.

त्यज धर्ममधर्मं च उभे सत्यानृते त्यज ।
उभे सत्यानृते त्यक्त्वा येन त्यजसि तं त्यज ॥१२६१॥

Leave off merit and demerit both; give up (the consideration of) truth and untruth. By giving up both, truth and untruth, give up (also) that through (the help of) which you give them up. [1261]

Cf. BUBV 1.4.1054cd; 3.5.162ab; 4.4.126 above; cf. *Mahābhārata* 12.167.10.

यतो यतो निवर्तते ततस्ततो विमुच्यते ।
निवर्तनाद्धि सर्वतो न वेत्ति दुःखमण्वपि ॥१२६२॥

A person (who is a seeker of the Brahman) is freed from each of whatever he withdraws himself from. Indeed, by withdrawing himself from all, (he comes to such a state that) he does not experience (even) a little of misery. [1262]

Cf. BUBV 4.3.1885ab.

कोऽहं कस्य कुतो वेति कः कथं वा भवेदिति ।
प्रयोजनमतिर्नित्यमेवं मोक्षाश्रमी भवेत् ॥१२६३॥

'Who am I?', 'To whom I belong?' and (vā) 'Whence (have I come)?', 'What and how will be (my condition)?'—having entertained (lit. become full of) such in thoughts (i.e. mind), a person should ever be in the stage (for securing, or suitable) for liberation. [1263]

नैतादृशं ब्राह्मणस्यास्ति वित्तं
यथैकता समता सत्यता च ।
शीलं स्थितिर्दण्डनिधानमार्जवं
ततस्ततश्चोपरमः क्रियाभ्यः ॥१२६४॥

There is not for a Brāhmaṇa (any other) wealth of this kind, as being only one single entity (i.e. the Brahman), being equal (towards all outside objects/individuals) and being (devoted to) truth. From that come to him (exemplary) conduct, steadiness, laying down the rod, straightforwardness and, then later, cessation from all of the activities. [1264]

निवर्तयित्वा रसनं रसेभ्यो घ्राणं
च गन्धाच्छ्रवणं च शब्दात् ।
स्पर्शानुं रूपगुणाच्च चक्षुस्ततः
परं पश्यति स्वं स्वभावम् ॥१२६५॥

Having turned away the sense of taste from (all) tastes and the sense of smell from (every) fragrance and (also) the sense

of hearing from the word and (the whole of) the body¹ from (every object of) touch and the eye from (every) excellence of form, a person sees the highest (Ātman/Brahman) which is (really) his own nature. [1265]

¹This stands for the sense of touch.

एवं मनुवसिष्ठादिधर्मेष्वपि सहस्रशः ।
स्पष्टानि सन्ति वाक्यानि यथोक्तार्थप्रसिद्धये ॥१२६६॥

Thus, there are thousands of clear statements in the Dharma works of Manu, Vasiṣṭha and others also and they go to prove the matter stated (earlier). [1266]

SP cites *Manusmṛti* 6.43-44:

*anagnir aniketaḥ syād grāmam annārtham āśrayet /
upekṣako 'saṁcayiko munir bhāvasamanvitaḥ //*
*kapālaṁ vṛkṣamūlāni kucelam asahāyatā /
samatā caiva sarvasminn etan muktasya lakṣaṇam //*
(*asaṁkusuko* and *bhāvasamāhitaḥ* are the actual readings in the text of *Manusmṛti* 6.43cd which are rendered variantly by SP as *saṁcayiko* and *bhāvasamanvitaḥ*.)

Vasiṣṭhasmṛti: (exact place not traced)

*aranyanītyasya jīvendriyasya sarvendriyaprītinivartakasya /
adhyātmacintāgatamānasasya dhruvā hy anāvṛttir
upekṣakasya //*

*na śabdaśāstrābhiratasya mokṣo na cāpi lokagrahaṇe ratasya /
na bhojanācchādanagarvitasya na cāpi rāmyāvasathapriyasya //*

Yājñavalkyasmṛti: (3.158 and 159; though *nīrajas tamasā* for *virajaṁ samatā* at 159a)

*viśayendriyasamirodhatandrālasavivarjanam /
śārīrapariśaṁkhyānam pravṛttiṣv adarśanam //*
*virajaṁ samatā sattvaśuddhir nisprīhātā śamaḥ /
etair upāyaḥ saṁśuddhasattva योग्यमृतिं भवेत् //*

Verses 1267-1273 explain the reading in the *Mādhyandina*

recension: *śraddhāvitto bhūtvā*

साध्यस्य कर्मणस्त्यागात्सामर्थ्यादेव सिद्धतः ।
तत्साधनस्य संत्यागे श्रद्धावित्तगिरात्र किम् ॥१२६७॥

Since giving up (the performance) of an action, which is to be accomplished, is already understood (lit. established) for the purpose of conveying the giving up of its means, where is there the need of (using) the word *śraddhāvitta*? [1267]

This verse is based on the reading *śraddhāvitto bhūtvā* in the Mādhyandina recension of BU (for *saṁhīto bhūtvā*, cf. SP on this: *śraddhaiva vittam asyeti vyutpattyā vittāntaratyāgo vivakṣyate sa ca karmatyāgenaiva gatas tathācoparatādiśrutya śraddhāvitta-śruteḥ paunaruktyāt pramādapāṭho 'yam ity arthaḥ*).

मैवं दृष्टार्थविषये यत्कर्मास्यावशेषितम् ।
तत्साधनेष्वममताविधानार्थं वचो यतः ॥१२६८॥

Do not (think) so, since the statement is made with the idea of (a person's) having no feeling (about) it to be his own means towards that, viz. the remainder of the activity in relation to what is seen (as an object to be achieved). [1268]

SP supports this argument by citing *uktaṁ hi—*

*na kutyāṁ nodake saṅgo na caile na tripuṣkare /
nāgāre nāsane nānne yasya vai mokṣavit tu saḥ //*
(not traced)

SP adds: *tasmād apunarukter yuktā mādhyandinaśrutir ity arthaḥ*.

श्रद्धैव वित्तमस्येति नान्यदस्य यतस्ततः ।
श्रद्धावित्तोऽयमित्युक्तः संन्यासी सर्वकर्मणाम् ॥१२६९॥

Since only *śraddhā* 'faith' is the wealth of this person and not any other; therefore, he who has given up all activities

is described in the words *śraddhāvitto 'yam*.

[1269]

भत्वेत्यस्याभिसंबन्धः सर्वैः शान्तादिभिः पदैः ।
विधिनास्यापि चाक्षेपाद्विधितन्त्रत्वमिष्यते ॥१२७०॥

(It is to be understood that) the word *bhūtvā*¹ has connection with every one of the words beginning with *śānta*; since this also is implied by the injunction, this is to be accepted as dependent on (or, subordinate to) the injunction. [1270]

¹Read NKL (ms. p.794): *katham atra śamāder vidheyatvam iti paśyed iti vidhisannidhānād ity āha vidhineti*.

पाण्डित्यादि पुरोक्तं यत्तस्येयमुपसंहृतिः ।
प्राक्तदात्मानमेवावेदिति यच्च समीरितम् ।
सेतिकर्तव्यताकोऽथ विधिस्तस्यायमुच्यते ॥१२७१॥

Whatever is stated earlier, viz. wisdom etc., has this as its conclusion; and with reference also to what was said earlier, viz. *tad ātmānam evāvet*,¹ this is now stated as the injunction (to lay down the procedure:) thus, it should be done. [1271]

¹Cf. BU 1.4.10.

अन्वयव्यतिरेकाभ्यां यथोक्तैः साधनैर्युतः ॥१२७२॥
आत्मन्येव तमात्मानं निष्कृष्यानात्मराशितः ।
पश्येदित्यभिसंबन्धः पश्यतीत्यथवा भवेत् ॥१२७३॥

By the method of Anvaya and Vyatireka, a person, who is possessed of the (necessary) means, [1272]
should see that Ātman within himself, after seeing it apart from the entire mass of the non-Ātman (objects). The proper (*abhi*) connection would be with the verb *paśyet*¹ or *paśyati*. [1273]

Note the play on the word *ātman*.

¹This is read in the Mādhyandina recension.

In verses 1274-1282 Sureśvara points out/to the propriety in the reading of the Kāṇva recension.

विद्यर्थस्य पुरा प्राप्तेः काण्वानामनुवादतः ।
द्रष्टव्याद्युक्तितस्तस्मात्पश्यतीत्यभिधीयते ॥१२७४॥

As the (actual) injunction has been made (lit. obtained) before, the Kāṇvas have resorted to restating and there is the use of the words *draṣṭavya* and others, therefore, (the verb) *paśyati* is used. [1274]

Cf. the preceding verse wherein Sureśvara could not but bring this reading (though not necessary). Also, SP remarks that there is not any significant difference of meaning of the readings of the two recensions.

आत्मानात्मप्रधानत्वाद्ब्रह्मरूपेण नेक्ष्यते ॥१२७५॥
विशेषणत्वं स्वार्थोऽपि सत्कार्ये कारणे गतः ।
स्वात्माविद्यासमुत्थेऽस्मिन्नात्माविद्यासमाश्रयात् ॥१२७६॥

When this one (i.e. the Ātman) has arisen from ignorance about itself, by resorting to the ignorance about itself and owing to the predominance of the non-Ātmans, the Ātman, though of its own nature, who attains to the cause having the effect which is existent, is not seen as distinct (by one) to be having the form of the Brahman. [1275-1276]

देहेन्द्रियमनोधीभ्यो ह्यन्वयव्यतिरेकतः ।
मुञ्जेषीकावदुत्कृष्य पश्येदात्मानमात्मनि ॥१२७७॥

Having pulled out (i.e. distinguished) the Ātman from the body, the sense-organs, *manas* and the intellect by the method of Anvaya and Vyatircka, as (one pulls out) the sharp blade of Muñja grass, a person sees (i.e. will find) it in himself

(i.e. his inner self).

[1277]

SP refers to *caturthe*, i.e. chapter 4 of *Mīmāṃsāsūtra*, on the point that *ca* is to be understood as 'known'.

आत्मन्येव यदात्मानं विभज्यानात्मनोऽखिलात् ।
प्रपश्यति तदानात्मा न पृथग्व्यवशिष्यते ॥१२७८॥

When, after separating it from all (the mass of) the non-Ātmans, the person well (*pra*) sees a Ātman within himself; then, there does not remain any non-Ātman (any more). [1278]

स एष नेति नेत्यात्मेत्यथैतस्मात्पुरोदितात् ।
वाक्यात्सर्वमसंसर्गमात्मानं परिपश्यति ॥१२७९॥

Then, with (the help of) this Śruti statement, viz. *sa eṣa neti nety ātmā*, which was stated earlier, the person sees (i.e. understands) that all (this world) is (but) the Ātman which does not have any connection (with any other thing). [1279]

अविद्यातज्जकार्याणां प्रत्यग्दर्शनबाधतः ।
अव्यावृत्ताननुगतं ब्रह्मात्मानं प्रपश्यति ॥१२८०॥

(Then) on account of the stultification of ignorance and (all) the effects produced from it, i.e. by seeing (i.e. understanding about the nature of) the inner self, (a person) sees the Brahman, the Ātman, as not distinguished from and not similar to (anything else). [1280]

नानुत्पन्नमतो ज्ञानं नाप्यज्ञानमबाधितम् ।
कृत्स्नज्ञेयसमाप्तत्वात् किञ्चिदवशिष्यते ॥१२८१॥

Therefore, it is that this knowledge is not produced, nor also is it that ignorance is not stultified. (Thus) owing to all of what is to be known, being known (lit. obtained), there does not remain anything (yet to be known). [1281]

इयं सा ब्रह्मविद्योक्ता मधुकाण्डे पुरोदिता ।
या तस्या जन्मनः काले फलं श्रुत्याधुनोच्यते ॥१२८२॥

This is (thus) that lore of the Brahman, which was earlier discussed in Madhu Kāṇḍa and which is now called by the Śruti to be the result accruing (to one, who seeks to know the Brahman) at the time of the rise (of the knowledge mentioned above). [1282]

After restating in brief the result of the knowledge about the Ātman, verses 1283-1285 are for conveying the purport of the Śruti statement *nainam pāpmā*

In verses 1283-1285 is explained the statement of the Śruti: sarvam pāpmānaṃ tarati.

अकर्तृत्वात्मविज्ञानाद्धवस्तात्माज्ञानहेतुतः ।
नैनं ब्रह्मविदं पाप्मा तरत्यज्ञं यथा तथा ॥१२८३॥

Owing to his specific knowledge about the Ātman, which is a non-agent (of activity), i.e. that which has destroyed the cause of the ignorance about the Ātman, sin does not affect (or, overpower) the knower of the Brahman, in the way it overpowers an ignorant person.¹ [1283]

¹That is, a non-knower of the Brahman.

पाप्मशब्देन धर्मोऽपि देहोपादानहेतुतः ।
मुमुक्षोस्तदनिष्टत्वादिह निःशेष उच्यते ॥१२८४॥

With (the use of) the word *pāpmā* is here stated even merit, the whole of it, which exists in (or, is of) the seeker of liberation, owing to his still having a body and its¹ being (there) an undesired thing. [1284]

¹That is, that body's.

दुःखाभावः सदेहस्य नैवास्तीति श्रुतेर्मतम् ।
तस्मादेहोऽप्यनर्थः स्यादेहो नाशाच्च सर्वदा ॥१२८५॥

It is held by the Śruti that there cannot at all be (i.e. is not) the absence of any suffering of one, who is having a body;¹ therefore, even (being in) a body is ever² an undesired thing and also for the reason that a body perishes. [1285]

¹Cf. CU 8.12.4: *na vai saśarīrasya sataḥ priyāpriyayor apahastir asti.*

²Read SP: *sarvadety anarthapadena yujyate.*

Verses 1286-1290 explain *sarvam pāpmānaṁ tapati.*

न तपत्यथ तं कस्मात्तापकोऽप्यात्मवेदिनम् ।
पाप्मेति हेतुरधुना तत्र श्रुत्याभिधीयते ॥१२८६॥
अकर्तृत्वात्मयाथात्म्यसम्यग्ज्ञानाग्निना यतः ।
सर्वं पापं तपत्येष भस्मसात्कुरुतेऽग्निवत् ॥१२८७॥

'Well then,' (the question is asked,) Why (is it said) in the statement *na tapati* (that) there is a tormentor of (even) a knower of the Ātman? (The answer is:) 'Because there is sin in that (i.e. in the body)', (as) it is being told in the Śruti now: [1286]

(That is to say:) Since, like fire, this one burns, i.e. renders into ashes, the whole of the sin by the fire of right knowledge about the real nature of the Ātman, viz. about its not being an agent (of any activity)'. [1287]

SP adds: *ato na karma vidvaddr̥ṣṭitāpakam iti śeṣaḥ.*

स्वयमेवेश्वरः प्राह प्रपन्नाय किरीटिने ।
पुराणः शाश्वतोऽचिन्त्यः सर्वभूतानकम्पया ॥१२८८॥
यथैधांसि समिद्धोऽग्निर्भस्मसात्कुरुतेऽर्जुन ।

ज्ञानाग्निः सर्वकर्माणि भस्मसात्कुरुते तथा ॥१२८९॥

The lord, the ancient one, the eternal and incomprehensible has himself, out of his compassion for all beings, said to Arjuna who approached him (with devotion): [1288]

'As a well-enkindled fire burns the fuel to ashes, O Arjuna; so does the fire of knowledge render into ashes all of the actions (of a person).' [1289]

This is *Gītā* 4.37.

संबन्धे सति पाप्मायं स्वफलेनानुतापयेत् ।
अकर्तृत्वान्न संबन्धो विदुषोऽस्तीह पाप्मभिः ॥१२९०॥

While there is connection (of that seeker of the Brahman with a body yet), this sin would torment (his person) by its effect. (But) in the case of a knower (of the Brahman) here,¹ there is no connection of his (whatever) with sins due to his being a non-agent. [1290]

¹Cf. SP: *iheti vidyāvasthoktiḥ*.

Verses 1291-1294 explain *nainam pāpmā tapati*.

तदेतदुच्यते श्रुत्या नैनं पाप्मेति यत्नतः ।
नैनं ब्रह्मविदं पाप्मा तरति व्याप्नुते स्वतः ॥१२९१॥
तदकर्तृत्वतो हेतोर्ब्रह्मवित्तु सकारणम् ।
सर्वं तरति पाप्मानं सर्पादीन्नशना यथा ॥१२९२॥

This is thus stated by the Śruti, with particular emphasis, *nainam pāpmā* ..., since sin does not, of itself, affect (or, overcome/overpower) this knower of the Brahman [1291] (and) that (is so) for the reason of his not being the agent (of any action); as against this (*tu*), a knower of the Brahman himself affects (i.e. overcomes) all of the sins, together with their cause (viz. the actions performed through ignorance and

that ignorance itself) in the same way as a garland (affects/-overcomes the wrongly imagined) serpent etc.¹ [1292]

¹Sureśvara's use of *sarpādīn*, instead of the expected form *sarpam* is, as on a number of occasions elsewhere, owing to his tendency to coalesce more than one instance of error (*adhyāsa*) together.

आत्मयाथात्म्यवित्सोऽयं विपापो विरजाः स्वतः ।
निष्कर्मा स्याद्विपापोऽयं विरजस्कोऽप्यकामतः ॥१२९३॥
सर्वसंशयहेतोश्च प्रत्यङ्मोहस्य नाशतः ।
स्यादेषोऽविचिकित्सोऽतः सर्वसंशयवर्जितः ॥१२९४॥

This person, then, being a knower of the real nature of the Ātman, and himself (now) devoid of any sin and devoid of any blemish (*virajah*), devoid of any activity, is sinless and free from (all) blemish, on account of his being desireless.

[1293]

And, owing to the destruction of (his) delusion about (the nature of) the inner self, which is the cause of all doubts this person is without any (more) question and free from all doubts.

[1294]

This verse brings out the significance of brāhmaṇo bhavati.

एवमात्मपरिज्ञानाद्धवस्ताविद्यो भवेद्यदा ।
अनापन्नादिमध्यान्तं ब्राह्मण्यं लभते तदा ॥१२९५॥

Thus, on account of his complete knowledge of (the nature of) the Ātman, he has become one whose ignorance has been destroyed; he then obtains the nature of the Brāhmaṇa (*brāhmaṇya*), which has never a beginning, a middle stage (of awareness of the transmigratory existence) and an end (i.e. death) coming to it.

[1295]

Verses 1296-1298 relate the word Brāhmaṇa to the knower (of

the Brahman).

इमामवस्थामापन्नो मुख्यो ब्राह्मण उच्यते ।
भाविवृत्त्या स गौणस्तु प्रागतो ब्राह्मणो भवेत् ॥१२९६॥

On his coming to this state, he is called an eminent Brāhmaṇa; for, in view of what he becomes later, he was (or, is) an inferior Brāhmaṇa, herebefore. [1296]

जातौ ब्राह्मणशब्दोऽयं मा प्रापदिति तं श्रुतिः ।
व्याचष्टेऽतः प्रयत्नेन ब्रह्मलोकगिरा स्वयम् ॥१२९७॥

Here, i.e. in/by the use of the word *brahmaloka*, the Śruti has itself specifically (*prayatnena*) explained this word *brāhmaṇa*, in order that it should not go to (be understood in the sense of) the caste. [1297]

अव्यावृत्ताननुगतं ब्रह्मेत्यत्राभिधीयते ।
लोकोऽपि दृष्टिमात्रत्वात्प्रत्यङ्मात्रं निरुच्यते ॥१२९८॥

Here ¹ is stated that the Brahman is neither distinguished from nor is similar to (any other external thing); so also the word *loka* (i.e. *brahmaloka*) is explained to be the inner self alone, on account of its being only *dr̥ṣṭi* 'the seeing one', (i.e. knowing the true nature). [1298]

¹Cf. SP: *atrety akhaṇḍapadoktiḥ*.

Verses 1299-1302 explain the word *brahmaloka* as a Karma-dhāraya compound.

अन्योन्यार्थसमाप्तिवात्कर्मधारय एव तु ।
समासोऽत्र परिग्राह्यो निषादस्थपतिर्यथा ॥१२९९॥

(In the word *brahmaloka*) since (both the words in the compound) attained the meaning of each other, there is to

be understood (lit. to be taken) only a Karmadhāraya compound, as in the case of the word *niṣādasthapatiḥ*¹ [1299]

¹This means *niṣādaś cāsau sthapatiś ca* and not *niṣādānām sthapatiḥ*. Read SP for its erudite grammatical explanation of the compound.

श्रुतमेकविभक्तित्वं विभक्त्यन्तरकल्पनात् ।
लघीयोऽतीव यत्तस्मात्कर्मधारय एव सः ॥१३००॥

Since, being in the same case, which is heard, is shorter¹ than holding another case-relation; therefore, that (compound) is only Karmadhāraya. [1300]

¹That means: easier for understanding. In this context also, SP, which is so erudite, is to be read with profit.

ब्रह्मलोकमिमं साक्षाद्धे सम्राड्ब्रह्मविद्यया ।
प्रापितोऽस्यभयं पूर्वं यत्प्रतिज्ञातवानहम् ॥१३०१॥
इत्येवं याज्ञवल्क्यस्तं नृपमुक्तेन वर्त्मना ।
साक्षादनुशशासैनमित्युक्तिः स्याच्छ्रुतेरियम् ॥१३०२॥

To this very (*sākṣāt*) *brahmaloka* was the sovereign king¹ led (or taken) by (his) possession of the lore of the Brahman. '(From fear to the state of) freedom have you been led by me, O Sovereign, as I had promised you earlier.'— [1301]
thus, (did) Yājñavalkya (say) to the king. That is to say; 'In the manner stated, he instructed him directly'—this is to be taken as the statement of the Śruti. [1302]

¹This is to refer to the Kūrca Brāhmaṇa.

Verses 1303-1306 state that, after receiving instruction from Yājñavalkya, the king offered to him (the whole of) the kingdom itself.

अनुशिष्टोऽथ नृपतिर्विद्यानिष्क्रयहेतुतः ।

सोऽहमित्यादिकं वाक्यं गुरुमाह त्वरान्वितः ॥१३०३॥

Then, the king, (thus) instructed, making haste,¹ said to the preceptor, the words *so 'ham ...*, with the purpose of paying (him fees for) the lore. [1303]

¹Cf. SP: *brahmavidyānūrūpā nāsti dakṣiṇeti sūcayati tvarānvita iti*.

ब्रह्मविद्या समाप्तेयं ससंन्यासाद्वयात्मिका ।

सेतिकर्तव्यताकेयं साङ्गा निःश्रेयसे नृणाम् ॥१३०४॥

This lore of the Brahman, when obtained together with (the need of) renunciation which is of the nature of (being) the non-dual, which is complete in all respects and being (explained) in all of its subsidiary aspects becomes the cause of complete bliss for men. [1304]

निःशेषपुरुषार्थोऽयं समाप्तो ब्रह्मबोधतः ।

सर्वानर्थनिरासार्थमेतावानेव चादृतैः ॥१३०५॥

कर्तव्यो यत्नमास्थाय कृते यस्मिन्कृतार्थता ।

नान्यतः कृतकृत्यः स्यादुक्तज्ञानातिरेकतः ॥१३०६॥

(Thus) he has (now) obtained¹ completely all the ends of human life through (the acquisition of) the knowledge about the Brahman; that is only this much for the removal of all the evils (effects, or external things) and (therefore, it is) to be obtained by those who have a desire (lit. regard) for it; (the one)— on whose being obtained through every effort there results the state of one's having accomplished all the objects (to be obtained). It is not that a person will have done all that which should (or, has to) be done, through any way other than (through) knowledge, which has been already stated. [1305-1306]

¹Sureśvara has used *samāptaḥ* for *samāptavān*.

Now follows in verses 1307-1314 the discussion of BU 4.4.24.

व्याख्यातो योऽयमत्रात्मा स विज्ञानानुरोधतः ।
फलाय स्यादविज्ञात इत्येतदधुनोच्यते ॥१३०७॥

That Ātman, which has been explained here, would bring about the result in accordance with a person's specific knowledge (about it). Now is to be explained the statement *avijñataḥ*.

[1307]

पञ्चमान्त उपन्यस्तं रातेर्दातुः परायणम् ।
तद्विदस्तिष्ठमानस्येत्यस्य चेहोपसंहतिः ॥१३०८॥

At the end of fifth Adhyāya,¹ there was statement made (about) the final goal (to be accomplished) through (making of) gifts; in the words *tadvidas tiṣṭhamānasya*; and there is here the conclusion of it.

[1308]

¹Namely, BU 3rd Adhyāya.

आत्मान्तेनास्य वाक्येन स्वतस्तत्त्वमिहोच्यते ।
अत्रादवसुदानाभ्यामविद्योत्थं तु भण्यते ॥१३०९॥

In the statement, ending in the word¹ *ātmā*, there is stated here the reality of this (person who has obtained the knowledge about the Ātman), but by the word *annādavasudānābhyām*² is stated what arises out of ignorance.

[1309]

¹Namely, *sa vā eṣa mahān aja ātmā*.

²This stands for *annāda(tva)vasudāna(tva)*; such is Sureśvara's way of shortening words.

निःशेषात्रादनादात्मा प्राणान्तोऽत्राद उच्यते ।
आत्मायं कारणं यस्मात्कार्यमित्यखिलं ततः ॥१३१०॥

On account of his eating all of the foods, the Ātman which is of the nature of Prāṇa,¹ is called the enjoyer of food, since this Ātman is (thus) the cause and also all this, that is the effect. [1310]

¹Read SP: *ajñāto hi paraḥ prāṇasvabhāvaḥ kāraṇātmā sarva-kāryasaṃhartrītvād annādo vivakṣita ity arthaḥ.*

कारणेऽनुपयुक्तं यत्कार्यं तन्नेह विद्यते ।
कार्येऽप्यनुपयुक्तं यत्र तत्कारणमुच्यते ॥१३११॥

There is not here (i.e. in this world) any effect which is not dependent on¹ its cause and, further, what is not dependent on an effect is not the cause. [1311]

This verse points to the relation between cause and effect of being mutually dependent.

¹This is for *anupayukta*, as paraphrased in SP by the word *anapekṣa*.

अन्योन्यार्थव्यपेक्षित्वात्कार्यकारणवस्तुनोः ।
नान्योन्यार्थातिरेकेण सिध्येते कार्यकारणे ॥१३१२॥

Since the things, known as cause and effect, have mutual dependence; therefore, both cause and effect do not exist (or, do not get established) as one despite another thing. [1312]

वसूपकरणं प्रोक्तं तद्वदातीश्वरत्वतः ।
यतस्ततोऽज आत्मायं वसुदान इहोच्यते ॥१३१३॥

By the word *vasu* is mentioned some means (of enjoyment);¹ because a person, being a master (or, possessed of) it gives it (to another); therefore, this unborn Ātman is mentioned, here, as *vasudāna* 'a giver of *vasu*'. [1313]

¹Cf. SP: *upakaraṇam bhogasādhanam iti yāvat.*

अत्रादवसुदानाभ्यां गुणाभ्यां यः समीक्षते ।
ईश्वरं स यथादृष्टिं फलमाप्नोति मानवः ॥१३१४॥

A human being, who looks upon (or, conceives of) the lord (i.e. the Ātman) as being possessed of the qualities of being an eater of food and a giver of wealth, obtains a result in accordance with this (his) seeing. [1314]

This is the meaning of *vindate*

Verses 1315-1333 pertain to (or, discuss) BU 4.4.25.

इत्येवमयथावस्तुदर्शिनः फलमीरितम् ।
यथावस्तुदृशोऽप्येवं यथा रज्ज्वादिदर्शिनः ॥१३१५॥

Thus is mentioned the result which accrues to one who sees the (real) thing as what it is not.¹ So also is stated the result accruing to one who sees the (real) thing as it is, as, for example, (the result coming) to one who sees the rope etc.² [1315]

¹That is, as being of another nature.

²This refers to *abhaya* in two ways: (i) freedom from every cause of fear, viz. *avidyā* and its effects, and (ii) the absence of fear which would arise out of the notion of a serpent etc. This is once again where Sureśvara uses *ādi* 'etc.' because of his memory of other errors. Also, the last word is a cryptic statement in expectancy of the word *mithyāśarpāda*.

ये यथा मां प्रपद्यन्ते तांस्तथैव भजाम्यहम् ।
इति चाहेश्वरो वाक्यमुक्तार्थप्रतिपत्तये ॥१३१६॥

In order to convey this (very) matter (or, thought), which is (thus) stated, the Lord made the statement: 'I take to them

in the same way as they take me'.¹

[1316]

¹*Gītā* 4.11.

यथातत्त्वं तु योऽज्ञातं वस्तु साक्षात्प्रपद्यते ।
यथावस्त्वेव तस्यापि फलं स्यादिति भण्यते ॥१३१७॥

If a person perceives some (earlier) unknown thing directly as having the nature which it (really) has, what is said (in respect of him, i.e. the knower of the Brahman) is: 'In the case of him also, there will accrue a result which is according to the nature of the thing (referring to the Brahman), (as he has seen).'

[1317]

SP invites attention to the Saṁdhi in *yo ajñātam*.

काण्डद्वयस्य वा योऽर्थः स संक्षिप्याभिधीयते ।
स वा इत्यादिवाक्येन सारार्थस्य जिघृक्षया ॥१३१८॥

Or, what was the purport (lit. meaning) of two Kāṇḍas¹ is told here by abbreviating (the same) in the sentence *sa vā ...*; (this is done) with the desire of taking up (i.e. bringing out) the essential sense of it.

[1318]

¹That is, Madhu Kāṇḍa and Muni Kāṇḍa of BU.

अविद्यावान्पुरा योक्तो मृत्युजन्मादिसंसृतिः ।
स वा इति गिरा सोऽत्र स्मार्यते ब्रह्मसंगतौ ॥१३१९॥

In the words *sa vā ...* the one, having association with (lit. being possessed of) ignorance, who has been mentioned earlier, who is (affected by) transmigratory existence comprising death, birth etc.¹, and who is now² in connection (i.e. has now a feeling of identity) with the Brahman, is brought back to the listener's memory.

[1319]

The expression *yoktaḥ* in the first line is an instance of double Samdhi of *yaḥ uktaḥ* > *ya uktaḥ* > *yoktaḥ*. This kind of Samdhi is a Vedic usage – cf. SP on this.

¹This is reference to the other (known) *bhāvavikāras*.

²Literally here in this last Kaṇḍikā of BU.

स वा एष पुरोक्तेन यो वाक्येन प्रकाशितः ।
प्रध्वस्ताज्ञानतज्जः सन्परां निर्वृतिमागतः ॥१३२०॥

The person, who was shown (i.e. pointed out) ¹ by the earlier statement *sa vā eṣaḥ*, attained great delight, being the one with his ignorance and its effects destroyed. [1320]

¹Add: by the word *loka*.

महानित्यभिधानेन सत्यज्ञानादिलक्षणम् ।
ब्रह्मैव प्रोच्यते साक्षात्प्रत्यगात्मविशेषणम् ॥१३२१॥

By (the use of) the expression *mahān* is mentioned the Brahman which has the characteristics of being truth, knowledge etc. (i.e. endlessness); the one, having as its attribute, the directly perceptible inner self. [1321]

ब्रह्मैवात्मा स्वतोऽबोधाद्ब्रह्मैव प्रकाशते ।
जरादिधर्मवांस्तस्माद्ब्रह्मणैव विशेष्यते ॥१३२२॥

The Ātman itself is the Brahman and the same, owing to its non-knowing, (i.e. not being known in its true nature) reveals (itself) as the non-Brahman; being possessed of the qualities of old age etc., and (is thus) distinguished ¹ from the Brahman. [1322]

¹Though such distinguishing is only unreasonable.

प्रमान्तरानधिगता ब्रह्मता प्रत्यगात्मनः ।
प्रत्यक्त्वं ब्रह्मणस्तद्वद्वचसैव प्रबोध्यते ॥१३२३॥

Since the state of having become the Brahman in the case of the inner self is not obtained (known by it) through any other means of knowledge; (therefore,) the existence of the Brahman, in the form of the inner self, is revealed (or, made known) only by the statement in the Śruti. [1323]

अहं ब्रह्मेतिवाक्योत्थविज्ञानात्प्रत्यगात्मनः ।
 एवस्तेऽज्ञाने सकार्येऽथ यद्रूपं तदिहोच्यते ॥१३२४॥

Here is described that form of the inner self which results from its specifically knowing (about its own nature), which arises from the sentence *aham brahma* and when its ignorance, together with the effect of the same; is destroyed. [1324]

रज्जुः सर्पादिनेवात्मा विनाविद्यां न जायते ।
 कार्यात्मना यतस्तस्मादात्माज इति भण्यते ॥१३२५॥

Since the Ātman does not become born without ignorance, which is in the form of its products; as a rope cannot appear as (having the form of) a serpent (without the knowledge about it to be so); therefore, the Ātman is mentioned as unborn. [1325]

This explains the meaning of the word *aja*.

सर्वभावविकाराणां जन्म मूलं यतस्ततः ।
 सर्वेषां प्रतिषेधः स्यान्निषेधादात्मजन्मनः ॥१३२६॥

Since origination is the root-cause of all the modifications of things; therefore, there is rejection of them all by the denial of the birth of the Ātman. [1326]

तथापि ताञ्श्रुतिर्यत्नाज्जरादीन्प्रतिषेधति ।
 स्वाभाविकत्वाशङ्कायाः प्रतिषेधस्य सिद्धये ॥१३२७॥

Yet, the Śruti specifically rejects (the existence of) those (qualities, viz.) old age etc. (in the Ātman), for establishing the denial of the (possible) doubt about their belonging to the nature (of the Ātman). [1327]

कालात्मना ह्यवच्छेदात्रायं कालंजरत्वतः ।
देहादिवज्जरामेति तस्मादात्माजरः स्मृतः ॥१३२८॥

Since, by its capacity to reduce time to nothingness, this Ātman does not come to (have) old age, as does a body, by becoming limited through time; therefore, the Ātman is known as ageless. [1328]

सर्वस्य परिणामस्य हानोपादानमात्रतः ।
जराजन्मनिषेधेन सर्वोऽतोऽत्र निषिध्यते ॥१३२९॥

As every modification is being given up or being assumed, all (modifications) are rejected here (in the case of the Ātman) by the rejection of old age and birth. [1329]

परिणामोऽस्य येनान्त्यः श्रुत्येह प्रतिषिध्यते ॥१३३०॥
देहस्थितेरवसितिर्मृतिशब्देन भण्यते ।
तन्निषेधोऽमरोक्त्यात्र नित्यस्यात्मन उच्यते ॥१३३१॥

Since it is the last of the modifications that is denied here (in the case of the Ātman) by the Śruti; [1330]
therefore, the end of the existence of a body is expressed by the word *mṛti*. Here, by (the use of) the word *amara*, in respect of the never-perishing (or, eternal) Ātman, is expressed the rejection of that (viz. *mṛti*). [1331]

नाजस्यापरिणामस्य मरणं जगतीक्ष्यते ।
अजोऽजरश्च तेनोक्तोऽमरश्चैष ततः स्मृतः ॥१३३२॥

There is not seen in the world the death of the Ātman, which is not born and is devoid of (all) modifications; therefore,

it is mentioned as unborn and ageless and is known, on that account, as undying also. [1332]

परिणामात्मको मृत्युरमरोक्त्या निवारितः ।
अमृतोक्त्याथ नाशोऽस्य वार्यते यो निरन्वयः ॥१३३३॥

(Thus, the idea of) death, which is of the nature of a modification, is set aside by the word *amara*; then, by (the use of) the word *amṛta* is set aside the absolute destruction of it as well. [1333]

अविनाशीत्यपि तथा विनाशद्वयमात्मनः ।
श्रुत्या निषिध्यते साक्षात्प्रत्यक्कौटस्थसिद्धये ॥१३३४॥

So also, by (the use of) the word *avināśī* is rejected directly, by the Śruti, the two destructions (viz. absolute and partial) of the Ātman, establishing thereby the immutability of the inner self. [1334]

कामकर्मतमोभावादमरोऽमृत एव च ।
तत एवाभयः प्रत्यङ्भयं हि तदबोधतः ।
कारणस्य निषेधोऽतो भयकार्यनिषेधतः ॥१३३५॥

The Ātman is only non-perishing and also deathless because of the absence in it of desire, action and ignorance. Only as a result of this (*tata eva*), it is free from (any kind of) fear—indeed, the inner self can have fear (only) because of the absence of knowledge in it. Therefore, there is rejection of the cause (of fear) conveyed by the denial of (the existence of) the effects of (or, what is) fear. [1335]

कुतोऽभयत्वसंसिद्धिः प्रतीच इति शङ्किते ।
ब्रह्मेत्याहात्मनस्तत्त्वं ब्रह्म त्वभयमेव हि ॥१३३६॥

When (or, if) it is doubted: 'How (or, for what reason) can there be established the inner self's freedom from fear?', the

Śruti has answered: 'That is, this is so, because the Brahman is the nature of the Ātman and the Brahman is fearlessness itself'.

[1336]

अहं ब्रह्मेत्यतः साक्षाद्यथोक्तेनैव वर्त्मना ।
भयहेतोर्निरासेन स ब्रह्माभयमश्नुते ॥१३३७॥

Therefore, by the removal of the cause of fear by/through the direct (statement in the Śruti) *aham brahma*, which is (understood) in the way as told, he (i.e. seeker of the knowledge of the Brahman) secures freedom from fear. [1337]

This explains *abhayaṃ hi*

सर्वोपनिषदामेष संक्षिप्तोऽर्थ इहोदितः ।
उत्पत्त्यादिविकल्पोऽयमस्यैव प्रतिपत्तये ॥१३३८॥

Here is (thus) stated the idea (*artha*) of all the Upaniṣads, in brief: Such various notions as the origin etc. of this (inner self are also stated) for the purpose of (one's getting) the knowledge about this one. [1338]

एकप्रभृतिसंख्येयं रेखासंकेतवर्त्मना ।
प्रतिपत्तिरसंख्येयवस्तुनः स्याद्यथा तथा ॥१३३९॥
सर्वप्रमाणविषयलङ्घिनोऽकार्यकारण-
वस्तुनः प्रतिपत्तिः स्याज्जन्मादिद्वंसवर्त्मना ॥१३४०॥

The reference to the numbers one and others is made only by noting down various ideas (about numbers) in a row or series (with the intention) that there arises (in one) the knowledge of the (real) thing which cannot be counted (or, by pun, cannot be described); [1339]
also, there arises (in one) the knowledge of the (real) thing that is neither an effect nor a cause by the way of destruction of (the notions, such as) the origin etc. and as what transgresses (or, is beyond) all the objects of various means of knowing

(them).

[1340]

संख्येयत्वं न रेखायाः संख्यात्वं वाञ्छसेष्यते ।
तदध्यारोपगत्यैव तथापि प्रतिपत्तये ॥१३४१॥

(Though it is pointed out) neither countability (or, describ-
ability) nor being a number can be seen (lit. is noticed) in
a line; yet (it is to be understood) as resulting from
superimposing (the same on it), (yet that is done) to the effect
that one can understand it (i.e. what a line is). [1341]

यथैवमवगच्छन्ति प्रध्वस्ताशेषकल्पनम् ।
आत्मानं स्थितिजन्मादिकल्पनोपायमात्रतः ॥१३४२॥
पत्रकज्जलरेखाभिर्यथा वाध्यासवर्त्मना ।
वर्णाञ्जानन्त्यकारादीन्पत्रादिभ्यो विलक्षणान् ॥१३४३॥
तथोत्पत्त्यादिकाध्यासवर्त्मना तद्विलक्षणम् ।
जन्मादिहेतुध्वंसेन नेतीति ब्रह्म गम्यते ॥१३४४॥

Since they thus understand the Ātman as having all (false)
notions about it destroyed (or, removed), only by means of
(variously) imagining such notions as its sustenance, birth etc.;
[1342]

(imagination takes place) in the same way as there are known
by means of lines (drawn) with collyrium on a piece of
paper/leaf, i.e. by way of superimposition, different letters such
as *a*, though they are different from (that piece of) paper/leaf,
[1343]

so also, by way of (or with the help of) such superimposition(s)
of origin etc. on it and through the destruction of the causes
such as origination, which are (in reality) different from the
same, the Brahman becomes known as in the word *neti neti*.
[1344]

इति काण्डद्वयोक्तोऽर्थः संहृत्य सफलोऽखिलः ।
इह प्रदर्शितो वाक्ये तत्समाप्तिविवक्षया ॥१३४५॥

Thus is shown (i.e. presented) here in this sentence the entire thought which has been stated in these two Kāṇḍas,¹ after collecting the same, together with the results from the same, for the purpose of (drawing) a conclusion (from it). [1345]

¹That is, Madhu Kāṇḍa and Muni Kāṇḍa.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके चतुर्थाध्यायस्य
चतुर्थं ब्राह्मणम् ॥४॥

BUBV 4.5

निरधारि पुरा ब्रह्म मधुकाण्डागमेन यत् ।

याज्ञवल्कीयकाण्डेन तद्युक्त्याऽथोपपादितम् ॥१॥

1. Now (in this section of Yājñavalkya¹) is supported with reason (the thought on) the Brahman which is earlier ascertained by the tradition (noted) in the Madhukāṇḍa²

NOTES

It is useful to note how Ānandagiri points out the relation of 4.5 to the preceding section of BU. He says : In BU 4.4 which precedes this section, were narrated the evil, the cause of evil, the aim of human beings, and the cause of human end (viz. liberation) with the help of the Śruti. Further, it was pointed out that the entire Veda teaches the way to obtaining the final end, which is elaborately described by the Śruti itself and that the Brahman, described as *sopādhika* and / or *nirupādhika*, the knowledge of it and the fruit obtained thereby were also stated. Therefore, one may doubt that this section would be of no use, therefore, Sureśvara states the purport thereof.

It is only proper that the necessary logical support to the Śruti should be pointed out. Apparently, Sureśvara follows Śaṅkara who has stressed the need of logical reasoning in 'tadavirodhitarkopakaraṇā vedāntavākyamīmāṃsā' (cf. BUB 1.1.1, p.6) and 'āgamavaśatarka' (cf. BUB 2.1.11, p.194)

1. The Yājñavalkyakāṇḍa (= Munikāṇḍa) corresponds to BU ch. 3-4.

2. The Madhukāṇḍa corresponds to BU ch. 1-2. The word *āgama* means tradition recorded in the Śruti texts. Cf. verses 5-6 below.

जल्पन्यायेन तत्पूर्वं पञ्चमे प्रतिपादितम् ।

वादन्यायेन तद्भूयः षष्ठे सम्यक्प्रपञ्चितम् ॥२॥

2. It has been exposed first in the fifth (chapter, viz. BU ch. 3)¹ in the way of the dialectic mode, and (once) again fully elaborated in the sixth (chapter, viz. BU ch. 4) by way of the assertion.

NOTES

Sureśvara thus refers to the two parts of the logical argument in the *Munikāṇḍa* (BU ch. 3-4); one section adopts the method of *jalpa* and the other, *vāda*. *jalpa* is defined as *yathoktopapannaś chala-jātīnigrahasthānasādhanopālambho jalpaḥ* in the *Gautama Sūtra* 1.2.2 or *jalpas tu yathāsambhavam sarva-nigrahāṇām adhikaraṇam parapakṣe dūṣite svapakṣasthāpanaprayogā-vasānaś ceti bodhyam* in the *Tarkabhāṣā pariccheda* 44 (the *Nyāyakośa*, p. 257) and *vāda*, *pramāṇatarkasādhanopālambhaḥ siddhānta-viruddhaḥ pañcāvayavopapannaḥ pakṣapratipakṣaparigraho vādaḥ* in the *Gautama Sūtra* 1.2.1 (the *Nyāyakośa*, p. 672). And MĀDHA-VĀNANDA (p. xi) says, “....logical explanation of that great doctrine of Advaita through the employment of the dialectic modes of argumentation known as *jalpa* (arguing constructively as well as destructively for victory) and *vāda* (arguing for truth).”

1. Regarding the concordance, see remarks in the Preface.

अथाधुना निगमनस्थानीयमिदमुच्यते ।

मंत्रेयीब्राह्मणं श्रुत्या तथा च न्यायविद्वचः ॥३॥

हेतुक्वित्तः प्रतिज्ञायाः सिद्धार्थाया यदुत्तरम् ।

वचो निगमनं तत्स्याद्वाक्यस्यावयवोक्तिभाक् ॥४॥

3-4. Now, the Śruti declares this Maitreyī-section (viz. BU 4.5) as the *nigamana*.¹ For, in that sense there is a statement of logic. That later statement of the enunciation which is (earlier) proved by the statement of the cause is called *nigamana* ‘conclusion’. It should form a part of (the whole) statement (of the syllogism).

NOTES

Cf. the *Nyāyasūtra* 1.1.39 : *hetvapadeśāt pratijñāyāḥ punar-vacanam nigamanam*, “*nigamana* is the re-statement of the proposition, pointing out the reason.”

vākya means *mahāvākya* consisting of five parts, i.e. syllogism; these five parts are: *pratijñā*, *hetu*, *udāharāṇa*, *upanayana* and *nigamana*.

The conclusion is a restatement of the proposition, but now standing proved.

ससंन्यासाऽऽत्मविद्या या मधुकाण्डागमोदिता ।

उपपत्तिप्रधानेऽपि सैव मोक्षेऽवसीयते ॥५॥

5. The lore (about the nature) of the Ātman, together with (its means viz.) renunciation which has been discussed by the tradition (of the Vedāntins recorded) in the Madhukāṇḍa is itself shown to culminate into liberation, even, in (the Munikāṇḍa which has) the predominance of reasoning (in it).

NOTES

Another purpose served by this section is now stated. The Maitreyī-section in the Madhukāṇḍa (viz. BU 2.4) stated the knowledge of the Ātman together with renunciation as the means to liberation, on the strength of tradition (of the Vedāntins); in this Munikāṇḍa also it is understood that the knowledge of the Ātman is the cause of liberation, but on the strength of reasoning.

आत्मज्ञानं ससंन्यासं मोक्षायेत्यागमाद्यथा ।

युक्तितोऽपि तथा ज्ञेयमिति चेहोपसंहृतिः ॥६॥

6. (And such) is the conclusion here (i.e. in this chapter) : Just as the knowledge of the Ātman from its description in the Śruti leads to (lit. is for) liberation,¹ so can it be known from reasoning also.

NOTES

One might ask: In respect of the questions of Kahola and others (cf. BU 3.5 ff.) this knowledge was proved by reasoning, what then is the use of this section? The verse is an answer to this objection. Since this section intends to conclude the matter already established by the Śruti and reasoning, it is

not useless. The two *dharma*s mentioned in the example (*udāharaṇa*) are proved to have *sādhya-sādhana* relation : (In *parvato vahnimān, dhūmāt, yathā mahānase, vahnimat* is *sādhya* and *dhūma* is *sādhana* (*sādhaka, siddha*). The conclusion is restated for denying the opposite view in respect of the *sādhya* — this brings the significance of the word *upasaṁhṛti* in the verse.

1. SP supplies *jñānam* after *mokṣāyeti* in the first line (cf. *itiśabdād ūrdhvaṁ jñānam ity adhyāhāraḥ*) and, accordingly, one could translate the first line as 'it is to be understood that'.

व्याख्यातत्वात्पदार्थानां चतुर्थेऽध्याय एव तु ।

तद्व्याख्यानाय यत्नोऽतो न भूयः क्रियतेऽधुना ॥७॥

7. But, since the meanings of the (various) words (relevant upon the subject) have been (already) explained in the fourth chapter (viz. BU 2.4), no effort is to be undertaken here to explain them.

NOTES

1. The fourth chapter means the *Bṛhadāraṇyaka* ch. 4, i.e. BU ch. 2, (cf. remarks in the Preface); here the Maitreyī-section of BU ch. 2, i.e. BU 2. 4, is meant.

शब्दस्यैवाऽऽत्मनो जन्म चतुर्थे प्रतिपादितम् ।

सर्वोपसंहृतेरत्र यागादेरपि भण्यते ॥८॥

8. In the fourth chapter,¹ it is stated that the word is born of the Ātman. (And) all (activity such as) the sacrifice etc. is also (to be taken as born of the Ātman), since here (i.e. in the Ātman) is all concluded (withdrawn).

NOTES

If the meaning of the word is not to be stated, this section should be taken as completed here because the purport has been already mentioned in verses 1-6. Therefore for the removal of such a doubt is mentioned the purport of the sentence *iṣṭam hutam āśramam....* (BU 4.5.11).

1. See note (1) on the preceding verse.

शब्दोऽयं बहुधा भिन्नो नामैव परमात्मजम् ।

यागदानादिकं कर्म रूपं लोकगुरःसरम् ॥९॥

9. 'Word' (i.e. the Śruti) which is variously divided is but the name that is born of the highest Ātman. (And) the activity

such as sacrifice, giving of gifts etc. which precedes the word *loka* is its form.

NOTES

'Word' is divided into different parts : Śruti, Brāhmaṇa etc. But these are nothing but different names of one and the same Ātman. This is the purport of the sentence *yad ṛgveda ... vyākhyānāni* (BU 4.5.11), also of the sentence *iṣṭam hutam āsitam ... pāyitam* the purport is similar, viz. all that is born of the highest Ātman refers to the form of the Ātman. The sentence *ayam ca lokaḥ niḥśvasitāni* (BU 4. 5. 11) concludes the list of all that is said to be born of the highest Ātman. This refers to the section of creation.

सर्वमेतदयत्नेन तत एव विनिःसृतम् ।

अनन्यभूतं तेनातः साक्षात्तत्त्वं प्रगीयते ॥१०॥

10. All this has proceeded only from that without any effort (on the part of that) and is, therefore, not different from that (viz. the Ātman). (Thus) is stated here the reality of all (which is clearly) perceptible.

NOTES

The first line presupposes the question : 'Since there is total absence of effort on the part of the highest Ātman, how does the world which is of the nature of name, form and action arise from the highest Ātman?' and answers the same thus: The Veda also is included in this world created from the Ātman without any effort on its part. Let this be similar to the illusory creation only in that the rule *sarvadharmopapattēś ca* (the *Brahmasūtra* 2.1.37) applies to it. The rule is: Although an actual change is impossible in respect of the Ātman having no attributes, an apparent modification is possible. Because of ignorance, all the attributes are superimposed on the Ātman which is supposed to be the cause for such a creation. The second line points to the significance of this statement about creation : The oneness of the apparent *kārya* with the *apparent kāraṇa*—in reality there is (and there remains) but one Ātman—this is shown by the word *ataḥ*; that is to say, there is no effect apart from the cause.

अन्तर्बहीरसघनः सैन्धवस्य घनो यथा ।

विज्ञानघन एवायं विज्ञानात्मा तथैव च ॥११॥

11. As a lump of salt is both inside and outside the lump of (but one) taste, so is this knowing Ātman (but) a mass of consciousness.

NOTES

This is the meaning of *yathā saindhavaghanaḥ kṛtsnaḥ prajñā-naghana eva* (BU 4.5.13).

स्वविकारोपसंश्लेषाद् विज्ञानात्मत्वमेत्यतः ।

तद्धेतुनाशात्प्रकृतिं स्वामेव प्रतिपद्यते ॥१२॥

12. It becomes the knowing Ātman owing to its close contact with the modification(s)¹ of its own². Therefore, after the destruction of the cause of it (viz. the contact which was caused by ignorance) it gets back its own nature, viz. pure consciousness.

NOTES

The first line explains the sentence : *etebhyo bhūtebhyaḥ samutthāya* (BU 4.5.13) and the second, *tāny eva anuvinaśyati* (BU 4.5.13). When sentiency is related to the intellect etc., the nature of the Jivātman exists. By overcoming ignorance through the knowledge of its own, the Jivātman begins to shine in its true nature of the Brahman.

1. *svavikāra* means 'the intellect etc.'

2. The word *sva* means the *pratyagātman* 'individual consciousness.' (SP)

परिणामनिषेधः स्यादविनाशिगिराऽऽत्मनः ।

अनुच्छित्तिगिरा नाशो वार्यते यो निरन्वयः ॥१३॥

13. In the word *avināśi*, there is rejection (of the idea of any) transformation of the Ātman and by the word *anucchitti*, is warded off the complete destruction.

NOTES

Commenting on *avināśi vā are'yaṁ ātmānucchittidharmā* (BU

4.5.14), Sureśvara points out that the two words are not tautology (*apunarukti*).

मात्रासंसर्पजस्त्वेष यो विनाशाविधर्मवान् ।

अविद्यामात्रहेतूत्थो रज्जुसर्पादिवन्मतः ॥१४॥

14. But this one that is born due to the contact with the sense-organs, and has the properties, perishing etc.¹ is understood as one arisen from but (one) cause, viz. ignorance, like a serpent arising from a rope etc.

NOTES

Incidentally, Sureśvara explains the reading *mātrāsaṃsargas tv asya bhavati* in the Mādhyandina recension of this Upaniṣad.

1. Here, *mātrāsaṃsargaja* is *viśeṣa* and *jiva*, *viśeṣya*.

ब्रह्मैवैकः स आत्मोक्तो ह्याध्यायेषु चतुर्ष्वपि ।

उपायमात्रभेदोऽत्र न तूपेयः प्रमिद्यते ॥१५॥

15. In all the four chapters of the Upaniṣad, it is declared that the Ātman (i.e. Jīvātman) is said to be only the Brahman¹. There is differentiation only as regards the means (to understanding the real nature of the Ātman) but not as regards the goal (viz. the Ātman that is to be known).

NOTES

In various chapters of this Upaniṣad, are mentioned various means to obtaining the Brahman. But this should not lead one to say : The Brahman is not homogeneous, but *anekarasa* 'heterogeneous'. To such a doubt this verse is an answer.

1. That is, nothing else or not different from it.

नेति नेति चतुर्थोऽसौ यथैव प्रतिपादितः ।

नेतीति पञ्चमेऽप्येवं निर्विकल्पोऽवधारितः ॥१६॥

षष्ठेऽपि जनकाख्यानप्रारम्भे तद्वदीरितः ।

निर्विकल्पो यथैकोऽर्थो नेतीत्यत्रोपसंहृतः ॥१७॥

नेतीति शास्त्रावसितौ तथैवात्मोपसंहृतः ।

एकरूपमतस्तत्त्वं सर्वत्रैव विवक्षितम् ॥१८॥

16-18. As it is described in words '(The Brahman is) not this, not this' in the fourth chapter (viz. BU 2.3.6) so is that ascertained in words 'not this' in the fifth chapter (viz. BU 3.9.26) and having no specifications¹. In the beginning of the narrative of Janaka of the sixth chapter (viz. BU 4.2.4 also), (it is) described in the same way; there (also) it is concluded in words 'not this' and one having no specifications. Just so, in the end of the Śruti (viz. Maitreyī-section, BU 4.5.15) it is concluded that the Ātman (which is to be described as) 'not this'. Therefore (i.e. thus), it is everywhere intended to point out that reality is of but one form.

NOTES

Sureśvara points out that the goal is the same; though there are many ways to it as stated in various parts of the BU, it is mentioned as *eṣa neti nety ātmā* (BU 4.5.15).

1. The word *vikalpa* refers here to some definite attributes etc.

नेति नेत्यात्मकात्तत्त्वात्प्रकाराणां शतैरपि ।

निरूप्यमाणे नान्यादृग्यस्मात्तत्त्वं समीक्ष्यते ॥१६॥

तर्कतो यदि वा वाक्यादय एवेदमेव तु ।

नेतिनेत्यात्मविज्ञानममृतत्वंकसाधनम् ॥२०॥

ससंन्यासं विनिश्चेयमिति शास्त्रस्य संग्रहः ।

अमृतप्राप्तयेऽलं स्यात्साधनान्तरनिःस्पृहम् ॥२१॥

यथोदितमिदं ज्ञानं सहकार्यन्यसाधन-

निरपेक्षमलं मुक्त्या इत्येतदभिधीयते ॥२२॥

19-22. Since they have not seen the reality as anything other than what is of the nature of (being grasped as) 'not this, not this', even if it is explained in hundreds of ways; therefore, one has to obtain (lit. ascertain) this very knowledge of the Ātman alone as the mean to immortality¹, together with renunciation, whether by means of reasoning or from the Śruti (statement). Such is the gist of the whole Śruti². This knowledge as stated (herein) is capable of securing (i.e. effecting/bringing about)

immortality without expecting (help of) any other means. It is so stated (in the Śruti) that (this knowledge) non-expectant of any other ancillary means is capable of achieving (for one) liberation³.

NOTES

1. It is repeatedly spoken that the knowledge of the non-dual Ātman which has no attribute whatever, together with renunciation, is the cause of liberation.

2. The word *saṁgraha* means 'a brief statement of the whole teaching'; cf. Bharata's *Nāṭyaśāstra* 6.9 : *vistareṇopadiṣṭānām arthānām sūtrabhāṣyayoḥ nibandho yaḥ samāsenā saṁgraham taṁ vidur budhāḥ*||

3. This is based on the Śruti sentence : *etāvad are khalv amṛtatvam*. Immortality consists in only knowing the oneness; after knowing, one does not have to do anything else.

एतावदर एवैतदमृतत्वस्य सिद्धये ।

प्रत्यग्याथात्म्यविज्ञानं नान्यत्किञ्चिदपेक्ष्यते ॥२३॥

23. In this statement *etāvad are khalv...* is mentioned the knowledge of the real nature of the individual consciousness as (sufficient) for attaining immortality. It does not expect anything else¹.

NOTES

1. I follow the variant reading *apekṣate* (recorded in footnote no. 1); that expresses the original idea better and also explains *nirapekṣam* in the previous verse. But following *apekṣyate*, one could translate alternatively : In this statement *etāvad are khalv...* is mentioned the knowledge of the real nature of the individual consciousness as (sufficient) for attaining immortality. (In this context), nothing else is expected.

इत्युक्तार्थपरिज्ञानदाद् यार्थं सर्वसाधनम् ।

कर्माणि चापनुद्याऽऽशु प्रवद्व्राजाविचारयन् ॥२४॥

24. Then, in order to reaffirm that the knowledge which has been mentioned becomes the means to all (human endeavour

towards liberation) after having set aside all the action, he renounced immediately¹ after this conversation, not (even a little) thinking² (i.e. hesitating).

NOTES

This is the explanation of *vijahāra* (BU 4.5.15).

1. It is suggested that on the occasion of renunciation, there is on the part of a knower, no necessity to look to any injunction.

2. The words *āśu* (in verse 24) and *tvarayā* (in verse 26) point out that the seeker of the knowledge of the Ātman does not have to perform any rite for renunciation and that renunciation of all desires in action is a necessity for such knowledge.

न केवलमिदं ज्ञानं कर्मसाधननिस्पृहम् ।

निःशेषकर्मसंन्यासापेक्षाऽपि स्याद्यतो मुनिः ॥२५॥

सम्यग्विज्ञाततत्त्वत्वात्कृतार्थोऽप्यखिलं स्वयम् ।

तत्याज कर्म त्वरया बाङ्मनःकायसाधनम् ॥२६॥

25-26. Since not only is this knowledge non-expectant of (all) action and means, but there is (together with it) the expectation of abandonment of entire action also, therefore, the sage, though he had accomplished the objects (of desire) on account of having well understood the nature of that (reality), hurriedly¹ himself gave up (all) action which has speech, *manas* and body as the means.

NOTES

1. See note (2) on the previous verse.

अतोऽवगम्यते नूनं न कर्म सहतेऽखिलम् ।

आत्मज्ञानं यतोऽत्याक्षीत्सम्यग्ज्ञानोऽपि तन्मुनिः ॥२७॥

27. Since the sage possessed of the right knowledge (of the Ātman) gave up all action, from this, it is understood that the knowledge of the Ātman does not tolerate whole action.

NOTES

The implication is that knowledge and action stand in contradiction.

कर्महेतुविरुद्धत्वात्सम्यग्ज्ञानस्य कर्मणा ।

विरोधोऽप्यर्थमेवातस्तस्यक्तं ज्ञानशालिना ॥२८॥

28. Since right knowledge is opposed to the cause of (any) action (viz. ignorance), this (said) contradiction (of knowledge to action) is to the extreme. Therefore it is renounced by the sage who excelled with knowledge.

एवं काण्डद्वयेनेयं सफलताऽनवशेषतः ।

सर्वसंन्यासनिष्ठा च ब्रह्मविद्या समीरिता ॥२९॥

29. Thus, in the *Madhukāṇḍa* and the *Munikāṇḍa*, are stated in full the lore about the Brahman to be fruitful and (that it is) resting on complete renunciation.

NOTES

Thus is restated the purport of both the *kāṇḍas*.

एतावानुपदेशः स्याद्वेदे ध्येयोर्थिनां नृणाम् ।

कृतकृत्यो भवेत्क्षिप्रमेतज्ज्ञात्वाऽनुशासनम् ॥३०॥

30. (Only) this much is the instruction in the Veda¹ for man who is desirous of the highest good²; having understood this instruction, he would immediately become one who has accomplished his end³.

NOTES

1. This suggests that there is no need of any other instruction in order to attain liberation.

2. The instruction about paying homage to the temple etc. is possible for persons who are not striving for liberation.

3. This suggests that there is expectancy of no other means to bliss.

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.1

समाप्तं याज्ञवल्कीयं काण्डमैकात्म्यनिष्ठितम् ।
खिलकाण्डमथेदानीं यथावदुपवर्ण्यते ॥१॥

The Kāṇḍa of Yājñavalkya which dealt with the singleness of the Ātman is concluded. Now then is explained (lit. described) the Khila Kāṇḍa 'Kāṇḍa of the remainder'. [1]

संभावितं न यत्पूर्वं कर्मविज्ञानकाण्डयोः ।
तदत्र भण्यते सर्वं खिलकाण्डत्वहेतुतः ॥२॥

Whatever was not treated earlier in the two Kāṇḍas pertaining to activity and knowledge is now all (of it) stated here, since this forms the remainder (of the same). [2]

अपास्तनिखिलध्वान्ततज्जं ब्रह्मोपवर्णितम् ।
पूर्वैश्चतुर्भिरध्यायैर्यद्विः कैवल्यसिद्धये ॥३॥

The earlier four Adhyāyas dealt with (lit. described) the Brahman from which all ignorance about and the product of it (viz. ignorance) were far removed (lit. thrown away)—(that Brahman) whose knowledge results into the achievement of liberation. [3]

सोपाधिकस्य तस्यैव व्यवहारानुपातिनः ।
उपासनानि वाच्यानि यान्यनुक्तान्यतः परम् ॥४॥
प्रकृष्टाभ्युदयार्थानि क्रममुक्तिकराणि च ।
क्रियाभिश्चाविरुद्धानि वाच्यानीति परा श्रुतिः ॥५॥

Hereafter are stated those (modes of) worship of that same

(Brahman), which is delimited by adjuncts and which is subjected to worldly dealings and then such (modes of) worship as were not stated (earlier). [4]

The subsequent portion of the Upaniṣad (begins with the purpose) to state (those modes of worship) which are for the sake of excellent worldly prosperity, which cause gradual liberation and which are not opposed to (ritual) activities. [5]

This is in brief the statement of the contents of the Khila Kāṇḍa.

तथोकारं दमं दानं दयामित्यादिकानि च ।
सर्वोपास्त्यङ्गभूतानि वक्तव्यानीति यत्यते ॥६॥

So then (*tathā*) an effort is made to state *om*, *dama* 'restraint' *dāna* 'gift-making' and *dayā* 'compassion' etc.¹ which have been the ancillaries of all modes of worship. [6]

¹By the word etc. are understood the future (i.e. after-departure) movement of one, the oneness of the Ātman and the results attained.

कार्यकारणसंबन्धव्याजमाश्रित्य तत्परम् ।
व्याख्यातं यत्नतः पूर्वमात्मज्ञानप्रसिद्धये ॥७॥

Earlier, that highest (reality) was explained with care, by resorting to the false relation between causes and effects,¹ in order that one should acquire the knowledge of the Ātman. [7]

¹This refers to the basic falsity (*mithyātvā*) of the discussion on *kāryakāraṇasambandha* among worldly objects.

चरितार्थत्वतस्तस्य कार्यकारणवस्तुनः ।
निषेधायेयमुक्तिः स्यात्पूर्णमित्येवमादिना ॥८॥

This statement in the words *pūrṇam* ... is¹ for rejecting (the existence) of the thing(s) comprising effects and causes, because that (or, they) has (or, have already) fulfilled the purpose.

[8]

¹*asti* is for *syāt*.

न व्यावृत्तमिदं सर्वं परावप्रत्ययमानम् ।
नानुवृत्तं तथैवैतन्नाप्यभावैकनिष्ठितम् ॥९॥

All this world is (really) not distinguished (from it¹), (because) it is understood by the means of knowing (which are) outside (the inner self). Similarly, this is not comparable (to it¹) and also it is not based on (or, supported in) only non-existence.²

[9]

¹This refers to the Brahman which obtains everywhere (among all worldly things).

²One cannot ignore this world of objects, since it fulfils one's desires.

In verses 10-27 Sureśvara gave the meaning of pūrṇam adah ... in the tradition known to him.

अव्यावृत्ताननुगतमात्मप्रत्ययमीरितम् ।
यस्मात्पूर्णमिदं साक्षात्तादात्म्यं तेन वर्ण्यते ॥१०॥

Since this *pūrṇa* is stated to be neither distinguished from nor similar to (any other thing) and is experienced in one's own self, therefore there is described here its oneness¹ with the Ātman.

[10]

¹It literally means: 'being of the same nature of the Ātman-Brahman'. This verse refers to the inner self which experiences the world of objects.

अज्ञातमिथ्याविज्ञाततत्त्वमात्रैकनिष्ठितम् ।
सम्यग्ज्ञानं यतस्तस्मात्पूर्णं तज्ज्ञेयमुच्यते ॥११॥

Since right knowledge rests on only the truth (lit. being that Brahman) which is either not known or falsely known, therefore that *pūrṇa* is stated as what is to be known. [11]

These two verses give the purport of the sentence beginning with the words *pūrṇam adah*, viz. the Brahman within every being.

गोत्ववन्नानुवृत्तं यत्र व्यावृत्तं च खण्डवत् ।
अनन्यमानमानन्दं पूर्णं तदभिधीयते ॥१२॥

That *pūrṇa* is described as what is not (continuously) existent (in many) like cowness and what is not distinguished (from any other) like (some cow called) Khaṇḍa. It is described as not having any means of knowing (it), other than itself, bliss and (only) full. [12]

The second line is the reason for *atyantaparokṣatva* (of the Brahman).

अदः परोक्षमत्यन्तं सर्वकार्यस्य कारणम् ।
कार्यानुमेयं तद्विद्यात्पूर्णमात्रसतत्त्वकम् ॥१३॥

(The pronominal form) *adah* refers to what is entirely (*atyantam*) beyond perception, the cause of all effects and one should understand that as what can be inferred from the effect(s) (it is merely *pūrṇa* in nature). [13]

इदं यज्जनिमत्किञ्चिन्नामरूपक्रियात्मकम् ।
प्रत्यक्षाद्यवसेयं यत्पूर्णं तदपि पूर्ववत् ॥१४॥

In the same way as before (i.e. in the preceding statements), that also is *pūrṇa* which is this, viz. whatever has origin,

whatever is of the nature of name, form and activity and whatever is to be grasped (*avaseya*) by (the means) such as direct perception. [14]

This is the meaning of *pūrṇam idam*. SP adds that the two words *adaḥ* and *idam* refer to what are expressed and indicated by the usually known word *tvam*. So also the mention together of the four words *pūrṇam adaḥ pūrṇam idam* purports to establish the oneness of both which are conveyed by *adaḥ* and *idam*.

कार्यकारणयोश्चेष्टा पूर्णात्पूर्णमितीर्यते ।
वस्तुवृत्तमिदं तावत्प्रागपि ज्ञानसंगतेः ॥१५॥

In the statement *pūrṇāt pūrṇam* is conveyed the activity (*ceṣṭā*) of the cause(s) and the effect(s). This refers just to the function of the (worldly) things,¹ but that is (to be known as occurring even) before the acquisition of the right knowledge (of the same). [15]

¹Two explanations can be offered in this respect. The 'thing' can refer (i) to the worldly thing, for one understands the same while one is only under the influence of ignorance (*avidyā*), (ii) to the Brahman, which is in reality the cause of all the apparent relations of causes and effects.

अथ हेतुफलावेशनिषेधाय परं वचः ।
पूर्णस्य पूर्णमादाय पूर्णमेवावशिष्यते ॥१६॥

Then, the subsequent statement (*vacah*), viz. *pūrṇasya pūrṇam ādāya pūrṇam evāvaśiṣyate*, serves the purpose of rejecting the introduction of the idea of the result and the cause. [16]

ब्रह्म वा इदमित्यादि मधुकाण्डे यदीरितम् ।
तदेव पूर्णमित्यादिवाक्येनैहोपसंहृतम् ॥१७॥

What was stated (earlier) in the Madhu Kāṇḍa, viz. *brahma*

vā idam etc., is itself finally concluded here¹ by the statement beginning with *pūrṇam*. [17]

¹This refers to the Khila Kāṇḍa.

अपीताखिलकार्यं सत्तमोमात्रावशेषगम् ।
भास्वत्स्वार्थं चिदेकस्थमदः पूर्णमिहोच्यते ॥१८॥

In the sentence *adaḥ pūrṇam* is stated that the sentience, the existent which has withdrawn (in itself) all (the so-called) effects, which rest in only the remainder, i.e. darkness,¹ which reveals itself (only in) brightness and which resides only in one. [18]

What was explained as the Brahman in BU first Adhyāya is explained here in the sentence *pūrṇam adaḥ*.

¹This refers to existence of worldly objects.

तमोन्वितं च यत्कार्यं साक्षिणः साक्ष्यतां गतम् ।
प्रत्यक्षमागमापायि विद्यात्पूर्णमिदं तथा ॥१९॥

So also should one understand *pūrṇam idam* (to be referring to) whatever is effect, associated with darkness and which has become perceived by the perceiver (viz. the sentience within), which is directly perceptible, and which comes into existence and (also) to an end. [19]

Verses 18 and 19 form a pair to describe reality succinctly.

ईशक्षेत्रज्ञयोरेवं तमस्तज्जाभिसंस्थयोः ।
सामानाधिकरण्यादेर्वाक्यादैकात्म्यमुच्यते ॥२०॥

Thus is conveyed the oneness of the Lord and the knower of the field¹ who rest on² darkness and its effects by putting the two in *samānādhikaraṇa* in the sentence. [20]

SP adds that this verse implies the meaning of *pūrṇasya pūrṇam ādāya* ... to be the same as of *tasmāt tat sarvam abhavat*.

¹These refer to the Ātman or Parātman and Jīva 'the inner self'.

²Literally, are related to.

क्षेत्रज्ञेश्वरभेदेन ह्यभिन्नं वस्त्वविद्यया ।
भिन्नं बोधात्तमोऽवस्तौ नेतीत्यात्मावशिष्यते ॥२१॥

One and the same thing (*abhinnam*), is (understood) through ignorance as the knower of the field and the Lord, viz. as two distinct objects; and owing to the knowledge (of their real nature) from the sentence *neti neti* there results the removal of darkness and (consequently) there remains only the Ātman. [21]

न भेदो न च संसर्गो नाप्यभावोऽवसीयते ।
तन्मूलाज्ञानविध्वस्तेर्यथोक्तागममानतः ॥२२॥

Neither distinction nor contact (of the two distinct ones) nor even their non-existence is concluded (from the sentence *pūrṇam* etc.), since there has occurred the destruction of the basic ignorance (about the nature of) the two, as already stated by the scripture which is other means of knowing (reality). [22]

स्रगज्ञानमनादाय तदुत्थैः संगतिः स्रजः ।
नैव संभाव्यते यद्वत्तथेहात्मनि वीक्ष्यताम् ॥२३॥

As unless one has ignorance about a wreath there cannot be any connection of the wreath with the (notions) that have arisen from it (viz. ignorance); so also, should it be understood about ignorance etc. with respect to the Ātman. [23]

कार्यकारणयोर्ध्वस्तावपूर्वाद्यवितबोधतः ।
आत्मप्रत्ययमागम्यः स्वार्थं आत्मावशिष्यते ॥२४॥

From the understanding of the statement, viz. *apūrvam* ..., (when there results) the removal of (the notion of) cause and effect, (there follows) only one meaning, viz. the Ātman, which is understood from the means of knowing, viz. the awareness of the Ātman. [24]

In the word *ātmapratyaya-mā-gamya* in the third quarter, *mā* is to be understood as *māna*.

यादृगस्य द्वये रूपमात्मनैवावगम्यते ।
तावदेव हतान्ध्यस्य तदन्यानवशेषतः ॥२५॥

What is understood by one by oneself (*ātmanā*) as a form of this (Ātman) while (there exists) duality,¹ only that much (i.e. the same) is really (the form) of it from which darkness² has been removed; for there does not remain anything else than that. [25]

¹It literally means: a pair of the Ātman and the *jagat*.

²This stands for ignorance.

यदेवेहेति च तथा मन्त्रोऽप्युच्चैर्जगाद नः ।
अन्यदेवेति च श्रुतिः कार्येतरनिषेधिनी ॥२६॥

So also, the Mantra *yad eva* ...¹ has here² emphatically (lit. loudly) declared and also there is a Śruti, viz. *anyad eva*,³ which rejects anything else than the effect.⁴ [26]

¹*Kāthopaniṣad* 4.10.

²This implies words *tad amutra, yad amutra, tad anv iha* from the Upaniṣad quoted in the preceding note.

³*Īśopaniṣad* 10, 13; *Kenopaniṣad* 1.4.

⁴This refers to *kāraṇa* and hereby is *kāraṇakāryabhāva* rejected.

आत्मेतिदृष्टेर्मेयत्वं स्वार्थावगतितोऽपरम् ।

नान्यदुत्सहते वोढुमिति पूर्वमवादिषम् ॥२७॥

Since there is a knowledge¹ (that all this is) the Ātman, nothing else than that can have the character of an object to be known—so have I said earlier.¹ [27]

¹This refers to a passage *ātmani jñāte sarvaṃ jñātaṃ bhavati*.

In verses 28-63c states *Bhārtrprapañca's* view on *pūrṇam adaḥ*....

एवं यथोदिते तावत्प्रमाणार्थेऽप्यवस्थिते ।
अन्यथेदं वचः केचिद्व्याचख्युरतिनैपुणात् ॥२८॥
पूर्णमित्यादिवाक्यस्य षष्ठान्त्यवचसा सह ।
वक्तुकामो हि संबन्धमेवं यत्नादचीकृत् ॥२९॥

When such has been the meaning (understood from) the authoritative means (viz. Śruti),¹ as stated (herebefore), others² have explained this statement (*vacah*) in another way (and) with great skill. [28]

Because he, wishing to point out (i.e. see) the connection of the statement *pūrṇam* ... with the last statement of the sixth Adhyāya,³ has presented (lit. imagined) with effort (his opinion) thus: (i.e. in what follows).⁴ [29]

¹As stated in the preceding verses.

²The reference is to *Bhārtrprapañca*—here in the plural; in the next verse, in the singular.

³This refers to BU 4.5.15, *yatra hi* ... Sureśvara numbers that Adhyāya as 6, according to the tradition known to him.

⁴This is made clear in verses 30ff.

द्वैताद्वैतात्मकं ब्रह्म मैत्रेय्यै वर्णितं किल ।
यत्र हि द्वैतमित्युक्त्या यत्र त्वस्येति चादरात् ॥३०॥

Indeed (*kila*) the Brahman which is of the nature of duality and non-duality is explained to Maitreyī in the statement *yatra*

*hi dvaitam ... and also in yatra tv asya ... with great regard (for the Śruti).*¹ [30]

¹Cf. BU 4.5.15.

यद्यद्वैतं परं ब्रह्म तत्र स्यात्परमार्थतः ।
कल्पितं प्रसजेद्द्वैतं तोयबुद्धिरिवोषरे ॥३१॥

If there (i.e. in the statement) was (mentioned) in reality the highest Brahman, viz. the non-dual (Brahman), there would contingently follow duality as merely what is imagined, in the same way as the apprehending of water in a barren place. [31]

मृषात्वाद्धेदजातस्य सर्गस्थित्याद्यसंभवात् ।
सर्गस्थितिलयानां स्यादन्वाख्यानं मृषैव तु ॥३२॥

Since it is impossible that there is origin, sustenance etc.¹ of the (world of) discrete objects, for the reason that they are false, a restatement of their origin, sustenance and merger would only be meaningless (lit. false). [32]

¹This includes merger (which is later specifically mentioned).

श्रवणप्रतिपत्ती च व्यर्थे स्यातां तथाद्वये ।
अथ स्वेनैव रूपेण द्वैतमस्तीति भण्यते ॥३३॥
अन्वाख्यानं सतामेव सर्गादीनां तथा भवेत् ।

And so also in respect of the non-dual (reality, i.e. Ātman) there will be meaningless hearing, and pondering over (the same).¹ Then again (if it is said that) there is duality as a state of reality— [33]
then there would be restatement of what are (already existent objects) in respect of origin etc. [34ab]

This verse would imply the authoritativeness of the Upaniṣad

which states *śrotavyo mantavyo nididhyāsītavyaḥ*.

¹This is *śravaṇa* and *pratipatti* to which is to be added *nididhyāsa*.

तथाप्यद्वैतसंदृष्टेर्मृषात्वं स्याद्विरोधतः ॥३४॥
परिकल्पिततादोष एवमत्र प्रसज्यते ।
तद्दोषापनुत्सायै पूर्णमित्यादिका श्रुतिः ॥३५॥

But in that case also, there would follow from the acceptance of non-duality falsehood as opposed to it. [34cd]

Thus, there would follow the fault, viz. only imagining notions and, therefore, out of a desire for the removal of that fault, there is a Śruti beginning with *pūrṇam*. [35]

न कश्चिदपि दोषोऽत्र यथा तदभिधीयते ।
स्वानुभूत्यनुसारेण सर्वं सुस्थं भवेदतः ॥३६॥

Now is explained as to how there is not in this statement any fault, so that, in accordance with one's own experience, all would be well-stated (lit. put) in order. [36]

अदः परोक्षमत्यन्तं कारणं पूर्णमुच्यते ।
व्योमवद्व्यापि सद्ब्रह्म सर्वतोऽनवखण्डितम् ॥३७॥

adah is what is entirely beyond perception and *pūrṇa* is stated to be the cause, viz. that existent Brahman, the all-pervasive like the sky, and everywhere as not consisting of parts (lit. not divided). [37]

ब्रह्मणो याद्व्यावस्था सैव तावदिहोदिता ।
एवं चेदद्वयं ब्रह्म द्वैतावस्था न सिध्यति ॥३८॥

So far is stated the state of the Brahman, viz. of non-duality alone. Now, if this is so, i.e. the Brahman is non-dual, then there would not result the state of duality. [38]

इति दोषनिषेधार्थमिदं पूर्णमितीर्यते ।
यथोक्तावस्थयोर्मा भून्मृषात्वं ब्रह्मणः सदा ॥३९॥

Therefore, for avoiding (i.e. rejecting) that fault is stated *pūrṇam idam*; this (with the idea that) there would not ever be falsehood regarding the Brahman with respect to the two states that are already mentioned. [39]

पूर्णब्रह्मपरिज्ञानाव्यतिरेकत्वहेतुतः ।
अदोवत्कार्यमप्येतत्पूर्णमेवावसौयताम् ॥४०॥

(Therefore) for (the reason that) the effect has no distinction from (the cause, viz.) the *pūrṇa* Brahman consisting in all-sided knowledge (*parijñāna*) this *kārya* also is to be finally considered as *pūrṇa* like that (Brahman).¹ [40]

¹*adah* refers to what is *parokṣa* 'not perceptible', in contrast with what is perceptible (*idam*).

पूर्णेनाभेदतः कार्यं पूर्णं स्यान्न मृषा श्रुतेः ।
यद्यतो नातिरेकेण तत्तदेवेति निश्चितिः ॥४१॥

The effect also would be *pūrṇa* on account of its non-distinction from *pūrṇa* (cause)—this would not give falsehood to the Śruti; for, the decision (in this regard) is: that which¹ is not in addition to (i.e. beside) what² it has come from (viz. the cause) is only that. [41]

Both NKL and SP only refer to *ghaṭa* and *śarāva* as examples. This needs some explanation. *ghaṭa* and *śarāva* are products of clay and are at the same time not different from it. That implies that the effect in the form of the wind is not different from its cause in the form of the Ātman.

¹This refers to effect.

²This refers to cause.

एवं तर्ह्येकरूपेऽस्मिन्स्तत्त्वे सत्ये समर्थिते ।
ततः सर्गाद्यभावः स्यादेकरूपतया स्थितेः ॥४२॥

(It is argued against Bhartṛprapañca:) If this is so, viz. that the truth is justifiably held to be this reality, which is only oneness; then there would follow the non-existence of the origin etc. since the reality has existed only in one form. [42]

This is an argument of the followers of Śaṅkara against Bhartṛprapañca.

नैवं यतः श्रुतिः प्राह पूर्णात्पूर्णमुदच्यते ।
पूर्णात्कारणतः पूर्णं द्वैतमेतदुदच्यते ॥४३॥

(Bhartṛprapañca's answer would be:) This is not so, since Śruti (itself) has declared 'pūrṇa has come out of pūrṇa' i.e. from the pūrṇakāraṇa has the pūrṇa, viz. duality originated. [43]

The thought in verse 42 is related only to cause-effect relation between things (which are essentially one). Yet this verse specifies the Śruti 'pūrṇa has come out of pūrṇa' as a specifier of the real distinction between the cause and the effect, according to Bhartṛprapañca.

यस्मादुद्विच्यमानं हि द्वैतं नैवातिरिच्यते ।
तदेवोद्वेचनं चेत्स्याद्द्वैतस्येति मतं यदि ॥४४॥

If it is argued:¹ Duality does not exist beside (i.e. in addition to) what it has originated from—that is the (real nature of) the origin of duality. [44]

¹This verse is yet another argument against Bhartṛprapañca.

नैतदेवं कुतो यस्माद्दृष्टहानं प्रसज्यते ।
प्रत्यक्षतो हि दृष्टोऽयं द्वैताख्यो विषयः स्फुटः ॥४५॥
तथा दर्शनतः सिद्धो विधितश्चावसीयते ।

प्रामाण्योच्छेद एव स्याच्छ्रुतेरेवं समर्थने ॥४६॥

(The argument is answered thus:) This is not so. Why? Since there follows as contingent the rejection of what is actually seen—indeed this world of objects is clearly perceived directly.

[45]

(The world of objects) is established thus by direct perception and also by injunction(s). And there would be, in your justifying (the unreal nature of that world) with the help of the Śruti, (complete) discarding (lit. destroying) the authoritativeness (of the Śruti).

[46]

This verse explains the *dr̥ṣṭatva* and *śrutatva* of this world (*idam*).

पारमार्थ्यं क्वचिच्छास्त्रं क्वचिच्चाप्यनृतात्मताम् ।
विदधन्मानतां जह्यात्परस्परविरोधतः ॥४७॥

(Thus), stating (lit. prescribing) at some place(s) the character of the ultimate reality and at some other(s) that of falsehood (i.e. unreality) of the same, the Śāstra¹ (i.e. Śruti) would give up its reliability as an authoritative means owing to mutual contradiction (in its own statements).

[47]

This clarifies the thought of verse 46cd above.

¹The definition given by Ānandagiri on BUB 5.1.1:

pravṛttir vā nivṛttir vā nityena kṛtakena vā /
pumsāṃ yenopadiśyeta tac chāstram abhidhīyate //

पूर्णत्वेनाजहद्वृत्त्या त्रिष्वप्यध्वसु वर्तते ।
द्वैताद्वैतात्मकं ब्रह्म पूर्णत्वेनाविभागतः ॥४८॥

The Brahman, having the nature of duality and non-duality, exists as *pūrṇa*, by its not giving up its nature¹ of the three *adhvans*,² viz. as the *pūrṇa* Brahman without having any division in itself.

[48]

¹This is the meaning of *vṛtti*, viz. its usual existence.

²They are the three periods of time as noted in verse 55 below.

कुतोऽविभागो मानाच्चेदुभयोरप्यवस्थयोः ।
पूर्णादित्यादिवचनान्महाप्रलय आत्मनि ॥४९॥

(A question is asked:) 'Why is this absence of division?' The answer is: On the basis of Śruti in respect of both the states and also from the statement *pūrṇāt* ..., they have final merger in the Ātman. [49]

This is Bhartṛprapañca's explanation of the undivided nature of the Brahman as stated in the preceding verse; he refers to the state of duality at the time of *mahāpralaya* 'final merger'.

इदं च द्वैतमस्त्येव तथादोऽद्वैतमेव च ।
पूर्णत्वाख्याजहद्वृत्त्या समुद्रोर्मिवदीक्ष्यताम् ॥५०॥

And thus duality does exist and so also (does exist) that, viz. the non-duality, therefore, from the description (of the Brahman) as *pūrṇa* by its not giving up the (natural) existence (viz. the state of being undivided), let this be seen (i.e. understood) as in the case of the ripples on the ocean. [50]

The ripples on the ocean are seen at times and at other times they again merge in the water; in both these states the water and the ripples of the ocean are but one and real. This is the example for *pūrṇa* Brahman consisting in duality and non-duality.

अग्रे चलत्वमूर्मीणां मध्य ईषच्चलात्मता ।
निष्कम्पत्वं तथा मूले समुद्रः सर्वरूपभृत् ॥५१॥

In the beginning, there is undulating of the ripples and later (lit. in the course of their existence) there is a very gentle

undulating, and the absence of undulating in its initial states—only the ocean has assumed all (these different) forms.

[51]

This verse explains *sanudrormivat* in the preceding verse.

यथैता यौगपद्येन वृत्तीरुर्मिभिरात्मनः ।
अनुभूयन्त एकत्र देवदत्तादिके तथा ॥५२॥

As these are simultaneously the different functioning forms of the ripples (of the ocean), so also (various functions) are noticed (lit. experienced or seen) in only one and the same Devadatta and others¹

[52]

¹This refers to various knowers known as Caitra and Maitra. This is clarified fully in the two following verses.

निष्कम्पा देवदत्तस्य वृत्तिः स्यात्परमात्मना ।
ईषत्प्रचलिता प्राणभावेनेत्यवगम्यते ॥५३॥
विराड्भावेनातितरां चण्डप्रचलितोर्मिवत् ।
ऊर्म्यग्रवत्पिण्डभावे नामरूपक्रियात्मना ॥५४॥

There would be a flutterless function of Devadatta, who is (in the state of) the highest Ātman;¹ the same is seen as slight fluttering on his becoming the Prāṇa (identical with the individual self)—so is this understood.

[53]

And in his being Virāj, it is like the exceedingly agitating ripples(s)—thus, in the nature of name, form and activity, (the Ātman) has become embodied (*piṇḍa*) like the upsurging ripples.

[54]

¹This is to be understood in the sense of the Sūtrātman.

जनिस्थितिलयेष्वेवं त्रिषु कालेषु पूर्णता ।
कार्यकारणयोर्ज्ञेया द्वैताद्वैतस्वभावयोः ॥५५॥

Thus, in the three states of origin, sustenance and merger and in the three periods of time, there is to be understood the character of *pūrṇa* in the cause(s) and effect(s) which are by nature duality and non-duality. [55]

सा चैकैवाविभागत्वात्कार्यकारणभेदतः ।
भेदेन व्यपदेशार्हा सर्वमेवं समञ्जसम् ॥५६॥

And that¹ is just one, on account of being undivided and is to be described as existing in distinct things on account of the differences, viz. cause(s) and effect(s); all this is thus reasonable. [56]

¹This is *pūrṇatā* in verse 54.

आविर्भावतिरोभावैः कार्यकारणरूपिभिः ।
समुद्रवन्नृत्यति च प्रत्यवस्थं विभुः स्थितः ॥५७॥

The all-pervading (Ātman) has, in each of its states, continued to exist through its appearance and disappearance in the form of the causes and the effects, dancing (as it were) like the ocean. [57]

एवं द्वैतस्य सत्यत्वे कर्मकाण्डस्य मानता ।
अनन्तपुरुषार्थीप्तिरिष्यते कर्मकाण्डतः ॥५८॥

Thus, in (accepting) the reality abiding in duality, (there follows) the authoritativeness of (what is called) the Karmakāṇḍa; and from the Karmakāṇḍa is expected (to be realised) the accomplishment of the infinite end of human life. [58]

This expresses the result from accepting duality.

यदा तु कल्पितं द्वैतमद्वैतं परमार्थतः ।
उच्छिन्नं कर्मकाण्डस्य प्रामाण्यं विषयादृते ॥५९॥

When, however, duality is taken as the product of imagination and non-duality as the ultimate truth, then the authoritativeness of the Karmakāṇḍa is entirely to be given up (lit. destroyed), owing to the absence of the object (to be accomplished). [59]

एकदेशस्य चामात्वे वेदस्याप्यप्रमाणता ।
सर्वनाशो भवेदेवं सर्वाप्रामाण्यहेतुतः ॥६०॥

Further, in accepting one part of Vedas as unauthoritative, there follows the unauthoritativeness of the Veda¹ and thus there would follow the loss of everything in life for the reason that the whole has become unauthoritative. [60]

Already Bhartṛprapañca holds the Karmakāṇḍa as authoritative, but if that part of the Veda is held as unauthoritative, the Veda, in its entirety, cannot be accepted as authoritative—this is a complete loss!

¹This is for the Vedānta texts, according to NKL.

अतो विरोधनुत्त्यर्थं सत्यत्वप्रतिपत्तये ।
कार्यकारणयोः शास्त्रं पूर्णमित्यादिनावदत् ॥६१॥

Therefore, in order to ward away the opposition (between the effect(s) and the cause(s)), the scripture has stated *pūrṇam* ... so the truth of the Śāstra is established. [61]

प्रत्यक्षादीनि मानानि भेदग्राहीणि सर्वदा ।
तेषां चाप्यप्रमाणत्वं प्रापदद्वैतवादिनः ॥६२॥

(Indeed) the means of knowing, viz. direct perception etc., ever accept objects which are distinct; therefore, there would result for the propounder of the non-dual (Ātman), unauthoritativeness of them¹ (also). [62]

¹These are the accepted means of knowing.

इति वेदविदः केचिद्विन्नाभिन्नसतत्त्वकम् ।
सर्वं वस्त्वभिवाञ्छन्ति

Thus do some knowers of the Vedas (i.e. Vedānta) hold (lit. wish) that all the things (in the universe) are of the nature of discrete and non-discrete objects.¹ [63abc]

¹That is, being different in being non-different also.

Now in verses 63d-94 follows the refutation of *Bhartrprapañca*'s view.

तत्तु युक्त्या न युज्यते ॥६३॥

But that (view) is not supported with reasoning. [63d]

न युक्तमदिदं गीतं ह्यपवादविकल्पनम् ।
न्यायासंभवतः स्पष्टं स च न्यायो विभाव्यते ॥६४॥

Indeed this division (of the Vedic statement into the general rule and) its exception is not favoured by reason (i.e. *tarka* or *nyāya*); this is clear from the want (lit. impossibility) of (proper) reasoning. And that reasoning is now examined (lit. considered). [64]

अहिंसन्सर्वभूतानीत्यहिंसा सर्वभूतगा ।
शास्त्रेणोत्सर्गतः प्राप्ता तीर्थे सार्पौघते यथा ॥६५॥

(Now) non-violence pertaining to all beings is known from the scripture in the general rule *ahiṃsan sarvabhūtāni* ... and that (*ahiṃsā*) is accepted (by the scripture) in (relation to) a sacrifice.¹ [65]

This verse points out the *utsargāpavāda* notion of the Karmakāṇḍa.

¹ Namely, the Agniṣomīya rite.

न तथेहाद्वयावस्था श्रुत्योत्सर्गेण यत्नतः ।
 प्रापिता तद्विशेषेऽसौ निर्भागत्वान्निषेधभाक् ॥६६॥
 विकल्पानुपपत्तेश्च षोडशिग्रहणादिवत् ।
 वस्तुतन्त्रं हि नो मानं कर्तृतन्त्रं विकल्पते ॥६७॥

Not in that way ¹ has the Śruti presented to us ² the non-duality here ³ in the form of a general rule, in such a way as to offer possibilities of option; ⁴ nor also does it purport to reject some specific part of it, ⁵ since it is devoid of any parts, [66] and because there cannot be (here) ³ any reason for (stating) an option as in the case of taking up of the *ṣoḍaśi-graha*. ⁶ Our authoritative means of knowing is dependent only on the (real) thing ⁷ and what is dependent ⁷ on the agent (of activity) can leave scope for option. [67]

The Advaita Vedānta distinguishes between the means of knowing as *vastutantra* and *kartṛtantra*. The first does not leave for a knower any option of understanding about the nature of the object to be known, viz. the Brahman. The second, however, depends on a knower's wish to undertake the performance of a ritual (which is conveyed by some injunction) or not to do so; as, for example, the taking up of a cup called *Ṣoḍaśin*—the sacrificer may or may not take it up. The *vastutantra* leads only to one end, viz. liberation. [More details of Mīmāṃsā can be overlooked.]

¹ As in the preceding verse.

² That is, informed us of

³ That is, in respect of the Brahman.

⁴ 'In such ... option' is based on SP's observation: *yatnas tu prāptau niṣedhe cobhayatra sambadhyate*.

⁵ That is, partless non-duality, i.e. the Brahman.

⁶ *Ṣoḍaśi* is the proper name of a cup to be drunk at the Atirātra sacrifice, optionally. The general note above clarifies this point.

⁷The two terms *vastutantra* and *karṣṭtantra* (or, *puruṣatantra*) distinguish between the Vedānta and Pūrva-Mīmāṃsā notions regarding the authoritative means of knowing. For the Vedānta, the Brahman is all: *jñātr*, *jñeya* and *jñāna* (instrument of knowing). As such, knowledge about the Brahman depends only on the thing, viz. Brahman, itself. In Pūrva-Mīmāṃsā, however, the *jñātr* etc. are all different. As a consequence, the performance of the rituals (which is the purport of the Karmakāṇḍa) depends entirely on the performer (*karṣṭ*) who is the knower; this leaves scope for his performing or not performing the ritual activity—that is, there is scope for option.

यत्कर्तुं वाप्यकर्तुं वाप्यन्यथा कर्तुमेव वा ।
कारकैः शक्यते लोके तद्विकल्पस्य गोचरः ॥६८॥

In the world that is the subject of option which is possible (for the performer) (i) to do, or (ii) not to do, or (iii) to do otherwise. [68]

Thus Sureśvara states his idea of the province of *vikalpa*.

परस्परविरोधाच्च नैकदैकत्र संभवः ।
द्वयोरवस्थयोर्यद्वत्प्रकाशतमसोरिह ॥६९॥

And, therefore, here, in respect of these two states (of non-duality and duality), there is no possibility of their existence in one and the same thing and at one and the same period of time, owing to their mutual opposition, as in the case of light and darkness. [69]

ekadā, *ekatra* refer to the three *adhvans* already mentioned in verses 48 and 55 above.

श्रुतिन्यायविरोधाच्च कल्पनेयमशोभना ।
अपूर्वानपरानन्तप्रज्ञानैकरसाद्वयम् ॥७०॥
अपूर्वानपराबाह्यं भेदसंसर्गवर्जितम् ।

अस्थूलं नेति नेतीति यथोक्तार्थे वचांसि हि ॥७१॥

And (thus), owing to the opposition to Śruti and to reasoning (both), this view is not proper. (And) *apūrvānaparānanta-prajñānaikarasādvayam*;¹ [70]
apūrvānaparābāhyaṃ bhedaśaṃsargavarjitam,² *asthūlam*³ (and) *neti neti*⁴ are (the Śruti) statements pointing to the matter as stated (by us). [71]

¹BU 2.5.19.

²BU (Mādhyandina) 3.8.8.

³BU 3.8.8.

⁴BU 3.9.25; 4.2.4; 4.4.22; 4.5.15.

अमात्वाशङ्कासद्वावाद्यथोक्तार्थविनिश्चितौ ।
 अब्धौ क्षिप्तानि तानि स्युरन्यार्थासंभवत्वतः ॥७२॥

And those statements would be thrown into the ocean, if there is a decision regarding the already stated object (i.e. the single Ātman) to be otherwise, owing to the possible fear of the unauthoritativeness (of them)—this is so, since there is no possibility of the existence of any (other) object. [72]

anyārthāsambhavatvataḥ is for *-sambhavāt*.

तथा न्यायविरोधोऽपि क्रियाकारकरूपिणः ।
 जडाध्रुवानात्मनो हि त्वत्कृता कल्पनेष्यते ॥७३॥
 न तु चिन्मात्ररूपस्य ध्रुवानंशात्मनः स्वतः ।
 नित्यत्वं चात्मनः सिद्धं प्रत्यभिज्ञादिमानतः ॥७४॥
 प्रसजेत्तद्विरोधश्च भिन्नाभिन्नत्ववादिनः ।
 कल्पनायाश्च वैफल्यमनित्यत्वे परात्मनः ॥७५॥

So also, your view is entertained here in respect of what is of the nature of activity and agent and in respect of the non-Ātmans that are insentient and not imperennial—and thus there is opposition to reasoning. [73]

And there is not established from (your) means of knowing (the character of the agent etc.) in the case of the Ātman, which exists in its own right (*svataḥ*) as only sentient in nature, perennially partless and eternal. [74]

Then there would follow contingently opposition to that by the view of one who holds difference in non-difference and, consequently, there would be fruitlessness resulting from the highest Ātman being taken as imperennial. [75]

अकृताभ्यागमः प्राप्तः कृतनाशश्च सत्त्वरः ।
कर्मकाण्डस्य वैफल्यमेवं कल्पयतो भवेत् ॥७६॥

(Thus) there follows the acceptance of what is not done and also immediately (i.e. close on its heels) the destruction of what is performed. Thus, for one who has thus entertained this view (of difference in non-difference) there would result the meaninglessness (lit. fruitlessness) of the Karmakāṇḍa. [76]

मकरी ननु दृष्टान्तो भिन्नाभिन्नत्वसिद्धिकृत् ।
ब्रह्मणः प्रागुपन्यस्तोऽसाध्वीयं कल्पना कथम् ॥७७॥

(The objector puts forth one argument yet:) 'Indeed, we have earlier stated the illustration of the sea¹ to prove the duality and the non-duality of the Brahman; how then is this theory improper?' [77]

¹That is, having crocodiles in it. The word *makarī* stands ordinarily for a female crocodile, but here it refers to the sea.

अतोऽन्यविषयत्वात्सोऽविरोधः प्रागुदीरितः ।
न तु चिन्मात्ररूपस्य ह्यत्रावोचं विरुद्धताम् ॥७८॥

(This is an answer to it:) That (illustration), which you have earlier stated, is unopposed (to our theory), since it has some other thing¹ for its subject matter (*viṣaya*), but not for what has only sentience as its form. And here, in this respect,²

I have said that there occurs opposition (to your illustration).
[78]

¹Here, there is reference to the Sūtra and the following embodied state of the Brahman which are accepted by the Vedāntin.

²This refers to *cinmātra*. Cp. verses 73-75 above.

नाद्येयत्वाच्च शास्त्रार्थकल्पनेयं त्वया कृता ।
षड्भावविक्रियं वस्तु द्येयं वक्तुं न हि श्रुतिः ॥७९॥
स्वतस्तस्य च संप्राप्तिर्विनाप्यागमशासनम् ।
द्येयत्वेनेह सर्वेषां खरोष्ट्रादेरपीक्षणात् ॥८०॥

[In verse 80, the Siddhāntin states how various objects of meditation are not the subject matter taught in the scripture.]

And this opinion regarding the object of scriptures¹ is not to be studied, because the Śruti does not state as the object of meditation any entity which undergoes six modifications.
[79]

And also because that² is obtained by itself,³ without (even) an injunction in the scripture (and also because) there are noticed among all the objects to be thought of (such objects as) a mule, a camel etc.
[80]

Verse 80 refers to what is called the Advaita view of Vedānta, the *vyavahārabhūmi* 'the world of various objects known' through the adoption of *pramāṇa-prameya* relation among them.

¹This refers to what is thought by Bhartṛprapañca in the scripture.

²This refers to the variety of objects as objects of meditation.

³This is referring to actual experience.

एकधैवानुविज्ञेयमिति च श्रुतिशासनम् ।
भेददृष्ट्यपवादाच्च मृत्योरिति विनिन्दनात् ॥८१॥

Further, there is an instruction in the Śruti, viz. that (reality) is to be known as but one;¹ and this is because there is exception taken to seeing variety of things and since there is censure of the same in the words *mṛtyoḥ*² [81]

¹Cf. BU 4.4.20: *ekadhā*

²Cf. *Kāthopaiṣad* 4.10-11; BU 4.4.19: *mṛtyoḥ*

यत्तूक्तं वेदभागत्वाद्विन्नवस्त्ववबोधिनः ।
नामात्वं कर्मकाण्डस्येत्यत्र प्रतिविधीयते ॥८२॥

As to what is stated, viz. 'The Karmakāṇḍa, which informs us about discrete things, being a portion of the Veda is not authoritative', there now follows an answer (to it): [82]

न हि जात्यादिसंभेदसंसिद्धौ मानता श्रुतेः ।
प्रत्यक्षाद्यनवष्टब्धे तस्यामात्वं यतः स्थितम् ॥८३॥

Indeed the Śruti is not authoritative in respect of establishing variety such as *jāti*.¹ And this is so, since the unauthoritativeness of that (variety) is established for the reason that reality is not dependent on (the means) such as direct perception. [83]

Verse 82 has referred to the variety of objects. Therefore, that raises two questions: whether the Karmakāṇḍa refers to that variety as what is to be accepted in reality or that is to be taken as unreality. The first line answers the first question, whereas the second line answers the second one.

¹This refers to various classes of society.

भेदग्राहि न नो मानं लौकिकं वैदिकं च यत् ।
अविचारितसंसिद्धिस्तस्माद्वेदोऽवसीयताम् ॥८४॥

For us, it cannot be a means of knowing, which accepts discreteness of objects; be it popularly (accepted) or the Vedic. Therefore, let it be concluded that the variety (of the objects

of knowing) is established (even) without any thought(-activity). [84]

While commenting (only too briefly) on this verse, SP states about the means thus: *pratyakṣādīni śāstrāṇi bhedagrāhīni anyonyāśrayatvāt*. This is made clear in the following verses.

न स्वतः परतो वायं भेदो वस्तुन ईक्ष्यते ।
सर्वस्यैव स्वतोऽभितेस्तदन्यस्याप्यभेदतः ॥८५॥

Indeed this discreteness among all the things¹ is not established on account of itself or any other thing/means. (This is so) because (in the first instance) all (that variety) is itself non-different from itself² (and secondly) any other (distinct thing, if it is granted to be existent) also cannot be shown as distinctly existent.³ [85]

¹*vastunaḥ* (singular) signifies *vastūnām* (plural).

²The first part of the second line sets aside a possible idea that all different things cannot be said to be distinct from themselves—if it is so said, that would result into stating that there are no things in existence. Read SP: *sarvaṃ vastu svasmād abhinnaṃ anyathā vastvabhāvaprasaṅgāt*.

³The second part of the second line affirms that there cannot be shown anything as distinct from all the things (itself being included among them). Here also, read SP: *parato 'pi (vastuno) bhedo na prāmāṇiko 'sti ... vastuno 'nyatvenēṣṭasyāpi na sattvam (bhedasyādyāpy asiddheḥ)*.

वस्तु वस्त्वन्तरं भिन्द्याद्योगाद्यद्वा विभागतः ।
योगे नातिशयैकत्वात्तयोश्चाप्येकरूपतः ॥८६॥

A thing can distinguish another thing (from itself) by either its union (with it) or its separation from the same. In case (it is accepted that) there is a union of them, (then such distinguishing is) not (possible), because there exists some

common (lit. one excellence) in them and (consequent) oneness of them. [86]

विभागेऽपि न भेदः स्यात्तयोरेकात्मना स्थितेः ।
अन्यदीयोऽपि नान्यस्य भेदः स्यात्कल्पनां विना ॥८७॥

Further, in respect of their differentiation, there is no (possibility of) variety (of differences) since both of them remain as having only one nature. And there cannot exist the difference of the other thing unless there is a notion that there exists another thing. [87]

This refers to an actual separation obtaining between two things. *yoga* refers to 'union' of two things.

In connection with this verse, SP points to a variant reading: *yoge 'natiśayaikatvāt* and remarks on the same: *bhedo 'tiśayas tasmād anyas tatprayojakasambandho 'natiśayas tasyaikyān na bhedaḥ syāt*.

मेययाथात्म्यसंलेहि मानं मानत्वमश्नुते ।
भेदं न लभते मेये मेयादन्यत्र न प्रमा ॥८८॥

A means of knowing becomes an (authoritative) means, if it touches (i.e. brings out) the true nature of the object to be known. It does not exist in the object to be known as a distinct (object). Right knowledge cannot obtain elsewhere than in the object to be known. [88]

The argument is: Since difference from the thing itself cannot naturally exist, there is doubt about its property as existing apart from it—but that is impossible.

सतो न व्यतिरेकेण भेदो नापि सदन्वयात् ।
यथैवं नासतोऽप्येवं भेदो नैवावसीयते ॥८९॥

A distinct object (does not exist) in addition to (or besides)

the existent (viz. reality): nor (does it exist) as associated with (it² as a part of) the existent (reality). As this is so, so also there cannot exist beside the non-existent any (other) distinct object—such is the conclusion. [89]

सर्वं सदेव यस्येष्टमथवासदिदं जगत् ।
भेदः किमाश्रयस्तस्य विरोधान्न द्वयाश्रयः ॥९०॥

For him, who has accepted (lit. desired) all this as the existent alone or this as non-existent, what could be the substratum of the distinction among objects? Because it is opposed to (distinct, that distinction objects) there cannot have any duality as its substratum. [90]

SP states that the Sāṃkhyas, the Buddhists and the Jains are meant here to have the opinion expressed in the verse.

अन्यापेक्षं पृथक्त्वं चेत्स्वत एवापृथग्घटः ।
बलीयानन्तरङ्गत्वाद्बहिरङ्गं प्रबाधते ॥९१॥

If it is held that distinction depends on something other than itself, then (it has to be said that) the pot is distinct from itself. The external aspect of a thing, being stronger than the internal property, stultifies it. [91]

This is to disprove the existence of distinction among objects with reference to the views of the Tārkikas.

द्रव्याद्विन्नं पृथक्त्वं चेदनवस्थैति सत्त्वरः ।
द्रव्यमेव पृथक्त्वं चेदपृथक्स्यादिदं जगत् ॥९२॥

If the distinction of some substance is considered to be different from the substance itself, then there quickly follows *infinite regress*. If again substance itself is the distinction (of itself), then this world (also) will be non-distinct. [92]

स्वतश्चेद्वस्तुनो भेदो वस्तु शून्यं प्रसज्यते ।
आपेक्षिकोऽपि क्लृप्तत्वात् भेदो रज्जुसर्पवत् ॥९३॥

(Again) if the distinction of something comes from itself, the thing will be only void (*śūnya*). The distinction also, being imagined, would (really) be non-difference as between a rope and a serpent (imagined in its place). [93]

Verses 94-100 are related to the discussion on the Karma Kāṇḍa being unauthoritative.

इत्येवमादि बहुशो भिन्नाभिन्नत्वदूषणम् ।
प्रागप्युक्तं तदत्रापि संधेयं वस्तुसिद्धये ॥९४॥

This and such other manifold fault (in the view regarding) difference in non-difference has been explained (by us) on a number of occasions (even) before; that has to be remembered (lit. brought into this discussion) even here so that (the nature of) the thing (viz. the reality for Brahman) is established. [94]

अपि वेदैकदेशस्य प्रामाण्यं यदि नेष्यते ।
कर्मकाण्डस्य सर्वस्य वेदस्यापि प्रसज्यते ॥९५॥

And this could be said (*api vā*);¹ if it is not desired that one part of the Veda, viz. the Karmakāṇḍa, is not authoritative, then (that) unauthoritativeness follows contingently in respect of the whole of the Veda. [95]

¹In *api vā* for introducing an alternative, Sureśvara follows Yāska, the author of the *Nirukta*.

इति यत्प्रागुपन्यस्तं तस्य दूषणमुच्यते ।
साध्यसाधनसंबन्धे तस्यापीष्टा प्रमाणता ॥९६॥

(Now) is stated a fault with respect to what has been thus

stated. (For,) that also has to be accepted as an authoritative means, when there is reference to the relation between what is to be accomplished and what accomplishes it. [96]

भेदः प्रमान्तरैः सिद्धो न त्वागमसमाश्रयात् ।
पशवोऽपि हि जानन्ति भेदमक्षादिमानतः ॥९७॥

Distinction (among different objects) is established by different cognitions and not by resorting to the Āgama (i.e. Veda). Even animals do know such differences with (the help of) the means called direct perception etc. [97]

¹This refers to different results from different contacts of different sense-organs with different objects.

न च मिथ्यात्वधीर्भेदे जन्मनैवेह कस्यचित् ।
अप्युत्थापितबुद्धीनां भेदेऽसंभावना न च ॥९८॥

Further, the awareness of falsehood in respect of distinction among objects does not find in anyone right from their origin. So also, there cannot be impossibility of the awareness of distinction in the case of those whose intellect has been awakened (by someone). [98]

According to SP, the second line seems to refer to the followers of the Buddha and such others who do not hold the falsehood of distinct object. So also, it should apply in the case of those who do not accept the authority of the Veda.

क्रियाकारकसंभितौ वस्तुतत्त्वेन मा श्रुतिः ।
साध्यसाधनसंबन्धमात्रैकविषयत्वतः ॥९९॥

Let not the Śruti be considered as the means of (determining) the distinctions such as actions and their means since (it relates to) the true nature of the thing (called reality) whereas the distinctions have for their subject matter only the relation

(among those distinct objects) as the ends and the means.

[99]

The aim of the verse is to affirm the real silence of the Śruti in respect of the imaginary world of differences.

लोकसिद्धमतो भेदमादायेष्टार्थसिद्धये ।

इदं कार्यमिदं नेति वेदशास्त्रं प्रवर्तते ॥१००॥

Therefore, (only) having accepted what is popularly established as the distinct objects, the Śruti proceeds to establish what can be desired by men, viz. this should be done and not this.

[100]

सर्वतस्तु विरक्तो यः कर्माभिः शुद्धधीर्नरः ।

कामयानः पूर्णफलमुत्पत्त्यादिविलक्षणम् ॥१०१॥

तमोमात्रान्तरायत्वात्प्रतीचः पूर्णरूपिणः ।

स्वतःसिद्धत्वतस्तस्य व्यञ्जकं नान्यदीक्ष्यते ॥१०२॥

As for a person of purified intellect, (who has become) averse to all (the worldly things) and is desirous of the result of fullness¹ that is different from origination etc.²

[101]

does not expect any (thing else) that reveals the inner self, which has merely ignorance as the cover of obscurity, which is of the nature of the full and of the self-established.

[102]

However AnSS reads: *vyañjakānnānyad īkṣyate*.

¹*pūrṇaphalam* is for *pūrṇatvaphalam*.

²The word etc. refers to *āpyatā*, *saṃskāryatā* and *vikāryatā*.

स्वतः प्राप्तस्य संप्राप्तौ वाक्यान्मोहप्रहाणतः ।

मानापेक्षा न भूयः स्यात्फलाप्तेस्तत्कृतार्थतः ॥१०३॥

(In the case of that) which has come into existence, on its own, and caused by the (scriptural) sentence after there is destruction of the ignorance (about its own nature), there is

not any more an expectation of a means (towards obtaining that), since the result is already obtained and its own end is (already) achieved. [103]

साध्ये हि साधनापेक्षा सिद्धेऽसौ विनिवर्तते ।
किंन्वसाध्ये समस्तस्य पूर्णत्वेन समाप्तिः ॥१०४॥

Indeed, in the case of what is to be achieved there is need of some means (towards the achievement) and that (*sāadhanāpekṣā*) ceases to be there when (the end) is (already) achieved. What then could one say in the case of that which is complete in itself and already obtained, since it is *pūrṇa* and therefore is not an end to be achieved? [104]

द्वैताद्वैतात्मकं ब्रह्म यदाण्वभ्युपगम्यते ।
तदापि न विरोधोऽयं केनचिद्विनिवार्यते ॥१०५॥

(And) when the Brahman, which might be even very minute (in form), is accepted as of the nature of the dual and non-dual (of the world), even then there will not be any opposition to this argument and that (argument) cannot be set aside by anyone. [105]

समस्तव्यस्तभूतस्य ब्रह्मण्यवसितात्मनः ।
ब्रूत कर्मणि कौ हेतुः सर्वानन्यत्वदर्शिनः ॥१०६॥

Say what reason is there for the activity of the one which has culminated into the Brahman, which has the nature of totality and also severality and which has fully grasped that all are not anything else (than the Brahman). [106]

सर्वजात्यादिमत्त्वे च परस्परविरोधतः ।
व्याघातान्न प्रवृत्तिः स्यान्निषेधेऽथ विधौ तथा ॥१०७॥

(An objection is raised:) And in the case (that the Brahman) has all the castes etc.¹ (within itself), there will occur mutual

opposition (among the duties of those castes etc.) and thus there would arise obstruction and there will be no activity since that would amount to prohibition (*niṣedha*) regarding (every) injunction.² [107]

¹The word etc. refers to the various religious duties assigned to them.

²The case would be that an injunction would require the performance of some duty as a Brāhmaṇa and that performance will be prohibited for the same person being a Kṣatriya etc. This would result into non-performance of all the ritual that is prescribed by the Śāstra.

न चावच्छेदमानित्वं विदुषोऽस्त्यासुरत्त्वतः ।
विदुषोऽप्यासुरत्त्वे स्यान्निष्फलं ब्रह्मदर्शनम् ॥१०८॥

(The answer is:) And indeed there is not on the part of the knower (of the nature of the Ātman) any awareness of the limiting adjuncts (on it) owing to that being of demoniac nature. And in case there is this demoniac nature on the part of the knower then the knowing (lit. seeing) the Brahman would be only meaningless (lit. fruitless). [108]

तस्मादसदिदं गीतं भिन्नाभिन्नत्वसिद्धये ।
श्रुतिन्यायविरुद्धत्वात्प्रकृतं त्वधुनोच्यते ॥१०९॥

Therefore, (all) this which is stated (lit. sung) for establishing the nature of dual and non-dual (Brahman) is opposed to (both) the Śruti and reasoning. There is now stated what is begun (relevant in the Upaniṣad). [109]

Now follows the explanation of om kham brahma.

ओं खं ब्रह्मेति मन्त्रोऽयं श्रुत्येह ध्यानकर्मणि ।
नियुज्यते फलप्राप्तौ यथा तदभिधीयते ॥११०॥

Now as to how this Mantra, viz. *om kham brahma*, it is enjoined here by the Śruti in respect of (i.e. in the context of) the activity of meditation. As to how it leads to attaining the result is now explained. [110]

परस्य ब्रह्मणः साक्षाद्याथात्म्याधिगमो यथा ।
 पूर्वैश्चतुर्भिरध्यायैस्तथा श्रुत्योदितोऽब्जसा ॥१११॥
 अस्यैव प्रतिपत्त्यर्थमुपासनमथोच्यते ।
 ओं खं ब्रह्मेति वचसा पुंसां श्रेयोऽभिवाञ्छताम् ॥११२॥

As regards the aquisition of the direct awareness of the oneness (of the individual self) and the highest Brahman there has been clearly stated in the four preceding Adhyāys as of the Śruti, [111]

Now a mode of worship¹ for acquiring this (desired result) is stated in the words *om kham brahma*; this is for men who wish for bliss. [112]

¹Here *upāsanam* means *dhyānam* 'meditation'.

ब्रह्मेतीह विशेष्यार्थः खमित्यपि विशेषणम् ।
 सामानाधिकरण्योक्तेस्तद्वृत्तिः कृष्णसर्पवत् ॥११३॥

In this (sentence), the word Brahman signifies the object to be qualified and (*api*) the word *kham* is the attribute (qualifying it); (this is understood from) the occurrence of these two words) in *samānādhikaraṇa*¹ and this is so as in the case of (the statement:) a black serpent. [113]

¹*samānādhikaraṇa* refers to their occurring in the substratum and grammatically in the same case relation. In the case of a black serpent, blackness and serpentness coexist, similarly Brahmaness and *khaness* coexist. SP adds the example of *nīlam utpalam*.

प्रवृत्तिर्ब्रह्मशब्दस्य बृहद्वस्त्वेकगोचरा ।

खेन तद्विशिनष्टयत्र सामान्यांशैकपातिना ॥११४॥

The currency (lit. function) of the word *brahman* belongs to the greatest¹ thing (i.e. Brahman) only; (Brahman) the Śruti qualifies it by the *kha* which occurs as a part in that which is generality. [114]

¹Literally, biggest.

अनाकाशस्वभावेभ्यः खेन ब्रह्म निवर्त्यते ।
तथाब्रह्मस्वभावेभ्यः सामर्थ्याद्ब्रह्मणा च खम् ॥११५॥

(As) the Brahman is set away by the word *kha* from all that have the nature of *ākāśa*; so also is *kha* set away from what do not have the nature of the Brahman, on account of the strength of the Brahman. [115]

सामान्यमात्रवाचित्वात्खशब्दस्य विशेषणम् ।
पुराणमिति निर्वक्ति कारणप्रतिपत्तये ॥११६॥

Because the word *kha* is expressive of (the sky) in a general way, therefore the Śruti has used¹ the word *purāṇa* 'the ancient one' with a view to conveying the cause of) the varied objects.² [116]

¹Literally said in the word *nirvakti*; there is no purpose served by the proposition *nis* ordinarily *nis* before the verb root *vac* 'to derive, to occur'. Generally, it is used for signifying the function of etymologising a word.

²This is for avoiding any *tanmātras* and gross elements.

यत्तद्ब्रह्म खमित्युक्तं तदोशब्दाभिधानकम् ।
चिन्तयेत्सततं धीमानोमालम्बनमेव वा ॥११७॥

That Brahman which is mentioned as *kha* has for its name the word *om*. Thus should an intelligent man ever think, or

(he should consider it) as a prop (or symbol of meditation).
[117]

एतदालम्बनं श्रेष्ठमिति च श्रुतिशासनम् ।
एतेनैवाक्षरेणेति ह्यथर्वाणोऽप्यधीयते ॥११८॥

And there is an instruction of the Śruti *etad ālambanam śreṣṭham*¹ And the followers of the *Atharvaveda* recite in their tradition *etenaiva akṣareṇa*² [118]

¹This refers to *Kathopaniṣad* 2.17.

²This refers to *Praśnopaniṣad* 5.5.

अतीन्द्रियत्वात्तस्यापि कथं स्यात्तदुपासनम् ।
वायुरं खमिति प्राह तदालम्बनसिद्धये ॥११९॥

(A question is asked:) 'Since that also is beyond the sense-organs,¹ how could there be a meditation on it?' (The answer is:) The Śruti has said *vāyuraṁ kham*,² in order that that can be established as an object of meditation. [119]

¹This is to indicate that it cannot be an effect or a cause.

²This means it is the support of wind, therefore perceptible and, as such, it can serve as an object of meditation.

Compare *madhura* or *dhīra*, derived by adding of suffix to the word *madhu*, *dhī*; therefore, *vāyura* is that which has the support of *vāyu*. The word is used only here—so Vadekar/Limaye have pointed out.

Now follow in the next three verses an objection raised by one born from *Kauravyāyāṇi*.

खं पुराणं न विज्ञेयं मन्त्रेऽस्मिन्निति मन्यते ।
कौरव्यायणिजो धीमान्वायुरेतिप्रसिद्धितः ॥१२०॥

The intelligent son of *Kauravyāyāṇi* thinks that *kham* in this

Mantra should not be taken as the ancient sky (*kha*), because the word *vāyura* comes from what is well-known (from perception). [120]

रूढ्या वृत्तिः खशब्दस्य वायुरे व्योम्नि लक्ष्यते ।
बहुशश्च प्रयोगोऽतो वायुरं खं प्रतीयताम् ॥१२१॥

The word *kha* is by usage seen to refer to the sky, which is *vāyura*. So also, there is the usage (or employment of it in language); therefore, let it be understood that there is in the word *kham* reference to the sky. [121]

पुराणं यदि तद्वयोम यदि वा वायुरं भवेत् ।
ध्येयं तदोमिति सदा पक्षयोरुभयोरपि ॥१२२॥

[This verse answers two questions: (i) is there a reference to *kha* as the causal Brahman? and (ii) is there a reference to the elemental sky?; which is better?]

Whether the sky be the ancient one or whether it be the support of wind, that has to be ever meditated on as *om*—this is held true in respect of both these views. [122]

आलम्बनतयोंकार उपास्तिविषयो भवेत् ।
चतुर्भुजाङ्कितं दारु विष्णोरिव निगच्छति ॥१२३॥

The word *om* becomes¹ the object of meditation as a prop in the same way as people understand² a piece of wood which is marked by four hands as Viṣṇu³ having them. [123]

¹*bhavet* for *bhavati*.

²This is singular use in the form of *nigacchati* for referring to the entire mass of men.

³This indicates Sureśvara's reference to common practice of Viṣṇu worship at his time. In the example, a piece of wood etc., the four hands are taken as a prop (or symbol) of Viṣṇu.

नेदीयो ब्रह्मणः स्थानमोमितीदं प्रतीयताम् ।
शालग्रामो हरेर्यद्वत्सर्वानर्थापहारिणः ॥१२४॥

Let this (letter) *om* be understood as the nearest expression (lit. *sthānam* 'place') of the Brahman; for, a black stone called *śālagrāma* would be a symbol of Viṣṇu who removes all the undesirable situations or things (in a man's life). [124]

यद्वाभिधानमो विद्यात्तस्यैव परमात्मनः ।
तस्मिन्निविष्टचित्तस्य तद्ब्रह्माशु प्रसीदति ॥१२५॥

One should know that *om* is the name of the highest Lord, in the case of a person who has fixed his mind on that (viz. highest Ātman), the Brahman would quickly be pleased with him. [125]

SP clarifies here under this verse that *om* as standing for the four states in the life of a human being are comparable to those described in the *Māṇḍūkyaopniṣad*.

ओंकारो वेद एवेति ब्राह्मणास्तु प्रचक्षते ।
वेदैनेन यतो वेद्यं ब्रह्म वेदस्ततो मतः ॥१२६॥

And the Brāhmaṇas say that the word *om* is but the Veda, since by this one knows the knowable Brahman. Therefore, (the word *om*) is accepted as Brahman. [126]

अभिधानतयैवैनमोंकारं विदुरञ्जसा ।
ब्राह्मणास्तदभिध्यानाद्विदन्ति ब्रह्म निर्भयम् ॥१२७॥

Thus, the Brāhmaṇas have understood very smoothly the word *om* as a name (of the highest Ātman). By meditation on it do they attain to that Brahman, which is (the state of) fearlessness. [127]

वेदोऽयमिति चोक्तिः स्याद्यथोक्तोपासनं प्रति ।
स्तुतित्वादर्थवादोऽयं नातोऽन्योऽर्थोऽवसीयते ॥१२८॥

So also the statement 'This is Veda' is with reference to the meditation. This is a statement of praise and, therefore, not any other object is to be decided by it. [128]

उद्गीथादिप्रभेदेन यं वा संविद्रते द्विजाः ।
वेदोऽसाविति विज्ञेयस्त्रय्यास्तत्र समाप्तिः ॥१२९॥

The one, which the twice-born have known¹ as differentiated in the Udgītha etc.,² is to be known as this Veda, for there is included in that the three Vedas (*trayī*). [129]

¹The word *saṁvidrate* is rather unusual in later Sanskrit; only in *Rgveda* do we find a form *vidre*. So, the variant in AnSS *da* for *dra* should have been preferred. Yet, of course, it is difficult to set aside the principle of textual criticism that the more difficult or unusual form is likely to be original!

²The word etc. refers to the Prastāva and the Pratihāra parts in the Udgītha chant.

तस्मिन्प्रयुज्यमानेऽतः सर्वो वेदः ससंग्रहः ।
प्रयुक्तः स्यादतो वेद ओंकार इति गम्यताम् ॥१३०॥

Therefore, that being used, the entire Veda, with its ancillaries, would become recited; as such, let *om* be understood as the Veda. [130]

इति श्रीबृहदारण्यकोपनिषद्वाङ्मयवार्तिके पञ्चमाध्यायस्य
प्रथमं ब्राह्मणम् ॥१॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.2

उक्तमाभ्यन्तरं तावद्ब्रह्मोपासनसाधनम् ।
ओंकारोऽथ दमादीनां साधनत्वं विधीयते ॥१॥

Earlier there is stated the opinion about the worship of the Brahman within one. And now is explained (here) the nature of restraint (*dama*) etc. as the means to it (viz. *Upāsanā*). [1]

दान्तो दाता दयालुश्च सबाह्याभ्यन्तरः शुचिः ।
एवंविधोऽधिकारी स्यात्सर्वासूपास्तिभूमिषु ॥२॥

Thus, a person should be considered as eligible in respect of all the modes of worship: (he should be) one having his sense-organs subdued, a giver, having compassion (for others), and pure, both outside and inside (one's self). [2]

दमादिविधिशेषोऽयमर्थवादोऽभ्युपेयताम् ।
त्रया इत्यादिको ग्रन्थः स्पष्टार्थोऽतो न यत्यते ॥३॥

Let this be understood as an *Arthavāda*, i.e. ancillary to the injunction regarding restraint (*dama*) etc.¹ The section beginning with (the word) *trayā* has a very clear meaning and there is therefore no effort made (by me) in clarifying it. [3]

¹The word etc. refers to *dāna* and *dayā*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
द्वितीयं ब्राह्मणम् ॥२॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.3

ब्रह्मानुपाधि पूर्वत्र व्याख्यातं यत्नतोऽधुना ।
सोपाधिकस्य तस्यैव ह्युपास्तिर्वक्ष्यते स्फुटा ॥१॥

Earlier (i.e. on BUBV 5.1-2) the Brahman without any limiting adjuncts has been carefully explained. Now is stated in clear terms (*sphuṭa*) the worship of that very (Brahman) that has limiting adjuncts. [1]

In BUBV 5.1-2 there was discussion about *omkāra*, *dama*, *dāna* and *dayā* as ancillary to the worship of the Brahman.

श्रुतः प्रजापतिः पूर्वं कोऽसाविति न गम्यते ।
सामान्योक्तेर्विशेषार्थमेष इत्यादि भण्यते ॥२॥

(In) earlier (Brāhmaṇas, viz. BUBV 5.1-2), there was heard (the mention of) Prajāpati, (but) who he is is not understood; therefore, the words *eṣa* ... explain (lit. state) the specific meaning of that which was stated only (in a) general (way). [2]

SP points out: Prajāpati is in a general way understood as the instructor of the gods and, therefore, this might refer to Dakṣa and others. Therefore, in order to distinguish Prajāpati in this context, there is here the use of the word *viśeṣārtha*.

हृज्जिरा मांसपेश्युक्ता तात्स्थ्याद्बुद्धिस्तु लक्ष्यते ।
हृदि नामादिसंहारं यत्र शाकल्य ऊचिवान् ॥३॥

By the word *hr̥d* is to be understood (lit. stated) a lump of flesh (in the body). Yet, thereby (i.e. by that word) is

indicated intellect (*buddhi*) owing to its abiding in it (*tātsthyāt*),¹ in the *hṛdaya* there is collection of name etc., as Śākalya has stated (as the secondary sense of the word).² [3]

¹This is the meaning of the word *hṛdaya* that was used earlier in the Śākalya Brāhmaṇa; i.e. BU 3.9.11, 14, 16, 20-24; cf. BUB on it: *hṛdayam loko hṛdayena buddhyā paśyati*. (At one place in BUB 3.9.20, however, Śaṅkara has said that the word *hṛdaya* is to be taken for the combination of *hṛdaya* and *manas*— this is to point to them as the internal organ.)

²This is relevant to the fifth Adhyāya.

सर्वभूतसमत्पत्तेस्तथा सर्वेश्वरत्वतः ।
प्रजापतिरिति ज्ञेयं हृदयं तेन हेतुना ॥४॥

hṛdaya should be known as Prajāpati because there is the origin of all beings from it for the same reason.¹ [4]

¹Cf. SP: *śākalyabrāhmaṇoktena tryannādhikāroktena hetunā tayor ekalakṣaṇatvād aikyam ity arthaḥ*.

सर्वज्ञेयस्य तद्व्याप्तेर्ब्रह्मापि हृदयं भवेत् ।
यत एवमतो यत्नादुपास्यं हृदयं सदा ।
हृदयाख्याक्षराणां च श्रुत्योपासनमुच्यते ॥५॥

Because what is to be known by all is pervaded by it, the Brahman also is *hṛdaya*. Since this is so; therefore, *hṛdaya* has to be worshipped with proper attention.¹ And, the Śruti states the worship of three *akṣaras* occurring in the word *hṛdaya*. [5]

¹SP clarifies *yatnāt* as *ādara-nairantarya-dīrghakālarūpa(tayā)* 'at length time and place'.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
तृतीयं ब्राह्मणम् ॥३॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.4

तस्यैव हृदयाख्यस्य ब्रह्मणोऽन्यदुपासनम् ।
सत्योपाधिविशिष्टस्य तद्वै तदिति भण्यते ॥१॥

Now is stated in the words *tad vai tat* another mode of worship of that very Brahman which is called *hṛdaya* and which is modified by the limiting adjunct *satya*. [1]

तच्छब्देन परामर्शो वैशब्दः स्मरणाय च ।
प्रकारान्तरनिर्देशे तदासेति च तद्वचः ॥२॥

The word *tat* refers to what is earlier stated, the word *vai* is for reminding (one of the earlier context). When (now) there is a mention of another mode (of worship of the Brahman) there is the statement of that in the words *tad āsa*. [2]

सत्यमेव तदासेति यदुक्तं हृदयात्मना ।
मूर्तामूर्तात्मकं सत्यं ब्रह्म पूर्वं प्रपञ्चितम् ॥३॥

What is stated in the words *tad āsa* is the nature of *hṛdaya* is *satya* itself. The *satya* Brahman, having the nature of *mūrta* and *amūrta*, has been already explained fully (in BUBV 2.3). [3]

महत्तत्परिमाणेन यक्षं पूज्यतमत्वतः ।
अग्रजः प्रथमोद्भूतेस्तदन्यत्कार्यजन्मनः ॥४॥

That is called *mahat* with reference to its (great) measure, *yakṣa* for having the nature of what is to be most worshipped

and *agraja* because of having its origin first (among all the things) and also because of the production of the effects other than itself. [4]

Sureśvara is very brief in his description of this Brahman as Virāj.

यः कश्चिदेतं व्याख्यातं वेदोपास्ते दिवानिशम् ।
लोकाञ्जयति स सर्वाश्शत्रुश्चास्य जितो भवेत् ॥५॥

Whosoever knows this one (i.e. Prajāpati) thus explained and worships him day and night conquers all the worlds and his enemy becomes conquered. [5]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
चतुर्थं ब्राह्मणम् ॥४॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.5

उक्तं प्रथमजं सत्यं कथं तदिति भण्यते ।
आप एवेदमित्युक्त्या यथोक्तार्थस्तवाय तु ॥१॥

We have already explained that *satya*, which was the first born, (and how it is¹ so is now stated). Further, the statement *āpa evedam* ... is only for praising the already stated thing.²

[1]

¹Namely, how it has that nature. Also the word here refers to the worship of it (*satyabrahmopāsti*).

²The thing already stated is the Brahman, which is described as *satya*.

पयःसोमादिका आपो ह्यग्निहोत्रादिकर्मसु ।
सर्वाहुतिषु संसृष्टा बाहुल्यादप्परिग्रहः ॥२॥

In the ritual acts Agnihotra etc., water,¹ Soma and others² are waters; since (waters) are mixed as an ingredient of *āhutis* in profuse quantity. Therefore there is (here) a (specific)³ reference to waters (in this text). [2]

This verse explains the significance of the word *āpah* (accusative plural).

¹Water may be primarily meant here, (though milk cannot be ruled out).

²The word 'others' refers to various sacrificial materials such as barley grains, sesame etc.

³This explains away the non-mention of elements other than water. This is fully clarified in the following verse.

सत्स्वप्यन्येषु भूतेषु भूयस्त्वादाप एव तु ।
प्राधान्याच्चैव गृह्यन्ते न त्वन्यद्विनिवार्यते ॥३॥

Even while there are other elements (involved in a sacrifice) only waters are mentioned because of their profuseness (in quantity) and of their (having a) principal role in the same; but (let it not be supposed that) others¹ are (wholly) excluded.

[3]

¹Actually, the verse uses the word *anyat* in singular; it means (any) other of the elements. Yet we have translated *anyat* as 'others' purposely.

प्रक्षेपोत्तरकालं ताः सर्वमानातिवर्तिना ।
तस्थुः सूक्ष्मेण रूपेण क्रियामाश्रित्य सर्वतः ॥४॥

(Those waters) have ever remained,¹ in their subtle form which surpasses all the means of perception,² being a part of (lit. having resorted to) the (ritual) activity, in its entirety, even after their first pouring (into the fire).

[4]

¹It means 'continued to be in existence'.

²The subtle form of waters could not be easily perceived after their first pouring; that is to say, in any later sacrificial activity the actual pouring of waters meant only some redundancy. This is the special characteristic of waters in the sacrifice.

यावत्किञ्चिज्जगत्यस्मिन्नाहुत्येह व्यपेक्ष्यते ।
अन्तर्भूतं तदप्स्विति ह्याप एवेदमित्यतः ॥५॥

Since whatever here in this world is expected to be in an *āhuti* 'offering' is already included in waters, therefore, is made the statement *āpa evedam*¹

[5]

¹This refers to waters which form the first thing of origin

(*mūlakāraṇa*) giving rise to the later objects in creation.

अग्रे प्रथमतः सृष्टेरग्रजस्य प्रजापतेः ।
 सत्यं ब्रह्मासृजन्नापः कारणत्वादपां ततः ॥६॥
 तदिदं हिरण्यगर्भस्य व्यक्तीभावो महेश्वरात् ।
 आदित्यस्येह वाक्येन वर्ण्यतेऽग्रजसिद्धये ॥७॥

In the beginning (*agre*), i.e. before creating the first-born (or, the eldest-born) Prajāpati, waters created that *satya* Brahman; therefore, waters have the nature of the cause (of creation).

[6]

This is then the origin, i.e. the manifestation of Hiranyagarbha, i.e. of Āditya, from the great Lord, thus described in this sentence,¹ for establishing 'that he was the first-born' [7]

The meaning of the statement is *tanmātram sūtrotpatteḥ pūrvam jagad āsīt*.

¹The sentence under reference is *tā āpaḥ satyam asṛjanta*. Also, it aims at pointing out how so *vyākṛta* 'manifest' came from *avyākṛta* 'unmanifest'.

भूतादिव्यक्ततो व्यक्तिरग्रजस्यापि नान्यथा ।
 ताः सत्यमिति तेनाह सत्यं ब्रह्मातिविस्तृतेः ॥८॥

The origin of the first-born proceeded from the (earlier) manifestation of the elements etc.¹ and not otherwise; therefore, the Śruti has stated *tāḥ satyam*, i.e. *satyam brahma*, on account of its manifesting itself in large number (of things). [8]

Earlier, i.e. in BUBV 5.4.1, it was stated that the *satya* Brahman was *upādhiviśiṣṭa* 'modified by the limiting adjunct'. This is restated in the sentence *tāḥ satyam*.

¹This refers to the *tanmātras*.

सूर्यादिकरणं देवं ब्रह्मास्राक्षीज्जगद्गुरुम् ।
 देवान्विराडपि ब्रह्मा ससर्जेत्यनुषज्यते ॥९॥

It follows that the divine Brahman, the maker of sun etc. (first) created the teacher of the world¹ and that Virāj Brahman, on its part, created the gods.² [9]

¹This is for god Prajāpati who is none other than first manifest sacrificer, the Sūtra or Āditya etc.

²This refers to the deities superintending over (or, associated with) the *prāṇas* 'sense-organs'.

एवं सत्याद्यतो जातं क्रमेण ब्रह्मणो जगत् ।
महत्सत्यमतो ब्रह्म यक्षत्वं तूपवर्ण्यते ॥१०॥

Thus, since the world became gradually manifested (lit. produced) from the *satya* Brahman, therefore the Brahman is described as *mahat* 'the great one' and its being worship-deserving¹ is now explained. [10]

¹*yakṣatva* is being *yakṣa* 'worship-deserving'.

अतीत्य पितरं देवाः पितामहमुपासते ।
यतोऽतो ब्रह्म यक्षं च सत्यं प्रथमजं विदुः ॥११॥

Since the gods, overlooking (lit. going beyond) the father,¹ worship the grandfather, therefore they have known the *satya* Brahman as worship-deserving and the first born. [11]

¹The father refers to Virāj. The line is this: *satya* Brahman → Virāj → gods.

तस्यापि ब्रह्मणो नाम त्र्यक्षरं सत्यमुच्यते ।
प्रथमोत्तमे त्वमृतमक्षरे सस्वरत्वतः ॥१२॥

And the name of the Brahman also¹ is stated as the three-letter-word; viz. *satya*,² further, the first and the third letters of the two are immortal (*amṛta*) on account of their

having a vowel.

[12]

This is the meaning of the Śruti, *tad etad ...*

¹This refers to *hr̥daya* Brahman.

²This is thus: *sa* is one letter, *t* is another and *ya* is the third.

निरच्छं मध्यतो मृत्युर्निर्जीवं देहवत्स्थितम् ।
भूयोऽमृतेन तद्ग्रस्तं मृतं चापि स्वतो यतः ॥१३॥

Between (the two letters) there is (the letter) *t* which does not have a vowel associated with it. That is *mṛtyu* and has remained like a lifeless body. And, though dead in itself,¹ it is encircled (lit. swallowed) by the immortal (pair of letters *sa* and *ya*).

[13]

This is the meaning of *madhyataḥ ...*

¹In the note above, the middle letter is shown as *t* which is without any vowel and, therefore, considered dead.

इत्येवं पर्युपासीनो नामाभिज्ञो नरः सदा ।
सत्यभूयं भवेदेव नैनमित्यादियुक्तिगीः ॥१४॥

A knowing man, ever worshipping (the Brahman) thus and conversant with the proper name (of the Brahman) which has become *satya*, would himself become *satya*— certainly thus there is a statement of the reason in the words *na enam ...*

[14]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
पञ्चमं ब्राह्मणम् ॥५॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.6

संस्थानवदथेदानीमध्यात्मे चाधिदैवते ।
रूपं प्रकल्प्य सत्यस्य भण्यते तदुपासनम् ॥१॥

After conceiving the form of *satya* in relation to the body and also in relation to the sphere of deities, there is now explained (lit. stated) the (two modes of) worship of the same which are related to the various parts of the body.¹ [1]

¹This is *saṁsthānavat*, a qualifier of *upāsana*.

अक्ष्यादित्याख्यनीडस्थौ स्थानमात्रप्रभेदतः ।
भिन्नाविव समीक्ष्येते देवतैकैव सा सती ॥२॥

(The two deities) which reside in the coteries called the Ādityas in the (two) eyes are yet considered to be different, as it were, only on account of the difference of the places (they reside in), even while there is just one and the same deity. [2]

उपकार्योपकारित्वसंबन्धेनेतरेतरम् ।
प्रतिष्ठितौ तावध्यात्मे चक्षुष्यादित्य एव च ॥३॥

They are both steady in each other through their relation as the benefactor and the beneficiary; and in relation to the body it is Āditya in the eye.

¹It is suggested that, in the sphere of gods, there is another Āditya.

प्रतिष्ठितौ तावन्योऽन्यं कथमित्युच्यते यथा ।
अक्षिण रश्मिभिरादित्यः प्राणैस्तरिंमश्च चाक्षुषः ॥४॥

(Now) is told how both of them are steady in each other: in the eye, Āditya has become steady by its rays and so also has the Āditya in the eye become steady in (i.e. through) the sense-organs (*prāṇas*). [4]

It follows from the preceding verse that Āditya in the eye illuminates the objects to be seen and Āditya in the sphere of gods, the whole world.

अरिष्टदर्शनं चात्र प्रासङ्गिकमथोच्यते ।
ज्ञातारिष्टः कथं नाम कुर्यादात्महितं पुमान् ॥५॥

And now is told here the sight of some undesirable element which arises as a matter of course. (For, otherwise) 'how could a man, who has known the (imminent) undesirable element, bring about his own good? [5]

उत्क्रमिष्यन्यदा भोक्ता भवतीहायुषः क्षये ।
चन्द्रमण्डलवच्छुद्धं वीक्षते रविमण्डलम् ॥६॥

When the enjoyer is, at the end of his life, about to leave the (body) he sees the pure orb of the sun look like the orb of the moon. [6]

रश्मयो न समायान्ति विज्ञानपुरुषं प्रति ।
भोगेन प्रक्षयाद्भोक्तुस्तद्वशीकारिकर्मणः ॥७॥

The rays do not come to the *vijñānapuruṣa* (i.e. the individual self) proper, because they get exhausted through the enjoyment by the person who does his activities (*karman*) which have brought them (i.e. the rays) under (their) control. [7]

इति श्रीबृहदारण्यकोपनिषद्वाज्यवार्तिके पञ्चमाध्यायस्य
षष्ठं ब्राह्मणम् ॥६॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA
5.7**

शरीरं व्याहृतिमयं कल्प्यतेऽक्षरविस्थयोः ।
तस्यैव सत्यनाम्नोऽथ तदुपासाप्रसिद्धये ॥१॥

Now is explained (the nature of) the body of (the Brahman), named *satya*, which is made up of the *vyāhrtis*, in order to clarify (the nature of) the worship of the two, Āditya in the eye and Āditya among the gods, in that form.¹ [1]

In the initial verse of the seventh Brāhmaṇa, Sureśvara gives the purport of the preceding Brāhmaṇa.

¹That is, in the form of the three *vyāhrtis*. These *vyāhrtis*, it must be pointed out, are not the usually known *vyāhrtis*—these are to be understood as *sa*, *t* and *ya* which form *satya* which is the name of the Brahman.

तस्यैव नामोपनिषद्ब्रह्मणो भण्यते द्वयोः ।
स्थितस्य स्थानयोः साक्षाद्यद्ग्रहात्तत्प्रसीदति ॥२॥

Now is stated the secret name¹ of that very Brahman which is residing in the two places¹ by the direct grasping of which that³ becomes favourable. [2]

¹These are two, viz. *ahan* and *aham*— these are related to the three *vyāhrtis*.

²The eye and the sky (i.e. heaven) are meant.

³This is *satya* Brahman.

हन्तेर्वेदं जहातेर्वाहरित्येतदिहेष्यते ।
पाप्मानं हन्ति तेनातो जहाति च न संशयः ॥३॥

In the context, the word *ahan* or *aham* is accepted as derived from the root *han* (together with the preposition *ā*) or from the root *hā*;¹ and then it² certainly strikes down the sin or it abandons it. [3]

It should be noted that the various worships in the Khila Kāṇḍa are ancillary or additional and not basically philosophical.

This Brahman explains the significance of worship of *satya* Brahman by each of the two names. This is based on the Brahmanical etymology of the words *ahan* and *aham*.

¹*ā-han* means 'to strike down' and *ā-hā* 'to give up'. The preposition is shortened, in each case.

²That is, *ahan* or *aham*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
सप्तमं ब्राह्मणम् ॥७॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

5.8

मनोमयोऽयमिति च तस्यैव ब्रह्मणोऽपरम् ।
स्वान्तोपाधिविशिष्टस्य ह्युपासनमथोच्यते ॥१॥

Now, in the words *manomayo 'yam*, there is stated yet another worship of that very Brahman, which is limited (lit. modified) by the adjuncts within. [1]

We should remember that the Khila Kāṇḍa pertains to various modes of worships of the Brahman, affected by the limiting adjuncts (*sopādhika*), as noted under verse 3 of the preceding Brāhmaṇa.

मनोभिमानतोऽज्ञानात्पुरुषोऽयं मनोमयः ।
यदि वा मनसि व्यक्तैर्मनसा वोपलभ्यते ॥२॥
भाः प्रकाशोऽमलं ज्योतिः सा सत्यमविनाशतः ।
तस्मिन्नित्यादिवचनं पूर्वोक्तस्थानसिद्धये ॥३॥

The word *manas* is based on its function called *abhimāna*;¹ it is on account of *ajñāna* 'ignorance'² that this Puruṣa 'the inner self' is taken as made up of *manas*; or because that becomes known owing to his manifestation in *manas*. [2]
The word *bhās* means light or spotless flame; that (= *bhās*) is *satya* for it does not (ever) perish. The words *tasmin* ... are to specify the two places (of Āditya) already stated. [3]

Here, the word *manomaya* is explained in two ways: (i) with reference to the property of *manas*, *abhimāna*, and (ii) from the substratum wherein the inner self is manifest.

¹*abhimāna* is for *abhimanana*—*manana* which is the function

of *manas*; cf. *Sāṃkhyakārikā*. This refers to *aham ity abhimānaḥ*.
²*manas* is insentient (*jaḍa*), therefore there is ignorance or darkness.

बुद्ध्युपाधिव्यवच्छेदाद्व्रीह्यादिपरिमाणता ।
 स्वतोऽनन्तत्वतो मानात्सर्वेशानादिरूपता ॥४॥

It has, on account of the limiting adjunct, viz. intellect, the magnitude of rice etc. (and) also the nature of the ruler of all, owing to its being known by itself and on account of its infiniteness.¹ [4]

This is to explain how the ruler of all can have even a small magnitude.

SP, in typical commentarial style, reads an alternative *ananta-tvato 'mānāt* Therefore the alternative translation could be: 'on account of not being known by any known means'.

¹Cf. *satyaṃ jñānam anantam brahma (Taittirīyopaniṣad 2.1)*.

5.9

विद्युद्देहस्य तस्यैव ब्रह्मणोऽन्यदुपासनम् ।
अशेषपाप्मविध्वस्त्यै श्रुत्याथ प्रतिपाद्यते ॥१॥

Now is prescribed by the Śruti yet another (mode of) worship of that very Brahman, which is in the form of lightning, in order that there is removal (lit. destruction) of the entire sins.

[1]

This verse states the purport of the ninth Brāhmaṇa.

विद्युद्ब्रह्मेति युक्तं तद्विद्युद्धि स्याद्विदानतः ।
द्यतेरेतद्यतो रूपमवखण्डनकर्मणः ॥२॥

It is (only) proper (to look on) lightning as the Brahman. Indeed, (the word) *vidyut* is derived from its act of tearing away (*vidāna*), since this form (of the word *vidyut*) is based on the root *do* 'to tear away or asunder' in the sense of the act of cutting to pieces (or *khaṇḍana*). [2]

The root *do* in the sense of *khaṇḍana* has connection with the object, the sin.

This verse gives only the verbal meaning of the word *vidyut*.

तमोऽन्धकारमखिलमवखण्डयति क्षणात् ।
विद्युद्यथा तथास्मत्तः पाप्मानं तदुपासितुः ॥३॥

Lightning destroys *tamas*¹ 'darkness', in its entirety, within a moment; therefore, (that which is superimposed on the Brahman) cuts sin away from us, i.e. its worshippers.² [3]

This verse is the statement of the result, viz. destruction of sin consisting in having ignorance about the nature of the Brahman.

¹*tamas* can be taken as darkness by the clouds and therefore can be distinguished from darkness standing for ignorance; alternatively *tamas* stands for darkening sin—this explanation is offered by SP. For bringing out that the use of both *tamaḥ* and *andhakāram* does not involve repetition.

²*asmattaḥ ... upāsituḥ* is translated here only in the plural as that is warranted by the form *asmattaḥ*— this is despite the singular form *upāsituḥ*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
नवमं ब्राह्मणम् ॥९॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA
5.10

तस्यैव ब्रह्मणोऽथान्यदुपासनमिहोच्यते ।
वाग्धेनूपाधियोगेन फलाय महतेऽधुना ॥१॥

Now is stated here (in this Brāhmaṇa) yet another (mode of) worship of that very Brahman, in accordance with its limiting adjuncts, viz. the cow in the form of speech, since that yields great result (lit. fruit). [1]

In this Brāhmaṇa the metaphor *vāgdhenu* is fully worked out.

वागित्यत्र त्रयी ग्राह्या न स्थानकरणादयः ।
स्वाहाकारादि नान्यत्र त्रय्याः संभाव्यते क्वचित् ॥२॥

Here (i.e. in this context) the word *vāc* should be understood as the Vedic triad, not the place of articulation and the functioning organ which acts etc.¹ (This is so because) *svāhākāra* etc.² are not to be found anywhere else³ than in the Vedic triad. [2]

This refers to the *sthāna* of *vāc*. The functioning organ which acts is mentioned as *karaṇa* 'sense-organs'.

¹The word etc. stands for the deity that superintends over the place of articulation and the functioning organ which acts.

²This word etc. stands for *vaṣaṭkāra*, *hantakāra* and *svadhākāra*. The utterance of *svāhākāra* and *vaṣaṭkāra* accompanies the offerings to gods. The utterance of *hantakāra* indicates invitation to a priest for the ritual act which the sacrificer undertakes. The utterance of *svadhākāra* is to accompany the offering to the Pitrs 'manes'.

³The words 'anywhere else' refer to the place of articulation, the organ (itself) and its superintending deity.

त्रयीयं धयते सर्वं स्वाहाकारादिभिः स्तनैः ।
धेनुमित्येव तां तेन सदोपासीत भारतीम् ॥३॥

This Vedic triad suckles all (human beings) by its udders in the form of *svāhākāra* etc.;¹ therefore, one should ever worship Vāc (i.e. Bhārati).² [3]

Cp. a later classical verse, i.e. *Uttararāmacarita* 5.31:

*kāmān dugdhe viprakarṣaty alakṣmīm kīrtiṃ sūte duṣkṛtan
yā hinasti /
tām capy etām mātaram maṅgalānām dhenuṃ dhīrāḥ sūnṛtām
vācam āhuh //*

¹Cf. note 3 on the preceding verse.

²This refers to the Vedic triad, not Vāc.

केभ्यः क्षरति सा धेनुरित्येतदधुनोच्यते ।
तस्यै द्वौ स्तनावित्युक्त्या कथ्यन्ते च स्तनास्तथा ॥४॥

Now is stated here as to wherefrom that cow trickles drops of milk: and to explain that are mentioned the four udders¹ in the statement *tasyai dvau stanau*.² [4]

¹The plural refers to the four udders.

²This Vedic use of the dative for the genitive.

ऋषभोऽस्यास्तथा ज्ञेयः प्राणस्तस्मात्प्रसूयते ।
अप्राणस्य न वागस्ति वागप्युच्चार्यते बलात् ॥५॥

Then (*tathā*) for this one (viz. *vāc*, i.e. cow) is to be known the bull in (the form of) Prāṇa 'sentience'. From that (Prāṇa) it produces (offspring). (Indeed), in the case of one without Prāṇa, there does not exist *vāc*, and *vāc* also is enabled to utter through strength (of the Prāṇa). [5]

वाक्प्रस्रवणहेतुत्वाद्धेन्वा वत्सो मनो भवेत् ।
यद्यद्व्यायति मनसा तत्तद्वाचा प्रभाषते ॥६॥

manas is then the calf (of that cow), since it is the cause of the trickling (i.e. activity) of *vāc*;¹ whatever one ponders over with one's *manas* is what one speaks through *vāc*.² [6]

¹This is for *vāgdhenu*.

²This is usual *vāc* 'the organ of speech'.

यथोक्तोपासनफलमुक्तब्रह्मात्मरूपता ।
तं यथा यथा इत्युक्तेरनिर्देशेऽपि गम्यते ॥७॥

The result of the worship thus stated is (now stated as an individual's) becoming of nature (lit. form) of the Brahman. (In this case), this (viz. result) is to be understood even while there is no mention of the result, in the words *taṁ yathā yathā*. [7]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
दशमं ब्राह्मणम् ॥१०॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.11

उपास्त्यन्तरमस्यैव कौक्षेयाग्नेर्वपुर्भूतः ।
अयमग्निरिति श्रुत्या यत्नेनाथ विधीयते ॥१॥

Now is carefully (*yatnena*)¹ prescribed yet another (mode of) worship of this very (Brahman) which possesses a body, viz. what is fire in the stomach of beings (i.e. *Vaiśvānarāgni*), in the Śruti *ayam agniḥ*² [1]

Cf. *Gītā* 15.14ab: *aham vaiśvānaro bhūtvā prāṇināṃ deham āśritah*.

¹Cf. SP: *upāsyārthasya sākṣāttvakathanam yatnah*.

²This refers to BU 2.9.1.

वैश्वानरगिरास्याग्नेः सामान्येनाभिधानतः ।
योऽयमन्तरितीत्युक्त्या तद्विशेषणमुच्यते ॥२॥

After there is a general mention of this Agni in the words *vaiśvānarāgni*, there is then stated specification (of the same) in the statement *yo 'yam antāḥ....*¹ [2]

¹This also refers to BU 2.9.1.

तस्याग्नेरेष घोषः स्यात्कर्णौ प्रोर्णय यच्छ्रुतिः ।
उपास्यार्थस्य साक्षात्त्वं घोषरूपेण वर्ण्यते ॥३॥

This is the loud noise (*ghoṣa*) or 'roaring' of that fire, which is heard by one after one has closed (or covered) one's ears; the direct perceptibility of the object of worship (viz. *Vaiśvānarāgni*) is explained as that which has a form of *ghoṣa*.¹

[3]

¹SP states *kaukṣeyaṃ hi jyotir iha spaṣṭayitavyam brahmaṇas tadupādhikasyopāśyatvāt*.

अरिष्टदर्शनं चात्र प्रासङ्गिकमथोच्यते ।
नैनं घोषं शृणोतीति प्रत्यासन्नमृतिर्नरः ॥४॥

And now, as a matter of course, is stated in the words, 'he does not hear this *ghoṣa*' that there is the possibility of some danger, i.e. the man's death is imminent. [4]

This is similar to the statement at BUBV 5.6.5 above.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
एकादशं ब्राह्मणम् ॥११॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.12

गतिः फलं च वक्तव्यं पर्वत्र तदनुविततः ।
उपासनानां सर्वेषामित्यर्थः पर आगमः ॥१॥

(Now) is to be told the aim and the result of all the Upāsanās as there has been no mention of them in the earlier (portion of the Upaniṣad), therefore there follows the subsequent (portion of) the scripture. [1]

This is the general purport of this Brāhmaṇa.

उत्क्रामति यदा विद्वाञ्शरीरादायुषः क्षयात् ।
आश्वेव वायुं दुर्भेद्यं स आगच्छति वेगवान् ॥२॥

When, at the expiration (of the length) of life, the knower (of the Brahman) moves upwards (*ut-*) from the body, then he, possessed of speed, quickly¹ reaches Vāyu which is impregnable. [2]

There are explanations of different words occurring in this Brāhmaṇa.

¹This refers to CU 8.6.5: *sa yāvat kṣipyen manas tāvad ādityaṃ gacchati*

प्राप्ताय लोकभोगार्थं वायुस्तस्मै विगच्छति ।
कियच्छिद्रं मरुद्द्याद्रथचक्रखमानगीः ॥३॥

As he arrives there for the enjoyment of the region, Vāyu gives way to him. (At this, in answer to a question:) 'Of what size does Vāyu offer him a hole (i.e. the way for him)?', there is (an answer in) the statement of the magnitude of the hole

in the chariot.

[3]

द्विकाष्ठसंतताघातमाडम्बरमिहोच्यते ।
भेरीं च दुन्दुभिं विद्यात्तेनोर्ध्वं यात्युपासकः ॥४॥

Here is stated the *ādambara* which means continuous beating (of a drum) by two sticks. One should know *dundubhi* in the sense of a *bherī* 'drum'. The worshipper goes upwards through that (viz. the hole in the drum). [4]

लोकं प्रजापतिं ब्रह्म प्रैत्यसौ भावनाबलात् ।
अशोकमहिमं चेति दुःखतद्वेतुर्वर्जितम् ॥५॥

(Then) he reaches the region, viz. (of) Prajāpati, (then) the Brahman, on account of the strength of his devotion. The region is described as devoid of sorrow¹ and pain because it is free from any misery and its cause. [5]

¹*aśoka* refers to physical (*śārīra*) pain and *ahimam* refers to mental pain.

शाश्वतीश्च समा नित्या अस्मिन्ललोके वसत्यसौ ।
पूर्वत्रानुक्तकार्याणामुपास्तीनामिदं फलम् ॥६॥

Then he stays there in this region for ever-lasting years (*śāśvatīḥ samāḥ*). This is the result of the (modes of) worship whose results (or effects) were not stated. [6]

SP points out that, since the results of the modes of worship of *hr̥daya*, *satya* etc. have been already stated, this verse refers to various other modes of worship whose effects have not been stated.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
द्वादशं ब्राह्मणम् ॥१२॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.13

ज्वरादिव्याधिना तप्तो व्याधितस्तप्यते तु यत् ।
परमं तत्तपश्चिन्त्यं परमं लोकमीप्सता ॥१॥

That one is pained (or, tormented) by the diseases like fever etc. and that one is pained (i.e. tormented), be considered as the highest penance (*tapas*) done by one who desires for the highest region (viz. the Brahman). [1]

In the earlier Brāhmaṇas, there have been stated some modes of worship, together with their results, and now there is a discussion of some modes of worship not related to the Brahman proper.

व्याधिग्रहग्रहाविष्टोऽसह्यं दुःखं समश्नुते ।
तपोऽतः परमं हि स्यात्तच्चिकित्सामकुर्वतः ॥२॥

A person experiences unbearable pain as he is afflicted by the goblins in the form of the attacks of (i.e. seizure by) diseases. Therefore, penances are indeed the highest (pain for a person), who does not censure it.² [2]

¹The word *graha* is used twice. The first *graha* with *vyādhi* stands for the attack of some disease and the second *graha* is metaphorically understood as goblins.

²This is the meaning of the words *cikitsām akurvat*. Normally *cikitsā* refers to treating of some disease, i.e. ascertaining the nature of the disease and determining the medicine for it. In *tapas* there is no scope for anybody's becoming sorry for it. In other words, *cikitsām akurvat* means 'One who does not fret

over it' (*anindā* is *aviṣāda*).

निर्हरन्त्यृत्विजोऽरण्यमन्ये वा मां मृतं गृहात् ।
परमं तदपि ध्येयं वानप्रस्थेन संमितम् ॥३॥

(A person should think thus:) 'That either the *ṛtviks* or others take me out of my house, when I shall be dead is also to be considered as the highest penance).' This is on par with the state of a person's taking to the stay in the forest. [3]

This is the meaning of *etad vai paramaṁ tapo yaṁ pretam*

अभ्यादधति यच्चाग्नौ प्रेतं मां ज्ञातयोऽथ तत् ।
परमं तदपि ध्येयमग्न्यावेशसमत्वतः ॥४॥

(Also he should think:) 'And that the relations put me into the fire when I am dead is also to be considered as the highest (penance), since that is similar to entering into the fire.' [4]

उचितं यस्य यद्यत्स्यात्तत्तल्लोकगिरोच्यते ।
तपसस्तापसस्यैवमग्न्यावेशस्य यत्फलम् ॥५॥

In the words of *loka*¹ is stated the result, viz. that whichever is proper in the case of each of *tapas*, *tāpasa* and putting (the dead body) into fire. [5]

Ordinarily, there is (but) one statement about the result of (any) *upāsanā*, viz. *paramaṁ haiva lokaṁ jayati*. But, here are meant different *Upāsanās* and different results.

¹Here the word *loka* stands for the results achieved by different modes of worship or various kinds of the *upāsanās*.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
त्रयोदशं ब्राह्मणम् ॥१३॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.14

अन्नं ब्रह्मेति निर्वक्ति पुरेवान्यदुपासनम् ।
उदारफलसिद्धयर्थं तस्य न्यायेन निर्णयः ॥१॥

The words (of the Śruti) *annam brahma* state,¹ as before, another mode of worship (viz. other than that of the Brahman). In order that there follows more profuse result, there is now a decision (about that) with proper reason. [1]

In the three previous Brāhmaṇas, the Śruti has discussed (those modes of) worship which were not related to the Brahman. But, here, (in this Brāhmaṇa), is discussed the worship of the Brahman proper. This is the purport of this Brāhmaṇa.

In the case of other modes of worship like those of *anna* and *prāṇa*, which involved the view of the Brahman in some things other than the Brahman, there do follow some results but actually viewing the non-Brahman as the Brahman meant greater result followed them. That is discussed here (in verses that follow) with proper reason so as to establish the same.

¹*nirvakti* here is only *vakti*.

अन्नमेव परं ब्रह्मेत्येक आहुर्विपरिचतः ।
तत्तथा नावगन्तव्यं क्लिद्यत्यन्नमसुं विना ॥२॥

Some wise men have declared that *anna* alone is the highest Brahman.¹ But that should not be so accepted, (because) *anna*, which is without *Prāṇa*, becomes putrid. [2]

Regarding the Brahman (i.e. Ātman), it is said in the *Gītā*

2.24ab: *acchedyo 'yam adāhyo 'yam akledyo 'śoṣya eva ca*. The verb root *klid* means 'to get wet, to become putrid or rotten'.

¹Cf. BU 5.12.1.

प्राणो ब्रह्मेति चाप्यन्ये तच्च ग्राह्यं पुरेव न ।
अत्रादृते यतः प्राणः शोषमाशु निगच्छति ॥३॥

And also, some others (have declared), 'Prāṇa is the Brahman'.¹ And that also is not to be accepted, as before;² (this is so) owing to that, without food, Prāṇa quickly withers up. [3]

Sureśvara considers that the words *anna* and *prāṇa* without each other would not be properly having the characteristics of the Brahman. He bases his argument probably on the statement in the *Gītā* as noted under the preceding verse.

¹BU 4.1.3; CU 4.10.4; *Kauṣītakyupaniṣad* 2.1; *Taittirīyopaniṣad* 3.3.

²It is as in the case of *annam brahma* as mentioned above.

ब्रह्मत्वं नानयोर्यस्मादेकैकस्य न युक्तिमत् ।
संभूय देवते तस्माद्ब्रह्मत्वं संनिगच्छतः ॥४॥

Since (each of) these two,¹ taken singly, does not reasonably have the nature of the Brahman; therefore, the two deities of those, joining together, obtain the nature of the Brahman. [4]

¹It refers to *anna* and *prāṇa*.

तदेतत्संप्रधार्याह प्रातृदः पितरं किल ।
किंस्विदित्यादि संहृष्टस्तद्वोषस्यासमीक्षणात् ॥५॥

Having well considered this (in mind), (i.e. ascertaining, a person called) Prātr̥da is reported to have said to his father, *kiṃsvit* ... 'Should I indeed ... ', surprised as he was by the

worshippers' not seeing a fault (in worshipping what was other than the Brahman).² [5]

¹This has reference to the sentence in BU 5.12.1.

²Read SP: *guṇahīnoktabrahmaṇopāstau doṣasyeti*.

किंस्विदेवंविदे साधु कृत्स्नसाध्वाप्तिहेतुतः ।
कुर्यामसाधु वा तस्मै सर्वासाधुनिराकृतेः ॥६॥

(He meant) 'Could I do (any) good to the person, who knows thus,¹ for the reason that he has obtained all good (or, everything),² or could I do him any evil owing to his having discarded all that is not good?'³ [6]

This explains the meaning of the sentence *kiṃ svit ...*

SP points out the purport of the sentence thus: the worshipper of the Brahman, in the form of *anna* or *prāṇa*, has his desires fulfilled, and, therefore, does not have anything to obtain or to discard.

¹That is, who knows *anna* and *prāṇa* as the Brahman.

²Namely, since, by his worship, he has obtained all his desires.

³His proper worship has avoided all untouched happenings.

पाणिना मैवमित्युक्त्या तं पिता प्रत्यषेधयत् ।
संभूय परमत्वं कः स्वतोऽशक्तिरवाप्नुयात् ॥७॥

With the words 'Do not (think or, say) like this', the father prohibited him by the (wave of his) hand. He asked, 'The state of being the highest (can be obtained by these two) being together. Who, himself without ability, could obtain (that)?' [7]

The meaning of the question in the second line is: A worshipper of only *anna* or only of *prāṇa* would become one with the objects of his worship and would not have ability to attain the highest status, viz. the nature of the Brahman.

स्वतोऽशक्तिमतोलोके शक्तिर्योगेऽपि नेक्ष्यते ।
जात्यन्धयोर्न योगेऽपि शक्ती रूपवदीक्षणे ॥८॥

Nowhere in this world is seen ability of (any) two (individuals), each one of whom has, on his own, no ability, even when they are in union; there is no ability for seeing objects that have forms in the case of two persons who are (both) born blind. [8]

This verse points out that the union of any two persons each of whom has no ability of his own, is also ineffective. This is made clear by the illustration in the second line. Read SP (at the beginning of the comment on the next verse): *aśaktānām mitho yoge 'pi na śaktiḥ*.

तस्माच्छक्तिमतोरेव ग्रासांशानां यथा तथा ।
तृप्तिशक्तिरिहापि स्यात्प्राणात्राद्यात्मनोर्युतौ ॥९॥

Therefore, as (there is capacity of bringing about satisfaction) in the case of two of the morsels of eatables, which alone are (then) capable (for that purpose), in the union of *Prāṇa* and (eatable) food, so also is here the capacity of (effecting the union with the Brahman) in the union of *prāṇa* and *anna*. [9]

न चेत्परमतां यातः कथं परमतोच्यताम् ।
प्रत्येकं शक्तिमतत्वोक्तिर्वीत्यादिवचसोच्यते ॥१०॥

Let it be said: If a person does not attain the status of the highest (by worshipping *anna* and *prāṇa* together), how could there be (for him) the nature of the highest achieved? The answer is given in the words *vi* ... by the statement of each (of *anna* and *prāṇa*) as having the capacity. [10]

The second line of this verse is fully explained in the following verses.

व्याख्यानाय तु वीत्यस्य त्वन्नं वै वीति भण्यते ।
 अत्रे विष्टानि सन्त्येव भूतत्वं यान्ति येन हि ॥११॥
 अत्रविष्टानि सर्वाणि भूतानीत्यत्रमुच्यते ।
 वीति तेन सदा प्राणो रमित्येवमिहोच्यते ॥१२॥
 प्राणे सति रमन्ते हि लोके दृष्टानि सर्वदा ।
 भूतानि रमिति प्रोक्तस्तस्मात्प्राणोऽपि सूरिभिः ॥१३॥

Just (*tu*) for explaining *vi* ..., it is said (in the Śruti) *annam vai vi*, (which means), since only on having entered into food, (the elements) they come to have the nature of the elements,

[11]

therefore, food is called all the elements that have entered into (i.e. supported in) food. Therefore, they are ever (called) *vi* Similarly, *prāṇa* is called here *ram*.

[12]

In the world are seen the elements enjoying happiness while *Prāṇa* is there among them. Therefore *Prāṇa* also is called by the wise ones as *ram*.

[13]

These are two instances of the symbolic references to *anna* and *Prāṇa* (viz. *vi* and *ram*), and also their Brāhmaṇical etymologies: *vi* stands for *viṣṭa*, which seems to be an abbreviation from root *viṣ*, so also *ram* from root *ram*.

स्वतो गुणवतोरेवमत्रप्राणात्मनोर्भवेत् ।
 संभूय परमत्वं हि फलोक्तिः सैव योदिता ॥१४॥

Thus, there would be (the attainment of) the highest status for the two which are of the nature of *anna* and *Prāṇa* and which are (in their own nature) possessed of capacities, when they have continued together. (This is to say:) 'That is the statement of the result which is (thus) described'.

[14]

This refers to the Śruti: *sarvāṇi ha vā asmin* ... and it is taken

as the statement of the result for a person who worships *anna* and Prāṇa together as the Brahman.

विशन्ति सर्वभूतानि ह्यत्रभूते प्रजापतौ ।
रमन्ते प्राणभूते च फलमेतदुपासितुः ॥१५॥

Indeed, all the elements enter into Prajāpati, who has become *anna* and feel delight (in him) who has become the Prāṇa. This is the result for him, who worships this (union of *anna* and Prāṇa). [15]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
चतुर्दशं ब्राह्मणम् ॥१४॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.15

उक्थादिगुणपूगेन विशिष्टस्यानरूपिणः ।
उपासनमथेदानीं ब्रह्मणो भण्यते परम् ॥१॥

Now hereafter is stated the worship of the Brahman in the form of *ana* (i.e. *Prāṇa*) which is characterized by the multitude of qualities beginning with *uktha*.¹ [1]

¹The word *ādi* in *ukthādi* refers to *yajus*, *sāman* and *kṣatra*. And *uktha* stands for the *ṛc*.

उक्तं प्राणः कुतो यस्मात्प्राणे सति चराचरम् ।
उत्थापयति कर्मेदं कर्ता वा नान्यथा ततः ॥२॥

*uktha*¹ is *Prāṇa*. Why? (It is so) because while there exists *Prāṇa* (in a body), an agent can raise (i.e. perform) movable and/or immovable² to an (i.e. any) activity—is not possible in any way other than that. [2]

¹The word *uktha* stands for what is known in Vedic ritual as *śāstra*; this latter is derived from the verb root *śamś* 'to praise, to recite'. Therefore, it means a praise comprising one verse (*ṛc*) or more. Actually, *uktha* is derived from the verb root *vac* 'to speak, to utter' and therefore means 'prayer'. See [Vol.4;1991] Introduction, where we have pointed out the relation between *uktha* and the R̥gvedic Upaniṣads. Yet Sureśvara derives this word in a different way (of course, following the Upaniṣad which retains the Brāhmaṇa style of etymologising)—cf. *Jaiminīya Brāhmaṇa* 2.24: *tān ukthair utthāpayati tad ukthānām ukthatvam*; and *Śatapatha Brāhmaṇa* 10.4.1.4: *eṣa u eva ukthasyaitad annam*

than tad uktham, and also Śaṅkara who follows suit!). Obviously, *uktha* is derived here from verb root *ut-sthā* (in causal) 'to raise' and means 'what raises'. This *uktha* is *Prāṇa*, as declared in this verse, and also identical with the Brahman—cf. *brahman* which is *anarūpin* in verse 1 above.

²The words 'movable and immovable' refer to *punṇyā-* and *apunṇya-karmans* (SP).

वीरश्चोक्थात्मवित्पुत्र उपासीनस्य जायते ।
दृष्टं फलमदृष्टं तु ह्युक्थस्यैकात्म्यमश्नुते ॥३॥

To him, who is the worshipper (of *uktha*), is born a son who is brave and also a knower of the nature of *uktha*. (There is a) seen result (or reward of this) *uktha*¹ and (*tu*) also an unseen result in that he (i.e. the worshipper) attains oneness with the Ātman. [3]

¹This refers to *śāstra* in Vedic ritual, as mentioned above, yielding (at times) some worldly (known) results also.

यजुश्च प्राण एवेति सदोपासीत यत्नतः ।
कुतौ यजुष्ट्वं तस्येति युक्तिलेशोऽभिधीयते ॥४॥
युज्यन्ते सर्वभूतानि संहन्यन्ते परस्परम् ।
प्राणे सति यजुस्तस्मात्फलोक्तिः पूर्ववत्तथा ॥५॥

yajus also (*ca*) is but *Prāṇa*; if one should worship with attention/care.¹ Why is there the character of *yajus* in that (viz. *Prāṇa*)? With regard to that, (here) is stated some (*leśa*) reason. [4]

Because *yajyante sarvabhūtāni*² means 'They get mixed with one another', when there exists *Prāṇa* (in them),³ therefore, it is *yajus*;⁴ (and) the result (which follows) is also like the one (stated) before. [5]

This is to explain *prāṇe hīmani...* (BU 5.15.2).

¹SP paraphrases *yatna* as *ādara* 'respect' and alternatively as

nairantarya 'continuity'.

²This indicates the derivation of *yajus* from verb root *yuj* 'to unite, to get mixed (with another)'!

³Cf. verse 2 above.

⁴The word *yajus* is usually derived from verb root *yaj* 'to worship, to offer'. Also cf. *Jaiminīya Upaniṣad* 1.40: *vāg eva yajuḥ, vācā hi yajur anuvartate*. This indicates the recitation of a prose formula for offering.

सामापि प्राण एवेति कथं तदिति भण्यते ।
सम्यञ्चि सर्वभूतानि प्राणे सति यतस्ततः ॥६॥

sāman also is *Prāṇa*. How is it (so)? It is stated (thus): Because all the beings assemble (*añc*) together, (only) when *Prāṇa* exists there (in them); therefore (it is so). [6]

क्षत्रं च प्राण एवेति चिन्तयेत्सततं हृदा ।
त्रायते हेति युक्त्युक्तिः क्षत्रत्वस्य प्रसिद्धये ॥७॥

kṣatra also is but *Prāṇa*: (thus) should one entertain (lit. meditate) in mind (lit. heart). 'Because it protects' is the statement of the reason (adduced) for establishing the character (of *Prāṇa* as *kṣatra*). [7]

क्षणितोर्हि क्षतात्प्राणस्त्रायते न तु तं विना ।
क्षत्रं प्राणस्ततो ज्ञेयो यथोक्तन्यायगौरवात् ॥८॥

Because *Prāṇa* protects (one) from an injury (caused) by an injuring (person/thing)¹; and (*tu*) there is none other than that (for protection). Therefore should it be known that *Prāṇa* is *kṣatra*, out of regard for the reason² stated. [8]

¹Cf. *Raghuvaṃśa* 2.53: *kṣatāt kila trāyata ity udagraḥ kṣatrasya śabdo bhuvaneṣu rūḍhaḥ*.

²Note Suresvara's use of *nyāya* in the sense of reason, viz. cause.

प्राप्नोत्यत्रमसौ क्षत्रमत्रातृकमनीश्वरम् ।
स एव त्राता सर्वस्य ह्यत्र क्षत्रमतो भवेत् ॥९॥

He ¹ attains here ² the character of an eater (of all food), viz. *kṣatra*, which does not have a lord (or ruler) over (it). He himself (becomes) the protector of all, the eater (of all food) and *kṣatra*.³ [9]

¹This refers to the worshipper of Prāṇa.

²That is, in/by the worship of Prāṇa.

³This indicates the worshipper's union/oneness with Prāṇa.

इति श्रीबृहदारण्यकोपनिषद्वाङ्मयवार्तिके पञ्चमाध्यायस्य
पञ्चदशं ब्राह्मणम् ॥१५॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

5.16

हृदयं सत्यमित्यादिबहूपाधिसमाश्रयम् ।
उपासनमतिक्रान्तं ब्रह्मणः फलवद्बहु ॥१॥

So far has been described (in the Brāhmaṇa) beginning with *hrdayam satyam* the worship (of various kinds) in relation to many limiting adjuncts (of the Brahman), which is profusely fruitful. [1]

SP states the connection of this Brāhmaṇa with its immediately preceding Brāhmaṇa (viz. BU 5.15). This is, according to him, the reference in this verse. Yet the words *hrdayam satyam* refer to the third Brāhmaṇa onwards (viz. BU 5.3-15) and this is according to Śaṅkara—Sureśvara follows him.

सर्वोपाध्युपसंहारिगायत्र्युपाधिकं प्रभोः ।
अधुनोपासनं वाच्यमित्यर्थः पर आगमः ॥२॥

Now is to be discussed (lit. stated) the worship of the All-pervader (*prabhoh*), who has the limiting adjuncts of Gāyatrī that concludes (the sphere of) all the limiting adjuncts. For this purpose, there follows the subsequent text of the Śruti. [2]

sarvopādhyupāsanhāri refers to the purport of the Gāyatrī Brāhmaṇa (viz. BU 5.16) which now begins.

उदारफलसंप्राप्तावैश्वर्यं तत्र तत्र हि ।
श्रुतं श्रुतौ हि गायत्र्यास्तदुपास्तिर्वरा ततः ॥३॥

Since,¹ in the different portions (lit. here and there in the

Śruti) is heard great richness (*aiśvarya*) in the obtainment of profuse fruit through (lit. from) Gāyatrī (the deity of the metre) indeed;² therefore, the worship of that is superior to them (all).³ [3]

¹This refers to the first *hi* in the verse.

²This refers to the second *hi* in the verse.

³That is, the other modes of worship.

उदारफलसंबन्धो ब्राह्मणस्यैव नान्यतः ।
ब्राह्मणस्य च गायत्री कारणं तेन सा वरा ॥४॥

Enjoying (lit. connection with) profuse fruit is only in the case of a Brāhmaṇa and not of anybody else, and Gāyatrī is the origin¹ of a Brāhmaṇa; therefore, that one is considered as superior. [4]

¹This is for *utpattikāraṇa*; cf. Śruti: *brāhmaṇo vyutthāya ...* (BU 3.6.1) and also *gāyatrī brāhmaṇam asṛjata. anyataḥ* (untraced) is for *anyasya*.

BU 5.16.1 is under reference.

भूमिरित्यादिवाक्येन त्रिलोक्यष्टाक्षरोच्यते ।
अष्टाक्षरं पदं सिद्धं गायत्र्याः प्रथमं च यत् ॥५॥

In the sentence beginning with the word *bhūmiḥ*, there is mentioned (the collection of) the three worlds (whose names together) comprise eight letters; thereby is established that foot¹ of Gāyatrī which is its first. [5]

This verse refers to *bhūmi* (two letters), *antarikṣa* (four letters) and *dyaus* (two letters)—this refers to the Vedic practice of accepting the word *dyaus* as bi-syllabic, viz. *diaus*. This is an instance of the known mystical Brāhmaṇical equations.

¹*pada* stands for 'a foot of a metre'.

अष्टाक्षरत्वसामान्याद्गायत्र्याः प्रथमं पदम् ।
तच्चेदं चैकतामेति संख्यासामान्यहेतुतः ॥६॥

On account of the similarity in having eight letters, the first foot of Gāyatrī and that, viz. this (triad of worlds), become one, the reason being the equality of numbers.¹ [6]

Because there are eight letters in *bhūmiḥ* ... and also in the foot of Gāyatrī, therefore they are equal. So also, because the number three is common, therefore Gāyatrī is equated to the three worlds. Thus, there are two levels considered; the level of words and the level of mystic oneness. This is explained in the following verse.

¹The verse in Gāyatrī metre has three feet and there are three worlds, *bhūmi*, *antarikṣa* and *dyaus*.

त्रैलोक्याभिहितिरियमष्टाक्षरसमत्वतः ।
गायत्र्याद्यपादसमतो विराजात्मैक्यमश्नुते ॥७॥

This mentioning of (the collection of) the three worlds is owing to the equality in respect of eight letters. Because of the equality with the first foot of Gāyatrī, (a worshipper) attains oneness with Virāj. [7]

The three worlds together are Virāj and, therefore, the knowledge of the first foot of Gāyatrī as having the nature of the three worlds together means that one attains the nature of Virāj.

एवं पदं त्रयो लोका अभिधानाभिसंगतेः ।
अत्यन्तमभिधेयस्य विराजैक्यं प्रपद्यते ॥८॥

Thus, by construing together the expressions, viz. the foot (of Gāyatrī) and the three worlds, a worshipper acquires oneness with Virāj, which is the ultimate end (*atyantam*) of (this)

expression.¹

[8]

¹Possibly, what is to be said, viz. equality (of them). This is clarified in the following verse.

उक्ताभिधानद्वारेण संपन्नो यस्त्रिलोकताम् ।
यथोक्तोपासनाभ्यासाद्विराडेव भवेदसौ ॥९॥

He, who has thus obtained the nature of (the collection of) the three worlds through the already stated expression himself becomes Virāj, by the repetition of the worship thus stated.

[9]

The worship consists in meditating on the first line of Gāyatrī as identical with the three worlds together.

त्रिषु लोकेषु यावत्स्यात्पुंभोगायेह साधनम् ।
तावत्सर्वं जयत्याशु प्रथमोपास्तितः फलम् ॥१०॥

Whichever is in the three words the means of/for the enjoyment of a man, all that he easily (lit. quickly) wins; this is the result from (i.e. of) the worship of first foot (of Gāyatrī).

[10]

In the previous verse, there was a mention made of the Śrauta result of the worship under reference and in this verse there is now a mention of a non-Śrauta result (of the same).

रूपराशिरशेषेण भूम्याद्युक्त्योपसंहृतः ।

(Thus), by the mention of *bhūmi* etc. is stated together the entire mass of what has forms (viz. the mass of different things).

[11ab]

BU 5.16.2 is under reference.

ऋच इत्यादिना ज्ञेया नामराश्यापसंहतिः ॥११॥

By the words *ṛcaḥ* etc.¹ is to be understood (the collection of) what are names.² [11cd]

¹The word etc. stands for *yajūṃṣi* and *sāmāni*.

²This refers to the form of the second foot of Gāyatrī.

अभिधेयाभिधानाख्यराशी नित्यौ व्यवस्थितौ ।
परस्पराभिसंबन्धौ गायत्रीवर्त्मनोदितौ ॥१२॥

The two collections of what is to be named and what is name are thus clearly enumerated (*vyavasthitau*); (the two) having close (*abhi*) mutual relationship are expressed in the way of (the mention of the first two feet) of Gāyatrī. [12]

ऋगादेरभिधानस्य यावती व्याप्तिरिष्यते ।
तावत्सर्वमवाप्नोति यथोक्तोपासनान्नरः ॥१३॥

Whatever is extent of that (which is conveyed by the) name *ṛc* (i.e. Rgveda etc.) is all that a man attains through the worship already stated. [13]

व्याख्या तुल्यैव पूर्वेण वाक्येनोत्तरवाक्ययोः ।
अक्षराणामिह ज्ञेया नातो व्याख्यायते पुनः ॥१४॥

The explanation of the two subsequent statements is the same as that of the previous (i.e. first) sentence, i.e. in respect of (the number of) letters here. Therefore, it is not stated again. [14]

BU 5.16.3 is under reference.

कर्मराशिरथेदानीं प्राण इत्यादिनोच्यते ।
विधृतिः पूर्वयोः प्राणो मधुकाण्डे यथोदितः ॥१५॥

Now, in the words beginning with *prāṇa* is mentioned the mass of ritual actions. That *prāṇa* is the supporter of the two former collections¹ is stated in the Madhu Kāṇḍa.² [15]

¹Supply: of names and forms in the earlier portion of Brāhmaṇa.

¹This refers to BU 1.5, i.e. Saptāṇṇa Brāhmaṇa.

प्राणात्मानं यथोक्तेन पादेनापाद्य यत्नतः ।
प्राणात्मैव भवत्याशु सदा तद्भावभावितः ॥१६॥

Having carefully understood the nature of Prāṇa as consisting in (the third) foot of Gāyatrī, as stated (before), (the worshipper), having ever devoted himself to become that (Prāṇa), soon becomes (possessed) of the nature of Prāṇa.

[16]

SP adds that the worship of the second foot of Gāyatrī has also a similar result. This is very likely to be becoming equal in status to the Trayī, or all that is nameable.

अभिधेयोपसंहारस्त्रिलोकीवचसोदितः ।
ऋच इत्यादिना तद्वदभिधानोपसंहतिः ॥१७॥

In the statement of (the collection of) the three worlds, there is expressed the collection of all that is to be expressed. And, (in the statement) beginning with the word *ṛcaḥ*, there is similarly (a statement of) (the collection of) all the names.

[17]

कर्मणोऽप्युपसंहारः प्राण इत्यादिना तथा ।
एतावद्वस्तु जगति गायत्रीपादसंश्रयम् ॥१८॥

In the same way, in the words beginning with *prāṇa*, there is (a statement of) the collection of (the content in ritual)

activity. So far, (there has been a statement made about) the collection of things in the worlds as what rests on (the three) feet of Gāyatrī. [18]

अभिधेयस्य गायत्री यस्येयं त्रिपदा मता ।
तस्याभिधित्सयेदानीं प्रारब्धैषोत्तरा श्रुतिः ॥१९॥

Now the subsequent portion of Śruti begins with the intention of stating that which(ever) is to be named or expressed, viz. consisting in which is taken Gāyatrī having three feet. [19]

SP points out that this refers to the explanation of Hiranyagarbha which is of the nature of Āditya.

¹Alternatively, expressive of which.

व्याचष्टे स्वयमेवार्थं तुर्यादिपदसंहतेः ।
यद्वै चतुर्थमित्यादिवचसा यत्नतः श्रुतिः ॥२०॥

The Śruti itself carefully (or regardfully) explains the meaning of the unit of words beginning with *turya* in the statement beginning with the words *yad vai caturtham*. [20]

रागो रज इति ज्ञेयः प्रवृत्तेः कारणं तु यत् ।
रञ्जनं काम आसङ्गः सर्वानर्थकृदात्मनः ॥२१॥

It is colour (*rāga*) that is to be taken (or known) as *rajas* and the cause of this usage of it is (the act of) colouring, viz. desire (or) close attachment (to the objects) which causes all undesirable (effects) on the individual self. [21]

The verse uses the word *ātman* in the sense of Jīva. SP justifies it with *Gītā* 2.62c: *saṁgāt saṁjāyate kāmah*

तं क्रमित्वोपरि स्थित्वा तपतीति क्रियापदम् ।
भूतानि वा रजोवाचा भण्यन्तेऽत्राखिलानि तु ॥२२॥

The verb *tapati* means (i.e. refers to) transgressing (from verb root *kram*) that and remaining above (the same). And (*tu*) here (in the BU sentence) are expressed all the *bhūtas* 'elements' by the expression *rajaḥ*. [22]

उपर्युपरि तान्येष तपत्युल्बणरश्मिवान् ।
 श्रीयशोभ्यां यथैवायं तपत्येवमुपासकः ॥२३॥
 गुणैः सर्वानतिक्रम्य स्थित्वोपरि श्रिया ज्वलन् ।
 यशसा च सुदीप्तेन विद्वांस्तपति विद्विषः ॥२४॥

As this one (i.e. Āditya), of very powerful rays, shines over and above (*upary-upari*) them, so also the worshipper (who is) thus (devoted to Gāyatrī) shines with glory and fame. [23]
 A knower (of the nature of Gāyatrī) causes torment to his haters by his brilliantly shining fame, after having overcome all of them by his excellences, and thus, having stood over and above (them), with exceedingly shining (lit. burning) fame. [24]

These two verses explain the contents of verse 22 above.

कामितार्थस्य लब्धत्वात्सर्वग्रहणमात्रतः ।
 उपर्युपरीति वीप्सा किमर्थमिति भण्यते ॥२५॥

(An objection is raised:) 'Since, by the very mention of the word *sarva*, all the desired objects are understood (lit. grasped), for what purpose is there then a repetition mentioned (in the words) *uparyupari*?' [25]

नैव दोषो यतो येषां सूर्यः स्यादुपरि स्थितः ।
 लोकानां सर्वशब्देन तेषामेव ग्रहो भवेत् ॥२६॥
 पराञ्चो ये रवेर्लोकास्तेषामपि परिग्रहः ।
 कथं नु नाम सिद्धः स्यादतो वीप्सा प्रयुज्यते ॥२७॥

(The answer is given:) This¹ is not at all a fault, because there would be grasping (i.e. understanding) from the word

sarva of only those regions above which the sun is shining (lit. standing). [26]

(For) there is grasping of even those regions, which are beyond (the light of) the sun, (and since there would be a difficulty) as to how that (understanding) would be possible (lit. established), there is therefore repetition employed, (in the words *uparyupari*). [27]

¹This refers to the so-called repetition.

BU 5.16.4 is under reference.

व्याख्याता या पुरा यत्नाद्गायत्री जगदात्मिका ।
मूर्तामूर्तरसे भानौ त्रिपादेषा प्रतिष्ठिता ॥२८॥

That Gāyatrī, which has been so far explained as having the nature of the entire world (*jagat*), is, with its three feet, supported in the sun which is (the very) essence of *mūrtāmūrta*. [28]

This is the meaning of *saiṣā* ... (BU 5.14.4).

तदपीदं पदं तुर्यं सत्येऽध्यात्मे प्रतिष्ठितम् ।
अक्षिण प्रकाशरूपे हि सर्वं रूपं प्रतिष्ठितम् ॥२९॥

And that, viz. this fourth foot (of Gāyatrī), in relation to the body also is supported in truth (*satya*); indeed in the eye, which is of the nature of light, is all (that has) form is supported. [29]

This explains the meaning of *tad vai tat satye pratiṣṭhitam*.

किं पुनस्तत्सत्यमिति सत्यं चक्षुरितीर्यते ।
चक्षुषः सत्यता कस्मादिति चेदुच्यते तथा ॥३०॥

(The question is:) 'What again is (that) *satya*?' Therefore (in

answer) it is stated (*iti*) the nature of the truth (*satyatā*) abiding in the eye. Again, if (the question is): 'Why?', it is likewise (*tathā*) answered (now):¹ [30]

¹That is, in the following two verses.

तस्मादित्यादिवाक्येन सत्यताक्ष्णो विभाव्यते ।
दृष्टं मृषापि श्रवणं न तु दृष्टिर्मृषेक्ष्यते ।
तस्या विशेषनिष्ठत्वान्मृषात्वं नोपपद्यते ॥३१॥

In the statement *tasmāt* ..., there is expressed (clearly seen) the nature of truth (*satyatā*) abiding in the eye. Also what is heard (*śravaṇam*) is found (lit. seen) to be false, but the act of seeing (*dr̥ṣṭi*) is not found (lit. seen) to be (grasping what is) false (i.e. what does not have the nature of truth). Since that (viz. seeing) is rooted in some particular (form), the idea of untruth in it cannot stand to reason. [31]

एवं तुरीयमेतस्मिन्सत्ये चक्षुषि सर्वदा ।
प्रकाशैकस्वभावे हि साक्षादेव प्रतिष्ठितम् ॥३२॥

Thus this fourth (foot of Gāyatrī), is ever perceptibly supported in the eye (viz. this truth) which has the nature of only illuminating objects. [32]

The purpose of this verse is to point out the similarity in the nature of the eye and Āditya as *ādheya-ādhāra*.

अक्षिण प्रकाशरूपेऽस्मिन्सर्वं रूपं प्रतिष्ठितम् ।
बले प्राणे प्रतिष्ठा च चक्षुषोऽपि प्रदर्श्यते ॥३३॥

In this eye, which is of the nature of light, all (that is) form is supported and the support of the eye also is shown (i.e. stated) (in the Śruti) to be in strength, viz. the Prāṇa. [33]

This is the explanation of *tad vai tad*

इन्द्राग्नी ताविमौ सिद्धावग्निस्तत्र प्रकाशकः ।
इन्द्रो विधरणः प्राणः पूर्वयोर्नामरूपयोः ॥३४॥

These two (viz. Indra and Agni) are thus established (as supported)¹ and, between the two, Agni is the illuminator whereas Indra the sustainer, and (further) Prāṇa (is the supporter) of the first two (viz. name and form).² [34]

¹In Āditya and the eye.

²Prāṇa is the same as Indra and Agni (which is itself Āditya). This is in relation to the world.

यावान्प्रकाशो जगति स सर्वोऽग्निरिहोच्यते ।
परिस्पन्दश्च सर्वत्र प्राण इन्द्रस्तथोच्यते ॥३५॥

Whatever light there is in this world is the whole of it called here Agni, (and whatever) movement (lit. throbbing) obtains everywhere is, in the same way,¹ called Prāṇa (viz. Indra). [35]

Prāṇa is known as the deity of strength and therefore is to be worshipped as being Indra, i.e. *bala*.

¹As in the case of Agni earlier.

त्रिलोकी च त्रिवेदी च प्राणादित्रयमेव च ।
प्रतिष्ठितमिहाध्यात्म एवमुक्तेन वर्त्मना ॥३६॥

(The collection of) the three worlds, and that of the three Vedas and also the triad beginning with Prāṇa,¹ is here² supported in relation to the body (*adhyātme*), in the way described. [36]

This is the purport of *prāṇo vai balam*.

¹This refers to *prāṇa*, *apāna*, *vyāna*.

²In the metre Gāyatrī.

प्राणादित्यौ हि गायत्रीसक्तावुक्तेन वर्त्मना ।
 संजीवनं तदन्येषां प्राणानां भवतीश्वरात् ॥३७॥
 सा हैषेति श्रुतिरतो यथोक्तार्थावबुद्धये ।
 प्राणान्गयान्यतस्तत्रे गायत्रीयमतो मता ॥३८॥

(Thus), in the way stated (earlier), Prāṇa and Āditya are supported (*sakta*) in the Gāyatrī and that¹ becomes the life of all other *prāṇas*, i.e. through (the strength of) the overlord.²

[37]

Therefore (follows) the Śruti *sā haiṣā* for making one know what is already stated. Since it protected the *prāṇas*, the *gayas*,³ it is called (or known) as Gāyatrī.

[38]

This is the explanation of *evam v eṣā gāyatri adhyāmam pratiṣṭhitā sā haiṣā gayāṃs tatre*.

The word Gāyatrī is here derived from *gaya* connected with a root *traī* 'to protect'.

¹This refers to their being so supported in the Gāyatrī.

²This stands for the powerful Gāyatrī.

³Śaṅkara (in BUB p.736) derives the word *gaya* (for *prāṇa* 'organ') from the verb root *gai* 'to produce sound' (*śabdakaraṇāt*). Read Ānandagiri on BUB: *gāyantīti gayā vāgupalakṣitāś cakṣurādayaḥ*— here the expressed vocal organ stands for all organs.

उपनीतौ स आचार्यः पच्छश्चार्धर्चशस्तथा ।
 सावित्रीं याममं प्राह बटवे मन्त्रलक्षणाम् ॥३९॥
 साप्येषैव च विज्ञेया व्याख्याता या प्रयत्नतः ।
 यस्मै प्राह स आचार्यस्तस्य प्राणानवत्यसौ ॥४०॥

This Sāvitrī¹ (*rc*) which the preceptor recited to a pupil, foot by foot, or (also) by half-verse by half-verse, at the time of the thread ceremony (*upanītau*), viz. that (verse) which has the nature of a Mantra,
 that also is to be known as this very verse,² the one which

[39]

is carefully explained. It protects the *prāṇas*³ (of that pupil) to whom the preceptor has recited (this Mantra). [40]

This is the meaning of *sa yām evāmūṣṇ sāvitrīm anvāha*

¹The word Savitr̥ refers to a ṛc in Gāyatrī metre which is addressed to the deity Savitr̥. Cf. *R̥gveda* 3.62.10.

²Namely, the Gāyatrī ṛc.

³This is the explanation why the Gāyatrī and the Sāvitrī are identical.

एवंवित्सन्स आचार्यो यस्मा अन्वाह सादरः ।
त्रायते तस्य गायत्री बटोः प्राणात्र संशयः ॥४१॥

Undoubtedly, Gāyatrī protects the *prāṇas* of that pupil to whom the preceptor, being conversant with (the matter) thus (stated), carefully recited the ṛc. [41]

This explains the meaning of the preceding verse more clearly.

BU 5.16.5 is under reference.

माणवकस्योपनयनसमये वेदवादिनाम् ।
छन्दः प्रति विवादोऽयं तन्निर्णीतौ परा श्रुतिः ॥४२॥

Among those, who recited the Veda, this is a dispute on *Chandas* 'metre' of this verse, (recited) at the time of the thread ceremony of a young boy; (therefore), in order to give a decision on that, there follows the subsequent Śruti (statement). [42]

This is the purport of *tām etām*

तां हैतामिति वाक्येन सावित्रीं प्रतिदर्शयताम् ।
अनुष्टुप्छन्दसं ब्रूयात्पूर्वपक्षप्रसिद्धये ॥४३॥
तामेतामेक आचार्या उपनीताय यत्नतः ।
अनुष्टुप्छन्दसं प्राहुः सावित्रीं न्यायसंश्रयात् ॥४४॥

By the sentence *tām haitām* (one should express the opinion) regarding the Sāvitrī as having the metre Anuṣṭup, so that the *prima facie* view is established. [43]

Some preceptors have carefully recited to the initiated pupil this verse, viz. Sāvitrī ṛc, in the metre Anuṣṭup—this (they did) by resorting to some reason.¹ [44]

¹This is explained in the following verse.

वागनुष्टुब्धतः साक्षाद्वाक्च साक्षात्सरस्वती ।
उपनीताय सैवातो वक्तव्या न ततोऽपरा ॥४५॥

Since Vāc is itself the Anuṣṭup¹ and Vāc is the Sarasvatī (also), the same (i.e. only that) is therefore to be taught to the one who is initiated, not any² other (ṛc). [45]

¹For Vāc as Anuṣṭup, cf. the Śruti: *vāg vā anuṣṭup*.

²SP points out the purport of this Sāvitrī Mantra in the words *tathā ca tat satitur vṛṇīmahe vyaṃ devasya bhojanam, śreṣṭham sarvadhātaram turam bhagasya dhīmahi anuṣṭupchandaska-sāvitryarpaṇe sarasvaty evārpitā syād ity arthaḥ*.

यथैतद्वक्तमाचार्यैः कुर्याद्विद्वान्न तत्तथा ।
गायत्रीमेव सावित्रीं ब्रूयात्सर्वफलाप्तिः ॥४६॥

A learned man should do as he has been taught by the preceptors, not in that way as said before by other preceptors: He should recite the Gāyatrī itself as Sāvitrī, since (thereby) (for him) (i.e. all the results accrue to him). [46]

This verse states the Siddhāntin's view *na ... phalāptitaḥ*.

SP points out that, by the mention of only Anuṣṭup, the result that accrues to the worshipper is (the favour of) Sarasvatī; but, by the mention of Gāyatrī, the result is the acquisition of everything. Therefore, there is emphasis on recitation of only Gāyatrī.

This would mean that a verse addressed to Savitr can be in Anuṣṭup metre, but that is set aside in favour the one (to Savitr) in Gāyatrī metre.

यथोक्तायां हि गायत्र्यां कृत्स्नं जगदुपाहितम् ।
तदुक्तौ सर्वमुक्तं स्याद्यत्पुमर्थाय साधनम् ॥४७॥

Indeed, the entire world is placed in the Gāyatrī, as has been already explained; in reciting that, there occurs the statement of all that which is the means to (the acquisition of) the end of human life. [47]

विज्ञानपुरुषस्येदं स्वभावादेव सर्वदा ।
आत्मैव हि जगत्कृत्स्नं साधारणविशेषवत् ॥४८॥

This entire world is ever the Ātman owing to the very nature of the *viññānapuruṣa*, 'the individual self', which comprises the common and the uncommon¹ (things in it). [48]

This verse explains the purport of *yadi ha*

¹Cf. next verse where *viśeṣa* is paraphrased as *asādhāraṇa*.

साधारणानि वस्तूनि तथासाधारणान्यपि ।
नानुपादाय कृत्स्नानि जन्तोः काचित्क्रियेयते ॥४९॥

Without taking up the common things and also the uncommon things, there is never done (lit. desired) any action of whosoever was born. [49]

SP states that the thought of this verse has been fully clarified in the Madhu Brāhmaṇa.

अभिव्यक्तेः पुराप्येतद्रूपमासीत्स्वभावतः ।
अभिव्यक्तौ तु तत्साक्षात्समष्टिव्यष्टिलक्षणम् ॥५०॥

Before the manifestaion (of an individual self), there was this form (of its cause), by its very nature, and, after the manifestaion (of an individual), the same became characterized by collective (world) and particulars in it. [50]

एवं सिद्धे महिम्न्यस्मिन्यथोक्तेनैव वर्त्मना ।
कनीयस्ता विवृद्धिर्वा नैव संभाव्यते मितेः ॥५१॥

Thus, when the greatness (of Gāyatrī) is thus established here, in the way stated, there is not possible any decrease (i.e. becoming less) or increase of the knowledge.¹ [51]

¹Sureśvara uses the word *miti* for *mātr*, i.e. the knower, viz. one who knows the Ātman.

ऊरीकृत्येममेवार्थं स य इत्यादिनोच्यते ।
महाप्रतिग्रहेणापि नैवविद्वोषमृच्छति ॥५२॥

Having accepted this as the very purport, the Śruti has stated in words *sa yaḥ* ... that the person, who knows thus, does not come to have any blemish, even though he has obtained (varied) great advantage.¹ [52]

This verse marks the statement of the particular result acquired from the knowledge of the nature or the purposefulness of the Gāyatrī.

¹Add: (as are hinted at) in the preceding verse (SP).

दर्शनस्य स्तुतिरियं स य इत्यादिनोच्यते ।
तादृक्प्रतिग्रहस्येह न क्वचित्संभवो यतः ॥५३॥

In the words (of the Śruti) *sa yaḥ* ..., there is a praise of (this view), because there is no possibility here, any similar advantage. [53]

प्रतिग्रहस्य निन्दा वा विद्वन्मानात्प्रसक्तितः ।

निःशेषपुण्यमोषित्वान्निषेधार्थाय कुत्स्यते ॥५४॥

Or rather, there is here censure of accepting gifts since there is a contingency of a person's being proud of being a knower¹—such a person is found fault with,² because (his pride) has the nature of wiping away³ all his merit—(thus is this censure) for prohibiting.⁴ [54]

This is another way of stating the purport of what is mentioned earlier.

¹That is to say: he may have greater pride than what he might legitimately have as the feeling of a knower. Or he might be proud, even if he would not be a knower—A knower of the significance of Gāyatrī is meant.

²Or, 'is spoken ill of'; alternatively, 'made a butt of ridicule'.

³Literally, steals away, i.e. destroys.

⁴Supply: acceptance of gifts.

BU 5.16.6 is under reference.

उक्तपादेष्वपि ज्ञानं नैवालमपबाधितुम् ।
गायत्रीवेदिनो जन्तोरपि भूयान्प्रतिग्रहः ॥५५॥

Even knowledge in relation to the feet (of the Gāyatrī, i.e. Sāvitrī ṛc) which are stated is not effective (lit. capable) in warding away (that censure); for, in the case of a knower of the Gāyatrī¹ also, there can be greater acceptance of gifts.

[55]

¹This refers to its significance.

नैवं दाता जगत्स्मिन्न च तादृक्प्रतिग्रहः ।
ग्रहीता वेह नैवेति कुत इत्यादिनोच्यते ॥५६॥

In the words of the Śruti *kutaḥ ...*,¹ the purport is: there is not in this world a giver of gifts like this one, there is

not a similar acceptance of gifts, and there is not any one who (has the capacity) to secure them. [56]

¹Cf. BU 5.14.6.

अप्यभ्युपगमे चैषां नैव दोषस्य संभवः ।
विदुषोऽस्तीत्यतः प्राह स य इत्यादिना श्रुतिः ॥५७॥

When all these ¹ are accepted, there is no blemish to follow in the case of a knower of the Gāyatrī—to say this, ² the Śruti has begun with (the words) *sa yah* [57]

¹What we mentioned in preceding verse, viz. rich gifts.

²That is, to answer the question implied in this statement.

स यः कश्चिदिमाँल्लोकान्पूर्णान्पुंभोगसाधनैः ।
विद्वान्संप्रतिगृह्णीयात्कथंचित्कामसंप्लुतेः ॥५८॥
आद्यपादपरिज्ञानमात्रस्यैव प्रतिग्रहः ।
क्षयायालं न शेषस्य गायत्रीदर्शनस्य सः ॥५९॥

He whosoever, a knower (of the Gāyatrī), would accept these worlds, abounding in (various) means of enjoyment for human beings (and) somehow, on account of being overpowered by desires, [58]

(would have received only what can come as) the result from the complete (*pari*) knowledge of (just) the first foot (of the Gāyatrī); that is not powerful enough to destroy (i.e. exhaust) (the result of) the knowledge of the remaining feet of the Gāyatrī. [59]

These verses answer the question implied in the preceding verse in a very cryptic style.

यावतीयं त्रयी विद्या तावन्तमपि गृह्णतः ।
द्वितीयपदविज्ञानक्षतिरेव न सर्वतः ॥६०॥

In the case of the one who accepts only that much (the reward) as a result of his knowledge of the three Vedas, there is destruction, a loss only in respect of his knowledge of the second foot, (but) not the destruction of all (that he has known from the Gāyatrī).

[60]

असंभवेऽपि कल्प्येत यदि तादृक्प्रतिग्रहः ।
त्रैविद्यलक्षणः सोऽपि तृतीयं नाप्नुयात्पदम् ॥६१॥

If a result of that is magnitude imagined, (for a person) even while there is no possibility of it, then he, though possessed of the knowledge of (all) the three Vedas will not obtain (the result of) the third foot (of the Gāyatrī).

[61]

अन्तरण्डविभक्तस्य यथोक्तैः स्यात्प्रतिग्रहैः ।
क्षयो नानन्तरूपस्य स्यात्समष्टिवपुर्भूतः ॥६२॥

By the acceptance of the gifts (thus) described, there would not be destruction of the one (viz. the inner self of a person, i.e. the Ātman) which has divided itself (as it were) in the universe¹ and has infinite (number of) forms (and yet, in reality) bearing the form of collection (of all beings together).²

[62]

¹Literally, the egg (form of the Brahman); cf. the commonly used word *brahmāṇḍa*.

²This refers to the result of a person's knowledge of the fourth foot of the Gāyatrī, viz. the whole of the Gāyatrī.

परिच्छिन्नेन सर्वत्र प्रतिमानं जगद्यपि ।
अन्तवद्विषयं दृष्टं न त्वनन्तस्य कुत्रचित् ॥६३॥

And there is seen in the world 'an example for what is limited (in magnitude) and is, therefore, having an end, but there is not seen anywhere that (viz. example) one for what is limitless.

[63]

The purport of the verse is to bring out the result of the worship of the fourth foot of Gāyatrī which is imperishable, as against that of any of the other three feet. This is to strengthen further what is said in the end of the preceding verse.

अयं चानन्तमात्मानमक्षिसूर्यव्यवस्थितम् ।
अगादुपासनात्प्राणमात्मत्वेन दिवानिशम् ॥६४॥

For, this one, i.e. the worshipper, has reached the infinite Ātman, through worshipping it, day and night as the Prāṇa, viz. the Ātman that has been abiding in the eye as the sun.

[64]

संभाव्यते क्षयस्तस्य न कुतश्चिदनन्ततः ।
अन्तवान्क्षीयते लोके न त्वनन्तः कुतश्चन ॥६५॥

There can never be conceived the destruction (lit. loss) of this one, since it has infiniteness.¹ In this world, that which has an end is seen to come to destruction but not, on any account, that which is limitless.

[65]

¹*anantataḥ* stands for *anantavattvataḥ*.

आवृत्तिः क्षयशब्देन दुःखप्रायासु भूमिषु ।
कैवल्यावसितेर्नासौ स्यात्समष्टिवपुर्भूतः ॥६६॥

By the word *kṣaya* (is) indicated rebirth (lit. repeated existence of one) at various levels which are mostly full of grief/sorrow, whereas that (rebirth) is not to be conceived in the case of one who has assumed the form of collection (of all beings, i.e. the Ātman) on account of having achieved liberation (lit. the state of singleness).

[66]

BU 5.16.7 is under reference.

उपस्थानं यथोक्ताया गायत्र्याः श्रद्धयान्वितः ।
 गायत्र्यसीतिमन्त्रेण कुर्यादुक्तार्थवित्सदा ॥६७॥
 एकद्वित्रिपद्यसीति पूर्वान्पादान्विचिन्तयेत् ।
 चतुष्पात्त्वं च तुर्येण यथोक्तेन विचिन्तयेत् ॥६८॥
 अपदसीत्यपि गिरा तस्या आनन्त्यमुच्यते ।
 अव्यया चाक्षयासीति न ह्यन्तस्तेऽधिगम्यते ॥६९॥
 नमस्तेऽस्तु तुरीयायेत्युक्त्या तुर्यप्रधानताम् ।
 गुणभावं यथोक्तस्य विद्यात्पादत्रयस्य तु ॥७०॥
 शत्रुनामगृहीत्यर्थमसावितिपदं त्विह ।
 फलोक्तिरद इत्येतदुपासितुरहं तथा ॥७१॥

A person, who has known the significance (of Gāyatrī) which is already explained, should ever with faith offer the worship¹ to Gāyatrī which is described before, with the Mantra *gāyatrī asi* [67]

He should ponder (think to himself) over the first three feet, (reciting the Mantras) *ekapadī asi*, *dvīpadī asi*, and *tripadī asi*.² And he should ponder over the nature (of the Gāyatrī) as being four-footed (reciting the whole Mantra of Gāyatrī, viz.) *turya* (the fourth one which is already stated). [68]

Also in the words *apad asi* there is stated the infiniteness of that (Gāyatrī) and (in the words) *avyayā cākṣayāsi* is understood (the meaning) 'there is indeed no end of you (O Gāyatrī)'. [69]

One should know from the statement *namas te 'stu turīyāya* ... that the *turya* has prominence (with reference to the three feet) and also the subordinateness of those three feet that are (already) described. [70]

And, in this context (of the Brāhmaṇa), the word *asau* is for uttering (in its place) the name of the enemy and the word *adaḥ* and *aham* as well are used as the statements of the result for the worshipper. [71]

¹This is meant by the word *upasthāna*; verse 73 also uses

it in the same sense.

²Sureśvara uses the compound of *eka*, *dvi* and *tri* with *padī*. Also, as a consequence, the verb *asi* is used only once. Translation indicates this, by separating one sentence into three sentences.

शत्रुणा कामितो योऽर्थो मा प्रापत्तमसाविति ।
मा समृद्धयथवा सोऽस्मै तं वाहं प्राप्नुयामिति ॥७२॥

'Let that thing which is desired by my enemy not come to him.' Or, let it not prosper for him. Or, may I obtain that.

[72]

This explains Mantras *asāv ado mā prapat kāmo 'smai mā samṛddhy aham adaḥ prāpam*.

अभिचारार्थमेतस्मिन्पस्थाने यथोदिते ।
अभिधानैकदेशोक्त्या विकल्पः फलगोचरः ॥७३॥

In this worship, which is thus described in this (statement),¹ is for conveying black magic (*abhicāra*) (and) in this statement (of one of the three names of the Gāyatrī as said before) there is option pertaining to the result.

[73]

¹Namely, what is said under verse 72: *asāv ado*

स्वार्थे त्वहमद इति ह्युपस्थाने फलं भवेत् ।
अदः प्रयोजनं देवि प्राप्नुयां त्वत्प्रसादतः ॥७४॥

And with reference to the purpose for himself the result (of the worship) is (as expressed in the words) *aham adaḥ*. (The thought in worshipper's mind is:) 'O goddess (Gāyatrī), may I obtain that purpose through your favour'.

[74]

BU 5.16.8 is under reference.

एतावदेव किं ज्ञेयं किं वान्यदपि शिष्यते ।

अस्त्यन्यदपि विज्ञेयं तद्विनाकृत्स्नता यतः ॥७५॥

(A question could be asked:) 'Only this much is to be known, or, is there anything else which remained to be stated?' (In answer it is said:) 'Yes, another thing is also to be known, since without that there is incompleteness (in respect of the knowledge about the Gāyatrī). [75]

कात्स्न्येन विद्या स्वभ्यस्ता फलायालमुपासितुः ।
विपर्ययेणानर्थाय तदेतत्प्रतिपाद्यते ॥७६॥

The lore (of the Gāyatrī) which is well-studied¹ in its completeness, results into (good) effect thereof for the worshipper; as against this, that is alternatively, it results into undesirable (result for him). It is this that is put forth, (in the subsequent portion of the text). [76]

¹That is, Gāyatrī is repeatedly recited.

In the following, Sureśvara has referred only to the significant part of a small bit of narrative that is told in BU—he omits a few details thereof. This marks the cryptic character of his treatment of the whole Brāhmaṇa.

सर्वात्मकत्वाद्वायत्र्या अग्नेरपि परिग्रहः ।
तन्मुखत्वेनासंसिद्धेस्तादर्थ्येनोत्तरा श्रुतिः ॥७७॥

Since the Gāyatrī is of the nature of all (objects in the world), therefore, there is understood even Agni. Thus since (Agni has been) established as the mouth of the Gāyatrī, the subsequent (portion of the) Śruti is for (stating) its purpose. [77]

मुखविज्ञानविरहादनर्थफलकीर्तनम् ।
अग्निरेव मुखं तस्या इत्युक्त्या कृत्स्नतोच्यते ॥७८॥

There is (in the narrative in the Brāhmaṇa) the statement about the undesirable result arising from the absence of the knowledge (of the Gāyatrī) of the mouth. (As such), by the statement *agnir eva mukhaṃ tasyāḥ* there is stated the fullness of the worship. [78]

गायत्रीदर्शनस्येह फलकात्स्नर्यं तथैव च ।
यथोक्ताग्निमुखज्ञानाद्यदीत्यादिगिराधुना ॥७९॥

There is thus stated here¹ the fullness of the result (arising) from viewing the Gāyatrī (in this way) and also from knowing that Agni is its face, as said (before)—now in this statement *yadi*² [79]

¹That is, in the Brāhmaṇa.

²Read: *yadi ha vā api bahv ivāgnāv abhyādadhati sarvam eva tat sandahati.*

यो वेदाग्निमुखामेतां गायत्रीमग्निरेव सः ।
अग्निरिन्धनवत्सर्वं दहेद्विद्वान्प्रतिग्रहम् ॥८०॥

He, who has known this Gāyatrī as having Agni as its face, himself is Agni. The learned man, (who has thus become) Agni, burns the mass of all advantages,¹ just as a fire (burns) the fire-wood. [80]

¹Add: which he has received by accepting the gifts as fees.

दाहकस्य न बह्वस्ति दाह्ययोगाभिवृद्धितः ।
क्षयश्चाशेषदाह्यस्य यस्मात्तस्मादिवेतिगीः ॥८१॥

For the one that burns,¹ there does not exist (too) much (to burn), (even) when there is increase in what is to be burnt² and there is destruction of what is to be burnt, in its entirety—since (this is so), therefore there is (in the text) the word *iva*. [81]

This is an explanation of the use of *iva* in BU, and SP points to the connection of *iva* with the *dārṣṭāntika* also.

¹This refers to the worshipper of the Gāyatrī.

²The sins of the worshipper are meant.

एवंविदेवमेव स्यात्पापं वह्निवदिन्धनम् ।
सर्वं संभक्ष्य तत्पापं शुद्धः पापवियोगतः ॥८२॥

One, who has known this, would become just this one (viz. Prajāpati), his sin would be the fuel associated with fire.¹ That knower will have eaten up that sin and would become pure, owing to his separation from the sin. [82]

¹That is to say: It will get burnt.

पूतोऽसंसर्गिधर्मत्वादजरोऽपरिणामवान् ।
अमृतोऽस्थूलदेहत्वात्प्राणमात्रस्वभावतः ॥८३॥

He is pure because he has not any contact with various Dharmas (implied by ritual), he would never be aging because he will not have any modifications (in him by the ritual). He would be immortal because his body will not have grossness and because he has the nature of only Prāṇa. [83]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
षोडशं ब्राह्मणम् ॥१६॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA
5.17**

यथोक्तोपासनाभ्यासभावितस्य क्रियाकृतः ।
उपस्थानं प्रवक्तव्यमित्यर्थः पर आगमः ॥१॥

(Now) there is to be prescribed some mode of worship for the performer of religious acts, (for him) who has known and repeatedly devoted himself to the (already prescribed modes of worship). For this purpose, there now follows the subsequent Āgama (i.e. Brāhmaṇa). [1]

In the beginning, Sureśvara does intend to include *jñāna-karmasamuccaya* even in respect of the worship of Gāyatrī, of course, following Śaṅkara.

तुरीयं पदमादित्यो लोकद्वारं च येन सः ।
संभाव्यते प्रसङ्गोऽत आदित्योपस्थितेतिह ॥२॥

The fourth foot (of the Gāyatrī) is Āditya and, because that (Āditya) is the entrance¹ to the *loka* (of the Brahman), therefore, there necessarily follows (*prasaṅga*) here the occasion for (prescribing) the worship of Āditya. [2]

In the earlier Brāhmaṇa, a special mode of worship of Āditya was not discussed, but here it is discussed for one in whom there is *jñānakarmasamuccaya*; cf. note under verse 1 above.

¹Āditya is extraordinarily so called, because, in the case of one who attains liberation, one has always to come to Āditya and then proceed onwards.

हिरण्यं ज्योतिरमृतं मण्डलेन तदात्मना ।

सत्यस्य परमार्थस्य द्वारमाच्छादितं रवेः ॥३॥

Hiranya means flame, immortality. And by the orb of Āditya, which has that (flame) as its nature, is closed the door to Āditya, the highest reality, viz. *satya*. [3]

त्वद्दर्शनार्थिने मह्यं पुषन्द्वारमपावृणु ।
जगत्पुष्णाति वृष्ट्याद्यैः पूषादित्यस्ततः स्मृतः ॥४॥

‘O God, Pūṣan, open that door for me, who am desirous of seeing you.’¹ Since he nourishes the world by showers etc.,² therefore, Pūṣan is known as Āditya. [4]

This explains *tattvam*

The Vedic god Pūṣan is identified with Āditya. And also, there is a derivation of the name Pūṣan attempted.

¹This is a gist of a verse from *Vājasaneyi Saṃhitā* 40.17 (also in BU of Kāṇva recension). This gist continues in the next verse also.

²The word etc. refers to nourishing plants and beings by giving them suitable heat, protecting the human beings from the fear of the dark, and showing them the proper paths (as will be clarified later in verses 6ff. and also verse 19 below).

सत्या अवितथा धर्मा यस्य मानव्यपाश्रयात् ।
तस्मै मे सत्यधर्माय दृष्ट्यै द्वारमपावृणु ॥५॥

‘Open the door for me, who have *satya* as religious duty,¹ so that I can see (Reality)’²—for me, whose religious duties are never false, on account of (my) resorting to the (authoritative) means (of knowing the same). [5]

This explains *satyadharmāya*

¹This is *dharma* which can be a law (for one’s conducting oneself) also.

²This is clear from verse 3 above.

हिमघर्माम्बुदानेन पुष्पातीदं यतो जगत् ।
 तस्मात्पूषा यतश्चैको गच्छत्येकर्षिता ततः ॥६॥
 संयमात्सर्वयाम्यानां यमोऽसि परमेश्वरः ।
 स्वीरणाच्छीततोयादेः सूर्यस्तेनासि घर्मदः ॥७॥
 प्रजापतिः परं ब्रह्म कारणं तदपत्यतः ।
 प्राजापत्योऽसि तेन त्वं गीयसे विपुलश्रुतैः ॥८॥

Since he nourishes this world by giving cool, heat and waters, he is called Pūṣan and, since he is the only one that acts (lit. goes), therefore, he is the only Rṣi 'seer'.¹ [6]

By controlling all those, who need to be controlled, you are Yama, the Great Lord. And by a proper (lit. good, *su*) urging of cool water etc.² you are Sūrya and, therefore, the source (lit. giver) of heat.³ [7]

Prajāpati is the highest Brahman, the cause (viz. origin) (and therefore), being an offspring of his, you are described as Prājāpatya—and, therefore, praised (lit. sung) by those who have much learning.⁴ [8]

Sureśvara explains the different words in the prayer to Pūṣan.

¹In the original Mantra there is an epithet of Pūṣan, *ekarṣi*.

²The word etc. refers to *gharma* 'heat'.

³This gives the derivation of the names Yama from verb root *yam* and Sūrya from verb root *īr* with *su* prefixed to it.

⁴That is, who have studied the Vedas extensively.

रश्मीनपनदाशेषांस्तेजः संयच्छ संहर ।
 कल्याणं तै यदत्यर्थं रूपं यच्च तवैव तत् ॥९॥
 सदा त्वाहं प्रपश्यामि सत्यधर्मान्वयाद्यथा ।
 भगवन्सत्यरूपेण मद्धर्मोऽपि भवांस्तथा ॥१०॥

Drive far and wide (your) rays, well control the lustre, i.e. well-organize (it) most, that form (of yours) which is the most blissful and is only yours. [9]

And as I ever see you on account of your association with

the *dharma*s 'laws'¹ and *satya* 'truth', O Bhagavan, let my *dharma* also be of the nature of *satya* and may you look upon me to be so.² [10]

Now follows the meaning of *vyūha*

¹Or, 'duties'; in the Vedic notions of religion, the gods also follow certain laws (there, the word is *vrata*). Cf. *dhṛtavrata* of Varuṇa, *śucivratā* of the two Aśvins.

²That is, I also am *satyadharmānvayin*.

योऽसावादित्यगो देवः सोऽहमस्मीतिबुद्धिगः ।
स्थानमात्राच्च तौ भिन्नौ वस्तुतो नावयोर्भिदा ॥११॥

That god, which resides in Āditya, and that, which abides in (my) intellect in the form of the awareness 'I am that' are distinct only on account of the (difference in their) abodes. In reality, however, there is no difference (whatsoever) between us two. [11]

This explains *yo 'sāvasau puruṣaḥ so 'ham asmi* in BU 5.15.1.

देवतामनिलं यातु वायुर्योऽयं शरीरगः ।
शरीरं भस्मसाद्यातु मर्त्यत्वं हेतदाश्रितम् ॥१२॥

May this wind (Vāyu), which is existing in my body, go to the divine Vāyu. (And) may (this) body which is rendered to ashes go (to the earth), since this one, has related¹ to mortality. [12]

This explains *vāyuh ... śarīram* in BU 5.15.1.

¹That is, is beset with; however, lit. resorted.

भस्मान्तमिति लिङ्गाच्च कर्मिणः स्यादुपस्थितिः ।
न तु संन्यासिनो न्याय्या दाहासंभवहेतुतः ॥१३॥

And, there, the notion understood about a performer of rituals

on the basis of the indicative word *bhasmāntam* 'ending into ashes', does not, however, reasonably pertain to an ascetic, because there is no possibility of the burning (of the body) of that one. [13]

This explains the significance of the word *bhasmāntam*.

वायुरित्यादिकं ग्राह्यमुपलक्षणमेव तु ।
शिष्टानां देवतांशानां यथास्वं प्रतिपत्तये ॥१४॥

The words, beginning with *vāyuh*, are to be taken only as an indicator of the deities (who superintend over different parts of the body), so that it becomes what was its own source.¹ [14]

This explains *tathānyadevatāḥ svām ...* in BUB.

¹Each of these deities merges into its own origin.

अग्निं स्वात्ममनःसंस्थामधुना देवतां गृही ।
प्रार्थयत्योमिति गिरा मुमूर्षुस्तत्परीप्सया ॥१५॥

Now, a householder, who is about to die, offers a prayer to Agni, (who is the deity) residing in his own body and *manas*, uttering the word *om*, with a desire to obtain (oneness) with the same. [15]

One remembers here *Gītā* 8.6:

yaṁ yaṁ vāpi smaran bhāvaṁ tyajaty ante kalevaram /
taṁ taṁ evaiti kaunteya sadā tadbhāvabhāvitah //

¹Here, the word *ātman* refers to the body.

सर्वस्याप्यवनादो स्यादवतेरो यतस्ततः ।
ऋतुर्मनोमयत्वाच्च सा हि संकल्परूपिणी ॥१६॥

Since Om is derived from the root *ava*, this one (Agni) is Om on account of his offering protection to all. And *kratu*

is because it originates in *manas*; that (deity)¹ is of the nature of a design (of what is to be done). [16]

¹The verse uses the word *sā* (a feminine form) and therefore it should be taken to refer to the *devatā* (feminine) of *kratu* (masculine).

ओं क्रतो इति संबोध्य स्मरेत्यत्र नियुज्यते ।
प्रकृष्टफलसंप्राप्तेः स्मृतिमात्रैकहेतुतः ॥१७॥
स्मर्तव्यं स्मर तेनाद्य मरणे प्रत्युपस्थिते ।
आदरार्थं स्मरेत्यस्य पुनः पुनरुद्वैरणम् ॥१८॥

Having addressed (the deity) with the words *Oṃ krato* ...— that (address) is connected with the word *smara*, because we obtain excellent fruit only by remembrance (of the deity). [17] Therefore (it is meant to say) remember what is to be remembered, now when (my) death is imminent. The repetition of the word *smara* again and again is only to express regard (for the deity). [18]

This is anakoluthic construction that was at times noticed only in Vedic Saṃhitās.

सुपथा नय नो वहे सुपथेति विशेषणात् ।
उदङ्मार्गग्रहो न्याय्यः शिष्टानां पुनरागतेः ॥१९॥

From the specification by the adjective *supatha* in 'O fire, lead us by a good path', it is only reasonable to accept the (movement of a departed Jīva by) the northern path; (this is so) because the others (who are not included in us in the prayer) do come back (to the mortal world) again. [19]

राये कर्मफलायेति रयिः कर्मफलं यतः ।
प्रज्ञानानि च सर्वाणि देव विद्वान्क्रियास्तथा ॥२०॥

The word *rāye* means *karmaphalāya* 'for securing the result

of the (ritual) activity', since it (viz. *rayi*) is the result of *karman* 'ritual activity'. (So also it is said) 'O god ...' (for) he is a knower—there is here a reference to all the inner thoughts¹ (of the worshippers) as also to (ritual) actions. [20]

¹These are *prajñānāni*, a paraphrase of the word *vayunāni* in the Vedic Mantra. Since the phrase *kriyās tathā* stands beside *prajñānāni*, we have to refer it to the inner thoughts.

कुटिलं च तथा पापमस्मत्तस्त्वं वियोजय ।
वयं तु कृतकृत्यत्वादशक्ताश्च मुमूर्षवः ॥२१॥
नमउक्तिमतो भक्त्या तुभ्यं बहुतमां धिया ।
आयुषोऽन्ते विधेमाद्य क्षम देव प्रसीद मे ॥२२॥

And similarly remove from us our sin, i.e. evil, (O God). As for ourselves, we are now weak after having done our religious duties and are about to die. [21]

Therefore, at the end of our life, we offer to you with devotion a respectful prayer (which is) the most potent in thought (*bahutamā dhiyā*).

Therefore we offer you at the end of our life a prayer in (full) respect, with devotion, and the most potent in thought (*bahutamā*). Forgive me, O God, and be favourable also. [22]

Here, in these verses, there is a change from *vayam* understood from 'us' to *aham* (viz. me). This is because Sureśvara is trying to explain the intention in the Vedic verse, viz. the offering of a prayer by one which meant the offering by all.

मस्करीन्द्रप्रणीतस्य भवनामभृतो यतेः ।
भाष्यस्य वार्तिकोक्त्यैवमध्यायः सप्तमो गतः ॥२३॥

Thus ends the seventh Adhyāya of my statement in the Vārtika on the Bhāṣya composed by the best of the ascetics who bears the name of Bhava (i.e. Lord Śiva). [23]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके पञ्चमाध्यायस्य
सप्तदशं ब्राह्मणम् ॥१७॥

इति श्रीमत्परमहंसपरिव्राजकाचार्यभगवत्पज्यपादशिष्य-
श्रीसुरेश्वरचार्यविरचिते बृहदारण्यकोपनिषद्भाष्यवार्तिके
पञ्चमोऽध्यायः ॥५॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

6.1

समाप्तः सप्तमोऽध्यायः प्राप्तावसर उच्यते ।
अष्टमः खिलकाण्डेऽस्मिन्पूर्वकाण्डेष्वनुविततः ॥१॥

The seventh¹ Adhyāya has been discussed conclusively. Now will be explained the eighth Adhyāya, which has an occasion (i.e. proper scope) in this Kāṇḍa, the Khila Kāṇḍa 'book pertaining to what is to be appended',² owing to the absence of the discussion (lit. statement) about it in the former Kāṇḍas.³ [1]

¹Sureśvara refers to the traditional method of numbering the Adhyāyas of BU. Therefore Adhyāyas 1, 2 ... 6 are mentioned by him as Adhyāyas 3, 4 ... 8. Cf. note at the beginning of our Udgītha Brāhmaṇa [Vol.4,1991], i.e. BUBV 3.1.1.

²BU Adhyāyas 1-2 are named Madhu Kāṇḍa, Adhyāyas 3-4, Yājñavalkya Kāṇḍa (cf. 3.1.1 above) or Muni Kāṇḍa and Adhyāyas 5-6 comprise Khila Kāṇḍa.

³This indicates the matter in this Adhyāya, viz. what is non-Brahman (SP).

गायत्र्याः प्राणभावोक्तिः कस्माद्धेतोः पुरोदिता ।
न तु वागादिभावोऽस्यास्तत्र हेतुरिहोच्यते ॥२॥

There was statement earlier of the reason as to why the Gāyatrī¹ became Prāṇa; but it was not stated as to why it did not become Vāc and others. (Now) is stated here the reason for that (viz. not so happening). [2]

¹Refer to BU 5.14.

ज्येष्ठः श्रेष्ठो यतः प्राणो न तु वागादयस्ततः ।
प्राणात्मभाव एवोक्त आनन्तर्यार्थमेव तु ॥३॥

Since Prāṇa is the eldest and the greatest, and (*tu*) Vāc and others are not (so); therefore, there it was stated that Gāyatrī became (only) Prāṇa. And (this subsequent Brāhmaṇa is) only for stating (what) follows (*prāṇopāsanā* in the preceding Brāhmaṇa). [3]

This verse rejects the view that the reference to the *jyeṣṭhatva* ... of Prāṇa would indicate this section to form an ancillary of *ukthopāsanā*.

उपास्त्यन्तरमेवैतत्फलवत्तु विवक्षितम् ।
न तूक्तशेषतैतस्या भिन्नोपास्तित्वकारणात् ॥४॥

(One would say:) 'This is another worship¹ and has a result also; it is intended to state this'. (The Vedāntin answers:) 'This is not for conveying any ancillary (or a subordinate) to what is mentioned (earlier);² since there is a different reason for another worship'. [4]

¹One connected with Mantha 'offering of a stream of clarified butter'.

²This refers to the Mantha offering at BU 6.3.1.

मन्थकर्मणि ये मन्त्राः पञ्च ज्येष्ठादयः श्रुताः ।
प्राणात्मवेदिनस्तेषां प्रयोगोऽत्रोपवर्ण्यते ॥५॥

Here is described the mode (of the performance of the recitation) of the five Mantras,¹ viz. *jyeṣṭha* etc., in the ritual of the Mantha by one who knows the nature of Prāṇa. [5]

¹These are discussed in BU 6.3 and this Brāhmaṇa is then ancillary to the Mantha worship and is thus useful.

पृथग्वा फलनिर्देशाद्यो ह वा इति पञ्चधा ।
प्राणविद्या पृथङ्मन्थान्मन्थस्तु महिमार्थिनः ॥६॥

Or rather, on account of the distinct mention of the fivefold result in (the words) *yo ha vā* (BU 6.1.2-6),¹ the worship of Prāṇa is different from the Mantha (offering) and (*tu*) the Mantha is (prescribed) for one who seeks for (or, desires) greatness.² [6]

¹This is to reaffirm the distinction between the worship in BU and that in CU; in this latter, the Prāṇavidyā is described to be fivefold. The reason for the distinction is the reference to the Mantha worship.

²The ritual of the Mantha aims at achieving worldly prosperity and, as against this, the worship of Prāṇa aims at oneness with it.

फलेऽन्यस्मिन्ननिर्दिष्टे वाक्यशेषगतं फलम् ।
तस्मिन्सति हि सद्भावाद्वागादीनां न तं विना ॥७॥

If the result (of the worship of Prāṇa) were not mentioned as distinct, then it could belong to what was ancillary to (that mentioned in) the statement (of the Mantha worship). (But, only) that¹ being there, there would ensue (a result).² (And, the result) of speech and others could not (realise) without that.¹ [7]

¹Namely, Prāṇa.

²That is, becoming one with Prāṇa.

शास्त्रेणोक्ता शरीरेऽस्मिन्वृत्तिः प्राणस्य जीवनम् ।
पूर्वमाविशति प्राणो देहं पश्चाच्च मुञ्चति ॥८॥

The (distinct) function¹ (of each of Vāc and others) in a body is described by the scripture as the existence² of Prāṇa

(in it). (Thus:) Prāṇa first enters into a body and leaves it later (i.e. in the end). [8]

¹This is *vr̥tti*.

²This is also *vr̥tti* (= *astitva*).

ज्येष्ठः श्रेष्ठश्च सर्वेषां प्राणानामाश्रयो हि सः ।
श्रेष्ठता वक्ष्यमाणेन ग्रन्थेनास्य विभाव्यते ॥९॥

And that (Prāṇa is) the eldest and the greatest, because it is the support¹ of *prāṇas*.² The greatness of this (Prāṇa) is explained by the text which will be stated.³ [9]

This explains *yo ha vai jyeṣṭham...* (BU 6.1.1).

¹That is, abode (during the span of an individual's life).

²It means: organs and/or the winds in a body.

³This refers to BU 6.1.7ff.

असिंमल्लोके परसिंमश्च वागेव न विहन्यते ।
देहान्तरस्थान्प्राणांश्च नियुङ्क्ते सा ततोऽधिका ॥१०॥

Only Vāc is not destroyed in this world and in that beyond; it enjoins the *prāṇas* abiding in various bodies.¹ Therefore, it is greater (than them).² [10]

¹Like Prāṇa, Vāc remains in both the worlds; even though it exists in different bodies.

²Read SP: *sarvapravṛtter vāgadhīnatvād atas tebhyo 'dhikā*. It adds: *sopāsyā* 'that Vāc is to be worshipped'.

श्रुतान्मतात्तथोक्ताद्वा प्रमाणं दृष्टिरात्मनः ।
चक्षुः प्रतिष्ठा ज्ञानानामात्मा तत्र प्रतिष्ठितः ॥११॥

Knowledge (lit. seeing) of the Ātman¹ is considered (by some) a (greater) means of knowing than what is heard,² thought or as stated by;³ (therefore,) *cakṣus* is the support of all kinds

of knowledge, for the Ātman is steady there (in *cakṣus*). [11]

This explains *yo ha vai pratiṣṭhām* ... (BU 6.1.3).

¹That is, the nature of it.

²Or alternatively, accepted/upheld by the elites.

³Three alternatives are understood thus: *śruta*, *mata* or *ukta*.

वाग्धि संपद्यते श्रोत्रादश्रुतं न हि भाषते ।
स्ववृत्तेः परवृत्तेश्च संपच्छ्रोत्रे प्रतिष्ठिता ॥१२॥

Since Vāc is enriched on account of ear and does not 'indeed' speak what is not heard; (therefore) the richness from the function of itself (i.e. ear) or of others is steadied¹ in the ear. [12]

This explains *yo ha vai sampadam* ... (BU 6.1.4); *sampad* here is 'riches'.

¹Or alternatively, firmly established.

मन आयतनं तत्र वागादीनां हि वृत्तयः ।
स्थितास्तत्पूर्विकाश्चैव ध्यायतः साधनं हि तत् ॥१३॥

manas is the abode and therein, indeed, (are performed) the functions of Vāc and the others and they are steadied¹ only (when) preceded by it,² (for) that is the means for one who meditates. [13]

This explains *yo ha vā āyatanam* ... (BU 6.1.5).

¹In other words, they continue to be performed.

²Namely, the function of *manas*.

उपस्थेन्द्रियं प्रजातिः स्यात्तस्य जन्मैकहेतुतः ।
न हि रेतो विना जन्म प्राणिनोऽत्र समीक्ष्यते ॥१४॥

*prajāti*¹ is the generative organ, because it is the cause of the origin (of beings); nowhere is here² noticed the birth

of any being without a seed.

[14]

This explains *yo ha vai prajātim ...* (BU 6.1.6).

¹That which has the attribute of generation.

²Namely, in this world.

वृत्तीनां प्राणपूर्वत्वाद्द्वयपदेशाच्च तत्कृतात् ।
प्राणानां प्रथमः प्राणः स ह्यत्तान्नं हि तस्य तत् ॥१५॥

Since the (various) functions (of the organs in the body) are preceded by Prāṇa¹ and mention is made of them² by that,³ therefore, Prāṇa is the first⁴ of *prāṇas*. It is indeed⁵ the eater and that food is for it.⁶ [15]

This states the purport of the six worships mentioned earlier in BU 6.1.1-6.

¹Cf. verse 8 above.

²That is, the organs.

³Namely, by the word *prāṇa*.

⁴Possibly both the eldest and the greatest.

⁵Read SP: *prathamō hiśabdo mukhyaprāṇasya jīvābhedanātrītopapādako dvitīyo vāgāder bhogyāntarbhāvena tathā-tvāvedakah.*

⁶The words 'for it' can be expressed as 'belonged to it'. 'That food' refers to the enjoyment through various organs.

Now follows the exposition of the narrative of the dispute among *prāṇas* over the greatness of only one (BU 6.1.7ff.). This occurs also at CU 5.1.6-12; 5.2.2; (in brief at) Kauṣītakyupaniṣad 2.14, 3.3; Praśnopaniṣad 2.1.2-4.

ते प्राणाः स्वगुणैरुक्तैर्वसिष्ठत्वादिलक्षणैः ।
श्रेयानस्म्यहमेवेति विवदन्तः परस्परम् ॥१६॥

Those *prāṇas* (which are thus) characterized by their own properties, beginning with the word *vasiṣṭha*¹ as stated (before

in BU 6.1.2ff.) were disputing with one another (over their relative greatness in words) 'I am greater'.² [16]

¹The best helper or the one who covers/protects best.

²SP comments: *nirdhārayitum na pārayanti sma*.

निर्णयार्थाय ते ब्रह्म जग्मुरिन्द्रं प्रजापतिम् ।
को नो वसिष्ठ इति तं पप्रच्छुर्निर्णयार्थिनः ॥१७॥

For obtaining a decision (regarding that matter), they¹ approached the Brahman,² viz. Indra³ Prajāpati. They,¹ seeking decision, asked him, 'Who amongst us is *vasiṣṭha* 'most shining'?' [17]

¹This refers to Prāṇa.

²Or Prajāpati denoted by the word Brahman. That is also Indra because of his connection with, or superintending over, the *prāṇas*.

³Indra, possibly because of his connection with *indriya*?

यस्मिन्व इति वाक्येन वसिष्ठत्वस्य लक्षणम् ।
प्राणेभ्यः प्राब्रवीद्ब्रह्म पक्षपातभयात्किल ॥१८॥

The Brahman declared to the *prāṇas* the description¹ of being *vasiṣṭha* in the sentence *yasmin vah ...*,² lest he might be taken to have shown partiality, (as it were). [18]

¹Literally, indication.

²Cf. BU 6.1.7.

जानन्नपि वसिष्ठादिगुणवत्त्वं यथार्थतः ।
तथापि नावदद्ब्रह्म स्वानुभूत्यवबुद्धये ॥१९॥

Knowing though full well¹ about the (character of Prāṇa as) being possessed of the qualities of *vasiṣṭha*² etc., the Brahman did not declare (the same yet), with the intention that (they³

should have) their own (i.e. direct) experience. [19]

¹Or alternatively, though he (Indra Prajāpati), in reality, knew full well.

²These are: being *vasiṣṭha*, *pratiṣṭhā*, *sampad*, *āyatana* and *prajāti* mentioned in BU 6.1.2-6.

³This refers to the *prāṇas*.

उत्क्रान्तेऽन्यतमे यस्मिन्प्रत्येकमपसर्पणे ।
पापीयो मन्यते लोको वसिष्ठो वः समीक्ष्यताम् ॥२०॥

‘Let that one amongst you be known as *vasiṣṭha* who having departed from (the body), i.e. gone away (from it), the people would consider the body as more wretched.’¹ [20]

¹Already, it is held, the body is wretched (lit. full of sin or impurity), but it would now be more wretched. SP paraphrases *pāpa* as *asprśya* ‘not worth touching’.

अन्वयव्यतिरेकाभ्यां वसिष्ठत्वावबुद्धये ।
उपास्यार्थपरीक्षायै प्रवृत्तैषा परा श्रुतिः ॥२१॥

Now proceeds this subsequent (Śruti) text to examine (the nature of) the object (worthy) to be worshipped by Anvaya and Vyatireka, with a view to ascertaining the character of *vasiṣṭha* etc. [21]

This refers to *vāg ghoccakrama* ... (BU 6.1.8ff.).

संहतानां क्रियासिद्धेः करणानां पृथक्पृथक् ।
नैकैकस्य क्रियासिद्धिः शिबिकोद्वाहवत्ततः ॥२२॥

(This is so) since the activity of the organs can be secured (only if they function) as jointly,¹ there cannot be therefore the performance of the function by (any) one of them, by itself, as in the case of carrying a palanquin (by its bearers

jointly and not severally).²

[22]

¹The words 'jointly' and 'by itself (i.e. severally)' are emphasised with a view to ignoring the period of a year (which is not of much significance) in the context.

²This is an instance of Sureśvara's cryptic expression of a simile; that is, some relevant corresponding details are omitted.

प्राणप्राधान्यसिद्धयर्थं श्रुत्याख्यायिकच्छद्मना ।
अन्वयव्यतिरेकाभ्यां न्यायो लौकिक उच्यते ॥२३॥

(Here) is stated in the Śruti a well-known instance in the worldly happenings, under the pretext of a narrative, yet by employing (the method of) Anvaya and Vyatireka, with a view to establishing the superiority of Prāṇa (to the *prāṇas*). [23]

The word *-khyāyika-* is adopted for *-khyāyikā-*.

This states the purport of *yathākalāḥ yathāsandhāḥ yathā badhirāḥ yathā mugdhāḥ* and *yathā klībāḥ* in BU 6.1.8-12.

यथा मुका विना वाचा यथान्धाश्चक्षुषा विना ।
इत्यादिवचसा प्राणे सति जीवनमुच्यते ॥२४॥

By the statement 'as they are dumb, when without Vāc', (and) 'as they are blind, when without *cakṣus*' etc. it is asserted that there is activity (or capacity for any function) (in a body) when there is Prāṇa in it.¹ [24]

¹SP adds *tasmāt prāṇāḥ śreṣṭha iti śeṣaḥ*.

उत्क्रान्तौ च प्रवेशे च ह्यलं देहः स्वकर्मणे ।
वागादीनां न पातोऽस्य नापि चोत्थानमीक्ष्यते ॥२५॥

Since a body is capable of activity even while Vāc and others leave it and/or enter into it, the fall or rise of Vāc and others (by themselves) is not (anywhere) seen. [25]

उत्क्रान्ते प्राण एवास्माच्छरीरं पतति ध्रुवम् ।
उत्तिष्ठति प्रविष्टे च प्राणः श्रेयांस्ततोऽन्यतः ॥२६॥

A body certainly falls when only Prāṇa has departed from it¹ and it rises when (Prāṇa) has entered (into it); therefore Prāṇa is greater (than others and not for any other reason).²

[26]

¹Literally, this one.

²That is to say: No other reason needs be adduced to prove its superiority.

मामृते जीवितुं ययं यद्यशक्ताः स्थ सर्वदा ।
प्रधानं तर्हि मां वित्त भवन्तश्चापराधिनः ॥२७॥

'If you are, at all times, unable to live¹ without me; then know me (as) the principal (one) and you (who have denied this earlier) are offenders.'²

[27]

This is the purport of *te hocur* ... (BU 6.1.13).

¹That is to say: to perform your function.

²This is the intended/imaginary remark by the Brahman (Prajāpati Indra) which concludes the controversy among the *prāṇas*. They are offenders in not recognising the greatness of Prāṇa.

करं बलिं प्रधानाय दत्त वागादयोऽचिरात् ।
इत्युक्तास्ते तथेत्यूचुः सर्वस्वं ददते प्रभोः ॥२८॥

'Therefore, O Vāc and others, quickly¹ give tribute, i.e. offering of oblation, to the principal one', (said the Brahman). Thus told, they said, 'So (be it)' and they gave all that was their own to the lord.²

[28]

¹That is, without hesitation or delay.

²That is, Prāṇa, their overlord.

त्वद्वसिष्ठतयैवाहं वाग्वसिष्ठेत्युदाहरत् ।
इत्युक्त्वान्येऽपि सर्वस्वं ददुर्वागादयः सुराः ॥२९॥

Vāc said, 'I am *vasiṣṭha* only through your being *vasiṣṭha*'. Thus saying,¹ the other deities,² also (addressed Prāṇa) Vāc and others gave (to Prāṇa) all that was their own. [29]

¹It means: in these words.

²That is to point out that the deities of the organs, viz. Agni etc., accepted the superiority of Prāṇa.

किमन्नं मे बुभुक्षोः स्याद्वासो वा मे किमीर्यताम् ।
इति प्राणवचः श्रुत्वा प्रत्यूचुः करणानि तम् ॥३०॥
आ श्वभ्यो यदिदं किञ्चिदा कृमिभ्यश्च लक्ष्यते ।
अन्नं तद्वतः सर्वं वयं त्वच्छेषभोगिनः ॥३१॥

Then having heard the words of Prāṇa, 'What is the food for me, who am hungry (lit. desirous of eating), and (*vā*) what garment for me? Tell me', said the organs to it, [30]

'Whatever food is noticed (to be) for (the beings, viz.) from the dogs and up to the insects, (all of it) is (only) for you and we are partakers of what remains (from it).' [31]

जीवः प्राणोऽत्र संसारी भोक्तेन्द्रियमनःपरः ।
प्राणो ह्येतानि सर्वाणि भवतीति च लिङ्गतः ॥३२॥

In this context, Prāṇa is the individual being (which is) transmigratory, the enjoyer, and dependent on organs and *manas*. That Prāṇa, indeed, becomes all of these (known) from the indication (in the Śruti).¹ [32]

Verse 32 averts the idea that sentience in an individual is different from Prāṇa, which can be devoid of a body.

¹Cf. *ātmendriyamanoyuktam* ... (*Kaṭhopaniṣad* 3.4).

तन्मया हीतरे प्राणास्तन्मूलास्तन्निबन्धनाः ॥३३॥

Indeed, the other *prāṇas* are made up of that;¹ they have it as their origin and they have dependence on it.² [33]

¹That is, *Prāṇa*, called *jīva* when in a transmigratory body.

²The origin, the sustenance and also the merger into it are understood from this. Cf. BS 1.1.2: *janmādy asya yataḥ*. Also cf. *sa eva teṣāṃ svāmī tam utkrāmantam iti śruteḥ* (SP).

एवंविदे हि नानन्नं किञ्चिदस्तीति दर्शनात् ।

फलं स्यात्प्राणसायुज्यं सर्वं तस्य हि भोजनम् ॥३४॥

In the case of the one, who knows thus, there is not anything which is not food—this is so, because of (thus) seeing (by the Śruti). Therefore, the result will be one's union (i.e. oneness) with *Prāṇa*, because all the food is (only) for it.¹

[34]

¹Cf. verses 30 and 31 above; (only) is used to indicate the force of *hi*.

भवत्यत्ता स सर्वस्य नान्नं भवति कस्यचित् ।

केवलेऽवस्थितेऽतृत्वे मृत्युनापि न गीर्यते ॥३५॥

And (*Prāṇa*) is the eater of all; food cannot be for anyone (else). Thus is established as the character (of *Prāṇa*) as the (one) eater, without a second, it is not swallowed even by Death.

[35]

अद्भिः परिदधत्येनमशिष्यन्त इति श्रुतेः ।

विदधाति ह्यपां पानमपूर्वं शास्त्रलक्षणम् ॥३६॥

(It is understood) from the Śruti (statement) *adbhiḥ paridadhaty enam aśiṣyantah*. ['They encircle this one with water, when

they are proceeding to eat.']. (Here) the scriptural injunction¹ lays down sipping of water which was not (known) before.² [36]

¹Cf. *bhokṣyamānam bhuktavantam ca prāṇam adbhiḥ paridadhāti* (not traced).

²SP tells that sipping of water is different from that prescribed by a Smṛti.

शास्त्रं मुख्यार्थमेव स्याद्विध्यर्थं यदि कल्प्यते ।
युक्तः फलानुषङ्गोऽस्य वासोलाभो विधिर्यदि ॥३७॥

Śāstra would (generally) be¹ conveying the primary sense,² if³ it is taken for an injunction.⁴ (And) it is only proper that it (viz. this injunction)⁵ has association with a result, viz. if⁶ (it is accepted as) an injunction for acquiring garments.⁷ [37]

¹The words 'would be' mean 'is'.

²That is, that which is expressed by the verbs in the Present Indicative sense.

³This 'if' is for 'because'.

⁴Cf *dadhnā juhōti* (a *vidhi* 'injunction' means '*dadhnā juhuyāt*').

⁵This injunction has reference to sipping of water which is mentioned earlier.

⁶The word 'if' means 'when'.

⁷Cf. SP: *nāphalānuṣaṅgo yukto vidheḥ*.

एके च शाखिनो व्यक्तं विधिरूपमधीयते ।
मन्त्रेण प्राशनं चापामेकेषां शाखिनां मतम् ॥३८॥

But (*ca*) some followers of another branch (of the Veda) read (in this context) a clear form of the injunction¹ and the opinion of the followers of yet another branch (of the Veda) is that there is 'sipping of water with (the recitation of) a Mantra'.² [38]

¹These are the followers of CU. The injunction is *asiṣyann ācāmed aśitvā cācāmet* (cp. BU 6.1.14). SP refers to *sarva-vedāntapratyayanyāya*, i.e. BS 3.3.1; cf. note under BUBV 3.1.3 above.

²*amṛtopastaranam asy amṛtāpidhānam asi* (*Taittirīya Āraṇyaka* 10.32.1; *Hiranyakeśi Grhya Sūtra* 1.13). This implies that sipping of water, which is mentioned earlier, is without any recitation.

अत्रदर्शनवच्चैके वासोदृष्टिं प्रचक्षते ।
 प्रायत्यार्थमपां पाने दृष्टेः प्रकरणादिह ।
 सर्वाभक्ष्यप्रसक्तिः स्याद्यदि कर्म विधित्स्यते ॥३९॥

Some say that this looking upon (water) is accepting it as a garment, because, here, through the force of the context (*prakaraṇa*), looking upon water has the meaning of not being naked.¹ If a ritual were (actually) prescribed, then there would be the contingency of eating all forbidden food. [39]

¹See Śaṅkara's paraphrase of *prāyatyārtham* (CU 5.2.2) as *anagnatārtham* 'for not remaining naked'.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके षष्ठाध्यायस्य
 प्रथमम् ब्राह्मणम् ॥१॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

6.2

Introductory.

यत्र संभावितं पूर्वं वस्तुप्राधान्यहेतुतः ।
वक्तुं तदत्र वक्तव्यं खिलकाण्डाधिकारतः ॥१॥

What was not considered earlier for saying, on account of the fact that there was prominence (given to) the thing (i.e. Ātman) is (to be stated) here, since there is the scope¹ for it in this (portion of the) Khila Kāṇḍa. [1]

¹This refers to *adhikāra*, viz. the topic which is begun in BU fifth Adhyāya.

सप्तमावसितावुक्तं मार्गप्रार्थनमग्नितः ।
सुपथेति श्रुतं तत्र श्रुत्या मार्गविशेषणम् ॥२॥

In the end of the fifth Adhyāya is stated a request to Agni (for showing) the way; there, in the words *supathā* ...¹ of the Śruti, is heard a qualifying attribute of the path. [2]

This verse states what is not said in the end of BUBV 5.17.

¹This is reference to BUBV 5.17.19; the *rc* in view is *R̥gveda* 1.189.1.

²Sureśvara uses *supathā* as an adjective of *mārga*; but, the *rc* has *supathā*, (in the instrumental case) which means 'by good path'. Sureśvara clarified his thought in the following verse.

संभवे व्यभिचारे च विशेषणविशेष्ययोः ।
दृष्टं विशेषणं लोके यथेहापि तथेक्ष्यताम् ॥३॥

And as, about the rule of the concomitance of an adjective and a substantive (in common parlance), there is a possibility of deviation from it, viz. (only) the adjective is noticed (or, used); so also should this¹ be understood (lit. seen) here.

[3]

¹Sureśvara seems to take *supathā* as only an adjective of *mārgena* which is to be supplied. His idea is: the word *loke* 'in common parlance (lit. the world)' refers, as SP points out, to the use of *nīlam* (*ānaya*) for *nīlam kamalam* (*ānaya*); the use of the adjective alone becomes meaningful. NKL (ms p.822) writes *raktakambalaḥ ityādaḥ viśeṣaṇaviśeṣyāyor vyabhicāre viśeṣaṇam dr̥ṣṭam ity arthaḥ!* Also, it adds: *vimatānām pathām kathanāyottarabrāhmaṇam iti.*

सुपथेति ततो युक्तं संभवे भूयसां पथाम् ।
विशेषणमतो वाच्याः पन्थानः कर्महेतवः ॥४॥

Therefore, the adjective *supathā* would be proper, since there is a possibility that there are many paths (available). And, as such, the paths of ritual action, as their cause, have to be stated.

[4]

This is according to NKL (ms pp.822-823) the result following from the preceding verse (*phalitam āha*). Sureśvara appears to take *supathā* only as an adjective and implies the substantive *mārgena* (in the plural sense). But that appears to be tautologous like *gavām gopatim*. In the Vedic word *supathā*, *su* qualifies *pathin* and therefore it is there only a noun and that precludes the need of any other substantive.

दक्षिणोदगधोमार्गा विहितप्रतिषिद्धयोः ।
विपाकाः कर्मणोर्वाच्यास्तद्वैराग्यप्रसिद्धये ॥५॥

They are the paths to the south, to the north and towards (the world) below; they are the results of actions, either

prescribed or prohibited. They are to be stated so that one comes to have aversion to that.¹ [5]

Read with profit NKL (ms p.823) *ke mārṅāḥ kimartham vā kathyante (ity) āha.*

¹This refers to ritual action implied by *vihitapraṭiṣiddha*.

नाविरक्तस्य निःशेषसांसारिकपुमर्थतः ।
प्रवृत्तिर्मुक्तये तस्माच्छ्रुत्या यत्नात्तदुच्यते ॥६॥

There is here not (seen) any tendency (lit. activity) of one who is not averse to the entire group of the ends of human activity; therefore, that¹ is stated by the Śruti with special care. [6]

SP introduces this verse with *vairāgyoktir akiñcitkareti cen nety āha.*

¹This is referring to ritual activity which should be, according to the author, the cause for one's aversion to the same.

शक्नुवन्ति न कर्माणि सर्वकामसमापनम् ।
निषेद्धं वाखिलानर्थास्तत्फलस्यातिफल्गुतः ॥७॥

Ritual activities are not sufficient for (i.e. capable of) accomplishing all the desires (of a man), or for warding off all the undesirable results, because the result (lit. fruit) of them is¹ entirely insignificant. [7]

¹The singular implies all results— *jātāv ekavacanam*.

न कर्म कारणं मुक्तेर्नाग्निर्दाहज्वरापनुत् ।
कर्मभ्यो जन्म नियतं जन्म चेन्निर्वृतिः कुतः ॥८॥

Ritual activity is not the cause for (effecting) liberation, (in the same way as) fire is not a remover of burning fever. From (the performance of) rituals, it is certain that there is birth

(of an individual for a second time). So also, if there is a birth (again), how could there be the highest delight (i.e. liberation)? [8]

This verse argues, with examples, that rituals do not lead to the attainment of liberation.

न कर्मणा कनीयस्ता महत्त्वं चान्तरात्मनः ।
इति बाहुमिवोद्धृत्य वेदान्तैर्घोषणा कृता ॥९॥

There is neither inferiority nor superiority of the inner self by (one's doing the performances) of ritual activity—the Vedānta (texts) have loudly declared this, raising the hand upwards, as it were! ¹ [9]

Here is cited an argument for proving what is said in the preceding verse.

¹This indicates the sense: with full force.

न तत्र दक्षिणा यन्ति विद्ययैव तदाप्यते ।
इति श्रीयाज्ञवल्क्येन मुक्तकण्ठमुदाहृतम् ॥१०॥

There *dakṣiṇās* do not approach, ¹ that is obtained only through knowledge—the revered Yājñavalkya has uttered this, giving full vent to his throat. [10]

¹*Śatapatha Brāhmaṇa* 10.5.4.16.

अतो मुक्तिं परीच्छद्भिरुत्पत्त्यादिविरोधिनीम् ।
त्यक्त्वा कर्माण्यथैकात्म्यज्ञानं सर्वात्मनाश्रयेत् ॥११॥

Therefore, those, who aspire ¹ for liberation which is opposed to origin etc. (should abandon ritual activities). Then (one should), after having abandoned (all) activities, whole-heartedly (*sarvātmanā*) turn to (securing) the knowledge of (one's own) oneness with the Ātman. [11]

SP quotes in support of the last part of the verse the Śruti statement *brahmasaṁsthō 'mṛtatvam eti* (CU 2.23.1).

¹*parīcchadbhiḥ* is derived from *iṣ* with the preposition *pari*.

तमोन्तरायतो मुक्तेर्नान्तरायोऽपरोऽस्ति हि ।
तमोहतिर्न कर्मभ्यो ज्ञानात्सा व्यञ्जकत्वतः ॥१२॥

Since liberation has only darkness (i.e. ignorance) as its impediment and that there is, therefore, no other impediment, there is no destruction of darkness through rituals. It is (effected) by knowledge, because that has the capacity to reveal (the true nature of the Brahman). [12]

Thus, in the first twelve verses of this Brāhmaṇa, Sureśvara has stated the twofold connection of it with what is foregone: (i) something remained to be stated regarding rituals, viz. regarding many paths as indicated by the word *supathā*, and (ii) there is liberation resulting only from knowledge and ritual actions are connected with it as causes of bondage.

न तु त्वमेतयोर्वेत्युत्क्रान्त्यादिस्वलक्षणम् ।
षड्विधं परिणामार्थमग्निहोत्राहुतीहयोः ॥१३॥
इति प्रश्नप्रतिवचस्ते वा इत्यादिकं जगौ ।
लोकं प्रत्युत्थितं यावदग्निहोत्राहुतीहयोः ॥१४॥

'Have you indeed not known of these two?'—this, as indicative of the upward movement etc.,¹ viz. the sixfold things which result from the two, viz. Agnihotra-offering and desire; [13] these are the question and the answer, thus has the Śruti stated (lit. sung) in (the words) *te vai ...* and up to the words *lokam pratyutthitam ...* which have resulted from Agnihotra and desire. [14]

¹The word etc. refers to *gati*, *pratiṣṭhā*, *tripti*, *punarāvṛtti* and *loka*.

Now, Sureśvara refers to what was said in the context of the Agnihotra.

अपूर्वपरिणामोऽयमग्निहोत्राख्यकर्मणः ।
उत्क्रान्त्यादिगिरेहोक्त आलोकोत्थानवाक्यतः ॥१५॥

Here is stated the result ¹ of *apūrva* ² coming from the ritual activity called Agnihotra, beginning with the word *utkrānti* (and up to) rising unto a *loka*.³ [15]

¹SP refers this to the sixfold character of worldly existence.

²*apūrva* is a term used by the Mīmāṃsakas for referring to the subtle form of a ritual performance which has the potency to produce its effects (even at a later day, though not necessarily immediately).

³See note 1 on the preceding verse.

आहुत्योरग्निहोत्रस्य ह्यन्तरिक्षादिभेदतः ।
आ लोकोत्थानतः श्रुत्या उक्तापूर्वस्य विक्रिया ॥१६॥

The Śruti has declared (i.e. explained) the modification of *apūrva* in the words up to rising unto *loka*, viz. as divided into the sky etc. (as the result of) the two ¹ *āhutis* of Agnihotra. [16]

¹Cf. SP: *agnihotrasya dve sāyam prātarāhuti tayor apūrvasyāntarikṣadvyādilakṣaṇaṃ lokam pratyutthānād ā śadvidhā jagadātmikā vikriyā*.

BU 6.2.1 is under reference.

तदेवोक्तमिहालम्ब्य तदग्नीक्षणसिद्धये ।
श्वेतकेतुरिति ग्रन्थः पर आरभ्यतेऽधुना ॥१७॥

Having stuck to that very statement here, this subsequent part

of the Śruti, which begins with the word *śvetaketuh*, is now taken up for establishing the viewing of Agni (in the manifold world). [17]

पञ्चाग्निविद्या यत्नेन वृद्धेनाब्राह्मणादपि ।
हित्वा धनं च मानं च लब्धेत्युक्तिः स्तुतिर्धियः ॥१८॥

The statement, viz. an elderly person gave up wealth and respect and obtained with effort the lore of five fires, even from one who is not a Brāhmaṇa, is a statement of praise of the knowledge (of the Ātman). [18]

Cf. BU 6.3.1-15.

परिणामो हि पाकेन पाकश्च न विनाग्निना ।
दर्शनात्परिणामस्य पक्ता सर्वत्र पावकः ॥१९॥

Ripeness (can be effected) only by heating and there cannot be heating without fire; therefore, since there is sight of ripeness, one should see everywhere the fire as the heater. [19]

This is the purport of the narrative (*ākhyāyikā*). It occurs at BU 6.3.1-15 (cp. CU 5.3.1-5.10.2). Read NKL (ms p.823): *pariṇāmasya pākakāryatvāt pākasyāgnikāryatvāt dyulokādīpañcapadārthānām dehāpariṇāmahetutvād agniśabdatvam ity arthaḥ*. (This is clearer than SP.)

The narrative is given in the following verses.

समाप्ताशेषविद्यं हि समावर्त्य पिता सुतम् ।
समाप्ताशेषविद्योऽसीत्येवमाहोत्ससर्ज च ॥२०॥

The father (saw) the son, who returned (from his preceptor's house), after he had acquired fully¹ all the lores (to be learned), and said to him 'Now, you have fully obtained all the lores' and sent him away. [20]

¹SP states that the word *aśeṣa* refers to the knowledge of the Veda, together with the Purāṇas and Nyāyaśāstra.

निकषोपलसंस्थेषु वेदवित्सु परीक्ष्यताम् ।
विद्येयं यत्नतो वत्स द्रढिम्ने मच्छ्रुतस्य च ॥२१॥

(He said to him:) My child, let this learning (of yours) be tested among the knowers of Veda who stand as touch-stone (of knowledge); this (for) confirming that (learning) and also (that) which you have received from me. [21]

This explains the father's purpose in sending the son away.

प्रसिद्धातीव विद्वत्ता पञ्चालब्राह्मणेषु हि ।
तामेव परिषदं तस्मादाजगाम त्वरान्वितः ॥२२॥

Since the excellence of knowledge of the Brāhmaṇas of the Pañcāla country had been known; therefore, he went to the assembly of them, hastening (or, with haste). [22]

पञ्चालब्राह्मणाञ्जित्वा विद्योत्कर्षैकहेतुतः ।
राजानमपि जेष्यामीत्याजगाम नृपं ततः ॥२३॥

Then, with an intention, 'after having conquered the Brāhmaṇas of the Pañcāla country by the excellence of (my) learning, I shall conquer the king also', he came to the king. [23]

तं जिगीषुं समायान्तमुन्मार्गे संस्थितं द्विजम् ।
सन्मार्गप्रतिपत्त्यर्थं राजोवाच स्वशास्त्रतः ॥२४॥

Having seen him, a Brāhmaṇa, who was desirous of winning (others) and thus going on a wrong way, the king said to him with the purpose that he learnt (about) a good path, in accordance with the scriptural injunction for himself.¹ [24]

¹Cf. SP: *unmārgagā prajā sanmāрге sanḥkramaṇīyeti rājakṛtyam* and NKL: *unmārgasthaḥ sanmāрге netavyo rājñēti dharmasāstrād ity arthaḥ*.

आमन्त्रयामास च तं कुमारा३ इति बालवत् ।
प्रतिशुश्राव सोऽप्युक्तो भो३ इत्युक्त्या गुरुं यथा ॥२५॥

And he addressed him as unto a young lad 'O, boy'; he, on his part, answered 'Yes, Sir' as unto a teacher. [25]

These two ways of addressing are unusual according to the custom of the day. The boy was a Brāhmaṇa, and the king a Kṣatriya and, therefore, these ways of addressing were not considered as having propriety in them. But, that way was adopted by the king purposefully.

दर्पोत्सेकसमावेशान्नानुशिष्टोऽयमादरात् ।
पित्रेति जातसंदेहः पर्यपृच्छदतो नृपः ॥२६॥

Then, on account of excessive pride (in Śvetaketu), the king entertained a thought (lit. doubt in his mind), 'This one was not instructed by his father carefully¹' and asked (him) a question. [26]

¹Literally, with respect for the method of instruction.

अनुशिष्टोऽसि किं पित्रा उताहो नेति भण्यताम् ।
नानुशिष्टस्य जगति वृत्तमीदृक्समीक्ष्यते ॥२७॥

'Have you been instructed by your father?¹ or not? Tell me this.' (This he did) since such a behaviour (as Śvetaketu's) is not seen in this world, on the part of one who is instructed.

[27]

¹This (viz. *pitṛā utāho*— not joined in Saṃdhi) is in accordance with SP: *kalpadvayaspaṣṭatāyai viśaṃdhikaraṇam*.

बाढं पित्रानुशिष्टोऽस्मि किं न पश्यसि मज्जयम् ।
त्वत्पण्डितेषु सर्वेषु पृच्छ मां यदि शङ्कसे ॥२८॥

‘Yes, I have been instructed by my father. Why! do you not see my victory (in debate) among all your learned men (i.e. Paṇḍits)? Ask them, if you have any doubt (about my instruction).’ [28]

This is the meaning of *om* in BU.

एवं राज्ञो यथोक्तोक्त्या ह्यभ्युपेतेऽनुशासने ।
श्वेतकेतुमथाप्राक्षीत्पञ्च प्रश्नान्क्रमान्नृपः ॥२९॥

Thus, at the words of the king that are stated (before), when (Śvetaketu) admitted¹ (that he had received) instruction from the father, the king asked him five (following) questions in order. [29]

¹Add, in his answer ‘*om*’.

BU 6.2.2 is under reference.

अनुशिष्टोऽसि चेद्ब्रूहि तुल्येऽपि मरणे प्रजाः ।
यथा विप्रतिपद्यन्ते भिन्नवर्त्मप्रभेदतः ॥३०॥

(i) ‘Tell me, now that (lit. if) you have been instructed, how all people, (who) have a common death, proceed variously along different ways.’ [30]

येन कर्मविशेषेण समानायां मृतौ प्रजाः ।
अन्या अन्येन संयान्ति यथान्येनापरास्तथा ॥३१॥

(ii) ‘By what specific action do the people, who have a common death, proceed, some of them by one way and some others, by another?’ [31]

त्वयोक्तं न विवेदाहं नानुशिष्टिरिहास्ति मे ।
वेत्थेह ता यथा भूय आवर्तन्ते प्रजा इति ॥३२॥

(Śvetaketu answered:) 'I do not know what you have asked (lit. said); there has been no instruction imparted unto me, in this respect.' (iii) 'Have you known as to how the people once again come to this world?', (the king asked). [32]

यथा येन मृताः सत्यो हेतुनानेन च प्रजाः ।
तं वेत्थ स्विन्न वेत्युक्तो नेति होवाच तं पुनः ॥३३॥

'(And) as to how, after having died, the people (return to life) and by such and such a cause, have you or have you not known that?', thus asked, Śvetaketu answered him again, 'No, (I do not know)'. [33]

प्रयद्भिरसकृद्भूतैर्महद्भिर्बहुभिः सदा ।
नैवासौ पूर्यते लोको यथा वेत्थ तथात्र किम् ॥३४॥

(iv) 'Also, have you known how the world does not get fully filled when the ever large number of beings are moving (unto it) again and again?' [34]

नेति होवाच पृष्टः सन्नाजा पप्रच्छ तं पुनः ।
हुतायामाहुतौ वेत्थ यतिथ्यां पुरुषाभिधाः ॥३५॥
आप एव समुत्थाय पुरुषाकृतयो हुताः ।
प्रवदन्ति यथा वेत्थ तथाशु प्रतिपद्यताम् ॥३६॥

(Thus) asked, (Śvetaketu) answered; 'No, (I do not know)'. Then the king asked him again (v) 'Have you known as to what is the number of the offering, in order, in which waters are called men, [35]
rise in the form of men and begin to speak?, tell me quickly, if you know this.' [36]

राजानं नेति होवाच नाहं वेद्मि त्वयोदितम् ।
 पर्यपृच्छदतो राजा शान्तदर्पं द्विजं पुनः ॥३७॥
 पथस्त्वं देवयानस्य पितृयाणस्य वाञ्जसा ।
 वेत्थ प्रतिपदं किंवा न वेत्सीत्यभिधीयताम् ॥३८॥

To the king he said (in answer): 'No, I do not know what you have said'. Then the king again asked the Brāhmaṇa, whose pride was subdued; [37]

'Have you known well about the path Devayāna and/or Pitṛyāna? or, have you known or not known the means to the access (to it)? Tell me.' [38]

This verse explains the meaning of the word *pratipad* 'action towards securing (Devayāna etc.)' i.e. what becomes useful as a means. Read also BU *yat kṛtvā (devayānaṃ vā panthānam) pratipadyante*; cf. the following verse.

प्रतिपद्वचनस्यार्थं यत्कृत्वेत्यादराच्छ्रुतिः ।
 व्याचष्टे देवयानादिप्रतिपत्तौ क्रियैव सा ॥३९॥

In the words *yat kṛtvā* ... 'i.e. by doing which' the Śruti has respectfully explained the meaning of the word *pratipad*: it is just an action for securing the Devayāna etc. [39]

स्वाभ्युह इति मा शङ्कीर्यतो मार्गद्वयेऽपि नः ।
 ऋषेर्मन्त्रस्य श्रवणमस्ति तच्च विभाव्यते ॥४०॥

'Do not think that this is my construct (or, imagination), since, in respect of the two paths also, we have heard a Mantra from a seer and that is being revealed (i.e. explained) to you.' [40]

द्वे सृती अशृणवं साक्षात्संबन्धिन्यौ दिवौकसाम् ।
 पितॄणां चापि मर्त्यानां मार्गौ तावधिकारतः ॥४१॥

'I have heard (i.e. known about) two paths which are related

directly to the dwellers of the heaven (i.e. gods) and also of the manes; and these two are for men according to their eligibility.' [41]

This is *Rgveda* 10.88.15.

ताभ्यां सर्वमिदं गच्छद्यथाकर्म यथाश्रुतम् ।
समेति मध्ये भोगाय रोदस्योः कर्मणौ जगत् ॥४२॥

Going by those two paths, all this world attains (to them): between the two worlds,¹ in accordance with its actions or knowledge, for experiencing the result² of the action. [42]

¹This refers to the heaven and the earth.

²Singular form implies plural (*jātāv ekavacanam*).

त्वदुक्तात्प्रश्नगणतो न वेद्म्येकमपीरितम् ।
प्रश्नं मा मामतः प्राक्षीरित्युक्त्वावाक्शिरा ह्यभूत् ॥४३॥

(Śvetaketu) said: 'From the number (lit. group) of questions I have not known any one question, which you have asked me; therefore, do not ask me (any more)'. Having said this, he stood with his head lowered down. [43]

This explains *athainam* ... (BU 6.2.3).

BU 6.2.3 is under reference.

निर्धूताशेषकलुषं शान्तदर्पं समीक्ष्य तम् ।
वसत्यामन्त्रयांचक्र उष्यतामिति पार्थिवः ॥४४॥

Having seen him with all his blemish washed away (and) with his pride subdued, the king invited him to stay¹ (with himself), saying, 'Stay with me'. [44]

¹*vasatyā* is for *vasatyartham* as paraphrased in the next verse.

हीतो रोषाच्च तद्वाक्यं वसत्यर्थमुदीरितम् ।
अनादृत्य प्रदुद्राव यत्रास्ते गौतमः पिता ॥४५॥

Disregarding his words, for invitation to stay, (Śvetaketu), on account of shame and anger, rushed away (*pra*) to where his father Gautama stayed. [45]

This explains *anādr̥tya* in BU text.

प्राप्याथ पितरं रोषात्साभ्यसूयं निराह सः ।
इति वावेति वचनं पूर्वोत्तरविरोधतः ॥४६॥

Having approached his father he said to him, with anguish (lit. anger) with exasperation, '(Have you not) thus (declared to me) "Thus indeed (you have been fully instructed)."'? (The words) contradict (what was said) earlier and (what the situation is now) later. [46]

This explains *taṁ hovāca* in BU.

इतीत्युक्तपरामर्शो वाकोवाक्यं नृपेरितम् ।
अप्रात्यक्ष्यात्किलेत्युक्तिरनुमानाद्धि तद्गतिः ॥४७॥

The word *iti* (in BU 6.2.3) refers to what was said (viz.) the series of questions asked by the king; the word (lit. utterance) *kila* is owing to the indirectness (in it); it is understood by inference.¹ [47]

The falsehood in the father's words, 'You have been fully instructed' is inferred from the son's ignorance about what the king asked. This is 'clarified' in the following verses: The word *vākovākya* in the verse primarily means Tarka (as also *praśnavacanāsamūha*— NKL) and therefore the use of the words *anumānād dhi tadgatiḥ* becomes imperative.

नृपोक्त्यभिभवान्लिङ्गाद्विचिंतोऽस्मीति लिङ्गयते ।
यथावदनुशिष्टस्य नाभिभूतिर्यतोऽन्यतः ॥४८॥

From the indication, viz. the insult inflicted (on the son) by the words of the king, is conveyed (lit. indicated), 'I have been deceived (by you)', since there would not have come any insult from (another person) to one (i.e. me, here) who was properly instructed (by you, as told by you then). [48]

तं मामननुशिष्यैव किमित्युक्तं त्वया पुरा ।
अनुशिष्टोऽसि पुत्रेति विचिंतोऽस्मीत्यतौ मतिः ॥४९॥

'(Thus) having not (fully) instructed me, why did you tell me thus earlier: 'O son, you are (now fully) instructed'? Therefore, I feel that I have been deceived', said the son. [49]

कथं त्वं नानुशिष्टोऽसि ब्रूहि तत्कारणं मम ।
पञ्च मामित्यतोऽवोचद्यथा ह्यननुशासनम् ॥५०॥

'(Now) how do you say, you were not fully instructed (by me)? Tell me the reason (for your saying this)', (said the father). Then (Śvetaketu said in answer), '(The king) asked me five questions and then spoke to me in a way (that indicated:) (I have) not received (full) instruction.' [50]

प्रश्नास्ते कतमे वत्स यांस्त्वं न ज्ञातवानसि ।
प्रश्नप्रतीकानवदत्पृष्टः पित्रा समासतः ॥५१॥

(The father asked him), 'What are those (five) questions, my son, which (i.e. whose answers) you did not (know)?' (Śvetaketu), thus asked, told him the initial words of the questions,¹ in brief. [51]

¹This is the meaning of *ima iti ha ...* in BU 6.2.3.

ब्राह्मणज्ञानतोऽन्यत्र विद्यां पप्रच्छ भूमिपः ।
न हि ब्राह्मणविज्ञाने किञ्चिदस्ति त्वयागतम् ॥५२॥

(The father said:) 'The king has asked you about the lore (which exists) elsewhere than in the knowledge of the Brāhmaṇas; indeed, there is nothing of what is in the knowledge of a Brāhmaṇa, viz. that which is not known to you. [52]

This is the meaning of *sa hocāca* ... in BU.

इत्येतद्धृदये कृत्वा तथा न इति सोऽवदत् ।
मा शङ्किष्ठास्ततो मां त्वं नोक्तं सर्वं ममेति हि ॥५३॥

Thinking about it to himself, the father said to him: 'It is not so'.¹ Do not therefore disbelieve in me. (Do not think) indeed, "All is not told to me". [53]

This explains *tathā naḥ* in BU.

He meant: 'Also, know that I have told you all that a Brāhmaṇa should be taught. You should not doubt about the instruction you have received.'

¹Note the absence of Saṃdhi in (*tathā*) *na iti*.

प्रेहि तत्र गमिष्यावस्तद्विद्यालब्धिसिद्धये ।
ब्रह्मचर्यं च वत्स्याव आवां तत्र नृपे गतौ ॥५४॥

'Go quickly (*pra*) (with me), let us go there¹ for securing that (or, his) lore; let us, on going, accept studentship under the king.' [54]

¹This means unto the king or, to his (capital) city (SP).

यातु तत्र भवानेव नाहं तं गन्तुमुत्सहे ।
इत्युक्तः सूनुना हीतः स्वयमेव जगाम तम् ॥५५॥
ससंभ्रमः स चोत्थाय तस्मा आसनमाहरत् ।

अप आहारयांचक्र अर्घ्यपाद्यार्थसिद्धये ॥५६॥
 सत्कृत्य च यथाशास्त्रं राजाथ तमवाच ह ।
 वरं कामं प्रयच्छामो यः कामो वाञ्छितस्त्वया ॥५७॥
 ऋषिराहाथ राजानं कामितार्थस्य सिद्धये ।
 प्रतिज्ञातो वरस्तावद्ववताप्रार्थितोऽपि सन् ॥५८॥

'May you go there yourself, I do not feel like going to him', thus told by the son, out (of his sense) of shame, (the father) himself went to him. [55]

He (i.e. the king), on his part (*ca*), rose up hastily in respect for him, and brought to him a seat (and) also caused water to be brought for effecting worship of him and washing of his feet. [56]

Having received him respectfully, according to the custom, the king then said to him, 'We wish to give you a boon, according to your choice, viz. that which you desire'. [57]

For securing what he wished, the sage (i.e. Gautama) said to the king, 'You have promised the boon for the fulfilment of my desire,¹ even if that boon was not asked for by me'.² [58]

This explains *bhavān eva ...* in BU 6.2.4.

¹*kāmitārthasya* is paraphrased as *vidyālābhāya* (NKL ms p.802)!

²Cf. SP and NKL: *brāhmaṇaṃ svayam āhūya yācamānam akiñcanam ityādinyāyas te mā bhuḍ iti (sūcitam)*. (*Mahābhārata* iii.App.I.321.35), cf. *Mahābhārata* iii. App. I. 32(35).

अस्तु सत्यप्रतिज्ञोऽत्र प्रतिज्ञातं त्वयेह यत् ।
 देहि प्रश्नात्मिकां वाचं यां मत्सूनोरभाषथाः ॥५९॥

'May you be truthful in this your promise, the promise which you have given me here (i.e. in this assembly).¹ Give me those words, in the form of questions, which you had spoken to my son.'² [59]

¹These insistent words of the father imply the king's possible reply, 'My promise ever stands'.

²This implies 'the answers to them'.

BU 6.2.5 is under reference.

राजापि तमुवाचाथ दैवेष्विति परं वचः ।
दैवेष्वयं वरः सिद्धो मानुषाणां वरं वृणु ॥६०॥

And then the king said to him in the words *daiveṣu* ...:¹
'This boon is known (lit. established) as one among the gifts
by the gods (to men), therefore, choose a boon of men'. [60]

¹This refers to the word *daiveṣu* in BU 6.2.6.

BU 6.2.6 is under reference.

न हि मानुषतो दैवः प्रार्थनीयो विजानता ।
मानुषस्तूचितो दातुमादातुं मानुषाद्वरः ॥६१॥

'Indeed a person, who is learned (*vijānat*), should not ask
of a human being for a boon of a divine gift. It is only proper
to give what is a human boon and also to receive (that) from
a human being.' [61]

BU 6.2.7 is under reference.

ममाप्यस्त्येव तत्सर्वं यद्यद्वित्ससि मानुषम् ।
विज्ञायते भयैवादौ भवतापि प्रमान्तरात् ॥६२॥

(Gautama said), I have indeed all that, viz. whichever human
gift you wish to give me (and) it is already known by me;
(this is known) to (lit. by) you also from other means of
knowing.¹ [62]

¹This is for *pramāntara* which is paraphrased by SP as *āptavākyādi*. In all probability, *pramā* stands for *pramāṇa*.

न च तत्प्रार्थनीयं मे भरि यद्विद्यते मम ।
तस्माद्वैवो वरो मह्यं दीयतां नास्त्यसौ मम ॥६३॥

'I do not have to ask for that which I have in plenty. Therefore, may that divine boon be given to me, since I do not have it. [63]

बहोरनन्तापर्यन्तदैववित्तस्य लोभतः ।
मा भूरभ्यवदान्यस्त्वं दाता भूत्वेह नः प्रति ॥६४॥

'Do not be a misery giver owing to attachment (*lobhataḥ*) to that ample, endless, immeasurable divine wealth after you have been a (liberal) giver.' [64]

दैवं वरं न संदातुं प्रत्याख्यातुं च तं द्विजम् ।
इति दुःखित्वमापन्नस्तीर्थेनेच्छेत्युवाच तम् ॥६५॥

(The king) became grief-stricken (as he was) unable to grant to the Brāhmaṇa the boon of a divine gift and also to displease (lit. discard) him; nevertheless (he said) to him, 'Wish (for this boon) in a proper way.'¹ [65]

¹*tīrtha* means according to the customary mode regarding one's approach to a preceptor.

तीर्थेन विद्या देयेति नातीर्थेनेति चागमः ।
यतोऽतस्तीर्थसृत्यैव मत्तो विद्यां त्वमाप्नुहि ॥६६॥

Since the tradition¹ is that a lore is to be taught (lit. given) by one who is a preceptor² and not by one who is not a preceptor; therefore, you should obtain this lore from me, in the customary way. [66]

¹So it is heard from old.

²This is for *tīrtha*. Refer to *Yājñavalkyasmṛti* 1.28 where six types of teachers are stated.

BU 6.2.8 is under reference.

शास्त्रार्थं स्मारितः सोऽथ राज्ञोपैमीत्यथोचिवान् ।
वाचैव ह्यवरान्पूर्व उपयन्ति यतस्ततः ॥६७॥

(Gautama), thus reminded by the king of the Śāstra, said to him: 'I am approaching you, (O preceptor)'. (Thus he did) since the higher born approached the lower born only uttering (i.e. with) these or such words.¹ [67]

¹The higher and the lower refer to the higher and the lower castes. 'Only uttering (i.e. with these (or such) words)' in this case means the Brāhmaṇa sage should not take in his hands sacrificial fuel etc. as was customary. (Cf. *Taittirīya Āraṇyaka* 2.11)

स होपायनकीत्यैव ब्रह्मचर्यमवास ह ।
उपैमीति हि संकीर्तेर्नान्यत्किञ्चिच्चकार सः ॥६८॥

By merely stating about (his) approach (*upāyanakīrtyaiva*), he stayed (with the king) as (his) student. He did not do anything else than saying; 'I approach (you)'. [68]

सापराधं स्वमात्मानं राजा परिहरन्नथ ।
क्षमयामास तमृषिं तथा न इतिवाक्यतः ॥६९॥

Then the king, wishing himself not to have any blemish,¹ requested him (for forgiving), in the words 'Do not do so ...'. [69]

¹It literally means an offence. An alternative translation could be: "... king, avoiding himself (to be) one who has committed

an offence....”

मा नोऽपराधिनो मंस्थास्तव पूर्वे पितामहाः ।
नामन्यन्त यथा तद्वद्वानप्यपराधिनः ॥७०॥

‘Please do not consider me as offending, since your elders (or forefathers) did not consider (themselves) as offending (towards my elders). So also do you (not consider yourselves as offending me.)’ [70]

त्वत्संप्रदानतः पूर्वं विद्येयं हि कदाचन ।
नोवास ब्राह्मणे साध्वी साक्षादपि बृहस्पतौ ॥७१॥

(He continued to say:) ‘Before my imparting (lit. giving this) to you, this excellent¹ lore did not (ever) abide in any Brāhmaṇa; yes, not even in Brhaspati himself (*sākṣāt*)’. [71]

¹This is for *sādhvī*, though it may merely mean ‘good’.

एवं गुप्तमपि तु तां वक्ष्याम्येवाहमञ्जसा ।
प्रत्याख्यातुं समर्थः को ब्रुवन्तं ब्राह्मणं नृपः ॥७२॥

‘I shall impart this unto you, without any hitch (*añjasā*), the one which was kept (*gupta*) from (the Brāhmaṇas);¹ who can stop him who is imparting this instruction to a Brāhmaṇa?’ [72]

¹Cf. verse 71 above.

BU 6.2.9 is under reference.

असाविति क्रमोऽभेदि कस्माद्धेतोरितीर्यताम् ।
प्रश्नस्येह चतुर्थस्य प्राधान्याद्विद्यते क्रमः ॥७३॥

(Now) let it be said as to why the order (of the answers to the king’s questions) has been set aside (lit. broken) in

the words *asau* ...;¹ (the answer is:) 'The order is set aside, since there is prominence of (the answer to) the fourth question'.¹ [73]

This refers to verse 35 above and also to the discussion on this point occurring in BUB at the beginning of this Brāhmaṇa.

¹BU 6.2.9: *asau vai loko'gninā*

उत्पत्तेस्तदधीनत्वाज्जन्मायत्ता स्थितिस्तथा ।
स्थित्यपाये प्रयाणं च श्रुत्याभेदि क्रमस्ततः ॥७४॥

The order of the (answers to the questions) has been set aside by the Śruti, since origination depends on that (viz. what is said in the fourth question), so also sustenance depends on origination and merger (lit. departure) on sustenance. [74]

This supplies the reason for *bhidyate kramah* in the preceding verse.

दूरतोऽमुष्य लोकस्य स्यादसाविति गीरियम् ।
समिद्धमादिभी रूपैर्लोक्यते लोकगीरपि ॥७५॥

The word *asau* is for that world (*dyauh*), (for it is) in the distance; so also the word *loka* (is used) since it is seen (from the verb root *lok* 'to see') by means of sacrificial fuel, smoke etc.¹ [75]

Now follows the discussion of the answers in BU.

¹This refers to cinders, sparks etc.

वैशब्दः स्मरणाय स्यादग्निस्तत्परिणामतः ।
यत आहवनीयोऽग्निर्द्युलोकात्मतया स्थितः ॥७६॥

The word *vai* is for the remembrance (of what is commonly known) and the word *agni*, for its result (*pariṇāma*);¹ since *āhavanīya*² Agni has stayed (in this world) as the form of

heavenly fire.

[76]

¹*pariṇāmataḥ* is used for *pariṇāmatvataḥ*.

²This is the principal fire in a sacrifice, this is Agni's earthly existence.

अपर्वपरिणामोऽयमग्निहोत्राख्यकर्मणः ।
द्युलौकोपक्रमो ज्ञेयो यावत्पुरुषसंभवः ॥७७॥

This is the result of *apūrva*,¹ pertaining to the ritual called Agnihotra. This introductory reference in BU to the heavenly world is to be understood in relation to the origin of a man.

[77]

¹For *apūrva*, refer to note 2 on verse 15 above. SP understands *utkrānti* etc. by *dyulokopakrama*.

आहुत्योरग्निहोत्रस्य या विभूतिः पुरोदिता ।
सैवेह दृष्टिविध्यर्थं श्रुत्या व्याख्यायतेऽञ्जसा ॥७८॥

That (particular) appearance of the two *āhutis* of Agnihotra¹ ritual which was stated formerly is now explained here by the Śruti so as to prescribe (that) viewing² without difficulty.³

[78]

¹Cf. SP: *karmāpūrvapariṇāmo jagat ity āhutyoh stutyatvena uktam (pūrvatra i.e. agnihotrādhikāre)*.

²This points out the significance of *asau*, viz. *tad eva jagat (iti dr̥ṣṭiḥ)*. This justifies the *āhavanīya* etc. as Agnikārya; i.e. *apūrvapariṇāma* as understood in the preceding verse.

³That is, smoothly (*añjasā*).

अध्यात्मे चाधियज्ञे च ह्यधिलोकाधिदैवयोः ।
श्रुतिराहवनीयादेर्व्याचष्टे विस्तृतिं स्फुटाम् ॥७९॥

The Śruti has clearly stated extensively about *āhavanīya* etc.

in the spheres of the body, of the sacrifice, of the world and of the gods.¹ [79]

¹God here means one who superintends over the subtle form of organs and bodies.

लोक आहवनीयोऽग्निरसाविति विचिन्तयेत् ।
आदित्यादिष्वपि तथा समिदादिसमीक्षणम् ॥८०॥
समिन्धनात्समिद्भान् रश्मयो धम इत्यपि ।
समिन्निर्गमसामान्यादर्चिरहस्तथैव च ॥८१॥

One should think that the *āhavanīya* fire of this world is that ¹Agni; so also in the case of *Āditya* and others should one hold that they are the sacrificial fuel etc.¹ [80]

(The word) *samidh* is (based) on the act of enkindling, so also are the words *bhānu*, *raśmi* and *dhuīma* coming from the *samidh*;² in the same way, *arcis* also is from *ahan*.¹ [81]

¹In the entire verse, the different effects of one cause are identified with it.

²All these words refer to act of enkindling. This is how the Brāhmaṇa relates these words to the meaning at the base.

शान्तत्वाच्च दिशोऽङ्गाराः समिद्धि परिणामतः ।
अर्चिरङ्गारभावस्य यथैवं भानुहेतुकाः ।
रश्मयश्च दिशश्चैता आदित्यसमिदाश्रयाः ॥८२॥

Further, owing to their coolness, the (cardinal) quarters are cinders; indeed they are the *samidh* itself, since they are the effects (of the same). As the flame (is the cause of) the (becoming) of cinders, so do the rays have *bhānu* as their cause, and these quarters are dependent on¹ the *samidh* (in the form of) *Āditya*. [82]

Verses 81-82 explain why one has to understand fire and the things related to the fire to be, in reality, *Āditya*.

As in verse 81 we understand *dhūma* etc. to be the effects (*pariṇāmas*) of *samidh*, so should we understand here *raśmi* etc. to be the *pariṇāma* of *Āditya*.

¹That is, caused by. Read SP: *raśmyādīnām ādityavikāratvāt tadāśrayatvāt teṣu dhūmādidṛṣṭiḥ kāryā*.

अवान्तरदिशस्तद्विद्विक्षितवैकहेतुतः ।

विस्फुलिङ्गा इति ज्ञेयास्तस्मिन्नग्नौ यथोदिते ॥८३॥

In the same way, the subordinate quarters are to be known as small sparks, for the reason that they are scattered variously. Into that fire described above (do gods make their offerings).¹

[83]

¹SP states *devā juhuvatīti śeṣaḥ*.

त्रयस्त्रिंशच्च ये देवाः स्युस्तेऽध्यात्मादिभूमिगाः ।

होतारस्तत्र तत्र स्युः कर्मज्ञानानुरोधतः ॥८४॥

And those gods, thirty-three¹ in number, who belong to the various levels, viz. those related to the body etc., are to be known as the Hotṛ priests at different (levels), in accordance with the knowledge about their activities.

[84]

¹These are eight Vasus, eleven Rudras, twelve Ādityas, Indra and Prajāpati. These are subdivided as supported in *adhyātma*, *adhibhūta* and (*adhidaivika* cf. verse 79 above) and they become the Hotṛs in the body of a sacrificer in accordance with his different actions in the sacrifice and thus they represent his *prāṇas*, viz. *vāc* and other sense-organs.

ऋत्विगूपेण ते ह्यासन्यथा प्राकृतकर्मणि ।

होतारः परिणामेषु तथैवोत्तरभूमिषु ॥८५॥

As they were in the form of different Hotṛs in the initial (ritual) act, so are they in the later levels (i.e. subsequent

ritual actions), which are their outcome (or modifications).

[85]

uttarabhūmis refer to the initial sacrificer's subsequent lives which are the effects of the acts in every later life.

आहुत्योः परिणामोऽयमग्रसोऽपूर्वमित्यपि ।
तस्य श्रद्धैकहेतुत्वाच्छ्रद्धा नामैति कीर्त्यते ॥८६॥

The effects of two *āhutis* is this energy, the essence, and also the *apūrva* and, that (viz. effect), has only *Śraddhā* as its cause, (that is why) it is named as *Śraddhā*. [86]

तस्याश्चाप्याहुतेः सोमो राजा संभवतीति च ।
तस्याभिवृद्धिः संभूतिर्न त्वभूतजनिर्यतः ॥८७॥

And also (it is said in the *Śruti*) that Soma is the king of that offering, because it (i.e. Soma) has growth but not an origin,¹ for it was never born (of anything else). [87]

¹The reason for this statement is that Soma is already in existence as the cause of the growth of one's body after it reaches the heaven, in the lunar orb.

द्यौरग्निः समिदादित्यः श्रद्धा तस्मिन्निह हूयते ।
सूर्ये समिधि दीप्तायां श्रद्धां जुहति देवताः ॥८८॥

The heaven (is) the fire, *Āditya* (is) the sacrificial fuel, and *Śraddhā* is offered into that; (indeed) gods make their offerings (of *Śraddhā*) when the sun, the sacrificial fuel, is blazing. [88]

In verses 80-88, there was the discussion of the first way of metaphorically looking at the Agnihotra in its elaborate form. Now, there will be the discussion of the second metaphorical explanation of Agnihotra from verse 97cd. Verses between 89 and 97ab are some general observations regarding the

metaphorical explanations.

श्रयतेः श्रद्धधातेर्वा श्रद्धेत्याहुर्विपरिचतः ॥८९॥
 श्रयणाद्वारणाच्चापः श्रद्धाह्वाः कारणात्मिकाः ।
 भूत्वाप इति लिङ्गाच्च आपः श्रद्धाभिधास्ततः ॥९०॥

The wise ones have used the word *śraddhā* on the basis of (its derivation) from the verb root *śri* 'to resort to, or, the verb root *śrat-dhā* 'to support'.¹ [89]

Waters are called *Śraddhā*,¹ since they are resorted to and they lend support, and (thus) they are (also) of the nature of the cause—on the basis of the indication by the words *bhūtvāpaḥ* and therefore waters are known by the name *Śraddhā*. [90]

Verses 89-90 are Brāhmaṇical explanations of the name *Śraddhā* for waters.

¹Cf. *Taittirīya Saṃhitā* 1.4.8.1. The verb root *śrat-dhā* has the sense of *dhāraṇa*.

आकृष्टं रश्मिभिस्तोयमादित्ये प्रतितिष्ठति ।
 तस्मादादित्यगः सोमः क्षीण आप्यायते पुनः ॥९१॥

Waters, pulled (lit. attracted, i.e. drawn) by the rays, become steady in *Āditya*. Therefore, Soma which abides in the Sun, has waxed again¹ though it has waned. [91]

¹This waxing of Soma, who had waned, is called its birth from *āhuti*.

परिणामो ह्यपां सोमः शीतांशुस्तेन सोऽम्मयः ।
 श्रद्धाहुतेर्हि सोमस्य संभवः शास्त्र उच्यते ॥९२॥

Since Soma is the effect (lit. modification) of waters, therefore, it (i.e. Soma) is of cool rays,¹ it is described as full of waters; indeed, in the scriptures, the birth of Soma is said to be from

the offering with Śraddhā.²

[92]

This is to refute the opinion that Soma is born (only) of Tejas. And this offers the reason for the argument in the preceding verse (NKL ms p.826).

¹This points to the direct perceptibility of Soma.

²Sureśvara does not oppose the origin of Soma from Tejas also, for *śraddhāhuti* indicates that.

अङ्गाराश्चन्द्रमास्तस्मिन्हुतेऽग्नौ सोमसंभवः ।

सोमचन्द्रमसोरेवं भेदः शास्त्रेण दर्शितः ॥९३॥

The cinders (of the above-said fire) are the moon and, after the offering is made into that fire,¹ there is the origin of Soma; thus is the difference between Soma and the moon explained by the scripture.

[93]

In common parlance, Soma and Candramas are understood as synonymous, but there is a basic difference between them, as scripture has shown.

Also, the argument proceeds against those who stand on the Śruti *candramā aṅgārāḥ*. The argument is according to SP: *kārahbhūtaś candramā phalabhūtaḥ somaḥ*.

¹This refers to the heavenly fire.

चन्द्रमा मण्डलं स्वच्छं चन्द्रकेण मितो हि सः ।

सोमस्तु मण्डले श्वेतो वर्धते हसते च यः ॥९४॥

The moon is the brilliant orb and it is compared with mica; but, the moon is white in the orb¹ and it waxes and wanes also.

[94]

SP notes that Soma is comparable to a creeper which also grows and withers (i.e. it wanes.) Also, it is meant that the Śruti statement *evam enāns tatra bhakṣayanti* does not refer to the moon's orb, since only the *tanmātra* is not *bhogyā* 'an object

of enjoyment' (in contrast with the Soma plant, cf. BUBV 2.1.57).

¹This has, according to SP, reference to the Puruṣa in the moon.

चन्द्रमाः पर आदित्यादर्वासोमः श्रुतेर्मतः ।
 आदित्याच्चन्द्रमित्याह नैते संवत्सरं तथा ॥९५॥
 सोमचन्द्रमसोस्तस्माद्भेदः समवगम्यते ।
 देशाभेदादभिन्नौ तावेष सोम इति श्रुतेः ॥९६॥
 भिन्नौ च धर्मभेदेन तस्मादुभयथा श्रुतिः ।

The Śruti has held that Candramas 'moon' is beyond Āditya 'the sun' and Soma is below (not beyond Āditya); therefore, the Śruti said in the words *ādiyāt candram* and also *naite saṁvatsaram*. [95]

Therefrom is understood the difference between Soma and Candramas; but, considering them as belonging to the same region, they are held as identical and the Śruti has said *eṣa somaḥ*. [96]

And (yet), in respect of their properties, they are different; therefore, the Śruti has expressed itself in two ways.¹ [97ab]

Verse 95 points out the difference between Soma and Candramas on the basis of the Śruti, viz. CU 5.10.2: (referring to Devayāna) *māsebhyaḥ saṁvatsaram. saṁvatsārād ādityam ādityāc candramasam* and 4: (referring to Pitṛyāna) *māsebhyaḥ pitṛlokaṁ. pitṛlokād ākāśam. ākāśāc candramasam. eṣa somo rājā*. The first points out that the Jīvas who go by the Devayāna path proceed thus: Saṁvatsara → Āditya → Candra. As against this, those who go by the Pitṛyāna proceed thus: (They do not go to Saṁvatsara) Months → Pitṛyāna → Candra → Soma, the king. This leads to the difference: Candra is beyond Āditya whereas Soma is below the same.

SP has supplied the Śruti passages which are cited in the note under the preceding verse. This justifies the non-difference between Soma and Candramas that are already described as

different. Read SP: *svarūpabhede saty eva deśābhedena pitṛlokāc candram eṣa somo rājety abhedaśrutiḥ somasya maṇḍalasthatvād deśāntarābhāvād ity arthaḥ*.

¹The two passages quoted above are meant.

BU 6.2.10 is under reference.

पर्जन्योऽग्निरिति ज्ञेयः समित्संवत्सरः स्मृतः ॥९७॥
 संवत्सरे समिद्धे हि पर्जन्यस्य समेधनात् ।
 धूमोऽभ्राणीति सादृश्याद्विद्युदर्चिस्तथैव च ॥९८॥
 शान्तिवर्तलतोऽङ्गाराः पर्जन्यशिखिनोऽशनिः ।
 विक्षिप्तवैकसामान्यात्स्फुलिङ्गाः स्तनयित्नवः ॥९९॥
 सोमं जुह्वति तत्राग्नौ देवाश्चात्रोदिताः पुरा ।
 वृष्टेश्च संभवस्तस्माल्लोकेऽस्मिन्सापि हूयते ॥१००॥

Parjanya is to be known as Agni and Saṃvatsara is known as the sacrificial fuel,¹ [97cd]

because Parjanya is active (lit. enkindled) when the Saṃvatsara is enkindled. Smoke is the clouds on account of their similarity in appearance; in the same way, lightning is the flame. [98]

Lightning is cinders of the fire in the form of Parjanya, since (both) become cool (or extinguished) and are round in shape.²

Thunders are sparks owing only to their similarity in respect of being scattered. [99]

In that fire do the gods, who are mentioned above,³ make their offering of Soma and from that⁴ is the origin of showers.

Therefore, that⁵ also is poured into that fire. [100]

¹In *samit saṃvatsaraḥ*, there is *kramabheda*.

²*śāntivartulataḥ* is for *śāntitaḥ vartulatvataś ca*; cf. *śāntatva-vartulatvābhyām* in verse 103 below.

³Cf. verse 88 above.

⁴The gods' act of pouring Soma into fire.

⁵Namely, *vṛṣṭi*.

BU 6.2.11 is under reference.

लोकोऽयमग्निर्विज्ञेयः पृथिवी समिदुच्यते ।
पृथिव्या हि समिद्धोऽयं समित्तेन क्षितिर्मता ॥१०१॥

This world is to be known as fire. (And) the earth is called the sacrificial fuel; the earth is understood as the sacrificial fuel, since this fire is enkindled by the earth. [101]

This is yet another way of considering *loka* and *prthivī* as Agni and *samidh*.

अग्निर्धूमस्तदुत्थानाद्रात्रिर्चिस्तथैव च ।
रात्रिर्माहुः क्षितिच्छायामङ्गाराश्चन्द्रमास्तथा ॥१०२॥
शान्तत्ववर्तुलत्वाभ्यां विस्फुलिङ्गसमत्वतः ।
नक्षत्राणि स्फुलिङ्गाः स्युस्तस्मिन्नित्यादि पूर्ववत् ॥१०३॥

Smoke is Agni, since it rises from that; in the same way is the night the flame (of that). They have called night the shadow of the earth and similarly the moon is cinders, [102] because of its coolness (or, extinction) and roundness (of shape) and owing to its similarity with sparks. The constellations (also) are¹ sparks. (The statement) *tasmin* ... is (to be understood) as before.² [103]

¹*syuh* is for *santi*.

²That is, as in the instances considered before.

अन्नस्य संभवस्तस्मात्पुमग्नौ तच्च हूयते ।

The origin of food is from that¹ and that (food) is offered in the fire in the form of man. [104ab]

BU 6.2.12 is under reference.

पुरुषोऽग्निरिति ध्येयो व्यातं तस्य समित्स्मृता ॥१०४॥

Puruṣa is to be considered (lit. worshipped) as Agni and his open mouth is taken (lit. known) as the sacrificial fuel. [104cd]

व्यात्ते मुखे हि तद्दीप्तिर्धूमः प्राणो मुखोत्थितः ।
पुंदीप्तेर्वाङ्निमित्तत्वादर्चिर्वाक्तेन भण्यते ॥१०५॥

Since in (his) open mouth there is his lustre,¹ his vital breath is smoke for it rises from his mouth. And because the lustre of man is caused by Vāc 'power of speech',² therefore Vāc is called the flame. [105]

¹This refers to his being famed by his speech and learning.

²That is, it manifests the same.

स्थितेरङ्गारवच्चक्षुरङ्गाराः श्रोत्रमेव च ।
विस्फुलिङ्गा इति ज्ञेयं तस्य विक्षेपसंस्थितेः ॥१०६॥
अत्र जुहति तत्राग्नौ संभवो रेतसस्ततः ।

The eyes¹ are cinders, since they exist like cinders² and the ears² are to be known as sparks, since they are in the state of being scattered. [106]

In that fire, they (the gods) pour food; from (that) fire, there is the origin of semen. [107ab]

¹The word eyes is for eye in the singular.

²This refers to the cooling down and being the substratum of lustre (i.e. fame).

³The word ears is for ear in the singular.

BU 6.2.13 is under reference.

योषिदग्निरिति ज्ञेया उपस्थश्च समित्तथा ॥१०७॥
तदपस्थेन संदीप्तेर्धूमो लोमानि साम्यतः ।
अर्चिर्वर्णसमानत्वाद्योनिरर्चिर्भवेत्ततः ॥१०८॥

A woman is to be known as fire and also her sexual organ (is to be known as) sacrificial fuel, [107cd]
 since there is enkindling (of the fire) through her sexual organ.
 The hair (on her sexual organ) are smoke; her sexual organ is the flame owing to its similarity of colour. [108]

अन्तः करोति यत्कामी तेऽङ्गारास्तत्समानतः ।
 विस्फुलिङ्गाः सुखलवाः क्षणिकत्वैकहेतुतः ॥१०९॥

And, that a man, full of desire, puts (semen drops) into (the sexual organ) they are cinders, because they are similar.¹ The moments of happiness are sparks, since they have momentariness. [109]

¹In that they culminate into extinction (or, cool down).

रेतो जुहति तत्राग्नौ देवाश्चेन्द्रियरूपिणः ।
 पञ्चम्या आहुतेस्तस्याः पुरुषः संभवत्ययम् ॥११०॥

There, in that fire, do the gods, who have the form of the organs, pour semen; and from that fifth offering (i.e. pouring) is this Puruṣa born. [110]

Verses 101-110 describe the cohabitation of a man and a woman as similar to Agni's union with the sacrificial fuel, which is the act of sacrifice. Thus, based on religious union, that of man and woman and the consequent begetting of a son are looked upon as a holy act.

Also this is the answer to the fourth question that was asked by the king.

यथोक्तवर्त्मना ह्यापः प्राप्ताः पुंस्परिणामताम् ।
 पाकजः परिणामोऽयमेवं पञ्चभिरग्निभिः ॥१११॥

Waters have thus, in the way described, attained the nature of modification, viz. manhood. This modification (or mani-

festation) is produced thus by the heating by the five fires (mentioned so far). [111]

तस्मादापः सूक्ष्मभावाः स्थूलतां यान्ति पाकतः ।
अग्निभिः पञ्चभिः पक्वाः पुरुषाख्या भवन्ति हि ॥११२॥

Therefore waters, having (earlier) a subtle form, attain to grossness through heating; thus, (being) cooked by five fires, they become known by the name Puruṣa. [112]

BU 6.2.14 is under reference.

तस्मान्मृतं प्रियं बन्धुं हरन्त्यग्नय ऋत्विजः ॥११३॥

Therefore, do *ṛtviks*, take him, the dear relation (lit. brother), who is dead, for the fire.¹ [113]

This refers to the funeral of the worldly sacrificer. It is explained in the following verses.

¹That is, to be offered into the fire, i.e. *agnaye* should stand for (*śmaśāne*) *agnau* (*hotum*) *dagdhum*.

यथैवाहवनीयाग्नेः प्रसिद्धं समिदादिकम् ।
श्मशानाग्नेस्तथैवैतत्सर्वं ज्ञेयं न कल्प्यते ॥११४॥

As the sacrificial fuel etc. of the *āhavanīya* fire is known, so also, all this is to be known in the case of the usual fire, that is used in the cremation ground; (a new fire)¹ is not imagined. [114]

¹This is on the basis of BUB. There is not any idea of *dr̥ṣṭi* as in the previous portion of the Brāhmaṇa.

अन्त्यसंस्कारसिद्धयर्थं तस्मिन्नग्नौ यथोदिते ।
ऋत्विजो जुह्वति नरमन्त्याहुत्यै विधानतः ।

आहुतेर्जायते तस्याः पुमान्भास्वरूपभृत् ॥११५॥

For completing the final Saṃskāra (of the deceased sacrificer), the *ṛtviks* offer the man into that fire (which is enkindled) according to the procedure prescribed (in the Pitṛmedha section of the Gṛhyasūtra); from that offering (of his body) is (then) born a human being with a brilliant form.¹ [115]

¹This is the result of the Sāttvika portion in the dead sacrificer's body. It is the *sattva* that makes the form brilliant (*bhāsvara*).

राजसं तामसं रूपमितो ह्यन्यत्र वक्ष्यते ॥११६॥

The Rājasa and the Sāttvika forms (of the sacrificer's body) are described elsewhere. [116]

This is to point out specifically the brilliant form mentioned in the preceding verse.

इतोऽग्निभ्योऽग्निमेवायं स्वां योनिं प्रतिपत्स्यते ।
इति लोके समाचारादग्निभ्यः संभवस्ततः ॥११७॥

From here, i.e. from that fire,¹ this one (the deceased sacrificer) assumes the form of his own origin²—such is the supposition (among the people of) this world that (i.e. after the burning in the funeral fire, there is then this) origin (of the body) from fires. [117]

¹This refers to the funeral fire.

²This refers to the subtle form from which the sacrificer's gross (i.e. worldly) body had originated.

पञ्चम्यामाहुतावेवं पुनाम्नो जन्म कीर्तितम् ।
गतिस्तस्याथ वक्तव्या उदग्दक्षिणभेदतः ॥११८॥

Thus is told (i.e. described) the origin (lit. birth) of one, called Puruṣa, when the fifth offering is offered and now is to be described his movement in the different directions, with reference to north and the south. [118]

BU 6.2.15 is under reference.

ते य एतद्यथाजातं ज्ञानं पञ्चाग्निसंश्रयम् ।
विदुरर्चिः समायान्ति बहूक्तेश्च द्विजातयः ॥११९॥

They (i.e. the learned), who have known this, viz. the thus produced (i.e. originated) *jñāna*¹ pertaining to five fires, reach² the flame; because there is a mention of many (persons),³ only the twice-born (i.e. the first three castes)⁴ are meant. [119]

¹This refers to the knowledge of the five fires which are discussed earlier.

²This refers to the *arcirādi mārga*, i.e. *udanimārga*— cf. verse 118 above.

³That is, the use of *te*, a form in the plural.

⁴*dvijātayaḥ* is a plural form, it shows that it does not refer only to the Brāhmaṇas.

उत्पत्तिसंस्थितिलया यथोक्ताग्न्येकहेतवः ।
इत्थं ये विदुरर्चिस्ते संभवन्त्यात्मभाविताः ॥१२०॥

The origin, the sustenance and the final merger of a man are caused only by the fires mentioned earlier (i.e. the five fires). Those who have known thus become the flame,¹ being devoted to the Ātman.² [120]

¹That is, attain to the flame etc. and finally to (oneness with) the Brahman.

²This refers to those sacrificers who have ever thought that, by worshipping the five fires, they would attain the nature of

(i.e. oneness with) the Ātman.

इष्टापूर्तकृतो ये वै ग्रामस्थेभ्यश्च ये परे ।
 अरण्य इति गृह्यन्त इतरेषां पृथग्ग्रहात् ॥१२१॥
 यज्ञदानतपांसीह गृहस्थ इव तापसे ।
 गृहस्थाचार्यवासाच्च न ग्रहो ब्रह्मचारिणाम् ॥१२२॥
 नारण्यस्था न च ग्राम्या अपेक्षन्तेऽत्र विद्यया ।
 सामान्यवचसोपात्तेर्न विशेषपरिग्रहः ॥१२३॥
 सश्रद्धस्यापि सत्यस्य यद्यप्यन्यत्र संभवः ।
 तथापि यतयो ग्राह्या अरण्येन विशेषणात् ॥१२४॥
 ते य एवं विदुरिति यदि वा गृहिणां ग्रहः ।
 अग्निसंबन्धतो न्याय्यो वनस्थस्यापि संभवात् ॥१२५॥

They, who had done (in their life) sacrificial and charitable acts¹ and also those who are other than the inhabitants of villages (and towns) and those, mentioned as (dwelling in the) forest—(but the celebrates are not meant) since there is a separate mention of them— [121]

here (in this context), sacrificial performances, making gifts and performing penances are to be understood in the case of a mendicant² in the same way as in the case of a householder; but (*ca*) there is no inclusion of the celebrates, because of their stay with (i.e. dependence on) householders and/or preceptors. [122]

Here,³ in respect of this lore,⁴ the forest-dwellers and the villagers are not to be reckoned; since there is only a statement (of *dvijātis* in general), there should not be included any particular (or, specific) individuals.⁵ [123]

Where, however, there is a possibility that there can be elsewhere (i.e. among the householders) one who has faith (in the worship of) truth and is himself truthful, the mendicants also are to be included, because there is a mention of them by the specifying word *aranya*. [124]

Or, in the words *te ya evaṃ viduḥ*, there is mention made

of (only) the householders; (even then) the (inclusion) of a dweller in a forest is reasonably possible on account of their relation to the fire. [125]

These verses refer to those who are intended as eligible to secure the knowledge of the five fires and through that oneness with the Brahman.

¹Cf. Kullūka on *Manusmṛti* 4.126: *iṣṭam antarvedi yajñādikarma pūrtam tato 'nyat puskariṇīkūpa prapārāmādi (nirmāṇam)*.

²This is a reference to the *vānaprasthas* 'those who have taken to a forester's life', i.e. 'who stay away from human dwellings'.

³This refers to the topic of five fires, so far discussed.

⁴That is, the lore regarding worship of five fires.

⁵That means: this refers only to householders.

न चाग्निहोत्रशेषत्वमुक्तदृष्टेरिहेष्यते ।

सामान्येन ग्रहात्तस्याः पञ्चाग्निरितिलिङ्गतः ॥१२६॥

And here it is not accepted that (the connection with Agnihotra) is only, in the case of such a knower,¹ because this seeing (viz. possessing the knowledge of five fires) is mentioned in a general way and understood from the word *pañcāgni* by indication. [126]

¹This refers to the wise ones mentioned above.

त्रिलोकीसाधनत्यागात्रापि संन्यासिनो ग्रहः ।

दैवी विद्या हि वित्तं स्याद्वित्ताच्च व्युत्थितिर्यतः ॥१२७॥

प्रजया किं करिष्याम आक्षेपो ब्रह्मवेदनात् ॥१२८॥

On account of his abandoning the various means (for the attainment of) the three worlds, there is no inclusion of a *Samnyāsin*¹ also, because this lore pertains to the gods (i.e. godly gifts of) wealth and because they have risen above that wealth. [127]

This is so, because they ask a question, 'What shall we do

with offspring?'

[128]

Why they abandon the three worlds, i.e. the pleasures in them, is explained in verse 128.

¹Non-performance of a ritual is prescribed for a person.

पञ्चाग्निज्ञानवद्भाव्या गतिरप्यत्र सर्वदा ।
यतोऽतो गतिरप्युक्ता नान्यथा तदुदीरणम् ॥१२९॥

Here, (we should understand) everywhere that the movement is to be in conformity with the knowledge of the five fires, since the movement is also mentioned from this,¹ and the statement is not to be taken in another sense. [129]

¹Cf. *Viṣṇupurāṇa* 2.8.92abc and 94d:

aṣṭāṣītisahasrāṇām ṛṣiṇām ūrdhvaretasām /
uttareṇāryamṇaḥ panthās te 'mṛtatvaṃ hi bhejire //

[The text quoted here is from BUB. But *Viṣṇupurāṇa* reads *munīnām* for *ṛṣiṇām* and *udakpanthānam aṛyamṇaḥ* for *uttare-ṇāryamṇaḥ*.]

देवतोपासनस्येह प्रकृतत्वात्तथा गतेः ।
अर्चिःशब्देन तेनेह देवतैवात्र गृह्यते ॥१३०॥

Since there is here under reference worship of the god and so also the movement (or, the departure), the word *arcis* is to be understood here in the sense only of a god. [130]

अर्चिर्देवतयैकत्वं प्राप्याहर्देवतैकताम् ।
संभवन्तीति सर्वत्र संबन्धोऽत्रानुषज्यते ॥१३१॥
गृह्यते देवता नो चेदर्चिरादिगिरा तदा ।
असंभवोऽन्यत्र मृतेरित्यपार्था गतिश्रुतिः ॥१३२॥
यत्तूदगयनापेक्षा भीष्मस्य श्रूयते स्मृतौ ।
सत्यवादित्वसिद्धयर्थं शंतनोस्तदपीक्ष्यताम् ॥१३३॥
अन्यथा कृतनाशः स्यादकृताभ्यागमस्तथा ।

देवताग्रहणात्तस्माद्देवतैर्वार्चिरुच्यते ॥१३४॥

Later after having obtained oneness with the god of the flame (*arcis*), the householders (etc.) become one with the god of the day—thus this relation continues everywhere in the relevant text. [131]

If a god is not understood here by the words *arcis* etc., it is that the Śruti statement *anyatra mṛteḥ* about the movement (of the departed) would be without any meaning. [132]

(And) what is heard in the Smṛti as the desire of Bhīṣma (to die) when there is the movement (of the sun) towards the north is (only) for establishing his truthfulness in speech; (in the case) of Śantanu¹ also, it should be thus understood (lit. seen). [133]

Otherwise,² there would result the loss of what has been done³ and the acceptance of (a result) of what is not done. Therefore, accepting (the sense of a) god (i.e. as the becoming the god of *arcis* etc.) means that *arcis* is but the god. [134]

¹This refers to Śantanu's boon to his son Bhīṣma that he would die only at his own will.

²It means: if *arcis* etc. were not accepted as gods.

³This refers to the performance of sacrificial rituals.

तस्माद्देवंविदो धीरा अर्चिराद्यभिमानिनीम् ।
क्रमेण देवतां यात्वा वैरिञ्चं यान्ति तत्पदम् ॥१३५॥

Therefore, the wise ones¹ who know thus, becoming (lit. going to) (each) god of *arcis* etc., attain to that status of Viriñca.²

[135]

¹They are sacrificers who have knowledge about rituals.

²That is, they become one with the god Viriñca.

श्रद्धधानास्तपस्यन्तः सत्यं ब्रह्म समाहिताः ।
उपासते बहिर्ग्रामाद्वर्चिस्ते संभवन्त्यतः ॥१३६॥

Therefore, those, who have faith (in this), performing penances and, with their mind well-composed, worship the truth, the Brahman (even) outside the village (etc.), become (one with) the flame (etc.). [136]

ब्रह्मणः स्थानमायान्ति यद्वा स्वाश्रमकर्मभिः ।
संन्यासाद्ब्रह्मणः स्थानं तथा च स्मृतिशासनम् ॥१३७॥

Or, they attain to the abode of the Brahman¹ by the performances of their (own) duties in keeping with the orders of their life (*āśrama*); so also do they attain to the abode of the Brahman—thus is the instruction in the Smṛti.² [137]

¹This refers to what is mentioned as the truth, the Brahman, in the preceding verse and is the same as the Sūtrātman.

²*Manusmṛti* 6.96.

ततोऽहर्देवतां यान्ति शुक्लपक्षं ततः क्रमात् ।
षण्मासांश्च ततो यान्ति ह्युत्तरायणलक्षणान् ॥१३८॥
देवतां च ततो यान्ति देवलोकभिमानिनीम् ।
तत आदित्यमायान्ति वैद्युतं चापि भास्करात् ॥१३९॥
ब्रह्मणा मनसा सृष्टो मानसः पुरुषस्ततः ।
ब्रह्मलोकान्स नयति सोऽप्यभ्येत्याथ वैद्युतान् ॥१४०॥
ते तेषु ब्रह्मलोकेषु दीप्यमानाः पराः समाः ।
ब्राह्ममानाः समा ग्राह्या ब्रह्मलोकेषु तच्छ्रुतेः ॥१४१॥

Thence they attain to the godhead of *ahan*, then, in sequential order, the half of a month, and then the two half-years (lit. six months together) which are characterized by the northward movement (of the sun); [138]

thence to such a god as has the awareness of belonging to the region of gods, then to Āditya-(loka) and from (that *loka* of) Āditya to that of lightning— [139]

Then is created by the Brahman a man from his mind. He

(i.e. that man) having approached from the region of the Brahman takes (the departed one) to the regions¹ of the Brahman and later to the worlds of lightning. [140]

Then those² (many men, i.e. departed sacrificers), looking brilliant in the worlds of the Brahman, (stay there) for years; here the years are to be taken to have the magnitude of the days of the Brahman; this is, on the basis of a Śruti about the same. [141]

¹The plural indicates the wideness of them.

²This refers to the many departed men, who are thus brought by the man born from the mind of the Brahman.

सार्ष्टिसालोक्यसायुज्यव्यपेक्षा बहुगीरियम् ।
समष्टिव्यष्टिभेदं वा व्यपेक्ष्य बहुवागियम् ॥१४२॥

(This use of) the word *bahu* is in view of (the three states,) viz. similarity in appearance, sameness of the abode and being just one; or, this word *bahu* is owing to the difference between collected form and severality of forms (*samaṣṭivyāṣṭi*). [142]

There are offered two alternative explanations of the preceding verse.

आवृत्तिर्न पुनस्तेषां यावदाभूतसंप्लवम् ।
आभूतसंप्लवस्थानममृतत्वं हि भाष्यते ॥१४३॥

There is no return (or, rebirth) of them till when there is a complete merger (of them) into elements. Indeed the state of complete merger into elements is spoken of as immortality. [143]

ऐकात्म्यधीसमुत्पत्तेर्यदि वा ब्रह्मलोकतः ।
मुच्यन्ते न निवर्तन्ते यथा धूमादिमार्गगाः ॥१४४॥

Or, since there has arisen (in them) the knowledge of their

oneness with the Ātman, they do not return (to this world) from the world of the Brahman,¹ as those who go by the path beginning with smoke (do). [144]

¹This refers to Hiranyagarbha, Virāj.

इमं मानवमावर्तमित्याद्यस्य विशेषणात् ।
अत्रैव कल्पेऽनावृत्तिर्न त्वन्येष्वनिवारणात् ॥१४५॥
देवयानः समासेन पन्था यत्नात्प्रपञ्चितः ।

Since there is a specification in the words *imam mānavam āvartam* ...; therefore, they (i.e. the sacrificers' Jīvas) do not return in (i.e. during) the period of this creation (*kalpa*)¹; but (this is not so) in other (i.e. subsequent) creations, since there is no prohibiting statement (regarding their return in them). [145]

(So far), the path called Devayāna is thus briefly and carefully (*yatna*) explained.² [146ab]

¹This explains the sentence *teṣām* ... where there is stress on the word *imam* (*kalpam*).

²This refers to the BU proposition: *atha ye yajñena*

BU 6.2.16 is under reference.

व्याख्याथ पितृयाणस्य सम्यगारभ्यतेऽधुना ॥१४६॥

Now there begins properly the explanation of the path called Pitryāṇa. [146cd]

This is the purport of the following verses.

देवादिज्ञानहीनेन येऽथ यज्ञेन सद्विजाः ।
लोकाञ्जयन्ति दानेन सद्देशादिमता तथा ॥१४७॥
निःशेषकल्मषध्वंसितपसा वाविपश्चितः ।
मृतास्ते धूममायान्ति धूमाद्रात्रिं तमस्विनः ॥१४८॥

रात्रेरपरपक्षं च दक्षिणायनदेवताम् ।
मासेभ्यः पितृलोकं हि पितरो यत्र शेरते ।
पितृलोकाच्च ते चन्द्रं यान्त्यत्र तद्विवौकसाम् ॥१४९॥

Now those good twice-borns,¹ who win the worlds by the performance(s) of sacrifice(s) wherein their knowing about (the real nature of) gods etc.² is lacking and who, by making gifts such as (that of) a good land etc., win different *lokas*; [147] or, the ignorant ones, who have by penances washed off (their) entire sins,³ go to smoke, when they are dead, from smoke, which is full of darkness,⁴ they go to the night; [148] from the night to the second half of the month (and thence) to the god of the period of the movement of the sun to the south;⁵ from those months to the world of the manes, where indeed the manes rest (lit. sleep); and from the world of the manes they move to the moon as the food of the gods.⁶ [149]

¹This refers to three castes as already understood in verse 119 above.

²This refers to their ignorance about reality or the Brahman.

³Cf. a Smṛti statement: *tapasā kalmaṣam hanti*, cp. *Manusmṛti* 12.104 where *kilbiṣam* is read for *kalmaṣam*.

⁴Or alternatively: *tamasvinaḥ* is further in addition to *avipaścitaḥ* and hence the translation: ... are dead and, from smoke they, full of ignorance (lit. darkness), go to the night;

⁵This refers to the months which are the period for the sun's movement to the south.

⁶This whole, viz. verses 147-149, is the description of the *dhūmādhimārga* mentioned in verse 144 above.

चन्द्रं प्राप्यान्नभावं च ते यतस्तत्र संस्थिताः ।
असकृद्वक्ष्यन्त्येतानाप्याय्याप्याय्य सोमवत् ॥१५०॥

Since, after having attained to the moon, i.e. to the status of food, they stay there, (the gods in the region of the moon) eat them again and again, repeatedly fattening them just as

(the *ṛtviks* in the sacrifice fatten) the Soma.¹

[150]

This explains *te candram*

¹This refers to sacrificial practice of *somāpyāyāna* 'fattening the juice of Soma with milk and water'; the *ṛtviks* partake of this fattened Soma. So also do the gods in the moon eat the well-fed and thereby fattened sacrificers who have attained to the moon.

पक्षे शुक्ले तमाप्याय्य कृष्णे तं भक्षयन्त्यथ ॥१५१॥
भोगसाधनभावश्च भक्षयन्तीति भण्यते ।
न त्वभ्यवहतिनिर्याय्या वेदवर्त्मनि तिष्ठताम् ॥१५२॥

Or (*atha*), they (i.e. the *Jīvas*), after having fattened it (i.e. the moon) in the bright (half of the month), eat it in the dark (half of the month); [151]

in the word *bhakṣayanti* is stated the *Jīvas*' becoming the means of enjoyment (for the gods); indeed, it is not reasonable (to accept) the eating up of those who have followed the path of the Vedic (ritual). [152]

This is another explanation of *te candram*...

यदा तपचितं कर्म पर्यवस्यति भोगतः ।
तेषामथैतमध्वानमावर्तन्ते यथागतम् ॥१५३॥
आकाशमनुनिष्पद्य वायुमायान्त्यभोगिनः ।
वायोर्वृष्टिमवाप्याथ वृष्टेश्च पृथिवीं ततः ।
अन्नभावं पृथिव्यातस्ते समायान्ति भूमिगाः ॥१५४॥

And when the *karman* (i.e. the *apūrvā* caused by it), which is collected (by them in the worldly life), gets exhausted through their enjoyment,¹ they return to this path by which they have come. [153]

Having fallen to the sky, they, not having enjoyment (any more), come to Vāyu, from Vāyu to rain, then from rain to the earth and then, together with the earth,² to the state of food—they

who thus come to the earth.

[154]

¹See verses 151 and 152 above.

²The instrumental form of *pr̥thivī* is explained by SP as *sahārthe tṛtīyā*. Therefore, they become food along with (i.e. as) the earth becomes it.

घटीयन्त्रवदश्रान्ता एवमेव पुनः पुनः ।
परिवर्तन्ति संसारे कर्मवायुसमीरिताः ॥१५५॥

In this very way, like a *ghaṭīyantra* 'a mechanical device of raising water from a well', they keep on rotating,¹ without becoming tired (as it were), rotate¹ in this world, impelled by the wind in the form of the ritual activity. [155]

¹The Parasmaipada is for the Ātmanepada form.

दक्षिणस्य पथो व्याख्या यथावदनुवर्णिता ॥१५६॥

Thus is described the path to the south, as given in scriptures (*yathāvat*). [156]

यथोक्तलक्षणौ ये तु पन्थानावुत्तरेतरौ ।
न विदुस्ते भवन्तीह कीटाद्या दुःखभोगिनः ॥१५७॥

And (*tu*) those, who do not know these two paths, viz. one to the north and the other (to the south), which are thus described, become here (i.e. in this world) insects etc., experiencing miseries. [157]

नाद्रियन्त इदं ज्ञानमुदङ्मार्गसिसाधनम् ।
कर्म वा पितृयाणाप्तौ ते कीटाद्यामियुर्गतिम् ॥१५८॥

Those, who disregard this knowledge, which is the means to attaining to the path to the north, or (follow that which leads) to the Pitryāṇa, attain to the state of insects etc. [158]

गोमयाद्युद्धवाः कीटाः पतङ्गाः शलभास्तथा ।
दंशाश्च मशकाश्चैव दन्दशूकाः सपन्नगाः ॥१५९॥

(The insects etc. means) the insects born from cow-dung, flying insects, locusts and biting insects, mosquitoes, as also biting insects and the serpents. [159]

यतिथ्यामिति यः प्रश्नः स पुंजन्मोक्तितो गतः ।
तदनन्तरमेवोक्ता व्यावृत्तिश्च पथोर्द्वयोः ॥१६०॥

The question in the words 'In what is the number of ...' is (thus) answered by the statement about the birth of man;¹ then immediately thereafter is stated the difference between the two paths. [160]

¹This is reference to the *mānasa puruṣa* mentioned in verse 140 above.

आकाशाद्यभिसंभूत्या पुनरावर्तनं गतम् ।
देवयानं च यत्कृत्वा पितृयाणं च लभ्यते ॥१६१॥
साधनं तदपीहोक्तं ज्ञानकर्मस्वलक्षणम् ।
लोकस्यापूरणे हेतुः समाप्तावुदितः स्फुटः ॥१६२॥
कीटादीनामगमनाद्गतानां चागतेस्तथा ।
एवं पञ्चापि निर्णीताः प्रश्ना ये प्राक्प्रचोदिताः ॥१६३॥

By (the statement about) becoming the sky etc. (of the deceased worshippers) is explained their return (and also that means) by adopting which, they attain to the Devayāna and/or the Pitryāna. [161]

Also, there is stated the means of each, viz. having the nature of knowledge and of ritual. And also there is clearly stated why the world does not get filled. [162]

And (there are explanations about) the Jīvas not going to or going to the states of insects etc. Thus, all the five questions,

which were first put forth, have been answered.

[163]

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके षष्ठाध्यायस्य
द्वितीयं ब्राह्मणम् ॥२॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

6.3

वित्तं विना न सिद्धिः स्याद्दृष्टादृष्टार्थकर्मणः ।
यतोऽतः कर्म मन्थाख्यं तादर्थ्येनाभिधीयते ॥१॥

Since there cannot be accomplishment of the (ritual) action intended for securing the seen and/or the unseen results, unless one has the wealth (necessary for the performances); therefore, a ritual act that is called Mantha is now prescribed (lit. stated) for that purpose. [1]

This introduces the relation between this Brāhmaṇa and the earlier ones. The earlier discussed effects, viz. the movement of the departed ones, relate to their *jñāna* (of BU 6.1) and *karman* (of BU 6.2). Now follows the subsequent portion which is allied to it.

पितुर्लोक्यो यथा पुत्रः कर्मणेहोपजायते ।
तादृक्पुत्रार्थिनः कर्म त्वेषामित्यादिनोच्यते ॥२॥

In the words *eṣām ...*¹ there is prescribed (lit. stated) a (ritual) action for one desiring to have a son, in a way that through that action becomes born to a father a son who is conducive to (his achievement of) the *loka*. [2]

¹Cf. BU 6.4.1.

यः स्यात्कामग्रहग्रस्तो वित्तापत्योद्धवं प्रति ।
तं प्रत्येवेति विज्ञेयं कर्मेदं न त्वकामिनम् ॥३॥

It should be known that this (ritual act) is (intended) for

him who is possessed by a strong desire (*kāmagraha*) for getting (lit. for the rise of) wealth and offspring and not for one who has no (such) desire. [3]

Thus, every householder, who desires for an excellent after-life, should perform the Mantha ritual.

प्राप्नुयां सुमहद्वित्तमिति यः कामयेत ह ।
इत्युक्त्यावाप्तवित्तस्य नेदं कर्मेति गम्यते ॥४॥
महत्त्वमात्मनोऽत्यर्थं यो वा कामयते गृही ।
महत्ता न विना वित्तं कर्मातो वित्तसिद्धये ॥५॥

It is implied that this (ritual) act is not for one who has (already) obtained wealth, as it is understood from the statement: he who desires, 'May I obtain very great wealth'; [4]

or a householder, who desires to obtain for himself exceeding importance; (as) indeed (such) greatness cannot be (obtained) without wealth, therefore is this (ritual) act meant for acquiring wealth. [5]

In the two verses the word *mahat* is understood in two ways: (i) in verse 4, *mahat* is adjective of wealth, (ii) in verse 5, *mahat* means importance among people or *aiśvarya* 'fame etc.' for which wealth is implied as the essential part.

The following is the explanation of BU sentence *sa yaḥ udagayane*

....

कालो विधीयते चास्य मन्थाख्यस्येह कर्मणः ।
श्रुत्योदगयनाद्युक्त्या कर्मासिद्धयै प्रयत्नतः ॥६॥

The time for the performance of this rite called Mantha is prescribed here, since the Śruti has specifically stated in the words beginning with *udagayane* for the accomplishing of the (ritual) act. [6]

This explains the meaning of the BU sentence *udagayane* '(at the time of the movement of the sun) ... northward ...',

SP points out: This is according to the accepted belief *kāle karma vidhīyate nākāle* (not traced).

प्रार्थनीयः पुरा कालो विशुद्धिश्चात्मनस्ततः ।
द्रव्याण्योषधयश्चैव देशश्च तदनन्तरम् ॥७॥

First, the time (for the ritual act) has to be properly desired (i.e. decided by the householder), then also his own purification, various materials (for example, utensils and grains (lit. herbs) (have to be acquired), and then (a suitable) place for the performance (is to be fixed). [7]

कालादीनां गुणानां च कर्मण्यस्मिन्समुच्चयः ।
न विकल्पः समृद्धिः स्यात्कर्मणोऽस्य समुच्चितौ ॥८॥

And, in this (ritual) action, there is a combination of time etc.¹ and also of excellences;² there is no alternative (for the same prescribed here), because only in (such a) combination (is ascertained) the richness of the (ritual) action. [8]

¹This refers to the material and the place.

²This is called *guṇas*, not qualities, viz. purified body and mind and faith etc.

कर्मणश्चास्य निष्पत्तौ विद्वत्तापि समाश्रिता ।
यतोऽतः सूत्रितं नेदं सूत्रकृद्भिर्यथोदितम् ॥९॥

Since again, in (successfully) completing this (ritual) action, the state of (the worshipper's) being possessed of the knowledge (about the action) is also expected; therefore, this (ritual act), which is mentioned (above), is not prescribed in their (Grhya-)sūtra by the composers¹ of the same. [9]

¹The plural here marks the respect for the composer of the Gr̥hyasūtra, or for indicating more than one Gr̥hyasūtra related to the Saṃhitā of the relevant Vedic school.

यो ह वै ज्येष्ठमित्यक्त्या विद्वत्ता या पुरोदिता ।
तस्यां सत्यामिदं कर्म ज्येष्ठायेत्यादिलिङ्गतः ॥१०॥

This (ritual) act is (to be performed) by a worshipper, in case he is possessed of the knowledge (about the ritual action), this (lit. which) was stated before in the words *yo ha vai jyeṣṭham* ... (BU 6.1). This (is understood) from the indicatory (words) *jyeṣṭhāya* etc. [10]

भूमिशय्या पयःपानं ब्रह्मचर्यं च वाग्यमः ।
उपसद्ब्रतमेतत्स्यादमावास्येति लिङ्गतः ॥११॥

Also (there is to be understood) from the indicatory (word) *amāvāsyā* that this is the vow called *upasad* wherein a worshipper has to observe sleeping on bare earth, subsist (only) on (lit. drink) milk, (observing) abstinence from sex act and restraint on speech. [11]

अग्निमित्येकवचनात्तथैवोल्लेखनादितः ।
न मुख्योपसदामत्र संभवोऽस्तीति गम्यते ॥१२॥

Also it is understood from the use of the singular form *agnim* and also from the reference to drawing (of lines) etc. (on the place of the ritual) that there is no acceptance (lit. possibility) of the principally known *upasads*.¹ [12]

¹These refer to those vows prescribed in relation to a Jyotiṣṭoma sacrifice. They are more elaborate and those under reference are comparatively simpler. *ullekhana* etc. are prescribed for various domestic rituals.

ताम्रं नौदुम्बरं ग्राह्यमिध्मैस्तस्य विरोधतः ।
वानस्पत्यमतो ग्राह्यं कर्मण्यौदुम्बरं श्रुतौ ॥१३॥

And an Audumbara (vessel) made of copper is not to be used in this (ritual) act, because that is opposed by the *idhmas* 'sacrificial fuel sticks'.¹ Therefore, one should use in this (ritual) act an Audumbara (vessel) made of wood. [13]

This verse rejects a view that the Audumbara vessel, made of copper, is to be used in this (ritual) act; because there is the scriptural statement *audumbara idhmaḥ* (BU 6.3.13).

ग्राम्याणि दश धान्यानि फलपुष्पाणि सर्वतः ।
अप्रमादकराणीह भक्ष्यमेध्यानि यानि च ॥१४॥

(One should use during the performance of the ritual) ten types of grains produced from land, as also fruits and flowers which do not cause intoxication and such eatables as are suitable (for the performance of the rituals).¹ [14]

¹This is to avoid the eating of garlic etc.

दशेति नियमार्थं स्यान्न ततोऽन्यनिषेधने ।
भूरिदोषोपदुष्टत्वात्परिसंख्याविधेरिति ॥१५॥

The word *daśa* is mentioned (here) for restricting (the nature of the kinds of grains to be offered in the Mantha rite) though not for prohibiting other grains, because the injunction called *Parisaṃkhyā*¹ (is not to be accepted) as it suffers from many defects (or, faults).² [15]

¹*niyama* refers to what is adopted among/between alternatives that are enjoined in an injunction (*pakṣe 'prāptasya prāpako vidhiḥ*) and *parisaṃkhyā* refers to what is excluded from alternatives that obtain simultaneously (*ubhayoś ca yugapatprāptāv itaravyāvṛttiparah parisaṃkhyāvidhiḥ*). (*Arthasaṃgraha*. ed. S.S.

Sukthankar, Bombay: 1931, pp.78-79).

²Read SP: *śrautasarvaviśeṣaṇatyāgo 'śrutānyanivṛttisvīkārah ... ityādismṛtivorodhaś ca.*

कंसाद्याकारसिद्धयर्थं कंसाद्युक्तरिहोच्यते ।
तण्डुलान्फलपुष्पाणि पिष्ट्वा पात्रे निधापयेत् ॥१६॥
दधना च मधुना पिष्टं सम्यगालोड्य पात्रगम् ।
स्थापयेत्कृतरक्षं सच्छुचौ देशे प्रयत्नतः ॥१७॥

Here is a statement made about bronze etc.¹ in order to get effected the vessel of a material called bronze. The performer of this rite should first paste (together) rice grains, fruits and flowers and then place them in that vessel. [16]
Then, having softened the paste with curds and honey by vigorously stirring these in the pot together, he should place them carefully in a purified region, properly protected.² [17]

¹That refers to the material from which the Audumbara vessel is made.

²Cf. BUB pp.786-787.

परीत्यादिगिरा चात्र देशसंस्कार उच्यते ।
संस्कृते भूप्रदेशेऽथ ह्यग्निं संस्थापयेद्गृही ॥१८॥

And by the mention of *pari-*¹ etc., here is expressed the purification of the place (for the performance), then, on this (purified) place, the householder should establish the fire. [18]

¹This refers to the three acts *parisanūhana* 'sprinkling water (in some particular way) around the fire(-place)', *parilepana* 'smearing with cowdung the altar,' and *paristarana* 'strewing or spreading (*darbhas*) around (the fire)'.

लेपनादि च कर्तव्यं कृतपूर्वेऽपि तद्विधेः ।
इति कातीयवचनमदृष्टार्थत्वकारणात् ॥१९॥

Smearing (that place) etc. has to be done, even if (that has been already) performed, since it has been so prescribed in a statement of Kātyāyana¹ for (effecting) some unseen purpose.

[19]

¹Read SP: *dr̥ṣṭārthatayā kṛtaśodhane 'pi deśe lepanādi kartavyam* (Kātyāyana Gr̥hyasūtra; and also SP: *parisamuhyo-palipyollikhyoddhr̥tyābhyukṣyeti*.

पाकयज्ञविधानेन संस्कृत्याज्यं यथाविधि ।
 पुंसा हस्तादिनक्षेण मन्थमानीय सिद्धये ॥२०॥
 खजकेनैकधीकृत्य मन्थद्रव्यमतः परम् ।
 आवापस्थान आज्यस्य हुत्वा नित्याहुतीस्ततः ॥२१॥
 यावन्त इत्युपक्रम्य मन्त्रैराज्यं यथाक्रमम् ।
 हुत्वा हुत्वा च मन्थेऽथ संस्रवं प्रक्षिपेन्मुहुः ॥२२॥

(The performer of the rite) should, in keeping with the prescription of simple offering(s), (viz. *pākayajñas*), first purify the clarified butter according to the procedure and then, bringing the Mantha for accomplishment (of the rite), at the time of the constellation of Hasta etc. (which bears) a male (name),

[20]

mixing together the material for Mantha, by means of a churning stick and then making usual offerings of clarified butter, in the place of the offerings,

[21]

he should begin with Mantras *yāvantaḥ* ...— Then, making the offerings, one after another, he should later in the Mantha rite, offer (into the fire) the remainder of the (clarified butter).

[22]

Now, BU 6.3.2 is under reference.

स्वाहाकारावसानाः स्युर्मन्त्राः सर्वे यथोदिताः ॥२३॥

All the Mantras, as stated, should end with the utterance *svāhā*.

[23]

मन्त्रद्वयेन ज्येष्ठादौ होमः कार्यो विजानता ।
अग्न्यादावेकशः कार्यो यावन्मन्थावमर्शनम् ॥२४॥

A knower (of the ritual) should perform the *homa* (i.e. make the offerings) under the constellations Jyeṣṭhā etc., with the recitation of the two Mantras *agni* ... till there is the completion of the Mantras. [24]

SP states: *uktaṃ ca bhāṣye retasa ityādyārabhyaikaikāṃ āhutim hutvā ityādi* (possibly from Bhartṛprapañca on BU).

अथ स्विष्टकृदन्तेऽस्मिन्होमानन्तरमेव तत् ।
द्वितीयेन मथालोड्य ह्यथाभिमृशति पाणिना ॥२५॥
भ्रमसीत्यादिना मन्थं स्मरंस्तद्देवतां हृदा ।
भ्रमसि प्राणभूतस्त्वं न ह्येकत्रावतिष्ठसे ॥२६॥
ज्वलज्जाज्वल्यमानस्त्वं जठरस्थान्नपाककृत् ।
पूर्णं च सर्वतोव्यापि सर्वत्रानवखण्डितम् ॥२७॥
प्रस्तब्धोऽसि स्थिरत्वाच्च वियद्वन्न विकम्पसे ॥२८॥
सर्वतोऽपरिपन्थित्वात्सर्वैश्चाप्यनुकूलतः ।
त्वमेकशफमित्युक्तं शफैका या त्वदात्मिका ॥२९॥

Then, after the *sviṣṭavṛt*¹ offering is made in the rite—which is immediately after that offering²—he should mix together that material of the Mantha offering for a second time. Then he touches (the Mantha) by his hand, [25]

remembering the deity of the Mantha and reciting the Mantra *bhramasi* ...; (the Mantra means:) You have now become Prāṇa and you do not stay just at one place (in the body).³ [26]

The Mantra *jvalat* ...— means: ‘You are shining brilliantly and the author of the digestion of food that is in (viz. has reached) the stomach. And you are (the Brahman), *pūrṇa* and pervading on all sides, and nowhere obstructed’. [27]

‘(And) you are, on account of steadiness, steady (in the body)

and, (even) like the sky, you do not shake. [28]

Since from all sides you do not have any opposition and because all are agreeable⁴ (or helpful) to you, therefore it is said 'you have (only) one hoof'. What is a single hoof is only yourself in nature.⁵ [29]

¹This is an offering to Agni, made from all the remnants of the materials for the *homa* put together. It marks an unimpeded completion of an offering (*su* 'well'). (Incidentally Agni—specially the *Āhavanīya* in the Śrauta ritual—is also called *sviṣṭakṛt*).

²This is explained by *homānantaram eva tat* where *tat* is the *manthadravya* 'material for the Mantha rite'.

³That is to say: the deity of the Mantha, being *Prāṇa*, moves everywhere in the body. Now follows the explanation of *jvalat*

....
⁴*anukūlataḥ* is to be understood as *anukūlaiḥ*, qualifying *sarvaiḥ*. To paraphrase this: *sarveṣāṃ anukūlatvāt*.

⁵Read SP here: *yā khalv ekā śaphā jagadātmikā nikhilam api jagat tava pādabhāgatvena vartate na tu pādatve 'pi paryāptam ato 'navacchinnaś tvam ity arthaḥ*.

उद्गात्रा हिंकृतं पूर्वं स्तोत्रमुद्गायता स्फुटम् ।
यज्ञारम्भे तदा मध्ये गीयमानेऽथ सामनि ॥३०॥
अपि हिंक्रियमाणोऽसि तथोद्गीथे विनिर्दिशेत् ।
श्रावितोऽध्वर्युणा च त्वमग्नीधा च तथोत्तरम् ॥३१॥

(You are) what was produced by the *Udgātr* as *hum* sound while he was singing in clear voice, at the beginning of the sacrifice and in the middle of it and also while the *Sāman* was being sung.¹ [30]

You are also the one who are addressed with *himkāra* and so he (i.e. the performer of the Mantha rite) should mention in the *Udgītha* song. You have been sung by the *Adhvaryu* and later by the priest *Agnīdh* also. [31]

¹The words *himṅkṛta*, *himṅkriyamāṇa* refer to different points of time, yet the *himṅkāra*, being only one, belongs to all points of time and does not involve any contradiction.

आर्द्रे मेघोदरे विद्युत्संदीप्तोऽसीति कथ्यते ।
विविधं त्वमेव भवसि यतोऽतो विभुरुच्यते ॥३२॥
सोमो वृष्ट्यादिभावेन प्रभुः प्रभवसीत्यतः ।
आदित्यः प्राणभावेन ह्यन्नभावेन सोमता ॥३३॥

It is said that you are resplendent in lightning in the wet interior of a cloud. Since you yourself become varied (in form), therefore, you are called *vibhu* 'all-becoming'.¹ [32]

You are Soma by becoming rain etc. and the Lord because you prevail; also Āditya by becoming Prāṇa and you have the nature of Soma² by becoming food. [33]

¹This is from *vi* in the sense of *vividha* 'various' with the verb root *bhu*— not the usual explanation: 'all-pervading'.

²Possibly this refers to the Soma plant which has been identified with Soma earlier, (see under BUBV 2.1.57).

अन्नान्नादद्वयं सर्वं त्वमेव तदपि प्रभो ।
निधनं कारणत्वात्त्वं कारणे कार्यसंलयः ॥३४॥

You are yourself the pair, viz. food and the eater of food, O Lord and you are the end, because you are the cause (of all) (in that) all effects merge into the cause. [34]

This is like a pot, which is made of clay and finally merges into clay itself.

वागग्न्याद्यात्मसम्पातात्संवर्गोऽसीति भण्यते ।
इति मन्त्रः समाप्तोऽयमभिमर्शनकर्मणि ॥३५॥

It is said (in the Mantra), 'You are the *saṁvarga*¹ (of all), since Vāc, Agni and others end themselves (into you)'. Thus

is this Mantra adopted (lit. obtained or accepted) while there is the action of touching the Mantha. [35]

This is the meaning of *saṁvargo* 'si in BU; where *saṁvarga* can be translated alternatively as 'collection or collective form'.

¹*saṁvarga* refers to what stands for a collection of some things belonging to one class; e.g. *vāyu* is called the *saṁvarga* of all winds in the body.

Now, BU 6.3.5 is under reference.

अथैनं मन्त्रपूतं सदुद्यच्छति यथोदितम् ।
आमंसीत्यादिमन्त्रेण तदर्थविष्कृतिस्त्वयम् ॥३६॥

Now that this one is purified by the Mantras as prescribed, he lifts it up, reciting the Mantra *ā maṁsi* The explanation of its meaning is thus: [36]

आमंसीति भवेद्रूपं ज्ञानार्थस्यैव मन्यतेः ।
लेट्याङ्पूर्वस्य संसिद्धं शब्लुकीत्यवधारणात् ॥३७॥

The form *āmaṁsi* is derived from the verb root *man* conveying the meaning 'to know', with the prefix *ā*, in the *let* 'subjunctive mood' and determined¹ by the dropping of the conjugational sign *śap*. [37]

¹This is in accordance with the grammatical rule regarding the dropping of it.

आसमन्ताद्विजानासि सूक्ष्मादि जगति स्थितम् ।
ज्ञेयं यावज्जगत्किञ्चिदामंसीति ततः सदा ॥३८॥

You know everything around, viz. what is existing in the world beginning with the subtle (and) whatever is to be known; therefore, (it is said) 'You ever know all the world'. [38]

This explains the meaning of *āmaṇsi* which is in BU and also in BUB as *āmaṇhi*.

यथास्मांस्त्वं विजानासि तथैव त्वां वयं सदा ।
मन्यामहे वरीयांसं गुणवद्भ्यो गुणाधिकम् ॥३९॥

As you know us all, so do we ever think about you, who are better (than all others) and having more excellent qualities than those who are possessed of (those) qualities. [39]

महि महत्त्वं जानीम आमोऽसि त्वं तथा प्रभो ।
न त्वं पाकसमायोगात्फलवन्नाशमृच्छसि ॥४०॥
आमोऽपक्वं त्वयि गतं महत्त्वमपि भण्यते ।

We know your *mahi*, i.e. *mahattva* 'greatness'. So also you are, O Lord, unbaked or uncooked, i.e. you never meet destruction like a fruit (which meets destruction) after coming into contact with heat or cooking. [40]

āma means unbaked; thus the greatness in you is described (lit. expressed). [41ab]

यस्माद्राजास्य सर्वस्य मां च देवः स सर्वदा ॥४१॥
राजानं च तथेशानं करोत्वधिपतिं च माम् ।
उद्यम्यानेन मन्त्रेण भक्षयत्यथ भागशः ॥४२॥

And since you (are) the king of all this, therefore, may you, the god, ever (rule or protect) me. [41cd]

May (his Mantha) make me a king, a ruler, (and) the lord.¹ Reciting this Mantra, he first lifts up (the Manthagraha) and then partakes of it, part by part. [42]

¹That is, May that grant me power/excellence similar to yours.

Now, BU 6.3.6 is under reference.

गायत्र्या मधुमत्या च व्याहृत्या चेति पादशः ।

ग्रासमश्नाति मन्थस्य ह्युत्तरेषु तथैव च ॥४३॥

He partakes of the Mantha, bit by bit, each with one line of the Gāyatrī Mantra, and a verse containing (the word) *madhu* in it and also a Vyāhṛti¹ (one after another). [43]

The elaborate procedure is this: the first line of the Gāyatrī Mantra and a verse containing (the word) *madhu* in it and the *vyāhṛti bhūḥ*; then the second line etc. with the *vyāhṛti bhvaḥ*; and then the third line, etc. with the *vyāhṛti svaḥ*.

¹This refers to the sacred utterances *bhūḥ*, *bhvaḥ* and *svāhā*. This is clear from BU.

सवितुस्तद्वरेण्यं स्याद्भर्गमन्नं महात्मनः ।
ऋतायन्ते तथा वाता मधुवत्सुखकारिणः ॥४४॥

The words *savituh tat ...*, *varenya* is *bharga*¹ referring to the food of the great one. So also *ṛtāyante vātāḥ* (which should be) 'causing pleasure' like *madhu*. [44]

Sureśvara paraphrases the words in the original verses and supplies only some words in their paraphrase for clarifying the ideas in the same.

¹This is for the Vedic form *bhargah*. Of course, it is possible that the Vedic word *bhargas* could also have another alternative form *bharga*. But the meaning *annam*, as suggested by Sureśvara is not meant in the well-known Gāyatrī Mantra—it means there 'lustre'.

अनुद्वेगकरा हृद्या ऋतायन्ते वहन्ति च ।
अमृतं मधु नद्योऽपि मदर्थं सर्वदा शुभम् ॥४५॥

(The verses convey the following thoughts): (The winds) which do not cause any pain (and) which are delightful to the heart, follow the *ṛta*, and thus (may) they flow (pleasantly). So also do the rivers (bring) *amṛta*, viz. sweet,¹ for my sake and (also)

bliss, forever,

[45]

¹*madhu* refers to harmony in every walk of life; here it is called 'sweet' only metaphorically.

तृप्ता मोदामहे येन क्षरन्तीति क्रियापदम् ।
अत्यर्थं मधुररसाः सन्तु ह्योषधयश्च नः ॥४६॥

so that we do feel delight, satisfied that we are. The word *kṣaranti* '(they) trickle' is a verb (conveying the idea:) may they indeed be for us exceedingly sweet in their juice; and so also may the herbs (flow sweet) for us. [46]

त्रिकमुच्चार्य भः स्वाहेत्याहुतिं प्रक्षिपेन्मुखे ।
त्रिकं त्रिकं तथोच्चार्य ह्युत्तरैष्वपि योजयेत् ॥४७॥

Having recited the three (*vyāhrtis*) together, he puts into (his own) mouth the offering (i.e. mouthful) with the utterance; so also he recites, the group of the three one by one, while taking the subsequent mouthfuls.¹ [47]

¹The elaborate procedure is clearly explained in the following verses up to verse 55.

देवस्य द्योतनवतो हृद्यं यच्चिन्तयेमहि ।
मधु नक्तमथो रात्रिर्मधुरा दुःखहानिकृत् ॥४८॥
उषसो दिवसस्यापि माधुर्यं नोऽस्तु सर्वदा ।
पार्थिवं च रजो लोको ह्लादकृन्मधुमांस्तथा ॥४९॥
द्युलोकः पितृलोकोऽथ पिता हि द्यौर्यतो मतः ।
भुवः स्वाहेति मन्थस्य द्वितीयामाहुतिं क्षिपेत् ॥५०॥

(The *bhargā*¹) of the resplendent god, which is pleasant to the heart (and) sweet²—and (*atho*) *naktam* is night³—let (night) be (sweet and) ever a remover of misery. [48]
Also may there be for us the sweetness of Uṣas, and of the

day also. And may the earthly region, viz. this world, be for us the cause of delight and full of sweetness as well. [49]

So also may the heavenly region and the region of the Pitṛs be pleasant (for us), for the heaven is known as the father indeed. Then, let him, reciting (the *vyāhṛti*) *bhuvah* and (the word) *svāhā*, make the second offering of the Mantha (into his own mouth). [50]

¹This is taken from verse 44 above (where *bharga-* is for the Rgvedic *bhargas-* as already pointed out there).

²That is, agreeable.

³This is parenthetical.

धियः प्रचोदयेद्यो न उद्यन्प्रज्ञेन्द्रियाणि च ।

प्रचोदयतु नो देवः श्रेयसे सर्वदात्मनः ॥५१॥

dhiyah *pracodayet* *yo naḥ* means 'May that god, rising, ever incite our intellect and sense-organs, may (he be) for the well-being of the Ātman (the inner self). [51]

वनस्पतिस्तथा चन्द्रः सूर्यस्तु मधुरोऽस्तु नः ।

गावो दीधितयः सन्तु मधुमत्यो दिशोऽथवा ॥५२॥

In the same way, may the herb, also the moon, and (*tu*) the sun be for us sweet; may the cows, the rays, be for us full of sweet, or, may the quarters (be sweet).¹ [52]

¹*diśo 'thavā* is possibly added as an explanation of *dīdhitayah*, because they, in the sense of the rays (of the sun). Yet this might be taken as a repetition after the mention of *sūrya*. This leaves *gāvaḥ* 'cows' as an independent source of delight.

Possibly Sureśvara refers *gāvaḥ* to rays and *dīdhitayah* to the quarters; so SP.

स्वः स्वाहेत्याहुतिक्षेपः समस्तां व्याहरेत्ततः ।

सावित्रीं मधुमतीश्चैव तिस्त्रोऽपि व्याहृतीस्तथा ॥५३॥

चतुर्थीं प्रक्षिपेदेवमाहुतिं पर्ववन्मुखे ।
अहमेव जगत्सर्वं भूयासमिति निर्ब्रुवन् ॥५४॥

Let there be the (third) offering with (the utterance of the *vyāhṛti*) *svaḥ* (and the word) *svāhā*. Then he should recite the full *Sāvitrī* (i.e. *Gāyatrī*) verse and all those verses which contain the word *madhu* in them, together with all of the three *vyāhṛtis* [53]

and thus he should make the fourth offering into (his own) mouth, (even) as before, saying 'May I be the entire world'. [54]

स्मार्तमाचमनं त्वन्ते प्रायत्यार्थमिहोच्यते ।
अग्नेः पश्चिमतोऽथान्ते प्राक्शिराः संविशेत्ततः ॥५५॥

Then there is prescribed here, in the end, the sipping of water, according to the *Smṛti*, for *prāyatya*.¹ Then may he sleep to the west of the fire, with his head towards the west. [55]

¹This is for securing purity. SP refers to *Manusmṛti* 2.222 for clarifying *prāyatya*:

ācamya prayato nityam ubhe saṁdhye samāhitah /
śucau deśe japej japyam upāsita yathāvidhi //

प्रत्यूषसि ततो भक्त्या ह्यादित्यमुपतिष्ठते ।
वक्ष्यमाणेन मन्त्रेण ह्युपासीत रविं सदा ॥५६॥

Then, in the morning, he indeed, worships the sun, with devotion; let him indeed¹ ever worship the sun with the verse which is being stated hereafter. [56]

¹SP states that the use of the word *hi* is to point out the well-known prescription of the worship.

एकपुण्डरीकमिति प्रधानत्वं विवक्षितम् ।
एकशब्देन नो संख्या यथैकः श्वेतवाहनः ॥५७॥

The use of the word *ekapūṇḍarīka* intends to convey the prominence (of the object of worship); the word *eka* does not signify the number; (It is like in the phrase *ekah śvetavāhanah*,¹ viz. the only one, who has white horses.) [57]

This verse gives the meaning of the Mantra which is referred to in the preceding verse.

¹This refers to Arjuna. He alone is known by the name Śvetavāhana.

दिशां यद्वत्प्रधानस्त्वं मनुष्याणां तथा ह्यहम् ।
भवेयं त्वत्प्रसादाद्भोः स्फीतः पुंभोगसाधनैः ॥५८॥

As you are prominent among all the quarters, so also may I be among men, O Lord, through your favour, enriched with many means of men's enjoyments. [58]

Now, BU 6.3.7 is under reference.

यथेतमेत्याथासीनः पश्चादग्नेः समाहितः ।
तं हैतमिति यत्नेन वंशं जपति भक्तिततः ॥५९॥

Then, going (back by the way which) he has come, he seats himself by the side of the fire, and with his mind (well) composed, he recites, with full attention and with devotion the words *taṁ ha etam* ..., he mentions (lit. utters) the line of his teachers (*vaṁśam*). [59]

Now, BU 6.3.8 is under reference.

तं हैतं मन्थं यत्नोक्तमुद्दालतनयः सुधीः ।
उक्त्वाथ याज्ञवल्क्याय तं प्रोवाचाथ विस्मितः ॥६०॥
मन्थं शुष्केऽपि यः स्थाणौ निषिञ्चेदुक्तसंस्कृतम् ।
जायेरन्नेव तच्छाखाः प्ररोहेयुर्दलानि च ॥६१॥

Then, having told with an attentive mind, (about) this Mantha

(rite) to Yājñavalkya, the intelligent son of Uddālaka¹ (again) said, with a smile: [60]

‘Whosoever would offer this Mantha, which is thus sanctified, even on a dry (i.e. withered) tree, (would find that) its branches become full of life and also would put forth young leaves.’ [61]

This asserts the potency of the Mantha.

Now, BU 6.3.9-12 are under reference.

यादृगर्थोऽस्य वचस उत्तरेष्वपि तादृशः ।

The meaning of the words even in the subsequent sentences is similar to what it is of this statement (viz. BU 6.3.8). [62ab]

Now, BU 6.3.13 is under reference.

चतुरौदुम्बरोक्त्यर्थो व्याख्यातः पूर्वमेव तु ।

सुखावबोधतश्चैव स्वयमेव प्रतीयताम् ॥६२॥

The meaning of the statement in the words *caturaudumbara* ... is already explained;¹ may one know it with ease for understanding. [62c-f]

¹That is, as in the case of Audumbara vessel made of bronze in verses 13ff. above.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके षष्ठाध्यायस्य
तृतीयं ब्राह्मणम् ॥३॥

**BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA**

6.4

In some of these verses Sureśvara often refers to the actual words of the Mantras in BU and supplies together with them his paraphrases of the same. Therefore, our translation had to appear as bits of phases!

BU 6.4.1-2 are under reference.

एषामिति नृबीजस्य स्तुतिरुक्त्या विवक्ष्यते ।
प्रतिष्ठां कल्पयानीति यस्यां पुंस्त्वं प्रपद्यते ॥१॥

In the words *eṣām* ..., the statement (in the Śruti) intends to express the praise of the seed of man. And, the words *pratiṣṭhāṃ kalpayāni* (signify that) in which the nature (lit. birth) of a male is secured. [1]

In this verse, Sureśvara summarizes the introductory arguments of BU 6.4.1-2 by citing only a few words from it.

Now, only BU 6.4.2 is under reference.

शुक्रं निषिक्तं यत्रेदं पुरुषत्वं निगच्छति ।
प्रतिष्ठां तादृशीमीशः प्रजापतिरचीकलृपत् ॥२॥

Prajāpati, the ruler (or, Lord), thought of such a firm abode in which the semen planted (lit. poured) gets the (potential) quality of a male. [2]

This explains the thought of the second half of the preceding verse.

स्त्रियं ससर्ज तद्योग्यां मधुकाण्डे यथोदिताम् ।

सृष्ट्वाथाधः प्रदेशे तामुपास्ते ग्राम्यधर्मतः ॥३॥

Then he created a woman who is suitable for that,¹ as mentioned in the Madhu Kāṇḍa.² Then, after creating her, he attended to her in her lower part (of the body), as in common life.³ [3]

This explains *sa striyaṃ sasrje* in BU.

¹That is, for being an abode for the seed.

²Cf. *tataḥ patiś ca patnī cābhavatām* (BU 1.4.3).

³This is, *grāmya dharma*, that is to say it is not the sign of the religious elite. This indicates that Sureśvara's expression is the precursor of Ānandagiri's expression *paśukarma* and that it conforms to the *Kāmasāstra*. The lower part here means a woman's sexual organ.

अपत्योत्पत्तये स्त्रीणामधोदेशं प्रजापतिः ।

प्रागुपासितवान्यत्नादुपास्यं तेन तत्ततः ॥४॥

(Since) Prajāpati had, in earlier time, attended to the lower part of the body of the woman,¹ for producing a son (lit. a child),² therefore, one should attend to that with special care (*yatna*). [4]

This is to explain *tasmāt striyaṃ adha upāsīta* in BU.

¹It is possible to understand that Sureśvara uses the word *strīṇām* (plural) to express the idea of the class-word *striyam*.

²In such a context, the word *apatya* is to be taken as a synonym of *putra*.

सोमाभिषवरूपत्वक्लृप्तयेऽथाधुनोच्यते ।

एतं ग्रावाणवच्छिन्नमुदपारयदात्मनः ॥५॥

Now is stated hereafter to establish the form of the Soma-pressing in the placing of the seed in a woman. In the words *etam*,¹ (the Śruti states) that he made his generative

organ penetrate (into the woman's sexual organ), like the stone (for Soma-pressing). [5]

This and the following two verses explain *sa etam ... abhyasrjata* in BU.

¹This refers to the generative organ because of its hardness at the time of intercourse. SP refers to the similarity between human intercourse and the preparation of the Soma drink, i.e. Vājapeya 'strong drink' -sacrifice.

प्राञ्चं कृत्वाथ तं शिश्नं यथैवाभिषवोपलम् ।
एकीभावेन तं नार्या यत्नात्समुपवेशयेत् ॥६॥

Then he makes his penis hard like the Soma-pressing stone and becoming one (in mind with the woman) he enters it into the woman¹ with (proper) attention (*yatna*). [6]

SP states *nārīśabdas tadīyendriyaviṣayaḥ*.

तथाभूतेन ग्रावणैतां स्त्रियमभ्यसृजन्मुहुः ।
आत्मनः पुरुषार्थाय यथोक्तोपासनं भवेत् ॥७॥

By that (which has become as hard as the Soma-pressing) stone,¹ he united with the woman again (and again) for securing his own aim of life—so that the attendance on the woman, as prescribed would be effected. [7]

This points out the significance of *tenainām abhyasrjata*.

Now, BU 6.4.3 is under reference.

यस्यां प्रजननं पुंसा स्त्रियामभ्यन्तरीकृतम् ।
तस्या वेदिरुपस्थः स्यादूर्वोरुपरि दर्शनम् ॥८॥

The (sexual organ of that woman) in which the man has entered his own generative organ is the alter; and it is seen between

(lit. above) her laps—so is to be understood.¹

[8]

¹This is a metaphorical identity (*dr̥ṣṭi*).

बर्हिस्तज्जानि लोमानि चर्माधिषवणे तथा ।
चर्महानडुहं पश्येत्सोमाभिषवसिद्धये ॥९॥

The hair grown there are the *barhis* (grass) and the lips (of the vulva) are the stones for pressing (Soma, *adhiṣavane*) and the skin of hers is the bull's skin—so should he see (it, viz. the skin) for securing *abhiṣava* 'sprinkling of Soma'¹

[9]

¹It means: planting the seed in the woman.

फलके चाधिषवणे यथासंख्येन निर्दिशेत् ॥१०॥
यो योन्यन्तर्गतो देशः समिद्धश्चर्म निर्दिशेत् ।
तद्देशमभितस्तौ यौ मुष्कौ तौ वृषणाविति ॥११॥

And he should refer to the stones for Soma-pressing thus in order:

[10]

That part which is within her vulva is (to be taken as) what is enkindled (viz. Agni). And he should consider (lit. refer to) the part around the region (of the vulva) as the (bull's) skin and those two fleshy parts as the testicles.

[11]

लोकः स्याद्वाजपेयेन यजमानस्य मानतः ।
तावन्तं लोकमाप्नोति यावन्तं वाजपेयतः ॥१२॥

By the authoritative means (i.e. by the text of the Śruti); a sacrificer of the Vājapeya (sacrifice) would get the world; the householder also (by his act under reference) secures as extensive a world as from (the performance of) a Vājapeya (sacrifice).

[12]

अत्रानि संभ्रियन्ते हि दश सप्त च भागशः ।
वाजपेये कृतावन्नकामस्य स विधीयते ॥१३॥

Since, in a Vājapeya sacrifice, ten and seven foods are brought (lit. collected together)—in (two) portions; therefore, that (viz. a Vājapeya) is enjoined on one who is desirous of food. [13]

The purport of this verse is not fully/clearly understood by us. However, read SP: *paśukarmāṅgeṣu vājapeyāṅgādhyāse 'pi katham tatra tadadhyāsaḥ sāmyābhāvād ity āśaṅkya sāmyārtham vājapeyasyānnatvam sādhayati.*

रेतसोऽन्नरसस्यैव यत्रान्नाहुतिरीक्ष्यते ।
वाजपेयाभिसंपत्स्यान्मैथुनाख्यक्रतोरतः ।
सामान्यादिति विज्ञेयं वाजपेयफलार्थिनाम् ॥१४॥

Therefore, where (the planting of) the seed by man is seen as the very offering of the essence of food, there would result from the ritual of intercourse the rich result of a Vājapeya rite¹; this should be known from the similarity by those who desire for the results of the Vājapeya.² [14]

¹Alternatively: SP quotes a Śruti: *yasmin puruṣe 'nnāhutir iṣṭā tasminn etasminn agnau devā annam juhuvati* and adds *iti tasya puṁso reto bhuktānnarasas tasyaiva yasmin karmani hūya-mānatvam tasya pūrvavad annatvāt tasmīn vājapeyadrṣṭiḥ.*

²That means: the result would follow, even without the actual performance of a Vājapeya rite.

स्त्रीणां च सुकृतं वृङ्क्ते सर्वमावर्जयेच्छुभम् ।
अधोपहासं यो विद्वान्यथोक्तमुपसेवते ॥१५॥

He, who, knowing this, attends to the lower part of the woman,¹ as prescribed (by the scripture), secures (for himself) the woman's merits and all bliss. [15]

¹That is, unites with her in intercourse.

अनेवविदुषः पुण्यं सुकृतं वृञ्जते स्त्रियः ।
मैथुनोपनिषत्तत्त्वमेतद्ध स्माह भावितः ॥१६॥

In the case of him, who is not knowing this, women¹ take away his merit, and his good deed(s). This is the secret doctrine of intercourse. Thus has he (Āruṇi), knowing well,² stated.

[16]

¹The plural is somewhat strange!

²Or, having devotion (properly determining it).

Now, BU 6.4.4 is under reference.

सर्वदैवाहुतीर्विद्वाञ्जुहोत्यश्नन्नपः पिबन् ।
उपगच्छन्स्त्रियं तद्वदार्णिर्गोत्रतः किल ॥१७॥

A knower (of the Vājasaneyā sacrifice) makes all the offerings to gods, eating, and (drinking water); (so) also uniting with (his) woman; (just) in the same way (as in a Vājapeya sacrifice, secures his desired result)—so, it is reported (*kila*), did Āruṇi (know) in family tradition (*gotratāḥ*)¹

[17]

¹SP adds: and spoke about it.

ब्राह्मणा जातिमात्रेण स्त्रीभिर्हृतशुभागमाः ।
उक्तं विधिमजानन्तो म्रियन्ते मैथुने रताः ॥१८॥

Those, who are Brāhmaṇas only by birth, not knowing the prescribed mode of intercourse (and) whose excellences (i.e. merits collected) are taken away by women, die (if only) addicted to (or, engaged in) intercourse.

[18]

It signifies censure on those given to intercourse just for deriving delight from it.

बह्वेतदिति विज्ञेयं प्रयोजनबहुत्वतः ।

रेतः स्कन्दति यत्सुप्तौ जाग्रतो वापि कामिनः ॥१९॥

Since it has many purposes, it (i.e. semen) has to be known as (having) manifold (effects), viz. that man's semen sometimes spills while (he is) in sleep, or even while (he is) awake; (of that man) who is (only) sensuous (i.e. full of desire). [19]

Now, BU 6.4.5 is under reference.

हस्तेनालभ्य तद्रेतः पश्चाच्चाप्यनुमन्त्रयेत् ॥२०॥
यदद्य मेऽपतद्रेत ओषधीरसरच्च यत् ।
अपोऽगच्छत्स्वयोनिं च तदहं भूय आददे ॥२१॥

He should touch that semen and later recite the Mantra (*yan me ...*)¹ [20]

May that semen of mine, which has spilt (lit. fallen) and has moved to the herbs, gone to its origin, viz. the waters, so that I take it up again.² [21]

¹This is given in the text of BU; also paraphrased in the following verse.

²Ānandagiri in his commentary on BUB explains: *mamā-dyāprāptakāle yad retah prthivīm ... rāgātirekeṇa skannam āsīt ... svayoniṁ gatam abhūt tad idaṁ retah sampraty ādade 'ham (ity ādānamantrārthaḥ)*.

अभिमर्शनस्य यो मन्त्रो ग्रहणस्य स एव तु ।
पुनर्मामैतु तद्रेतो विज्ञानं तेज उच्यते ॥२२॥

The Mantra, which is recited (at the time) of *abhimarśaṇa* 'touching', is the same in taking it up, viz. 'May that semen, that lustre (*viññāna*), come back to me, (for) that is called *tejas*.' [22]

This and the following three verses have reference to verses 20 and 21 above.

सौभाग्यं पुनरग्निः स्युः परिशिष्टाश्च देवताः ॥२३॥

'May that fortune (once again come back to me); and let Agni and the other gods (be for me).'¹ [23]

¹The protectors of various organs, which they superintend over, are meant. The idea is that those gods once assume again the nature of that semen.

प्रकाशकत्वात्सर्वासां धिषण्याश्चाप्यग्नयो मताः ।
गमयन्तु यथास्थानं देवा अग्न्यादयो मम ॥२४॥

And fires are understood as the *dhiṣṇyas*, since they are the illuminators of all. Also, those other gods are fires, let them make my (dropped) semen go back to the places (over which they superintend). [24]

अङ्गुष्ठानामिकाभ्यां तद्रेत आदाय चात्मनः ।
स्तनौ भ्रुवौ वा निमृजेन्मध्ये च स्तनयोस्तदा ॥२५॥

And, taking up that semen by his thumb and the ring finger, he should smear with it his breast and brows. Also (he smears it) between the breasts. [25]

Now, BU 6.4.6 is under reference.

रेतःस्वयोनावुदक आत्मानं चेत्प्रमादतः ।
पश्येन्मन्त्रेण ततोयमनेनैवानुमन्त्रयेत् ॥२६॥

If, by mistake, he sees himself¹ in the waters, viz. the origin of (his) own semen, he should look at them, reciting this (same) Mantra. [26]

¹That is, his own reflection. Here, waters are understood as the *yoni* 'origin' of semen.

मयि तेजोऽस्तु विज्ञानमिति रेतोऽभिधीयते ।
विशिष्टापत्यहेतुत्वाज्जपेदेवं तथोत्तरे ॥२७॥

(In the Mantra) *mayi tejo 'stu ...*; ¹ semen is called *vijñāna*. ² Thus he should recite it later also, because that semen is the cause of the desired son (lit. child). [27]

¹The Mantra stated in BU is: *mayi teja indriyam yaśo draviṇaṃ sukṛtam* where *indriyam* is for *vijñānam* as is specifically so mentioned in verse 22 above.

²See verse 22 above.

उद्गतं मलवद्वासश्चतुर्थेऽहनि यत्स्त्रियाः ।
तां मलोद्वाससं पत्नीमाहुस्तत्कर्मकारिणः ॥२८॥

When, on the fourth day (of her period), a woman's soiled garment has been given up, the wise ones, who wish to enter on sexual act, consider this wife as one who has given up wearing a soiled garment. [28]

This is to prohibit a sex act during a woman's period.

गुणाढ्यापत्यफलवत्पुष्पभतत्वकारणात् ।
मलवद्वाससं प्राहुः श्रियं श्रीहेतुतः स्त्रियम् ॥२९॥

They have known a woman, who wore (during her period) a soiled garment, as glory, since she had become (the bearer of) a flower that fructifies in (the form of) a son that is rich in qualities, thus (verily) a cause of (future) glory. [29]

This brings out the purport of *śrīr ha vā eṣā strīṇām ...* in BU.

चतुर्थे दिवसे स्नातां गत्वा तामुपमन्त्रयेत् ।
आत्मनोऽभिमुखीभावे वाग्यत्नोऽत्रोपमन्त्रणम् ॥३०॥

On the fourth day, when she has taken a bath (after her period), may he approach and invite her (for sexual union). This invitation here¹ is his (careful) attempt in words to make her inclined towards himself (for the union). [30]

¹That is, to the proposed sex act.

Now, BU 6.4.7 is under reference.

प्रेम्णोपमन्त्रिताप्यस्मै पत्ये दद्यान्न चेदसौ ।
वस्त्राभरणभोगाद्यैरात्मनो वशमानयेत् ॥३१॥

If she does not give him that consent for the sex act, though invited with love, then he should bring her to willingness (lit. under his control) by (offering to her) garments, ornaments and enjoyments etc.¹ [31]

This explains *sā ca* ... in BU.

¹The word etc. is for other unsaid means for effecting her willingness (SP).

तथाप्युक्ता न चेद्दद्याद्बलात्तां वशमानयेत् ।
उपेयात्तामतिक्रम्य शापदानाय रोषितः ॥३२॥
इन्द्रियेण त इत्यादिमन्त्रेणाथ शपेद्द्रुषा ।
पतिशापादपुत्रा सा वशमाशु भवेत्तदा ॥३३॥

So addressed also, if she does not give her (consent), then he should bring her under his control with force; he should unite with her, over-riding (her disagreement) (and) being full of anger, be bent on pronouncing a curse on her. [32]

He should then curse her with anger, reciting the Mantra *indriyeṇa te*¹ Then she would be under his control, (for fear that) she should be without a child (or, a son), on account of her husband's curse. [33]

¹This Mantra is given in BU thus: *indriyeṇa yaśasā te yaśa*

ādade.

शप्स्यामि त्वामिति ह्युक्त्वा वशं तामानयेत्पतिः ।
दद्याच्छापभयात्सा चेदनुलोमं तदाचरेत् ॥३४॥

May the husband bring her under (his) control (only)¹ saying 'I shall curse you' and she also, owing to the fear of the curse, would behave in an agreeable way. [34]

¹The word (only) is added to point out that such a curse would result into misery for her and for himself also. Therefore, he should, as far as possible, avoid cursing her.

Now, BU 6.4.8 is under reference.

अथ शापभयाद्दद्यात्पत्ये कामितमादरात् ।
तदा निवर्तयेच्छापं मन्त्रेणानेन सत्पतिः ॥३५॥

If, however, she gave to her husband what he has desired, owing to the fear of the curse, the good husband should then withdraw the curse with the Mantra *anena*¹ [35]

¹This Mantra is *anenendriyeṇa te yaśasā yaśa ādadhāmi*.

Now, BU 6.4.9 is under reference.

पुरुषद्वेषिणीं भार्यां पतिश्चेदभिकामयेत् ।
मामियं कामयेतेति कुर्यात्तस्या इमं विधिम् ॥३६॥

If (again) a husband would have a longing (for a union with) a wife, who hates the man (i.e. union with the husband), then he should perform this (i.e. the following) rite,¹ with a desire 'Let her long for me'. [36]

This explains *sa yām* ... in BU.

¹This refers to the (Putra)mantha rite already described—cf.

the next verse.

उक्तमन्थविधानेन चरितव्रत एव सन् ।
उत्तरेष्वपि कार्येषु सर्वं तदनुवर्तयेत् ॥३७॥

Certainly, being one who has followed the procedure of the already prescribed (Putra)mantha rite, he should do all that (which is prescribed there) in later actions of his (as well).¹

[37]

¹Cf. verses 3ff. above.

स्त्रीलक्षणे प्रवेश्यान्तरात्मीयं पुंस्त्वलक्षणम् ।
वक्त्रं वक्त्रेण संधाय स्पृष्ट्वोपस्थं जपेदथ ॥३८॥
अङ्गादङ्गात्संभवसि जग्धान्नपरिणामतः ।
रसाच्छोणितमित्यादिक्रमाच्छुक्रतया मम ॥३९॥

Having entered his generative organ into the sexual organ of (his) woman and, putting his mouth to her mouth, he should touch her sexual organ, (and) then recite the Mantra: [38]

anigād anigāt sambhavasi ... to mean 'You are produced from each of my limbs', in the form of my semen as the result of the food (I have eaten); beginning with, my blood is from the *rasa* of the food etc.¹ [39]

This explains *hr̥dayād* ... in BU.

¹The word etc. refers to the flesh.

शुक्रप्रवहया नाड्या हृदयाच्चाभिजायसे ।
स त्वमङ्गकषायोऽसि दिग्धविद्धां मृगीमिव ।
स्नेहोपरोधादेवैतां पत्नीं मे वशमानय ॥४०॥

(Flowing) by the vein which carries the semen, you are produced from the heart. You are thus the essence of my limbs and, thereby, bring this my wife under my control, with a bent of love, even like a female deer who is affected by

(an arrow) smeared (with herbs).

[40]

This explains *atha yām ...* in BU.

Now, BU 6.4.10 is under reference.

मा बिभर्गर्भमित्येवमथ यां कामयेत सः ।
रूपभ्रंशो हि भवति यतो गर्भस्य धारणे ॥४१॥
तथा यौवनहानिश्च तस्मादेवं स कामयेत् ।
तस्यां स्वमर्थं निष्ठाय मुखेनेत्यादि पूर्ववत् ॥४२॥

Now, if (he would think about a woman) whom he longs for that she should not bear a foetus—for a woman's beauty is lost (or diminishes) in case she bears a foetus¹— [41]
so also is there a loss of youth—he should thus desire, having placed verse,² (putting his mouth) with her mouth (he should unite with her). [42]

¹This is parenthetical.

²That is, reciting the Mantra: *indriyeṇa te retasā reta ādade*; cf. verse 38ef above.

प्राण्यादौ रेचकं कृत्वापानयेत्तदनन्तरम् ॥४३॥
निषिक्तमपि तद्रेतः प्राणवृत्त्या यथाविधि ।
अपानवृत्त्या तद्धवस्तमित्येतत्कर्मणः फलम् ॥४४॥

Having first inhaled breath and then having held his breath within, he should exhale later. [43]

Then that semen of his, though planted in her, with the function of *prāṇa(-vāyu)*, according to prescription, would become destroyed—this is the result of this act. [44]

इन्द्रियेण त इत्यादिमन्त्रोक्त्या तां परामृशेत् ॥४५॥
इन्द्रियेणैव त्वद्रेतो रेतसा आददे स्वयम् ।
अरेता एव सा स्त्री स्यादेवं पत्याभिमन्त्रिता ॥४६॥

He should approach (i.e. touch, or unite with) her, reciting the Mantra *indriyeṇa te* [45]

Through my sexual organ (*indriya*), the semen, do I myself take away¹ the semen from you; thus addressed by her husband, that woman would then be without the seed. [46]

This explains *atha yām* ... in BU.

¹In *retasā ādate* there is the absence of *saṁdhi*, in occasional Vedic way (SP).

Now, BU 6.4.11 is under reference.

दधीत गर्भमित्येवं यामिच्छेत्पतिरङ्गनाम् ।
तामपान्य प्रयत्नेन प्राण्यान्मन्त्रेण कारयेत् ।
इन्द्रियेण त इत्युक्त्या आदधामीति सत्पतिः ॥४७॥

The husband, who wishes the wife (*aṅganā*) to bear for him a foetus, should first carefully (*prayatnena*) make her exhale, and then, himself inhaling, induce (lit. make) her do (what he desires)¹—the good husband, reciting (at that time) the Mantra (which begins with) *indriyeṇa te* (and ends with) *ādadhāmi*. [47]

¹That is, his wish that she joins him in the sex act.

Now, BU 6.4.12 is under reference.

अथाभिचारिकं कर्म प्रसङ्गादभिधीयते ।
उपायत्वेन विज्ञप्त्यै श्येनवन्न विधीयते ॥४८॥

Now is described some act of black-magic (*abhicāra*) that the occasion has demanded. This is (only) to inform one about it as some remedy¹ and, therefore, is not prescribed as the rite of Śyena.² [48]

¹SP points out: *na hiṁsyād iti śrutivirodhān na hiṁsārtho*

vidhir ity āśāṅkya ... (upāyatvena).

²Śyena is a ritual not prescribed, since it involves violence (*himsā*).

अथ यस्य गृहस्थस्य पत्न्या जारो भवेत्क्वचित् ।
तं चेद्विष्याद्रुषैवैनामारभेत तदा क्रियाम् ॥४९॥

Now, in case a householder's wife has some lover, and if he should hate him, he should, in utter¹ anger, begin the performance of the act (which is now prescribed). [49]

¹This is the force of *eva*.

न ह्यद्विष्टमनस्कस्य कर्मैतत्सिद्धिमश्नुते ।
अतोऽधिकारिविज्ञप्त्यै द्विष्यादिति विशेषणम् ॥५०॥

Indeed, this act would not be successful (in yielding the result), if a man is not having anger in his mind; therefore, in order to convey his eligibility for that act, there is this specification by the words *dviṣyāt* [50]

आमपात्रेऽग्निमित्युक्त्या ह्यभिचाराख्यकर्मणः ।
योग्यतैवामपात्रस्य भिदुरत्वसमन्वयात् ॥५१॥

In the statement *āmapātre 'gnim* ... is stated the suitability of that pot for the rite of black-magic, because a raw pot (of clay (*āmapātra*)) is invariably associated with breakability. [51]

यथामं भिदुरं पात्रमप्सु सद्यो विलीयते ।
प्राप्तजारोऽपि मे शत्रुस्तथैवाशु विदीर्यताम् ॥५२॥

As a raw pot which is breakable melts away at once when (put) into waters, so '(my wife's) lover should get destroyed into pieces quickly'¹, (should he recite). [52]

¹This is the significance of the comparison with *āmapātra*.

अग्निमित्येकवचनादुल्लिख्यादेश्च लिङ्गतः ।
आवसथ्याग्निनिर्देशो न तु त्रेताग्निसंग्रहः ॥५३॥

From the word *agni* in the singular and by the use of the word *ullikhya* etc.,¹ which serves as indication, there is here the mention of the domestic fire and not of the three fires.²

[53]

¹The word etc. refers to *āmapātra*, *śarabarhis* etc.; cf. BU text. Also the word *ullikhya* implies *parisamūhana*, *parilepana* etc. as mentioned earlier (cf. BUBV 6.3.18-19 above).

²This refers to the three sacred fires, viz. *āhavanīya*, *gārhapatya* and *tretā*.

प्रतिलोममवस्तीर्य कर्मणः प्रतिलोमतः ।
शरबर्हिः प्रयत्नेन विद्वान्रोषसमन्वितः ॥५४॥
तस्मिन्नग्नौ शरेषीका घृताक्ता जुहुयादथ ।
जारस्य दोषं प्रख्याप्य मन्त्रेणानेन सत्वरः ॥५५॥

Then he, the knower, full of anger, should with effort strew (the *barhis* grass) against the usual procedure¹—since this act is contrary to the normal act—

[54]

then offer into that fire the spearlike *śara* grass, smear the same with ghee, (and) having quickly (i.e. at the same time) spoken aloud the blemish of the lover with this Mantra:

[55]

¹That is, the procedure of *paristarana* in a domestic rite.

मम स्वभूते योषाग्नौ समिद्धे यौवनादिना ।
शुक्राहुतिं यतोऽहौषीरेष तेऽत्र व्यतिक्रमः ॥५६॥
आददेऽतोऽपराधात्ते प्राणापानौ जिजीविषोः ।
फट्कारेणैव जुहुयाच्छरभृष्टीर्यथोदिताः ॥५७॥

‘Since you have offered the oblation of your semen into the

fire in the form of (my) woman that has been enkindled (with desire for you) by her youth etc., let this (lit. this my offering) be your dishonour (*vyatikrama*).¹ [56]

Hereby, have I taken (away), on account of your offence, *Prāṇa* and *Aṇa*, from you, who are wishing to live.' Let him offer the spear-like *śara* grass,² which is mentioned earlier producing the sound *phaṭ*. [57]

¹Or rather, let this be my revenge on you.

²Refer to verse 55 above.

तथा पुत्रान्पशूंचैव आददे तेऽद्य कामुक ।
श्रौतमिष्टं विजानीयात्स्मार्तं सुकृतमित्यपि ॥५८॥

Also,¹ (let him say) 'so also do I take away now (lit. today) your sons and cattle, O voluptuous one!'. In this act, one should understand that which is approved by the Śruti as *iṣṭi* and also *sukṛta* in (the prescription(s) of) Smṛti(s). [58]

¹SP adds: 'he should announce the blame of that clandestine lover'.

श्रौतं स्मार्तं च यत्किञ्चित्पुण्यं कर्म त्वया कृतम् ।
तत्सर्वं त आददेऽहमाहुतिं प्रक्षिपेद्गुषा ॥५९॥

With the words, 'I am taking away all of yours, viz. whatever meritorious work as prescribed by the Śruti and also the by Smṛti which you have done', let him make the offering in anger. [59]

प्रार्थनाशेति विज्ञेया पराकाशा प्रतीक्षणम् ।
आदानान्तो भवेन्मन्त्रः सर्वत्रैवं विनिर्दिशेत् ॥६०॥
वाङ्मात्रेण प्रतिज्ञातं कर्मणा नोपपादितम् ।
तत्प्रतीक्षणमाकाङ्क्षा पराकाशेति भण्यते ॥६१॥

By the word *āśā* one should know desire and by *parākāśā*,¹

hope for the result; the Mantra should have *ādāna* (i.e. *aham ādade*) at its end. This he should mention everywhere (i.e. at the end of every offering). [60]

parākāśā is that which is announced (as what will be undertaken) in mere words but not actuated in action and what is mentioned as what is longed for. [61]

These two verses explain the words *āśā* and *parākāśā*.

¹Sureśvara has used the feminine *parākāśā* for masculine *parākāśa* in BU.

स वा इत्यादिनाथास्य फलमुक्तस्य कर्मणः ।
भण्यते वचसोक्तस्य निरिन्द्रियपुरःसरम् ॥६२॥

Then in the words beginning with *sa vā* is stated the result of the act that is described,¹ viz. what is stated in the words beginning with *nirindriya*. [62]

¹Namely, of the *abhicārakarman* 'act of black-magic'.

निःशेषपुरुषार्थसिलोपकृत्कर्म वर्णितम् ।
जायया मैथुनाख्यं यच्छ्रोत्रियस्य विपरिचतः ॥६३॥

Thus is described the act of one's intercourse with the wife by a learned, *śrotriya*,¹ which is the destroyer of the entire achievement of the ends of human life. [63]

¹Cf. the oft-quoted verse:

*janmanā brāhmaṇo jñeyah saṁskārair dvija ucyate /
vidyayā yāti vipratvaṁ tribhiḥ śrotriya ucyate //*

उपहासमतो नेच्छेत्सार्धं श्रोत्रियजायया ।
मैथुनं तु विशेषेण ह्युक्तानर्थजिहासया ॥६४॥

Therefore, one should not wish even to play jokes with the wife of a *śrotriya* and (*tu*), in particular, a sex act, so that

(one fulfils one's) desire to avoid any untoward result that is mentioned. [64]

Now, BU 6.4.13 is under reference.

कर्माभिचारिकं प्रोक्तं प्रसङ्गात् प्रधानतः ।
यदर्थस्तु प्रयासोऽयं तत्कर्मार्थं प्रपञ्च्यते ॥६५॥

The act of black-magic is mentioned here, for it was so occasioned and not with (the idea of giving) it as of principal significance. And now is explained that ritual act¹ for whose result all this effort (is undertaken). [65]

¹The text of the AnSS edition has a misreading *tatkamārtha*.

यस्य मन्थविधिज्ञस्य जाया चेदार्तवं व्रजेत् ।
तिस्त्रो रात्रीर्न कांस्येन पानं कुर्यात्तथाशनम् ॥६६॥

If the wife of the knower of the procedure of the Mantha (rite) comes to have her period, she should not drink (water) with a metal (lit. bronze) cup for three nights, nor should she take food in a similar way. [66]

The construction of this verse is a little awkward. Yet SP laudably avoided the awkwardness by observing (at the end) *tadā tasya sā jāyati śeṣaḥ*.

तथैवाहतवासाः स्यादहःस्वेतेषु शुद्धधीः ।
वृषलो वृषली वैनानोपहन्यात्कदाचन ॥६७॥

Similarly, in these three days, she, of pure mind, should have put on an uncut garment; so also, no Śūdra man or Śūdra woman should even (or ever) touch¹ her. [67]

¹The verb *upahan* is used in some peculiar sense. The verb root *han* with *upa* means 'to touch' also 'to approach' [already

so in BU], but 'to strike' is not the usual sense.

अन्यो वा पापकृत्कश्चित्स्पर्शसंभाषणादिभिः ।
व्रतस्थां नोपहन्यात्तामभीप्सितफलाप्तये ॥६८॥

Nor should any other man contact¹ her, who is in her vow,
by touch or conversation, for securing what he longed for.

[68]

¹*sparsā* with *upahanyāt* would demand this translation; that avoids tautology.

सा त्रिरात्रान्त आप्लुत्याहतवासाः शुचिः सती ।
श्रपणाय चरोर्भर्ता व्रीहीस्तामवघातयेत् ॥६९॥

That woman wears an uncut garment when she has bathed
at the end of the third night and become purified.¹ The
husband makes her pound rice grains for preparing (lit.
cooking) the *caru* 'ball of cooked rice'. [69]

¹We take the first line as a complete sentence. The
construction in the text is awkward, or anakoluthic.

*From this verse onwards, Sureśvara occasionally gives us, almost
in a parenthetic way, his paraphrases of (some) words in the
Mantras of BU. It has been difficult, therefore, to translate his
Vārtika in a well connected form. As such, our translation will
appear to the readers disconnected bits of sentences. We regret
our helplessness!*

Now, BU 6.4.14-16 are under reference.

शुक्लो गौरोऽत्र विज्ञेयः शुक्लो वा बलदेववत् ।
सुव्याख्येयत्वतः शेषः स्वयमेवावगम्यताम् ॥७०॥

The word *śukla* should be understood in the sense of fair
(lit. white) or fair like Baladeva.¹ The remaining portion (of

the Śruti) is to be understood by oneself, because of its easy explanation. [70]

¹It refers to Kṛṣṇa's elder brother.

क्षीरौदनं तथैवाथ पाचयित्वा स्वयं पतिः ॥७१॥

Then, after the husband has made the wife herself cook rice in milk— [71]

दंपती घृतवन्तं तमश्नीयातामथौदनम् ।
स्वतन्त्रावीश्वरौ स्यातां सत्पुत्रप्रसवाय तौ ॥७२॥

The couple should eat that rice cooked in ghee, and then they would be able, i.e. eligible¹ for begetting a good son. [72]

¹Read SP *īśvaraśabdārtham āha svatantrāṁ iti*.

यथोक्तपुत्रप्रसवे यदि वा क्षिप्रकारिणौ ।
यथोक्तकर्मणैतेन स्यातां तावेव दंपती ॥७३॥

Or if that very couple are in a haste to beget a son of already given description, (they would be able to do so)¹ by performing the rite described earlier.² [73]

¹This is suggested by *svatantrāṁīśvarau* in the preceding verse.

²Possibly it refers to Mantha ritual.

Now, BU 6.4.17 is under reference.

दुहिता पण्डितेत्यत्र स्त्रीणामुचितकर्मसु ।
तत्पाण्डित्यमिह ज्ञेयं न तु वेदार्थगोचरम् ॥७४॥

In the words *duhitā paṇḍitā* should be understood the daughter's being learned in the duties proper for women, not

in respect of Vedic matters.

[74]

This may indicate the commonly held belief of the people in Sureśvara's times that learned women meant those who were capable of discharging all the household duties of a woman but not eligible for Vedic studies and rituals!

Now, BU 6.4.18 is under reference.

विजिगीतो जगत्यस्मिन्नत्यर्थं यो विशब्दितः ।
विद्वत्सभा च समितिस्तद्योग्यः समितिङ्गमः ॥७५॥

The word *vijigīta* means one who is in the world exceedingly praised, i.e. praised in many (or, various) words. The word *samiti* means the assembly of the learned; therefore, *samitingama* means one who is fit (or, eligible) to sit in (that) assembly.

[75]

This explains *vijigīta* ... in BU.

प्रकृतायां त्रिसंख्यायां सर्वशब्दप्रयोगतः ।
प्रतीयाच्चतुरो वेदान्सर्वशब्दार्थवित्तये ॥७६॥

Ordinarily, the number three is used (in the context of the Vedas), yet there has been used the word *sarva* and therefrom one should understand that (there are meant) four Vedas, in order that the meaning of all words become understood.

[76]

This is to explain that the usual sense of three Vedas as understood from the word *sarva* should not be accepted.

तण्डुलान्मांससंमिश्रान्पक्त्वा मांसौदनं विदुः ।
उक्षा सेचनशक्तो गौः स एव ऋषभो महान् ॥७७॥

They have understood by meat-rice that which one has cooked

with rice grains mixed with meat. *ukṣan* means a bull which has become capable of sprinkling seed and the same, when well (or fully) grown up, is *ṛṣabha*. [77]

The second line specifies two phases in the growth of a bull and thus explains away the doubted repetition in *aukṣeṇa vārṣabheṇa vā* in BU (SP).

प्रसिद्धयसंभवात्त्वद्य ह्युक्तं मांसौदनं प्रति ।
मांसं कृष्णमृगच्छागविषयं त्वद्य कुर्वते ॥७८॥

This is so said here since, with reference to this meat-rice, there is no acceptance of it¹ today.² As such, they take that meat to be referring to that of a black deer or a goat. [78]

¹ Either *aukṣa māṁsa* or *ārṣabha māṁsa*.

² This is in keeping with the popular avoidance of beef, in Sureśvara's times. Cf. *Vimalodayamālā of Jayantasvāmin*. (ed. K.P. Jog, Poona: University of Poona, p.96): *tato gor ālambhaḥ prāptaḥ gor ālambhasya loke duṣṭatvād goḥ pratinidhitvena cchāga ālabhyate*. Possibly, Jayantasvāmin was a (senior) contemporary of Sureśvara.

यत्नेनोपार्जितं तच्चेत्क्रीत्वा वा मांसमाहरेत् ।
हिंसायाः प्रतिषिद्धत्वात्पशून्हन्यान् तु स्वयम् ॥७९॥

If that were to be obtained with (great) effort, then he should buy that meat and bring (it to the ritual), because killing has been prohibited; (any way), he should not kill animals. [79]

Now, BU 6.4.19 is under reference.

अथशब्दो विकल्पार्थो यथोक्तानां यथारुचि ।
काम्यानां ह्यन्यतमं पक्षमाश्रित्य भण्यते ॥८०॥

The word *atha* has the sense of an option¹ (among meats)

mentioned or (that which is) according to one's choice. This is said with any one (of the desired meats) in view. [80]

¹This explanation of *atha* is occasioned by its repeated use in BU (SP).

आरभ्योद्गमने भानोः सर्वं स्नानाद्यशेषतः ।
निर्वर्त्य संस्कारमथ यत्नात्प्राग्य उदाहृतः ॥८१॥

Having begun at the sunrise, all Saṃskāras, viz. a bath etc., he should perform the rite (of Mantha), which has been described before.¹ [81]

¹Cf. BUBV 6.3.3ff.

स्थालीपाके क्रिया या सा चावृदित्यभिधीयते ।
स्थालीपाकविधानेन संस्कृत्याज्यं तथैव तु ॥८२॥

And that (series of actions) which is prescribed in the context of a *sthālīpāka* is called here by the name *āvṛt*; therefore, having purified (*saṃskṛtya*) the clarified butter just in the same way as is prescribed for the *sthālīpāka* (he makes his offering).¹ [82]

The procedure of the *sthālīpāka* rite is well-known among the Vedists and, therefore, no details of the same are given with any particular attention.

¹The word *juhōti* is understood.

उपलक्षणमन्येषामाज्यस्य ग्रहणं भवेत् ।
आदिशब्दस्य वा लोपादाज्यादिमिति गम्यताम् ॥८३॥

The mention of taking up *ājya* 'clarified butter' is indicative of other (details of the rite),¹ or the word to be understood is *ājyādi* with the suppresion (*lopa*) of the word *ādi* in it. [83]

This verse averts a possible doubt that could arise from the words *saṁskṛtyājyam* in the preceding verse and restricting that the performance should be with *ājya* alone.

¹This refers to other materials of the *sthālīpāka* ritual.

उपहत्योपहत्याथ स्थालीपाकस्य मन्त्रतः ।
नित्यास्तत्राहुतीर्हुत्वा आवापस्थान आदरात् ॥८४॥

Then, having repeatedly pounded (the rice grains), he should (utter) the Mantra(s) of the *sthālīpāka* ritual and he should respectfully offer the usual *āhutis*, in the place where *āhutis* are poured. [84]

This is the meaning of *sthālīpākasya* ... in BU.

प्रधानाहुतयस्तिस्त्रो याः स्युरग्न्यादिपर्विकाः ।
हुत्वा स्विष्टकृदन्तं तत्समापय्य यथौदितम् ॥८५॥
कर्मेदं तत उद्धृत्य चरं स्थाल्याः समाहितः ।
सर्पिष्मन्तमथाशनीयात्कामितार्थानुरोधतः ॥८६॥

Having offered those three principal *āhutis* 'offerings' which begin with those for Agni, he should have completed up to the end of the *sviṣṭakṛt*, as mentioned (in the ritual text), [85]

this rite; then he should have lifted up the *caru* from the plate which was kept (aside). He should then eat it having ghee in it, intending it (to effect) his desired end. [86]

This specifies the number of offerings.

चरं प्राश्य स्वयं शेषं भार्यायै संप्रयच्छति ।
उच्छिष्टमेव भार्यायै चरं भर्ता प्रयच्छति ॥८७॥

Having eaten of that *caru*, he should give the rest of it to his wife. A husband (always) gives to the wife only what is

left over (after he has eaten).¹

[87]

This explains *prāśya* ... in BU.

¹The second line is to specify that *śeṣam bhāryāyai prayacchati* does not refer to the remains of the *caru* from the plate.

पाणी प्रक्षाल्य यत्नेन सामर्थ्यादेव गम्यते ।
स्मार्तमाचमनं शुद्धयै पाणिप्रक्षालनोक्तितः ॥८८॥

(The instruction) 'Having washed his hands with care'¹ is understood from the force (i.e. power) of the words. Here is meant the sipping of waters, as prescribed by the Smṛti, since there is a mention of the washing of hands. [88]

This explains *prakṣālya* ... in BU.

¹With care (*yatnena*) is clarified by SP thus: *malatyāgārtham bahujalam ānīya paunaḥpunyena kṣālanam yatnaḥ*.

उदपात्रमथादाय तदद्विस्त्रिः सुताप्तये ।
वक्ष्यमाणेन मन्त्रेण जायामभ्युक्षयेन्मुहुः ॥८९॥

Having then taken up (in his hand) that pot containing water, he should repeatedly sprinkle water over his wife three times; reciting the Mantra which is stated (just below). [89]

This is the meaning of *udapātram* ... in BU.

अतोऽस्मदीयदारेभ्य उत्थायान्यत आव्रज ।
विश्वावस्वभिधानेन गन्धर्वोऽत्र प्रबोध्यते ॥९०॥

'Leaving (lit. rising away) from my wife, do you go elsewhere', (this is the meaning of the Mantra.) Here (i.e. in the Mantra), the mention 'O Viśvāvasu' refers to the Gandharva of that name. [90]

This is the content of Mantra.

प्रपूर्व्यामिति नार्यत्र भण्यते तरुणी किल ।
प्रपूर्वी पीवरीमन्यां याहि विश्वावसो द्रुतम् ॥९१॥

In the text *prapūrvyām*, the word *prapūryā* conveys (the sense of) a young woman.¹ (Therefore, the meaning of the verse is:) 'You, O Viśvāvasu, quickly go away to another *prapūrvī*, i.e. plump¹ woman. [91]

This explains *anyām iccha*.

¹The line *prapūrvyām ... kila* is to be taken parenthetically.

प्रपूर्व्यामिति लिङ्गाच्च तरुण्यां सत्पतिः सदा ।
यथोदितं कर्म सत्यां कुर्यात्सत्पुत्रजन्मने ॥९२॥

From the indicative word *prapūrvyām* (one should understand that) a good householder (lit. husband) should ever¹ perform the said ritual only with a young and chaste wife,² so that there is born a good son. [92]

¹SP states that the word *sadā* 'ever' stands for the time after the woman's period.

²SP elaborates thus: *prapūrvyām iti tārunyadyotakaśabdavaśāt ... taruṇyām satyām iti sambandhaḥ*.

अहं तु स्वामिमां जायां समुपैमीति संगतिः ।
एवं प्रस्थाप्य गन्धर्वमथैनामभिपद्यते ॥९३॥

As for myself, I am uniting with this my wife—this is the construe of the sentence (in BU).¹ Having thus sent away that Gandharva,¹ he approaches (i.e. unites with) her. [93]

This explains *jāyām patyā saha* in BU.

¹Ānandagiri on BUB (also in his comment on this verse, SP, with some difference) makes this cryptic verse clear, thus: *pīvarīm anyām yāhi* means: *viśvāvaso gandharva tvam uttiṣṭhānyām*

*ca jāyām prapūrvyām taruṇīm patyā saha saṁkrīḍamānām
ichhāham punaḥ svām imām jāyām sanupaimi.*

Now, BU 6.4.20 is under reference.

अभीष्टगर्भाधानाय जायामालिङ्गते पतिः ।
अमोऽहमिति मन्त्रोक्त्या तावावां देवतात्मकौ ॥९४॥
कर्मारभावहै देवि सत्सतोत्पत्तिसिद्धये ।
त्वं चाहं चैव संभूय योनौ रेतो दधावहै ॥९५॥

The husband embraces (i.e. unites with) the wife for placing in her the desired foetus, reciting the Mantra *amo 'ham*¹
'Now both of us, of the nature of gods, [94]
let us begin our act (of union), O my dear, for begetting a good son; let us, you and I, having joined together, place the seed in the womb'. [95]

This is the meaning of *abhipadyate* in verse 93 above.

¹BU gives the full Mantra thus: *amo 'ham asmi sā tvam asy
amo 'ham sāmāham asmi ṛk tvam dyaaur aham pṛthivi tvam tāv
ehi saṁ rabhāvahai saha reto dadhāvahai puṁse putrāyā vittaye
dyotake.*

रेतःक्षेपफलं चाह पुंसे पुत्राय लब्धये ।
मन्त्रोक्त्यनन्तरं तस्या विजिहीथामितीरयेत् ॥९६॥

(The Śruti) has mentioned the result of the placing of the seed (in the words) *puṁse putrāya labdhaye*.¹ After the Mantra is recited, he should say, 'May you separate (your thighs), [96]

¹*labdhaye* is Sureśvara's word for the original Vedic word *vittaye*.

विहापयति मन्त्रेण ऊरु पत्न्याः प्रयत्नतः ।
ऊर्वोरामन्त्रणं चैतद्विजिहीथामितीक्ष्यताम् ॥९७॥

thus, reciting the Mantra,¹ he carefully makes apart the thighs of his wife. The invocation² to the thighs is to be seen in the word *vijihīthām*. [97]

¹*mantreṇa ūrū* is an instance of the absence of Saṃdhi in Vedic style.

²This is for *āmantraṇa* in the sense of 'address (i.e. invocation) to'. An unusual sense! Already, Sureśvara used in verse 30 *upamantraṇam* and in 31 *upamantrita*.

विजिहीतेरिदं रूपं ण्यन्तस्य गतिकर्मणः ॥९८॥

This is a form of the verb root *hi* with *vi* (as prefix), referring to the activity or movement, with its causal ending (suppressed).¹ [98]

¹*vijihīthām* is to be understood as *vijihāpayethāḥ*.

मन्त्रतः पाणिनाथैनां त्रीन्वाराननुलोमतः ।

अनुमाष्टर्यथ तां जायां मन्त्रं विष्णुरितीरयन् ॥९९॥

Reciting the Mantra *viṣṇuḥ* he caresses his wife's limbs¹ with his hand three times, in an agreeable manner, (and) then² (unites with her). [99]

SP on this verse does not appear to be quite satisfying!

¹SP explains *anulomataḥ* thus: *mūrdhānam ārabhya pādāntam iti yāvat*.

²Cf. SP: *paśukarmānantaryārtho 'thaśabdaḥ*. Thus Ānandagiri suggests the sense of *anumārṣṭi* as 'he unites with her in sex act'.

Now, BU 6.4.21 is under reference.

समर्थनं कल्पनार्थस्त्वष्टावयवशस्तथा ।

निर्वर्तयतु रूपाणि शोभनानि सुतस्य मे ॥१००॥

The meaning of *kalpana* (from the verb root *klp*) is enabling.¹ (The Mantra continues:) So also, may god Tvaṣṭṛ create in all your limbs beautiful appearance² and (also in those) of my son.² [100]

¹This refers to the word *kalpayatu* in the Mantra *viṣṇuḥ* ... etc. cited in the end of the preceding verse. SP states: *putra-janmani śaktatvāpādanam iti yāvat*.

²BU and Ānandagiri on BUB seem to take the creation of the beautiful appearance in the limbs of the wife who has delivered a son—cf. Ānanagiri: *tvaṣṭā savitā tava rūpāṇi piṁśatu vibhāgena darśanayogyāni karotu*. But, Sureśvara adds *sutasya me*, he does not specifically mention the wife. Yet, see on this SP: *ātmano bhāryāyāś ca rūpāṇi nirvartitāni kim tvaṣṭṛety āśanikyāha sutasyeti*.

दर्शाहर्देवता चेह सिनीवालीति भण्यते ।

पृथुष्टुकेति सैवोक्ता पृथुस्तुतिरसौ यतः ॥१०१॥

Here, the goddess of the new moon night is called *Sinīvālī*; that very goddess is stated by the name *Pr̥thuṣṭuka*, since she has profuse praise offered to her. [101]

गर्भं ते सम्यगाधत्तामश्विनौ पुष्करस्त्रजौ ।

सूर्याचन्द्रमसावेव विज्ञेयावश्विनाविह ॥१०२॥

स्वरश्मिस्रग्विणौ तौ हि प्रसिद्धौ जगति यतः ॥१०३॥

May the two Aśvins, who wear lotus garlands, properly place you foetus; the two Aśvins are to be known here as the sun and the moon; [102]

they are indeed known as wearing (or, having) the wreathes in the form of their own rays. [103]

Now, BU 6.4.22 is under reference.

हिरण्यं ज्योतिरमृतं तन्मय्यावरणी शुभे ।
निरमन्थतां याभ्यां तावद्विनावमृतं पुरा ॥१०४॥

The word *hiranya* means the immortal flame and the two coverings, which are made up of that (*hiranya*, for the flame) are resplendent (lit. beautiful) wherewith those two Aśvins have formerly produced (lit. churned) immortality. [104]

अश्विनौ यादृशं गर्भं प्रयत्नान्निरमन्थताम् ।
आदधावस्तथा रूपं दशमे मासि सूतये ॥१०५॥

Let us two place (in our son), to be born in the tenth month, such (beautiful) form as will be similar to what the two Aśvins have carefully produced (lit. churned) as the foetus.¹ [105]

¹This refers to the beauty and immortality as implied by *amṛtam* and *rūpam* in verses 104 and 105.

यथाग्निगर्भा पृथिवी द्यौरिन्द्रेणेव भानुना ।
वायुर्दिशां यथा गर्भो दृष्टः श्लथनकर्मकृत् ॥१०६॥

Just like the earth which has Agni in the womb, like Dyaus by Indra,¹ (who is possessed of) bright lustre; so also like Vāyu, the foetus of the quarters, that (foetus in you) is seen as the agent of loosening.² [106]

The verse is very awkwardly expressive of the meaning of the BU passage.

¹*indreṇa bhānunā* is taken here a substantive (noun) followed by an attribute (noun). SP states that *bhānu* is the meaning of Indra. Yet, here it is not so specifically understandable as in Ānandagiri's comment on BUB, viz. *indreṇa sūryeṇeti yāvat*.

²Cf. verse 109 below.

आत्मनाम समुच्चार्य तथा गर्भं दधामि ते ।

तस्या वा नाम गृह्णीयान्मन्त्रमुच्चारयन्पतिः ॥१०७॥

Then, uttering his own name, this householder says, 'I place the foetus in you', after that, he should utter her name; all this, while he is reciting the Mantra.¹ [107]

¹This refers to *garbham dadhāmi te* stated in the second line.

Now, BU 6.4.23 is under reference.

मन्त्रेणाथैष सोष्यन्तीमद्विरभ्युक्षयेच्छनैः ।
वायुः पुष्करिणीं यद्वत्समिञ्जयति चालयेत् ॥१०८॥
यथा पुष्करिणीं वायुश्चालयन्नपि सर्वतः ।
न करोति क्षतिं तद्वद्गर्भ एजतु ते सुखम् ॥१०९॥

Then, when she is about to deliver, he should gently sprinkle her with water, reciting the Mantra,¹ that is to say, 'in the same way as Vāyu makes the lotus-lake stir²'; so does he activate her. [108]

(This is to mean:) As Vāyu, while making the lotus-lake stir everywhere, does not cause any harm to it, so (also) should this foetus stir in a way that causes your happiness. [109]

Verse 108 is the meaning of *soṣyantīm*

¹This is *yathā vāyuh puṣkarinīm*

²AnSS reads *samiñjayati* which should be corrected as shown above.

गर्भस्त्वां सुखयन्नेतु सहोल्बेण जरायुणा ।
व्रजो मार्गो हि गर्भस्य सार्गलोऽयं कृतः पुरा ॥११०॥

May your foetus move, causing you happiness, wrapped as it is by the chorion; indeed the way, this path of the foetus was earlier barred by the bolt (of Indra). [110]

This explains the meaning of (*garbhah*) ... *sahāvaitu jarāyunā* ... in BU.

जरायरर्गलस्तं त्वमिन्द्र निर्जहि सत्वरः ।
 गर्भे विनिःसृते पश्चाद्या निर्गच्छति योनितः ॥१११॥
 मांसपेशी समा तन्वी सावरेति निगद्यते ।
 प्राणश्चेन्द्रोऽत्र विज्ञेयः स एव प्रार्थ्यते ततः ॥११२॥

The word *jarāyu* 'chorion' refers to the bar. 'O Indra, do you strike it down, being quick.' Then, that which moves out of the genital organ (of the woman) after (the foetus has moved out), [111]

a lump of flesh, which is slender and straight(?) is called *avarā* chorion, (i.e. the outer membrane of a foetus). And here Prāṇa should be understood as Indra, as he is addressed in the prayer. [112]

Now, BU 6.4.24 is under reference.

जाते कुमारेऽथ पतिरङ्गमारोप्य तं पिता ।
 अग्निं ह्युपसमाधाय प्रसिद्धार्थमथापरम् ॥११३॥

After the son was born, the husband, viz. the father now,¹ having first placed the son on his lap and, having enkindled the fire (which is known),² (offers oblation to it). [113]

This refers to the Jātakarman rite (*saṃskāra*).

¹The words 'After ... now' for *atha* indicate that the rite of the Jātakarman is over.

²This is *āvasathya* 'domestic fire'.

घृतं दधि च संमिश्रं पृषदाज्यमितीर्यते ।
 एकीकृत्याथ संनीय पृषदाज्यस्य मन्त्रतः ॥११४॥
 उपघातं जुहोतीति णमुल्वाभीक्ष्ण्य इष्यते ।
 उपहत्योपहत्येति पृषदाज्याहुतीः क्षिपेत् ॥११५॥

Ghee and curds, which are mixed together, is known as *prṣadājya*.¹ Then, having mixed them together and brought from the *prṣadājya*, with the recitation of the Mantra,² [114]

he makes an offering, pounding (the rice grains) again and again; the suffix *ṇamul* (in the word-form *upaghātam*) is desired to convey the repetition of the action conveyed in the words *upahatyopahatya*; thus he pours the offerings of *prṣadājya*. [115]

¹It is the mixture of clarified butter, curds (and according to some honey etc. also). This is offered in rituals.

²This is mentioned in verse 116 below.

पुण्यासं स्वे गृहेऽत्राहं मनुष्याणां प्रकामतः ।
सहस्रसंख्यया शश्वद्ब्रह्महोनाम सहस्रगीः ॥११६॥

‘May I nourish, in my house here, men, thousand in number, to their hearts’ content; the word *sahasra* is a word signifier of many. [116]

एवं त्वं वर्धमानोऽत्र मन्वीथाः पुत्र संततिम् ।
संततावुपसन्ध्यां त्वं पश्वादेर्मे करिष्यसि ॥११७॥

‘Thus, growing here (i.e. in my home), O my son, may you think of continuity’—the word *upasandyām* means ‘in respect of continuity’ (*saṃtatau*)— (to mean) ‘you will multiply the cattle etc. which belong to me’. [117]

नैव व्यपेक्षते व्याख्यां स्पष्टार्थत्वेन हेतुना ।
मयि प्राणानिति ग्रन्थः स्वयमेवावगम्यताम् ॥११८॥

The portion, beginning with the words *mayi prāṇān*, being very clear in meaning, does not expect any explanation; therefore, may you understand it yourself.¹ [118]

¹This is Sureśvara’s address to his readers.

Now, BU 6.4.25 is under reference.

अथास्य स्वमुखे कर्णं दक्षिणं प्रणिधाय तु ।

वाग्वागिति हि त्रिर्ब्रूयात्त्रयी वागिति भण्यते ॥११९॥

Then, having placed the right ear of the son near unto (lit. into) his own mouth,¹ he should utter the word *vāc* three times; (because, indeed,) the three Vedas are called *Vāc*. [119]

¹That is, having placed his mouth near unto the son's ear.

Now, without referring to BU 6.4.26, Sureśvara turns to BU 6.4.27.

त्रयी वाक्त्वां श्रोत्रमार्गेण श्रेयसे प्रविशत्विद्यम् ।
यस्ते स्तन इति गिरा शस्यतेऽत्र सरस्वती ॥१२०॥

May the three Vedas, viz. *Vāc*, enter you through your ear for your bliss. In the words *yas te stanah!* here (in this context)¹ is praised *Sarasvatī*. [120]

¹This refers to the child's sucking the mother's breast.

उदारगुणसंपत्तिः सुतस्यास्त्विति भण्यते ।
शशयः शशयो ज्ञेयः शयश्च फलमुच्यते ॥१२१॥

What is said is: May there be for the son profuse excellence of qualities. The word *śaśaya* is to be known as *saśaya* 'which is accompanied by a result',¹ (wherein) *śaya* means the result.

[121]

¹That is, which shall yield a result.

गुहा शयो वा शशयः श्रुत्यैव प्रतिपादितः ।
मयोभूरन्नभूतोऽयं सर्वप्राणिभृदुच्यते ॥१२२॥
रत्नस्य पयसोऽत्यर्थं रत्नाधारश्च यः स्तनः ।
वसुनो धनस्य लब्धा च तस्य वृष्ट्यादिहेतुनः ॥१२३॥

The word *guhā* means *śaya*¹ or *śaśaya*; and the Śruti itself has stated thus: this one is the source (or, cause) of well-being.

It has become the food and nourishment (i.e. sustainer) of all living beings. [122]

The word *ratnasya* means *payasaḥ* 'of milk' and the breast is what is the substratum of *ratna*. It is the procurer of *vasu* 'wealth', the cause of showering (profuse milk) etc.² [123]

¹The word *guhā* means the base of the heart and *śaya* refers to the result that would be produced.

²We have followed the reading in the AnSS edition which is to be taken as an adjective of *dhanasya* (in neuter).

भरिकल्याणदातृत्वात्सुदत्र इति भण्यते ।
यैन पृष्यसि वार्याणि सर्वाणीह सरस्वति ॥१२४॥
देवादीनि वराणि त्वं सर्वैर्भोगैः प्रपृष्यसि ॥१२५॥

Being a giver of extensive well-being, it is described here (i.e. in this sentence by the word) *sudatra* 'liberal donor'. Since you nourish, O Sarasvatī all the choice gifts here (i.e. of this world), [124]

(this is to say:) you increase¹ the excellent gifts (*varāṇi*), viz. (those from) the gods¹ etc., by all (kinds of) enjoyments'. [125]

Sureśvara begins a new sentence in 124cd and completes it in 125 which is a verse of one line.

¹*prapūṣyasi* literally means 'nourish', yet 'increase' can go well with both the gifts and gods etc. The word etc. refers to the elements, semi-divine and human beings. It can be argued that 'increase' indicates 'growth' 'nourishment' as well.

²*devādīni* qualifies *varāṇi* (used for *vāryāṇi*— a Vedic word).

पानाय मम पुत्रस्य स्त्रीस्तने संनिवेशय ।
यथोक्तगुणकं देवि स्वस्तनं सर्वकामदम् ॥१२६॥

O Goddess, place into the breast of my wife your own breast about whose excellences I have just (spoken) and which grants

all the desires (of beings), so that my son may drink. [126]

Now, BU 6.4.28 is under reference.

इलासीत्यथ मन्त्रेण सूनोर्मातरमादरात् ।
अभिमन्त्रयते साधुकर्मावाप्त्यै स्वयं पतिः ॥१२७॥

Then, reciting the Mantra *ilāsi*, he lovingly (lit. respectfully) praises the mother of the son, so that (he,) the husband himself, should be able to complete well (i.e. successfully) his ritual performances. [127]

इति श्रीबृहदारण्यकोपनिषद्वाङ्मयवार्तिके षष्ठाध्यायस्य
चतुर्थं ब्राह्मणम् ॥४॥

BRHADĀRANYAKOPANIṢAD-
BHĀṢYA-VĀRTIKA

6.5

संभावितं न यत्पूर्वं कृत्स्नेऽस्मिन्ब्राह्मणेऽपि तत् ।
खिलकाण्डे तदखिलं पुत्रमन्थान्तमीरितम् ॥१॥

Whatever was not considered (i.e. discussed) in the whole of this Brāhmaṇa¹ earlier, is all of it considered in the Khila Kāṇḍa (so far) up to the end of (the discussion on) the Putramantha ritual. [1]

This refers to what has been discussed up to the end of the preceding Brāhmaṇa (viz. BU 6.4); cf. SP *vṛttaṃ saṃkīrtayati*.

¹This is for BU itself.

पूर्वकाण्डैकदेशत्वात्खिलकाण्डं न वंशभाक् ।
पूर्वत्र विद्यासंभेदाद्भिन्नौ वंशविहोदितौ ॥२॥

The Khila Kāṇḍa, being a (complementary) part of the earlier Kāṇḍas, (it does not have a separate) line of teachers. In the earlier Kāṇḍas (i.e. in their two groups) there were two distinct lines (of teachers), therefore, they (viz. the two lines) were stated here¹ with reference to the distinction of the lores in them.² [2]

In this verse and the preceding, it is pointed out as to why there is no mention of any line of teachers in relation to the Khila Kāṇḍa.

¹The word here refers to the two Kāṇḍas, viz. Madhu Kāṇḍa and Muni Kāṇḍa.

²One could have objected that the two Kāṇḍas (Madhu- and Yājñavalkya-) pertained to only one lore, i.e. *brahmavidyā*.

Therefore, it would not be right to say: *pūrvatra vidyāsambhedah*. This objection is answered away by the present verse.

पूर्वैश्चतुर्भिरध्यायैस्त्वाष्ट्रं कक्ष्यं च यन्मधु ।
व्याख्यातं तदशेषेण वंशस्तत्र तदर्थभाक् ॥३॥

In the first four Adhyāyas (of the Upaniṣad) was fully explained that Madhu, which belonged to Tvaṣṭṛ and was hidden, and, therefore, (for those Adhyāyas) the line (of teachers) related to the contents of the same. [3]

मधुकाण्डागमार्थस्य यथावत्प्रतिपत्तये ।
काण्डं स्याद्याज्ञवल्कीयं वंशस्तद्विषयस्तथा ॥४॥

In order that one should well understand the meaning of the tradition relating to the Madhu Kāṇḍa, there followed (or better, was presented) the Kāṇḍa of Yājñavalkya and also the line (of the teachers) relating to the same.¹ [4]

¹*yathāvatpratipatti* makes this verse significant. In the earlier Kāṇḍa, there was refutation of varying views, whereas, in the latter Kāṇḍa, the thought (though the same) was presented with suitable reasoning in support of it. This clarifies what is meant by *vidyāsambheda*.

अयं तु वंशो विज्ञेयः कृत्स्नप्रवचनाश्रयः ।
समाप्तौ ब्राह्मणस्योक्तेरयमर्थोऽवसीयते ॥५॥

As for (*tu*) this line (of teachers), it has been related to the entire discussion in the Upaniṣad. Therefore, at the end of (the entire) Brāhmaṇa,¹ this (line of teachers is to be for the whole of it); this is to be concluded from the statement.

[5]

उक्तवेदार्थविज्ञानसाकल्यप्रतिपत्तये ।
जपो वंशस्य येनातः श्रुत्या वंश इहोदितः ॥६॥

Since, in order that one attains completeness in one's knowledge about the meaning of the Veda that is taught, there is the recitation of the line (of teachers of the same). As such, this Śruti (also) has stated here the line (of teachers).

[6]

सर्वज्ञानां यतो वंशास्त्रयोऽप्येते यथोदिताः ।
अतस्तत्स्मृतितः सम्यग्ज्ञानभानूदयो भवेत् ॥७॥

Since all these three lines of the all-knowing teachers have been stated (here in the Upaniṣad), therefore, by the remembrance of them (all), there would certainly (lit. well) arise the sun in the form of knowledge.

[7]

पुत्रमन्थेन संस्कारः स्त्रीणामेवेह वर्णितः ।
यतोऽतः स्त्रीप्रधानोऽयं पुत्राणां वंश उच्यते ॥८॥

Since, in (the prescription of) the Putramantha there was described here (i.e. in this Upaniṣad) a Saṃskāra for women, therefore, this line of the sons (who are teachers) is stated, prominence (being given) to women (who were their mothers).

[8]

अन्यतोऽन्यत एवायं संप्रदायो यथाभवत् ।
न तथा ब्रह्मणस्तस्मात्तत्स्वयं भवति शब्दते ॥९॥

As this tradition followed (i.e. came into being) from one to another, so it did not happen in the case of the Brahman; therefore, it is mentioned as self-born.

[9]

This explains why the word *svayambhu* is used with *brahman*.

अन्येषां वेदतो ज्ञानं भूरिसाधनसंश्रयात् ।
स्वतो वेदात्मनस्तस्मात्सर्वज्ञानमयो हि सः ॥१०॥

In the case of others, there occurs the knowledge from (the

study of) the Veda, by using many means (towards acquiring the same); but, in the case of the Ātman of the Veda, (its) knowledge (occurs of itself). Therefore, that (viz. the Vedātman) is (said to be) 'possessed of all knowledge'. [10]

सर्वस्यैष वशीत्यादि तथापि प्रागवादिषम् ।
परैव देवता वेदो यच्च किञ्चिच्चराचरम् ॥११॥

(As regards) *sarvasyaiṣa vaśī* etc. also *api* ¹ I have said earlier: ² the Veda (or the Vedātman) is the highest deity itself and also (it is) whatever exists, movable and immovable. [11]

¹The force of 'also' evokes reference to *yaḥ sarvajñaḥ sarvavid* ... (*Muṇḍakopaniṣad* 2.2.7).

²Cf. BUBV 3.8.29.

प्रतिपाद्यात्मनात्मानं नामरूपादिसाधनः ।
एति पूर्णात्मतां साक्षाद्वियां वाचामगोचरम् ॥१२॥

(Therefore), one, possessed of the means, viz. name, form etc., knows one's own self by oneself and becomes complete in nature, directly perceptible to oneself, not (becoming) a subject of one's own intellect and words. [12]

त्रय्यैव ब्राह्मणो विद्वानात्मनैवाद्वयं परम् ।
विदित्वा निर्वृतिं याति कार्यकारणयोः पराम् ॥१३॥

A Brāhmaṇa becomes a knower only through (the study of) the *trayī* and by himself (becoming) the knower of the non-dual highest (Vedātman) and then, having known (his own true nature), attains the highest bliss which is beyond the cause and effect relations. [13]

वेदोऽसीत्यत एवास्य नाम जातस्य कुर्वते ।
वेदात्मना कथं नाम परं ब्रह्म प्रपत्स्यते ॥१४॥

For this very reason do they name the newly born (son) in the words *vedo 'si*. How can he, being himself the Veda, understand the highest Brahman? [14]

This brings out the purpose of naming the new-born son as Veda. Being Veda, i.e. the Ātman, he is considered to be a natural knower of his own self.

वाजिशखासु सर्वासु ह्यासुरायणपर्वकाः ।
समाना वंशर्षयोऽमौ ह्या समाप्तेरितीक्ष्यताम् ॥१५॥

In all the branches of Vājasaneyins, the lines of seers are the same, as beginning with Āsurāyaṇa. Let this be understood up to the end (of this last Brāhmaṇa). [15]

आदित्येन हि प्रोक्तानि यजुष्येतानि यानि तु ।
आदित्यानीत्यतस्तानि सम्यगाचक्षते बुधाः ॥१६॥

Since all these Yajus Mantras are declared by Āditya, therefore, the wise ones have well described them as coming from Āditya. [16]

वेदात्मनो रवेरेवं संप्रदायोऽयमागतः ।
परमेष्ठ्यादिकान्सर्वान्पारंपर्येण मानुषान् ॥१७॥

This entire tradition has thus come from the sun, the Ātman of the Veda, up to all men, beginning with Parameṣṭhin in a successive line. [17]

असंसृष्टं परं ब्रह्म सर्वदोषविवर्जितम् ।
एतदादित्यगं भाति तद्वेदानां परं वपुः ॥१८॥

The highest Brahman is unaffected by (lit. mixed with) anything else, and is devoid of any fault. This one, existing in the sun, shines forth as the highest form of the Veda. [18]

उत्सन्नमपि यद्ब्रह्म तदादित्ये न नश्यति ।
तदार्षेणैव विन्दन्ति तपस्तप्त्वा महर्षयः ॥१९॥

And that Brahman, even though destroyed,¹ does not (really) perish.² The great seers come to know it after performing penances in the seers' tradition.³ [19]

¹This refers to *tasmād yajñāt sarvahutaḥ*, conveying thereby that the Vedas, comprising composition of words, get destroyed at the time of the deluge (*pralaya*).

²This is because Āditya, identified with the Brahman, does not perish even in the deluge.

³SP clarifies this tradition by a verse, viz. *Mahābhārata*:
yugānte 'ntarhitān vedān setihāsān maharṣayaḥ /
lebhire tapasā pūrvam anujñātāḥ svayambhuvā // (12.203.17)

वेदब्रह्मण आरभ्य सर्वेषामपि शाखिनाम् ।
सांजीवीसूनुपर्यन्तो वंश एको न भिद्यते ॥२०॥

In the case of the followers of all the branches (of this Veda), this one line of teachers, which begins with Vedabrahman and up to (the mention of) the son of Sāñjivī, does not differ.

[20]

सांजीवीपुत्रतस्त्वर्वाकप्रतिशाखं पृथक्पृथक् ।
आचार्यभेदाद्विद्यन्ते वंशा वाजसनेयिनाम् ॥२१॥

And, from the son of Sāñjivī, the later lines of the teachers of the Vājasaneyā Brāhmaṇas differ from one another in relation to different teachers.

[21]

इत्युक्तैकात्म्यवाक्यप्रविकचकमला प्राज्यसन्न्यायगन्धा
काण्डैश्चित्रा षडधैर्मधुमुनिखिलकैर्मस्करीन्द्रालिजुष्टा ।
श्लोकग्रन्थिप्रबद्धाविषयमितिफला प्रेमसत्सूत्रसूत्रा
माला गङ्गेव शंभुं पदममलमजं वैष्णवं सानुयाता ॥२२॥

Thus, this wreath of fully blown lotuses in the form of sentences (relating to) the singleness of the Ātman (which is propounded in the Śruti), having the profuse fragrance (in the form) of good reasoning, variegated in its three (lit. half of six) sections (called) Madhu, Muni and Khila, enjoyed by the bee (in the form of) the pre-eminent (or the chief) ascetic, tied up by knots (in the form of) Ślokas, bearing fruit (in the form of) knowledge of what cannot be the object (of knowing) and stringing (together) the bliss(-giving) existent Sūtra (i.e. Hiranyagarbha), has followed the step of the all-pervading (lit. Viṣṇu) which is the most pure (or faultless) and unborn, in the same way as Gaṅgā (followed the head of) the source of well-being (lit. Śambhu, i.e. Śiva). [22]

This is a very ornate verse, deliberately worked out by Sureśvara. He compares his composition in verses to a wreath of lotuses, many minute details of the composition and the different components of the wreath being shown as similar; these are explained in their fullness in SP. The words Śambhu and Vaiṣṇava *pada* are purposely used by Sureśvara because (it appears) he wants to show his great regard for, or devotion to, the bliss-bringing Śāṅkara, who could be compared to the commonly accepted gods of his times—Śiva and Viṣṇu.

यत्प्रजोदधियुक्तिशब्दनखजश्रद्धैकसन्नेत्रक-
स्थैर्यस्तम्भमुमुक्षुदुःखितकृपायत्नोत्थबोधामृतम् ।
पीत्वा जन्ममृतिप्रवाहविधुरा मोक्षं ययुर्मोक्षिणस्
तं वन्देऽत्रिकुलप्रसूतममलं वेधोभिधं मद्गुरुम् ॥२३॥

I bow down to my Guru, who is born in the family of Atri, called Vedhas¹ and (the purest among the) pure, from whose nectar(-like) instruction/teaching, that came from his efforts out of compassion for the sorrow-stricken seekers of liberation, as the steady pillar for the churning rod in the form of the reasonable preaching words and the churning rod in the form of faith which helps churning the ocean-like intelligence,

and drinking which the seekers of liberation attained liberation, being freed from (lit. becoming bereft of) the stream of births and deaths. [23]

SP offers an elaborate explanation of the first two lines which can be read with profit.

यामस्मद्गुरुरेव वेदशिरसामैकात्म्यतात्पर्यतो
वृत्तिं सज्जनशंकरिं सुविमलां नानानयोद्वयोतिताम् ।
चक्रे काण्वसमाश्रितोपनिषदो दुस्तर्कदोषापहां
श्रद्धामात्रबलेन वार्तिकमिदं तस्याः समासात्कृतम् ॥२४॥

With the strength of my faith (in my Guru) alone have I composed in brief this Vārtika on that Vṛtti on the Upaniṣad belonging to the Kāṇvas' recension which my Guru himself has written as the purport (of all the Upaniṣads), viz. the singleness of the Ātman (conveyed as) the head (i.e. most important) of all the Vedas, illuminated by varied reasoning, extremely clear and causing happiness to the wise (lit. good) men. [24]

Thus Sureśvara emphatically asserts the extreme clarity and faultlessness of Śaṅkara's Vṛtti on BU of Kāṇva recension.

आ शैलादुदयात्तथास्तगिरितो भास्वद्यशोरश्मिभिर्
व्याप्तं विश्वमनन्धकारमभवद्यस्य स्म शिष्यैरिदम् ।
आराजज्ञानगभस्तिभिः प्रतिहतश्चन्द्रायते भास्करस्-
तस्मै शंकरभानवे तनुमनोवाग्भिर्नमस्तात्सदा ॥२५॥

May this be my obeisance, with my body, mind and speech, to the Sun in the form of Śaṅkara, whose disciples have pervaded this universe from the rising mountain up to the setting mountain¹ by the brilliant rays of their fame and, (as a consequence), it (viz. the universe) has become free from darkness, and by the rays of whose knowledge, the Sun is vanquished, (even) from afar and (he then) appears like the

moon.

[25]

Once again, Sureśvara works out the sustained metaphor here as in verse 22 above.

¹Actually the mountain from behind which the sun rises and that beyond which it sets.

इति श्रीबृहदारण्यकोपनिषद्भाष्यवार्तिके षष्ठाध्यायस्य
